(1) Variation in cross direction dry tensile strength of not more than 2 units below the minimum requirement based on paragraphs (a) and (b) of this section will be permitted for each wall of the sack, provided the variation is compensated for by a machine direction tearing strength test value in excess of the minimum requirement obtained from the tables, in the ratio of 5 units of tear-

ing strength for each unit of dry tensile strength test below the minimum requirement; and variation in combined dry tensile strength of not more than 4 units below the minimum requirement based on paragraphs (a) and (b) of this section will be permitted for each wall used provided the variation is compensated for by a combined tearing strength test value in excess of the minimum requirement obtained from the tables in the ratio of 5 units of combined tearing strength for each unit of dry tensile strength test below the minimum requirement. Similarly, variation in machine direction tearing strength of not more than 10 units below the minimum requirement will be permitted for each wall, provided the variation is compensated for by a cross direction dry tensile strength test value in excess of the minimum requirement obtained from the tables in the ratio of 1 unit of dry tensile strength for each 5 units of tearing strength test below the minimum requirement; and variation in combined tearing strength of not more than 20 units below the minimum requirement obtained from the tables will be permitted for each wall provided the variation is compensated for by a combined dry tensile strength test value in excess of the minimum requirement obtained from the tables in the ratio of 5 units of tearing strength for each unit of dry tensile strength below the minimum requirement.

**§ 78.239–3 Construction and capacity.**

(a) Bags must be at least 3 thicknesses of paper; this must be heavy duty shipping sack kraft paper conforming to the requirements of § 78.239–2 paragraphs (a) and (b), or equivalent, with a minimum total basis weight of 130 pounds of paper (500 sheets, 24" x 36"). Outer sheet must be of water-resistant stock and at least 50 pounds basis weight, inner sheets not less than 40 pounds basis weight. Bags to be of sewn and taped, cemented, taped, satchel bottom or other construction of equal efficiency to form a sift-proof and reasonably air-tight container. Authorized for not over 50 pounds net weight, except that bags having a minimum total basis weight of 160 pounds of paper (500 sheets, 24" x 36") with outer sheet of water-resistant stock and at least 60 pounds basis weight inner sheets not less than 50 pounds basis weight, are authorized for not to exceed 100 pounds net weight of contents.

(b) Moistureproof barrier sheets of paper, if used, must meet the requirements of § 78.239–2 (b) and shall be considered as one thickness of paper and shall be counted as 50 pounds basis weight (500 sheets, 24" x 36").

**§ 78.239–4 Adhesive.**

(a) Moisture resistant adhesive must be used on all seams, joints, and bottom patch, if any.

**§ 78.239–5 Closure.**

(a) For all bags: Any closure for the top which is equal in efficiency to that of the bottom, is authorized.

**§ 78.239–6 Tests for shipment.**

(a) Bags as prepared for shipment must be able to withstand four 4-foot drops, one on each end and one each on opposite sides, without sifting or rupture.

**§ 78.239–7 Marking.**

(a) On each bag with letters and figures at least ½ inch high in rectangle as follows:

ICC–44E

(1) This mark shall be understood to certify bag complies with all specification requirements.

(2) Name and address of maker located just above or below the mark specified in paragraph (a) of this section; symbol (letters) authorized if registered with the Bureau of Explosives.

**§ 78.240 Specification 45B; bags, cloth and paper, lined.**

**§ 78.240–1 Compliance.**

(a) Required in all details.

**§ 78.240–2 Capacity.**

(a) Not over 100 pounds net.

**§ 78.240–3 Assembly.**

(a) Bags shall consist of cloth and paper parts all cemented together with curing rubber latex or asphalt, thus making a waterproofed bag as follows:

(1) Inside lining sheet.
(2) Cloth sheet.
(3) Intermediate sheet.
(4) Outside paper sheet.

**§ 78.240–4 Inside lining sheet and intermediate sheet.**

(a) Inside lining sheet and intermediate sheet must be regenerated cellulose film at least 0.0012 inch thick or polyvinyl alcohol film at least 0.001 inch thick or other material of equal thickness and equivalent efficiency.

**§ 78.240–5 Cloth sheet.**

(a) Cloth sheet must be burlap at least 8-ounce, 40-inch Calcutta A or B mill grade or Osnaburg cotton cloth at least 8½ ounces per square yard.

**§ 78.240–6 Paper.**

(a) Paper must be shipping sack Kraft, creped, at least 45 pounds per ream (500 sheets 24" x 36") before creping.

**§ 78.240–7 Latex and asphalt.**

(a) Latex and asphalt must be in sufficient quantity to form a secure bond between the parts of the bags.

**§ 78.240–8 Seams.**

(a) Seams must be dust-tight and made by cementing or by sewing and taping with impregnated cloth tape to give seam strength at least equal to that of bag material and prevent sifting.

**§ 78.240–9 Test.**

(a) The finished container, filled and closed as for shipment, must be capable of withstanding 2 drop tests of 6 feet on the butt and 2 drop tests of 6 feet on the side without sifting or rupture of burlap or liner.

**§ 78.240–10 Marking.**

(a) Marking on each container by marks at least 1 inch high as follows:

(1) ICC–45B; this mark shall be understood to certify that the container complies with all specification requirements.

(2) Name and address of maker; located above or below the mark specified in subparagraph (1) of this paragraph; symbol (letters) authorized if registered with the Bureau of Explosives.

**§ 78.240–11 Closing for shipment.**

(a) By sewing and taping with impregnated cloth tape to give seam strength at least equal to that of bag material and prevent sifting.

## Subpart H—Specifications for Portable Tanks

**§ 78.245 Specification 51; steel portable tanks.**

**§ 78.245–1 Requirements for design and construction.**

(a) Tanks shall be of seamless or welded steel construction or combination of both and shall have in excess of 1,000 pounds water capacity. Fusion welded tanks shall be stress-relieved and radiographed to provide the highest joint efficiency provided by the Code. Tanks shall be designed and constructed in accordance with and fulfill the requirements of (1) the 1950 edition, (2) 1952 edition, (3) 1956 edition, (4) 1959 edition, or (5) 1962 edition of Section VIII of the American Society of Mechanical Engineers Boiler and Pressure Vessel Code; no revisions except to include ASME Case Interpretations Nos. 1204–9, 1297–3, and 1298–2 and all addendas through the 1962 addenda issued July 16, 1962 (any or all of which hereinafter is referred to as "the Code"). When the above referenced ASME Case interpretations are used for the construction of tanks, the following additional requirements shall be met:

(1) Welding procedure and welder performance tests shall be made in accordance with the 1962 edition of Section IX of the ASME Boiler and Pressure Vessel Code. In addition to the essential variables enumerated in Section IX of this Code, the following shall also be considered essential variables: number of passes, thickness of plate, heat input per pass, and manufacturer of rod or flux. The number of passes, thickness of plate and heat input per pass shall not vary more than 25 percent from the procedure qualification.

(2) Impact tests shall be made on a lot basis. A lot shall be defined as 100 tons or less of the same heat, and having a thickness variation no greater than plus or minus 25 percent. The minimum impact required for full size specimens shall be 20 ft.-lbs. (or 10 ft.-lbs. for half sized specimens) at 0° F Charpy V-notch in both the longitudinal and transverse direction. If the lot test does not pass this requirement, individual plates may be accepted if they individually meet this impact test requirement.

(3) Welding procedure and welder qualification tests shall be made each year with one copy of the reports submitted to the Bureau of Explosives.

(b) Except as noted below, all openings in the tank shall be grouped in one location, either at the top of the tank or at one end of the tank.

*Exceptions:* (1) The openings for liquid level gauging devices, or for safety devices, may be installed separately at the other location or in the side of the shell; (2) one plugged opening of 2-inch National Pipe Thread or less provided for maintenance purposes may be located elsewhere; (3) an opening of 3-inch National Pipe Size or less may be provided at another location, when necessary, to facilitate installation of condensing coils.

(c) On and after August 31, 1953, every uninsulated portable tank shall, unless it be covered with a jacket made of aluminum, stainless steel, or other bright nontarnishing metal, be painted all over a white, aluminum, or similar reflecting color.

**§ 78.245–2 Material.**

(a) All material used for the construction of the tank and appurtenances shall be suitable for use with the commodity to be transported therein.

(b) A material of thickness less than 5/16 inch shall not be used for the shells and heads.

**§ 78.245–3 Design pressure.**

(a) The design pressure of a tank authorized under this specification shall be not less than the vapor pressure of the commodity contained therein at 115° F., or as prescribed for a particular commodity by Part 73 of this chapter, except that in no case shall the design pressure of any container be less than 100 psig nor more than 500 psig. When corrosion factor is prescribed by these regulations, the wall thickness of the tank calculated in accordance with the "Code" (see § 78.245–1(a)) shall be increased by 20 percent or 0.10 inch, whichever is less.

NOTE 1: The term "design pressure" as used in this specification is identical to the term "maximum allowable working pressure" as used in the "Code" (see § 78.245–1 (a)).

**§ 78.245–4 Tank mountings.**

(a) Tanks shall be designed and fabricated with mountings to provide a secure base in transit. "Skids" or similar devices shall be deemed to comply with this requirement.

(b) All tank mountings such as skids, fastenings, brackets, cradles, lifting lugs, etc., intended to carry loadings shall be permanently secured to tanks in accordance with the requirements of the Code under which the tanks were fabricated and shall be designed to withstand static loadings in any direction equal to twice the weight of the tank and attachments when filled with the lading using a safety factor of not less than four, based on the ultimate strength of the material to be used. The specific gravity used in determining the static loadings shall be shown on the marking required by § 78.245–6(a) and on the report required by § 78.245–7(a).

(c) Lifting lugs or hold-down lugs may be added to either the tank or tank mountings. If lifting lugs and hold-down lugs are added directly to the tank, they shall be secured to doubling plates welded to the tank and located at points of support, except that lifting lugs or hold-down lugs with integral bases serving as doubling plates may be welded directly to the tank. Each lifting lug and hold-down lug shall be designed to withstand static loadings in any direction equal to twice the weight of the tank and attachments when filled with the lading using a safety factor of not less than four, based on the ultimate strength of the material to be used.

(d) All tank mountings shall be designed so as to prevent the concentration of excessive loads on the tank shell.

**§ 78.245–5 Protection of valves and accessories.**

(a) All valves, fittings, accessories, safety devices, gaging devices, and the like shall be adequately protected against mechanical damage.

(b) The protective device or housing shall comply with the requirements under which the tanks are fabricated with respect to design and construction, and shall be designed to withstand static loadings in any direction equal to twice the weight of the tank and attachments when filled with the lading using a safety factor of not less than four, based on the ultimate strength of the material to be used.

(c) Requirements concerning types of valves, retesting, and qualification of portable tanks contained in §§ 73.32 and 73.315 of this chapter must be observed.

**§ 78.245–6 Name plate.**

(a) In addition to the markings required by the Code (see § 78.245–1(a)) under which tanks were constructed, they shall have permanently affixed, on one of the heads of the tank, a metal plate. This plate shall be permanently affixed by means of soldering, brazing, or welding around its complete perimeter. Neither the plate itself nor the means of attachment to the tank shall be subject to destructive attack by the contents of tank. Upon such plate shall be plainly marked by stamping, embossing, or other means of forming letters into or onto the metal of the plate itself the following information in characters at least ⅜ inch high:

Manufacturer's name _____
Serial No. _____ Owner's serial No. _____
I.C.C. Specification No. _____
Water capacity (pounds) _____
Tare weight (pounds) _____
Design pressure (psig) _____
Design specific gravity _____
Original test date _____
Tank retested at _____ (psig) on _____

(b) All tank outlets and inlets, except safety relief valves, shall be marked to designate whether they communicate with vapor or liquid when the tank is filled to the maximum permitted filling density.

**§ 78.245–7 Report.**

(a) A copy of the manufacturer's data report required by the Code (see § 78.245–1(a)) under which the tank is fabricated shall be furnished for each new tank to the owner and the Bureau of Explosives. In addition, the manufacturer or owner shall register each tank with the Bureau of Explosives in the following form:

Place _____
Date _____

Portable tank:
Manufactured for _____ Company
Location _____
Manufactured by _____ Company
Location _____
Consigned to _____ Company
Location _____
Size ____ feet outside diameter by ____ long

Marks on tank as prescribed by § 78.245–6 of this specification are as follows:

Manufacturer's name _____
Serial No. _____ Owner's serial No. _____
I.C.C. specification ____ Code symbol ____
Date of manufacture _____
Water capacity (pounds) _____
Tare weight (pounds) _____
Design pressure (psig) _____
Design specific gravity _____

It is hereby certified that this tank is in complete compliance with the requirements of ICC Specification No. 51.

(Signed) _____
(Manufacturer or owner)

**§ 78.246 Specification 52; aluminum or magnesium portable tanks.**

**§ 78.246–1 Compliance.**

(a) Required in all details.

**§ 78.246–2 Composition and capacity.**

(a) Tanks shall be constructed of aluminum base alloy at least 96 percent pure, or other aluminum base alloys of equivalent strength and physical properties, or ZE–10A magnesium alloy suitable for use with the commodity to be transported therein and having a capacity not over 500 gallons.

**§ 78.246–3 Construction.**

(a) Tanks shall be of all welded fabrication. Welding shall be performed in a workmanlike manner using suitable welding materials. Tanks shall be formed of material at least 0.250 inch thick; material shall comply with the requirements of § 78.246–2. Cubical containers shall have corners reinforced with suitable pads or legs efficiently welded thereto.

**§ 78.246–4 Openings and closures.**

(a) Tanks shall have one fill opening with properly gasketed positive type closure and may have one threaded flange opening not over 2.3 inches in diameter which must be provided with secure gasketed closure plug or a 2-inch opening which shall be closed with a gasketed quick-locking cap. Bottom discharge opening not over 3 inches in diameter authorized.

**§ 78.246–5 Tank mountings.**

(a) Tanks shall be designed and fabricated with mountings to provide a secure base in transit. "Skids" or similar devices shall be deemed to comply with this requirement.

(b) All tank mountings such as skids, fastenings, brackets, cradles, lifting lugs, etc., intended to carry loadings shall be permanently secured to tanks in accordance with the requirements under which the tanks are fabricated and shall be designed with a factor of safety of four, and built to withstand loadings in any

direction equal to two times the weight of the tanks and attachments when filled with water.

**§ 78.246–6 Tests.**

(a) Each tank shall be tested by introduction of at least 2 pounds sustained air pressure during which time all welded areas shall be examined for leakage by coating entire welded seam area with soap suds. Areas that show leakage in this test may be repaired by welding and must be retested to determine efficiency.

**§ 78.246–7 Marking.**

(a) Marking on each container in an unobstructed area, by embossing or diestamping on the container, or on a metal plate securely attached by welding, in letters and figures at least ⅜ inch in height, as follows:

(1) ICC–52 * * * (stars to be replaced by rated gallonage capacity). These marks shall be understood to certify that the container complies with all specification requirements.

(2) Name or symbol (letters) of maker or user assuming responsibility for compliance with specification requirements. Symbol letters must be registered with the Bureau of Explosives.

**§ 78.250 Specification 55; metal-encased, lead or uranium metal-shielded, radioactive materials container.**

**§ 78.250–1 Compliance.**

(a) Required in all details.

**§ 78.250–2 Requirements for design and construction.**

(a) Lead or uranium metal shield to be encased in mild steel or equally fire resistant metal of minimum wall thickness as follows:

(1) One-eighth inch (⅛") thick for not more than 6 inches of lead or uranium metal (see Note 1).

(2) One-fourth inch (¼") thick for more than 6 inches of lead or uranium metal (see Note 1).

NOTE 1: Thickness of lead to be measured from outer edge of source cavity to nearest point on outer container wall.

(b) Lead or uranium metal shield to be completely encased so that molten lead or uranium metal will not flow away or lose its shielding efficiency if involved in a fire. The shield must be supported in the outer container in such manner that it cannot change position under any ordinary conditions. Parts of the shield must be so designed that radiation cannot be "beamed" at point where sections join (offset design required).

(c) Containers weighing more than 500 pounds must be fitted with skids or otherwise designed so that excessive weight will be prevented on small areas of car or truck floors.

(d) Containers weighing more than 500 pounds must be provided with hooks, handles, skids, or other devices to facilitate handling.

(e) Containers must be of such size and design as are necessary to reduce the radiation from the container to within the limits prescribed in § 73.393 of this chapter.

(f) Containers constructed with tubing for drainage purpose must have the opening exterior to the shipping container plugged or capped. Drain lines must be plugged or capped with a material which will have a melt-point at or below that of lead, for example, lead, hard rubber or plastic.

**§ 78.250–3 Welding and brazing.**

(a) When used to join parts of the container must be performed in a workmanlike manner and shall provide a joint efficiency of not less than 85 percent. The melting point of brazing material must be in excess of 1,000° F.

**§ 78.250–4 Closures.**

(a) Closure must be by positive fastening device capable of withstanding severe impacts without failure.

(b) Lead or uranium metal shielding forming part of closing device must be completely encased in mild steel or equally fire-resistant metal.

(c) Closure must be of off-set design where inserted into other parts of the container.

(d) A means must be provided on the closure to accommodate a seal of a type that must be destroyed if container is opened for any purpose.

**§ 78.250–5 Marking.**

(a) Marking on each container in an unobstructed area, by embossing or diestamping on the container, or on a metal plate attached to the container by welding or brazing, in letters and figures at least ¼" in height, as follows:

(1) ICC–55*** (stars to be replaced by the tare weight of the container (for example: ICC–55 850)). These marks shall be understood to certify that the container complies with all specification requirements.

(2) The words "RADIOACTIVE MATERIAL."

(3) Name or symbol (letters) of maker or user assuming responsibility for compliance with specification requirements; this must be recorded with the Bureau of Explosives.

**§ 78.255 Specification 60; steel portable tanks.**

**§ 78.255–1 General requirements.**

(a) Tanks shall be constructed in accordance with all requirements of section VIII of the Code for Unfired Pressure Vessels of the American Society of Mechanical Engineers, 1946, Edition, for U-201 fusion-welded unfired pressure vessels.

(b) Tanks shall be of fusion-welded construction, cylindrical in shape, with seamless heads concave to the pressure. Tank shells may be of seamless construction.

(c) Tanks, including all permanent attachments, must be stress relieved as a unit.

(d) Requirements concerning types of valves, retesting, and qualification of portable tanks contained in §§ 73.32 and 73.315 of this chapter must be observed.

**§ 78.255–2 Material.**

(a) Material used in the tanks shall be steel of good weldable quality in conformity with requirements of paragraph U–71 of the A.S.M.E. Code, 1946 Edition.

(b) The minimum thickness of metal, exclusive of lining material, for shell and heads of tanks shall be as follows:

| Tank capacity: | *Minimum thickness (inch)* |
|---|---|
| Not more than 1,200 gallons | ¼ |
| Over 1,200 to 1,800 gallons | 5/16 |
| Over 1,800 gallons | ⅜ |

**§ 78.255–3 Expansion domes.**

(a) Expansion domes, if applied, must have a minimum capacity of one percent of the combined capacity of the tank and dome.

**§ 78.255–4 Closures for manholes and domes.**

(a) The manhole cover shall be designed to provide a secure closure of the manhole. All covers, not hinged to the tanks, shall be attached to the outside of the dome by at least ⅛ inch chain or its equivalent. Closures shall be made tight against leakage of vapor and liquid by use of gaskets of suitable material.

**§ 78.255–5 Bottom discharge outlets.**

(a) Bottom discharge outlets prohibited, except on tanks used for shipments of sludge acid and alkaline corrosive liquids.

(b) If installed, bottom outlets or bottom washout chambers shall be of metal not subject to rapid deterioration by the lading, and each shall be provided with a valve or plug at its upper end and liquid-tight closure at its lower end. Every such valve or plug shall be designed to insure against unseating due to stresses or shocks incident to transportation. Bottom outlets shall be adequately protected against handling damage and outlet equipment must not extend to within less than one inch of the bottom bearing surface of the skids or tank mounting.

**§ 78.255–6 Loading and unloading accessories.**

(a) When installed, gauging, loading and air inlet devices, including their valves, shall be provided with adequate means for their secure closure; and means shall also be provided for the closing of pipe connections of valves.

(b) Interior heater coils, if installed, must be of extra heavy pipe and so constructed that breaking off of exterior connections will not cause leakage of tanks.

**§ 78.255–7 Protection of valves and accessories.**

(a) All valves, fittings, accessories, safety devices, gauging devices, and the like shall be adequately protected against mechanical damage by a housing closed with a cover plate.

(b) Protective housing shall comply with the requirements under which the tanks are fabricated with respect to design and construction, and shall be designed with a minimum factor of safety of four to withstand loadings in any direction equal to two times the weight of the tank and attachments when filled with water.

**§ 78.255–8 Safety devices.**

(a) Safety devices are to be as required, subject to approval of the Bureau of Explosives, by shipping regulations.

**§ 78.255–9 Compartments.**

(a) When the interior of the tank is divided into compartments, each compartment shall be designed, constructed and tested as a separate tank. Thickness of shell and compartment heads shall be determined on the basis of total tank capacity.

**§ 78.255–10 Lining.**

(a) If a lining is required, the material used for lining the tank shall be homogeneous, nonporous, imperforate when applied, not less elastic than the metal of the tank proper. It shall be of substantially uniform thickness, not less than 1/32 inch thick if metallic, and not less than 1/16 inch thick if nonmetallic, and shall be directly bonded or attached by other equally satisfactory means. Rubber lining shall be not less than 3/16 inch thick. Joints and seams in the lining shall be made by fusing the material together or by other equally satisfactory means. The interior of the tank shall be free from scale, oxidation, moisture and all foreign matter during the lining operation.

**§ 78.255–11 Tank mountings.**

(a) Tanks shall be designed and fabricated with mountings to provide a secure base in transit. "Skids" or similar devices shall be deemed to comply with this requirement.

(b) All tank mountings such as skids, fastenings, brackets, cradles, lifting lugs, etc., intended to carry loadings shall be permanently secured to tanks in accordance with the requirements under which the tanks are fabricated, and shall be designed with a factor of safety of four, and built to withstand loadings in any direction equal to two times the weight of the tanks and attachments when filled to the maximum permissible loaded weight.

(c) Lifting lugs or side hold-down lugs shall be provided on the tank mountings in a manner suitable for attaching lifting gear and hold-down devices. Lifting lugs and hold-down lugs welded directly to the tank shall be of the pad-eye type. Doubling plates welded to the tank and located at the points of support shall be deemed to comply with this requirement.

(d) All tank mountings shall be so designed as to prevent the concentration of excessive loads on the tank shell.

**§ 78.255–12 Pressure test.**

(a) Each completed portable tank prior to application of lining shall be tested before being put into transportation service by completely filling the tank with water or other liquid having a similar viscosity, the temperature of which shall not exceed 100° F. during the test, and applying a pressure of 60 pounds per square inch gauge. The tank shall be capable of holding the prescribed pressure for at least 10 minutes without leakage, evidence of impending failure, or failure. All closures shall be in place while the test is made and the pressure shall be gauged at the top of the tank. Safety devices and/or vents shall be plugged during this test.

**§ 78.255–13 Repair of tanks.**

(a) Tanks failing to meet the test may be repaired and retested, provided that repairs are made in complete compliance with the requirements of this specification.

**§ 78.255–14 Marking.**

(a) In addition to marking required by the American Society of Mechanical Engineers Code, every tank shall bear permanent marks at least ⅜ inch high stamped into the metal near the center of one of the tank heads or stamped into a plate permanently attached to the tank by means of brazing or welding or other suitable means as follows:

Manufacturer's name ------ Serial No. ------
ICC specification ----------
Nominal capacity ---------- (gallons)
Tare weight ---------- (pounds)
Date of manufacture ----------

**§ 78.255–15 Report.**

(a) A copy of the manufacturer's data report required by the *"Code"* (see § 78.255–1(a)) under which the tank is fabricated shall be furnished for each new tank to the owner and the Bureau of Explosives. In addition, the manufacturer or owner shall register each tank with the Bureau of Explosives in the following form:

Place ----------
Date ----------
*Portable tank*
Manufactured for ---------- Company
Location ----------
Manufactured by ---------- Company
Location ----------
Consigned to ---------- Company
Location ----------
Size ------ feet outside diameter by ------ long.
Marks on tank as prescribed by § 78.255–14 of this specification are as follows:
Manufacturer's name ----------
Serial number ----------
Owner's serial number ----------
ICC specification ----------
ASME Code Symbol (par U–201) ----------
Date of manufacture ----------
Nominal capacity ---------- Gallons
It is hereby certified that this tank is in complete compliance with the requirements of *ICC Specification No. 60.*

## Subpart I—[Reserved]

## Subpart J—Specifications for Containers for Motor Vehicle Transportation

**§ 78.315 Specification MC 200; containers for liquid nitroglycerin, desensitized liquid nitroglycerin or diethylene glycol dinitrate.**

**§ 78.315–1 Motor vehicle body.**

(a) Every motor vehicle used for the transportation of liquid nitroglycerin, desensitized liquid nitroglycerin or diethylene glycol dinitrate, other than desensitized liquid explosives, as defined in § 73.53(e) of this chapter, shall have a body constructed as set forth below, which body shall have component parts as specified hereinafter.

**§ 78.315–2 Body proper.**

(a) The motor-vehicle body proper shall have a hinged cover. Both the body and the cover shall be well and strongly built of wood or other nonsparking material of equal strength, thoroughly waterproofed, having no end or side openings, and lined with copper or other nonsparking sheet metal having all seams made tight against leakage of nitroglycerin, desensitized liquid nitroglycerin or diethylene glycol dinitrate by welding, brazing, or soldering. No metal of such character as to be capable of producing a spark when struck may be exposed on the inside or the top of the body, nor on the nether side or any edge of the cover, the top of which shall be covered with metal. The body shall be of such dimensions that it will contain only a single tier of individual containers and of such approximate height that the felt pads will securely constrain all inside containers from vertical motion with respect to the body, and shall be securely and firmly attached to the chassis of the motor vehicle. The total load shall not exceed nine hundred (900) quarts liquid measure of liquid nitroglycerin, desensitized liquid nitroglycerin or diethylene glycol dinitrate.

**§ 78.315–3 Cellular construction.**

(a) In the motor-vehicle body specified in § 78.315–2 shall be inserted suitable wooden or other nonmetallic, nonsparking cellular construction, the dimensions of each cell of which shall be such that the rubber "boot" or secondary container for the primary container of the nitroglycerin, desensitized liquid nitroglycerin or diethylene glycol dinitrate, both of which are specified hereinafter, shall snugly fit. The cellular construction shall extend from near the top to near the bottom of the full height of each "boot" to be fitted therein, and shall rest upon and be covered by at least one-half (½) inch of felt padding or other material affording equivalent shock-absorbing protection. The cellular construction shall be of such strength as to provide suitable restraint under all conditions of loading to prevent relative motion of inside containers to be inserted or carried therein.

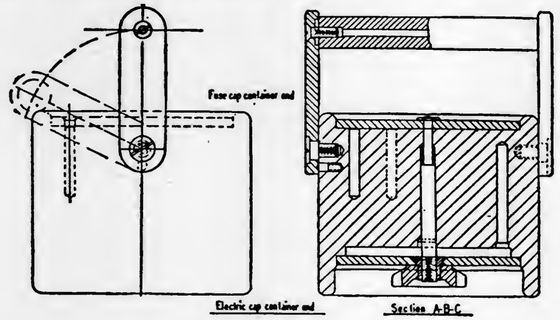
**§ 78.315–4 Inside containers and boots.**

(a) *Inside containers.* Individual containers shall be made of copper or other nonsparking metal of equivalent strength, with all seams closed by welding, brazing or soldering, and shall be tight against leakage of liquid nitroglycerin, desensitized liquid nitroglycerin or diethylene glycol dinitrate. No individual container shall exceed ten (10) quarts (liquid measure) capacity of liquid nitroglycerin, desensitized liquid nitroglycerin or diethylene glycol dinitrate.

(b) *Boots, rubber containers for individual containers.* Each individual container of liquid nitroglycerin, desensitized liquid nitroglycerin or diethylene glycol dinitrate shall be contained in a rubber boot or outer container into which it shall snugly fit, and which, in turn, shall snugly fit into any cell of the cellu-

lar construction specified in § 78.315–3. This boot shall be watertight throughout and at least of such volume as to contain all of the liquid content of liquid nitroglycerin, desensitized liquid nitroglycerin or diethylene glycol dinitrate of any inside container inserted in it. It shall be provided with V-shaped grooves at suitable spacings throughout its inside surface, extending from top to bottom in such manner as to prevent the entrapment of air therein upon insertion of the inside container of liquid nitroglycerin, desensitized liquid nitroglycerin or diethylene glycol dinitrate. The inside height of the rubber boot shall approximate the height of the inside container (including stopper) as shipped.

**§ 78.318 Specification MC 201; container for blasting caps, electric blasting caps and percussion caps.**



**§ 78.318–1 Scope.**

(a) This specification pertains to a container to be used for the transportation of blasting caps, electric blasting caps, and percussion caps in connection with the transportation of liquid nitroglycerin, desensitized liquid nitroglycerin or diethylene glycol dinitrate, where any or all of such types of caps may be used for the detonation of liquid nitroglycerin, desensitized liquid nitroglycerin or diethylene glycol dinitrate in blasting operations. This specification is not intended to take the place of any shipping or packing requirements of this Commission where the caps in question are themselves articles of commerce.

**§ 78.318–2 Container.**

(a) Every container for blasting caps, electric blasting caps, and percussion caps coming within the scope of this specification shall be constructed entirely of hard rubber, phenolresinous or other resinous material, or other nonmetallic, nonsparking material, except that metal parts may be used in such locations as not in any event to come in contact with any of the caps. Space shall be provided so that each blasting cap of whatever nature may be inserted in an individual cell in the body of the container, into which each such cap shall snugly fit. There shall be provided no more than twenty (20) such cellular spaces. Space may be provided into which a plurality of percussion caps may be carried, provided that such space may be closed with a screw cap, and further provided that each or any such space is entirely separate from any space provided for any blasting cap. Each cellular space into which a blasting cap is to be inserted and carried shall be capable of being covered by a rotary cover so arranged as to expose not more than one cell at any time, and capable of rotation to such a place that all cells will be covered at the same time, at which place means shall be provided to lock the cover in place. Means shall be provided to lock in place the cover for the cells provided for the carrying of electric blasting caps. The requirement that not more than one cell be exposed at one time need not apply in the case of electric blasting caps, although spaces for such caps and blasting caps shall be separate. Sufficient annular space shall be provided inside the cover for such electric blasting caps that, when the cover is closed, there will be sufficient space to accommodate the wires customarily attached to such caps. If the material is of such a nature as to require treatment to prevent the absorption of moisture, such treatment shall be applied as shall be necessary in order to provide against the penetration of water by permeation. A suitable carrying handle shall be provided, except for which handle no part of the container may project beyond the exterior of the body.

(b) Exhibited in plates I and II are line drawings of a container for blasting caps, electric blasting caps, and percussion caps, illustrative of the requirements set forth in § 78.318–2 (a). These plates shall not be construed as a part of this specification.

BLASTING CAP CONTAINER

PLATE I

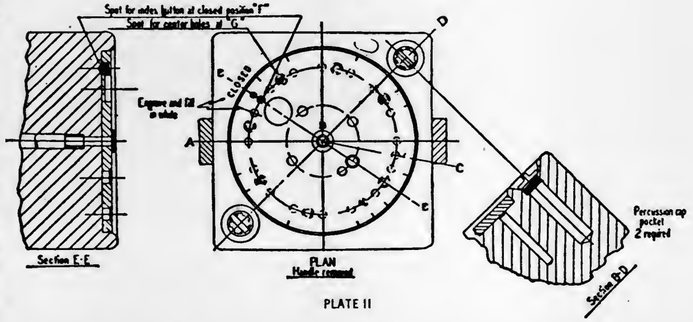


PLATE II

**§ 78.321 Specification MC 300;[1] cargo tanks constructed of mild (open hearth or blue annealed) steel, or combination of mild steel with high-tensile steel, or stainless steel, primarily for the transportation of flammable liquids, or poisonous liquids, class B.**

**§ 78.321–1 General requirements.**

(a) Every cargo tank shall be constructed in accordance with the best known and available practices, in addition to the other requirements of this specification.

[1] Existing tank motor vehicles continuing in service.

(a) *Specification cargo tanks of tank motor vehicles.* Cargo tanks of tank motor vehicles used for the transportation of flammable liquids or poisonous liquids, class B, which shall have been in service prior to June 15, 1940, may be continued in service provided that they have been designed and constructed in accordance with requirements of Specification No. 1001, 1937 edition, of the American Petroleum Institute, or in accordance with the requirements of specifications of the National Fire Protection Association, 1929 or 1933 editions.

(b) *Existing nonspecification cargo tanks of tank motor vehicles.* Cargo tanks of tank motor vehicles used for the transportation of flammable liquids or poisonous liquids, class B, not meeting the requirements set forth in paragraph (a) of this footnote, which shall have been in service prior to June 15, 1940, may be continued in service, provided that they fulfill the requirements set forth under §§ 77.824(a) and 77.854(h) of this chapter, and that they be provided with the accessories as specified in §§ 78.321–5(a), 78.321–8, and 78.321–9 through 78.321–12.

(c) On the required metal identification plate substitute "API Spec 1001, 1937," or "NFPA Spec 1929 (or 1933)" or "NO SPECIFICATION" in place of the specification number shown in the appropriate specification.

**§ 78.321–2 Material.**

(a) *Properties of mild steel sheets.* All mild steel sheets shall be of open hearth steel or blue annealed steel meeting the following minimum requirements:

Yield point, minimum..... 25,000 psi.
Ultimate strength, minimum... 45,000 psi.
Minimum elongation, standard 2-inch sample. 20 percent.

(b) *Properties of high-tensile steel sheets.* All high-tensile steel sheets for such cargo tanks shall meet the following minimum requirements:

Yield point, minimum..... 45,000 psi.
Ultimate strength, minimum... 60,000 psi.
Minimum elongation, standard 2-inch sample. 25 percent.

(c) *Properties of stainless steel sheets.* All stainless steel sheets shall meet the following minimum requirements:

Yield point, minimum..... 32,000 psi.
Ultimate strength, minimum... 75,000 psi.
Minimum elongation, standard 2-inch sample. 20 percent.

(d) *Cargo tanks constructed of a combination of mild and high-tensile steels or stainless steel.* Mild steel sheets as specified in § 78.321–3(a) may be used in combination with high-tensile steel sheets or stainless steel sheets as specified in § 78.321–3(b) in the construction of a single tank, provided each material, where used, shall comply with the minimum requirements for the material used in the construction for that section of the tank. Whenever stainless steel sheets are used in combination with sheets of other types of steel, joints made by welding shall be formed by the use of stainless steel electrodes or filler rods on condition that the stainless steel electrodes or filler rods used in the welding be suitable for use with the grade of stainless steel concerned, according to the recommendations of the manufacturers of the stainless steel electrodes or filler rods.

**§ 78.321–3 Thickness.**

(a) *Thickness of mild steel sheets.* The minimum thickness of mild steel tank sheets shall be limited by the volume capacity of the tank expresed in terms of gallons per inch of length; and by the distance between bulkheads, baffles or other shell stiffeners, as well as by the radius of shell curvature in the case of shell sheets; as specified in Table I and Table II:

TABLE I—MINIMUM THICKNESS OF HEADS,[1] BULKHEADS, BAFFLES (DISHED, CORRUGATED, REINFORCED OR ROLLED) AND RING STIFFENERS

| Volume capacity of tank in gallons per inch of length | 10 or less | Over 10 to 14 | Over 14 to 18 | Over 18 |
|---|---|---|---|---|
| United States Standard gauge number | 14 | 13 | 12 | 11 |

[1] Thickness of exterior head sheets shall never be less than the minimum requirements for shell sheets in any specific unit.

TABLE II—MINIMUM THICKNESS OF SHELL SHEETS EXPRESSED IN UNITED STATES STANDARD GAUGE

| Distance between attachments of bulkheads, baffles or other shell stiffeners | Volume capacity of tank in gallons per inch of length: 10 or less | Over 10 to 14 | Over 14 to 18 | Over 18 |
|---|---|---|---|---|
| | Maximum shell radius of less than 70 inches [1] | | | |
| 36 inches or less | 14 | 14 | 14 | 13 |
| Over 36 inches to 54 inches | 14 | 14 | 13 | 12 |
| Over 54 inches to 60 inches | 14 | 13 | 12 | 11 |
| | Maximum shell radius of 70 inches or more, but less than 90 inches [1] | | | |
| 36 inches or less | 14 | 14 | 13 | 12 |
| Over 36 inches to 54 inches | 14 | 13 | 12 | 11 |
| Over 54 inches to 60 inches | 13 | 12 | 11 | 10 |
| | Maximum shell radius of 90 inches or more, but less than 125 inches [1] | | | |
| 36 inches or less | 14 | 13 | 12 | 11 |
| Over 36 inches to 54 inches | 13 | 12 | 11 | 10 |
| Over 54 inches to 60 inches | 12 | 11 | 10 | 9 |
| | Shell radius of 125 inches or more [1] | | | |
| 36 inches or less | 13 | 12 | 11 | 10 |
| Over 36 inches to 54 inches | 12 | 11 | 10 | 9 |
| Over 54 inches to 60 inches | 11 | 10 | 9 | 8 |

[1] If other than circular cross-section, the radius used shall be the maximum for that portion of the cross-section under consideration.

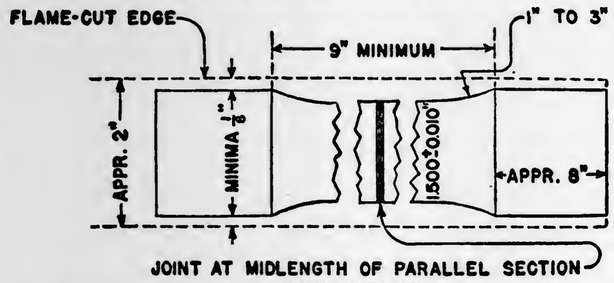
(b) *Thickness of high-tensile and stainless steel sheets.* The minimum thickness of high-tensile and stainless steel tank sheets shall be limited by the volume capacity of the tank expressed in terms of gallons per inch of length; and by the distance between bulkheads, baffles or other shell stiffeners, as well as by the radius of shell curvature in the case of shell sheets; as specified in Table III and Table IV:

TABLE III—MINIMUM THICKNESS OF HEADS,[1] BULKHEADS, BAFFLES (DISHED, CORRUGATED, REINFORCED OR ROLLED) AND RING STIFFENERS

| Volume capacity of tank in gallons per inch of length | 10 or less | Over 10 to 14 | Over 14 to 18 | Over 18 |
|---|---|---|---|---|
| United States Standard gauge number | 15 | 14 | 13 | 12 |

[1] Thickness of exterior head sheets shall never be less than the minimum requirements for shell sheets in any specific unit.

TABLE IV—MINIMUM THICKNESS OF SHELL SHEETS EXPRESSED IN UNITED STATES STANDARD GAUGE



| Distance between attachments of bulkheads, baffles or other shell stiffeners | Volume capacity of tank in gallons per inch of length | | | |
|---|---|---|---|---|
| | 10 or less | Over 10 to 14 | Over 14 to 18 | Over 18 |
| | Maximum shell radius of less than 70 inches [1] | | | |
| 36 inches or less | 16 | 16 | 15 | 14 |
| Over 36 inches to 54 inches | 16 | 15 | 14 | 13 |
| Over 54 inches to 60 inches | 15 | 14 | 13 | 12 |
| | Maximum shell radius of 70 inches or more, but less than 90 inches [1] | | | |
| 36 inches or less | 16 | 15 | 14 | 13 |
| Over 36 inches to 54 inches | 15 | 14 | 13 | 12 |
| Over 54 inches to 60 inches | 14 | 13 | 12 | 11 |
| | Maximum shell radius of 90 inches or more, but less than 125 inches [1] | | | |
| 36 inches or less | 15 | 14 | 13 | 12 |
| Over 36 inches to 54 inches | 14 | 13 | 12 | 11 |
| Over 54 inches to 60 inches | 13 | 12 | 11 | 10 |
| | Shell radius of 125 inches or more [1] | | | |
| 36 inches or less | 14 | 13 | 12 | 11 |
| Over 36 inches to 54 inches | 13 | 12 | 11 | 10 |
| Over 54 inches to 60 inches | 12 | 11 | 10 | 9 |

[1] If other than circular cross-section, the radius used shall be the maximum for that portion of the cross-section under consideration.

**§ 78.321–4 Joints.**

(a) *Method of joining.* Mild steel tank sheets, high-tensile steel tank sheets, or combination thereof and stainless steel tank sheets shall be joined by fusion welding.

(b) *Strength of joints.* The tensile strength of each joint in a tank made of steel other than stainless steel shall be not less than 85 percent of that of the adjacent metal in the tank. The tensile strength of each joint in a stainless steel tank shall be not less than 60,000 psi. Compliance with either requirement shall be determined by preparing, from materials representative of those to be used in tanks subject to this specification and by the same technique of fabrication, 2

TENSILE SPECIMEN

test specimens conforming to figure as shown below and testing them to failure in tension. One pair of test specimens may represent all the tanks to be made of the same combination of materials, by the same technique of fabrication, and in the same shop, within 6 months after the tests on such samples have been completed.

**§ 78.321–5 Bulkheads, baffles, and ring stiffeners.**

(a) *When bulkheads not required.* No bulkheads shall be required in any cargo tank, regardless of capacity, which is used in a service in which the entire tank is never loaded less than 80 percent full or in which no compartment of the tank is ever loaded less than 80 percent full, provided that the entire contents of the tank or of one or more compartments of the tank is discharged at each unloading point.

(b) *Number, dimensions and capacities of bulkheads, baffles, and ring stiffeners.* Except as provided in paragraph (a) of this section, every cargo tank shall be divided into compartments and/or provided with baffles or ring stiffeners as follows:

(1) Every cargo tank having a total capacity in excess of 3,000 gallons shall be divided by bulkheads into compartments, none of which shall exceed 2,500 gallons.

(2) Every cargo tank, and every compartment of a cargo tank over 90 inches in length, shall be provided with baffles or ring stiffeners, the number of which shall be such that the linear distance between any two adjacent baffles or ring stiffeners, or between any tank head or bulkhead and the baffle or ring stiffener nearest it, shall in no case exceed 60 inches.

(3) Each bulkhead required by this paragraph shall have adequate strength to sustain without undue stress or any permanent set a horizontal force equal to the weight of so much of the contents of the tank as may come between it and any adjacent bulkhead or tank head, applied as a uniformly distributed load on the surface of the bulkhead or tank head. Flat bulkheads without reinforcement shall not be permitted.

(4) Each baffle required by this paragraph shall have at least an area as great as 80 percent of the cross-sectional area of the tank.

(5) If spaces are provided between compartments, such spaces shall be arranged for venting and for complete drainage at all times.

(6) Ring stiffeners shall be continuous around the circumference of the tank shell, and shall have at least the section modulus required by the following table:

MINIMUM SECTION MODULUS REQUIRED FOR STEEL RING STIFFENERS

| Width of tank | Section modulus |
|---|---|
| 42 inches or less | [1] 0.0104L |
| Over 42 inches to 60 inches | [1] .0162L |
| Over 60 inches to 96 inches | [1] .0234L |

[1] L is the maximum distance from midpoint of unsupported shell on one side of ring stiffener to the midpoint of unsupported shell on the opposite side of the ring stiffener. See § 78.321–3 for minimum thickness of ring stiffeners.

(i) If a ring stiffener is welded to the shell, a portion of the shell may, for purposes of computing the section modulus, be considered as a part of the ring section. If welded at one side of the ring stiffener only, such portion shall not exceed 20 times the shell thickness adjacent to the weld. If welded at both sides of the ring stiffener, such portion shall not exceed 40 times the shell thickness adjacent to the weld, or the width of the ring stiffener between welds plus 20 times the shell thickness adjacent to the welds, whichever is less.

**§ 78.321–6 Closures for manholes.**

(a) No applicable provision.

**§ 78.321–7 Overturn protection.**

(a) All closures for filling openings shall be protected from damage in the event of overturning of the motor vehicle by being enclosed within the body of the tank or a dome attached thereto, or by the use of suitable metal guards securely attached to the tank or the frame of the motor vehicle.

**§ 78.321–8 Outlets.**

(a) Outlet fixtures shall be substantially made and attached to the tank in such a manner as to prevent breakage at the outlet point.

**§ 78.321–9 Vents, valves and connections.**

(a) *Tank vents.* Each cargo tank or tank compartment shall be provided with a vacuum and pressure operated vent with a minimum effective opening of 0.44 square inch, and shall also be provided with an emergency venting facility so constructed as to provide a minimum free-venting opening having a net area in square inches equal to 1.25 plus 0.0025 times the capacity of the tank or compartment in gallons. If the emergency venting facility operates in response to elevated temperatures, the critical temperature for such operation shall not exceed 200° F.

(b) *Valve and faucet connections.* All draw-off valves or faucets of tanks and compartments shall have discharge ends threaded, or be otherwise so designed as to insure in every instance a tight connection with the hose extending to the storage fill pipe.

**§ 78.321–10 Protection of fittings.**

(a) Draw-off valves and faucets projecting beyond the frame, or if the vehicle be frameless, beyond the shell, at the rear, shall be adequately protected, in the event of collision, by steel bumpers or other equally effective devices.

**§ 78.321–11 Emergency discharge control.**

(a) Each cargo tank or tank compartment of a bottom-discharge tank shall be equipped with a reliable and effective shut-off valve located inside the shell of the tank or tank compartment in the tank or compartment outlet; and the operating mechanism for such valve or valves shall be provided with a secondary closing mechanism remote from tank filling openings and discharge faucets, for operation in the event of fire or other accident. Such control mechanism shall be provided with a fusible section which will cause the valve to close automatically in case of fire, and the critical temperature for the fusing of such section shall not exceed 200° F.

**§ 78.321–12 Shear section.**

(a) There shall be provided between each shut-off valve seat and discharge faucet a shear section which will break under strain, unless the discharge piping is so arranged as to afford equivalent protection, and leave the shut-off valve seat intact in case of accident to the discharge faucet or piping.

**§ 78.321–13 Anchoring of tank.**

(a) No applicable provision.

**§ 78.321–14 Gauging devices.**

(a) No applicable provision.

**§ 78.321–15 Pumps.**

(a) No applicable provision.

**§ 78.321–16 Method of test.**

(a) *Test for leaks.* Every cargo tank shall be tested by a minimum air or hydrostatic pressure of 3 psig. applied to the whole tank and dome if it be non-compartmented. If compartmented, each individual compartment shall be similarly tested with adjacent compartments empty and at atmospheric pressure. Air pressure, if used, shall be maintained for a period of at least five minutes during which the entire surface of all joints under pressure shall be coated with a solution of soap and water, heavy oil, or other material suitable for the purpose, foaming or bubbling of which indicates the presence of leaks. Hydrostatic pressure, if used, shall be done by using water or other liquid having a similar viscosity, the temperature of which shall not exceed 100° F. during the test, and applying pressure as prescribed above, gauged at the top of the tank, at which time all joints under pressure shall be inspected for the issuance of liquid to indicate leaks. All closures shall be in place while test by either method is made. During these tests, operative relief devices shall be clamped, plugged, or otherwise rendered inoperative; such clamps, plugs, and similar devices shall be removed immediately after the test is finished. Any leakage discovered by either of the methods above described, or by any other method, shall be deemed evidence of failure to meet the requirements of this specification. Tanks failing to pass this test shall be suitably repaired, and the above described tests shall be continued until no leaks are discovered, before any cargo tank is put into service.

(b) *Test for distortion or failure.* Every cargo tank to which this specification applies shall be tested by pressures prescribed in paragraph (a) of this section and shall withstand such pressure without undue distortion, evidence of impending failure, or failure. Failure to meet this requirement shall be deemed as sufficient cause for rejection under this specification. If there is undue distortion, or if failure impends or occurs, the cargo tank shall not be returned to service unless a suitable repair is made. The suitability of the repair shall be determined by the same method of test.

(c) *Retest requirements.* See § 77.824 (a) of this chapter.

**§ 78.321–17 Marking of cargo tanks.**

(a) *Metal identification plate.* There shall be on every cargo tank a metal plate located on the right side, near the front, in a place readily accessible for inspection. This plate shall be permanently affixed to the tank by means of soldering, brazing, welding, or other equally suitable means; and upon it shall be marked by stamping, embossing, or other means of forming letters into or on the metal of the plate itself, in the manner illustrated below, at least the information indicated below. The plate shall not be so painted as to obscure the markings thereon.

Carrier's Serial Number [1]
Manufacturer's Name [2]
Date of Manufacture [2]
ICC MC 300 [3]
Nominal Tank Capacity ------ U.S. Gallons

[1] Carriers are not required to number their tanks serially; any designation regularly used by the carrier to identify the tank may be put in this space.

[2] In the event the identity of the tank manufacturer or the date of manufacture is not known and cannot be ascertained, the spaces indicated shall be marked "MAKE UNKNOWN" and/or "DATE OF MANUFACTURE UNKNOWN."

[3] Cargo tanks manufactured of mild steel shall be marked MC 300MS and cargo tanks manufactured of mild steel in combination with high-tensile steel shall be marked MC 300MSHTS.

(b) *Test date markings.* The date of the last test shall be painted on the tank in letters not less than 1¼ inches high, in legible colors, immediately below the metal identification plate specified in paragraph (a) of this section.

(c) *Additional markings.* In addition to the above markings, cargo tanks must be marked as required by § 77.823 of this chapter.

**§ 78.321–18 Certification.**

(a) A certificate from the manufacturer of the cargo tank, or from a competent testing agency, certifying that each such cargo tank is designed and constructed in accordance with the requirements of the specification shall be procured, and such certificate shall be retained in the files of the carrier during the time that such cargo tank is employed by him. In lieu of this certificate, if the motor carrier himself elects to ascertain if any such tank fulfills the requirements of the specification by his own test, he shall similarly retain the test data.

**§ 78.323 Specification MC 302; [1] cargo tanks constructed of welded aluminum alloy (ASTM B209–57T), primarily for the transportation of flammable liquids, or poisonous liquids, class B.**

**§ 78.323–1 General requirements.**

(a) Every cargo tank shall be constructed in accordance with the best known and available practices, in addi-

[1] Existing tank motor vehicles continuing in service.

(a) *Specification cargo tanks of tank motor vehicles.* Cargo tanks of tank motor vehicles used for the transportation of flammable liquids or poisonous liquids, class B, which shall have been in service prior to June 15, 1940, may be continued in service provided that they have been designed and constructed in accordance with the requirements of Specification No. 1001, 1937 edition of the American Petroleum Institute, or in accordance with the requirements of specifications of the National Fire Protection Association, 1929 or 1933 editions.

(b) *Existing nonspecification cargo tanks of tank motor vehicles.* Cargo tanks of tank motor vehicles used for the transportation of flammable liquids or poisonous liquids, class B, not meeting the requirements set forth in paragraph (a) of this footnote, which shall have been in service prior to June 15, 1940, may be continued in service, provided that they fulfill the requirements set forth under §§ 77.824(a) and 77.854(h) of this chapter, and that they be provided with the accessories as specified in §§ 78.323–5 (a), 78.323–8, and 78.323–9 through 78.323–12.

(c) On the required metal identification plate substitute "API Spec 1001, 1937," or "NFPA Spec 1929 (or 1933)" or "NO SPECIFICATION" in place of the specification number shown in the appropriate specification.

tion to the other requirements of this specification.

**§ 78.323–2 Material.**

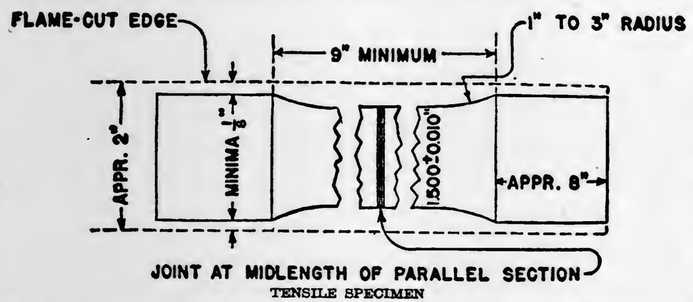
(a) All sheets for such cargo tanks shall be of aluminum alloys GR20A (5052 commercial designation), GR40A (5154 commercial designation), GM40A (5086 commercial designation), or GM31A (5454 commercial designation) conforming to American Society for Testing Materials Specification B209–57T (as revised to include 5454), and have the following minimum requirements:

| | |
|---|---|
| Yield strength | 26,000 psi. |
| Ultimate strength | 34,000 psi. |
| Elongation, 2-inch sample | 12 percent |

NOTE 1: Yield strength is the stress which produces a permanent set of 0.2 percent of the initial gauge length (ASTM E8–36).

**§ 78.323–3 Thickness of metal.**

(a) The minimum thickness of tank sheets and ring stiffeners shall be as follows:



| Aggregate capacity, United States gallons | Shell | | Head, dished, corrugated or reinforced, and ring stiffener | |
|---|---|---|---|---|
| | United States gauge No. | Inch [1] | United States gauge No. | Inch [1] |
| 600 or less | 14 | 0.078 | 14 | 0.078 |
| Over 600 to 1,200 | 12 | .109 | 12 | .109 |
| Over 1,200: | | | | |
| (a) Divided into compartments of 600 gallons or less | 12 | .109 | 10 | .141 |
| (b) If not divided into compartments or if divided into compartments of 1,200 or more | 10 | .141 | 8 | .172 |

[1] Approximate.

NOTE 1: Flat heads without reinforcement no longer permitted.

**§ 78.323–4 Joints.**

(a) Sheets shall be joined by fusion welding. The tensile strength of each joint in a tank shall be not less than 15,000 psi. Compliance with this requirement shall be determined by preparing from materials representative of those to be used in tanks subject to this specification and by the same technique of fabrication, 2 test specimens conforming to figure as shown below and testing them to failure in tension. One pair of test specimens may represent all the tanks to be made of the same combination of materials, by the same technique of fabrication, and in the same shop within 6 months after the tests on such samples have been completed.

TENSILE SPECIMEN

**§ 78.323–5 Bulkheads, baffles, and ring stiffeners.**

(a) *When bulkheads not required.* No bulkheads shall be required in any cargo tank, regardless of capacity, which is used in a service in which the entire tank is never loaded less than 80 percent full or in which no compartment of the tank is ever loaded less than 80 percent full, provided that the entire contents of the tank or of one or more compartments of the tank is discharged at each unloading point.

(b) *Number, dimensions and capacities of bulkheads, baffles, and ring stiffeners.* Except as provided in paragraph (a) of this section, every cargo tank shall be divided into compartments and/or provided with baffles or ring stiffeners as follows:

(1) Every cargo tank having a total capacity in excess of 3,000 gallons shall be divided by bulkheads into compartments, none of which shall exceed 2,500 gallons.

(2) Every cargo tank, and every compartment of a cargo tank over 90 inches in length, shall be provided with baffles or ring stiffeners, the number of which shall be such that the linear distance between any two adjacent baffles or ring stiffeners, or between any tank head or bulkhead and the baffle or ring stiffener nearest it, shall in no case exceed 60 inches.

(3) Each bulkhead required by this paragraph shall have adequate strength to sustain without undue stress or any permanent set a horizontal force equal to the weight of so much of the contents of the tank as may come between it and any adjacent bulkhead or tank head, applied as a uniformly distributed load on the surface of the bulkhead or tank head. Flat bulkheads without reinforcement shall not be permitted.

(4) Each baffle required by this paragraph shall have at least an area as great as 80 percent of the cross-sectional area of the tank.

(5) If spaces are provided between compartments, such spaces shall be arranged for venting and for complete drainage at all times.

(6) Ring stiffeners shall be continuous around the circumference of the tank shell, and shall have at least the section modulus required by the following table:

MINIMUM SECTION MODULUS REQUIRED FOR ALUMINUM RING STIFFENERS

| Width of tank | Section modulus |
|---|---|
| 42 inches or less | [1] 0.018$L$ |
| Over 42 inches to 60 inches | [1] .025$L$ |
| Over 60 inches to 90 inches | [1] .040$L$ |

[1] $L$ is the maximum distance from midpoint of unsupported shell on one side of ring stiffener to the midpoint of unsupported shell on the opposite side of the ring stiffener. See § 78.323–3 for minimum thickness of ring stiffeners.

(i) If a ring stiffener is welded to the shell, a portion of the shell may, for purposes of computing the section modulus, be considered as a part of the ring section. If welded at one side of the ring stiffener only, such portion shall not exceed 20 times the shell thickness adjacent to the weld. If welded at both sides of the ring stiffener, such portion shall not exceed 40 times the shell thickness adjacent to the weld, or the width of the ring stiffener between welds plus 20 times the shell thickness adjacent to the welds, whichever is less.

**§ 78.323–6 Closures for manholes.**

(a) No applicable provision.

**§ 78.323–7 Overturn protection.**

(a) All closures for filling openings shall be protected from damage in the event of overturning of the motor vehicle by being enclosed within the body of the tank or a dome attached thereto or by the use of suitable metal guards securely attached to the tank or the frame of the motor vehicle.

**§ 78.323–8 Tank outlets.**

(a) Outlet fixtures shall be substantially made and attached to the tank in such a manner as to prevent breakage at the outlet point.

**§ 78.323–9 Vents, valves and connections.**

(a) *Tank vents.* Each cargo tank or tank compartment shall be provided with a vacuum and pressure operated vent with a minimum effective opening of 0.44 square inch, and shall also be provided with an emergency venting facility so constructed as to provide a minimum free-venting opening having a net area in square inches equal to 1.25 plus 0.0025 times the capacity of the tank or compartment in gallons. If the emergency venting facility operates in response to elevated temperatures, the critical temperature for such operation shall not exceed 200° F.

(b) *Valve and faucet connections.* All draw-off valves or faucets of tanks and compartments shall have discharge ends

threaded, or be otherwise so designed as to insure in every instance a tight connection with the hose extending to the storage fill pipe.

**§ 78.323–10 Protection of fittings.**

(a) Draw-off valves and faucets projecting beyond the frame, or if the vehicle be frameless, beyond the shell, at the rear, shall be adequately protected in the event of collision by steel bumpers or other equally effective devices.

**§ 78.323–11 Emergency discharge control.**

(a) Each cargo tank or tank compartment of a bottom-discharge tank shall be equipped with a reliable and effective shut-off valve located inside the shell of the tank or tank compartment in the tank or compartment outlet; and the operating mechanism for such valve or valves shall be provided with a secondary closing mechanism remote from tank filling openings and discharge faucets, for operation in the event of fire or other accident. Such control mechanism shall be provided with a fusible section which will cause the valve to close automatically in case of fire, and the critical temperature for the fusing of such section shall not exceed 200° F.

**§ 78.323–12 Shear section.**

(a) There shall be provided between each shut-off valve seat and discharge faucet a shear section which will break under strain, unless the discharge piping is so arranged as to afford equivalent protection, and leave the shut-off valve seat intact in case of accident to the discharge faucet or piping.

**§ 78.323–13 Anchoring of tank.**

(a) No applicable provision.

**§ 78.323–14 Gauging devices.**

(a) No applicable provision.

**§ 78.323–15 Pumps.**

(a) No applicable provision.

**§ 78.323–16 Method of test.**

(a) *Test for leaks.* Every cargo tank shall be tested by a minimum air or hydrostatic pressure of 3 psig. applied to the whole tank and dome if it be noncompartmented. If compartmented, each individual compartment shall be similarly tested with adjacent compartments empty and at atmospheric pressure. Air pressure, if used, shall be maintained for a period of at least five minutes during which the entire surface of all joints under pressure shall be coated with a solution of soap and water, heavy oil, or other material suitable for the purpose, foaming or bubbling of which indicates the presence of leaks. Hydrostatic pressure, if used, shall be done by using water or other liquid having a similar viscosity, the temperature of which shall not exceed 100° F. during the test, and applying pressure as prescribed above, gauged at the top of the tank, at which time all joints under pressure shall be inspected for the issuance of liquid to indicate leaks. All closures shall be in place while test by either method is made. During these tests, operative relief devices shall be clamped, plugged, or otherwise rendered inoperative; such clamps, plugs, and similar devices shall be removed immediately after the test is finished. Any leakage discovered by either of the methods above described, or by any other method, shall be deemed evidence of failure to meet the requirements of this specification. Tanks failing to pass this test shall be suitably repaired, and the above described tests shall be continued until no leaks are discovered, before any cargo tank is put into service.

(b) *Test for distortion or failure.* Every cargo tank to which this specification applies shall be tested by pressures prescribed in paragraph (a) of this section and shall withstand such pressure without undue distortion, evidence of impending failure, or failure. Failure to meet this requirement shall be deemed as sufficient cause for rejection under this specification. If there is undue distortion, or if failure impends or occurs, the cargo tank shall not be returned to service unless a suitable repair is made. The suitability of the repair shall be determined by the same method of test.

(c) *Retest requirements.* See § 77.824 (a) of this chapter.

**§ 78.323–17 Marking of cargo tanks.**

(a) *Metal identification plate.* There shall be on every cargo tank a metal plate located on the right side, near the front, in a place readily accessible for inspection. This plate shall be permanently affixed to the tank by means of soldering, brazing, welding, or other equally suitable means; and upon it shall be marked by stamping, embossing, or other means of forming letters into or on the metal of the plate itself, in the manner illustrated below, at least the information indicated below. The plate shall not be so painted as to obscure the markings thereon.

Carrier's Serial Number [1]
Manufacturer's Name [2]
Date of Manufacture [2]
ICC MC 302
Nominal Tank Capacity ------ U.S. Gallons

(b) *Test date markings.* The date of the last test shall be painted on the tank in letters not less than 1¼ inches high, in legible colors, immediately below the metal identification plate specified in paragraph (a) of this section.

(c) *Additional markings.* In addition to the above markings, cargo tanks must be marked as required by § 77.823 of this chapter.

**§ 78.323–18 Certification.**

(a) A certificate from the manufacturer of the cargo tank, or from a competent testing agency, certifying that each such cargo tank is designed and constructed in accordance with the requirements of the specification shall be procured, and such certificate shall be retained in the files of the carrier during the time that such cargo tank is employed by him. In lieu of this certificate, if the motor carrier himself elects to ascertain if any such tank fulfills the requirements of the specification by his own test, he shall similarly retain the test data.

[1] Carriers are not required to number their tanks serially; any designation regularly used by the carrier to identify the tank may be put in this space.

[2] In the event the identity of the tank manufacturer or the date of manufacture is not known and cannot be ascertained, the spaces indicated shall be marked "MAKE UNKNOWN" and/or "DATE OF MANUFACTURE UNKNOWN."

**§ 78.324 Specification MC 303; [1] cargo tanks constructed of welded ferrous alloy (high-tensile steel) or stainless steel, primarily for the transportation of flammable liquids, or poisonous liquids, class B.**

**§ 78.324–1 General requirements.**

(a) Every cargo tank shall be constructed in accordance with the best known and available practices, in addition to the other requirements of this specification.

**§ 78.324–2 Material.**

(a) *Properties of high-tensile steel sheets.* All high-tensile steel sheets for such cargo tanks shall be of ferrous alloy; commonly known as high-tensile steel, meeting the following minimum requirements:

| | |
|---|---|
| Yield point | 45,000 psi. |
| Ultimate strength | 60,000 psi. |
| Elongation, 2-inch sample | 25 percent. |

(b) *Properties of stainless steel sheets.* All stainless steel sheets for such cargo tanks shall meet the following minimum requirements:

| | |
|---|---|
| Yield point | 32,000 psi. |
| Ultimate strength | 75,000 psi. |
| Elongation, 2-inch sample | 20 percent. |

**§ 78.324–3 Thickness of metal.**

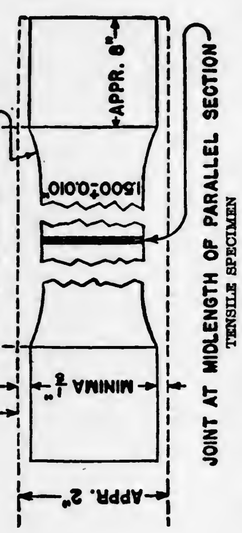
(a) The minimum thicknesses of tank sheets and ring stiffeners shall be limited by the volume capacity of the tank, expressed in terms of gallons per inch of length; by the distance between successive bulkheads in the case of bulkhead sheets; and by the distance between bulkheads, baffles, or other shell stiffeners as well as by the radius of shell curvature in the case of shell sheets as follows:

[1] Existing tank motor vehicles continuing in service.

(a) *Specification cargo tanks of tank motor vehicles.* Cargo tanks of tank motor vehicles used for the transportation of flammable liquids or poisonous liquids, class B, which shall have been in service prior to June 15, 1940, may be continued in service provided that they have been designed and constructed in accordance with the requirements of Specification No. 1001, 1937 edition, of the American Petroleum Institute, or in accordance with the requirements of specifications of the National Fire Protection Association, 1929 or 1933 editions.

(b) *Existing nonspecificaton cargo tanks of tank motor vehicles.* Cargo tanks of tank motor vehicles used for the transportation of flammable liquids or poisonous liquids, class B, not meeting the requirements set forth in paragraph (a) of this footnote, which shall have been in service prior to June 15, 1940, may be continued in service, provided that they fulfill the requirements set forth under §§ 77.824(a) and 77.854(h) of this chapter, and that they be provided with the accessories as specified in §§ 78.324–5, 78.324–8(a) and 78.324–9 through 78.324–12.

(c) On the required metal identification plate substitute "API Spec 1001, 1937," or "NFPA Spec 1929 (or 1933)" or "NO SPECIFICATION" in place of the specification number shown in the appropriate specification.



§ 78.324–4 Joints.

(a) *Method of joining.* Sheets shall be joined by fusion welding.

(b) *Strength of joints.* The tensile strength of each joint in a tank made of steel other than stainless steel shall be not less than 85 percent of that of the adjacent metal in the tank. The tensile strength of each joint in a stainless steel tank shall be not less than 60,000 psi. Compliance with either requirement shall be determined by preparing, from materials representative of those to be used in tanks subject to this specification and by the same technique of fabrication, 2 test specimens conforming to figure as shown below and testing them to failure in tension. One pair of test specimens may represent all the tanks to be made of the same combination of materials, by the same technique of fabrication, and in the same shop, within 6 months after the tests on such samples have been completed.

§ 78.324–5 Bulkheads, baffles, and ring stiffeners.

(a) *When bulkheads not required.* No bulkheads shall be required in any cargo tank, regardless of capacity, which is used in a service in which the entire tank is never loaded less than 80 percent full or in which no compartment of the tank is ever loaded less than 80 percent full, provided that the entire contents of the tank or of one or more compartments of the tank is discharged at each unloading point.

JOINT AT MIDLENGTH OF PARALLEL SECTION
TENSILE SPECIMEN

(b) *Number, dimensions and capacities of bulkheads, baffles, and ring stiffeners.* Except as provided in paragraph (a) of this section, every cargo tank shall be divided into compartments and/or provided with baffles or ring stiffeners as follows:

(1) Every cargo tank having a total capacity in excess of 3,000 gallons shall be divided by bulkheads into compartments, none of which shall exceed 2,500 gallons.

(2) Every cargo tank, and every compartment of a cargo tank over 90 inches in length, shall be provided with baffles or ring stiffeners, the number of which shall be such that the linear distance between any two adjacent baffles or ring stiffeners, or between any tank head or bulkhead and the baffle or ring stiffener nearest it, shall in no case exceed 60 inches.

(3) Each bulkhead required by this paragraph shall have adequate strength to sustain without undue stress or any permanent set, a horizontal force equal to the weight of so much of the contents of the tank as may come between it and any adjacent bulkhead or tank head, applied as a uniformly distributed load on the surface of the bulkhead or tank head. Flat bulkheads without reinforcement shall not be permitted.

(4) Each baffle required by this paragraph shall have at least an area as great as 80 percent of the cross-sectional area of the tank.

(5) If spaces are provided between compartments, such spaces shall be arranged for venting and for complete drainage at all times.

TABLE I—MINIMUM THICKNESS OF HEAD, BULKHEAD, BAFFLE SHEETS AND RING STIFFENERS

| Distance between bulkhead attachments to shell in inches | Volume capacity of tank in gallons per inch of length | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | 6 or less | | Over 6 to 10 | | Over 10 to 14 | | Over 14 to 18 | | Over 18 | |
| | Bulkhead and baffle (dished, corrugated, or reinforced) sheet and ring stiffener thicknesses in United States gauge numbers and inches depending upon distance between attachments thereof to shell | | | | | | | | | |
| | Gauge No. | Inch appr. | Gauge No. | Inch appr. | Gauge No. | Inch appr. | Gauge No. | Inch appr. | Gauge No. | Inch appr. |
| 30 inches or less | 17 | 0.056 | 16 | 0.062 | 15 | 0.070 | 14 | 0.078 | 13 | 0.094 |
| Over 30 inches | 16 | .062 | 15 | .070 | 14 | .078 | 13 | .094 | 12 | .109 |

NOTE 1: Flat heads without reinforcement no longer permitted.

TABLE II—THICKNESS OF SHELL SHEETS

| Distance between bulkheads, baffles, or other shell stiffeners | Volume capacity of tank in gallons per inch of length | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | 6 or less | | Over 6 to 10 | | Over 10 to 14 | | Over 14 to 18 | | Over 18 | |
| | Shell-sheet thicknesses in United States gauge and number of inches for that portion of the shell rolled to a radius of less than 70 inches, depending on spacing of shell stiffeners | | | | | | | | | |
| | Gauge No. | Inch appr. | Gauge No. | Inch appr. | Gauge No. | Inch appr. | Gauge No. | Inch appr. | Gauge No. | Inch appr. |
| 20 inches or less | 19 | 0.044 | 18 | 0.050 | 17 | 0.056 | 16 | 0.062 | 15 | 0.070 |
| Over 20 inches to 36 inches | 18 | .050 | 17 | .056 | 16 | .062 | 15 | .070 | 14 | .078 |
| Over 36 inches to 56 inches | 17 | .056 | 16 | .062 | 15 | .070 | 14 | .078 | 13 | .094 |
| Over 56 inches | 16 | .062 | 15 | .070 | 14 | .078 | 13 | .094 | 12 | .109 |
| | Shell-sheet thicknesses in United States gauge and number of inches for that portion of the shell rolled to a radius of 70 inches or more but less than 90 inches, depending on spacing of shell stiffeners | | | | | | | | | |
| 20 inches or less | 18 | 0.050 | 17 | 0.056 | 16 | 0.062 | 15 | 0.070 | 14 | 0.078 |
| Over 20 inches to 36 inches | 17 | .056 | 16 | .062 | 15 | .070 | 14 | .078 | 13 | .094 |
| Over 36 inches to 56 inches | 16 | .062 | 15 | .070 | 14 | .078 | 13 | .094 | 12 | .109 |
| Over 56 inches | 15 | .070 | 14 | .078 | 13 | .094 | 12 | .109 | 11 | .125 |
| | Shell-sheet thicknesses in United States gauge and number of inches for that portion of the shell rolled to a radius of 90 inches or more but less than 126 inches, depending on spacing of shell stiffeners | | | | | | | | | |
| 20 inches or less | 17 | 0.056 | 16 | 0.062 | 15 | 0.070 | 14 | 0.078 | 13 | 0.094 |
| Over 20 inches to 36 inches | 16 | .062 | 15 | .070 | 14 | .078 | 13 | .094 | 12 | .109 |
| Over 36 inches to 56 inches | 15 | .070 | 14 | .078 | 13 | .094 | 12 | .109 | 11 | .125 |
| Over 56 inches | 14 | .078 | 13 | .094 | 12 | .109 | 11 | .125 | 10 | .141 |
| | Shell-sheet thicknesses in United States gauge and number of inches for that portion of the shell rolled to a radius of 126 inches or more depending upon spacing of shell stiffeners | | | | | | | | | |
| 20 inches or less | 16 | 0.062 | 15 | 0.070 | 14 | 0.078 | 13 | 0.094 | 12 | 0.109 |
| Over 20 inches to 36 inches | 15 | .070 | 14 | .078 | 13 | .094 | 12 | .109 | 11 | .125 |
| Over 36 inches to 56 inches | 14 | .078 | 13 | .094 | 12 | .109 | 11 | .125 | 10 | .141 |
| Over 56 inches | 13 | .094 | 12 | .109 | 11 | .125 | 10 | .141 | 9 | .156 |

(6) Ring stiffeners shall be continuous around the circumference of the tank shell, and shall have at least the section modulus required by the following table:

MINIMUM SECTION MODULUS REQUIRED FOR STEEL RING STIFFENERS

| Width of tank | Section modulus |
|---|---|
| 42 inches or less | [1] 0.0104L |
| Over 42 inches to 60 inches | [1] .0162L |
| Over 60 inches to 96 inches | [1] .0234L |

[1] L is the maximum distance from midpoint of unsupported shell on one side of ring stiffener to the midpoint of unsupported shell on the opposite side of the ring stiffener. See § 78.324–3 for minimum thickness of ring stiffeners

(i) If a ring stiffener is welded to the shell, a portion of the shell may, for purposes of computing the section modulus, be considered as a part of the ring section. If welded at one side of the ring stiffener only, such portion shall not exceed 20 times the shell thickness adjacent to the weld. If welded at both sides of the ring stiffener, such portion shall not exceed 40 times the shell thickness adjacent to the weld, or the width of the ring stiffener between welds plus 20 times the shell thickness adjacent to the welds, whichever is less.

(c) *Tank supports.* The distance from a tank support to the nearest bulkhead, baffle, or other shell stiffener, shall not exceed 40 times the thickness of the tank shell at the point of support.

§ 78.324–6 Closures for manholes.

(a) No applicable provision.

§ 78.324–7 Overturn protection.

(a) All closures for filling openings shall be protected from damage in the event of overturning of the motor vehicle by being enclosed within the body of the tank or a dome attached thereto or by the use of suitable metal guards securely attached to the tank or the frame of the motor vehicle.

§ 78.324–8 Outlets.

(a) Outlet fixtures shall be substantially made and attached to the tank in such a manner as to prevent breakage at the outlet point.

§ 78.324–9 Vents, valves and connections.

(a) *Tank vents.* Each cargo tank or tank compartment shall be provided with a vacuum and pressure operated vent with a minimum effective opening of 0.44 square inch, and shall also be provided with an emergency venting facility so constructed as to provide a minimum free-venting opening having a net area in square inches equal to 1.25 plus 0.0025 times the capacity of the tank or compartment in gallons. If the emergency venting facility operates in response to elevated temperatures, the critical temperature for such operation shall not exceed 200° F.

(b) *Valve and faucet connections.* All draw-off valves or faucets of tanks and compartments shall have discharge ends threaded, or be otherwise so designed as to insure in every instance a tight connection with the hose extending to the storage fill pipe.

78.324–10 Protection of fittings.

(a) Draw-off valves and faucets projecting beyond the frame, or if the vehicle be frameless, beyond the shell, at the rear, shall be adequately protected in the event of collision by steel bumpers or other equally effective devices.

§ 78.324–11 Emergency discharge control.

(a) Each cargo tank or tank compartment of a bottom-discharge tank shall be equipped with a reliable and effective shut-off valve located inside the shell of the tank or tank compartment in the tank or compartment outlet; and the operating mechanism for such valve or valves shall be provided with a secondary closing mechanism remote from tank filling openings and discharge faucets, for operation in the event of fire, or other accident. Such control mechanism shall be provided with a fusible section which will cause the valve to close automatically in case of fire, and the critical temperature for the fusing of such section shall not exceed 200° F.

§ 78.324–12 Shear section.

(a) There shall be provided between each shut-off valve seat and discharge faucet a shear section which will break under strain, unless the discharge piping is so arranged as to afford equivalent protection, and leave the shut-off valve seat intact in case of accident to the discharge faucet or piping.

§ 78.324–13 Anchoring of tank.

(a) No applicable provision.

§ 78.324–14 Gauging devices.

(a) No applicable provision.

§ 78.324–15 Pumps.

(a) No applicable provision.

§ 78.324–16 Method of test.

(a) *Test for leaks.* Every cargo tank shall be tested by a minimum air or hydrostatic pressure of 3 psig. applied to the whole tank and dome if it be noncompartmented. If compartmented, each individual compartment shall be similarly tested with adjacent compartments empty and at atmospheric pressure. Air pressure, if used, shall be maintained for a period of at least five minutes during which the entire surface of all joints under pressure shall be coated with a solution of soap and water, heavy oil, or other material suitable for the purpose, foaming or bubbling of which indicates the presence of leaks. Hydrostatic pressure, if used, shall be done by using water or other liquid having a similar viscosity, the temperature of which shall not exceed 100° F. during the test, and applying pressure as prescribed above, gauged at the top of the tank, at which time all joints under pressure shall be inspected for the issuance of liquid to indicate leaks. All closures shall be in place while test by either method is made. During these tests, operative relief devices shall be clamped, plugged, or otherwise rendered inoperative; such clamps, plugs, and similar devices shall be removed immediately after the test is finished. Any leakage discovered by either of the methods above described, or by any other method, shall be deemed evidence of failure to meet the requirements of this specification. Tanks failing to pass this test shall be suitably repaired, and the above described tests shall be continued until no leaks are discovered, before any cargo tank is put into service.

(b) *Test for distortion or failure.* Every cargo tank to which this specification applies shall be tested by pressures prescribed in paragraph (a) of this section and shall withstand such pressure without undue distortion, evidence of impending failure, or failure. Failure to meet this requirement shall be deemed as sufficient cause for rejection under this specification. If there is undue distortion, or if failure impends or occurs, the cargo tank shall not be returned to service unless a suitable repair is made. This suitability of the repair shall be determined by the same method of test.

(c) *Retest requirements.* See § 77.824 (a) of this chapter.

§ 78.324–17 Marking of cargo tanks.

(a) *Metal identification plate.* There shall be on every cargo tank a metal plate located on the right side, near the front, in a place readily accessible for inspection. This plate shall be permanently affixed to the tank by means of soldering, brazing, welding, or other equally suitable means; and upon it shall be marked by stamping, embossing, or other means of forming letters into or on the metal of the plate itself, in the manner illustrated below, at least the information indicated below. The plate shall not be so painted as to obscure the markings thereon.

Carrier's Serial Number [1]
Manufacturer's Name [2]
Date of Manufacture [2]
ICC MC 303
Nominal Tank Capacity ------- U.S. Gallons

(b) *Test date markings.* The date of the last test shall be painted on the tank in letters not less than 1¼ inches high, in legible colors, immediately below the metal identification plate specified in paragraph (a) of this section.

(c) *Additional markings.* In addition to the above markings, cargo tanks must be marked as required by § 77.823 of this chapter.

§ 78.324–18 Certification.

(a) A certificate from the manufacturer of the cargo tank, or from a competent testing agency, certifying that each such cargo tank is designed and constructed in accordance with the requirements of the specification shall be procured, and such certificate shall be retained in the files of the carrier during the time that such cargo tank is employed by him. In lieu of this certificate, if the motor carrier himself elects to ascertain if any such tank fulfills the requirements of the specification by his own test, he shall similarly retain the test data.

[1] Carriers are not required to number their tanks serially; any designation regularly used by the carrier to identify the tank may be put in this space.

[2] In the event the identity of the tank manufacturer or the date of manufacture is not known and cannot be ascertained, the space indicated shall be marked "MAKE UNKNOWN" and/or "DATE OF MANUFACTURE UNKNOWN."

**§ 78.325 Specification MC 304;[1] cargo tanks constructed of mild (open hearth or blue annealed) steel, welded ferrous alloy (high-tensile steel) or aluminum, primarily for the transportation of flammable liquids, or poisonous liquids, class B, having Reid (ASTM D–323) vapor pressures of 18 psia. or more at 100° F., but less than those stated in § 73.300 of this chapter, in defining compressed gases.**

**§ 78.325–1 General requirements.**

(a) *Design pressure.* The design pressure of each cargo tank shall be not less than 25 psig.

| | Mild steel | Aluminum | |
|---|---|---|---|
| | All vessel parts | Heads, bulkheads, baffles and other shell stiffeners | Shell |
| Yield point | 25,000 psi. | 9,500 psi. | 23,000 psi. |
| Ultimate strength | 45,000 psi. | 25,000 psi. | 31,000 psi. |
| Elongation, 2-inch sample | 20 percent. | 18 percent. | 7 percent. |

(b) *High-tensile and stainless steel.* All high-tensile and stainless steel shall meet the following minimum requirements:

| | Steel other than stainless | Stainless steel |
|---|---|---|
| Yield point | 45,000 psi. | 32,000 psi. |
| Ultimate strength | 60,000 psi. | 75,000 psi. |
| Elongation, 2-inch sample | 25 percent. | 20 percent. |

(c) *Other material requirements.* Cargo tanks shall be of all-steel or aluminum construction, except that gaskets need not be metallic and except that piping and valves need not be ferrous metal or aluminum. Nonmalleable materials shall not be used in the construction of the tank, its mountings and protective devices, or any valves, piping, or fittings. The metal and gaskets shall be substantially immune to chemical attack by the materials to be transported therein, or shall be suitably lined to prevent corrosive attack, or shall have the thickness of the material suitably increased over that required elsewhere in this specification by an amount sufficient to provide for such corrosion during the estimated useful life of the tank. All aluminum cargo tanks and appurtenances built to this specification shall be fabricated of alloys authorized for welded construction by (1) the 1952 edition, or (2) the 1959 edition of Section VIII of the American Society of Mechanical Engineers Boiler and Pressure Vessel Code, no revisions. A certification from the material supplier will suffice as evidence of compliance with this requirement.

[1] Existing tank motor vehicles continuing in service.

(a) *Specification cargo tanks of tank motor vehicles.* Cargo tanks of tank motor vehicles used for the transportation of flammable liquids or poisonous liquids, class B, which shall have been in service prior to December 31, 1955, may be continued in service, provided that they have been designed and constructed in accordance with specifications MC 300, MC 301 MC 302, or MC 303, and provided further that such tanks have, within six months of December 31, 1955, successfully passed the tests prescribed in § 78.325–16.

(b) *Existing nonspecification cargo tanks of tank motor vehicles.* Existing cargo tanks not meeting all requirements of this specification and continuing in service in accordance with paragraph (a) of this footnote, shall be marked by the number "304" applied adjacent to the existing specification number, which number and other data on the original metal identification plate shall remain legible.

(b) *Cross-sectional design.* Tanks shall be of circular cross section.

(c) *Workmanship.* Every cargo tank shall be constructed in accordance with the best known and available practices, in addition to the other requirements of this specification.

**§ 78.325–2 Material.**

(a) *Mild steel and aluminum.* All mild steel and aluminum used in the shell, heads and bulkheads of the cargo tank, shall meet or exceed the following minimum requirements:

**§ 78.325–3 Thickness of metal.**

(a) *Formulas.* Tanks for this service may be constructed of mild steel, high-tensile steel, stainless steel, or aluminum. The material thicknesses shall not be less than those obtained by applying the following formulas nor less than those specified in paragraph (d) of this section:

$$\text{Thickness of shell} = Ts = \frac{PD}{2S\,Es}$$

$$\text{Thickness of heads} = Th = \frac{0.85PL \text{ (for pressure on concave side only)}}{S\,Eh}$$

$Ts$ = Minimum thickness of shell material, exclusive of allowance for corrosion or other loadings.

$Th$ = Minimum thickness of head material, after forming, exclusive of allowance for corrosion and other loadings.

$P$ = Design pressure or maximum allowable working pressure, psi. The maximum allowable working pressure for aluminum shells shall be specified on the basis of the minimum tensile strength of the head material for the alloy used.

$D$ = Inside diameter of shell, inches.

$L$ = Inside crown radius of head, inches.

$S$ = Maximum allowable stress value, psi.—Equals one-fourth of specified minimum ultimate tensile strength.

$Es$ = Lowest efficiency of any longitudinal joint in shell.

$Eh$ = Lowest efficiency of any joint in head.

(1) The knuckle radius of the head shall not be less than three times the material thickness and the straight flange shall be not less than one inch.

(2) For heads with pressure on the convex side, the material thickness as obtained by the above formula shall be increased by 67 percent, unless such heads are adequately braced to prevent excessive distortion.

(b) *Corrosion allowance.* Vessels or part of vessels subject to thinning by corrosion, erosion or mechanical abrasion, shall have provision made for the desired life of the vessel by a suitable increase in the thickness of the material over that determined by the design formulas, or by using some other suitable method of protection. Material added for these purposes need not be of the same thickness for all parts of the vessel if different rates of attack are expected for the various parts.

(c) *Other loadings.* In addition to the material requirements as specified in paragraphs (a) and (b) of this section, vessels shall be provided with stiffeners or other additional means of support if necessary, to present overstress or large distortions due to the following other loadings:

(1) Impact loads.

(2) Weight of vessel and contents but not less than the water weight of tank and contents. For determining the weight of the water contents of the tank, a gallon of water (231 cubic inches) shall be considered to weigh 8.32828 pounds.

(3) Superimposed loads such as operating equipment, insulation and piping.

(4) Reactions of supporting lugs or saddles.

(5) Effect of temperature gradients.

(d) *Thickness of mild steel.* Minimum thicknesses of mild steel tank sheets in U.S. standard gauges, subject to the foregoing requirements in this section. (These thicknesses are to be multiplied by 1.44 for aluminum.):

| | Gallons per inch of tank length | | | | | | |
|---|---|---|---|---|---|---|---|
| | 10 or less | Over 10 to 14 | Over 14 to 18 | Over 18 to 22 | Over 22 to 26 | Over 26 to 30 | Over 30 |
| Heads, bulkheads, baffles, and ring stiffeners | 14 | 13 | 12 | 11 | 10 | 9 | 8 |
| SHELL | | | | | | | |
| Distance between attachments of bulkheads, baffles or other shell stiffeners: | | | | | | | |
| 36 inches or less | 14 | 14 | 14 | 13 | 12 | 11 | 10 |
| Over 36 inches to 54 inches | 14 | 14 | 13 | 12 | 11 | 10 | 9 |
| Over 54 inches to 60 inches | 14 | 13 | 12 | 11 | 10 | 9 | 8 |

(e) *Thickness of high-tensile and stainless steel.* Minimum thicknesses of high-tensile and stainless steel tank sheets, in U.S. standard gauges, subject to the foregoing requirements in this section:

| | Gallons per inch of tank length | | | | | | |
|---|---|---|---|---|---|---|---|
| | 10 or less | Over 10 to 14 | Over 14 to 18 | Over 18 to 22 | Over 22 to 26 | Over 26 to 30 | Over 30 |
| Heads, bulkheads, baffles, and ring stiffeners | 15 | 14 | 13 | 12 | 11 | 10 | 9 |
| SHELL | | | | | | | |
| Distance between attachments of bulkheads, baffles or other shell stiffeners | | | | | | | |
| 36 inches or less | 16 | 16 | 15 | 14 | 13 | 12 | 11 |
| Over 36 inches to 54 inches | 16 | 15 | 14 | 13 | 12 | 11 | 10 |
| Over 54 inches to 60 inches | 15 | 14 | 13 | 12 | 11 | 10 | 9 |

**§ 78.325–4 Joints.**

(a) *Method of joining.* Joints in the tank structure shall be made by welding, and may be reinforced where desired. Care should be taken to avoid damage by galvanic action due to the presence of dissimilar metals at joints.

(b) *Pipe joints.* Welded pipe joints shall be used wherever possible. Joints in copper tubing shall be of the brazed type or of an equally strong metal union type. The melting point of brazing material must not be less than 1000° F. Such joints shall in any event be of such a character as not to decrease the strength of the tubing, as by the cutting of threads.

**§ 78.325–5 Bulkheads, baffles, and ring stiffeners.**

(a) *When bulkheads not required.* No bulkheads shall be required in any cargo tank regardless of capacity which is used in service in which there is never less than 80% of the capacity volume of the tank while in transportation over the highway and which in service has its entire contents discharged at one unloading point, provided that this requirement shall not apply to tanks operating in or through any jurisdiction where State or local regulations require seasonal reduction of vehicle weight limitations during the time such reductions are in force.

(b) *When bulkheads required.* Except as provided in paragraph (a) of this section, every cargo tank having a total capacity in excess of 3,000 gallons shall be divided by bulkheads into compartments none of which shall exceed 2,500 gallons. Each bulkhead required by this paragraph shall be of the same minimum strength as is required elsewhere in this specification for tank heads.

(c) *Double bulkheads.* Tanks with compartments carrying flammable liquids of different shipping names or with compartments containing flammable or poisonous liquids, class B, and liquids not so classified by the regulations, shall be provided with an air space between compartments. This air space shall be equipped and maintained with drainage facilities operative at all times.

(d) *Baffles or shell stiffeners.* Every cargo tank or compartment of a cargo tank over 90 inches in length shall be provided with baffles or equivalent shell stiffeners so located that the maximum distance between any two baffles or stiffeners and between any baffle or stiffener and the nearest tank head or bulkhead shall not exceed 60 inches. Ring stiffeners shall be continuous around the circumference of the tank shell and shall have at least the section modulus required by the following table:

MINIMUM SECTION MODULUS REQUIRED FOR RING STIFFENERS

| Width of tank | Section modulus | |
|---|---|---|
| | Steel | Aluminum |
| 42 inches or less | [1] 0.0104L | [1] 0.0180L |
| Over 42 inches to 60 inches | [1] .0162L | [1] .0280L |
| Over 60 inches to 96 inches | [1] .0234L | [1] .0400L |

[1] L is the maximum distance from the midpoint of the unsupported shell on one side of the ring stiffener to the midpoint of the unsupported shell on the opposite side of the ring stiffener. See § 78.325–3 for minimum thickness of ring stiffeners.

(1) If a ring stiffener is welded to the shell, a portion of the shell may, for the purposes of computing the section modulus, be considered as a part of the ring section. If welded at one side of the ring stiffener only, such portion shall not exceed 20 times the shell thickness adjacent to the weld. If welded at both sides of the ring stiffener, such portion shall not exceed 40 times the shell thickness adjacent to the weld, or the width of the ring stiffener between welds plus 20 times the shell thickness adjacent to the welds, whichever is less.

**§ 78.325–6 Closures for manholes.**

(a) No applicable provision.

**§ 78.325–7 Overturn protection.**

(a) All closures for filling openings shall be protected from damage in the event of overturning of the motor vehicle by being enclosed within the body of the tank or dome attached to the tank or the frame of the motor vehicle. Protection shall also be provided for any protruding or projecting fitting or appurtenance by means of adequate metal guards. The calculated load for the protective devices shall be the weight of the tank motor vehicle with the tank full of water, at one "g" deceleration. If the overturn protection is so constructed as to permit accumulation of liquid on the top of the tank, it shall not be provided with drainage at or near the front of the tank.

**§ 78.325–8 Tank outlets.**

(a) Outlet fixtures shall be substantially made and attached to the tank in such a manner as to prevent breakage at the outlet point.

**§ 78.325–9 Safety relief devices, valves and connections.**

(a) *Safety relief devices required.* Each cargo tank and each compartment of a tank shall be provided with one or more safety relief valves of the spring-loaded type, provided that emergency pressure relief devices may be used for part of the required capacity thereof. All such valves and devices shall be arranged to discharge upward and unobstructed in such a manner as to prevent any impingement of escaping gas upon the tank. The emergency pressure relief devices shall be either springloaded type, frangible type or fusible type.

(b) *Safety relief device capacity.* The required safety relief valves shall be set to close after discharge at a pressure not lower than 25 psig. and remain closed at all lesser pressures, provided that this requirement shall not be so construed as to forbid the use of vacuum relief valves or of combination safety relief and vacuum relief valves. At a pressure not exceeding 40 psig. they shall have a discharge capacity not less than that of an unobstructed opening of one square inch for each 35 square feet of exterior area of the tank or compartment to which they are connected, provided that two or more such valves may be used on the same tank or compartment to obtain the discharge capacity herein required; alternatively, such valve or valves may at a pressure of 30 psig. have a total discharge capacity not less than that of an unobstructed opening of one square inch for each 350 square feet of exterior area of the tank or compartment to which they are connected, if in addition thereto, each such tank or compartment be provided with one or more frangible-type or fusible-type safety devices having a total discharge capacity not less than that of an unobstructed opening of 9 square inches for each 350 square feet of exterior area. The bursting pressure of the frangible-type devices shall be not less than 30 psig. nor more than 40 psig. Fusible elements, if used, shall have a fusing temperature no higher than 200° F. They shall not be exposed to contact with the tank lading or be in contact with any part of the tank or its acessories so exposed.

(c) *Marking inlets and outlets.* All tank inlets and outlets, except safety relief valves, shall be marked to indicate whether they communicate with vapor or liquid when the tank is filled to the maximum permitted filling level.

(d) *Markings on relief valves.* Each safety relief valve shall be plainly and permanently marked (1) with the pressure in psig. at which it is set to start to discharge, (2) with the actual rate of discharge of the device in cubic feet per minute of air at 60° F. and atmospheric pressure and (3) with the manufacturer's name and catalogue number. The rated discharge capacity of the device shall be determined at a pressure of 30 psig.

(e) *Connections to relief valves.* Connections to safety relief valves shall be of sufficient size to provide the required rate of discharge through the safety relief valves.

(f) *Protection of relief valves.* Safety relief valves shall be arranged so that the possibility of tampering will be minimized. If the pressure setting or adjustment is external, the safety relief valves shall be provided with suitable means for sealing the adjustment.

(g) *Shut-off valves.* No shut-off valves shall be installed between the safety relief valves and the tank except in cases where two or more safety relief valves are installed on the same tank, a shut-off valve may be used where the arrangement of the shut-off valve or valves is such as always to afford full required capacity flow through at least one safety relief valve.

(h) *Connection of safety relief valve to vapor space.* Safety relief valves shall have direct communication with the vapor space of the tank.

(i) *Prevention of excessive hydrostatic pressure.* Any portion of liquid piping or hose which at any time may be closed at each end must be provided with a safety valve to prevent excessive hydrostatic pressure. This safety relief valve must not have an intervening shut-off valve installed.

(j) *Strength of piping, fittings, hose and hose couplings.* Hose, piping and fittings shall be designed for a bursting pressure at least 100 psig. and not less than four times the pressure to which, in any instance, it may be subjected in service by the action of a pump or other device (not including safety relief valves), the action of which may be to subject certain portions of the tank piping and hose to pressures greater than the design pressure of the tank. Any coupling used on hose to make connections shall be designed for a working pressure not less than 20 percent in excess of the design pressure of the hose and shall be so designed that there will be no leakage when connected.

(k) *Provision for expansion and vibration.* Suitable provision shall be made in every case to allow for and prevent damage due to expansion, contraction, jarring and vibration of all pipe. Slip joints shall not be used for this purpose.

**§ 78.325–10 Protection of fittings.**

(a) Piping, fittings and valves projecting beyond the frame, or if the vehicle be frameless beyond the shell, shall be adequately protected in the event of collision by steel bumpers or other equally effective devices. Any other part of any cargo tank connected with its cargo space and similarly protruding shall be similarly protected.

**§ 78.325–11 Emergency discharge control.**

(a) *Automatic excess-flow valves.* Each cargo tank outlet shall be provided with a suitable automatic excess-flow valve or, in lieu thereof, may be fitted with a quick-closing internal valve designed, installed and operated so as to assure against escape of the contents in event of failure of the outlet. These valves shall be located inside the tank or at a point outside the tank where the line enters or leaves the tank. The valve seat shall be located inside the tank or shall be located within a welded flange or its companion flange, or within a nozzle, or within a coupling. The installation shall be made in such a manner as reasonably to assure that any undue strain which causes failure requiring functioning of the valve shall cause failure in such a manner that it will not impair the operation of the valve, except that safety device connections and liquid level gauging devices, which are so constructed that the outward flow of tank contents shall not exceed that passed by a No. 54 drill size opening, are not required to be equipped with excess-flow valves.

(b) *Excess-flow valve settings.* Excess-flow valves shall be so installed and adjusted that they close automatically at the rated flows of gas or liquid as specified by the valve manufacturer.

(c) *Capacity of connections to valves.* The connections or lines on each side of an excess-flow valve, including valve fittings, etc., shall have a greater capacity than the rated flow of the excess-flow valve.

(d) *By-pass of valve.* Excess-flow valves may be designed with a by-pass, not to exceed a No. 60 drill size opening, to allow equalization of pressures.

(e) *Utilization of stop-check valves forbidden.* The use of combination stop-check valves to satisfy with one valve the requirements of paragraphs (b), (c) and (f) of this section is forbidden.

(f) *Filling and discharge shut-off valves.* Filling and discharge lines shall be provided with shut-off valves located as close to the tank outlet as is possible. If such valves are not manually operated they shall be of an automatic quick-closing internal valve type or an automatic shut-off type provided that if such valves are used, the lines must have manually-operated shut-off valve located in the line ahead of the hose connection. Stop-check or excess-flow valves shall not be used to satisfy the requirements of this section.

**§ 78.325–12 Shear section.**

(a) There shall be provided between each excess-flow valve seat or internal valve seat, and draw-off valves, a shear section which will break under strain, unless the discharge piping is so arranged as to afford equivalent protection, and leave the excess-flow valve seat or the internal valve seat intact in case of accident to the draw-off valve or piping.

**§ 78.325–13 Anchoring of cargo tank.**

(a) *Hold-down devices.* Adequate hold-down devices shall be provided to anchor each cargo tank in a suitable manner that will not introduce undue concentration of stresses and shall be built to withstand loadings in any direction equal to the weight of the tank and attachments when filled with water. These devices on vehicles with frames shall incorporate turnbuckles or similar positive action devices for drawing the tank down tight on the frame of the motor vehicle.

(b) *Stops and anchors.* Suitable stops and anchors shall be attached to the motor vehicle and the cargo tank to prevent relative movement between them due to starting, stopping and turning. Stops and anchors shall be installed so as to be readily accessible for inspection and maintenance except that insulation on lagged tanks is permitted to cover such stops and anchors.

(c) *Anchoring integral cargo tanks.* Whenever any cargo tank is so designed and constructed that the cargo tank constitutes, in whole or in part, the stress member used in lieu of a frame, then such cargo tanks shall be designed so as to successfully and adequately withstand the stresses thereby imposed in addition to those otherwise imposed on the cargo tank.

**§ 78.325–14 Gauging devices.**

(a) *Gauge device design.* Every cargo tank except tanks filled by weight, shall be equipped with one or more gauging devices which shall indicate accurately the maximum permitted liquid level in each compartment. Additional gauging devices may be installed but may not be used as primary controls for filling of cargo tanks at pressures above atmospheric. Acceptable gauging devices for use at pressures above atmospheric are the rotary tube, the adjustable slip tube and the fixed length dip tube. Gauge glasses are not permitted to be installed on any cargo tank.

(b) *Fixed level indicators.* All liquid level gauging devices, except those on tanks provided with fixed maximum level indicators, shall be legibly and permanently marked in increments of not more than 20° F. to indicate the maximum levels to which the tank may be filled with liquid at temperatures above 20° F. In the event that it is impractical to put these markings on the gauging device, this information shall be marked on a suitable plate affixed to the tank in a location adjacent to the gauging device.

(c) *Dip tubes.* A fixed length dip tube gauging device, when used, shall consist of a dip pipe of small diameter equipped with a valve at the outer end, and extending into the tank to a specified fixed length. On horizontally-mounted cylindrical tanks, the fixed length to which the tube extends into the tank shall be such that the device will function to indicate when the liquid at a point equidistant from the heads of the tank in a vertical plane containing the longitudinal axis of the tank, reaches the maximum level permitted by these regulations. On spherical tanks and on vertically-mounted cylindrical tanks, the fixed length to which the tube extends into the tank shall be such that the device will function to indicate when the liquid at a point on the vertical axis of the tank in its normal position reaches the maximum level permitted by these regulations.

**§ 78.325–15 Pumps.**

(a) Liquid pumps, whenever used, must be of suitable design, adequately protected against breakage by collisions. Unless they are of the centrifugal type, they shall be equipped with suitable pressure actuated by-pass valves permitting flow from discharge to suction or to the tank.

**§ 78.325–16 Method of test.**

(a) *Test pressure.* For each existing specification MC 300, MC 301, MC 302, and MC 303 tank not complying with all requirements of this specification and continuing in service in accordance with the provisions of § 78.325 footnote 1(a) (see § 78.325–17 regarding marking of such tanks), the standard test pressure for each required test shall be 50 psig. For each tank complying with all requirements of this specification, whether new or existing, the standard test pressure for each required test shall be 40 psig.

(b) *Method of test.* Every cargo tank, and all piping, valves, and other accessories thereof which are subject to the pressure of the tank contents, except safety valves, shall be tested by complete filling (including domes, if any) with water or other liquid having a similar viscosity and applying a pressure of not less than the standard test pressure above specified. The pressure shall be gauged at the top of the tank. The tank must hold the prescribed pressure for at least 10 minutes. While under pressure, the tank shall be inspected for leakage, corroded areas, bad dents, or other conditions which indicate weakness that might render the tank unsafe for transportation service, and it shall not be placed in or returned to service if any evidence of such unsafe condition is discovered, until the deficiencies have been corrected and the tests repeated and passed successfully. Tank insulation and jacket need not be removed unless it is found to be impossible to reach the test pressure and to maintain a condition of pressure equilibrium after the test pressure is reached. All tank accessories shall be leakage tested after installation and proved tight at not less than the design pressure of the tank, except that hose used on such tanks may be tested either before or after installation.

(c) *Retest requirements.* See § 77.824 (b) of this chapter.

**§ 78.325–17 Marking of cargo tanks.**

(a) *Metal identification plate.* There shall be on every cargo tank a metal plate located on the right side, near the front, in a place readily accessible for inspection. This plate shall be permanently affixed to the tank by means of soldering, brazing, welding or other equally suitable means; and upon it shall be marked by stamping, embossing or other means of forming letters into or on the metal of the plate itself, in the manner illustrated below, at least the information indicated below. The plate shall not be so painted as to obscure the markings thereon.

Carrier's Serial Number [1]
Manufacturer's Name [2]
Date of Manufacture [2]

ICC MC 304
Design Pressure ---------- psig.
Test Pressure ---------- psig.
Nominal Tank Capacity ------- U.S. Gallons.
In compartments of ----, ----, ---- and ---- U.S. Gallons.

(b) *Test date and pressure markings.* The date of the last test shall be painted on the tank in letters not less than 1¼ inches high, in legible colors, immediately below the metal identification plate specified in paragraph (a) of this section. The test pressure shall be similarly indicated by painting on tanks requiring the test pressure of 50 psig. in accordance with § 78.325–16(a).

(c) *Additional markings.* In addition to the above markings, cargo tanks must be marked as required by § 77.823 of this chapter.

**§ 78.325–18 Certification.**

(a) A certificate from the manufacturer of the cargo tank, or from a competent testing agency, certifying that each such cargo tank is designed and constructed in accordance with the requirements of the specification shall be procured, and such certificate shall be retained in the files of the carrier during the time that such cargo tank is employed by him. In lieu of this certificate, if the motor carrier himself elects to ascertain if any such tank fulfills the requirements of the specification by his own test and examination, he shall similarly retain the test data and examination data.

[1] Carriers are not required to number their tanks serially; any designation regularly used by the carrier to identify the tank may be put in this space.

[2] In the event the identity of the tank manufacturer or the date of manufacture is not known and cannot be ascertained, the spaces indicated shall be marked "MAKE UNKNOWN" and/or "DATE OF MANUFACTURE UNKNOWN."

**§ 78.326 Specification MC 305; cargo tanks constructed of aluminum alloys for high-strength welded construction, primarily for the transportation of flammable liquids, or poisonous liquids, class B.**

**§ 78.326–1 General requirements.**

(a) Every cargo tank shall be constructed in accordance with the best known and available practices, in addition to the other requirements of this specification.

**§ 78.326–2 Material.**

(a) All sheets for shell, heads, bulkheads, and baffles of such cargo tanks shall be of aluminum alloys GR20A (5053 commercial designation), GR40A (5154 commercial designation), GM40A (5086 commercial designation), or GM31A (5454 commercial designation) conforming to American Society for Testing Materials Specification B209–57T (as revised to include 5454).

**§ 78.326–3 Thickness of sheets.**

(a) The minimum thicknesses of tank sheets shall be limited by the volume capacity of the tank, expressed in terms of gallons per inch of length; by the distance between successive bulkheads in the case of bulkhead sheets; and by the distance between bulkheads, baffles, or other shell stiffeners as well as by the radius of shell curvature in the case of shell sheets, as follows:

TABLE I—THICKNESS OF HEAD, BULKHEAD, BAFFLE SHEETS AND RING STIFFENERS [1]

| | Volume capacity of tank in gallons per inch of length | | | |
|---|---|---|---|---|
| | 10 or less | Over 10 to 14 | Over 14 to 18 | Over 18 |
| | Heads or bulkheads—dished, corrugated or reinforced | | | |
| Thickness in decimal of inches | 0.096 | 0.109 | 0.130 | 0.151 |

[1] Thickness of exterior head sheets shall never be less than the maximum requirements for shell sheets.

TABLE II—THICKNESS OF SHELL SHEETS

| | Volume capacity of tank in gallons per inch of length | | | |
|---|---|---|---|---|
| Distance between bulkheads, baffles or other shell stiffeners | 10 or less | Over 10 to 14 | Over 14 to 18 | Over 18 |
| | Shell-sheet thickness in decimals of an inch for that portion of the shell rolled to a radius of less than 70 inches, depending on spacing of shell stiffeners | | | |
| 36 inches or less | 0.087 | 0.087 | 0.096 | 0.109 |
| Over 36 inches to 54 inches | .087 | .097 | .109 | .130 |
| Over 54 inches | .096 | .109 | .130 | .151 |
| | Shell-sheet thickness in decimals of an inch for that portion of the shell rolled to a radius of 70 inches or more, but less than 90 inches, depending on spacing of shell stiffeners | | | |
| 36 inches or less | 0.087 | 0.096 | 0.109 | 0.130 |
| Over 36 inches to 54 inches | .096 | .109 | .130 | .151 |
| Over 54 inches | .109 | .130 | .151 | .173 |
| | Shell-sheet thickness in decimals of an inch for that portion of the shell rolled to a radius of 90 inches or more, but less than 125 inches, depending on spacing of shell stiffeners | | | |
| 36 inches or less | 0.096 | 0.109 | 0.130 | 0.151 |
| Over 36 inches to 54 inches | .109 | .130 | .151 | .173 |
| Over 54 inches | .130 | .151 | .173 | .194 |

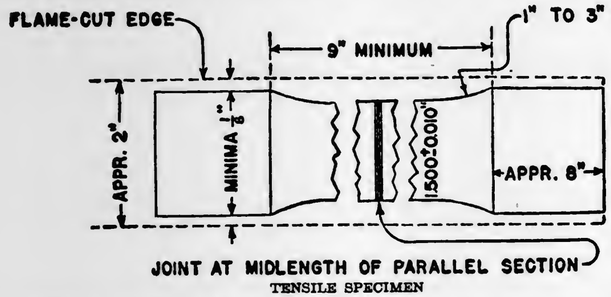


TABLE II—THICKNESS OF SHELL SHEETS

| Distance between bulkheads, baffles or other shell stiffeners | Volume capacity of tank in gallons per inch of length | | | |
|---|---|---|---|---|
| | 10 or less | Over 10 to 14 | Over 14 to 18 | Over 18 |
| | Shell-sheet thickness in decimals of an inch for that portion of the shell rolled to a radius of 125 inches or more, depending on spacing of shell stiffeners | | | |
| 36 inches or less | 0.109 | 0.130 | 0.151 | 0.173 |
| Over 36 inches to 54 inches | .130 | .151 | .173 | .194 |
| Over 54 inches | .151 | .173 | .194 | .216 |

**§ 78.326–4 Joints.**

(a) *Method of joining.* All joints in and to tank shells, head and bulkheads shall be welded.

(b) *Strength of joints.* All welded aluminum joints shall be made in accordance with recognized good practice, and the efficiency of a joint shall not be less than 85 percent of the annealed properties of the adjacent material. Aluminum alloys for high-strength welded construction shall be joined by an inert gas arc welding process using filler metals R–GR40A, E–GR40A (5154 alloy) or R–GM50A, E–GM50A (5356 alloy) conforming to American Society of Testing Materials Specification No. B285–54T (American Welding Society Specification No. A5, 10–54T). Compliance with this requirement shall be determined by preparing from materials representative of those to be used in tanks subject to this specification and by the same technique of fabrication, 2 test specimens conforming to figure as shown below and testing them to failure in tension. One pair of test specimens may represent all the tanks to be made of the same combination of materials, by the same technique of fabrication, and in the same shop, within 6 months after the tests on such samples have been completed.

JOINT AT MIDLENGTH OF PARALLEL SECTION
TENSILE SPECIMEN

**§ 78.326–5 Bulkheads, baffles and ring stiffeners.**

(a) *When bulkheads not required.* The bulkhead requirements in paragraph (b) of this section do not apply to any cargo tank, regardless of capacity, which is used in a service in which the entire tank is never loaded less than 80% full or in which no compartment of the tank is ever loaded less than 80% full, provided that the entire contents of the tank or of one or more compartments of the tank is discharged at each unloading point. Flat bulkheads and baffles without reinforcement are not permitted.

(b) *When bulkheads required.* Except as provided in paragraph (a) of this section, every cargo tank having a total capacity in excess of 3,000 gallons shall be divided by bulkheads into compartments, none of which shall exceed 2,500 gallons. Each bulkhead required by this paragraph shall be of the same minimum strength as is required elsewhere in this specification for tank heads.

(c) *Double bulkheads.* Tanks with compartments carrying flammable liquids of different shipping names or with compartments containing flammable or poisonous liquids, class B and liquids not so classified by the regulations, shall be provided with an air space between compartments. This air space shall be arranged for venting and be equipped and maintained with drainage facilities operative at all times.

(d) *Baffles or shell stiffeners.* Every cargo tank, and every compartment of a cargo tank over 90 inches in length, shall be provided with baffles or ring stiffeners, the number of which shall be such that the linear distance between any two adjacent baffles or ring stiffeners, or between any tank head or bulkhead and the baffle or ring stiffener nearest it, shall in no case exceed 60 inches. Ring stiffeners shall be continuous around the circumference of the tank shell and shall have at least the section modulus required by the following table:

MINIMUM SECTION MODULUS REQUIRED FOR RING STIFFENERS

| Width of tank | Section modulus |
|---|---|
| 42 inches or less | [1] 0.0180L |
| Over 42 inches to 60 inches | [1] .0280L |
| Over 60 inches to 96 inches | [1] .0400L |

[1] L is the maximum distance from the midpoint of the unsupported shell on one side of the ring stiffener to the midpoint of the unsupported shell on the opposite side of the ring stiffener. See § 78.326–3 for minimum thickness of ring stiffeners.

(1) If a ring stiffener is welded to the shell, a portion of the shell may, for purposes of computing the section modulus, be considered as a part of the ring section. If welded at one side of the ring stiffener only, such portion shall not exceed 20 times the shell thickness adjacent to the weld. If welded at both sides of the ring stiffener, such portion shall not exceed 40 times the shell thickness adjacent to the weld, or the width of the ring stiffener between welds plus 20 times the shell thickness adjacent to the welds, whichever is less.

(e) *Tank supports.* The distance from a tank support to the nearest bulkhead, baffle, or other shell stiffener shall not exceed 40 times the thickness of the tank shell at the point of support.

**§ 78.326–6 Closures for manholes.**

(a) No applicable provision.

**§ 78.326–7 Overturn protection.**

(a) All closures for filling openings shall be protected from damage in the event of overturning of the motor vehicle by being enclosed within the body of the tank or dome attached thereto or by the use of suitable metal guards securely attached to the tank or the frame of the motor vehicle. Protection shall also be provided for any protruding or projecting fitting or appurtenance by means of adequate metal guards. The calculated load for the protective devices shall be the weight of the tank motor vehicle with the tank full of water at one "g" deceleration. If the overturn protection is so constructed as to permit accumulation of liquid on the top of the tank, it shall not be provided with drainage facilities which will permit drainage at or near the front of the tank.

**§ 78.326–8 Tank outlets.**

(a) Outlet fixtures shall be substantially made and attached to the tank in such a manner as to prevent breakage at the outlet point.

**§ 78.326–9 Vents, valves and connections.**

(a) *Tank vents.* Each cargo tank or tank compartment shall be provided with a vacuum and pressure operated vent with a minimum effective opening of 0.44 square inch, and shall also be provided with an emergency venting facility so constructed as to provide a minimum free-venting opening having a net area in square inches equal to 1.25 plus 0.0025 times the capacity of the tank or compartment in gallons. If the emergency venting facility operates

in response to elevated temperatures, the critical temperature for such operation shall not exceed 200°F.

(b) *Valve and faucet connections.* All draw-off valves or faucets of tanks and compartments shall have discharge ends threaded, or be otherwise so designed as to insure in every instance a tight connection with the hose extending to the storage fill pipe.

**§ 78.326–10 Protection of fittings.**

(a) Draw-off valves and faucets projecting beyond the frame, or if the vehicle be frameless, beyond the shell, at the rear, shall be adequately protected in the event of collision by steel bumpers or other equally effective devices.

**§ 78.326–11 Emergency discharge control.**

(a) Each cargo tank or tank compartment of a bottom-discharge tank shall be equipped with a reliable and effective shut-off valve located inside the shell of the tank or tank compartment in the tank or compartment outlet; and the operating mechanism for such valve or valves shall be provided with a secondary closing mechanism remote from tank filling openings and discharge faucets, for operation in the event of fire or other accident. Such control mechanism shall be provided with a fusible section which will cause the valve to close automatically in case of fire, and the critical temperature for the fusing of such section shall not exceed 200° F.

**§ 78.326–12 Shear section.**

(a) There shall be provided between each shut-off valve seat and discharge faucet a shear section which will break under strain, unless the discharge piping is so arranged as to afford equivalent protection, and leave the shut-off valve seat intact in case of accident to the discharge faucet or piping.

**§ 78.326–13 Anchoring of cargo tank.**

(a) *Hold-down devices.* Adequate hold-down devices shall be provided to anchor each cargo tank in a suitable manner that will not introduce undue concentration of stresses and shall be built to withstand loadings in any direction equal to the weight of the tank and attachments when filled with water. These devices on vehicles with frames shall incorporate turnbuckles or similar positive action devices for drawing the tank down tight on the frame of the motor vehicle.

(b) *Stops and anchors.* Suitable stops and anchors shall be attached to the motor vehicle and the cargo tank to prevent relative movement between them due to starting, stopping and turning. Stops and anchors shall be installed so as to be readily accessible for inspection and maintenance except that insulation is permitted to cover such stops and anchors.

(c) *Anchoring integral cargo tanks.* Whenever any cargo tank is so designed and constructed that the cargo tank constitutes, in whole or in part, the stress member used in lieu of a frame, then such cargo tanks shall be designed so as to successfully and adequately withstand the stresses thereby imposed in addition to those otherwise imposed on the cargo tank.

**§ 78.326–14 Gauging devices.**

(a) No applicable provision.

**§ 78.326–15 Pumps.**

(a) Liquid pumps, whenever used, must be of suitable design, adequately protected against breakage by collisions. Unless they are of the centrifugal type, they shall be equipped with suitable pressure actuated by-pass valves permitting flow from discharge to suction or to the tank.

**§ 78.326–16 Method of test.**

(a) *Test for leaks.* Every cargo tank shall be tested by a minimum air or hydrostatic pressure of 3 psig. applied to the whole tank and dome if it be noncompartmented. If compartmented, each individual compartment shall be similarly tested with adjacent compartments empty and at atmospheric pressure. Air pressure, if used, shall be maintained for a period of at least five minutes during which the entire surface of all joints under pressure shall be coated with a solution of soap and water, heavy oil, or other material suitable for the purpose, foaming or bubbling of which indicates the presence of leaks. Hydrostatic pressure, if used, shall be done by using water or other liquid having a similar viscosity, the temperature of which shall not exceed 100° F. during the test, and applying pressure as prescribed above, gauged at the top of the tank, at which time all joints under pressure shall be inspected for the issuance of liquid to indicate leaks. All closures shall be in place while test by either method is made. During these tests, operative relief devices shall be clamped, plugged, or otherwise rendered inoperative; such clamps, plugs, and similar devices shall be removed immediately after the test is finished. Any leakage discovered by either of the methods above described, or by any other method, shall be deemed evidence of failure to meet the requirements of this specification. Tanks failing to pass this test shall be suitably repaired, and the above described tests shall be continued until no leaks are discovered, before any cargo tank is put into service.

(b) *Test for distortion or failure.* Every cargo tank to which this specification applies shall be tested by pressures prescribed in paragraph (a) of this section and shall withstand such pressure without undue distortion, evidence of impending failure, or failure. Failure to meet this requirement shall be deemed as sufficient cause for rejection under this specification. If there is undue distortion, or if failure impends or occurs, the cargo tank shall not be returned to service unless a suitable repair is made. The suitability of the repair shall be determined by the same method of test.

(c) *Retest requirements.* See § 77.824 (a) of this chapter.

**§ 78.326–17 Marking of cargo tanks.**

(a) *Metal identification plate.* There shall be on every cargo tank a metal plate located on the right side, near the front, in a place readily accessible for inspection. This plate shall be permanently affixed to the tank by means of soldering, brazing, welding, or other equally suitable means; and upon it shall be marked by stamping, embossing, or other means of forming letters into or on the metal of the plate itself, in the manner illustrated below, at least the information indicated below. The plate shall not be so painted as to obscure the markings thereon.

Carrier's Serial Number [2]
Manufacturer's Name [3]
Date of Manufacture [3]
ICC MC 305
Nominal Tank Capacity ------ U.S. Gallons

(b) *Test date markings.* The date of the last test shall be painted on the tank in letters not less than 1¼ inches high, in legible colors, immediately below the metal identification plate specified in paragraph (a) of this section.

(c) *Additional markings.* In addition to the above markings, cargo tanks must be marked as required by § 77.823 of this chapter.

**§ 78.326–18 Certification.**

(a) A certificate from the manufacturer of the cargo tank, or from a competent testing agency, certifying that each such cargo tank is designed and constructed in accordance with the requirements of the specification shall be procured, and such certificate shall be retained in the files of the carrier during the time that such cargo tank is employed by him. In lieu of this certificate, if the motor carrier himself elects to ascertain if any such tank fulfills the requirements of the specification by his own test, he shall similarly retain the test data.

**§ 78.330 Specification MC 310; [4] cargo tanks constructed of ferrous materials, primarily for the transportation of corrosive liquids.**

**§ 78.330–1 General requirements.**

(a) *Must comply with A.S.M.E. Code.* Tanks built under this specification shall

[2] Carriers are not required to number their cargo tanks serially; any designation regularly used by the carrier to identify the tank may be put in this space.

[3] In the event the identity of the tank manufacturer or the date of manufacture is not known and cannot be ascertained, the spaces indicated shall be marked "MAKE UNKNOWN" and/or "DATE OF MANUFACTURE UNKNOWN."

[4] Existing tank motor vehicles continuing in service.

(a) *Specification tank motor vehicles.* Tank motor vehicles used for the transportation of corrosive liquids which shall have been in service prior to June 15, 1940, may be continued in service provided they have been designed and constructed in accordance with the requirements set forth in paragraphs T–117(a), T–118 (a) and (b), T–120, T–121, T–122, T–123, and T–124 of Regulations for the Transportation of Explosives and Other Dangerous Articles on Public Highways by Motor Truck or Motor Vehicle, prescribed by order of the Commission dated November 6, 1934, and vacated on June 15, 1940.

(b) *Existing nonspecification tank motor vehicles.* Tank motor vehicles used for the transportation of corrosive liquids not meeting the requirements set forth in paragraph

be designed and constructed in accordance with and fulfill all requirements of (1) the 1949 edition, (2) 1950 edition, (3) 1952 edition, (4) 1956 edition, or (5) the 1959 edition of Section VIII of the American Society of Mechanical Engineers Boiler and Pressure Vessel Code, no revisions, which are hereafter referred to as "the Code."

(b) *When divided into compartments.* When the interior of the tank is divided into compartments, each compartment shall be designed, constructed, and tested as a separate tank.

**§ 78.330–2 Material.**

(a) As specified in paragraphs U–12, U–13, and U–20 of the Code, 1949 edition, no revisions. Tanks may be constructed of ferrous materials listed in Table U–2 including the stainless steels or of nickel or nickel alloys as listed in Table U–3 of the Code. Use of other materials listed in Table U–3 may be authorized by the Commission upon submission of satisfactory supporting data. Materials for tanks transporting hydrogen peroxide over 52 percent by weight, must comply with the 1956 edition of the Code, but shall be limited to Aluminum Association Nos. 1060, 1260, 5254, and 5652. Other aluminum alloys may be authorized by the Commission upon submission of satisfactory supporting data.

(b) *Lining.* Except as provided in paragraph (c) of this section, cargo tanks must be lined and the material used for lining each cargo tank subject to this specification shall be homogenous, nonporous, imperforate when applied, not less elastic than the metal of the tank proper, and substantially immune to attack by the commodities transported therein. It shall be of substantially uniform thickness and it shall be directly bonded or attached by other equally satisfactory means. Joints and seams in the lining shall be made by fusing the material together, or by other equally satisfactory means. The interior of the tank shall be free from scale, oxidation, moisture, and all foreign matter during the lining operation.

(c) *Conditions under which tanks need not be lined.* Tanks need not be lined as provided in paragraph (b) of this section, if:

(1) The material of the tank is substantially immune to attack by the materials to be transported therein.

(2) The material of the tank is thick enough to withstand 10 years' normal service without being reduced at any point to less thickness than that specified in § 78.330–3 corresponding to its capacity, or

(3) the chemical reaction between the material of the tank and the commodity to be transported therein is such as to allow the tank to be properly passivated or neutralized as set forth elsewhere in this appendix, or

(4) for the transportation of hydrofluoric acid of 60 percent or higher concentration, they be passivated in the following or an equally effective method: By filling the tank to not less than 90 percent of its capacity with hydrofluoric acid of 58 percent strength and allowing it to stand at least 48 hours at a temperature of 80° F., then 7 hours at 140° F., the internal pressure being maintained at atmospheric pressure the meanwhile.

**§ 78.330–3 Thickness of metal.**

(a) The minimum thickness of metal for cargo tanks shall be as follows:

| Tank capacity | Minimum thickness (inches) |
|---|---|
| Not more than 1,200 gallons | ¼ |
| Over 1,200 to 1,800 gallons | 5/16 |
| Over 1,800 gallons | ⅜ |

**§ 78.330–4 Joints.**

(a) All joints and seams formed in the manufacture of any cargo tank shall be made tight by welding, riveting, riveting and welding, brazing, or riveting and brazing, at the option of the motor carrier, subject to the limitation that any of the aforesaid methods are permissible only when any one of them or combination as used in the tank is not subject to adverse action by the nature of the corrosive liquid which is to be transported in such tank provided that joints in tanks for hydrogen peroxide of concentration exceeding 52 percent shall be made by welding only.

**§ 78.330–5 Bulkheads, baffles, ring stiffeners, tank supports and compartmentation.**

(a) No applicable provision.

**§ 78.330–6 Closures for manholes.**

(a) The manhole cover shall be designed to provide a secure closure of the manhole. All covers, not hinged to the tanks, shall be attached to the outside of the dome by at least ⅛-inch chain or its equivalent. All joints between manhole covers and their seats shall be made tight against leakage of vapor and liquid by use of gaskets of suitable material not subject to attack by the corrosive liquid to be transported in the tank.

**§ 78.330–7 Overturn protection.**

(a) No applicable provision.

**§ 78.330–8 Outlets.**

(a) *Outlet construction.* Except as provided hereinafter, no cargo tanks, except those used for the shipments of sludge acid or alkaline corrosive liquids, and no tanks for the transportation of hydrogen peroxide in concentrations exceeding 52 percent by weight, shall have bottom discharge outlets; outlets leaving the cargo tank at or near the top but having the end of the outlet below the top liquid level shall not be considered as bottom outlets but such outlets must be equipped with a shut-off valve at the point of outlet from the cargo tank and a shut-off valve or a blank flange or screw-on cap at the discharge end of the outlet and must not be moved with any of the contents in the line beyond the point where it leaves the cargo tank. The valve at the tank shall be protected against damage in the event of overturn. Cargo tanks used for the transportation of sludge acid and/or alkaline corrosive liquids may be equipped with bottom outlets when the products to be transported are too viscous to be unloaded through a dome connection or top outlet.

(b) *Bottom outlets.* Bottom outlets, when permitted in accordance with paragraph (a) of this section, shall be of metal not subject to rapid deterioration by the lading, and each shall be provided with a valve or plug at its upper end and a liquid-tight closure at its lower end. Every such valve or plug shall be such as to insure against unseating due to stresses or shocks incident to transportation. Bottom outlets are equipped with an effective and reliable shut-off valve located inside the shell of the tank, tank compartment outlet or sump if the sump is integral with the tank.

(c) *Bottom washout chambers.* Except as specified in subparagraph (1) of this paragraph, tanks may be equipped with bottom washout chambers. Bottom washout chambers shall be of metal not subject to rapid deterioration by the lading and shall be provided with a liquid-tight closure at its lower end. If used for loading or unloading, they shall be equipped with a valve or plug at the upper end.

(1) Bottom washout chambers are not permitted on tanks used for the transportation of hydrogen peroxide of concentration exceeding 52 percent by weight.

**§ 78.330–9 Vents, valves and connections.**

(a) When installed, venting, gauging, loading, and air inlet devices, including their valves, shall be provided with adequate means for their secure closure and means shall also be provided for the closing of pipe connections of valves.

**§ 78.330–10 Protection of fittings.**

(a) Draw-off valves and faucets projecting beyond the frame, or if the vehicle be frameless, beyond the shell, at the rear, shall be adequately protected in the event of collision by steel bumpers or other equally effective devices.

**§ 78.330–11 Emergency discharge control.**

(a) See § 78.330–8(b).

**§ 78.330–12 Shear section.**

(a) *Discharge connections.* There shall be provided between each shut-off valve seat and discharge valve a shear section which will break under strain, unless the discharge piping is so arranged as to afford equivalent protection, and leave the shut-off valve seat intact in case of accident to the discharge valve or piping.

(b) *Heater coils.* Heater coils, when installed, shall be so constructed that the breaking off of their external connections will not cause leakage of contents of tanks.

(a) of this footnote, which shall have been in service prior to June 15, 1940, may be continued in service provided they fulfill the requirements set forth under § 77.824(c) of this chapter and are and can be maintained in safe operating condition, but in any event they shall be equipped with at least the accessories specified in § 78.330–6, –9, –10, and –12.

(c) On the required metal identification plate substitute "ICC Spec T–118," or "ICC 7.5–S–1" or "NO SPECIFICATION" as appropriate.

**§ 78.330–13 Anchoring of tank.**

(a) No applicable provision.

**§ 78.330–14 Gauging devices.**

(a) No applicable provision.

**§ 78.330–15 Pumps and compressors.**

(a) No applicable provision.

**§ 78.330–16 Method of test.**

(a) *Test for leaks.* Every cargo tank shall be tested by completely filling the tank and dome with water or other liquid having a similar viscosity, the temperature of which shall not exceed 100° F. during the test, and applying a pressure of 1½ times the design pressure but not less than 10 psig. The tank must hold the prescribed pressure for at least 10 minutes without leakage or evidence of distress. All closures shall be in place while test is made, and the pressure shall be gauged at the top of the tank.

(b) *Test for distortion or failure.* Every cargo tank shall be tested by the pressures prescribed in paragraph (a) of this section and shall withstand such pressures without undue distortion, or if failure impends or occurs, the cargo tank shall not be returned to service unless a suitable repair is made. The suitability of the repair shall be determined by the same method of test.

(c) *Retest requirements.* See § 77.824(c) of this chapter.

**§ 78.330–17 Marking of cargo tanks.**

(a) *Metal identification plate.* There shall be on every cargo tank a metal plate located on the right side, near the front, in a place readily accessible for inspection. This plate shall be permanently affixed to the tank by means of soldering, brazing, welding, or other suitable means; and upon it shall be marked by stamping, embossing, or other means of forming letters into or on the metal of the plate itself in the manner illustrated below, at least the information indicated below. The plate shall not be so painted as to obscure the markings thereon.

Carrier's Serial Number [1]
Manufacturer's Name [2]
Date of Manufacture [2]
ICC MC 310 [4]
Nominal Capacity ------ U.S. Gallons

(b) *Test date markings.* The date of the last test shall be painted on the tank in letters not less than 1¼ inches high, in legible colors, immediately below the metal identification plate specified in paragraph (a) of this section.

(c) *Additional markings.* In addition to the above markings, cargo tanks must be marked as required by § 77.823 of this chapter.

[1] Carriers are not required to number their tanks serially; any designation regularly used by the carrier to identify the tank may be put in this space.

[2] In the event the identity of the tank manufacturer or the date of manufacture is not known and cannot be ascertained, the spaces indicated shall be marked "MAKE UNKNOWN" and/or "DATE OF MANUFACTURE UNKNOWN."

[3] Substitute "ICC Spec–T–118," or "ICC 7.5–S–1," or "ICC MC 310–$H_2O_2$," or "NO SPECIFICATION," as appropriate.

**§ 78.330–18 Certification.**

(a) A certificate from the manufacturer of the cargo tank, or from a competent testing agency, certifying that each such tank is designed and constructed in accordance with the requirements of the specification, shall be procured and such certificate shall be retained in the files of the carrier during the time that such tank is employed in the transportation of corrosive liquids by him. In lieu of this certificate, if the motor carrier himself elects to ascertain if any such tank fulfills the requirements of the specification by his own test, he shall similarly retain the test data. Where such tanks are used for hydrogen peroxide in concentrations exceeding 52 percent by weight, such certificate or test data shall indicate that the tank complies with special provisions of this specification for that lading.

**§ 78.331 Specification MC 311; [4] cargo tanks constructed of ferrous metals or aluminum, primarily for the transportation of corrosive liquids.**

**§ 78.331–1 General requirements.**

(a) *Tank design.* (1) *Ferrous materials.* Cargo tanks built of ferrous materials under this specification that are unloaded by pressure must be built of welded construction in accordance with (1) the 1949 edition, (2) 1950 edition, (3) 1952 edition, or (4) the 1959 edition of Section VIII of the Society of Mechanical Engineers Boiler and Pressure Vessel Code, no revisions, except that for sheet thicknesses of less than 5/16 inch wherein the Code specifies both minimum and maximum limits of tensile value of materials, the maximum limits need not apply. Such tanks shall not have head, bulkhead, baffle or shell thicknesses less than that specified in § 78.331–3 (a) and (b), nor shall the spacing of bulkheads, baffles or shell stiffeners exceed that specified in those paragraphs.

(2) *Nonferrous materials.* Methods of design, fabrication, and construction for nonferrous materials shall be such as to result in a cargo tank having properties at least equal to those of a ferrous cargo tank.

(b) *When divided into compartments.* When the interior of the tank is divided into compartments, each compartment shall be designed, constructed and tested as a separate tank.

**§ 78.331–2 Material.**

(a) *A.S.M.E. Code materials.* Cargo tanks required to comply with Section VIII of the American Society of Mechanical Engineers Boiler and Pressure Vessel Code must be manufactured of materials authorized by the Code except that for sheet thicknesses of less than 5/16 inch wherein the Code specifies both minimum and maximum limits of tensile value of materials, the maximum limits need not apply.

(b) *Ferrous metal properties.* Materials used in cargo tanks built to conform with the tables in § 78.331–3 must have the following minimum physical properties:

| | | |
|---|---|---|
| Yield point | | 25,000 psi. |
| Ultimate strength | | 45,000 psi. |
| Minimum elongation, | 2-inch sample. | 20 percent. |

(c) *Aluminum properties.* Aluminum materials must have the following minimum physical properties:

| | | |
|---|---|---|
| Yield point | | 12,000 psi. |
| Ultimate strength | | 17,000 psi. |
| Minimum elongation, | 2-inch sample. | 6 percent. |

(d) *Lining.* Except as provided in paragrah (e) of this section, cargo tanks must be lined and the material used for lining each cargo tank subject to this specification shall be homogenous, nonporous, imperforate when applied, not less elastic than the metal of the tank proper, and substantially immune to attack by the commodities to be transported therein. It shall be of substantially uniform thickness, and it shall be directly bonded or attached by other equally satisfactory means. Joints and seams in the lining shall be made by fusing the material together, or by other equally satisfactory means. The interior of the tank shall be free from scale, oxidation, moisture, and all foreign matter during the lining operation.

[4] Existing tank motor vehicles continuing in service.

(a) *Specification tank motor vehicles.* Tank motor vehicles used for the transportation of corrosive liquids which shall have been in service prior to June 15, 1940, may be continued in service provided they have been designed and constructed in accordance with the requirements set forth in paragraphs T–117(a), T–118 (a) and (b), T–120, T–121, T–122, T–123 and T–124 of Regulations for the Transportation of Explosives and Other Dangerous Articles on Public Highways by Motor Truck or Motor Vehicle prescribed by order of the Commission dated November 6, 1934, and vacated on June 15, 1940.

(1) Tank motor vehicles used for the transportation of corrosive liquids which shall have been in service prior to December 31, 1953, may be continued in service provided they have been designed and constructed in accordance with the requirements of specification MC 310 (§ 78.330 of this chapter).

(b) *Existing nonspecification tank motor vehicles.* Tank motor vehicles used for the transportation of corrosive liquids not meeting the requirements set forth in paragraph (a) of this footnote, which shall have been in service prior to June 15, 1940, may be continued in service provided they fulfill the requirements set forth under § 78.331–16 and are and can be maintained in safe operating condition, but in any event they shall be equipped with at least the accessories specified in §§ 78.330–6, –9, –10 and –12 of specification MC 310 or §§ 78.331–6, –10 and –12 of specification MC 311.

(c) *Qualification of existing tank motor vehicles which conform to specification MC 311.* Tank motor vehicles used for the transportation of corrosive liquids which shall have been in service prior to December 31, 1953, and which meet all of the construction requirements of this specification may be continued in service provided such cargo tanks are marked ICC MC 311X on the plate required by § 78.331–17.

(d) On the required metal identification plate substitute "ICC Spec T–118," or "ICC 7.5–S–1," or "MC 311X," or "NO SPECIFICATION" as appropriate.

TABLE III—FOR LIQUIDS OVER 10 TO 13 POUNDS PER GALLON

[Minimum Shell Thickness in United States Standard Gauge and Inches—For Mild, High-tensile and Stainless Steel]

| Distance between attachments of bulkheads, baffles or other shell stiffeners | Volume capacity of tank in gallons per inch of length | | |
|---|---|---|---|
| | 10 or less | Over 10 to 14 | Over 14 to 18 | Over 18 |
| | Maximum shell radius of less than 70 inches | | | |
| 36 inches or less | 10 gauge | 10 gauge | 10 gauge | 8 gauge. |
| Over 36 inches to 54 inches | 10 gauge | 10 gauge | 8 gauge | 3/16 inch. |
| Over 54 inches to 60 inches | 8 gauge | 8 gauge | 3/16 inch | 1/4 inch. |
| | Maximum shell radius 70 inches or more but less than 90 inches | | | |
| 36 inches or less | 10 gauge | 10 gauge | 8 gauge | 3/16 inch. |
| Over 36 inches to 54 inches | 8 gauge | 8 gauge | 3/16 inch | 1/4 inch. |
| Over 54 inches to 60 inches | 3/16 inch | 3/16 inch | 1/4 inch | 1/4 inch. |
| | Maximum shell radius 90 inches or more but less than 125 inches | | | |
| 36 inches or less | 10 gauge | 8 gauge | 3/16 inch | 1/4 inch. |
| Over 36 inches to 54 inches | 8 gauge | 3/16 inch | 1/4 inch | 1/4 inch. |
| Over 54 inches to 60 inches | 3/16 inch | 1/4 inch | 1/4 inch | 1/4 inch. |
| | Maximum shell radius 125 inches or more | | | |
| 36 inches or less | 8 gauge | 3/16 inch | 1/4 inch | 1/4 inch. |
| Over 36 inches to 54 inches | 3/16 inch | 1/4 inch | 1/4 inch | 5/16 inch. |
| Over 54 inches to 60 inches | 1/4 inch | 1/4 inch | 5/16 inch | 5/16 inch. |

TABLE IV—FOR LIQUIDS OVER 13 TO 16 POUNDS PER GALLON

[Minimum Shell Thickness in United States Standard Gauge and Inches—For Mild, High-tensile and Stainless Steel]

| Distance between attachments of bulkheads, baffles or other shell stiffeners | Volume capacity of tank in gallons per inch of length | | |
|---|---|---|---|
| | 10 or less | Over 10 to 14 | Over 14 to 18 | Over 18 |
| | Maximum shell radius of less than 70 inches | | | |
| 36 inches or less | 8 gauge | 8 gauge | 8 gauge | 3/16 inch. |
| Over 36 inches to 54 inches | 8 gauge | 8 gauge | 3/16 inch | 1/4 inch. |
| Over 54 inches to 60 inches | 8 gauge | 3/16 inch | 1/4 inch | 1/4 inch. |
| | Maximum shell radius 70 inches or more but less than 90 inches | | | |
| 36 inches or less | 8 gauge | 8 gauge | 3/16 inch | 1/4 inch. |
| Over 36 inches to 54 inches | 8 gauge | 3/16 inch | 1/4 inch | 1/4 inch. |
| Over 54 inches to 60 inches | 3/16 inch | 1/4 inch | 1/4 inch | 5/16 inch. |
| | Maximum shell radius 90 inches or more but less than 125 inches | | | |
| 36 inches or less | 8 gauge | 3/16 inch | 1/4 inch | 1/4 inch. |
| Over 36 inches to 54 inches | 3/16 inch | 1/4 inch | 1/4 inch | 5/16 inch. |
| Over 54 inches to 60 inches | 1/4 inch | 1/4 inch | 5/16 inch | 5/16 inch. |
| | Maximum shell radius 125 inches or more | | | |
| 36 inches or less | 1/4 inch | 1/4 inch | 1/4 inch | 5/16 inch. |
| Over 36 inches to 54 inches | 1/4 inch | 1/4 inch | 5/16 inch | 5/16 inch. |
| Over 54 inches to 60 inches | 1/4 inch | 5/16 inch | 5/16 inch | 5/16 inch. |

(e) *Conditions under which tanks need not be lined.* Tanks need not be lined as provided in paragraph (d) of this section, if:

(1) The material of the tank is substantially immune to attack by the materials to be transported therein.

(2) The material of the tank is thick enough to withstand 10 years' normal service without being reduced at any point to less thickness than that specified in § 78.331-3 corresponding to its type, or

(3) the chemical reaction between the material of the tank and the commodity to be transported therein is such as to allow the tank to be properly passivated or neutralized.

**§ 78.331-3 Thickness of metal.**

(a) *Head, bulkhead and baffle thicknesses.* Tanks built under this specification that are not constructed in accordance with § 78.331-2(a) shall have head thicknesses conforming with those in the following tables:

TABLE I—MINIMUM THICKNESS OF HEADS, BULKHEADS, AND BAFFLES (DISHED, CORRUGATED, REINFORCED OR ROLLED)—FOR MILD, HIGH-TENSILE AND STAINLESS STEELS

| Weight of product at 60° F. in pounds per gallon | Volume capacity of tank in gallons per inch of length | | | |
|---|---|---|---|---|
| | 10 or less | Over 10 to 14 | Over 14 to 18 | Over 18 |
| Less than 10 | 12 gauge [1] | 10 gauge | 9 gauge | 8 gauge. |
| 10 to 13 | 10 gauge | 9 gauge | 8 gauge | 7/16 inch. |
| Over 13 to 16 | 9 gauge | 7/16 inch | 1/4 inch | 1/4 inch. |

[1] Wherever gauges are specified, the references shall be to U.S. Standard gauge.

(b) *Shell thickness.* Tanks built under this specification that are not constructed in accordance with § 78.331-2(a), shall have shell thicknesses conforming with those in the following tables:

TABLE II—FOR LIQUIDS LESS THAN 10 POUNDS PER GALLON

[Minimum Shell Thickness in United States Standard Gauge and Inches—For Mild, High-tensile and Stainless Steel]

| Distance between attachments of bulkheads, baffles or other shell stiffeners | Volume capacity of tank in gallons per inch of length | | | |
|---|---|---|---|---|
| | 10 or less | Over 10 to 14 | Over 14 to 18 | Over 18 |
| | Maximum shell radius of less than 70 inches | | | |
| 36 inches or less | 12 gauge | 12 gauge | 12 gauge | 10 gauge. |
| Over 36 inches to 54 inches | 12 gauge | 12 gauge | 10 gauge | 9 gauge. |
| Over 54 inches to 60 inches | 12 gauge | 10 gauge | 9 gauge | 8 gauge. |
| | Maximum shell radius 70 inches or more but less than 90 inches | | | |
| 6 inches or less | 12 gauge | 12 gauge | 10 gauge | 9 gauge. |
| Over 36 inches to 54 inches | 12 gauge | 10 gauge | 9 gauge | 8 gauge. |
| Over 54 inches to 60 inches | 10 gauge | 9 gauge | 8 gauge | 7/16 inch. |
| | Maximum shell radius 90 inches or more but less than 125 inches | | | |
| 36 inches or less | 12 gauge | 10 gauge | 9 gauge | 8 gauge. |
| Over 36 inches to 54 inches | 10 gauge | 9 gauge | 8 gauge | 7/16 inch. |
| Over 54 inches to 60 inches | 9 gauge | 8 gauge | 7/16 inch | 1/2 inch. |
| | Maximum shell radius 125 inches or more | | | |
| 36 inches or less | 10 gauge | 9 gauge | 8 gauge | 7/16 inch. |
| Over 36 inches to 54 inches | 9 gauge | 8 gauge | 7/16 inch | 1/2 inch. |
| Over 54 inches to 60 inches | 8 gauge | 7/16 inch | 1/2 inch | 1/2 inch. |

(c) *Cargo tanks built of nonferrous metals.* Cargo tanks constructed of materials other than mild, high-tensile or stainless steel shall have shell and head thicknesses designed in accordance with the following formula:

$$\text{Thickness for materials other than steel} = \text{Steel thickness from tables} \times \sqrt[3]{\frac{3 \times 10^7}{\text{Modulus of elasticity of material to be used}}}$$

**§ 78.331-4 Joints.**

(a) All joints and seams formed in the manufacture of any cargo tank shall be made tight by welding.

**§ 78.331-5 Bulkheads, baffles, ring stiffeners, tank supports and compartmentation.**

(a) Flat heads or flat bulkheads without reinforcement are not permitted. The use of baffles is not a specification requirement.

**§ 78.331-6 Closures for manholes.**

(a) The manhole cover shall be designed to provide a secure closure of the manhole. All joints between manhole covers and their seats shall be made tight against leakage of vapor and liquid by use of gaskets of suitable material not subject to attack by the corrosive liquid to be transported in the tank.

**§ 78.331-7 Overturn protection.**

(a) All closures for filling openings and outlets shall be protected from damage in the event of overturn of the motor vehicle by being enclosed within the body of the tank or dome attached thereto or the use of substantial metal guards securely attached to the cargo tank or frame of the motor vehicle.

**§ 78.331-8 Outlets.**

(a) *Outlet construction.* No cargo tank, except those used for shipments of sludge acid or alkaline corrosive liquids, shall have bottom discharge outlets; outlets leaving the cargo tank at or near the top but having the end of the outlet below the top liquid level shall not be considered as bottom outlets but such outlets must be equipped with a shut-off valve at the point of outlet from the cargo tank and a shut-off valve or a blank flange or screw-on cap at the discharge end of the outlet, and must not be moved with any of the contents in the line beyond the point where it leaves the cargo tank. The valve at the tank shall be protected against damage in the event of overturn. Cargo tanks used for the transportation of sludge acid and/or alkaline corrosive liquids may be equipped with bottom outlets when the products to be transported are too viscous to be unloaded through a dome connection or top outlet.

(b) *Bottom outlets.* Bottom outlets, when permitted in accordance with paragraph (a) of this section, shall be of metal not subject to rapid deterioration by the lading, and each shall be provided with a valve or plug at its upper end and a liquid-tight closure at its lower end. Every such valve or plug shall be such as to insure against unseating due to stresses or shocks incident to transportation. Bottom outlets must be equipped with an effective and reliable shut-off valve located inside the shell of the tank, tank compartment outlet, or sump if the sump is integral with the tank.

(c) *Bottom washout chambers.* Cargo tanks may be equipped with bottom washout chambers. Bottom washout chambers shall be of metal not subject to rapid deterioration by the lading and shall be provided with a liquid-tight closure at its lower end. If used for loading or unloading, they shall be equipped with a valve or plug at the upper end.

**§ 78.331-9 Vents, valves and connections.**

(a) *Safety vent.* Each cargo tank or compartment thereof must be equipped with suitable pressure relief devices as required by the Code, or shall be fitted with suitable rupture discs in the dome or manhole assemblies in lieu of mechanical pressure-relief valves. Such discs shall be designed to rupture at not to exceed 1½ times the design pressure.

(b) *Gauging, loading and air-inlet devices.* Gauging, loading and air-inlet devices, including their valves, shall be provided with adequate means for their secure closure, and means shall also be provided for the closing of pipe connections of valves.

**§ 78.331-10 Protection of fittings.**

(a) Draw-off valves and fittings of cargo tanks projecting beyond the frame, or if the vehicle be frameless, beyond the shell, shall be adequately protected in the event of a collision by steel bumpers or other equally effective devices.

**§ 78.331-11 Emergency discharge control.**

(a) See § 78.331-8(b).

**§ 78.331-12 Shear section.**

(a) *Discharge connections.* There shall be provided between each shut-off valve seat and discharge valve a shear section which will break under strain, unless the discharge piping is so arranged as to afford equivalent protection, and leave the shut-off valve seat intact in case of accident to the discharge valve or piping.

(b) *Heater coils.* Heater coils, when installed, shall be so constructed that the breaking off of their external connections will not cause leakage of contents of tanks.

**§ 78.331-13 Anchoring of tank.**

(a) No applicable provision.

**§ 78.331-14 Gauging devices.**

(a) Every cargo tank, and every compartment must be equipped with a means of indicating outage.

**§ 78.331-15 Pumps and compressors.**

(a) No applicable provision.

**§ 78.331-16 Method of test.**

(a) *Test for leaks.* Every cargo tank shall be tested by completely filling the tank and dome with water or other liquid having a similar viscosity, or with a corrosive liquid permitted to be transported in the cargo tank, the temperature of which shall not exceed 100° F. during the test, and applying a pressure of 1½ times the design pressure but not less than 3 psig. The pressure shall be gauged at the top of the tank. The tank must hold the prescribed pressure for at least 10 minutes without failure, undue distortion, leakage or evidence of impending failure. All closures shall be in place while test is made.

(b) *Test for distortion or failure.* Every cargo tank shall be tested by the pressures prescribed in paragraph (a) of this section and shall withstand such pressures without undue distortion or other indication of impending failure. If there is undue distortion, or if failure impends or occurs, the cargo tank shall not be returned to service unless a suitable repair is made. The suitability of the repair shall be determined by the same method of test.

(c) *Test of heating system.* After an interior heating system consisting of coil piping is installed, and before the tanks to which they are fitted are placed in service, the heating system shall be tested. Systems employing media such as steam or hot water under pressure for heating the contents of cargo tanks shall be tested with hydrostatic pressure and proved to be tight at 200 psig. Systems employing flues for the heating of the contents of cargo tanks shall be suitably tested to insure against the leakage of the contents of the tanks either into the flues or into the atmosphere.

(d) *Retest requirements.* See § 77.824 (c) of this chapter.

**§ 78.331-17 Marking of cargo tanks.**

(a) *Metal identification plate.* There shall be on every cargo tank a metal plate located on the right side, near the front, in a place readily accessible for inspection. This plate shall be permanently affixed to the tank by means of soldering, brazing, welding, or other suitable means; and upon it shall be marked by stamping, embossing, or other means of forming letters into or on the metal of the plate itself in the manner illustrated below, at least the information indicated below. The plate shall not be so painted as to obscure the markings thereon.

Carrier's Serial Number [1]
Manufacturer's Name [2]
Date of Manufacture [2]
ICC MC • • • [3]
Maximum Working Pressure
Material
Lining
Nominal Capacity _____ U.S. Gallons
Density of Cargo, Maximum ___ Lb./Gallon

[1] Carriers are not required to number their tanks serially; any designation regularly used by the carrier to identify the tank may be put in this space.

[2] In the event the identity of the tank manufacturer or the date of manufacture is not known and cannot be ascertained, the spaces indicated shall be marked "MAKE UNKNOWN" and/or "DATE OF MANUFACTURE UNKNOWN."

[3] For MC 311 cargo tanks insert MC 311-IIS for steel tanks designed in accordance with Table II of § 78.331-3(b); MC 311-IIIS for steel tanks designed in accordance with Table III of § 78.331-3(b); and MC 311-IVS for steel tanks designed in accordance with Table IV of § 78.331-3(b). For aluminum tanks substitute AL for S.

(b) *Test date markings.* The date of the last test shall be painted on the tank in letters not less than 1¼ inches high, in legible colors, immediately below the metal identification plate specified in paragraph (a) of this section.

(c) *Additional markings.* In addition to the above markings, cargo tanks must be marked as required by § 77.823 of this chapter.

**§ 78.331–18 Certification.**

(a) A certificate from the manufacturer of the cargo tank, or from a competent testing agency, certifying that each such cargo tank is designed and constructed in accordance with the requirements of the specification shall be procured, and such certificate shall be retained in the files of the carrier during the time that such cargo tank is employed by him. In lieu of this certificate, if the motor carrier himself elects to ascertain if any such tank fulfills the requirements of the specification by his own test, he shall similarly retain the test data.

**§ 78.336 Specification MC 330; cargo tanks constructed of steel, primarily for transportation of compressed gases. For qualification of existing cargo tanks for continued service, see § 73.33 (b), (c), (d), (e), (f), (g), (h) and (i) of this chapter.**

**§ 78.336–1 General requirements.**

(a) *Code construction.* Tanks shall be of seamless or welded steel construction or combination of both and shall be designed and constructed in accordance with and fulfill the requirements of (1) the 1950 edition, (2) 1952 edition, (3) 1956 edition, (4) 1959 edition, or (5) 1962 edition of Section VIII of the American Society of Mechanical Engineers Boiler and Pressure Vessel Code; no revisions except to include ASME Case Interpretations Nos. 1204–9, 1297–3, and 1298–2 and all addendas through the 1962 addenda issued July 16, 1962, (any or all of which hereinafter is referred to as "the Code"). When the above referenced ASME Case interpretations are used for the construction of tanks, the following additional requirements shall be met:

(1) Welding procedure and welder performance tests shall be made in accordance with the 1962 edition of Section IX of the ASME Boiler and Pressure Vessel Code. In addition to the essential variables enumerated in Section IX of this Code, the following shall also be considered essential variables: number of passes, thickness of plate, heat input per pass, and manufacturer of rod or flux. The number of passes, thickness of plate and heat input per pass shall not vary more than 25 percent from the procedure qualification.

(2) Impact tests shall be made on a lot basis. A lot shall be defined as 100 tons or less of the same heat, and having a thickness variation no greater than plus or minus 25 percent. The minimum impact required for full size specimens shall be 20 ft.-lbs. (or 10 ft.-lbs. for half sized specimens) at 0° F. Charpy V-notch in both the longitudinal and transverse direction. If the lot test does not pass this requirement, individual plates may be accepted if they individually meet this impact test requirement.

(3) Welding procedure and welder qualification tests shall be made each year with one copy of the reports submitted to the Bureau of Explosives.

EXCEPTION: Chlorine tanks shall be fully radiographed and stress relieved in accordance with the provisions of the Code under which they are constructed.

(b) *Design pressure.* The design pressure of a tank authorized under this specification shall be not less than the vapor pressure of the commodity contained therein at 115° F. or as prescribed for a particular commodity in § 73.315 (a) (1) of this chapter, except that in no case shall the design pressure of any container be less than 100 psig. nor more than 500 psig. When corrosion factor is prescribed by these regulations (see § 73.315(a) (1) Note 4 of this chapter) the wall thickness of the tank calculated in accordance with the Code (see paragraph (a) of this section) shall be increased by 20 percent or 0.10 inch, whichever is less.

NOTE 1. The term "design pressure" as used in this specification is identical to the term "maximum allowable working pressure" as used in the Code (see paragraph (a) of this section).

(c) *Grouping openings.* Except as noted below, all openings in the tank shall be grouped in one location, either at the top of the tank or at one end of the tank.

EXCEPTIONS. (1) Chlorine tanks shall be equipped with a nozzle located in the top of the tank. The nozzle shall be fitted with a dome cover plate which shall conform with the standard of The Chlorine Institute, Inc. Dwg. 103–3, dated January 23, 1958. There shall be no other opening in the tank. (2) The openings for liquid level gauging devices, or for safety relief devices may be installed separately at the other location or in the side of the shell. (3) One plugged opening of 2-inch National Pipe Thread or less provided for maintenance purposes may be located elsewhere. (4) Loading and unloading connections may be located in the bottom of the tank.

(d) *Reflective design.* Every uninsulated cargo tank permanently attached to a tank motor vehicle shall, unless it be covered with a jacket made of aluminum, stainless steel, or other bright nontarnishing metal, be painted all over a white, aluminum, or similar reflecting color.

(e) *Insulation for carbon dioxide, chlorine and nitrous oxide cargo tanks.* See § 73.33(p) of this chapter.

**§ 78.336–2 Material.**

(a) *General.* All material used for the construction of the tank and appurtenances shall be suitable for use with the commodity to be transported therein. See also § 73.33(n) of this chapter.

(b) *For chlorine.* All plates for tank, manway nozzle and anchorage of tanks used in the transportation of chlorine must be made of steel complying with requirements of A.S.T.M. Specification A–300–52T titled "Steel Plates for Pressure Vessels for Service at Low Temperatures," Class 1, Grade "A", flange or fire box quality. Impact test specimens made by the plate manufacturers shall be of the Charpy Keyhole notch type and must meet impact requirements (in both longitudinal and transverse directions of rolling) of this specification at a temperature of minus 50° F.

**§ 78.336–3 Thickness of metal.**

(a) Material thickness shall be as required by the Code (see § 78.336–1(a)), except that material of thickness less than 5/16 inch shall not be used for the shell, heads and protective housings or devices, except for chlorine tanks the wall thickness shall be not less than 5/8 inch, including corrosion allowance.

**§ 78.336–4 Joints.**

(a) Joints shall be as required by the Code (see § 78.336–1(a)).

**§ 78.336–5 Bulkheads, baffles and ring stiffeners.**

(a) No applicable provision.

**§ 78.336–6 Closures for manholes.**

(a) No applicable provision.

**§ 78.336–7 Overturn protection.**

(a) See § 78.336–10.

**§ 78.336–8 Outlets.**

(a) See § 78.336–1(c).

**§ 78.336–9 Safety relief devices, valves and connections.**

(a) *Safety relief devices.* See § 73.315 (i) of this chapter.

(b) *Piping, valves and fittings.* See § 73.33(m) of this chapter. For manifolding of cargo tank containers, see § 73.301(f) of this chapter.

(c) *Marking inlets and outlets.* All tank inlets and outlets, except safety relief valves, shall be marked to designate whether they communicate with vapor or liquid when the tank is filled to the maximum permitted filling density.

(d) *Refrigerating and heating coils.* See § 73.33(q) of this chapter.

**§ 78.336–10 Protection of fittings.**

(a) All valves, fittings, accessories, safety relief devices, gauging devices, and the like shall be adequately protected against mechanical damage.

EXCEPTION: On chlorine tanks there shall be a protective housing and cover plate conforming to the Chlorine Institute, Inc., Dwg. 137–1 dated November 7, 1962 to permit the use of standard emergency kits for controlling leaks in fittings on the dome cover plate.

(b) The protective device or housing shall comply with the requirements under which the tanks are fabricated with respect to design and construction, and shall be designed to withstand static loadings in any direction equal to twice the weight of the tank and attachments when filled with the lading using a safety factor of not less than four, based on the ultimate strength of the material to be used.

**§ 78.336–11 Emergency discharge control.**

(a) *Excess-flow valves.* See § 73.33 (o) of this chapter.

(b) *Shut-off valves.* See § 73.33(o) (3) of this chapter.

**§ 78.336–12 Shear section.**

(a) No applicable provision.

**§ 78.336–13 Anchoring of tank.**

(a) *Hold-down devices.* Adequate "hold-down" devices shall be provided which will anchor each cargo tank to the cradle, frame or chassis in a suitable and safe manner that will not introduce undue concentration of stresses. The means of attachment of any cargo tank to the cradle, frame or chassis of a motor vehicle shall be designed to withstand static loadings in any direction equal to twice the weight of the tank and attachments when filled with the lading using a factor of safety of not less than four, based on the ultimate strength of the material to be used. Hold-down devices (on vehicles with frames not made integral with the tank, as by welding) shall incorporate turnbuckles or similar positive devices for drawing the tank down tight on the frame of the motor vehicle.

(b) *Stops and anchors.* Suitable stops or anchors shall be attached to the motor vehicle and the cargo tank to prevent relative movement between them due to stopping, starting and turning. Stops and anchors shall be installed so as to be readily accessible for inspection and maintenance, except that insulation is permitted to cover such stops and anchors.

(c) *Anchoring integral cargo tanks.* Whenever any tank motor vehicle is so designed and constructed that the cargo tank constitutes in whole or in part the stress member used in lieu of a frame, such cargo tanks shall be designed to withstand the stresses thereby imposed in addition to those covered by the Code (see § 78.336–1(a)).

**§ 78.336–14 Gauging devices.**

(a) See § 73.315(h) of this chapter.

**§ 78.336–15 Pumps and compressors.**

(a) See § 73.33(m)(7) of this chapter.

**§ 78.336–16 Method of test.**

(a) Original test at time of manufacture shall be as required by the Code (see § 78.336–1(a)). For retest requirements, see § 73.33(k) of this chapter.

**§ 78.336–17 Marking of cargo tanks.**

(a) *Metal identification plate.* In addition to the markings required by the Code (see § 78.336–1(a)) every cargo tank shall have a metal plate permanently affixed on one of the heads of the tank. This plate shall be permanently affixed by means of soldering, brazing, or welding around its perimeter. Neither the plate itself nor the means of attachment to the tank shall be subject to destructive attack by the contents of the tank. On uninsulated tanks the plate shall be in a place readily accessible for inspection. On insulated tanks an additional identical plate shall be permanently affixed to the jacket readily accessible for inspection. Upon such plate shall be plainly marked by stamping, embossing, or other means of forming letters into or on the metal of the plate itself the following information in characters at least ⅜ inch high:

Manufacturer's Name ------- Serial No. ----
Owner's Serial Number ----------
ICC Specification Number MC 330 ---------
Water capacity (pounds) ----------
Design pressure (psig.) ----------
Original test date ----------
Tank retested at -------- (psig.) on --------

(b) *Additional markings.* In addition to the above markings, cargo tanks must be marked as required by § 77.823 of this chapter.

**§ 78.336–18 Certification.**

(a) A copy of the manufacturer's data report required by the Code (see § 78.336–1(a)) under which the tank is fabricated shall be furnished for each new tank to the owner and the Bureau of Explosives, 63 Vesey Street, New York 7, N.Y. In addition, the manufacturer or owner shall register each tank with the Bureau of Explosives in the following form:

Place ----------
Date ----------

Cargo Tank
Manufactured for ---------- Company
Location ----------
Manufactured by ---------- Company
Location ----------
Consigned to ---------- Company
Location ----------
Size ---- feet outside diameter by ---- long

Marks on tank as prescribed by § 78.336–17 are as follows:

Manufacturer's Name ------- Serial No. ----
Owner's Serial Number ----------
ICC specification ----------
Code symbol ----------
Date of manufacturer ----------
Water capacity (pounds) ----------
Design pressure (psig.) ----------

It is hereby certified that this tank is in complete compliance with the requirements of I.C.C. Specification No. -------

(Signed) ----------
(Manufacturer or owner)

## PART 79—SPECIFICATIONS FOR TANK CARS

**Subpart A—Introduction, Approvals and Reports**

Sec.
79.1 General.
79.2 Definitions and abbreviations.
79.3 Procedure for securing approval.
79.4 Changes in specifications for tank cars.
79.5 Certificate of construction.
79.6 Repairs and alterations.

**Subpart B—General Design Requirements**

79.10 Tank mounting.
79.11 Welding certification.
79.12 Interior heater systems.

**Subpart C—Specifications for Pressure Tank Car Tanks (Classes JCC–105A, 109A–W, 112A–W and 114A–W)**

79.100 General specifications applicable to pressure tank car tanks.
79.101 Individual specification requirements applicable to pressure tank car tanks.
79.102 Special commodity requirements for pressure tank car tanks.
79.103 Special requirements for class 114A • • • tank car tanks.
79.104 Special requirements for class 105-A200–F tank car tanks.

**Subpart D—Specifications for Non-Pressure Tank Car Tanks (Classes ICC–103, 104, 111A–F and 111A–W)**

Sec.
79.200 General specifications applicable to non-pressure tank car tanks.
79.201 Individual specification requirements applicable to non-pressure tank car tanks.
79.202 Special commodity requirements for non-pressure tank car tanks.

**Subpart E—Specifications for Multi-Unit Tank Car Tanks (Classes ICC–106A and 110A–W)**

79.300 General specifications applicable to multi-unit tank car tanks designed to be removed from car structure for filling and emptying.
79.301 Individual specification requirements for multi-unit tank car tanks.
79.302 Special commodity requirements for multi-unit tank car tanks.

**Subpart F—Specifications for Liquefied Hydrogen Tank Car Tanks and Seamless Steel Tanks (Classes ICC–113A–W and 107A)**

79.400 General specifications applicable to liquefied hydrogen tank car tanks.
79.401 Individual specification requirements for liquefied hydrogen tank car tanks.
79.500 Specification ICC–107****, seamless steel tank car tanks.

AUTHORITY: The provisions of this Part 79 issued under 62 Stat. 738, 74 Stat. 808; 18 U.S.C. 834.

### Subpart A—Introduction, Approvals and Reports

**§ 79.1 General.**

(a) The specifications in this part apply to tanks which are to be mounted on or form part of a tank car. Tanks when built shall comply with all applicable requirements of the specifications in effect at the time of construction. Tanks built to earlier specifications may continue in use as prescribed in § 73.31 of this chapter.

**§ 79.2 Definitions and abbreviations.**

(a) The following apply in Part 79:
(1) "AAR" means Association of American Railroads.
(2) "Approved" means approval by the AAR Committee on Tank Cars.
(3) "ASTM" means American Society for Testing and Materials.
(4) "Commission" means Interstate Commerce Commission.
(5) Definitions in Part 73 of this chapter also apply.
(6) "F" means degrees Fahrenheit.
(7) "NGT" means National Gas Taper Threads.
(8) "NPT" means American Standard Taper Pipe Thread.
(9) "psi" means pounds per square inch gauge.
(10) "Tanks" means tank car tanks.

**§ 79.3 Procedure for securing approval.**

(a) Application for approval of designs, materials and construction, conversion or alteration of tank car tanks under these specifications, complete with detailed prints, shall be submitted in prescribed form to the Secretary, Mechanical Division, AAR, for consideration by its Committee on Tank Cars and other appropriate committees. Approvals or

rejections of applications, based on appropriate committee action, shall be issued by said Secretary.

(b) When, in the opinion of the Committee, such tanks or equipment therefor are in compliance with effective regulations and specifications of the Commission, the application will be approved.

(c) When, in the opinion of the Committee, such tanks or equipment therefor are not in compliance with effective regulations and specifications of the Commission, the Committee may recommend service trials to determine the merits of a change in specifications. Such service trials may be authorized by the Commission under the terms of "ICC Special Permits."

**§ 79.4 Changes in specifications for tank cars.**

(a) Proposed changes in or additions to specifications for tanks shall be submitted to the Secretary, Mechanical Division, AAR, for consideration by its Committee on Tank Cars. An application for construction of tanks to any new specification may be submitted with proposed specification. Construction should not be started until the specification has been approved or special permit has been issued. When proposing a new specification, the applicant shall furnish information to justify a new specification. This data should include the properties of the lading and the method of loading and unloading.

(b) The Subcommittee on Specifications of the Committee on Tank Cars shall review the proposed specification at its earliest convenience and report its recommendations to the Committee on Tank Cars for prompt consideration. The Committee on Tank Cars shall report its recommendations through said Secretary to the Commission; such reports may be submitted to the Bureau of Explosives for its recommendation before action by the Commission. Expert opinion thus obtained will be given due consideration by the Commission in determining appropriate action.

**§ 79.5 Certificate of construction.**

(a) Except as provided in paragraph (b) of this section, before a tank car is placed in service, the party assembling the completed car shall furnish to the Bureau of Explosives, to the Secretary, Mechanical Division, AAR, and to the car owner, a Certificate of Construction in prescribed form certifying that the tank, equipment and car complete, comply with all the requirements of the specifications.

(b) Before a tank of Class ICC–106A, 107A or 110A is placed in service, the builder shall furnish to the Bureau of Explosives, to the Secretary, Mechanical Division, AAR, and the owner, a Certificate of Construction in prescribed form certifying that the tank and appurtenances comply with all the requirements of the specifications.

(c) If the owner elects to furnish the appurtenances such as valves and safety devices, the owner shall furnish to the Bureau of Explosives, to the Secretary, Mechanical Division, AAR, a report in prescribed form, certifying that the appurtenances comply with all the requirements of the specifications.

(d) When cars or tanks which are identical in all details are built in groups, one certificate shall suffice for each group.

**§ 79.6 Repairs and alterations.**

(a) For procedure to be followed in making repairs or alterations, see § 73.31 (f) of this chapter.

## Subpart B—General Design Requirements

**§ 79.10 Tank mounting.**

(a) The manner in which tanks are attached to the car structure shall be approved. The use of rivets to secure anchors to tanks prohibited.

**§ 79.11 Welding certification.**

(a) Welding procedures, welders and fabricators shall be approved.

**§ 79.12 Interior heater systems.**

**§ 79.12–1 General.**

(a) Interior heater systems shall be of approved design and materials. If a tank is divided into compartments, a separate system shall be provided for each compartment.

**§ 79.12–2 Materials and dimensions.**

(a) Interior heater systems and plug flanges, if welded to tank or dome, shall be cast, forged or fabricated metal, and be of good weldable quality in conjunction with metal of tank or dome.

(b) Piping shall be not less than 2-inch size. Tubing shall be not less than 2⅜ inch outside diameter. Material specifications and minimum wall thickness are as follows:

| Material | Minimum thickness | Specification |
|---|---|---|
| Carbon steel pipe | Schedule 80 | ASTM A–53. |
| Carbon steel tube | 0.175 inch [1] | ASTM A–83, ASTM A–178. |
| Alloy steel pipe | Schedule 40S. | ASTM A–312. |
| Alloy steel tube | 0.154 inch | ASTM A–269. |
| Aluminum pipe | Schedule 80 | ASTM B–241. |
| Aluminum tube | 0.218 inch | ASTM B–210, ASTM B–235. |
| Nickel pipe | Schedule 40 | ASTM B–161. |
| Nickel tube | 0.154 inch | ASTM B–161. |

[1] Nominal thickness.

(c) Systems may be fabricated of other materials and of other than circular cross section, if approved.

**§ 79.12–3 Joints and fittings.**

(a) Welded butt joints are preferable. Bolted joints with flange welded to piping may be used if welding is not feasible or to facilitate tank cleaning or application of linings. Return bends shall be forged or made by bending the pipe. Cast, forged or fabricated manifolds of approved design may be used.

(b) Inlets and outlets of heater systems shall be equipped with valve cock, cap or plug. Caps and plugs shall be secured by chain.

**§ 79.12–4 Application to tank.**

(a) Interior heater systems shall be so constructed that the breaking off of their external connections will not cause leakage of contents of tank.

(b) Inlets and outlets may be located in any portion of dome, shell, heads, or steam jacketed outlet provided proper drainage of heater system is accomplished.

(c) If ends of coils are not attached to a manifold or steam jacketed outlet, they shall be attached to pads or reinforcements. Such reinforcements must be attached to tank in compliance with the requirements of the tank specification.

(1) Outside pipe connections to steam coils shall not be an integral part of the interior coils and shall be screwed or welded, or both, into outside of pads or reinforcements.

(d) All piping shall be secured so as to permit necessary expansion and contraction.

**§ 79.12–5 Tests.**

(a) Each interior heater system shall be hydrostatically tested at not less than 200 psi and shall hold the pressure for 10 minutes without leakage or evidence of distress.

**§ 79.12–6 Reports.**

(a) The Certificate of Construction for the completed car shall indicate installation of interior heater system and date of initial hydrostatic test.

**§ 79.12–7 Stenciling.**

(a) To indicate that tank is equipped with interior heater system, the tank, or the jacket if tank is insulated, shall be stenciled in compliance with the applicable requirements of AAR Specifications for Tank Cars, Appendix C.

## Subpart C—Specifications for Pressure Tank Car Tanks (Classes ICC–105A, 109A–W, 112A–W and 114A–W)

**§ 79.100 General specifications applicable to pressure tank car tanks.**

**§ 79.100–1 Tanks built under these specifications shall comply with the requirements of §§ 79.100, 79.101, and when applicable, §§ 79.102, 79.103, and 79.104.**

**§ 79.100–2 Approval.**

(a) For procedure for securing approval see § 79.3.

**§ 79.100–3 Type.**

(a) Tanks built under this specification shall be fusion-welded with heads designed convex outward. Except as provided in § 79.103 or 79.104 they shall be circular in cross section, shall be provided with a manway nozzle on top of the tank of sufficient size to permit access to the interior, a manway cover to provide for the mounting of all valves, measuring and sampling devices, and a protective housing. Other openings in the tank are prohibited, except as provided in Part 73 of this chapter, §§79.100–14, 79.101–1 Note 10, or § 79.103.

**§ 79.100–4 Insulation.**

(a) If insulation is applied, the tank shell and manway nozzle shall be insulated with an approved material. The entire insulation shall be covered with a metal jacket not less than ⅛ inch in thickness and flashed around all openings so as to be weather tight. The exterior surface of a carbon steel tank and the inside surface of a carbon steel jacket shall be given a protective coating except that protective coating is not required when foam-in-place insulation that adheres to the tank and jacket is applied.

(b) If insulation is a specification requirement, it shall be of sufficient thickness so that the thermal conductance at 60° F is not more than 0.075 Btu per hour, per square foot, per degree F temperature differential. If exterior heaters are attached to tank, the thickness of the insulation over each heater element may be reduced to one-half that required for the shell.

**§ 79.100–5 Bursting pressure.**

(a) The minimum required bursting pressure is listed in § 79.101.

**§ 79.100–6 Thickness of plates.**

(a) The wall thickness of the tank shell and heads shall not be less than that specified in § 79.101, nor that calculated by the following formula:

$$t = \frac{Pd}{2SE}$$

where:

$d$ = inside diameter in inches;
$E$ = 0.9 welded joint efficiency; except $E$ = 1.0 for seamless aluminum alloy heads;
$P$ = minimum required bursting pressure in psi;
$S$ = minimum strength of plate material in psi, as prescribed in § 79.100–7;
$t$ = minimum design thickness of plate in inches.

(b) If plates are clad with material having tensile strength properties at least equal to the base plate, the cladding may be considered a part of the base plate when determining thickness. If cladding material does not have tensile strength at least equal to the base plate, the base plate alone shall meet the thickness requirement.

(c) When aluminum plate is used, the minimum width of bottom sheet of tank shall be 60 inches, measured on the arc, but in all cases the width shall be sufficient to bring the entire width of the longitudinal welded joint, including welds, above the bolster.

**§ 79.100–7 Material.**

(a) Carbon steel plate material used to fabricate tank shell and manway nozzle shall be open hearth boiler plate of flange or firebox quality having a carbon content not exceeding 0.31 percent and complying with one of the following ASTM specifications for the material and with the indicated minimum tensile strength and elongation in the welded condition.

| Specifications | Minimum tensile strength (psi) welded condition | Minimum elongation in 2 inches (percent) welded condition |
|---|---|---|
| ASTM A 201 Gr. A | 55,000 | 28 |
| ASTM A 201 Gr. B | 60,000 | 25 |
| ASTM A 212 Gr. A | 65,000 | 20 |
| ASTM A 212 Gr. B | 70,000 | 20 |
| ASTM A 285 Gr. A | 45,000 | 29 |
| ASTM A 285 Gr. B | 50,000 | 20 |
| ASTM A 285 Gr. C | 55,000 | 20 |
| ASTM A 302 Gr. B | 80,000 | 20 |

(1) These plates may be clad with other approved metals.

(2) High tensile strength carbon-silicon steel plates to an approved specification having a minimum elongation of 21 percent in 2 inches may also be used.

(b) Aluminum alloy plate material used to fabricate tank shell and manway nozzle shall be suitable for fusion welding and shall comply with one of the following ASTM specifications for the material and with the indicated minimum tensile strength and elongation in the welded condition:

| Specifications | Minimum tensile strength 0 temper (psi) welded condition | Minimum elongation in 2 inches 0 temper (percent) welded condition |
|---|---|---|
| ASTM B 209 Alloy 1060 | 9,500 | 25 |
| ASTM B 209 Alloy 1100 | 11,000 | 28 |
| ASTM B 209 Alloy 3003 | 14,000 | 23 |
| ASTM B 209 Alloy 5052 | 25,000 | 18 |
| ASTM B 209 Alloy 5083 [1] | 40,000 | 16 |
| ASTM B 209 Alloy 5086 | 35,000 | 14 |
| ASTM B 209 Alloy 5154 | 30,000 | 18 |
| ASTM B 209 Alloy 5254 | 30,000 | 18 |
| ASTM B 209 Alloy 5454 | 31,000 | 18 |
| ASTM B 209 Alloy 5652 | 25,000 | 18 |
| ASTM B 209 Alloy 6061 | [1] 24,000 | [1] 5 |

[1] Not 0 temper.
[2] Only 0 or H113 temper permitted.

(c) All attachments welded to tank shell shall be of approved material which is suitable for welding to the tank.

**§ 79.100–8 Tank heads.**

(a) The tank head shape shall be an ellipsoid of revolution in which the major axis shall equal the diameter of the shell adjacent to the head and the minor axis shall be one-half the major axis.

**§ 79.100–9 Welding.**

(a) All joints shall be fusion-welded in compliance with the requirements of AAR Specifications for Tank Cars, Appendix W. Welding procedures, welders and fabricators shall be approved. Also see § 79.104.

**§ 79.100–10 Stress relieving.**

(a) After welding is complete, steel tanks and all attachments welded thereto, shall be stress relieved as a unit in compliance with the requirements of AAR Specifications for Tank Cars, Appendix W.

(b) For aluminum tanks, stress relieving is prohibited.

**§ 79.100–11 Tank mounting.**

(a) See §§ 79.10 and 79.104–3.

**§ 79.100–12 Manway nozzle, cover and protective housing.**

(a) Manway nozzles shall be of approved design of forged or rolled steel for steel tanks or fabricated aluminum alloy for aluminum tanks, with access opening at least 18 inches inside diameter, or at least 14 inches by 18 inches obround or oval. Nozzle shall be welded to the tank and the opening reinforced in an approved manner in compliance with the requirements of AAR Specifications for Tank Cars, Appendix C, Figure 10.

(b) Manway cover shall be machined to approved dimensions and be of forged or rolled carbon or alloy steel, rolled aluminum alloy or nickel when required by the lading. Minimum thickness is listed in § 79.101. Manway cover shall be attached to manway nozzle by through or stud bolts not entering tank, except as provided in § 79.103–2 (a).

(c) Except as provided in § 79.103, protective housing of cast, forged or fabricated approved materials shall be bolted to manway cover. The shearing value of the bolts attaching protective housing to manway cover shall not exceed 70 percent of the shearing value of bolts attaching manway cover to manway nozzle. Housing shall be equipped with a suitable metal cover that can be securely closed. Housing cover shall have suitable stop to prevent cover striking loading or unloading connections and be hinged on one side only with approved riveted pin or rod with nuts and cotters. Openings in wall of housing shall be equipped with screw plugs or other closures.

**§ 79.100–13 Venting, loading and unloading valves, measuring and sampling devices.**

(a) Venting, loading and unloading valves shall be of approved design, made of metal not subject to rapid deterioration by the lading, and shall withstand the tank test pressure without leakage. The valves shall be directly bolted to seatings on manway cover, except as provided in § 79.103. Valve outlets shall be closed with approved screw plugs or other closures fastened to prevent misplacement.

(b) The interior pipes of the loading and unloading valves shall be anchored and, except as prescribed in § 79.102, or 79.103, may be equipped with excess flow valves of approved design.

(c) Gaging device, sampling valve and thermometer well are not specification requirements. When used, they shall be of approved design, made of metal not subject to rapid deterioration by the lading, and shall withstand the tank test pressure without leakage. Interior pipes of the gaging device and sampling valve, except as prescribed in § 79.102, or 79.103, may be equipped with excess flow valves of approved design. Interior pipe of the thermometer well shall be anchored in an approved manner to prevent breakage due to vibration. The thermometer well shall be closed by an approved valve attached close to the manway cover, or other approved location, and closed by a screw plug. Other approved arrangements that permit testing thermometer wel. for leaks without complete removal of the closure may be used.

(d) An excess flow valve as referred to in this specification, is a device which closes automatically against the outward flow of the contents of the tank such as may be encountered in case the external closure valve is broken off or removed during transit. Excess flow valves may be designed with a by-pass to allow the equalization of pressures.

**§ 79.100–14 Bottom outlets.**

(a) Bottom outlets for discharge of lading is prohibited, except as provided in § 79.103–3. If indicated in § 79.101, tank may be equipped with a bottom washout of approved construction. If applied, bottom washout shall be in ac-

cordance with the following requirements:

(1) The extreme projection of the bottom washout shall be at least 12 inches above top of rail.

(2) Bottom washout shall be of cast, forged or fabricated metal and shall be fusion-welded to the tank. It shall be of good weldable quality in conjunction with metal of tank.

(3) If bottom washout nozzle extends 6 inches or more from shell of tank, a "V" groove shall be cut (not cast) in the upper part of the nozzle at a point immediately below the lowest part of inside closure seat or plug to a depth that will leave wall thickness of nozzle at the root of the "V" not over ⅜ inch. Where nozzle is not a single piece, provision shall be made for the equivalent of the breakage groove. The nozzle shall be of a thickness to insure that accidental breakage will occur at or below the "V" groove or its equivalent.

(4) The closure plug and seat shall be readily accessible or removable for repairs.

(5) Joints between closures and their seats may be gasketed with suitable material.

**§ 79.100–15 Safety relief valves.**

(a) The tank shall be equipped with one or more safety relief valves of approved design, made of metal not subject to rapid deterioration by the lading. The safety relief valve, or valves, shall be mounted on manway cover, except as provided in § 79.103. The total valve discharge capacity shall be sufficient to prevent building up pressure to tank in excess of 82½ percent of the tank test pressure. The start-to-discharge and vapor-tight pressures shall comply with § 79.101 and shall not be affected by any auxiliary closure or other combination. For certain commodities, alternate pressures are permitted (see § 79.102–11). See AAR Specifications for Tank Cars, Appendix A, for formula for calculating discharge capacity.

(b) When a safety relief valve is used in combination with a breaking pin device, the breaking pin device shall be designed to fail at a pressure of 75 percent of the tank test pressure and safety relief valve shall be set for a start-to-discharge pressure of 71 percent of the tank test pressure.

(c) When a safety relief valve is used in combination with a frangible disc, the frangible disc shall be designed to burst at a pressure of 75 percent of the tank test pressure and the safety relief valve shall be set for a start-to-discharge pressure of 71 percent of the tank test pressure. Provision shall be made to prevent any accumulation of pressure between the frangible disc and safety relief valve.

**§ 79.100–16 Attachments not otherwise specified.**

(a) Attachments not otherwise specified shall be applied by approved means.

**§ 79.100–17 Closures for openings.**

(a) Closures shall be of approved design and made of metal not subject to rapid deterioration by the lading. Plugs, if used, shall be solid, with NPT threads, and shall be of a length which will screw at least six threads inside the face of fitting or tank.

**§ 79.100–18 Tests of tanks.**

(a) Each tank shall be tested by completely filling tank and manway nozzle with water or other liquid having similar viscosity, at a temperature which shall not exceed 100 F during the test; and applying the pressure prescribed in § 79.101. The tank shall hold the prescribed pressure for at least 10 minutes without leakage or evidence of distress.

(b) Insulated tanks shall be tested before insulation is applied.

(c) Calking of welded joints to stop leaks developed during the foregoing test is prohibited. Repairs in welded joints shall be made as prescribed in AAR specifications for Tank Cars, Appendix W.

(d) Testing of exterior heaters is not a specification requirement.

**§ 79.100–19 Tests of safety relief valves.**

(a) Each valve shall be tested by air or gas for compliance with § 79.101 before being put into service.

**§ 79.100–20 Stamping.**

(a) To certify that the tank complies with all specification requirements, each tank shall be plainly and permanently stamped in letters and figures at least ⅜ inch high into the metal near the center of both outside heads as follows:

| | *Example of required stamping* |
|---|---|
| Specification | ICC–105A100–W |
| Material | ASTM A212 B |
| Cladding material (if any) | ASTM A240–304 Clad |
| Tank builder's initials | ABC |
| Date of original test | 00–0000 |
| Car assembler (if other than tank builder) | DEF |
| Water capacity | 00000 lbs. |

**§ 79.100–21 Stenciling.**

(a) The tank or the jacket if tank is insulated, shall be stenciled in compliance with the requirements of AAR Specifications for Tank Cars, Appendix C.

**§ 79.100–22 Certificate of construction.**

(a) See § 79.5.

**§ 79.101 Individual specification requirements applicable to pressure tank car tanks.**

**§ 79.101–1 Individual specification requirements.**

(a) In addition to § 79.100 the individual specification requirements are as follows:

| ICC specifications | 105A100W | 105A200F | 105A200W | 105A300W | 105A400W | 105A500W | 105A600W | 105A100ALW | 105A200ALW | 105A300ALW |

[1] When steel of 65,000 to 81,000 p.s.i. minimum tensile strength is used, the thickness of plates shall not be less than 5/8 inch, and when steel of 81,000 p.s.i. minimum tensile strength is used, the minimum thickness of plate shall be not less than 9/16 inch.

[2] When approved material other than aluminum alloys are used, the thickness p.s.i. shall not be less than 2¼ inches.

[3] When steel of 65,000 p.s.i. minimum tensile strength is used, minimum thickness of plates shall not be less than ½ inch.

[4] At least the upper two-thirds of the exterior of the tank, manway nozzle and all appurtenances in contact with this area of the tank shall have a finish coat of light-reflective paint.

[5] For inside diameter of 87 inches or less, the thickness of plates shall not be less than one-half inch.

[6] See 79.102 for optional setting for certain commodities.

[7] See 79.103–1(c).

[8] See 79.103–3 for optional bottom loading and unloading.

[9] When the use of nickel is required by the lading, the thickness shall not be less than 2 inches.

[10] Each tank head of class 112A tank car tanks may be equipped with not more than one opening for use in purging tank interior.

[11] Tanks converted from existing forge-welded specification 105A500 tanks by modification using conversion details complying with ICC–112A specification requirements, shall be stenciled by substituting the letter "F" for the letter "W" in the specification designation.

**§ 79.102 Special commodity requirements for pressure tank car tanks.**

(a) In addition to §§ 79.100 and 79.101 the following requirements are applicable:

**§ 79.102–1 Liquefied carbon dioxide.**

(a) Spec. 105A500–W or 105A600–W tank cars used to transport Liquefied carbon dioxide shall comply with the following special requirements:

(1) All plates for tank, manway nozzle and anchorage, shall be made of steel complying with a specification approved for service at low temperatures.

(2) Tank shall be insulated with an approved material of sufficient thickness so that the thermal conductance at 60 F is not more than 0.03 Btu per hour per square foot per degree F temperature differential; except that in order to permit an anchorage which shall not exceed seven inches from top of center sills to bottom of tank, the insulation thickness directly over the sills may be reduced to give thermal conductance not exceeding 0.04 Btu per hour per square foot per degree F temperature differential.

(3) Tank shall be equipped with one safety relief valve set for the start-to-discharge pressure listed in § 79.101, and one safety vent of approved design, set to function at a pressure less than the tank test pressure, and not less than 75 percent of tank test pressure. The discharge capacity of each of these safety relief devices shall be sufficient to prevent building up pressure in tank in excess of 82½ percent of the tank test pressure.

(4) Tank shall be equipped with two pressure-regulating valves of approved design, set to open at a pressure not exceeding 350 psi on spec. 105A500–W tanks or 400 psi on spec. 105A600–W tanks.

(5) Each regulating valve and safety relief device shall have its final discharge piped to the outside of the protective housing.

**§ 79.102–2 Chlorine.**

(a) Spec. 105A300–W or 105A500–W tank cars used to transport chlorine shall comply with the following special requirements:

(1) The quantity of chlorine loaded into a single-unit tank car shall not exceed 90,000 pounds, except that not more than 110,000 pounds nor less than 107,800 pounds of chlorine may be loaded in such cars if insulated with 4 inches of corkboard and constructed, maintained, and retested in compliance with spec. 105A500–W. Cars may be registered and jackets stenciled either 105A300–W or 105A500–W and equipped with the safety relief valve required by the specification to which registered.

(2) The interior pipes of liquid discharge valves shall be equipped with excess flow valves of approved design.

**§ 79.102–3 Liquefied flammable gases.**

(a) Spec. 105A100–W, 105A200–F, 105A200–W, 105A300–W, 105A400–W, 105A500–W, 105A600–W, 105A100–ALW, 105A200–ALW, 105A300–ALW, 112A200–W, 112A340–W, 112A400–W or 112A500–W tank cars used to transport liquefied flammable gases shall comply with the following special requirements:

(1) The interior pipes of the loading and unloading valves, gaging device and sampling valve shall be equipped with excess flow valves of an approved design.

(2) The protective housing cover shall be equipped with an approved weatherproof cover over an opening having an unrestricted area at least equal to the total safety relief valve discharge area.

**§ 79.102–4 Vinyl fluoride, inhibited.**

(a) Spec. 105A600–W tank cars used to transport vinyl fluoride, inhibited, shall comply with the following special requirements:

(1) Tank shall be insulated with an approved material of sufficient thickness so that the thermal conductance at 60 F is not more than 0.03 Btu per hour per square foot per degree F temperature differential; except that in order to permit an anchorage which shall not exceed seven inches from top of center sills to bottom of tank, the insulation thickness directly over the sills may be reduced to give thermal conductance not exceeding 0.04 Btu per hour per square foot per degree F temperature differential.

(2) Tank shall be equipped with one safety relief valve, set for the start-to-discharge pressure listed in § 79.101, and one safety vent of approved design, set to function at a pressure less than the tank test pressure, and not less than 75 percent of the tank test pressure. The discharge capacity of each of these safety relief devices shall be sufficient to prevent building up pressure in tank in excess of 82½ percent the tank test pressure.

(3) Each regulating valve and safety relief device shall have its final discharge piped to the outside of the protective housing.

**§ 79.102–5 Nitrosyl chloride.**

(a) Spec. 105A300–W tank cars used to transport Nitrosyl chloride shall comply with the following special requirements:

(1) Tanks shall be made of or clad with a metal not subject to rapid deterioration by the lading; all appurtenances such as manway covers, venting, loading and unloading valves, safety relief valves, excess flow valves, and eduction pipes, shall be made of metal not subject to rapid deterioration by the lading; cork shall be used as an insulating material.

**§ 79.102–6 Vinyl chloride or Vinyl methyl ether, inhibited.**

(a) Spec. 105A200–W 112A400–W tank cars, used to transport Vinyl chloride, and spec. 105A100–W or 105A300–W tank cars used to transport Vinyl methyl ether, inhibited, shall comply with the following special requirements:

(1) All parts of valves and safety relief devices in contact with the lading shall be of a metal or other material suit-

fittings and safety relief devices, and marking, loading, handling, inspection and testing practices, shall be filed with

(c) Manway and cover may be located other than at the top of the tank.

(d) Valves and fittings need not be

**Subpart D—Specifications for Non-Pressure Tank Car Tanks (Classes**

$t$ = minimum design thickness of plate in inches.

(b) The

|---|---|---|

square foot per degree F temperature differential; except that in order to permit an anchorage which shall not exceed seven inches from top of center sill to bottom of tank, the insulation thickness directly over the sills may be reduced to give thermal conductance not exceeding 0.04 Btu per hour per square foot per degree F temperature differential.

(2) Tank shall be equipped with one safety relief valve, set for the start-to-discharge pressure listed in § 79.101, and one safety vent of approved design, set to function at a pressure less than the tank test pressure, and not less than 75 percent of the tank test pressure. The discharge capacity of each of these safety relief devices shall be sufficient to prevent building up pressure in tank in excess of 82½ percent

(1) All parts of valves and safety relief devices in contact with the lading shall be of a metal or other material suitably treated, if necessary, which will not cause formation of any acetylides.

(2) The interior pipes of the loading and unloading valves, gaging device and sampling valve shall be equipped with excess flow valves of an approved design.

(3) For Vinyl chloride in spec. 105A-200–W tank cars, openings in tank heads to facilitate nickel lining are authorized if closed in an approved manner.

**§ 79.102–7 Bromine.**

(a) Spec. 105A300–W tank cars used to transport Bromine shall comply with the following special requirements:

(1) The tank shall be nickel clad at least 20 percent or shall be lined with lead at least 5/16 inch thick; openings in tank heads to facilitate application of lead lining are authorized if closed in an approved manner; all closures and appurtenances in contact with the lading shall be lead lined or shall be made of metal not subject to rapid deterioration by the lading; all interior welds in nickel clad tanks shall be protected by pure nickel butt straps to eliminate iron contamination. Except as otherwise provided herein, the water weight capacity of the tank shall not exceed 20,400 pounds. When tanks are equipped with manway cover plates, safety relief valves, venting, loading and unloading valves in accordance with spec. 105A300–W, and tank jackets are stenciled spec. 105A300–W, but in all other respects are constructed and maintained in full compliance with spec. 105A500–W, the water weight capacity of the tank shall not exceed 37,400 pounds.

**§ 79.102–8 Motor fuel anti-knock compound.**

(a) Spec. 105A300–W tank cars used to transport Motor fuel anti-knock compounds shall comply with the following special requirements:

(1) Jacket shall be stenciled on both sides "MOTOR FUEL ANTI-KNOCK COMPOUND ONLY." Openings in tank heads to facilitate application of nickel lining are authorized if closed in an approved manner.

**§ 79.102–9 Nitrogen tetroxide or Nitrogen tetroxide-nitric oxide mixtures.**

(a) Specs. 105A500–W and 105A600–W tank cars used to transport Nitrogen tetroxide or Nitrogen tetroxide-nitric oxide mixtures shall comply with the following special requirements:

(1) Tanks shall be insulated with not less than four inches of corkboard. All valves and fittings shall be protected by the securely attached cover made of metal not subject to rapid deterioration by the lading, and all valve openings, except the safety relief valves, shall be fitted with screw plugs or caps to prevent leakage in the event of valve failure. Safety relief valve shall be equipped with an approved stainless steel or platinum frangible disc. Jacket shall be stenciled on both sides in letters not less than 2 inches high "NITROGEN TETROXIDE ONLY" or "NITROGEN TETROXIDE-NITRIC OXIDE MIXTURES ONLY," as applicable. Written procedure covering details of tank car appurtenances, manway fittings and safety relief devices, and marking, loading, handling, inspection and testing practices, shall be filed with and approved by the Bureau of Explosives before any tank car is offered for transportation of these commodities.

**§ 79.102–10 Hydrocyanic acid.**

(a) Spec. 105A500–W or 105A600–W tank cars used to transport Hydrocyanic acid shall comply with the following special requirements:

(1) Cars shall be registered and the jacket stenciled spec. 105A300–W and be equipped with the safety relief valves required by that specification. Tanks shall be insulated with not less than 4 inches of corkboard. Jacket shall be stenciled on both sides in letters not less than 2 inches high "HYDROCYANIC ACID ONLY." Written procedure covering details of tank car appurtenances, manway fittings and safety relief devices, and marking, loading, handling, inspection and testing practices, shall be filed with and approved by the Bureau of Explosives before any tank car is offered for transportation of hydrocyanic acid.

**§ 79.102–11 Liquefied petroleum gas or Anhydrous ammonia.**

(a) Spec. 105A300–W, 112A340–W, 112A400–W or 114A340–W tank cars used to transport Liquefied petroleum gas or Anhydrous ammonia, may as an alternate comply with the following special requirements:

(1) Safety relief valves may be set to the following pressures, provided the total valve discharge capacity is sufficient to prevent building up pressure in the tank in excess of 90 percent of the tank test pressure.

| ICC specifications | 105A300–W | 112A340–W | 112A400–W | 114A340–W |
|---|---|---|---|---|
| Safety relief valves, psi: | | | | |
| Start-to-discharge pressure | 247.5 | 280.5 | 330 | 280.5 |
| Start-to-discharge tolerance | ±7.4 | ±8.4 | ±10 | ±8.4 |
| Vapor tight pressure (minimum) | 196 | 224 | 264 | 224 |

**§ 79.103 Special requirements for class 114A * * * tank car tanks.**

(a) In addition to the applicable requirements of §§ 79.100 and 79.101 the following requirements shall be complied with:

**§ 79.103–1 Type.**

(a) Tanks built under this section may be of any approved cross section.

(b) Any portion of the tank shell not circular in cross section shall have walls of such thickness and be so reinforced that the stresses in the walls caused by a given internal pressure are no greater than the circumferential stresses which would exist under the same internal pressure in the wall of a tank of circular cross section designed in accordance with paragraphs § 79.100–6 (a) and (b), but in no case shall the wall thickness be less than that specified in § 79.101.

(c) Manway and cover may be located other than at the top of the tank.

(d) Valves and fittings need not be mounted on the manway cover.

(e) One opening may be provided in each head for use in purging the tank interior.

**§ 79.103–2 Manway cover.**

(a) Manway cover may be of the internal self-energizing type and shall be of approved design.

(b) If no valves or measuring and sampling devices are mounted on manway cover, no protective housing is required.

**§ 79.103–3 Venting, loading and unloading valves, measuring and sampling devices.**

(a) Venting, loading and unloading valves, measuring and sampling devices, when used, shall be attached to a nozzle or nozzles on the tank shell or heads.

(b) These valves and appurtenances shall be grouped in one location, shall be provided with a protective cover or housing with cover or may be recessed into the tank shell. A duplicate set grouped in another location may be provided.

(c) The interior pipes of the loading, unloading, and sampling valves shall be equipped with excess flow valves of approved design, except when quick closing internal valves of approved design are used. When the interior pipe of the gaging device provides a means for the passage of lading from the interior to the exterior of the tank, it shall be equipped with an excess flow valve of approved design or with an orifice not exceeding a No. 54 drill size.

**§ 79.103–4 Safety relief valves.**

(a) Safety relief valve or valves shall be located on top of tank near the center of the car on a nozzle, mounting plate or recess in the shell. Through or stud bolts, if used, shall not enter the tank.

(b) Metal guard of approved design shall be provided to protect safety relief valve or valves from damage.

**§ 79.104 Special requirements for spec. 105A200–F tank car tanks.**

**§ 79.104–1 Tanks built under these specifications shall meet the requirements of §§ 79.100, 79.101, 79.102 and 79.104.**

**§ 79.104–2 Type.**

(a) Tanks built under this specification shall be fabricated by conversion from existing forge-welded steel tanks complying with specs. 105A300, 105A400, 105A500 or 105A600.

**§ 79.104–3 Tank mounting.**

(a) The use of rivets as a means of attaching anchor to tank is permitted.

**§ 79.104–4 Welding.**

(a) All joints shall be lap welded by the water gas process, hammered or rolled or other lap welded, hammered or rolled process which investigation and laboratory tests by the Mechanical Division of the AAR have proved will produce satisfactory results.

## Subpart D—Specifications for Non-Pressure Tank Car Tanks (Classes ICC–103, 104, 111A–F and 111A–W)

**§ 79.200 General specifications applicable to non-pressure tank car tanks.**

**§ 79.200–1 Tank built under these specifications shall meet the requirements of §§ 79.200, 79.201 and 79.202.**

**§ 79.200–2 Approval.**

(a) For procedure for securing approval, see § 79.3.

**§ 79.200–3 Type.**

(a) Tanks built under this specification shall be cylindrical, with heads designed convex outward. When specified in § 79.201–1 tank shall have at least one manway or one expansion dome with manway, and such other external projections as are prescribed herein. When the tank is divided into compartments, each compartment shall be treated as a separate tank.

**§ 79.200–4 Insulation.**

(a) If insulation is applied, the tank shell and expansion dome when used shall be insulated with an approved material. The entire insulation shall be covered with a metal jacket not less than 1/8 inch in thickness and flashed around all openings so as to be weather tight. The exterior surface of a carbon steel tank and the inside surface of a carbon steel jacket shall be given a protective coating, except that protective coating is not required when foam-in-place insulation that adheres to the tank and jacket is applied.

(b) If insulation is a specification requirement, it shall be of sufficient thickness so that the thermal conductance at 60 F is not more than 0.225 Btu per hour, per square foot, per degree F temperature differential, unless otherwise provided in § 79.201–1. If exterior heaters are attached to tank, the thickness of the insulation over each heater element may be reduced to one-half that required for the shell.

**§ 79.200–5 Bursting pressure.**

(a) The minimum required bursting pressure is listed in § 79.201–1.

**§ 79.200–6 Thickness of plates.**

(a) The wall thickness of the tank shell, dome shell, and of 2:1 ellipsoidal heads shall not be less than specified in § 79.201–1, nor that calculated by the following formula:

$$t = \frac{Pd}{2SE}$$

where:

$d$ = inside diameter in inches;
$E$ = 0.9 welded joint efficiency; except $E$ = 1.0 for seamless aluminum alloy heads and seamless heads of Class ICC–111A tanks;
$P$ = minimum required bursting pressure in psi;
$S$ = minimum tensile strength of plate material in psi as prescribed in § 79.200–7;
$t$ = minimum design thickness of plate in inches.

(b) The thickness of a dished head shall not be less than specified in § 79.201–1, nor that calculated by the following formula:

$$t = \frac{5PL}{6SE}$$

where:

$E$ = 0.9 welded joint efficiency; except $E$ = 1.0 when head is formed from one piece;
$L$ = main inside radius to which head is dished, measured on concave side in inches;
$P$ = minimum required bursting pressure in psi;
$S$ = minimum tensile strength of plate material in psi as prescribed in § 79.200–7;
$t$ = minimum thickness of plate in inches.

(c) If plates are clad with material having tensile strength properties at least equal to the base plate, the cladding may be considered a part of the base plate when determining thickness. If cladding material does not have tensile strength at least equal to the base plate, the base plate alone shall meet the thickness requirements.

(d) For tanks constructed of longitudinal sections, the minimum width of bottom shcet of tank shall be 60 inches, measured on the arc, but in all cases the width shall be sufficient to bring the entire width of the longitudinal welded joint, including welds, above the bolster.

(e) For tanks built of one piece cylindrical sections, the thickness specified for bottom sheet shall apply to the entire cylindrical section.

(f) See § 79.200–9 for thickness requirements for compartment tanks.

**§ 79.200–7 Material.**

(a) Carbon steel plate material used to fabricate tank and expansion dome, when used, shall be open hearth boiler plate of flange or firebox quality having a carbon content not exceeding 0.31 percent and complying with one of the following ASTM specifications for the material and with the indicated minimum tensile strength and elongation in the welded condition:

| Specifications | Minimum tensile strength (psi) welded condition | Minimum elongation in 2 inches (percent) welded condition |
|---|---|---|
| ASTM A201 Gr. A | 55,000 | 28 |
| ASTM A201 Gr. B | 60,000 | 25 |
| ASTM A212 Gr. A | 65,000 | 20 |
| ASTM A212 Gr. B | 70,000 | 20 |
| ASTM A285 Gr. A | 45,000 | 29 |
| ASTM A285 Gr. B | 50,000 | 20 |
| ASTM A285 Gr. C | 55,000 | 20 |

(1) These plates may be clad with other approved metals.

(b) Aluminum alloy plate material used to fabricate tank and expansion dome, when used, shall be suitable for fusion welding, and shall comply with one of the following ASTM specifications for the material and with the indicated minimum tensile strength and elongation for the welded condition:

| Specifications | Minimum tensile strength (psi) welded condition | Minimum elongation in 2 inches (percent) welded condition |
|---|---|---|
| ASTM B209 Alloy 1060 | 9,500 | 25 |
| ASTM B209 Alloy 1100 | 11,000 | 28 |
| ASTM B209 Alloy 3003 | 14,000 | 23 |
| ASTM B209 Alloy 5052 | 25,000 | 18 |
| ASTM B209 Alloy 5083 [2] | 40,000 | 16 |
| ASTM B209 Alloy 5086 | 35,000 | 14 |
| ASTM B209 Alloy 5154 | 30,000 | 18 |
| ASTM B209 Alloy 5254 | 30,000 | 18 |
| ASTM B209 Alloy 5454 | 31,000 | 18 |
| ASTM B209 Alloy 5652 | 25,000 | 18 |
| ASTM B209 Alloy 6061 | [1] 24,000 | [1] 5 |

[1] Not 0 temper.
[2] Only 0 temper or H-113 permitted.

(c) Alloy steel plate material used to fabricate tank and expansion dome, when used, shall be capable of resisting the action of nitric acid so that the maximum corrosion rate in inches penetration per month shall be 0.006 for the straight chromium-bearing stainless steel and 0.0015 for any of the chromium-nickel alloys when tested by the procedure in ASTM Specification A–262 titled Recommended Practice Boiling Nitric Acid Test for Corrosion-Resisting Steels.

(1) Alloy steel plate material used to fabricate tank and expansion dome, when used, shall comply with one of the following ASTM specifications for the material and with the indicated minimum tensile strength and elongation for the welded condition:

| Specifications | Type | Minimum tensile strength (psi) welded condition | Minimum elongation in 2 inches (percent) welded condition |
|---|---|---|---|
| ASTM A–240 | 304 | 75,000 | 30 |
| ASTM A–240 | 304L | 70,000 | 30 |
| ASTM A–240 | 316 | 75,000 | 30 |
| ASTM A–240 | 316L | 70,000 | 30 |
| ASTM A–240 | 321 | 75,000 | 30 |
| ASTM A–240 | 347 | 75,000 | 30 |
| ASTM A–240 | 405 | 60,000 | 20 |
| ASTM A–240 | 410 | 65,000 | 20 |
| ASTM A–240 | 430A | 65,000 | 22 |

(d) Nickel plate material used to fabricate tank and expansion dome shall comply with the following ASTM Specification for the material and with the indicated minimum tensile strength and elongation for the welded condition:

| Specifications | Minimum tensile strength (psi) welded condition | Minimum elongation in 2 inches (percent) welded condition |
|---|---|---|
| ASTM B–162 | 40,000 | 20 |

(e) All parts and items of construction in contact with the lading shall be made of material compatible with plate material and not subject to rapid deterioration by the lading, or be coated or lined with suitable corrosion resistant material.

(f) All external projections which may be in contact with the lading and all castings, forgings or fabrications used

for fittings or attachments to tank and expansion dome, when used, in contact with lading shall be made of material to an approved specification. Use of cast iron is prohibited for Class ICC–111A cars.

**§ 79.200–8 Tank heads.**

(a) Tank heads shall be of approved contour, and may be dished or ellipsoidal for pressure on concave side.

(b) Dished heads shall have main inside radius not exceeding 10 feet and inside knuckle radius shall not be less than 3¾ inches for steel, alloy steel, or nickel tanks nor less than 5 inches for aluminum alloy tanks except the knuckle radius for interior heads of compartment tanks of steel, alloy steel, or nickel shall not be less than 1½ inches.

(c) Ellipsoidal tank heads for aluminum alloy tanks and for Class ICC–111A tanks shall be an ellipsoid of revolution in which the major axis shall equal the diameter of the shell and the minor axis shall be one-half the major axis.

**§ 79.200–9 Compartment tanks.**

(a) When tank is divided into compartments, by inserting interior heads, interior heads shall comply with the requirements specified in § 79.201–1. When capacity is reduced by the insertion of interior heads, these heads shall comply with the requirements for interior compartment heads and exterior head reapplied. Voids, created by the addition of heads for division into compartments or reduction in capacity, shall be provided with at least one tapped drain hole at their lowest point, and a tapped hole at the top of the tank. Top hole shall be closed, and the bottom hole may be closed, with not less than ¾ inch nor more than 1½ inch solid pipe plugs having NPT threads.

(b) When the tank is divided into compartments by constructing each compartment as a separate tank, these tanks shall be joined together by a cylinder made of plate, having a thickness not less than that required for the tank shell and applied to the outside surface of tank head flanges. The cylinder shall fit the straight flange portion of the compartment tank head tightly. The cylinder shall contact the head flange for a distance of at least two times the plate thickness, or a minimum of 1 inch, whichever is greater. The cylinder shall be joined to the head flange by a full fillet weld. Distance from head seam to cylinder shall not be less than 1½ inches or three times the plate thickness, whichever is greater. Voids created by the space between heads of tanks joined together to form a compartment tank shall be provided with a tapped drain hole at their lowest point and a tapped hole at top of tank. The top hole shall be closed and the bottom hole may be closed with solid pipe plugs not less than ¾ inch nor more than 1½ inches having NPT threads.

**§ 79.200–10 Welding.**

(a) All joints shall be fusion-welded in compliance with the requirements of AAR Specifications for Tank Cars, Appendix W. Welding procedures, welders and fabricators shall be approved.

**§ 79.200–11 Stress relieving and heat treatment.**

(a) After welding is complete stress relieving or heat treatment shall be in compliance with the requirements of AAR Specifications for Tank Cars, Appendix W, when specified in § 79.201–1.

**§ 79.200–12 Tank mounting.** See § 79.10.

**§ 79.200–13 Manway ring or flange, safety relief device flange, bottom outlet nozzle flange, bottom washout nozzle flange and other attachments and openings.**

(a) For steel and aluminum tanks, these attachments shall be riveted or fusion-welded.

(b) For alloy steel and nickel tanks these attachments shall be fusion-welded.

(c) Fusion-welding for securing these attachments in place shall be of the double-welded butt joint type or double full-fillet lap joint type.

(d) Rivets, if used, shall be to approved specifications compatible with plate material and shall meet the following requirements:

(1) Riveted joints shall be made metal to metal without interposition of other material.

(2) Rivets shall be driven hot and calked inside. All joints formed by all riveted attachments shall be calked inside. Split calking is prohibited.

(3) Use of rivets less than ⅝ inch nominal diameter prohibited.

(4) For computing rivet areas the effective diameter of a driven rivet is the diameter of its reamed hole, which hole shall in no case exceed nominal diameter of rivet by more than 1/16 inch.

(5) When attachments are applied by means of riveting, the edges of plates shall be beveled so that the angle of the calking edge will be between 60 and 70 degrees with the flat surface of the attachment. The extreme calking edge distance, measured from center line of rivet hole, shall be at least one and one-half times the diameter of the hole and not more than that distance plus ¼ inch.

(6) Rivets shall be handled and driven in a manner that will insure requisite strength.

(e) The opening in the manway ring shall be at least 16 inches in diameter except that acid resistant lined manways shall be at least 18 inches in diameter before lining.

(f) Manway ring or flange, if riveted to dome or tank, shall be of cast, forged or fabricated steel, malleable iron or other malleable metals.

(g) Manway ring or flange, if welded to dome, tank or nozzle, shall be made of cast, forged or fabricated metal and be of good weldable quality in conjunction with metal of dome, tank, or nozzle.

(h) Openings for manway or other fittings shall be reinforced in an approved manner.

**§ 79.200–14 Expansion capacity.**

(a) Tanks shall have expansion capacity as prescribed in § 79.201–1. This capacity shall be provided in the tank for Class ICC–111A cars, or in a dome for Class ICC–103 and 104 type cars.

(b) The capacity of the expansion dome, when used, shall be at least the percentage specified in § 79.201–1 of the total capacity of the tank and dome combined. The capacity of the dome shall be measured from the inside top of shell of tank to the inside top of dome or bottom of any vent pipe projecting inside of dome, except that when safety relief device is applied to side of dome, the effective capacity of the dome shall be measured from top of safety relief device opening inside of dome to inside top of shell of tank.

(c) The opening in the tank shell within the dome shall be at least 29 inches in diameter. When the opening in the tank shell exceeds 30 inches in diameter, the opening shall be reinforced in an approved manner. When the opening in the tank shell is less than the inside diameter of the dome, and the dome pocket is not closed off in an approved manner, dome pocket drain holes shall be provided in the tank shell with nipples projecting inside the tank at least 1 inch.

(d) The dome head shall be of approved contour and shall be designed for pressure on concave side.

(e) Aluminum alloy domes:

(1) The dome shell thickness shall be calculated by the formula in § 79.200–6(a).

(2) The dome head may be an ellipsoid of revolution in which the major axis shall be equal to the diameter of the dome shell and the minor axis shall be one-half the major axis. The thickness in this case shall be determined by using formula in § 79.200–6(a).

(3) The dome head, if dished, shall be dished to a radius not exceeding 96 inches. Thickness of dished dome head shall be calculated by the formula in § 79.200–6(b).

(4) Tank shell shall be reinforced by the addition of a plate equal to or greater than shell in thickness and the cross sectional area shall exceed metal removed for dome opening, or tank shell shall be reinforced by a seamless saddle plate equal to or greater than shell in thickness and butt welded to tank shell. The reinforcing saddle plate shall be provided with a fluid opening having a vertical flange of the diameter of the dome for butt welding shell of dome to the flange. The reinforcing saddle plate shall extend about the dome a distance measured along shell of tank at least equal to the extension at top of tank. Other approved designs may be used.

(f) For thickness of carbon or alloy steel domes, see § 79.201–2.

**§ 79.200–15 Closures for manways.**

(a) Manway covers shall be of approved type. See § 79.202–1 for special requirements for flammable liquids.

(b) Manway covers shall be designed to provide a secure closure of the manway.

(c) Manway covers shall be cast, forged or fabricated metal and be of the same metal as the metal of the tank except for aluminum tanks where manway covers of other approved materials may be used, or except for steel tanks where malleable iron manway covers may be used. Malleable iron, when used, shall comply with AAR Specification M–402 Grade 35018—Malleable Iron Castings or ASTM A–47 Grade 35018—Malleable Iron Castings.

(d) All joints between manway covers and their seats shall be made tight against leakage of vapor and liquid by use of gaskets of suitable material.

(e) For other manway cover requirements see § 79.201–1.

**§ 79.200–16 Gaging devices, top loading and unloading devices, venting and air inlet devices.**

(a) When installed, these devices shall be of an approved design which will prevent interchange with any other fixture, and be tightly closed. Unloading pipes shall be securely anchored within the tank. Each tank or compartment may be equipped with one separate air connection.

(b) When the characteristics of the commodity for which the car is authorized are such that these devices must be equipped with valves or fittings to permit the loading and unloading of the contents, these devices, including valves, shall be of an approved design, and be provided with a protective housing except when plug or ball type valves with operating handles removed are used. Provision shall be made for closing pipe connections of valves.

(c) Tanks may be equipped with a vacuum relief valve of an approved design.

(d) When gaging device is required in § 79.201–1, an outage scale visible through manway opening shall be provided. If loading devices are applied to permit tank loading with cover closed, a telltale pipe may be provided. Telltale pipe shall be capable of determining that required outage is provided. Pipe shall be equipped with ¼ inch minimum NPT control valve mounted outside tank and enclosed within a housing. Other approved devices may be used in lieu of outage scale or telltale pipe.

(e) Bottom sump if applied may be of cast, fabricated, or forged metal.

**§ 79.200–17 Bottom outlets.**

(a) If indicated in § 79.201–1, tank may be equipped with bottom outlet. If applied, bottom outlet shall comply with the following requirements:

(1) The extreme projection of bottom outlet equipment shall be at least 12 inches above top of rail. All bottom outlet reducers and closures and their attachments shall be secured to car by at least ⅜ inch chain or its equivalent, except that outlet closure plugs may be attached by ¼ inch chain. When the bottom outlet closure is of the combination cap and valve type, the pipe connection to the valve shall be closed by a plug or cap.

(2) Bottom outlet shall be of approved construction, and be provided with a liquid tight closure at its lower end.

(3) The valve and its operating mechanism may be applied to the outside bottom of the tank. When applied in this manner, the valve operating mechanism shall be provided with a suitable locking arrangement to insure positive closure during transit.

(4) The valve operating mechanism for valves applied to the interior of the tank, and outlet nozzle construction shall insure against the unseating of the valve due to stresses or shocks incident to transportation.

(5) Bottom outlet nozzle of interior valves and the valve body of exterior valves, shall be of cast, fabricated or forged metal. If welded to tank, they shall be of good weldable quality in conjunction with metal of tank.

(6) To provide for the attachment of unloading connections, the bottom of the main portion of the outlet nozzle or valve body of exterior valves, or some fixed attachment thereto, shall be provided with threaded cap closure arrangement or bolted flange closure arrangement having minimum 1 inch threaded pipe plug.

(7) If outlet nozzle extends 6 inches or more from shell of tank a "V" groove shall be cut (not cast) in the upper part of outlet nozzle at a point immediately below lowest part of valve to a depth that will leave thickness of nozzle wall at the root of the "V" not over ⅜ inch. The outlet nozzle on interior valves or the valve body on exterior valves may be steam jacketed, in which case the breakage groove or its equivalent shall be below the steam chamber but above the bottom of center sill construction. If outlet nozzle is not a single piece, or if exterior valves are applied, provision shall be made for the equivalent of the breakage groove.

(8) The flange on the outlet nozzle or the valve body of exterior valves shall be of a thickness which will prevent distortion of the valve seat or valve by any change in contour of the shell resulting from expansion of lading, or other causes, and which will insure that accidental breakage of the outlet nozzle will occur at or below the "V" groove, or its equivalent.

(9) The valve shall have no wings or stem projecting below the "V" groove or its equivalent. The valve and seat shall be readily accessible or removable for repairs, including grinding.

(10) The valve operating mechanism on interior valves shall have means for compensating for variation in the vertical diameter of the tank produced by expansion, weight of the liquid contents, or other causes, and may operate from the interior of the tank, but in the event the rod is carried through the dome, or tank shell, leakage shall be prevented by packing in stuffing box or other suitable seals and a cap.

(b) If indicated in § 79.201–1, tank may be equipped with bottom washout of approved construction. If applied, bottom washout shall be in accordance with the following requirements:

(1) The extreme projection of the bottom washout shall be at least 12 inches above top of rail.

(2) Bottom washout shall be of cast, forged or fabricated metal. If welded to tank, they shall be of good weldable quality in conjunction with metal of tank.

(3) If washout nozzle extends 6 inches or more from shell of tank, a "V" groove shall be cut (not cast) in the upper part of the nozzle at a point immediately below the lowest part of inside closure seat or plug to a depth that will leave wall thickness of nozzle at the root of the "V" not over ⅜ inch. Where nozzle is not a single piece, provision shall be made for the equivalent of the breakage groove. The nozzle shall be of a thickness to insure that accidental breakage will occur at or below the "V" groove or its equivalent.

(4) The closure plug and seat shall be readily accessible or removable for repairs.

(5) Joints between closures and their seats may be gasketed with suitable material.

**§ 79.200–18 Safety relief devices.**

(a) Safety relief valves.

(1) When permitted in § 79.201–1, each tank or compartment shall be equipped with one or more safety relief valves of approved design, made of metal not subject to rapid deterioration by the lading, and mounted on expansion dome of Class ICC–103 or 104 cars or top of tank shell of Class ICC–111A cars. Total valve discharge capacity shall be sufficient to prevent building up of pressure in the tank to more than 10 psi above start-to-discharge pressure. See AAR Specifications for Tank Cars, Appendix A, for formula for calculating discharge capacity.

(2) The start-to-discharge pressures and vapor tight pressures shall comply with § 79.201–1.

(b) Safety vents:

(1) When permitted in § 79.201–1, each tank or compartment used for the transportation of corrosive liquids, flammable solids, oxidizing materials, or poisonous liquids or solids, class B, need not be equipped with safety relief valves, but if not so equipped, shall have one safety vent at least 1¾ inches inside diameter, of an approved design which will prevent interchange with fixtures prescribed in § 79.200–16(a), and closed with a frangible disc of lead or other approved material of a thickness that will rupture at not more than 75 percent of tank test pressure. Means for holding disc in place shall be such as to prevent distortion or damage to disc when applied. Safety vent closure shall be chained or otherwise fastened to prevent misplacement. All tanks equipped with vents shall be stenciled "NOT FOR FLAMMABLE LIQUIDS."

**§ 79.200–19 Reinforcements, when used, and appurtenances not otherwise specified.**

(a) All attachments to tank and dome shall be applied by approved means. Rivets if used shall be calked inside and outside.

**§ 79.200–20 Interior heater systems.**

(a) See § 79.12.

**§ 79.200–21 Closures for openings.**

(a) All plugs shall be solid, with NPT threads, and shall be of a length which will screw at least 6 threads inside the face of fitting or tank. Plugs, when inserted from the outside of tank heads, shall have the letter "S" at least ⅜ inch in size stamped with steel stamp or cast on the outside surface to indicate the plug is solid.

**§ 79.200–22 Test of tanks.**

(a) Each tank shall be tested by completely filling the tank and dome or nozzles with water, or other liquid having similar viscosity, of a temperature which shall not exceed 100° F during the test; and applying the pressure prescribed in § 79.201–1. Tank shall hold the prescribed pressure for at least 10 minutes without leakage or evidence of distress. All rivets and closures, except safety relief valves or safety vents, shall be in place when test is made.

(b) Insulated tanks shall be tested before insulation is applied.

(c) Rubber-lined tanks shall be tested before rubber lining is applied.

(d) Calking of welded joints to stop leaks developed during the foregoing tests is prohibited. Repairs in welded joints shall be made as prescribed in AAR Specifications for Tank Cars, Appendix W.

**§ 79.200–23 Tests of safety relief valves.**

(a) Each valve shall be tested by air or gas for compliance with § 79.201–1 before being put into service.

**§ 79.200–24 Stamping.**

(a) To certify that the tank complies with all specification requirements, each tank shall be plainly and permanently stamped in letters and figures at least ⅜ inch high into the metal near the center of both outside heads as follows:

| | *Example of required stamping* |
|---|---|
| Specification | ICC–103–W |
| Material | ASTM A285 C |
| Cladding material (if any) | ASTM A240–304 Clad |
| Tank builder's initials | ABC |
| Date of original test | 00–0000 |
| Car assembler (if other than tank builder) | DEF |

**§ 79.200–25 Stenciling.**

(a) The tank, or the jacket if tank is insulated, shall be stenciled in compliance with the requirements of AAR Specifications for Tank Cars, Appendix C.

**§ 79.200–26 Certificate of construction.**

(a) See § 79.5.

**§ 79.201 Individual specification requirements applicable to non-pressure tank car tanks.**

**§ 79.201–1 Individual specification requirements.**

(a) In addition to § 79.200 the individual specification requirements are as follows:

| ICC specifications | 103W | 103A–W | 103A–N–W | 103AL–W | 103A–AL–W | 103B–W | 103C–W | 103D–W | 103E–W | 104W |

[1] Tanks converted to ICC–111A series from existing forge-welded specification ICC–105A300, 400, or 500 tanks, by modification using conversion details complying with ICC–111A specification requirements, shall be stenciled by substituting the letter "F" for the letter "W" in the specification designation.

**§ 79.201–2 Minimum plate thickness.**

(a) The minimum plate thickness shall be as follows:

| Inside diameter of tanks | Bottom sheets (inch) | Shell sheets (inch) | Expansion dome sheets (inch) | 2:1 ellipsoidal heads (inch) | 3:1 ellipsoidal and dished tank heads (inch) | Expansion dome heads (inch) | Interior compartment heads (inch) |
|---|---|---|---|---|---|---|---|
| 60 inches or under | 7/16 | 1/4 | 5/16 | 7/16 | 1/2 | 5/16 | 5/16 |
| Over 60 to 78 inches | 7/16 | 5/16 | 5/16 | 7/16 | 1/2 | 5/16 | 5/16 |
| Over 78 to 96 inches | 1 1/2 | 3/8 | 5/16 | 7/16 | 1/2 | 5/16 | 3/8 |
| Over 96 to 112 inches | 1 1/2 | 7/16 | 5/16 | 7/16 | 9/16 | 5/16 | 7/16 |
| Over 112 to 122 inches | 1/2 | 1/2 | 7/16 | 1/2 | 5/8 | 9/16 | 1/2 |

[1] May be reduced to 7/16 inch when approved steels having tensile strength of 65,000 psi or higher are used.

**§ 79.201–3 Lined tanks.**

(a) Each tank or each compartment thereof shall be lined with acid resisting rubber or other approved material vulcanized or bonded directly or otherwise attached to the metal tank, to provide a non-porous laminated lining. The lining shall be at least 5/32 inch thick, except over all rivets and seams formed by riveted attachments where the lining shall be double thickness. The lining shall overlap at least 1½ inches at all edges, which shall be straight and be beveled to an angle of approximately 45 degrees, or butted edges of lining shall be sealed with a 3-inch minimum strip of lining having 45 degree beveled edges. An additional reinforcing pad at least 4½ feet square and at least ½ inch thick shall be applied by vulcanizing to the lining on bottom of tank directly under the manway opening. The edges of pad shall be beveled to an angle of approximately 45 degrees. An opening in this pad for sump is permitted. No lining shall be under tension when applied except due to conformation over rivet heads. Interior of tank shall be free from scale, oxidation, moisture and all foreign matter during the lining operations.

(b) All rivet heads on inside of tank shall be button-head or similar shape, of uniform size and the under surface of heads shall be driven tight against plate. All plates, castings and rivet heads on inside of tank shall be calked. All projecting edges of plates, castings and rivet heads on inside of tank shall be rounded and free from fins and other irregular projections. Castings shall be free from porosity.

(c) All surfaces of attachments or fittings and their closures, exposed to the lading shall be covered with at least ⅛ inch acid resistant material. Attachments made of metal not affected by the lading need not be acid resistant material covered.

**§ 79.201–4 Material.**

(a) Except for protective housing, all fittings, tubes and castings and all projections and their closures shall also meet the requirements of § 79.200–7(c).

**§ 79.201–5 Heat treatment.**

(a) All welding of the tank shell and of attachments welded directly thereto shall be heat treated as a unit to remove stresses at the proper temperature to obtain corrosion resistance specified in § 79.200–7(c), except for commodities not classed as Corrosive Liquids in Part 73 of this chapter, tanks made of ASTM A240 Type 304L and 316L are not required to be heat treated as a unit to remove stresses, nor to obtain the corrosion resistance specified in § 79.200–7(c)(1).

**§ 79.201–6 Closures for manways.**

(a) The manway cover shall be designed to make it impossible to remove the cover while the interior of the tank is subjected to pressure.

(b) Manway cover shall be made of a suitable metal. The top, bottom and edge of manway cover shall be acid resistant material covered as prescribed in § 79.201–3. Through bolt holes shall be lined with acid resistant material at least ⅛ inch in thickness. Cover made of metal not affected by the lading need not be acid resistant material covered.

(c) Manway ring and cover shall be made of the metal prescribed in § 79.200–7(c).

(d) Manway rings shall be made of cast, forged or fabricated nickel and be a good weldable quality in conjunction with the metal of the dome.

**§ 79.201–7 Safety relief devices.**

(a) Each tank or compartment shall be equipped with a safety vent unless characteristics of the lading require a safety relief valve. Design of safety relief devices shall be such as to prevent interchange with fixtures prescribed in § 79.200–16(a).

(b) Safety vents, if used, shall be of approved design, at least 1¾ inches inside diameter, made of material not subject to rapid deterioration by the lading, and closed with a frangible disc of lead or other approved material of a thickness that will burst at not more than 75 percent of tank test pressure. Means for holding the disc in place shall be such as to prevent distortion or damage to disc when applied. Safety vent closure shall be chained or otherwise fastened to prevent misplacement.

(c) Safety relief valves, if used, shall be of approved design, made of metal not subject to rapid deterioration by the lading, and mounted on expansion dome of Class ICC–103 and 104 type tanks, or top of tank shell for Class ICC–111A type tanks.

**§ 79.201–8 Sampling device and thermometer well.**

(a) Sampling valve and thermometer well are not specification requirements. When used, they must be of approved design, made of metal not subject to rapid deterioration by lading, and must withstand a pressure of 100 pounds per square inch without leakage. Interior pipes of the sampling valve must be equipped with excess flow valves of an approved design. Interior pipe of thermometer well must be closed by an approved valve attached close to fitting where it passes through the tank and closed by a screw plug. Other approved arrangements that permit testing thermometer well for leaks without complete removal of the closure may be used.

**§ 79.201–9 Gaging device.**

(a) A gaging device of an approved design shall be applied to permit determining the liquid level of the lading. The interior pipe of the gaging device shall be equipped with an excess flow valve of an approved design. This device shall be provided with a protective housing.

(b) An excess flow valve, as referred to in this specification, is a device which closes automatically against the outward flow of the contents of the tank such as may be encountered in case the external closure valve is broken off or removed during transit. Excess flow valves may be designed with a by-pass to allow equalization of pressures.

**§ 79.201–10 Water capacity marking.**

(a) Water capacity of the tank in pounds stamped plainly and permanently in letters and figures at least ⅜ inch high into the metal of the tank immediately below the stamped marks specified in § 79.200–24(a). This mark shall also be stenciled on the jacket immediately below the dome platform and directly behind or within 3 feet of the right or left side of the ladder, or ladders, if there is a ladder on each side of the tank, in letters and figures at least 1½ inches high as follows:

WATER CAPACITY
000000 Pounds

**§ 79.201–11 Insulation.**

(a) Insulation shall be of sufficient thickness so that the thermal conductance at 60 F is not more than 0.075 Btu per hour, per square foot, per degree F temperature differential.

**§ 79.202 Special commodity requirements for non-pressure tank car tanks.**

(a) In addition to §§ 79.200 and 79.201 the following requirements are applicable:

**§ 79.202–1 Flamable liquids not specifically provided for.**

(a) Specs. ICC–103, 103–W, 103AL–W, 103D–W, 104, 104–W, 111A60AL–W, 111A100–F–1, 111A100–W–1, 111A100–W–3, 111A100–W–4, and 111A100–W–6, tank cars used to transport flammable liquids not specifically provided for shall have manway closures so designed that pressure will be released automatically by starting the operation of removing the manway cover. Openings in tank heads to facilitate application of lining are authorized and shall be closed in an approved manner. Spec. 103, 103–W, 103AL–W, 104, 104–W, 111A60AL–W or 111A100–W–3, used to transport flammable liquids not specifically provided for, having a vapor pressure exceeding 27 pounds per square inch absolute at 100° F but not exceeding 40 pounds per square inch absolute at 100° F, shall have their manway closures equipped with approved safeguards making removal of closures from the manway opening practically impossible while car interior is subjected to vapor pressure of lading. These cars shall be stenciled on each side of domes in line with the ladders, and in a color contrasting to the color of the dome with the identification mark as prescribed in § 73.119(g) of this chapter.

**§ 79.202–2 Dimethyl dichlorosilane, Ethyl dichlorosilane, Ethyl trichlorosilane, Methyl trichlorosilane, Trimethyl chlorosilane, Vinyl trichlorosilane, Methyl dichlorosilane and Trichlorosilane.**

(a) Specs. 103, 103–W, 111A60–F–1, 111A60–W–1 and 111A100–W–1 tank cars used to transport Dimethyl dichlorosilane, Ethyl dichlorosilane, Ethyl trichlorosilane, Methyl trichlorosilane, Trimethyl chlorosilane, Vinyl trichlorosilane, Methyl dichlorosilane, and Trichlorosilane, shall not be equipped with bottom discharge outlet.

**§ 79.202–3 Amyl mercaptan, Butyl mercaptan, Ethyl mercaptan, Isopropyl mercaptan, Propyl mercaptan, and Aliphatic mercaptan mixtures.**

(a) Specs. 103–W, 111A60–F–1 and 111A60–W–1 tank cars used to transport Amyl mercaptan, Butyl mercaptan, Ethyl mercaptan, Isopropyl mercaptan, Propyl mercaptan, an Aliphatic mercaptan mixtures shall have bottom outlets effectively sealed. Bottom washout permitted.

**§ 79.202–4 Potassium nitrate mixed (fused) with Sodium nitrite.**

(a) Spec. 103–W tank cars used to transport Potassium nitrite mixed (fused) with Sodium nitrate shall be specially designed, equipped and approved for this service, without bottom discharge outlet and with heavier plate thicknesses than the minimum prescribed for cars built under this specification. For spec. 103–W tank cars made of plates having the minimum prescribed thicknesses, internal reinforcement of the upper sheets of tank in the region of the dome and reinforcing plates attached to the bottom sheet of the tank which rests on bolsters is required, and these tanks shall be equipped with baffle plates. Heater pipes shall be of welded construction designed for a test pressure of 500 pounds per square inch. A one inch woven asbestos lining shall be placed between bolster slabbing and bottom of tank to prevent heat transmission. Safety vents of the frangible disc type may be used and if used the frangible discs shall be perforated with ⅛ inch hole. If safety relief valves are used, a vacuum relief valve shall be installed on the dome. Tanks shall be stenciled on both sides "FUSED POTASSIUM NITRATE AND SODIUM NITRITE ONLY."

**§ 79.202–5 Phosphorus, white or yellow.**

(a) Specs. ICC–103, 103–W, 111A60–F–1, 111A60–W–1 and 111A100–W–1 tank cars used to transport Phosphorous, white or yellow, shall be equipped with approved dome fittings, external heater systems and with insulation at least 4 inches in thickness, except that thickness of insulation may be reduced to 2 inches over external heater coils. Bottom washout nozzle of approved design may be applied. Bottom outlet for discharge of lading prohibited.

**§ 79.202–6 Cumene hydroperoxide, Diisopropylbenzene hydroperoxide and Paramenthane hydroperoxide.**

(a) Specs. ICC–103, 103–W, 111A60–F–1, 111A60–W–1 and 111A100–W–1 tank cars used to transport Cumene hydroperoxide of strength not exceeding 90 percent in a nonvolatile solvent, Paramenthane hydroperoxide of strength not exceeding 60 percent in a nonvolatile solvent and Diisopropylbenzene hydroperoxide of strength not exceeding 60 percent in a nonvolatile solvent, shall have bottom outlets effectively sealed from the inside.

**§ 79.202–7 Titanium tetrachloride, anhydrous.**

(a) Specs. ICC–103A, 103A–W, 111A100–F–2 and 111A100–W–2 tank cars used to transport Titanium tetrachloride, anhydrous, shall have safety relief valves of approved design and not subject to rapid deterioration by the lading.

**§ 79.202–8 Chloracetyl chloride.**

(a) Specs. ICC–103A–W, 111A100–F–2 and 111A100–W–2 tank cars used to transport Chloracetyl chloride shall have a nickel cladding of 1/10 inch minimum thickness. Nickel cladding in tanks shall have a minimum nickel content of at least 99 percent pure nickel. Spec. ICC–103A–N–W tank cars used to transport Chloracetyl chloride shall be of solid nickel at least 99 percent pure and all cast metal parts of the tank in contact with the lading shall have a minimum nickel content of approximately 96.7 percent.

**§ 79.202–9 Hydrochloric (muriatic) acid not over 38 percent strength by weight except acid of 22° Baume strength or other fuming acids.**

(a) Spec. ICC–103B, 103B–W, or 111A100–W–5 tank cars used to transport Hydrochloric (muriatic) acid not over 38 percent except acid of 22° Baume strength and other fuming acids, may be equipped with safety vent of approved design having a frangible disc with ⅛ inch breather hole in the center, or a safety vent of approved design using carbon discs permitting continuous venting.

**§ 79.202–10 Hydrogen peroxide solution in water exceeding 52 percent by weight.**

(a) Spec. ICC–103A–AL–W tank cars used to transport Hydrogen peroxide solution in water exceeding 52 percent by weight, shall be equipped with a venting arrangement approved by the Bureau of Explosives.

**§ 79.202–11 Phosphorus oxychloride, Phosphorus trichloride, and Thiophosphoryl chloride.**

(a) Spec. ICC–103A–N–W tank cars used to transport Phosphorus oxychloride, Phosphorus trichloride, and Thiophosphoryl chloride, shall be solid nickel at least 99 percent pure and all cast metal parts of the tank in contact with the lading have a minimum nickel content of approximately 96.7 percent. Spec. ICC–103A tank cars used to transport phosphorus oxychloride, phosphorus trichloride, and thiophosphoryl chloride shall be lead-lined steel, or made of steel at least 10 percent nickel clad. Spec. ICC–103A–W, 111A100–F–2 or 111A100–W–2 tank cars used to transport Phosphorus oxychloride, Phosphorus trichloride and Thiophosphoryl chloride shall be lead-lined steel or made of steel with a minimum thickness of nickel cladding of 1/16 inch. Nickel cladding in tanks shall have a minimum nickel content of at least 99 percent pure nickel. Spec. ICC–103E–W tank cars used to transport Phosphorus trichloride and Thiophosphoryl chloride shall have tanks fabricated from Type 316 stainless steel.

**§ 79.202–12 Sulfuric acid of concentrations 65.25 percent (approximately 1.559 specific gravity) (52° Baume) or greater.**

(a) Spec. ICC–103A, 103A–W, 111A100–F–2 or 111A100–W–2 tank cars used to transport Sulfuric acid of concentration 65.25 percent (approximately 1.559 specific gravity) (52° Baume) except oleum, mixed acid (nitric and sulfuric) (nitrating acid) and other fuming acids, may have safety vents equipped with lead discs having a ⅛ inch breather hole in the center thereof.

**§ 79.20213 Sulfur trioxide, stabilized.**

(a) Specs. ICC–103A, 103A–W, 111A100–F–2, 111A100–W2 and 105A300–W tank cars, used to transport Sulfur trioxide, stabilized, shall be equipped with safety relief valves of approved design and not subject to rapid deterioration by the lading. Tanks equipped with interior heating coils not permitted.

**§ 79.202–14 Anhydrous hydrazine and Hydrazine solutions containing 50 percent or less of water.**

(a) Specs. ICC–103C–W and 111A100–W–6 tank cars used to transport Anhydrous hydrazine or Hydrazine solutions containing 50 percent or less water, shall have tanks fabricated of Type 304L or 347 stainless steel with molybdenum content not exceeding one-half of one percent.

**§ 79.202–15 Formic acid and Formic acid solutions.**

(a) Spec. ICC–103E–W tank cars used to transport Formic acid or Formic acid solutions, shall have tanks fabricated from Type 316 stainless steel and be stenciled "FOR FORMIC ACID ONLY."

**§ 79.202–16 Monochloroacetic acid, liquid.**

(a) Specs. ICC–103A–W, 111A100–F–2 and 111A100–W–2 tank cars used to transport Monochloroacetic acid, liquid, shall have tanks nickel clad at least 20 percent.

**§ 79.202–17 Benzyl chloride.**

(a) Spec. ICC–103A, 103A–W, 111A100–F–2 or 111A100–W–2 tank cars used to transport Benzyl chloride, stabilized, may be 10 percent nickel clad. Spec. 103A–N–W tank cars used to transport Benzyl chloride shall have all cast metal parts in contact with the lading made from metal having a minimum nickel content of approximately 96.7 percent

**§ 79.202–18 Ethylene oxide.**

(a) Spec. ICC–111A100–W–4 tank cars used to transport Ethylene oxide, may have opening in the tank heads to facilitate application of nickel lining. Such openings in tank heads shall be closed in an approved manner.

**§ 79.202–19 Dimethylhydrazine, unsymmetrical.**

(a) Specs. ICC–103–W and 103C–W tank cars used to transport Dimethylhydrazine, unsymmetrical, shall be equipped with steel safety valves of approved design. Spec. 103–W tank cars shall not be equipped with bottom outlets.

## Subpart E—Specifications for Multi-Unit Tank Car Tanks (Classes ICC–106A and 110A–W)

**§ 79.300 General specifications applicable to multi-unit tank car tanks designed to be removed from car structure for filling and emptying.**

**§ 79.300–1 Tanks built under these specifications shall meet the requirements of § 79.300, § 79.301 and when applicable, § 79.302.**

**§ 79.300–2 Approval.**

(a) For procedure for securing approval, see § 79.3.

**§ 79.300–3 Type and general requirements.**

(a) Tanks built under this specification shall be cylindrical, circular in cross section, and shall have heads of approved design. All openings shall be located in the heads.

(b) Each tank shall have a water capacity of at least 1500 pounds and not more than 2600 pounds.

(c) For tanks made in foreign countries, a chemical analysis of materials and all tests as specified shall be carried out within the limits of the United States under the supervision of a competent and impartial inspector.

**§ 79.300–4 Insulation.**

(a) Tanks shall not be insulated.

**§ 79.300–5 Bursting pressure.**

(a) The minimum required bursting pressure is listed in § 79.301.

**§ 79.300–6 Thickness of plates.**

(a) For Class ICC–110A tanks, the wall thickness of the cylindrical portion of the tank shall not be less than that specified in § 79.301 nor that calculated by the following formula:

$$t = \frac{Pd}{2SE}$$

where:

$d$ = inside diameter in inches;
$E$ = 0.9 welded joint efficiency;
$P$ = minimum required bursting pressure in psi;
$S$ = minimum tensile strength of plate material in psi as prescribed in § 79.300–7;
$t$ = minimum design thickness of plate in inches.

(b) For Class ICC–106A tanks, the wall thickness of the cylindrical portion of the tank shall not be less than that specified in § 79.301 and shall be such that at the tank test pressure the maximum fiber stress in the wall of the tank will not exceed 15,750 psi as calculated by the following formula:

$$s = \frac{p(1.3D^2 + 0.4d^2)}{D^2 - d^2}$$

where:

$d$ = inside diameter in inches;
$D$ = outside diameter in inches;
$p$ = tank test pressure in psi;
$s$ = wall stress in psi.

(c) If plates are clad with material having tensile strength at least equal to the base plate, the cladding may be considered a part of the base plate when determining the thickness. If cladding material does not have tensile strength at least equal to the base plate, the base plate alone shall meet the thickness requirements.

**§ 79.300–7 Material.**

(a) Carbon steel plate material used to fabricate tanks with fusion-welded heads shall be open hearth boiler plate of flange or firebox quality having a carbon content not exceeding 0.31 percent and complying with one of the following ASTM specifications for the material and with the indicated tensile strength and elongation in the welded condition:

| Specification | Minimum tensile strength (psi) welded condition | Minimum elongation in 2 inches (percent) welded condition |
|---|---|---|
| ASTM A–212 Gr A | 65,000 | 20 |
| ASTM A–212 Gr B | 70,000 | 20 |
| ASTM A–285 Gr A | 45,000 | 29 |
| ASTM A–285 Gr B | 50,000 | 20 |
| ASTM A–285 Gr C | 55,000 | 20 |

(1) These plates may be clad with other approved metals.

(b) Carbon steel plate material used to fabricate tanks with forge-welded heads shall be open hearth boiler plate of firebox quality complying with specification ASTM A–285 Grade A.

(c) All plates shall have their heat number and the name or brand of the manufacturer legibly stamped on them at the rolling mill.

**§ 79.300–8 Tank heads.**

(a) Class ICC–110A tanks shall have fusion-welded heads formed concave to pressure. Heads for fusion welding shall be an ellipsoid of revolution 2:1 ratio of major to minor axis. They shall be one piece, hot formed in one heat so as to provide a straight flange at least 1½ inches long. The thickness shall not be less than that calculated by the following formula:

$$t=\frac{Pd}{2SE}$$

where symbols are as defined in § 79.300–6 (a).

(b) Class ICC–106A tanks shall have forged-welded heads formed convex to pressure. Heads for forge welding shall be torispherical with an inside radius not greater than the inside diameter of the shell. They shall be one piece, hot formed in one heat so as to provide a straight flange at least 4 inches long. They shall have snug drive fit into the shell for forge welding. The thickness shall be sufficient to meet the test requirements of § 79.300–16 and to provide for adequate threading of openings.

**§ 79.300–9 Welding.**

(a) Longitudinal joints shall be fusion welded. Head-to-shell joints shall be forge welded on Class ICC–106A tanks and fusion welded on Class ICC–110A tanks. Welding procedures, welders and fabricators shall be approved.

(b) Fusion-welded joints shall be in compliance with the requirements of AAR Specifications for Tank Cars, Appendix W, except that circumferential welds in tanks less than 36 inches inside diameter need not be radiographed.

(c) Forge-welded joints shall be thoroughly hammered or rolled to insure sound welds. The flanges of the heads shall be forge lapwelded to the shell and then crimped inwardly toward the center line at least one inch on the radius. Welding and crimping must be accomplished in one heat.

**§ 79.300–10 Stress relieving.**

(a) After welding is complete, steel tanks and all attachments welded thereto, shall be stress relieved as a unit in compliance with the requirements of AAR Specifications for Tank Cars, Appendix W.

**§ 79.300–11 Tank mounting.**

(a) For tank mounting, see § 79.10.

**§ 79.300–12 Protection of fittings.**

(a) Tanks shall be of such design as will afford maximum protection to any fittings or attachment to the head including the housing referred to in § 79.300–12(b). Tank ends shall slope or curve inward toward the axis so that the diameter at each end is at least 2 inches less than the maximum diameter.

(b) Loading and unloading valves shall be protected by a detachable protective housing of approved design which shall not project beyond the end of the tank and shall be securely fastened to the tank head. Safety relief devices shall not be covered by the housing.

**§ 79.300–13 Venting, loading and unloading valves.**

(a) Valves shall be of approved type, made of metal not subject to rapid deterioration by lading, and shall withstand tank test pressure without leakage. The valves shall be screwed directly into or attached by other approved methods to one tank head. Provision shall be made for closing outlet connections of the valves.

(b) Threads for openings shall be National Gas Taper Threads (NGT) tapped to gage, clean cut, even and without checks.

**§ 79.300–14 Attachments not otherwise specified.**

(a) Siphon pipes and their couplings on the inside of the tank head and lugs on the cutside of the tank head for attaching the valve protective housing shall be fusion-welded in place prior to stress relieving. All other fixtures and appurtenances, except as specifically provided for, are prohibited.

**§ 79.300–15 Safety relief devices.**

(a) Unless prohibited in § 79.302, or in Part 73 of this chapter, tanks shall be equipped with one or more safety relief devices of approved type, made of metal not subject to rapid deterioration by the lading and screwed directly into tank heads or attached to tank heads by other approved methods. The total discharge capacity shall be sufficient to prevent building up pressure in tank in excess of 82.5 percent of the tank test pressure. When safety relief devices of the fusible plug type are used, the required discharge capacity shall be available in each head. See AAR Specifications for Tank Cars, Appendix A, for formula for calculating discharge capacity.

(b) Threads for openings shall be National Gas Taper Threads (NGT) tapped to gage, clean cut, even and without checks.

(c) Safety relief valves shall be set for start-to-discharge and frangible discs shall burst at a pressure not exceeding that specified in § 79.301.

(d) Fusible plugs shall function at a temperature not exceeding 175 F and shall be vapor-tight at a temperature of not less than 130 F.

**§ 79.300–16 Tests of tanks.**

(a) After stress relieving, tanks shall be subjected to hydrostatic expansion test in a water jacket, or by other approved methods. No tank shall have been subjected previously to internal pressure within 100 pounds of the test pressure. Each tank shall be tested to the pressure prescribed in § 79.301. Pressure shall be maintained for 30 seconds and sufficiently longer to insure complete expansion of tank. Pressure gage shall permit reading to accuracy of one percent. Expansion gage shall permit reading of total expansion to accuracy of one percent. Expansion shall be recorded in cubic centimeters.

(1) No leaks shall appear and permanent volumetric expansion shall not exceed 10 percent of total volumetric expansion at test pressure.

(b) After all fittings have been installed, each tank shall be subjected to interior air pressure test of at least 100 psi under conditions favorable to detection of any leakage. No leaks shall appear.

(c) Repairs of leaks detected in manufacture or in foregoing tests shall be made by the same process as employed in manufacture of tank. Calking, soldering, or similar repairing is prohibited.

**§ 79.300–17 Tests of safety relief devices.**

(a) Each valve shall be tested by air or gas before being put into service. The valve shall open and be vapor-tight at the pressures prescribed in § 79.301.

(b) For safety relief devices of the frangible disc type, a sample of the disc used shall be burst and be vapor-tight at the pressures prescribed in § 79.301.

(c) For safety relief devices of the fusible plug type, a sample of the plug used shall function at the temperatures prescribed in § 79.300–15.

(d) The start-to-discharge and vapor-tight pressures shall not be affected by any auxiliary closure or other combination.

**§ 79.300–18 Stamping.**

(a) To certify that the tank complies with all specification requirements, each tank shall be plainly and permanently stamped in letters and figures ⅜ inch high into the metal of valve end chime as follows:

(1) ICC Specification number.

(2) Material and cladding material if any (immediately below the specification number).

(3) Owner's or builder's identifying symbol and serial number (immediately below the material identification). The symbol shall be registered with the Bureau of Explosives, duplications are not authorized.

(4) Inspector's official mark (immediately below the owner's or builder's symbol).

(5) Date of original tank test (month and year, such as 1–64 for January 1964). This should be so placed that dates of subsequent tests may easily be added thereto.

(6) Water capacity — 0000 pounds.

(b) A copy of the above stamping in letters and figures of the prescribed size stamped on a brass plate secured to one of the tank heads is authorized.

**§ 79.300–19 Inspection.**

(a) Tank shall be inspected within the United States and Canada by a competent and impartial inspector acceptable to the Bureau of Explosives. For tanks made outside the United States and Canada, the specified inspection shall be made within the United States.

(b) The inspector shall carefully inspect all plates from which tanks are to be made and secure records certifying that plates comply with the specification. Plates which do not comply with § 79.300–7 shall be rejected.

(c) The inspector shall make such inspection as may be necessary to see that all the requirements of this specification, including markings, are fully complied with; shall see that the finished tanks are properly stress relieved and tested.

(d) The inspector shall stamp his official mark on each accepted tank as required in § 79.300–18, and render the report required in § 79.300–20.

**§ 79.300–20 Reports.**

(a) Before a tank is placed in service, the inspector shall furnish to the builder, tank owner, Bureau of Explosives and the Secretary, Mechanical Division, Association of American Railroads, a report in approved form certifying that the tank and its equipment comply with all the requirements of this specification.

(b) For builder's Certificate of Construction, see § 79.5(b).

**§ 79.301 Individual specification requirements for multi-unit tank car tanks.**

(a) In addition to § 79.300 the individual specification requirements are as follows:

| ICC specifications | 106A500–X | 106A800–X | 110A500–W | 110A800–W | 110A1000–W |
|---|---|---|---|---|---|
| Bursting pressure, psi (see § 79.300–5) | None specified | None specified | 1250 | 2000 | 2500 |
| Minimum thickness shell, inches | 13/32 | 13/16 | 11/32 | 15/32 | 19/32 |
| Test pressure, psi (see § 79.300–16) | 500 | 800 | 500 | 800 | 1000 |
| Safety relief devices psi (see § 79.300–15) | | | | | |
| Start-to-discharge, or burst maximum | 375 | 600 | 375 | 600 | 700 |
| Vapor-tight, minimum | 300 | 480 | 300 | 480 | 650 |

**§ 79.302 Special commodity requirements for multi-unit tank car tanks.**

(a) In addition to §§ 79.300 and 79.301 the following requirements are applicable:

| Commodity | Safety relief device | Valve protective housing | Miscellaneous |
|---|---|---|---|
| Aluminum triethyl | Valve required | | |
| Aluminum trimethyl | do | | |
| Pyroforic fuel | do | | |
| Triisobutyl aluminum | do | | |
| Ethyl aluminum sesquichloride | do | | |
| Diethyl aluminum chloride | do | | |
| Ethyl aluminum dichloride | do | | |
| Methyl aluminum sesquichloride | do | | |
| Methyl aluminum sesquibromide | do | | |
| Nitrosyl chloride | Fusible plug required | | (4). |
| Chlorine trifluoride | Prohibited[1] | | |
| Hydrogen sulfide | do.[1] | Gas tight[2] | |
| Chlorpicrin | do.[1] | do.[2] | § 73.357. |
| Methyl mercaptan | do.[1] | | |
| Hydrofluoric acid | do.[1] | | |
| Nitrogen dioxide liquid | do.[1] | Gas tight.[2] | |
| Nitrogen peroxide liquid | do.[1] | do.[2] | |
| Nitrogen tetroxide liquid | do.[1] | do.[2] | |
| Nitrogen tetroxide-nitric oxide mixtures | do.[1] | do.[2] | |
| Phosgene | do.[1] | do.[2] | |
| Vinyl chloride | | | (3). |
| Vinyl methyl ether | | | (3). |
| Titanium tetrachloride (anhydrous) | Prohibited[1] | | |

[1] When safety relief devices are prohibited, containers may be equipped with solid steel plugs in the safety device openings.

[2] The detachable protective housing for the loading and unloading valves must withstand tank test pressure without leakage and must be approved by the Bureau of Explosives.

[3] All parts of valves and safety relief devices in contact with the lading must be of a metal or other material, suitably treated if necessary, which will not cause formation of any acetylides.

[4] Tanks for Nitrosyl chloride shall be nickel-clad and safety relief devices shall be of the fusible plug type and shall function at a temperature not exceeding 175 F and be vaportight at 130 F.

## Subpart F—Specifications for Liquefied Hydrogen Tank Car Tanks and Seamless Steel Tanks (Classes ICC–113A–W and 107A)

**§ 79.400 General specifications applicable to liquefied hydrogen tank car tanks.**

**§ 79.400–1 General.**

(a) Tanks built under these specifications must meet the requirements of §§ 79.400 and 79.401.

**§ 79.400–2 Approval.**

(a) For procedure for securing approval, see § 79.3.

**§ 79.400–3 Type.**

(a) A tank built in accordance with this specification shall consist of an inner (pressure) container suitably supported within an outer shell, and forming a part of a railway car. The car shall be equipped with piping systems for vapor venting, transfer of the lading and with safety relief devices, controls, gages and valves prescribed herein for safe operation of the unit in storage, transport and transfer of the lading.

(b) The inner (pressure) container shall be a fusion-welded cylindrical shell closed at each end with formed heads convex outward and suitable for operation at temperatures as low as —423 F.

(c) The outershell shall be a fusion-welded cylindrical shell with formed heads.

(d) *Compartments.* When the interior of the tank is divided into compartments, each compartment must have two heads designed convex outward and comply with all other requirements described in this specification.

**§ 79.400–4 Bursting pressure.**

(a) The minimum required bursting pressure of the inner container is listed in § 79.401.

**§ 79.400–5 Thickness of plates.**

(a) The wall thickness of the inner container shell and heads shall not be less than that specified in § 79.401, nor that calculated by the following formula:

$$t=\frac{Pd}{2SE}$$

where:

$d$ = inside diameter in inches;
$E$ = efficiency of longitudinal welded joint — 90 per cent;
$P$ = minimum required bursting pressure in psi;
$S$ = minimum ultimate tensile strength of plate material in psi as prescribed in § 79.400–6;
$t$ = minimum design thickness of plate in inches.

**§ 79.400–6 Materials.**

(a) The material used in the shell, heads and appurtenances shall be suitable for use at minus 423° F and compatible with the lading and the usual cleaning compounds recommended for this service. Chromium-nickel steel plate made to ASTM specification A–240–61T, Type 304, is an approved material and, when used, it shall be in the annealed condition prior to fabricating, forming or fusion-welding. Other approved materials may be used. The minimum ultimate tensile strength shall be as given in ASTM specification A–240, Type 304.

**§ 79.400–7 Heads.**

(a) The formed heads on the inner container shall preferably be ellipsoids of revolution in which the major axis shall equal the inside diameter of the shell and the minor axis shall be one-half of the major axis. The minimum thickness after forming shall be determined by the provisions of § 79.400–5(a) except that an efficiency of 100 percent may be used for a seamless head. Formed heads of other approved contours and thicknesses may be used but in no case shall the plate thickness be less than 3/16 inch.

**§ 79.400–8 Welding—inner container.**

(a) All joints must be fusion-welded in compliance with the requirements of the AAR Specifications for Tank Cars, Appendix W, except that the following requirements supersede requirements listed under "Test Plates," "Bend Test," and "Impact Test" of Appendix W.

(b) *Test plates.* A welded test plate of the dimensions shown in Figure W–2 of AAR Specifications for Tank Cars, Appendix W shall be made for each container using the same weld procedure as used in welding the longitudinal seams of the container. Test plates shall be prepared from material having the same material specification and mill heat numbers as used in the shell or main heads of the inner container. After welding is completed, the test plate shall be radiographed, and the standards of judgment of weld acceptability as set forth in Par. 10.74–1 of AAR Specifications for Tank Cars, Appendix W, shall be followed.

(c) *Test specimens.* The following test specimens shall be removed from the welded test plate and subjected to tests prescribed below:

(1) *Bend test.* Four transverse bend test specimens shall be removed from the welded test plate transverse to the welded joint of the test plate. The specimens shall be of rectangular cross section 1½ inches wide and the full thickness of the test plate. Weld reinforcements on each side of each test specimen shall be removed flush with the plane of the plate surface. Specimens shall be saw-cut from the test plate. Removal of test specimens from the test plate by means of flame cutting is prohibited. The specimens shall be subjected to a guided bend test, and two transverse face bend tests and two transverse root bend tests shall be performed. A bend test specimen that reveals no cracks or other open defects exceeding ⅛ inch measured in any direction on the convex surface of the specimen shall be considered to have passed the bend test. Cracks occurring on the corners of the specimen during the test shall not be considered as cause for rejection, unless there is definite evidence that they are the result of slag inclusions in the weld or other internal defects.

(2) *Impact tests.* Three sets of three impact test specimens shall be saw-cut from the welded test plate. These specimens shall be used for determining the impact properties of the plate material, weld zone and heat-affected zone. Impact test specimens shall be of the Charpy type, keyhole or milled U-notch, with the base of the notch normal to the plate surface, and shall conform in all respects to Figure 3 of ASTM Specification E–23–60–T. Impact test specimens shall be cooled in liquid nitrogen (—320 F). The apparatus for testing the specimens shall be in accordance with the requirements of ASTM Specification E–23–60–T. The test piece and handling tongs shall be cooled for a length of time sufficient to reach the temperature of liquid nitrogen. The specimen shall be quickly transferred from the cooling device to the anvil of the testing machine and broken within a time lapse of not more than six seconds.

(3) *Impact properties.* The impact properties of each set of impact specimens shall be not less than the values listed below:

| Size of specimen | Minimum impact value required for average of each set of 3 specimens | Minimum impact value permitted on 1 specimen only of each set of 3 specimens |
|---|---|---|
| | *Feet-Pound* | *Feet-Pound* |
| 55 mm x 10 mm x 10 mm | 15 | 10 |
| 55 mm x 10 mm x 7.5 mm | 12.5 | 8.5 |
| 55 mm x 10 mm x 5 mm | 10 | 7 |
| 55 mm x 10 mm x 2.5 mm | 5 | 3.5 |

When the average value of the three specimens equals or exceeds the minimum value permitted for a single specimen, and the value for more than one specimen is less than the minimum value required for the average of the three specimens, or when the impact value of one specimen is below the minimum value permitted for a single specimen, a retest of three additional specimens shall be made. The value from each retest specimen shall equal or exceed the minimum value required for the average of three specimens given above. When an erratic result is caused by a defective specimen or there is uncertainty in the test procedure, a retest is authorized.

**§ 79.400–9 Stress relieving.**

(a) Stress relieving of the inner container is not a requirement of this specification.

**§ 79.400–10 Cleaning interior container.**

(a) The interior of the tank and all lines connecting to it shall be thoroughly cleaned. Proper precautions shall be taken to avoid subsequent recontamination of the system after cleaning.

**§ 79.400–11 Test of inner container.**

(a) After all items to be welded to the inner container have been welded in place, the inner container shall be pressurized hydrostatically or pneumatically to the test pressure prescribed in § 79.401. The temperature of the pressurizing medium shall not exceed 100 F during the test. The container shall hold the prescribed pressure for a period of not less than ten minutes without leakage or evidence of distress. Due regard should be taken of the potential hazard involved in a pneumatic test. After the container has passed the pressure test, the container and piping shall be emptied of all water and purged of all water vapor if water is used for testing.

(b) Calking of welded joints to stop leaks developed during the foregoing test is prohibited. Repairs to welded joints shall be made as prescribed in § 79.400–8.

**§ 79.400–12 Radiography.**

(a) All longitudinal and circumferential double-butt, fusion-welded joints of the inner container and outer shell shall be examined throughout their entire length by the X-ray or gamma-ray method of radiography. The standards of judgment for acceptability of welds examined by radiography shall be in accordance with Par. 10.74–1 of AAR Specifications for Tank Cars, Appendix W.

**§ 79.400–13 Support system for inner container.**

(a) The inner container shall be supported within the outer shell by a support system of adequate strength and ductility at its operating temperature to support the inner container when filled with liquid lading to any level incidental to operation of the complete unit as a railway tank car. The support system shall be designed to be capable of supporting, without yielding, impact loads producing accelerations of the following magnitudes and directions when the inner container is fully loaded, and the car is equipped with a conventional AAR Specification M–901 draft gear:

| | |
|---|---|
| Longitudinal | 7G |
| Transverse | 3G |
| Vertical | 3G |

The longitudinal acceleration may be reduced to 3G where a cushioning device of approved design, which has been tested to demonstrate its ability to limit body forces to 400,000 pounds maximum at 10 miles per hour, is used between the coupler and the tank structure. The support system shall be of an approved design and such that the inner container shall be thermally isolated from the outer shell to the best practical extent.

**§ 79.400–14 Access to inner container.**

(a) The inner container shall be provided with a means of access having a minimum inside diameter of 16 inches and having a welded closure so designed as to allow it to be reopened by grinding or chipping and to be closed again by rewelding without a need for new parts. A cutting torch shall not be used. The closure and the reinforcement of the opening in the container shall be of approved design and made of the same material as is used in the container. Consideration must be given in the design to minimizing contamination of the container and the vacuum space when the closure is opened and closed. The outer shell shall be provided with an access opening of sufficient size (and aligned with the container access opening) to permit removal of the container closure and access into the container. The closure and the reinforcement of the opening in the outer shell shall be of approved design and made of the same material as is used in the outer shell. The closure shall preferably be so designed as to allow it to be reopened by grinding or chipping and to be closed again by rewelding without a need for new parts. A passageway connecting the inner container with the outer shell is not a specification requirement.

**§ 79.400–15 Outer shell.**

(a) *Design.* The outer shell shall be designed to withstand an external pressure of one atmosphere.

(b) *Thickness of plates.* The wall thickness of steel plates in the cylindrical portion of the outer shell shall be not less than 7/16 inch.

(c) *Material.* All plate material in the outer shell shall be flange quality or firebox quality steel, made to an approved specification, the carbon content of which shall not exceed 0.31 percent. Steel plate materials in accordance with material specifications listed in Group 1, Table A of AAR Specifications for Tank Cars, Appendix W, are approved for use in the outer shell of tanks built to this specification.

(1) All steel castings, steel forgings and steel structural shapes shall be of material to an approved specification.

(2) Rivets, when used, shall be of steel to an approved specification.

(d) *Heads.* The formed heads at each end of the outer shell preferably shall be an ellipsoid of revolution in which the major axis shall equal the inside diameter of the shell and the minor axis shall be one-half of the major axis. Formed heads of other approved contours may be used, but in no case shall the wall thickness be less than 7/16 inch.

(e) *Stiffening rings.* If stiffening rings are used in designing the cylindrical portion of the outer shell for external pressure, they shall be attached to the shell by means of fillet welds on each side of the ring. Outside stiffening ring attachment welds shall be continuous. Inside ring attachment welds may be intermittent. When intermittent welds are used, the total length of welds on each side of the ring shall not be less than one-third of the circumference of the outer shell. Where a closed section is used, it shall be continuously welded on the outside of each leg. A portion of the outer shell may be included when calculating the moment of inertia of the ring. The effective width of shell plate, W, on each side of the attachment of the stiffening ring is given by:

$$W = 0.78\sqrt{Rt}$$

where:

$W$ = width of shell effective on each side of the stiffener—inches;
$R$ = outside radius of the outer shell—inches;
$t$ = plate thickness of the outer shell—inches.

Where a stiffener is used which consists of a closed section having two webs attached to the outer shell, the shell plate between the webs shall be included up to the limit of twice the value of W defined above. The outer "flange" of the section shall be subject to the same limitation with W based on the R and t of the flange. Where two separate members, such as two angles, are located less than 2W apart they may be treated as a single stiffening member. (The maximum length of shell plate which may be considered effective is 4W.)

(1) The stiffener rings shall have a moment of inertia large enough to support an external pressure of 37.5 psig as determined by either of the following formulae:

$$I = \frac{0.035 D^2 L P_c}{E}$$

$$I' = \frac{0.046 D^2 L P_c}{E}$$

where:

$I$ = required moment of inertia of stiffener about centroidal axis parallel to vessel axis—inches⁴;
$I'$ = required moment of inertia of combined section of stiffener and effective width of shell plate, about centroidal axis parallel to vessel axis—inches⁴;
$D$ = outside diameter of outer shell—inches;
$L$ = one-half of the distance from the centerline of the stiffening ring to the next line of support on one side, plus one-half of the centerline distance to the next line of support, if any, on the other side of the stiffening ring, both measured parallel to the axis of the vessel—inches. (A line of support is: (1) a stiffening ring which meets the requirements of this paragraph, or (2) a circumferential line on a head at one-third the depth of the head from the head tangent line.);
$P_c$ = critical collapsing pressure (37.5 psig minimum);
$E$ = modulus of elasticity of stiffener material—psi.

(2) The cylindrical portion of the outer shell between stiffening rings shall be stiff enough to withstand an external pressure of 37.5 psig (critical collapsing pressure) as determined by the following formula:

$$P_c = \frac{2.6E(t/D)^{2.5}}{L/D - 0.45(t/D)^{0.5}}$$

where:

$P_c$ = critical collapsing pressure (37.5 psig minimum);
$E$ = modulus of elasticity of shell material—lb/sq. inch;
$t$ = minimum thickness of shell material—inches;
$D$ = outside diameter of shell—inches;
$L$ = distance between stiffening ring centers—inches. (The heads may be considered as stiffening rings located one-third of the head depth from the head tangent line.)

(3) The permissible out-of-roundness of the cylindrical portion of the outer shell shall be no greater than that permitted in Section VIII for out-of-roundness for external pressure of the ASME Boiler and Pressure Vessel Code.

(4) Where loads are applied to the outer shell or to the stiffening rings from the support system used to support the inner container within the outer shell, additional stiffener rings or an increased moment of inertia of stiffening rings designed for the external pressure will have to be provided to carry the support loads.

(f) *Welding.* All joints shall be fusion-welded in compliance with the requirements of AAR Specifications for Tank Cars, Appendix W. Welding procedures, welders and fabricators shall be approved. No more than two circumferential closing joints in the cylindrical portion of the outer shell, including head to shell joints, shall be single-welded butt joints using a backing strip on the inside of the joint. If the interior of the outer shell is divided into compartments, the compartment heads shall be attached inside the shell by fillet welding.

(g) *Stress relieving.* The cylindrical portion of the outer shell with the exception of the circumferential closing seams shall be stress relieved in accordance with the requirements of Par. W–15.01 of the AAR Specifications for Tank Cars, Appendix W. All items welded to the shell shall be attached before stress relieving. Welds securing the inner container support system to the outer shell which cannot feasibly be made before final assembly and the tank heads at each end of the shell need not be stress relieved.

(h) *Tests of outer shell.* Pressure testing of outer shell is not a specification requirement.

**§ 79.400–16 Insulation.**

(a) The annular space between the two shells shall contain an approved insulating system so installed as to insure against excessive settling and the creation of voids in the insulation when the car is in service. The material shall not burn or spark when touched with a glowing platinum wire in an atmosphere of air or lading. The insulation shall be such that the total heat transfer from the atmosphere at ambient temperature to the hydrogen at atmospheric pressure will not vaporize more than 5.2 pounds of liquefied hydrogen per hour (1000 scfh at 60 F) when the car is stationary.

(b) *Annular space.* The distance between the outside wall of the inner container and the inside wall of the outside shell shall be not less than two inches.

**§ 79.400–17 Piping, vacuum line, vapor phase line, loading and unloading lines.**

(a) *Vacuum lines.* The outer shell shall be provided with fittings to permit effective evacuation of the annular space between the outer shell and inner container.

(b) *Product lines.* The piping systems for vapor and liquid phase transfer and venting shall be made from materials compatible with the product and having satisfactory properties at minus 423° F. All valves, gages, and closures shall be mounted within suitable protective housings. The outlets of all vapor phase and liquid phase lines shall be so located that accidental discharge from these lines will not impinge on any metal of the outer shell, car structure, trucks or safety appliances.

(c) *Vapor phase line.* Vapor phase line of sufficient size to permit safety devices covered in § 79.400–18(c) (1) and (2) connected to this line to operate at their designed capacity without excessive pressure buildup in the tank shall connect to the inner container. The vapor phase line shall have a manually operated shut-off valve located as close as possible to the outer shell and shall have a closure that is liquid and gas tight.

(d) *Vapor phase blow-down line.* A blow-down line shall be provided and it may be attached to the vapor phase line specified in § 79.400–17(c) and ahead of the shut-off valve in that line. It shall have a manually operated shut-off valve located as close as possible to the outer shell. The outlet from this line shall be outside its housing and positioned so that the discharge will be directed upward and away from operating personnel.

(e) *Pressure building system.* Not a specification requirement. If a pressure building system is provided for the purpose of pressurizing the vapor space of the inner container to facilitate unloading the liquid lading, the system shall be of approved design.

(f) *Loading and unloading line.* A liquid phase transfer line shall be provided and shall have a manually operated, vacuum jacketed, shut-off valve located as close as possible to the outer shell. The section of line between the outer shell and the valve shall be vacuum jacketed. A vapor trap shall be incorporated in the line and shall be located as close as possible to the inner shell.

**§ 79.400–18 Safety relief devices.**

(a) The tank shall be provided with safety relief devices for the protection of the tank assembly and piping systems. The discharge from these devices shall be directed away from operating personnel, principal load bearing members of the outer shell, car structure, trucks and safety appliances. Vent or weep holes in safety devices are prohibited. All main safety relief devices shall discharge to the outside of protective housings in which they are mounted. This provision does not apply to small safety relief

valves installed to protect isolated short sections of lines between the final valve and end closure.

(b) *Materials.* Materials used in safety relief devices shall be suitable for use at minus 423 F and otherwise compatible with hydrogen in the liquid or vapor phase.

(c) *Inner container.* Safety relief devices for the inner container shall be attached to piping connected to the vapor phase of the inner container and mounted so as to remain in ambient temperature prior to operation. Additional requirements are as follows:

(1) *Safety vent.* The inner container shall be equipped with a safety vent without an intervening shut-off valve and designed to function at a pressure less than the test pressure of the inner container. The safety vent capacity shall be sufficient to limit the pressure within the inner container to not over the test pressure during all conditions of operation, both normal and abnormal, including fire with loss of vacuum, when the insulation space is filled with gaseous hydrogen at atmospheric pressure. The discharge shall be directed upward.

(2) *Safety relief valve.* The inner container shall be equipped with a safety relief valve without an intervening shut-off valve and set to start to discharge at a pressure not greater than 75 percent of the test pressure prescribed in § 79.401, less 15 psi. Safety relief valve capacity shall be sufficient to limit the pressure within the inner container to 85 percent of the test pressure, less 15 psi, even when the insulation space is filled with gaseous hydrogen at atmospheric pressure (no vacuum) and the outer shell is at 130 F. The minimum size relief valve body shall be ¾ inch IPS. The discharge shall be directed upward. See AAR Specifications for Tank Cars, Appendix A, for formula for calculating discharge capacity.

(3) *Pressure control device.* The inner container shall be equipped with an approved device to prevent the discharge of a mixture exceeding 50 percent of the lower flammable limit to the atmosphere under normal conditions of storage and transport of lading. This device shall be set to start to discharge at a pressure not greater than 17 psig and shall have sufficient capacity to limit the pressure within the inner container to 17 psig when the discharge is equal to twice the normal venting rate during transportation with normal vacuum and the outer shell at 130 F.

(4) *Safety interlock.* Not a specification requirement. If a safety interlock is provided for the purpose of allowing transfer of the lading at a pressure higher than the pressure control device setting but less than the safety relief valve setting, the design shall be as follows:

(i) The safety interlock shall not affect the discharge path of the safety relief valve or safety vent at any time. The safety interlock shall automatically provide an unrestricted discharge path for the pressure control device at all times except when the inner container is being pressurized through the vapor vent line shut-off valve for the transfer of lading. The safety interlock shall automatically prevent operation of the pressure control device only when the inner container is being pressurized through the vapor vent line shut-off valve for transfer of lading. Automatic operation shall be assured by a mechanical interlock of approved design between the vapor vent line shut-off valve and a pressure control device shut-off valve.

(d) *Outer shell.* The outer shell shall be provided with a suitable relief device to prevent build up of internal pressure in excess of 16 psig. The discharge capacity of the relieving device shall be sufficient to vent pressure accumulating within the annular space. Safety vent, if used, shall be designed to prevent distortion of the frangible disc when the annular space is evacuated.

(e) *Piping system.* Additional safety relief valves shall be installed in each piping circuit where the system can be isolated by closing the shut-off valves so that a dangerous pressure can be bulit up. These safety relief valves shall be designed to open at a pressure sufficiently low to prevent damage to the component or system affected.

**§ 79.400–19 Tests of safety relief valves.**

(a) Each valve shall be tested by air or gas for compliance with § 79.401 before being put into service.

**§ 79.400–20 Control valves and gages.**

(a) *Control valves.* (1) Manually-operated shut-off valves and control valves shall be provided wherever needed for control of the vapor phase pressure, vapor phase venting, liquid transfer and liquid flow rates.

(2) Control valves and shut-off valves shall be designed and constructed to provide positive shut-off, and to provide minimum resistance to flow when open. These valves shall be so constructed that the packing glands and control handles are separated from the valve bodies by a sufficient length of low conductivity material to reduce to minimum the collection of frost on the control handles when low temperature gas or liquid is passing through or in contact with the valve parts.

(3) Control valve and shut-off valves shall be of approved design and fabricated from materials not adversely affected by extended periods of contact with the lading in the liquid or vapor phase, or moist air and water.

(4) Packing, if used in these valves, shall be satisfactory for use in contact with the lading in the liquid or vapor phase and shall be of approved materials which will effectively seal the valve stem without causing difficulty of operation.

(5) Control valves and shut-off valves shall be so installed that they can be readily operated and their control handles will be readily accessible to the operator. These valves shall be so mounted that operation of the valves will not transmit excessive forces to the piping system.

(b) Instruments necessary to the effective and safe operation of the tank when transporting, transferring or storing the liquid commodities for which the car is designed shall be provided. Instruments, except portable instruments, shall be securely mounted on panels within suitable protective housings and shall include the following:

(1) *Liquid level gage.* Connections shall be provided for a liquid level gage of approved design to indicate the quantity of liquefied hydrogen within the inner container. The gage, if not portable, shall be mounted in a position where it will be readily visible to an operator during transfer operations or storage. The connection for a portable gage must be readily accessible.

(2) *Fixed dip tube.* A fixed length dip tube shall be provided with a manually operated shut-off valve located as close as possible to the outer shell and within a suitable housing. It shall be so installed as to indicate the maximum liquid level for the allowable filling density at 1 psig.

(3) *Vapor phase pressure gage.* A vapor phase pressure gage of approved design shall be provided to indicate the vapor pressure within the inner container. The gages shall be mounted so as to be readily visible to an operator.

(4) *Vacuum gage.* Connections shall be provided for a vacuum gage of approved design to indicate the absolute pressure in the annular space between the outer shell and the inner container. The gage, if not portable, must be mounted in a position where it will be readily visible to an operator. The connection for a portable gage must be readily accessible.

**§ 79.400–21 Protective housings.**

(a) The protective housings specified for all valves, gages, and closures shall be designed to protect the enclosed components from direct solar radiation, mud, sand, adverse environmental exposure, and mechanical damage. The housings shall be so designed as to provide reasonable access to the enclosed components for operation, inspection, and maintenance, and so that vapor concentration cannot build up to a dangerous level inside the housings in the event of valve leakage or pop safety valve operation. The closure shall be operable by personnel wearing heavy gloves and shall incorporate provisions for locks or seals.

**§ 79.400–22 Operating instructions.**

(a) *Identification.* All valves and gages shall be clearly identified with corrosion-resistant name plates. A plate of corrosion-resistant material bearing directions and precautionary instructions for the safe operation of this equipment during storage and transfer operations shall be securely mounted so as to be readily visible to an operator. This instruction plate shall be mounted in each housing containing operating equipment and controls for product handling. The instructions shall be clear, concise and adequate in the description of the operations to be performed by the operator during storage or transfer operations. These instructions shall include a diagram of the tank and its piping system, with the various gages, control valves, and safety relief devices clearly identified and located. The operating instructions for the vacuum system may be on a separate plate which is installed only in the housing containing vacuum controls and gages.

**§ 79.400–23 Stamping.**

(a) Each tank shall be marked certifying that the tank complies with all requirements of this specification. These marks shall be as follows:

(1) ICC–------ (insert applicable number per § 79.401) in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal near the center of the main head of the outer shell at the "B" end of the car by the tank builder or the party assembling the complete tank unit. This mark must also be stenciled on the outer shell in letters and figures at least 1½ inches high by the party assembling the complete car.

(2) Initials of the builder of the inner container, together with information as to the material used for the shell and heads of the inner container, shell thickness, head thickness and inside diameter of the inner container, shall be stamped in letters and figures at least ⅜ inch high into the metal immediately below the marks specified in § 79.400–23(a)(1).

(3) Initials of builder of the outer shell in letters and figures at least ⅜ inch high stamped plainly and permanently into the metal immediately below the marks specified in subparagraph (2) of this paragraph.

(4) Date of original test of inner container and initials of party conducting the test in letters and figures at least ⅜ inch high plainly and permanently stamped immediately below the marks specified in subparagraph (3) of this paragraph. Any marking, stenciling or stamping on the shell or heads of the inner container is prohibited. These markings must also be stenciled on the outer shell in letters and figures at least 1½ inches high.

(5) Initials of company assembling the complete car in letters and figures at least ⅜ inch high plainly and permanently stamped immediately below the marks specified in subparagraph (4) of this paragraph. These marks shall also be stenciled on the outer shell in letters and figures at least 1½ inches high.

(6) In lieu of stamping required in subparagraphs (1), (2), (3), (4), and (5) of this paragraph, the markings specified by these paragraphs may be incorporated on a data plate of corrosion-resistant metal fillet welded in place on the main head of the outer shell of the "B" end of the car.

**§ 79.400–24 Stenciling.**

(a) The outer shell of the tank shall be stenciled in compliance with the requirements of AAR Specifications for Tank Cars, Appendix C.

(1) Date on which the principal safety relief valves were tested, pressure at which tested, place where tested and initials of party making test shall be stenciled on the outer shell in letters and figures at least 1 inch high.

(2) The date on which the frangible disc was replaced and the initials of the party making the replacement shall be stenciled on the outer shell in letters and figures 1 inch high. The identification of the manufacturer, the type of frangible disc installed, and the rated rupture pressure is normally shown on the tab of the disc. If it is not given thereon, this information shall also be stenciled on the outer shell in letters and figures 1 inch high.

(3) Tank cars of approved design built to this specification are authorized for the transportation of "LIQUEFIED HYDROGEN ONLY" and shall be stenciled in letters at least 2 inches high on the outer shell immediately above the marks specified in paragraph 79.400–23(a)(1).

**§ 79.400–25 Reports.**

(a) Certificate of Construction, see § 79.5.

**§ 79.401 Individual specification requirements for liquefied hydrogen tank car tanks.**

(a) In addition to § 79.400 the individual specification requirements are as follows:

| ICC specification | 113A60–W | 113A175–W |
|---|---|---|
| Material (see § 79.400–6) | Stainless steel. | Stainless steel. |
| Bursting pressure, psi (see § 79.400–4) | 240 | 440 |
| Minimum thickness, inches, shell, and head | 3/16 | 3/16 |
| Test pressure, psi (see § 79.400–11) | 60 | 175 |
| Safety relief devices: | | |
| Safety vent, maximum bursting pressure, psi | 60 | 175 |
| Tolerance, psi | +0, −10 | +0, −22 |
| Safety relief valve: | | |
| Start-to-discharge | 30 | 115 |
| Start-to-discharge tolerance | ±2.0 | ±4.0 |
| Vapor-tight, minimum | 24 | 95 |
| Pressure control device: | | |
| Start-to-vent, psi maximum | 17 | 17 |
| Outer shell safety vent, psi maximum | 16 | 16 |

**§ 79.500 Specification ICC–107A****, seamless steel tank car tanks.**

**§ 79.500–1 Tanks built under these specifications shall meet the requirements of § 79.500.**

**§ 79.500–2 Approval.**

(a) For procedure for securing approval, see § 79.3.

**§ 79.500–3 Type and general requirements.**

(a) Tanks built under this specification shall be hollow forged or drawn in one piece. Forged tanks shall be machined inside and outside before ends are necked-down and, after necking-down, the ends shall be machined to size on the ends and outside diameter. Machining not necessary on inside or outside of seamless steel tubing, but required on ends after necking-down.

(b) For tanks made in foreign countries, chemical analysis of material and all tests as specified must be carried out within the limits of the United States under supervision of a competent and disinterested inspector; in addition to which, provisions in § 79.500–18 (b) and (c) shall be carried out at the point of manufacture by a recognized inspection bureau with principal office in the United States.

(c) The terms "marked end" and "marked test pressure" used throughout this specification are defined as follows:

(1) "Marked end" is that end of the tank on which marks prescribed in § 79.500–17 are stamped.

(2) "Marked test pressure" is that pressure in pounds per square inch which is indicated by the figures substituted for the **** in the marking ICC—107A **** stamped on the marked end of tank.

(d) The gas pressure at 130 F in the tank shall not exceed 7/10 of the marked test pressure of the tank.

**§ 79.500–4 Thickness of wall.**

(a) Minimum thickness of wall of each finished tank shall be such that at a pressure equal to 7/10 of the marked test pressure of the tank, the calculated fiber stress in pounds per square inch at inner wall of tank multiplied by 3.0 will not exceed the tensile strength of any specimen taken from the tank and tested as prescribed in § 79.500–7(b). Minimum wall thickness shall be ¼ inch.

(b) Calculations to determine the maximum marked test pressure permitted to be marked on the tank shall be made by the formula:

$$P=\frac{10S(D^2-d^2)}{7(D^2+d^2)}$$

where:

$P$ = Maximum marked test pressure permitted;

$$S=\frac{U}{3.0}$$

where:

$U$ = Tensile strength of that specimen which shows the lower tensile strength of the two specimens taken from the tank and tested as prescribed in § 79.500–7(b).

3 = Factor of safety.

$\frac{D^2-d^2}{D^2+d^2}$ = The smaller value obtained for this factor by the operations specified in § 79.500–4(c).

(c) Measure at one end, in a plane perpendicular to the longitudinal axis of the tank and at least 18 inches from that end before necking-down:

$d$ = Maximum inside diameter (inches) for the location under consideration; to be determined by direct measurement to an accuracy of 0.05 inch.

$t$ = Minimum thickness of wall for the location under consideration; to be determined by direct measurement to an accuracy of 0.001 inch.

Take $D=d+2t$.

Calculate the value of $\frac{D^2-d^2}{D^2+d^2}$

(1) Make similar measurements and calculation for a corresponding location at the other end of the tank.

(2) Use the smaller result obtained, from the foregoing, in making calculations prescribed in paragraph (b) of this section.

**§ 79.500–5 Material.**

(a) Tanks shall be made from open-hearth or electric steel of uniform quality. Material shall be free from seams, cracks, laminations, or other defects injurious to finished tank. If not free from such defects, the surface may be machined or ground to eliminate these defects. Forgings and seamless tubing

for bodies of tanks shall be stamped with heat numbers.

(b) Steel (see Note 1) must conform to the following requirements as to chemical composition:

| Designation | Class I (percent) | Class II (percent) | Class III (percent) |
|---|---|---|---|
| Carbon, maximum | 0.50 | 0.50 | 0.53 |
| Manganese, maximum | 1.65 | 1.65 | 1.85 |
| Phosphorus, maximum | .05 | .05 | .05 |
| Sulphur, maximum | .06 | .05 | .05 |
| Silicon, maximum | .35 | .30 | .37 |
| Molybdenum, maximum | ---------- | .25 | .30 |
| Chromium, maximum | ---------- | .30 | .30 |
| Sum of manganese and carbon not over | 2.10 | 2.10 | ---------- |

NOTE 1: Alternate steel containing other alloying elements may be used if approved.

(1) For instructions as to the obtaining and checking of chemical analysis, see § 79.500–18(b)(3).

**§ 79.500–6 Heat treatment.**

(a) Each necked-down tank shall be uniformly heat treated. Heat treatment shall consist of annealing or normalizing and tempering for Class I, Class II and Class III steel or oil quenching and tempering for Class III steel. Tempering temperatures shall not be less than 1000° F. Heat treatment of alternate steels shall be approved. All scale shall be removed from outside of tank to an extent sufficient to allow proper inspection.

(b) To check uniformity of heat treatment, Brinnel hardness tests shall be made at 18 inch intervals on the entire longitudinal axis. The hardness shall not vary more than 35 points in the length of the tank. No hardness tests need be taken within 12 inches from point of head to shell tangency.

(c) A magnetic particle inspection shall be performed after heat treatment on all tanks subjected to a quench and temper treatment to detect the presence of quenching cracks. Cracks shall be removed to sound metal by grinding and the surface exposed shall be blended smoothly into the surrounding area. A wall thickness check shall then be made of the affected area by ultrasonic equipment or other suitable means acceptable to the inspector and if the remaining wall thickness is less than the minimum recorded thickness as determined by § 79.500–4(b) it shall be used for making the calculation prescribed in (b) of this section.

**§ 79.500–7 Physical tests.**

(a) Physical tests shall be made on 2 test specimens 0.505 inch in diameter within 2-inch gage length, taken 180 degrees apart, 1 from each ring section cut from each end of each forged or drawn tube before necking-down, or 1 from each prolongation at each end of each necked-down tank. These test specimen ring sections or prolongations shall be heat treated, with the necked-down tank which they represent. The width of the test specimen ring section must be at least its wall thickness. Only when diameters and wall thickness will not permit removal of 0.505 by 2-inch tensile test bar, laid in the transverse direction, may test bar cut in the longitudinal direction be substituted. When the thickness will not permit obtaining a 0.505 specimen, then the largest diameter specimen obtainable in the longitudinal direction shall be used. Specimens shall have bright surface and a reduced section. When 0.505 specimen is not used the gage length shall be a ratio of 4 to 1 length to diameter.

(b) Elastic limit as determined by extensometer, shall not exceed 70 percent of tensile strength for Class I steel or 85 percent of tensile strength for Class II and Class III steel. Determination shall be made at cross head speed of not more than 0.125 inch per minute with an extensometer reading to 0.0002 inch. The extensometer shall be read at increments of stress not exceeding 5,000 pounds per square inch. The stress at which the strain first exceeds

$$\frac{\text{Stress (pounds per square inch)}}{30{,}000{,}000\ \text{(pounds per square inch)}} \text{ plus } 0.005 \text{ (inches per inch)}$$

shall be recorded as the elastic limit.

(1) Elongation shall be at least 18 percent and reduction of area at least 35 percent.

NOTE 1: Upon approval, the ratio of elastic limit to ultimate strength may be raised to permit use of special alloy steels of definite composition that will give equal or better physical properties than steels herein specified.

**§ 79.500–8 Openings in tanks.**

(a) Each end shall be closed by a cover made of forged steel. Covers shall be secured to ends of tank by through bolts or studs not entering interior of tank. Covers shall be of a thickness sufficient to meet test requirements of § 79.500–12 and to compensate for the openings closed by attachments prescribed herein.

(1) It is also provided that each end may be closed by internal threading to accommodate an approved fitting. The internal threads as well as the threads on fittings for these openings shall be clean cut, even, without checks, and tapped to gage. Taper threads are required and shall be of a length not less than as specified for American Standard taper pipe threads. External threading of an approved type shall be permissible on the internal threaded ends.

(b) Joints between covers and ends and between cover and attachments shall be of approved form and made tight against vapor or liquid leakage by means of a confined gasket of suitable material.

**§ 79.500–9 Tank mounting.**

(a) For tank mounting, see § 79.10.

**§ 79.500–10 Protective housing.**

(a) Safety devices, and loading and unloading valves on tanks shall be protected from accidental injury by approved metal housing, arranged so it may be readily opened to permit inspection and adjustment of safety relief devices and valves, and securely locked in closed position. Housing shall be provided with opening having an opening equal to twice the total discharge area of safety relief device enclosed.

**§ 79.500–11 Loading and unloading valves.**

(a) Loading and unloading valve or valves shall be mounted on the cover or threaded into the marked end of tank. These valves shall be of approved type, made of metal not subject to rapid deterioration by lading or in service, and shall withstand without leakage a pressure equal to the marked test pressure of tank. Provision shall be made for closing service outlet of valves.

**§ 79.500–12 Safety relief devices.**

(a) Tank shall be equipped with one or more safety relief devices of approved type and discharge area, mounted on the cover or threaded into the non-marked end of the tank. If fittings are mounted on a cover, they shall be of the flanged type, made of metal not subject to rapid deterioration by lading or in service. Total flow capacity shall be such that, with tank filled with air at pressure equal to 70 percent of the marked test pressure of tank, flow capacity will be sufficient to reduce air pressure to 30 percent of the marked test pressure within 3 minutes after safety relief device opens.

(b) Safety safety devices shall open at pressure not exceeding the marked test pressure of tank and not less than 7/10 of marked test pressure. (For tolerance for safety relief valves, see § 79.500–16(a).)

(c) Cars used for the transportation of flammable gases shall have the safety devices equipped with an approved ignition device.

**§ 79.500–13 Fixtures.**

(a) Attachments, other than those mounted on tank covers or serving as threaded closures for the ends of the tank, are prohibited.

**§ 79.500–14 Test of tanks.**

(a) After heat-treatment, tanks shall be subjected to hydrostatic tests in a water jacket, or by other accurate method, operated so as to obtain reliable data. No tank shall have been subjected previously to internal pressure greater than 90 percent of the marked test pressure. Each tank shall be tested to a pressure at least equal to the marked test pressure of the tank. Pressure shall be maintained for 30 seconds, and sufficiently longer to insure complete expansion of tank. Pressure gage shall permit reading to accuracy of one percent. Expansion gage shall permit reading of total expansion to accuracy of one percent. Expansion shall be recorded in cubic centimeters.

(b) No leaks shall appear and permanent volumetric expansion shall not exceed 10 percent of the total volumetric expansion at test pressure.

**§ 79.500–15 Handling of tanks failing in tests.**

(a) Tanks rejected for failure in any of the tests prescribed may be reheat-treated, and will be acceptable if subsequent to reheat-treatment they are subjected to and pass all of the tests.

**§ 79.500–16 Tests of safety relief devices.**

(a) Safety relief valves shall be tested by air or gas before being put into service. Valve shall open at pressure not exceeding the marked test pressure of tank and shall be vapor-tight at 80 percent of the marked test pressure. These limiting pressures shall not be affected by any auxiliary closure or other combination.

(b) For safety relief devices of frangible disc type, samples of discs used shall burst at a pressure not exceeding the marked test pressure of tank and not less than 7/10 of marked test pressure.

**§ 79.500–17 Marking.**

(a) Each tank shall be plainly and permanently marked, thus certifying that tank complies with all requirements of this specification. These marks shall be stamped into the metal of necked-down section of tank at marked end, in letters and figures at least ¼ inch high, as follows:

(1) Spec. ICC–107A****, the **** to be replaced by figures indicating marked test pressure of the tank. This pressure shall not exceed the calculated maximum marked test pressure permitted, as determined by the formula in § 79.500–4(b).

(2) Serial number immediately below the stamped mark specified in paragraph (a)(1) of this section.

(3) Inspector's official mark immediately below the stamped mark specified in paragraph (a)(1) of this section.

(4) Name, mark (other than trademark), or initials of company or person for whose use tank is being made, which shall be recorded with the Bureau of Explosives.

(5) Date (such as 1–62, for January 1962) of tank test, so placed that dates of subsequent tests may easily be added thereto.

(6) Date (such as 1–62, for January 1962) of latest test of safety relief valve or of frangible disc, required only when tank is used for transportation of flammable gases.

(7) Name of gas for which tank car is being used, stenciled in letters at least 2 inches high on each side of car where they are clearly visible.

**§ 79.500–18 Inspection and reports.**

(a) Before a tank car is placed in service, the party assembling the completed car shall furnish to car owner, Bureau of Explosives, and the Secretary, Mechanical Division, Association of American Railroads, a report in proper form certifying that tanks and their equipment comply with all the requirements of this specification and including information as to serial numbers, dates of tests, and ownership marks on tanks mounted on car structure.

(b) Purchaser of tanks shall provide for inspection by a competent inspector as follows:

(1) Inspector shall carefully inspect all material and reject that not complying with § 79.500–5.

(2) Inspector shall stamp his official mark on each forging or seamless tube accepted by him for use in making tanks, and shall verify proper application of heat number to such material by occasional inspections at steel manufacturer's plant.

(3) Inspector shall obtain certified chemical analysis of each heat of material.

(4) Inspector shall make inspection of inside surface of tanks before necking-down, to insure that no seams, cracks, laminations, or other defects exist.

(5) Inspector shall fully verify compliance with specification, verify heat treatment of tank as proper; obtain samples for all tests and check chemical analyses; witness all tests; and report minimum thickness of tank wall, maximum inside diameter, and calculated value of D, for each end of each tank as prescribed in § 79.500–4(c).

(6) Inspector shall stamp his official mark on each accepted tank immediately below serial number, and make certified report (see paragraph (c) of this section) to builder, to company or person for whose use tanks are being made, to builder of car structure on which tanks are to be mounted, to the Bureau of Explosives, and to the Secretary, Mechanical Division, Association of American Railroads.

(c) Inspector's report required herein shall be in the following form:

(Place) ----------
(Date) ----------

STEEL TANKS

It is hereby certified that drawings were submitted for these tanks under AAR Application for Approval ---------- and approved by the AAR Committee on Tank Cars under date of ----------.
Built for ---------- Company
Location at ----------
Built by ---------- Company
Location at ----------
Consigned to ---------- Company
Location at ----------
Quantity ----------
Length (inches) ----------
Outside diameter (inches) ----------
Marks stamped into tank as required in § 79.500–17 are:

ICC–107A****

NOTE 1: The marked test pressure substituted for the **** on each tank is shown on Record of General Data on Tanks attached hereto.

Serial numbers ------- to ------- inclusive
Inspector's mark ----------
Owner's mark ----------
Test date ----------
Water capacity (see Record of Hydrostatic Tests).
Tare weights (yes or no) (see Record of Hydrostatic Tests).
These tanks were made by process of --------

Steel used was identified as indicated by the attached list showing the serial number of each tank, followed by the heat number. Steel used was verified as to chemical analysis and record thereof is attached hereto. Heat numbers were stamped into metal.

All material was inspected and each tank was inspected both before and after closing in ends; all material accepted was found free from seams, cracks, laminations, and other defects which might prove injurious to strength of tank. Processes of manufacture and heat-treatment of tanks were witnessed and found to be efficient and satisfactory.

Before necking-down ends, each tank was measured at each location prescribed in § 79.500–4(c) and minimum wall thickness in inches at each location was recorded; maximum inside diameter in inches at each location was recorded; value of D in inches at each location was calculated and recorded; maximum fiber stress in wall at location showing larger value for

$$\frac{D^2+d^2}{D^2-d^2}$$

was calculated for 7/10 the marked test pressure and recorded. Calculations were made by the formula:

$$S=0.7P\frac{(D^2+d^2)}{(D^2-d^2)}$$

Hydrostatic tests, tensile tests of material, and other tests as prescribed in this specification, were made in the presence of the inspector, and all material and tanks accepted were found to be in compliance with the requirements of this specification. Records thereof are attached hereto.

I hereby certify that all of these tanks proved satisfactory in every way and comply with the requirements of Interstate Commerce Commission Specification No. 107A****.

## Title 31—MONEY AND FINANCE: TREASURY

### Chapter II—Fiscal Service, Department of the Treasury

SUBCHAPTER B—BUREAU OF THE PUBLIC DEBT

### PART 306—GENERAL REGULATIONS WITH RESPECT TO UNITED STATES SECURITIES

### PART 315—REGULATIONS GOVERNING UNITED STATES SAVINGS BONDS

### PART 316—OFFERING OF UNITED STATES SAVINGS BONDS, SERIES E

### PART 321—PAYMENTS BY BANKS AND OTHER FINANCIAL INSTITUTIONS IN CONNECTION WITH THE REDEMPTION OF UNITED STATES SAVINGS BONDS

### PART 332—OFFERING OF UNITED STATES SAVINGS BONDS, SERIES H

On December 5, 1964, a notice of proposed rule making was published in the FEDERAL REGISTER (29 F.R. 16330) with respect to Treasury Department Circulars No. 300, Second Revision (31 CFR Part 306); No. 530, Eighth Revision, as amended (31 CFR Part 315); No. 653, Fifth Revision, as amended (31 CFR Part 316); No. 750, Revised, as amended (31 CFR Part 321); and No. 905, Second Revision, as amended (31 CFR Part 332). After consideration of such relevant matter as was presented by interested parties, certain editorial changes were made in all of the parts. However, no changes were made affecting substantive rights. The regulations, as revised or amended, were adopted on December 23, 1964.

As finally adopted, Parts 306, 315, 316, 321 and 332 read as set out below.

[SEAL] JOHN K. CARLOCK,
*Fiscal Assistant Secretary.*

DECEMBER 23, 1964.

## PART 306—GENERAL REGULATIONS WITH RESPECT TO UNITED STATES SECURITIES

Department Circular No. 300, Second Revision, dated April 19, 1963 (31 CFR Part 306), is hereby amended and issued as the Third Revision.

Subpart A—General Information

Sec.
306.0 Applicability of regulations.
306.1 Official agencies.
306.2 Definitions of words and terms as used in these regulations.
306.3 Transportation charges and risks in the shipment of securities.

Subpart B—Registration

306.10 General.
306.11 Forms of registration for transferable securities.
306.12 Errors in registration.
306.13 Nontransferable securities.

Subpart C—Transfers, Exchanges and Reissues

306.15 Transfers and exchanges of securities—closed periods.
306.16 Denominational exchanges of registered securities.
306.17 Exchanges of registered securities for coupon securities.
306.18 Exchanges of coupon securities for registered securities.
306.19 Denominational exchanges of coupon securities.
306.20 Reissue of registered transferable securities.
306.21 Reissue of nontransferable securities.
306.22 Exchange of Treasury Bonds, Investment Series B–1975–80.

Subpart D—Redemption or Payment

306.25 Presentation and surrender.
306.26 Redemption of registered securities at maturity, upon prior call, or for advance refunding.
306.27 Redemption of bearer securities at maturity, upon prior call, or for advance refunding.
306.28 Optional redemption of Treasury bonds at par (before maturity or call redemption date) and application of the proceeds in payment of Federal estate taxes.

Subpart E—Interest

306.35 Computation of interest.
306.36 Termination of interest.
306.37 Interest on registered securities.
306.38 Interest on bearer securities.

Subpart F—Assignments of Registered Securities—General

306.40 Execution of assignments or special endorsements.
306.41 Form of assignment.
306.42 Alterations and erasures.
306.43 Voidance of assignments.
306.44 Discrepancies in names.
306.45 Officers authorized to certify assignments.
306.46 Duties and responsibilities of certifying officer.
306.47 Evidence of certifying officer's authority.
306.48 Interested person not to act as certifying officer or witness.
306.49 Nontransferable securities.

Subpart G—Assignments by or in Behalf of Individuals

306.55 Signatures, minor errors and change of name.
306.56 Assignment of securities registered in the names of or assigned to two or more persons.
306.57 Minors and incompetents.
306.58 Nontransferable securities.

Subpart H—Assignments in Behalf of Estates of Deceased Owners

306.65 Special provisions applicable to small amounts of securities, interest checks or redemption checks.
306.66 Estates—administration.
306.67 Estates not administered.
306.68 Nontransferable securities.

Subpart I—Assignments by or in Behalf of Trustees and Similar Fiduciaries

306.75 Individual fiduciaries.
306.76 Fiduciaries acting as a unit.
306.77 Corepresentatives and fiduciaries.
306.78 Nontransferable securities.

Subpart J—Assignments in Behalf of Private or Public Organizations

306.85 Private corporations and unincorporated associations.
306.86 Change of name and succession of private organizations.
306.87 Partnerships.
306.88 Political entities and public corporations.
306.89 Public officers.
306.90 Nontransferable securities.

Subpart K—Attorneys in Fact

306.91 Attorneys in fact.
306.92 Nontransferable securities.

Subpart L—Transfer Through Judicial Proceedings

306.95 Transferable securities.
306.96 Evidence required.
306.97 Nontransferable securities.

Subpart M—Requests for Suspension of Transactions

306.100 Requests for suspension of transactions in securities.

Subpart N—Claims on Account of Loss, Theft, Destruction, Mutilation or Defacement of Securities

306.105 Statutory authority and requirements.
306.106 Reports of loss, theft, destruction, mutilation or defacement of securities.
306.107 Relief authorized for lost, stolen, destroyed, mutilated or defaced securities.
306.108 Type of relief granted.
306.109 Nontransferable securities.

Subpart O—Miscellaneous Provisions

306.115 Additional requirements.
306.116 Waiver of regulations.
306.117 Preservation of existing rights.
306.118 Supplements, amendments or revisions.

AUTHORITY: The provisions of this Part 306 issued under R.S. 3706, 40 Stat. 288, 290, 1309, 48 Stat. 343 and 50 Stat. 481; 31 U.S.C. 738a, 739, 752, 752a, 753, 754, 754a and 754b.

### Subpart A—General Information

#### § 306.0 Applicability of regulations.

These regulations apply to all United States transferable and nontransferable securities,[1] other than United States Savings Bonds, to the extent specified in these regulations, the offering circulars or special regulations governing such securities.

[1] Bonds and other securities issued by certain agencies of the United States and the former government of Puerto Rico are subject to these regulations, so far as applicable, under special arrangements with the issuing authorities. Information as to their application to any particular transaction in any designated security will be furnished by the Bureau of the Public Debt, Division of Loans and Currency, Washington, D.C., 20226, upon request.

#### § 306.1 Official agencies.

(a) *Subscriptions—tenders-bids.* Securities subject to these regulations are issued from time to time pursuant to public offerings by the Secretary of the Treasury, through the Federal Reserve Banks, fiscal agents of the United States, and the Treasurer of the United States. Only the Federal Reserve Banks and Branches and the Treasury Department are authorized to act as official agencies, and subscriptions for securities, tenders for Treasury bills, and bids, to the extent provided in the regulations governing the sale of Treasury bonds through competitive bidding, may be made direct to them; however, banking institutions may assist customers with their subscriptions, tenders or bids.

(b) *Transactions after issue.* The Bureau of the Public Debt, Treasury Department, is charged with matters relating to transactions in securities after original issue. Correspondence concerning such transactions and requests for appropriate forms may be addressed to (1) the Federal Reserve Bank or Branch of the District in which the correspondent is located, or (2) the Bureau of the Public Debt, Division of Loans and Currency, Washington, D.C., 20226, or (3) the Office of the Treasurer of the United States, Securities Division, Washington, D.C., 20220, except where specific instructions are otherwise given in these regulations. The addresses of the Federal Reserve Banks and Branches are:

Federal Reserve Bank of Boston, Boston, Mass., 02106.
Federal Reserve Bank of New York, New York, N.Y., 10045.
Buffalo Branch, Buffalo, N.Y., 14240.
Federal Reserve Bank of Philadelphia, Philadelphia, Pa., 19101.
Federal Reserve Bank of Cleveland, Cleveland, Ohio, 44101.
Cincinnati Branch, Cincinnati, Ohio, 45201.
Pittsburgh Branch, Pittsburgh, Pa., 15230.
Federal Reserve Bank of Richmond, Richmond, Va., 23213.
Baltimore Branch, Baltimore, Md., 21203.
Charlotte Branch, Charlotte, N.C., 28201.
Federal Reserve Bank of Atlanta, Atlanta, Ga., 30303.
Birmingham Branch, Birmingham, Ala., 35202.
Jacksonville Branch, Jacksonville, Fla., 32201.
Nashville Branch, Nashville, Tenn., 37203.
New Orleans Branch, New Orleans, La., 70160.
Federal Reserve Bank of Chicago, Post Office Box 834, Chicago, Ill., 60690.
Detroit Branch, Post Office Box 1059, Detroit, Mich., 48231.
Federal Reserve Bank of St. Louis, Post Office Box 442, St. Louis, Mo., 63166.
Little Rock Branch, Post Office Box 1261, Little Rock, Ark., 72203.
Louisville Branch, Post Office Box 899, Louisville, Ky., 40201.
Memphis Branch, Post Office Box 407, Memphis, Tenn., 38101.
Federal Reserve Bank of Minneapolis, Minneapolis, Minn., 55440.
Helena Branch, Helena, Mont., 59601.
Federal Reserve Bank of Kansas City, Kansas City, Mo., 64106.
Denver Branch, Denver, Colo., 80217.
Oklahoma City Branch, Oklahoma City, Okla., 73101.
Omaha Branch, Omaha, Nebr., 68102.
Federal Reserve Bank of Dallas, Station K, Dallas, Tex., 75222.
El Paso Branch, Post Office Box 100, El Paso, Tex., 79999
Houston Branch, Post Office Box 2578, Houston, Tex., 77001.
San Antonio Branch, Post Office Box 1471, San Antonio, Tex., 78206.
Federal Reserve Bank of San Francisco, San Francisco, Calif., 94120.
Los Angeles Branch, Post Office Box 2077, Los Angeles, Calif., 90054.
Portland Branch, Post Office Box 3456, Portland, Oreg., 97208.
Salt Lake City Branch, Post Office Box 780, Salt Lake City, Utah, 84110.
Seattle Branch, Post Office Box 3567, Seattle, Wash., 98124.

#### § 306.2 Definitions of words and terms as used in these regulations.

(a) "Advance refunding offer" is an offer to a holder of a security, in advance of its call or maturity, to exchange it for another security.

(b) "Bearer securities" are those which are payable on their face at maturity or call for redemption before maturity in accordance with their terms to "bearer," the ownership of which is not recorded. Title to such securities may pass by delivery without endorsement and without notice. "Coupon securities" are bearer securities which are issued with interest coupons attached.

(c) "Bureau" refers to the Bureau of the Public Debt, Division of Loans and Currency, Washington, D.C., 20226.

(d) "Call date" or "date of call" is the date fixed in the official notice of call published in the FEDERAL REGISTER as the date on which the obligor will make payment of the security before maturity in accordance with its terms.

(e) "Court" means one which has jurisdiction over the parties and the subject matter.

(f) "Department" refers to the Treasury Department.

(g) "Face maturity date" is the payment date specified in the text of a security.

(h) "Incompetent" refers to a person under any legal disability except minority.

(i) "Joint owner" and "joint ownership" refer to any permitted form of ownership by two or more persons.

(j) "Nontransferable securities" are those issued only in registered form which according to their terms are payable only to the registered owners or recognized successors in title to the extent and in the manner provided in the offering circulars or special applicable regulations.

(k) "Payment" and "redemption," unless otherwise indicated by the context, are used interchangeably for payment at maturity or payment before maturity pursuant to a call for redemption in accordance with the terms of the securities.

(l) "Redemption-exchange" is any authorized redemption of securities for the purpose of applying the proceeds in payment for other securities offered in exchange.

(m) "Registered securities" refers to securities payable on their face at maturity or call for redemption before maturity in accordance with their terms to the persons whose names are inscribed thereon.

(n) "Securities assigned in blank" or "securities so assigned as to become, in effect, payable to bearer" refers to registered securities which are assigned by the owner or his authorized representative without designating the assignee. Registered securities assigned simply to "The Secretary of the Treasury" or in the case of Treasury Bonds, Investment Series B–1975–80, to "The Secretary of the Treasury for exchange for the current Series EA or EO Treasury notes" are considered to be so assigned as to become, in effect, payable to bearer.

(o) "Taxpayer identifying number" means the appropriate identifying number as required on tax returns and other documents submitted to the Internal Revenue Service, i.e., an individual's social security account number or an employer identification number. A social security account number is composed of nine digits separated by two hyphens, for example, 123-45-6789; an employer identification number is composed of nine digits separated by one hyphen, for example, 12-3456789. The hyphens are an essential part of the numbers and must be included.

(p) "Transferable securities," which may be in either registered or bearer form, refers to securities which may be sold on the market and transfer of title accomplished by assignment and delivery if in registered form, or by delivery only if in bearer form.

(q) "Treasurer's Office" refers to the Office of the Treasurer of the United States, Securities Division, Washington, D.C., 20220.

(r) "Treasury securities," "Treasury bonds," "Treasury notes," "Treasury certificates of indebtedness," and "Treasury bills," or simply "securities," "bonds," "notes," "certificates" and "bills," unless otherwise indicated by the context, refer only to transferable securities.

#### § 306.3 Transportation charges and risks in the shipment of securities.

The following rules will govern transportation to, from and between the Treasury Department and the Federal Reserve Banks and Branches of securities issued on or presented for authorized transactions:

(a) The securities may be presented or received by the owners or their agents in person.

(b) Securities issued on original issue, unless delivered in person, will be delivered by registered mail or by other means at the risk and expense of the United States.

(c) The United States will assume the risk and expense of any transportation of securities which may be necessary between the Federal Reserve Banks and Branches and the Treasury.

(d) Securities submitted for any transaction after original issue, if not presented in person, must be forwarded at the owner's risk and expense.

(e) Bearer securities issued on transactions other than original issue will be delivered by registered mail, covered by insurance, at the owner's risk and expense, unless called for in person by the owner or his agent. Registered securities issued on such transactions will be

delivered by registered mail at the risk of, but without expense to, the registered owner. Should delivery by other means be desired, advance arrangements should be made with the official agency to which the original securities were presented.

## Subpart B—Registration

### § 306.10 General.

The registration used must express the actual ownership of a security, and may not include any restriction on the authority of the owner to dispose of it in any manner, except as otherwise specifically provided in these regulations. The Treasury Department reserves the right to treat the registration as conclusive of ownership. Requests for registration should be clear, accurate, and complete, conform with one of the forms set forth in this subpart, and include appropriate taxpayer identifying numbers.[2] The registration of all bonds owned by the same person, organization, or fiduciary should be uniform with respect to the name of the owner and, in the case of a fiduciary, the description of the fiduciary capacity. Individual owners should be designated by the names by which they are ordinarily known or under which they do business, preferably including at least one full given name. The name of an individual may be preceded by any applicable title, such as "Dr." or "Rev.," or followed by "M.D.," "D.D." or other similar designation. "Sr." or "Jr." or any other similar suffix should be included when ordinarily used or when necessary to distinguish the owner from a member of his familiy. The name of a woman must be preceded by "Miss" or "Mrs.," unless some other applicable title or designation is used. A married woman's own given name, not that of her husband, must be used, for example, "Mrs. Mary A. Jones," NOT "Mrs. Frank B. Jones." The address should include, where appropriate, the number and street, route, or any other local feature and the ZIP Code.

### § 306.11 Forms of registration for transferable securities.

The forms of registration described below are authorized for transferable securities:

(a) *Natural persons in their own right.* In the names of natural persons who are not under any legal disability, in their own right, substantially as follows:

(1) *One person.* In the name of one individual. Examples:

John A. Doe (123–45–6789).
Mrs. Mary C. Doe (123–45–6789).
Miss Elizabeth Jane Doe (123–45–6789).

An individual who is sole proprietor of a business conducted under a trade name may include a reference to the trade name. Examples:

John A. Doe, doing business as Doe's Home Appliance Store (12–3456789);
or
John A. Doe (123–45–6789), d/b/a Doe's Home Appliance Store.

(2) *Two or more persons—general.* Securities will not be registered in the name of one person payable on death to another, or in any form which purports to authorize transfer by less than all the persons named in the registration (or all the survivors).[3] Securities will not be registered in the forms "John A. Doe and Mrs. Mary C. Doe, or either of them" or "William C. Doe or Henry J. Doe, or either of them" and securities so assigned will be treated as though the words "or either of them" do not appear in the assignments. The taxpayer identifying number of any of the joint owners may be shown on securities registered in joint ownership form. However, if such owners are husband and wife, the husband's number should be shown. If the joint owners are a minor and an adult, the adult's number should be shown.

(i) *With right of survivorship.* In the names of two or more individuals with right of survivorship. Examples:

John A. Doe (123–45–6789) or Mrs. Mary C. Doe or the survivor.
Mrs. Mary C. Doe and John A. Doe (123–45–6789) or the survivor.
John A. Doe (123–45–6789) or Mrs. Mary C. Doe or Miss Mary Ann Doe or the survivors or survivor.
John A. Doe (123–45–6789) or Mrs. Mary C. Doe.
John A. Doe (123–45–6789) and Mrs. Mary C. Doe.

(ii) *Without right of survivorship.* In the names of two or more individuals in such manner as to preclude the right of survivorship. Examples:

John A. Doe (123–45–6789) and William B. Doe as tenants in common.
John A. Jones as natural guardian of Henry B. Jones, a minor, or Robert C. Jones (123–45–6789), without right of survivorship.

(b) *Minors and incompetents.*—(1) *Natural guardians of minors.* A security may be registered in the name of a natural guardian of a minor for whose estate no legal guardian or similar representative has legally qualified. Example:

John R. Jones as natural guardian of Henry M. Jones, a minor (123–45–6789).

(2) *Custodian under statute authorizing gifts to minors.* A security may be purchased as a gift to a minor under a gifts to minors statute in effect in a state in which either the donor or the minor resides, in which case the security should be registered as provided in the statute, with the addition of a parenthetical reference identifying the statute if the registration does not clearly identify it. Examples:

William C. Jones, as custodian for John A. Smith, a minor (123–45–6789) under the California Uniform Gifts to Minors Act.
Robert C. Smith, as custodian for Henry L. Brown, a minor (123–45–6789), under the laws of Georgia (Ch. 48–3, Code of Ga. Anno.)

(3) *Incompetents not under guardianship.* Registration in the form "John A. Brown, an incompetent (123–45–6789), under voluntary guardianship," is permitted only on reissue after a voluntary guardian has qualified for the purpose of collecting interest. (See §§ 306.37(c)(2) and 306.57(c)(2).) Otherwise, registration in the name of an incompetent not under legal guardianship is not authorized.

(c) *Executors, administrators, guardians and similar representatives or fiduciaries.* A security may be registered in the names of legally qualified executors, administrators, guardians, conservators or similar representatives or fiduciaries of a single estate. The names and capacities of all the representatives or fiduciaries, as shown in their letters of appointment, must be included in the registration and must be followed by an adequate identifying reference to the estate. Examples:

John Smith, executor of the will (or administrator of the estate) of Henry J. Jones, deceased (12–3456789).
William C. Jones, guardian (or conservator, etc.) of the estate of James D. Brown, a minor (or an incompetent) (123–45–6789).

(d) *Private trust estates.* A security may be registered in the name and title of the trustee or trustees of a single duly constituted private trust, followed by an adequate identifying reference to the authority governing the trust. Examples:

John Jones and Blank Trust Co., Albany, N.Y., trustees under the will of Sarah Jones, deceased (12–3456789).
John Doe and Richard Roe, trustees under agreement with Henry Jones dated February 9, 1950 (12–3456789).

The names of all trustees, in the form used in the trust instrument, must be included in the registration, except as follows:

(1) If there are several trustees designated as a board or authorized to act as a unit, their names should be omitted and the words "Board of Trustees" should be substituted for the word "trustees." Example:

Board of Trustees of Blank Co. Retirement Fund under collective bargaining agreement dated June 30, 1950 (12–3456789).

(2) If the trustees do not constitute a board or otherwise act as a unit, and are either too numerous to be designated in the inscription by names and title, or serve for limited terms, some or all of the names may be omitted. Examples:

John Smith, Henry Jones, et al., trustees under the will of Henry J. Smith, deceased (12–3456789).
Trustees under the will of Henry J. Smith, deceased (12–3456789).
Trustees of Retirement Fund of Industrial Manufacturing Co., under directors' resolution of June 30, 1950 (12–3456789).

(e) *Private organizations (corporations, unincorporated associations and partnerships).* A security may be registered in the name of any private corporation, unincorporated association or partnership. The full legal name of the organization, as set forth in its charter, articles of incorporation, constitution, partnership agreement or other authority from which its powers are derived, must be included in the registration, and may be followed, if desired, by a parenthetical reference to a particular account or fund other than a trust fund, in accordance with the rules and examples given below:

(1) *A corporation.* The name of a business, fraternal, religious or other private corporation must be followed by descriptive words indicating the corporate status unless the term "corporation" or the abbreviation "Inc." is part of the name or the name is that of a corporation or association organized under Federal law, such as a National bank or Federal savings and loan association. Examples:

Smith Manufacturing Co., a corp. (12–3456789).
The Standard Manufacturing Corp. (12–3456789).
Jones & Brown, Inc. (12–3456789) (Depreciation Account).
First National Bank of ---------- (12–3456789).

(2) *An unincorporated association.* The name of a lodge, club, labor union, veterans' organization, religious society or similar self-governing organization which is not incorporated (whether or not it is chartered by or affiliated with a parent organization which is incorporated) must be followed by the words "an unincorporated association." Examples:

American Legion Post No. ------, Department of the District of Columbia, an unincorporated assn. (12–3456789).
Local Union No. 100, Brotherhood of Locomotive Engineers, an unincorporated association (12–3456789).

Securities should not be registered in the name of an unincorporated association if the legal title to its property in general, or the legal title to the funds with which the securities are to be purchased, is held by trustees. In such a case the securities should be registered in the title of the trustees in accordance with paragraph (d) of this section. The term "unincorporated association" should not be used to describe a trust fund, a partnership or a business conducted under a trade name.

(3) *A partnership.* The name of a partnership must be followed by the words "a partnership." Examples:

Smith & Brown, a partnership (12–3456789).
Acme Novelty Co., a limited partnership 12–3456789).

(f) *States, public bodies and corporations and public officers.* A security may be registered in the name of a State or county, city, town, village, school district or other political entity, public body or corporation established by law (including a board, commission, administration, authority or agency) which is the owner or official custodian of public funds, other than trust funds, or in the full legal title of the public officer having custody. Examples:

State of Maine
Town of Rye, N.Y.
Maryland State Highway Commission
Treasurer, City of Springfield, Ill.
Treasurer of Rhode Island (State Forestry Fund)

(g) *States, public officers, corporations or bodies as trustees.* A security may be registered in the title of a public officer or in the name of a State or county, a public corporation or public body acting as trustee under express authority of law, followed by appropriate reference to the statute creating the trust. Examples:

Insurance Commissioner of Pennsylvania, trustee for the benefit of the policyholders of the Blank Insurance Co. (12–3456789), under Sec. ------, Pennsylvania statutes.
Rhode Island Sinking Fund Commission, trustee of the General Sinking Fund under Chapter 35, General Laws of Rhode Island.

### § 306.12 Errors in registration.

If an erroneously inscribed security is received it should not be altered in any respect, but the Bureau, a Federal Reserve Bank or Branch, or the Treasurer's Office should be furnished full particulars concerning the error and asked to furnish instructions.

### § 306.13 Nontransferable securities.

Upon authorized reissue, Treasury Bonds, Investment Series B–1975–80, may be registered in the forms set forth in § 306.11.

## Subpart C—Transfers, Exchanges and Reissues

### § 306.15 Transfers and exchanges of securities—closed periods.

(a) *General.* The transfer of registered securities should be made by assignment in accordance with subpart F of this part. Transferable registered securities are eligible for denominational exchange and exchange for bearer securities. Bearer securities are eligible for denominational exchange, and when so provided in the offering circular, are eligible for exchange for registered securities. Specific instructions for issuance and delivery of the new securities, signed by the owner or his authorized representative, must accompany the securities presented. (Form PD 1642, 1643, 1644, or 1827, as appropriate, may be used.) Denominational exchanges, exchanges of Treasury Bonds, Investment Series B–1975–80, for the current series of EA or EO 1½ percent 5-year Treasury notes, and optional redemption of bonds at par as provided in § 306.28 may be made at any time. Securities presented for transfer or for exchange for bearer securities of the same issue must be received by the Bureau not less than one full month before the date on which the securities mature or become redeemable pursuant to a call for redemption before maturity, and any security so presented which is received too late to comply with this provision will be accepted for payment only.

(b) *Closing of transfer books.* The transfer books are closed for one full month preceding interest payment dates and call or maturity dates. If the date set for closing of the transfer books falls on Saturday, Sunday or a legal holiday, the books will be closed as of the close of business on the last business day preceding that date. If registered securities which have not matured or been called are received by the Bureau for transfer, reissue, or exchange for coupon securities, or coupon securities which have not matured or been called are received for exchange for registered securities during the time the books for that loan are closed, the transaction will not be completed until the first business day following the date on which interest falls due, when such books are reopened. If registered securities are received for transfer or exchange for bearer securities, or coupon securities are received for exchange for registered securities, during the time the books are closed for payment of final interest at maturity or call, unless otherwise provided in the offering circular or notice of call, the following action will be taken:

(1) Payment of final interest will be made to the registered owner of record on the date the books were closed.

(2) Payment of principal will be made to (i) the assignee under a proper assignment of the securities, or (ii) if the securities have been assigned for exchange for bearer securities, to the registered owner of record on the date the books were closed.

### § 306.16 Denominational exchanges of registered securities.

No assignment will be required for the authorized exchange of registered securities for like securities in the same names in other authorized denominations.

### § 306.17 Exchanges of registered securities for coupon securities.

Registered securities submitted for exchange for coupon securities should be assigned to "The Secretary of the Treasury for exchange for coupon securities to be delivered to (inserting the name and address of the person to whom delivery of the coupon securities is to be made)." Assignments to "The Secretary of the Treasury for exchange for coupon securities," or assignments in blank will also be accepted. The coupon securities issued upon exchange will have all unmatured coupons attached.

[2] Taxpayer identifying numbers are not required for foreign governments, nonresident aliens not engaged in trade or business within the United States, or international organizations and foreign corporations not engaged in trade or business and not having an office or place of business or a financial or paying agent within the United States, and such other persons or organizations as may be exempted from furnishing such numbers under regulations of the Internal Revenue Service.

[3] Warning: Difference between transferable Treasury securities registered in the names of two or more persons and United States savings bonds in coownership form. The effect of registering Treasury securities to which these regulations apply in the names of two or more persons differs decidedly from registration of savings bonds in coownership form. Savings bonds are virtually redeemable on demand at the option of either coowner on his signature alone. Transferable Treasury securities are redeemable only at maturity or upon prior call by the Secretary of the Treasury. Accordingly, if cash is needed before such time, it can be realized only by sale on the market. This involves a transfer of ownership which can be accomplished only upon proper assignment by or in behalf of all owners.

**§ 306.18 Exchanges of coupon securities for registered securities.**

Coupon securities presented for exchange for registered securities should have all matured interest coupons detached. All unmatured coupons should be attached, except that if presented when the transfer books are closed (in which case the exchange will be effected on or after the date on which the books are reopened), the next maturing coupons should be detached and held for collection in ordinary course when due. If any coupons which should be attached are missing, the securities must be accompanied by a remittance in an amount equal to the face amount of the missing coupons. The new registered securities will bear interest from the interest payment date next preceding the date on which the exchange is made.

**§ 306.19 Denominational exchanges of coupon securities.**

All matured interest coupons and all unmatured coupons likely to mature before an exchange can be completed should be detached from securities presented for denominational exchange. All unmatured coupons should be attached. If any are missing, the securities must be accompanied by a remittance in an amount equal to the face amount of the missing coupons. The new coupon securities will have all unmatured coupons attached.

**§ 306.20 Reissue of registered transferable securities.**

Assignments are not required for reissue of registered transferable securities in the name(s) of (a) the surviving joint owner(s) of securities registered in the names of or assigned to two or more persons, unless the registration or assignment includes words which preclude the right of survivorship, (b) a succeeding fiduciary or other lawful successor, (c) an individual, corporation or unincorporated association whose name has been legally changed, (d) a corporation or unincorporated association which is the lawful successor to another corporation or unincorporated association, and (e) a successor in title to a public officer or body. Evidence of survivorship, succession, or change of name, as appropriate, must be furnished. The appropriate taxpayer identifying number also must be furnished if the registration of the securities submitted does not include such number for the person(s) or organization to be named on the reissued securities.

**§ 306.21 Reissue of nontransferable securities.**

(a) *Treasury Bonds, Investment Series A–1965.* Bonds of this series may be reissued only when (1) the name of an owner has been changed, (2) the trustees in whose names the bonds are registered have been succeeded by other trustees, and (3) the corporation, unincorporated association or fund in whose name the bonds are registered has been succeeded by another corporation or unincorporated association or fund, by operation of law or otherwise, whereby the business or activities of the original organization or fund are continued without substantial change in the successor. Bonds presented for reissue must be accompanied by pertinent evidence and an appropriate request for reissue. (Form PD 2168 should be used.)

(b) *Treasury Bonds, Investment Series B–1975–80.* Bonds of this series may be reissued only in the names of (1) lawful successors in title, (2) the legal representatives or distributees of a deceased owner's estate, or the distributees of a trust estate, and (3) State supervisory authorities in pursuance of any pledge required of the owner under State law, or upon termination of the pledge in the names of the pledgors or their successors. Bonds presented for reissue must be accompanied by evidence of entitlement.

**§ 306.22 Exchange of Treasury Bonds, Investment Series B–1975–80.**

Bonds of this series presented for exchange for 1½ percent 5-year Treasury notes must bear duly executed assignments to "The Secretary of the Treasury for exchange for the current series of EA or EO Treasury notes to be delivered to (inserting the name and address of the person to whom the notes are to be delivered)." The notes will bear the April 1 or October 1 date next preceding the date the bonds, duly assigned with supporting evidence, if necessary, are received by the Bureau or a Federal Reserve Bank or Branch. Interest accrued at the rate of 2¾ percent on the bonds surrendered from the next preceding interest payment date to the date of exchange will be credited, and interest at the rate of 1½ percent on the notes for the same period will be charged and the difference will be paid to the owner.

## Subpart D—Redemption or Payment

**§ 306.25 Presentation and surrender.**

(a) *General.* Securities, whether in registered or bearer form, are payable in regular course of business at maturity unless called for redemption before maturity in accordance with their terms, in which case they will be payable in regular course of business on the date of call. The Secretary of the Treasury may provide for the exchange of maturing or called securities, or in advance of call or maturity, may afford owners the opportunity of exchanging a security for another security pursuant to an advance refunding offer. Registered securities should be presented and surrendered for redemption to the Bureau, a Federal Reserve Bank or Branch, or the Treasurer's Office, and bearer securities to a Federal Reserve Bank or Branch or the Treasurer's Office.[4] If securities are registered in the name of, or assigned to (1) a state or other political entity, (2) a corporation, or (3) a board, committee or other body authorized to act as a unit and which is the fiduciary of a public or private trust estate, no evidence will be required in support of an assignment by an officer of the registered owner or assignee for redemption for its account. Under the same circumstances, no evidence will be required for an assignment for redemption-exchange, or exchange pursuant to an advance refunding offer, if the new securities are to be registered exactly the same as the registration or assignment of the securities surrendered. To the extent appropriate, these rules also apply to securities registered in the title of a public officer who is the official custodian of public funds.

(b) *"Overdue" securities.* If a bearer security or a registered security assigned in blank, or to bearer or so assigned as to become, in effect, payable to bearer, is presented and surrendered for redemption after it has become overdue, the Secretary of the Treasury may require satisfactory proof of ownership. (Form PD 1071 may be used.) A security shall be considered to be overdue after the lapse of the following periods of time from its face maturity:

(1) One year for Treasury bonds.

(2) Six months for Treasury notes and certificates of indebtedness.

(3) Three months for Treausry bills.

(4) Other securities:

(i) One year for securities issued for a term of five years or longer.

(ii) Six months for securities issued for a term of one year or more but less than five years.

(iii) Three months for securities issued for a term of less than one year.

**§ 306.26 Redemption of registered securities at maturity, upon prior call, or for advance refunding.**

Registered securities presented and surrendered for redemption at maturity or pursuant to a call for redemption before maturity should be assigned to "The Secretary of the Treasury for redemption," unless the assignor desires that payment be made to some other person, in which case the assignments should be made to "The Secretary of the Treasury for redemption for the account of (inserting name and address of person to whom payment is to be made)." Assignments in blank or other assignments having a similar effect will be accepted but specific instructions for the issuance and delivery of the redemption check, signed by the owner or his authorized representative, must accompany the securities, unless included in the assignment. (Form PD 1705 may be used.) Payment of the principal will be made either (a) by check drawn on the Treasurer of the United States to the order of the person entitled and mailed in accordance with the instructions received, or (b) upon appropriate request, by crediting the amount in a member bank's account with the Federal Reserve Bank of its district. Securities presented for advance refunding should be assigned as provided in the advance refunding offer.

**§ 306.27 Redemption of bearer securities at maturity, upon prior call, or for advance refunding.**

All interest coupons due and payable on or before the date of maturity or date fixed in the call for redemption before maturity should be detached from coupon securities presented for redemption and should be collected separately in regular course. All coupons bearing dates subsequent to a date fixed in a call for redemption, or an offer of advance refunding, should be left attached to the securities. If any such coupons are missing the full face amount thereof will be deducted from the payment to be made upon redemption or the advance refunding adjustment unless satisfactory evidence of their destruction is submitted. Any amounts so deducted will be held in the Department to provide for adjustments or refunds in the event that the missing coupons should be subsequently presented or their destruction is later satisfactorily established. In the absence of other instructions, payment of bearer securities will be made by check drawn to the order of the person presenting and surrendering the securities and mailed to him at his address, as given in the advice which should accompany the securities. (Form PD 1704 may be used.) A Federal Reserve Bank, upon appropriate request, may make payment to a member bank from which bearer securities are received by crediting the amount in the member bank's account.

**§ 306.28 Optional redemption of Treasury bonds at par (before maturity or call redemption date) and application of the proceeds in payment of Federal estate taxes.**

(a) *General.* All Treasury bonds to be redeemed at par for the purpose of applying the proceeds to payment of Federal estate taxes on a decedent's estate[5] must be presented and surrendered to a Federal Reserve Bank or Branch or the Bureau. They should be accompanied by Form PD 1782, fully completed and duly executed in accordance with the instructions on the form, and evidence as described therein. Redemption will be made at par plus accrued interest from the last preceding interest payment date to the date of redemption, except that if registered bonds are received by a Federal Reserve Bank or Branch or the Bureau within one month preceding an interest payment date for redemption before that date a deduction will be made for interest from the date of redemption to the interest payment date, and a check for the full six months' interest will be paid in due course. The proceeds of redemption will be deposited to the credit of the District Director, Internal Revenue Service, designated in Form PD 1782, the representative of the estate will be notified of the deposit, and the District Director will forward a formal receipt.

(b) *Conditions.* The bonds presented for redemption under this section must have (1) been owned by the decedent at the time of his death and (2) thereupon constituted part of his estate, as determined by the following rules in the case of joint ownership, partnership and trust holdings:

(i) *Joint ownerships.* Bonds held by the decedent at the time of his death in joint ownership with another person or persons will be deemed to have met the above conditions either (*a*) to the extent to which the bonds actually became the property of the decedent's estate, or (*b*) in an amount not to exceed the amount of the Federal estate taxes which the surviving joint owner or owners are required to pay on account of such bonds and other jointly-held property.[6]

(ii) *Partnerships.* Bonds held at the time of the decedent's death by a partnership in which he had an interest will be deemed to have met the above conditions to the extent of his fractional share of the bonds so held proportionate to his interest in the assets of the partnership.

(iii) *Trusts.* Bonds held in trust at the time of the decedent's death will be deemed to have met the above conditions in an amount not to exceed the amount of the Federal estate taxes if (a) the trust actually terminated in favor of the decedent's estate, or (b) the trustee as such is required to pay the decedent's Federal estate taxes under the terms of the trust instrument or otherwise, or (c) the debts of the decedent's estate, including costs of administration, State inheritance and Federal estate taxes, exceeds the assets of his estate without regard to the trust estate.

(c) *Transactions after owner's death.* No transactions involving changes of ownership may be conducted after an owner's death without affecting the eligibility of the bonds for redemption at par for application of the proceeds to payment of Federal estate taxes. Transactions, involving no changes of ownership, which may be conducted without affecting eligibility are (1) exchange of bonds for those of lower denominations where the bonds exceed the amount of the taxes and are not in the lowest authorized denominations, (2) exchange of registered bonds for coupon bonds, (3) exchange of coupon bonds for bonds registered in the names of the representatives of the estate, and (4) transfer to the names of the representatives of the owner's estate. However, any such transactions must be explained on Form PD 1782 or in a supplemental statement.

## Subpart E—Interest

**§ 306.35 Computation of interest.**

The interest on Treasury securities accrues and is payable on a semiannual basis unless otherwise provided in the circular offering them for sale or exchange. If the period of accrual is an exact six months, the interest accrual is an exact one-half year's interest, without regard to the number of days in the period. If the period of accrual is less than an exact six months, the accrued interest is computed by determining the daily rate of accrual on the basis of the exact number of days in the full interest period and multiplying the daily rate by the exact number of days in the fractional period for which interest has actually accrued. A full interest period does not include the day as of which the securities were issued or the day on which the last preceding interest became due, but does include the day on which the next succeeding interest payment is due. A fractional part of an interest period does not include the day as of which the securities were issued or the day on which the last preceding interest payment became due, but does include the day as of which the transaction terminating the accrual of interest is effected. The 29th of February in a leap year is included whenever it falls within either a full interest period or a fractional part thereof.[7]

**§ 306.36 Termination of interest.**

Securities will cease to bear interest on the date of their maturity unless they have been called for redemption before maturity in accordance with their terms, in which case they will cease to bear interest on the date of call.

**§ 306.37 Interest on registered securities.**

(a) *Method of payment.* The interest on registered securities is payable by checks drawn on the Treasurer of the United States to the order of the registered owners, except as otherwise provided herein. Interest checks are prepared by the Department in advance of the interest payment date and are ordinarily mailed in time to reach the addressees on that date. Interest on a registered security which has not matured or been called and which is presented for any transaction during the period the books for that loan are closed will be paid by check drawn to the order of the registered owner of record. Upon receipt of notice of the death or incompetency of an individual named as registered owner, a change in the name or in the status of a partnership, corporation or unincorporated association, the removal, resignation, succession or death of a fiduciary or trustee, delivery of interest checks will be withheld pending receipt and approval of evidence showing who is entitled to receive the interest checks. If the inscriptions on securities do not clearly identify the owners delivery of interest checks will be withheld pending reissue of the securities in the correct registration. The final installment of interest, unless otherwise provided in the offering circular or notice of call, will be paid by check drawn to the order of the registered owner of record

[4] See § 306.28 for presentation and surrender of securities eligible for use in payment of Federal estate taxes.

[5] Certain issues of Treasury bonds are redeemable at par and accrued interest upon the death of the owner, at the option of the representative of, or if none, the persons entitled to, his estate, for the purpose of having the entire proceeds applied in payment of the Federal estate taxes on the decedent's estate, in accordance with the terms of the offering circulars cited on the face of the bonds. A current list of eligible issues may be obtained from any Federal Reserve Bank or Branch, the Bureau of the Public Debt, or the Treasurer's Office.

[6] Substantially the same rule applies to community property except that upon the death of either spouse bonds which constitute part of the community estate are deemed to meet the required conditions to the extent of one-half of each loan and issue of bonds.

[7] The Appendix to the regulations in this part contains a complete explanation of the method of computing interest on a semiannual basis on Treasury bonds, notes and certificates of indebtedness, and an outline of the method of computing the discount rates on Treasury bills. Also included are tables of computation of interest on quarterly and annual bases.

and mailed in advance of the interest payment date in time to reach the addressee on or about that date.[5] Interest on securities presented for advance refunding will be adjusted as provided in the advance refunding offer.

(b) *Change of address.* To assure timely delivery of interest checks, owners should promptly notify the Bureau of any change of address. (Form PD 345 may be used.) The notification must be signed by the registered owner or a joint owner or an authorized representative, and should show the old and new addresses, the serial number and denomination of each security, the titles of the securities (for example 3¼-percent Treasury Bonds of 1978–83, dated May 1, 1953), and the registration of each security. Notifications by attorneys in fact, trustees or by the legal representatives of the estates of deceased, incompetent or minor owners should be supported by proof of their authority, unless in the case of trustees or legal representatives, they are named in the registration.

(c) *Collection of interest checks*—(1) *General.* Interest checks may be collected in accordance with the regulations governing the endorsement and payment of Government warrants and checks, which are contained in Department Circular No. 21, Revised, as amended. (Part 360 of this chapter.)

(2) *By voluntary guardians of incompetents.* Interest checks drawn to the order of a person who has become incompetent and for whose estate no legal guardian or similar representative has been appointed should be returned to the Bureau with a full explanation of the circumstances. For collection of interest, the Department will recognize the relative responsible for the incompetent's care and support or some other person as voluntary guardian for the incompetent. (Application may be made on Form PD 1461.)

(d) *Nonreceipt, loss, theft or destruction of interest checks.* If an interest check is not received within a reasonable period after an interest payment date the Bureau should be notified. Should a check be lost, stolen, or destroyed after receipt, the Office of the Treasurer of the United States, Check Claims Division, Washington, D.C., 20226, should be notified. Notification should include the name and address of the owner, the serial number, denomination and titles of the security upon which the interest was payable. If the check is subsequently received or recovered the latter office should also be advised.

**§ 306.38 Interest on bearer securities.**

Unless the offering circular and notice of call provide otherwise, interest on coupon securities is payable in regular course of business upon presentation and surrender of the interest coupons as they mature. Such coupons are payable at any Federal Reserve Bank or Branch, or the Treasurer's Office.[6] Interest on Treasury bills, and any other bearer securities which may be sold and issued on a discount basis and which are payable at par at maturity, is represented by the difference between the purchase price and the par value, and no coupons are attached.

[5] The final instalment of interest on securities which matured or were called before the effective date of these regulations will be paid with the principal upon presentation of the securities unless otherwise provided in the offering circular or notice of call. See § 306.15(b) for presentation of securities during periods transfer books are closed.

## Subpart F—Assignments of Registered Securities—General

**§ 306.40 Execution of assignments or special endorsements.**

(a) *Execution of assignments.* The assignment of a registered security should be executed by the owner or his authorized representative in the presence of an officer authorized to certify assignments. All assignments must be made on the backs of the securities, unless otherwise authorized by the Bureau, a Federal Reserve Bank or Branch, or the Treasurer of the United States. An assignment by mark (X) must be witnessed not only by a certifying officer but also by at least one other person, who should add an endorsement substantially as follows: "Witness to signature by mark," followed by his signature and address.

(b) *Special endorsements in lieu of assignments.* A security may be presented without assignment for any authorized transaction by a financial institution which is (1) a member of the Federal Reserve System, (2) a member of the Federal Home Loan Bank System, or (3) insured by the Federal Deposit Insurance Corporation, provided full instructions are furnished as to the transaction desired and the security bears the endorsement, under the official seal of the institution, as follows:

Presented in accordance with instructions of the owner(s).
Absence of assignment guaranteed.

---
(Name of financial institution)

By ---
(Signature and title of officer)

This form of endorsement will be an unconditional guarantee to the Treasury Department that the institution is acting as attorney in fact for the owner(s) of the security under proper authorization and that the officer is duly authorized to act.

**§ 306.41 Form of assignment.**

Registered securities may be assigned in blank, to bearer, to a specified transferee, to the Secretary of the Treasury for exchange for coupon securities, or to the Secretary of the Treasury for redemption or for exchange for other securities offered at maturity, upon call or pursuant to an advance refunding offer. Assignments to "The Secretary of the Treasury," "The Secretary of the Treasury for transfer," or "The Secretary of the Treasury for exchange" will not be accepted, unless supplemented by specific instructions by or in behalf of the owner.

[6] Banking institutions will usually cash the coupons without charge as an accommodation to their customers.

**§ 306.42 Alterations and erasures.**

If an alteration or erasure has been made in an assignment, the assignor should appear before an authorized certifying officer and execute a new assignment to the same assignee. If the new assignment is to other than the assignee whose name has been altered or erased, a disclaimer from the first-named assignee should be obtained. Otherwise, an affidavit of explanation by the person responsible for the alteration or erasure should be submitted for consideration.

**§ 306.43 Voidance of assignments.**

An assignment of a security to or for the account of another person, not completed by delivery, may be voided by a disclaimer of interest from that person. The disclaimer should be executed in the presence of an officer authorized to certify assignments of securities. Unless otherwise authorized by the Bureau, a Federal Reserve Bank or Branch, or the Treasurer of the United States, the disclaimer must be written, typed or stamped on the back of the security in substantially the following form:

The undersigned as assignee of this security hereby disclaims any interest herein.

---
(Signature)

I certify that the above-named person as described, whose identity is well known or proved to me, personally appeared before me the ---------- day of ----------
(Month and year)
at ---------- and signed the
(Place)
above disclaimer of interest.
[SEAL]

---
(Signature and official designation of certifying officer)

In the absence of a disclaimer, an affidavit or affidavits should be submitted for consideration explaining why a disclaimer cannot be obtained, reciting all other material facts and circumstances relating to the transaction, including whether or not the security was delivered to the person named as assignee and whether or not the affiants know of any basis for the assignee claiming any right, title or interest in the security.

After an assignment has been voided, in order to dispose of the security, an assignment by or on behalf of the owner will be required.

**§ 306.44 Discrepancies in names.**

The Department will ordinarily require an explanation of discrepancies in the names which appear in inscriptions, assignments, supporting evidence or in the signatures to any assignments. (Form PD 385 may be used for this purpose.) However, where the variations in the name of the registered owner, as inscribed on securities of the same or different issues, are such that both may properly represent the same person, for example, "J. T. Smith" and "John T. Smith," no proof of identity will be required if the assignments are signed exactly as the securities are inscribed and are duly certified by the same certifying officer.

**§ 306.45 Officers authorized to certify assignments.**

(a) *Officers authorized generally.* Officers authorized to certify assignments include:

(1) Officers and employees of banks and trusts companies chartered by or incorporated under the laws of the United States or those of any State, Commonwealth or Territory of the United States, and Federal Savings and Loan Associations or other organizations which are members of the Federal Home Loan Bank System, who have been authorized to (i) generally bind their respective institutions by their acts, (ii) unqualifiedly guarantee signatures to assignments of securities, or (iii) expressly certify assignments of securities.

(2) Officers of Federal Reserve Banks and Branches.

(3) Officers of Federal Land Banks, Federal Intermediate Credit Banks and Banks for Cooperatives, the Central Bank for Cooperatives, and Federal Home Loan Banks.

(4) United States Attorneys, Collectors of Customs, and Regional Commissioners and District Directors, Internal Revenue Service.

(5) Judges and Clerks of United States Courts.

(b) *Authorized officers in foreign countries.* The following officers are authorized to certify assignments in foreign countries:

(1) United States diplomatic or consular representatives.

(2) Managers, assistant managers and other officers of foreign branches of banks or trust companies chartered by or incorporated under the laws of the United States or any State, Commonwealth or Territory of the United States.

(3) Notaries public and other officers authorized to administer oaths. The official position and authority of any such officer must be certified by a United States diplomatic or consular representative under seal of his office.

(c) *Officers having limited authority.* The following officers are authorized to certify assignments to the extent set forth in connection with each class of officers:

(1) Postmasters, acting postmasters, assistant postmasters, inspectors-in-charge, chief and assistant chief accountants, and superintendents of stations of any post office, notaries public and justices of the peace in the United States, its territories and possessions, the Commonwealth of Puerto Rico and the Canal Zone, but only for assignment of securities for redemption for the account of the assignor, or for redemption-exchange, or pursuant to an advance refunding offer for other securities to be registered in his name, or in his name with a joint owner. The signature of any post office official, other than a postmaster, must be in the following form: "John A. Doe, Postmaster, by Richard B. Roe, Superintendent of Station."

(2) Commissioned officers and warrant officers of the Armed Forces of the United States for assignments of securities of any class for any authorized transaction, but only with respect to assignments executed by (i) Armed Forces personnel and civilian field employees, and (ii) members of the families of such personnel or civilian employees.

(d) *Special provisions for certifying assignments.* The Commissioner of the Public Debt, the Chief of the Division of Loans and Currency, any Federal Reserve Bank or Branch, or the Treasurer of the United States, is authorized to make special provision for any case or class of cases.

**§ 306.46 Duties and responsibilities of certifying officer.**

A certifying officer must require execution of an assignment, or a form with respect to securities, in his presence after he has established the identity of the assignor and before he certifies the signature. He must then complete the certification. An employee who is not an officer should insert "Authorized signature" in the space provided for the title. However, an assignment of a security need not be executed in the presence of the certifying officer if he unqualifiedly guarantees the signature thereto, in which case he must place his endorsement on the security, following the signature, in the form "Signature guaranteed, First National Bank of Jonesville, Jonesville, N.H., by A. B. Doe, Preisdent." The certifying officer and, if he is an officer or employee of an organization, the organization will be held responsible for any loss the United States may suffer as the result of his fault or negligence.

**§ 306.47 Evidence of certifying officer's authority.**

The authority of an individual to act as a certifying officer is established by affixing to the certification of an assignment, or a form with respect to securities, or an unqualified guarantee of a signature to an assignment, either (a) the official seal of the organization, or (b) a legible imprint of the issuing agent's stamp, if the organization is an authorized issuing agent for United States Savings Bonds of Series E. Use of such stamp shall result in the same responsibility on the part of the organization as if its official seal were used. If the certifying officer does not have access to the seal or issuing agent's dating stamp, his authority to act as a certifying officer must be certified, under official seal or stamp, to the Bureau by an officer having access to the organization's records and will be recognized until evidence is received that his authority has been terminated. (Form PD 835–2 may be used.) Any post office official must use the official stamp of his office. A commissioned or warrant officer of any of the armed forces of the United States should indicate his rank and state that the person executing the assignment is one of the class whose signature he is authorized to certify. A judge or clerk of court must use the seal of the court. Any other certifying officer must use his official seal or stamp, if any, but, if he has neither, his official position and a specimen of his signature must be certified by some other authorized officer under official seal or stamp or otherwise proved to the satisfaction of the Department.

**§ 306.48 Interested person not to act as certifying officer or witness.**

Neither the assignor, the assignee, nor any person having an interest in a security may act as a certifying officer, or as a witness to an assignment by mark. However, a bank officer may certify an assignment to the bank, or an assignment executed by another officer in its behalf.

**§ 306.49 Nontransferable securities.**

The provisions of this subpart, so far as applicable, govern transactions in Treasury Bonds, Investment Series B–1975–80.

## Subpart G—Assignments by or in Behalf of Individuals

**§ 306.55 Signatures, minor errors and change of name.**

The owner's signature to an assignment should be in the form in which the security is inscribed or assigned, unless such inscription or assignment is incorrect or the name has since been changed. In case of a change of name, the signature to the assignment should show both names and the manner in which the change was made, for example, "John Young, changed by order of court from Hans Jung." Evidence of the change will be required. However, no evidence is required to support an assignment if the change resulted from marriage and the signature, which must be duly certified by an authorized officer, is written to show that fact, for example, "Mrs. Mary J. Brown, changed by marriage from Miss Mary Jones."

**§ 306.56 Assignment of securities registered in the names of or assigned to two or more persons.**

(a) *For transfer or exchange.* Securities registered in the names of or assigned to two or more persons may be transferred or exchanged during the lives of all the joint owners only upon assignments by all or in their behalf by authorized representatives. Upon proof of the death of one, the Department will accept an assignment by or in behalf of the survivor or survivors, unless the registration or assignment includes words which preclude the right of survivorship. In the latter case, in addition to assignment by or in behalf of the survivor or survivors, an assignment in behalf of the decedent's estate will be required.

(b) *For advance refunding exchanges.* Securities registered in the names of or assigned to two or more persons, whether jointly or in the alternative, may be assigned by one where the securities to be received in exchange are to be registered in the same names and form. If bearer securities or securities in a different form are to be issued, all persons named must assign, except that in case of death paragraph (a) of this section shall apply.

(c) *For redemption or redemption-exchange*—(1) *Alternative registration or assignment.* Securities registered in the names of or assigned to two or more persons in the alternative, for example, "John B. Smith or Mrs. Mary J. Smith" or "John B. Smith or Mrs. Mary J. Smith or the survivor," may be assigned by one of them at maturity or upon call, for

redemption or redemption-exchange, for his own account or otherwise, whether or not the other joint owner or owners are deceased.

(2) *Joint registration or assignment.* Securities registered in the names of or assigned to two or more persons jointly, for example, "John B. Smith and Mrs. Mary J. Smith," "John B. Smith and Mrs. Mary J. Smith or the survivor," or "John B. Smith and Mrs. Mary J. Smith as tenants in common," may be assigned by one of them during the lives of all only for (i) redemption at maturity or upon call, and then only for redemption for the account of all, or (ii) redemption-exchange for securities to be registered in their names in the same form as appears in the registration or assignment of the securities surrendered. Upon proof of the death of one of the joint owners, the survivor or survivors may assign securities so registered or assigned for redemption or redemption-exchange for any account, except that, if the words "as tenants in common" or other words which preclude the right of survivorship appear in the registration or assignment, assignment in behalf of the decedent's estate also will be required.

### § 306.57 Minors and incompetents.

(a) *Assignments of securities registered in name of minor*—(1) *By minor.* Securities registered in the name of a minor for whose estate no guardian or similar representative is legally qualified, may be assigned by the minor at maturity or call for redemption if the total face amount of the matured or called securities so registered does not exceed $500, and if the minor, in the opinion of the certifying officer, is of sufficient competency to execute the assignments and understand the nature of the transaction.

(2) *By natural guardian.* Securities registered in the name of a minor for whose estate no legal guardian or similar representative has qualified may be assigned by the natural guardian upon qualification. (Form PD 2481 may be used for this purpose.)

(b) *Assignments of securities registered in name of natural guardian of minor.* Securities registered in the name of a natural guardian of a minor may be assigned by the natural guardian for any authorized transaction except one for the apparent benefit of the natural guardian. If the natural guardian in whose name the securities are registered is deceased or is no longer qualified to act as natural guardian, the securities may be assigned by the person then acting as natural guardian. The assignment by the new natural guardian should be supported by proof of the death or disqualification of the former natural guardian and by evidence of his own status as natural guardian. (Form PD 2481 may be used for this purpose.) No assignment by a natural guardian will be accepted after receipt of notice of the minor's attainment of majority, removal of his disability of minority, disqualification of the natural guardian to act as such, qualification of a legal guardian or similar representative, or the death of the minor.

(c) *Assignments by voluntary guardians of incompetents.* Registered securities belonging to an incompetent for whose estate no legal guardian or similar representative is legally qualified may be assigned by the relative responsible for his care and support or some other person as voluntary guardian:

(1) For redemption or exchange for bearer securities, if the proceeds of the securities are needed to pay expenses already incurred, or to be incurred during any 90-day period, for the care and support of the incompetent or his legal dependents and the total face amount of such securities for which redemption or exchange is requested does not exceed $1,000.

(2) For redemption-exchange, if the securities are matured or have been called, or pursuant to an advance refunding offer, for reinvestment in other securities to be registered in the form "A, an incompetent (123–45–6789) under voluntary guardianship."

An application on Form PD 1461 by the person seeking authority to act as voluntary guardian will be required.

(d) *Assignments by legal guardians of minors or incompetents.* Securities registered in the name and title of the legal guardian or similar representative of the estate of a minor or incompetent may be assigned by the representative for any authorized transaction without proof of his qualification. Assignments by a representative of any other securities belonging to a minor or incompetent must be supported by properly certified evidence of qualification. The evidence must be dated not more than one year before the date of the assignments and must contain a statement showing the appointment is in full force unless it shows the appointment was made not more than one year before the date of the assignment or the representative or a corepresentative is a corporation. An assignment by the representative will not be accepted after receipt of notice of termination of the guardianship, except for transfer to the former ward.

### § 306.58 Nontransferable securities.

The provisions of this subpart, so far as applicable, govern transactions in Treasury Bonds, Investment Series B–1975–80.

## Subpart H—Assignments in Behalf of Estates of Deceased Owners

### § 306.65 Special provisions applicable to small amounts of securities, interest checks or redemption checks.

Entitlement to, or the authority to dispose of, a small amount of securities and checks issued in payment thereof or in payment of interest thereon, belonging to the estate of a decedent, may be established through the use of certain short forms, according to the aggregate amount of securities and checks involved (excluding checks representing interest on the securities), as indicated by the following table:

| Amount | Circumstances | Form | To be executed by— |
|---|---|---|---|
| $100 | No administration | PD 2216 | Person who paid burial expenses. |
| $500 | Estate being administered | PD 2488 | Executor or administrator. |
| $500 | Estate settled | PD 2458–1 | Former executor or administrator, attorney or other qualified person. |

### § 306.66 Estates—administration.

(a) *Temporary or special administrators.* Temporary or special administrators may assign securities for any authorized transaction within the scope of their authority. The assignments must be supported by:

(1) *Temporary administrators.* A certificate, under court seal, showing the appointment in full force within thirty days preceding the date of receipt of the securities.

(2) *Special administrators.* A certificate, under court seal, showing the appointment in full force within six months preceding the date of receipt of the securities.

Authority for assignments for transactions not within the scope of appointment must be established by a duly certified copy of a special order of court.

(b) *In course of administration.* A security belonging to the estate of a decedent which is being administered by a duly qualified executor or general administrator will be accepted for any authorized transaction upon assignment by such representative. (See § 306.77.) Unless the security is registered in the name of and shows the capacity of the representative, the assignment must be supported by a certificate or a copy of the letters of appointment, certified under court seal. The certificate or certification, if required, must be dated and not more than six months before the date of the assignment and must contain a statement that the appointment is in full force, unless (1) it shows the appointment was made not more than one year before the date of the assignment, or (2) the representative or a corepresentative is a corporation, or (3) redemption is being made for application of the proceeds in payment of Federal estate taxes as provided by § 306.28.

(c) *After settlement through court proceedings.* Securities belonging to the estate of a decedent which has been settled in court will be accepted for any authorized transaction upon assignments by the person or persons entitled, as determined by the court. The assignments should be supported by a copy, certified under court seal, of the decree of distribution, the representative's final account as approved by the court, or other pertinent court records.

### § 306.67 Estates not administered.

(a) *Special provisions under State laws.* If, under State law, a person has been recognized or appointed to receive or distribute the assets of a decedent's estate without regular administration, his assignment of securities belonging to the estate will be accepted provided he submits appropriate evidence of his authority.

(b) *Agreement of persons entitled.* When it appears that no legal representative of a decedent's estate has been or is to be appointed, securities belonging to the estate may be duly disposed of pursuant to an agreement and assignment by all persons entitled to share in the decedent's personal estate. (Form PD 1646 may be used.) However, all debts of the decedent and his estate must be paid or provided for and the interests of any minors or incompetents must be protected.

### § 306.68 Nontransferable securities.

The provisions of this subpart, so far as applicable, govern transactions in Treasury Bonds, Investment Series B–1975–80.

## Subpart I—Assignments by or in Behalf of Trustees and Similar Fiduciaries

### § 306.75 Individual fiduciaries.

Securities registered in, or assigned to, the names and titles of individual fiduciaries will be accepted for any authorized transaction upon assignment by the designated fiduciaries without proof of their qualification. If the fiduciaries in whose names the securities are registered, or to whom they have been assigned, have been succeeded by other fiduciaries, evidence of successorship must be furnished. If the appointment of a successor is not required under the terms of the trust instrument or otherwise and is not contemplated, assignments by the surviving or remaining fiduciary or fiduciaries must be supported by appropriate proof. This requires (a) proof of the death, resignation, removal or disqualification of the former fiduciary and (b) evidence that the surviving or remaining fiduciary or fiduciaries are fully qualified to administer the fiduciary estate, which may be in the form of a certificate by them showing the appointment of a successor has not been applied for, is not contemplated and is not necessary under the terms of the trust instrument or otherwise. Assignments of securities registered in the titles, without the names of the fiduciaries, for example, "Trustees of the George E. White Memorial Scholarship Fund under deed of trust dated 11/10/40, executed by John W. White," must be supported by proof that the assignors are the qualified and acting trustees of the designated trust estate, unless they are empowered to act as a unit in which case the provisions of § 306.76 shall apply. (Form PD 2446 may be used to furnish proof of incumbency of fiduciaries.) Assignments by fiduciaries of securities not registered or assigned in such manner as to show that they belong to the estate for which the assignors are acting must also be supported by evidence that the estate is entitled to the securities.

### § 306.76 Fiduciaries acting as a unit.

Securities registered in the name of or assigned to a board, committee or other body authorized to act as a unit for any public or private trust estate may be assigned for any authorized transaction by anyone authorized to act in behalf of such body. Except as otherwise provided in this section, the assignments must be supported by a copy of a resolution adopted by the body, properly certified under its seal, or, if none, sworn to by a member of the body having access to its records. (Form PD 2495 may be used.) If the person assigning is designated in the resolution by title only, his incumbency must be duly certified by another member of the body. (Form PD 2446 may be used.) If the fiduciaries of any trust estate are empowered to act as a unit, although not designated as a board, committee or other body, securities registered in their names or assigned to them as such, or in their titles without their names, may be assigned by anyone authorized by the group to act in its behalf. Such assignments may be supported by a sworn copy of a resolution adopted by the group in accordance with the terms of the trust instrument, and proof of their authority to act as a unit may be required. As an alternative, assignments by all the fiduciaries, supported by proof of their incumbency if not named on the securities, will be accepted.

### § 306.77 Corepresentatives and fiduciaries.

If there are two or more executors, administrators, guardians or similar representatives, or trustees of an estate, all must unite in the assignment of any securities belonging to the estate. However, when a statute, a decree of court, or the instrument under which the representatives or fiduciaries are acting provides otherwise, assignments in accordance with their authority will be accepted. If the securities have matured or been called and are submitted for redemption for the account of all, or for redemption-exchange or pursuant to an advance refunding offer and the securities offered in exchange are to be registered in the names of all, only one representative or fiduciary need execute the assignment.

### § 306.78 Nontransferable securities.

The provisions of this subpart, so far as applicable, govern assignments of Treasury Bonds, Investment Series B–1975–80.

## Subpart J—Assignments in Behalf of Private or Public Organizations

### § 306.85 Private corporations and unincorporated associations.

Securities registered in the name of, or assigned to, an unincorporated association, or a private corporation in its own right or in a representative or fiduciary capacity, may be assigned in its behalf for any authorized transaction by any duly authorized officer or officers. Evidence, in the form of a resolution of the governing body, authorizing the assigning officer to assign, or to sell, or to otherwise dispose of the securities will ordinarily be required to support assignments. Resolutions may relate to any or all registered securities owned by the organization or held by it in a representative or fiduciary capacity. (Form PD 1010, or any substantially similar form, may be used when the authority relates to specific securities; Form PD 1011, or any substantially similar form, may be used for securities generally.) If the officer or officers derive their authority from the charter, constitution or by-laws, a copy or a pertinent extract therefrom, properly certified, will be required in lieu of a resolution. If the resolution or other supporting document shows the title of an authorized officer, without his name, it must be supplemented by a certificate of incumbency. (Form PD 1014 may be used.)

### § 306.86 Change of name and succession of private organizations.

If a private corporation or unincorporated association changes its name or is lawfully succeeded by another corporation or unincorporated association, its securities may be assigned in behalf of the organization in its new name or that of its successor by an authorized officer in accordance with § 306.85. The assignment must be supported by evidence of the change of name or successorship.

### § 306.87 Partnerships.

An assignment of a security registered in the name of or assigned to a partnership must be executed by a general partner. Upon dissolution of a partnership, assignment by all living partners and by the persons entitled to assign in behalf of any deceased partner's estate will be required unless the laws of the jurisdiction authorize a general partner to bind the partnership by any act appropriate for winding up partnership affairs. In those cases where assignments by or in behalf of all partners are required this fact must be shown in the assignment; otherwise, an affidavit by a former general partner must be furnished identifying all the persons who had been partners immediately prior to dissolution. Upon voluntary dissolution, for any jurisdiction where a general partner may not act in winding up partnership affairs, an assignment by a liquidating partner, as such, must be supported by a duly executed agreement among the partners appointing the liquidating partner.

### § 306.88 Political entities and public corporations.

Securities registered in the name of, or assigned to, a State, county, city, town, village, school district or other political entity, public body or corporation, may be assigned by a duly authorized officer, supported by evidence of his authority.

### § 306.89 Public officers.

Securities registered in the name of, or assigned to, a public officer designated by title may be assigned by such officer, supported by evidence of incumbency. Assignments for the officer's own apparent individual benefit will not be recognized.

### § 306.90 Nontransferable securities.

The provisions of this subpart apply to Treasury Bonds, Investment Series B–1975–80.

## Subpart K—Attorneys in Fact

### § 306.91 Attorneys in fact.

(a) *General.* (1) Assignments by an attorney in fact will be recognized if supported by an adequate power of attorney. Every power must be executed in the presence of an authorized certifying officer under the conditions set out in § 306.45 for certification of assignments. Powers need not be submitted in support of assignments for redemption-exchange or exchanges pursuant to advance refunding offers where the securities to be issued are to be registered in the same names and forms as appear in the inscriptions or assignments of the securities surrendered, and such securities are registered in the names of or assigned to (i) corporations, unincorporated associations, lodges, societies, or similar organizations, or their legal successors, or (ii) individuals, and the assignments are executed on their behalf by corporate attorneys in fact. In all other cases, the original power, or a photocopy showing the grantor's autograph signature, properly certified, must be submitted, together with the security assigned on the owner's behalf by the attorney in fact.

(2) An assignment by a substituted attorney in fact must be supported by an authorizing power of attorney and power of substitution. An assignment by an attorney in fact or a substitute attorney in fact for the apparent benefit of either will not be accepted unless expressly authorized. (Form PD 1001, 1002, 1003, or 1004, as appropriate, may be used to appoint an attorney in fact. An attorney in fact may use Form PD 1006 or 1008 to appoint a substitute. However, any form sufficient in substance may be used.)

(3) If there are two or more joint attorneys in fact or substitutes, all must unite in an assignment. However, less than all may assign if the power authorizes less than all to act, or the assignment is for redemption for the account of the owner, or for redemption-exchange or pursuant to an advance refunding offer and the new securities are to be registered in the owner's name. A power of attorney or of substitution not coupled with an interest will be recognized until the Bureau receives proof of revocation or proof of the grantor's death or incompetency.

(b) *For legal representatives and fiduciaries.* Assignments by an attorney in fact or substitute attorney in fact for a legal representative or fiduciary, in addition to the power of attorney and of substitution, must be supported by evidence, if any, as required by §§ 306.57(d), 306.66(b), 306.75, and 306.76. Powers must specifically designate the securities to be assigned.

(c) *For corporation or unincorporated association.* Assignments by an attorney in fact or a substitute attorney in fact in behalf of a corporation or unincorporated association, in addition to the power of attorney and power of substitution, must be supported by one of the following documents certified under seal of the organization, or, if it has no seal, sworn to by an officer who has access to the records:

(1) A copy of the resolution of the governing body authorizing an officer to appoint an attorney in fact, with power of substitution if pertinent, to assign, or to sell, or to otherwise dispose of, the securities, or

(2) A copy of the charter, constitution or bylaws, or a pertinent extract therefrom, showing the authority of an officer to appoint an attorney in fact, or

(3) A copy of the resolution of the governing body directly appointing an attorney in fact.

If the resolution or other supporting document shows only the title of the authorized officer, without his name, a certificate of incumbency must also be furnished. (Form PD 1014 may be used.) The power may not be broader than the resolution or other authority.

(d) *For public corporations.* A general power of attorney in behalf of a public corporation will be recognized only if it is authorized by statute.

### § 306.92 Nontransferable securities.

The provisions of this subpart shall apply to nontransferable securities, subject only to the limitations imposed by the terms of the particular issues.

## Subpart L—Transfer Through Judicial Proceedings

### § 306.95 Transferable securities.

The Department will recognize valid judicial proceedings affecting the ownership of or interest in transferable securities, upon presentation of the securities together with evidence of the proceedings. In the case of securities registered in the names of two or more persons, the extent of their respective interests in the securities must be determined by the court in proceedings to which they are parties or must otherwise be validly established.[10]

### § 306.96 Evidence required.

Copies of a final judgment, decree or order of court and of any necessary supplementary proceedings must be submitted. Assignments by a trustee in bankruptcy or a receiver of an insolvent's estate must be supported by evidence of his qualification. Assignments by a receiver in equity or a similar court officer must be supported by a copy of an order authorizing him to assign, or to sell, or to otherwise dispose of, the securities. Where the documents are dated more than six months prior to presentation of the securities, there must also be submitted a certificate dated within six months of presentation of the securities, showing the judgment, decree or order, or evidence of qualification, is in full force. Any such evidence must be certified under court seal.

[10] A finder claiming the ownership of a bearer security or a registered security assigned in blank or so assigned as to become, in effect, payable to bearer, must perfect his title in accordance with the provisions of State law. If there are no such provisions, the Department will not recognize his title to the security.

### § 306.97 Nontransferable securities.

(a) *Treasury Bonds, Investment Series A–1965.* The provisions of this subpart shall apply to bonds of this series, except that reference to assignments shall be deemed only to refer to requests for payment. With the exception of a trustee in bankruptcy or a receiver of an insolvent's estate, payment will be limited to the redemption value current thirty days after termination of the judicial proceedings or current at the time the bonds are surrendered for redemption, whichever is less. No judicial proceedings will be recognized if they would give effect to an attempted voluntary transfer inter vivos of the bonds.

(b) *Treasury Bonds, Investment Series B–1975–80.* The provisions of this subpart shall apply to bonds of this series, except that prior to maturity any reference to assignments shall be deemed to refer to assignments of the bonds for exchange for the current series of 1½ percent 5-year EA or EO Treasury notes.

## Subpart M—Requests for Suspension of Transactions

### § 306.100 Requests for suspension of transactions in securities.

(a) *Registered securities—(1) Reports of loss, theft or destruction of registered securities.* Reports of lost, stolen or destroyed registered securities not so assigned as to become, in effect, payable to bearer, will be accepted from the owner or his authorized agent at any time and records will be maintained of the reports. If such a registered security is presented to the Department, the owner will be duly advised and given all available information.

(2) *Reports of assignments affected by fraud.* The Department reserves the right to suspend any transaction in a registered security bearing an apparently valid assignment, if prior to the time it is received in the Department a report is received from and a claim is filed by an assignor that his assignment was affected by fraud. The interested parties will be notified of the suspension and given a reasonable period of time within which to effect settlement by agreement or institute judicial proceedings. If subsequent to the time the Department has transferred, exchanged or redeemed a registered security in reliance on an apparently valid assignment, a report or claim is received that the assignment was affected by fraud, the Department will undertake only to furnish all available information.

(3) *Reports of forged assignments.* If it is claimed that the assignment of a registered security is a forgery, the Department will investigate the matter and if it is established that the assignment was forged and the owner did not authorize or ratify the assignment, or receive any benefits therefrom, the Department will recognize his ownership and grant appropriate relief.

(b) *Bearer securities or registered securities so assigned as to become, in effect, payable to bearer—(1) Securities not overdue.* Neither the Department nor any of its agents will accept notice of any claim or of pending judicial proceedings by any person for the purpose of suspending transactions in bearer securities, or registered securities so assigned as to become, in effect, payable to bearer which are not overdue as defined in § 306.25.[11] However, if the securities are received and retired, the Department will undertake to notify persons who appear to be entitled to any available information concerning the source from which the securities were received.

(2) *Overdue securities.* Reports that bearer securities, or registered securities so assigned as to become, in effect, payable to bearer, were lost, stolen or possibly destroyed *after* they became overdue as defined in § 306.25 will be accepted by the Bureau for the purpose of suspending redemption of the securities if the claimant establishes his interest. If the securities are presented, their redemption will be suspended and the presenter and the claimant will each be given an opportunity to establish ownership.

## Subpart N—Claims on Account of Loss, Theft, Destruction, Mutilation or Defacement of Securities

### § 306.105 Statutory authority and requirements.

Section 8 of the Act of July 8, 1937 (50 Stat. 481), as amended (31 U.S.C. 738a), provides for relief, under certain conditions, on account of the loss, theft, destruction, mutilation or defacement of United States interest-bearing securities. To obtain relief the security must be fully identified and the pertinent facts proved to the satisfaction of the Secretary of the Treasury, and generally, a bond of indemnity in such form and with such surety, sureties or security as may be required to protect the interests of the United States, must be filed.

### § 306.106 Reports of loss, theft, destruction, mutilation or defacement of securities.

(a) *Loss or theft.* Report of the loss or theft of a security should be made promptly to the Bureau. The report should include:

(1) The name and present address of the owner, and his address at the time the security was issued, and, if the report is made by any other person, the capacity in which he represents the owner;

(2) The identification of the security by title of loan, issue date, interest rate, serial number and denomination, and in the case of a registered security, the exact form of inscription and a full description of any assignment, endorsement or other writing thereon; and

(3) A statement of the circumstances.

(b) *Destruction, mutilation or defacement.* If a security is destroyed, or becomes so mutilated or defaced as to impair its value to the owner, a report of the circumstances, as outlined in paragraph (a) of this section, must be made to the Bureau. All available portions of the mutilated or defaced security must also be submitted. In any appropriate case, a form for use in applying for relief will be furnished.

### § 306.107 Relief authorized for lost, stolen, destroyed, mutilated or defaced securities.

(a) *Registered securities.* Relief is authorized for a registered security not assigned in blank or not so assigned as to become, in effect, payable to bearer, when it has been established that the security has been lost, stolen, destroyed, mutilated or defaced. Relief is available in the same manner for bearer securities restrictively endorsed in accordance with the provisions of Department Circular No. 853, current revision (Part 328 of this chapter).

(b) *Bearer securities or registered securities so assigned as to become, in effect, payable to bearer.* Relief is authorized for bearer securities and registered securities so assigned as to become, in effect, payable to bearer, proved to have been destroyed, mutilated or defaced. Relief will also be granted for such securities if they were lost or stolen under such circumstances and have been missing for such period of time after they have matured or become redeemable pursuant to a call for redemption as in the judgment of the Secretary of the Treasury establishes that they (1) have been destroyed or have become irretrievably lost, (2) are not held by any person as his own property and (3) will never become the basis of a valid claim against the United States.

(c) *Interest coupons.* Relief is authorized for interest coupons if it is established they were attached to a security at the time they were destroyed, mutilated or defaced.

### § 306.108 Type of relief granted.

When relief is granted for a lost, stolen, destroyed, mutilated or defaced security, it will be in the form of either (a) a substitute security marked "Duplicate," bearing the same issue date and showing the serial number of the original security, if the security for which relief is being granted has not matured or become redeemable pursuant to a call for redemption before maturity in accordance with its terms, or (b) payment, if the security has matured or become redeemable pursuant to a call. When a substitute is issued to replace a destroyed, mutilated or defaced coupon security it will have attached all coupons corresponding to those proved to have been attached thereto at the time of the mishap, except that any matured coupons will not be attached but will be paid by check. Relief will not be granted in any case before the expiration of six months from date of loss or theft.

### § 306.109 Nontransferable securities.

The provisions of this subpart shall apply to all nontransferable securities, other than United States Savings Bonds, subject only to the limitations imposed by the terms of the particular issues.

## Subpart O—Miscellaneous Provisions

### § 306.115 Additional requirements.

In any case or any class of cases arising under these regulations the Secretary of the Treasury may require such additional evidence and a bond of indemnity with or without surety, as may in his judgment be necessary for the protection of the interests of the United States.

### § 306.116 Waiver of regulations.

The Secretary of the Treasury reserves the right, in his discretion, to waive or modify any provision or provisions of these regulations in any particular case or class of cases for the convenience of the United States or in order to relieve any person or persons of unnecessary hardship, if such action is not inconsistent with law, does not impair any existing rights, and he is satisfied that such action would not subject the United States to any substantial expense or liability.

### § 306.117 Preservation of existing rights.

Nothing contained in these regulations shall limit or restrict existing rights which holders of securities heretofore issued may have acquired under the circulars offering such securities for sale or under the regulations in force at the time of acquisition.

### § 306.118 Supplements, amendments or revisions.

The Secretary of the Treasury may at any time, or from time to time, prescribe additional, supplemental, amendatory or revised regulations with respect to United States securities.

## Appendix—Computation of Interest on Treasury Bonds, Treasury Notes, and Treasury Certificates of Indebtedness, and Computation of Discount on Treasury Bills

TREASURY BONDS, TREASURY NOTES, AND TREASURY CERTIFICATES OF INDEBTEDNESS

COMPUTATION OF INTEREST ON AN ANNUAL BASIS

ONE DAY'S INTEREST IS 1/365 OR 1/366 OF 1 YEAR'S INTEREST

Computation of interest will be made on an annual basis in all cases where interest is payable in one amount for the full term of the security, unless such term is an exact quarter-year (3 months) or an exact half-year (6 months), when it is provided that

[11] It has been the longstanding policy of the Department to assume no responsibility for the protection of bearer securities not in the possession of persons claiming rights therein and to give no effect to any notice of such claims. This policy was formalized on April 27, 1867 when the Secretary of the Treasury issued the following statement:

"In consequence of the increasing trouble, wholly without practical benefit, arising from notices which are constantly received at the Department respecting the loss of coupon bonds, which are payable to bearer, and of Treasury notes issued and remaining in blank at the time of loss, it becomes necessary to give this public notice, that the Government can not protect and will not undertake to protect the owners of such bonds and notes against the consequences of their own fault or misfortune.

"Hereafter all bonds, notes, and coupons, payable to bearer, and Treasury notes issued and remaining in blank, will be paid to the party presenting them in pursuance of the regulations of the Department, in the course of regular business; and no attention will be paid to caveats which may be filed for the purpose of preventing such payment."

interest shall be computed on a quarterly or semiannual basis, respectively.

If the term of the securities is exactly one year, the interest is computed for the full period at the specified rate, regardless of the number of days in such period.

If the term of the securities is less than one full year, the annual interest period for purposes of computation is considered to be the full year from but not including the date of issue to and including the anniversary of such date.

If the term of the securities is more than one full year, computation is made on the basis of one full annual interest period, ending with the maturity date, and a fractional part of the preceding full annual interest period.

The computation of interest for any fractional part of an annual interest period is made on the basis of 365 actual days in any such period, or 366 days if February 29 falls within such annual period.

COMPUTATION OF INTEREST ON A SEMIANNUAL BASIS

ONE DAY'S INTEREST IS 1/181, 1/182, 1/183 OR 1/184 OF 1/2 YEAR'S INTEREST

Computation of interest will be made on a semiannual basis in all cases where interest is payable for one or more full half-year (6 months) periods, or for one or more full half-year periods and a fractional part of a half-year period. A semiannual interest period is an exact half-year or 6 months, for computation purposes, and may comprise 181, 182, 183 or 184 actual days.

An exact half-year's interest at the specified rate is computed for each full period of exactly 6 months, irrespective of the actual number of days in the half-year.

If the initial interest covers a fractional part of a half-year, computation is made on the basis of the actual number of days in the half-year (exactly 6 months) ending on the day such initial interest becomes due. If the initial interest covers a period in excess of 6 months, computation is made on the basis of one full half-year period, ending with the interest due date, and a fractional part of the preceding full half-year period.

Interest for any fractional part of a full half-year period is computed on the basis of the exact number of days in the full period, including February 29 whenever it falls within such a period.

The number of days in any half-year period is shown in the following table:

| For the half-year | | Number of days | |
|---|---|---|---|
| Beginning from the 1st or 15th day of— | Ending on the 1st or 15th day of— | Regular year | Leap year |
| January | July | 181 | *182* |
| February | August | 181 | *182* |
| March | September | 184 | 184 |
| April | October | 183 | 183 |
| May | November | 184 | 184 |
| June | December | 183 | 183 |
| July | January | 184 | 184 |
| August | February | 184 | 184 |
| September | March | 181 | *182* |
| October | April | 182 | *183* |
| November | May | 181 | *182* |
| December | June | 182 | *183* |
| One year (any 2 consecutive half-years) | | 365 | 366 |

COMPUTATION OF INTEREST ON A QUARTERLY BASIS

ONE DAY'S INTEREST IS 1/89, 1/90, 1/91, OR 1/92 OF 1/4 YEAR'S INTEREST

Computation of interest will be made on a quarterly basis in all cases where interest is payable for one or more full quarter-year periods, or for one or more full quarter-year periods and a fractional part of a quarter-year period.

A quarter-year interest period is an exact quarter-year of three months, and may comprise 89, 90, 91 or 92 days. An exact quarter-year's interest is computed for each full quarter-year period irrespective of the actual number of days in the quarter-year. For a fractional part of any quarter-year, computation is on the basis of the actual number of days in such quarter-year (February 29 being included if it falls within any such quarter-year). If the initial interest covers a fractional part of a quarter-year (preceding a full quarter-year period), computation is on the basis of the actual number of days in the quarter-year (exactly 3 months) ending on the day such initial interest becomes due; if the final interest covers a fractional part of a quarter-year (following a full quarter-year period), computation is on the basis of the actual number of days in the quarter-year beginning on the day such final interest begins to accrue and ending exactly three months thereafter. The number of days in any quarter-year period is shown in the following table:

| For the quarter-year | | Number of days | |
|---|---|---|---|
| Beginning from the 1st or 15th day of— | Ending on the 1st or 15th day of— | Regular year | Leap year |
| January | April | 90 | *91* |
| February | May | 89 | *90* |
| March | June | 92 | *91* |
| April | July | 91 | 91 |
| May | August | 92 | 92 |
| June | September | 92 | 92 |
| July | October | 92 | 92 |
| August | November | 92 | 92 |
| September | December | 91 | 91 |
| October | January | 92 | 92 |
| November | February | 92 | 92 |
| December | March | 90 | *91* |
| One year (any 4 consecutive quarters) | | 365 | 366 |

*Use of Interest Tables*

In the appended tables decimals are set forth for use in computing interest for fractional parts of interest periods. The decimals cover interest on $1,000 for one day in each possible quarterly (table I), semiannual (table II), and annual (table III) interest period, at all rates of interest, in steps of ⅛ percent, from ⅛ to 6 percent. The amount of interest accruing on any date (for a fractional part of an interest period) on $1,000 face amount of any issue of Treasury bonds, Treasury notes, or Treasury certificates of indebtedness may be ascertained in the following way:

(1) The date of issue, the dates for the payment of interest, the basis (quarterly, semiannual or annual) upon which interest is computed, and the rate of interest (percent per annum) may be determined from the text of the security, or from the official circular governing the issue.

(2) Determine the interest period of which the fraction is a part, and calculate the number of days in the full period to determine the proper column to be used in selecting the decimal for one day's interest.

(3) Calculate the actual number of days in the fractional period from but not including the date of issue or the day on which the last preceding interest payment was made, to and including the day on which the next succeeding interest payment is due or the day as of which the transaction which terminates the accrual of additional interest is effected.

(4) Multiply the appropriate decimal (one day's interest on $1,000) by the number of days in the fractional part of the interest period. The appropriate decimal will be found in the appended table for interest payable quarterly, semiannually, or annually, as the case may be, opposite the rate borne by the security, and in the column showing the full interest period of which the fractional period is a part. (For interest on any other amount, multiply the amount of interest on $1,000 by the other amount expressed as a decimal of $1,000.)

*Treasury Bills*

The methods of computing discount rates on U.S. Treasury Bills are given below:

Computation will be made on an annual basis in all cases. The annual period for bank discount is a year of 360 days, and all computations of such discount for a fractional part of a year will be made on that basis. The annual period for true discount is one full year from but not including the date of issue to and including the anniversary of such date. Computation of true discount for a fractional part of a year will be made on the basis of 365 days in the year, or 366 days if February 29 falls within the year.

*Bank Discount*

The bank discount rate on a Treasury bill may be ascertained by (1) subtracting the sale price of the bill from its face value to obtain the amount of discount; (2) dividing the amount of discount by the number of days the bill is to run to obtain the amount of discount per day; (3) multiplying the amount of discount per day by 360 (the number of days in a commercial year of 12 months of 30 days each) to obtain the amount of discount per year; and (4) dividing the amount of discount per year by the face value of the bill to obtain the bank discount rate.

For example:

91-day bill—dated April 1, 1954—due July 1, 1954:

| | |
|---|---|
| Principal amount—maturity value | $100.00 |
| Price at issue—amount received | 99.50 |
| Amount of discount | .50 |

$0.50÷91×360÷$100=1.978 percent.

*True Discount*

The true discount rate on a Treasury bill of not more than one-half year in length may be ascertained by (1 and 2) obtaining the amount of discount per day by following the first two steps described under "Bank Discount;" (3) multiplying the amount of discount per day by the actual number of days in the year from date of issue (365 ordinarily, but 366 if February 29 falls within the year from date of issue) to obtain the amount of discount per year; and (4) dividing the amount of discount per year by the sale price of the bill to obtain the true discount rate.

For example:

91-day bill—dated April 1, 1954—due July 1, 1954:

| | |
|---|---|
| Principal amount—maturity value | $100.00 |
| Price at issue—amount received | 99.50 |
| Amount of discount | .50 |

$0.50÷91×365÷$99.50=2.016 percent.

TABLE II—DECIMAL FOR 1 DAY'S INTEREST ON $1,000 AT VARIOUS RATES OF INTEREST, PAYABLE SEMIANNUALLY OR ON A SEMIANNUAL BASIS, IN REGULAR YEARS OF 365 DAYS AND IN LEAP YEARS OF 366 DAYS

| Rate per annum | Interest period ending on the 1st or 15th of— | | | |
|---|---|---|---|---|
| | Half-year of 184 days—Regular year: January, February, March, April, September, October, November, December. Leap year: January, February, March, April, September, October, November | Half-year of 183 days—Regular year: June, July, August, September, October, November. Leap year: April, May, June, July, August, September | Half-year of 182 days—Regular year: April, May, June, July, August, September. Leap year: March, April, May, June, July, August | Half-year of 181 days—Regular year: May, June, July, August, September, October. Leap year: May, June, July, August, September, October |
| *Percent* | | | | |
| ⅛ | $0.003 396 739 | $0.003 415 301 | $0.003 434 066 | $0.003 453 099 |
| ¼ | .006 793 478 | .006 830 601 | .006 868 132 | .006 906 197 |
| ⅜ | .010 190 217 | .010 245 902 | .010 302 198 | .010 359 296 |
| ½ | .013 586 957 | .013 661 202 | .013 736 264 | .013 812 155 |
| ⅝ | .016 983 696 | .017 076 503 | .017 170 330 | .017 265 193 |

# PART 315—REGULATIONS GOVERNING UNITED STATES SAVINGS BONDS

Department Circular No. 530, Eighth Revision, dated December 26, 1957, as amended (31 CFR Part 315), is hereby further amended and issued as the Ninth Revision.

Subpart A—General Information

Sec.
315.0 Applicability of regulations.
315.1 Official agencies.
315.2 Definition of words and terms as used in these regulations.

Subpart B—Registration

315.5 General.
315.6 Restrictions on registration.
315.7 Authorized forms of registration.
315.8 Unauthorized registration.

Subpart C—Limitations on Holdings

315.10 Amount which may be held.
315.11 Computation of amount.
315.12 Disposition of excess.

Subpart D—Limitation on Transfer or Pledge

315.15 Limitation on transfer or pledge.
315.16 Pledge under Department Circulars Nos. 154 and 657.

Subpart E—Limitation on Judicial Proceedings—No Stoppage or Caveats Permitted

315.20 General.
315.21 Payment to judgment creditors.
315.22 Payment or reissue pursuant to judgment.
315.23 Evidence necessary.

Subpart F—Relief for Loss, Theft, Destruction, Mutilation, Defacement, or Nonreceipt of Bonds

315.25 After receipt by owner or his representative.
315.26 Procedure to be followed.
315.27 Nonreceipt of bond.
315.28 Recovery or receipt of bonds reported lost, stolen, destroyed or not received.

Subpart G—Interest

315.30 General.
315.31 Appreciation bonds.
315.32 Current income bonds.

Subpart H—General Provisions for Payment and Redemption

315.35 Provisions applicable both before and after maturity.
315.36 Before maturity.
315.37 At or after maturity.
315.38 Requests for payment.
315.39 Presentation and surrender.
315.40 Partial redemption.
315.41 Nonreceipt or loss of checks issued in payment.

Subpart I—Certifying Officers

315.42 Persons who may certify.
315.43 General instructions to certifying officers.
315.44 Interested person not to certify.

Subpart J—Reissue and Denominational Exchange

315.45 General.
315.46 Requests for reissue.
315.47 Effective date.
315.48 Correction of errors.
315.49 Change of name.

Subpart K—Minors, Incompetents, Aged Persons, Absentees, etc.

315.50 Payment to representative of estate.
315.51 Payment to minors.
315.52 Payment to a parent or other person on behalf of a minor.
315.53 Payment or reinvestment upon request of voluntary guardian of incompetent.
315.54 Reissue.

Subpart L—Natural Person as Sole Owner

315.55 Payment.
315.56 Reissue for certain purposes.

Subpart M—Two Natural Persons as Coowners

315.60 Payment during the lives of both coowners.
315.61 Reissue during the lives of both coowners.
315.62 After the death of one or both coowners.
315.63 Upon death of both coowners in a common disaster, etc.

Subpart N—Two Natural Persons as Owner and Beneficiary

315.65 During the lifetime of the registered owner.
315.66 After the death of the registered owner.

Subpart O—Deceased Owners

315.70 General.
315.71 Special provisions applicable to small amounts of savings bonds, interest checks or redemption checks.
315.72 Estates administered.
315.73 Estates not administered.

Subpart P—Fiduciaries

315.75 Payment.
315.76 Reissue.
315.77 Requests for reissue or payment prior to maturity or extended maturity.
315.78 Requests for payment at or after maturity.

Subpart Q—Private Organizations (Corporations, Associations, Partnerships, etc.) and Governmental Agencies, Units and Officers

315.80 Payment to corporations or unincorporated associations.
315.81 Payment to partnerships.
315.82 Reissue or payment to successors of corporations, unincorporated associations, or partnerships.
315.83 Reissue or payment on dissolution of corporation or partnership.
315.84 Payment to institutions (churches, hospitals, homes, schools, etc.).
315.85 Reissue in name of trustee or agent for investment purposes.
315.86 Reissue upon termination of investment agency.
315.87 Payment to governmental agencies and units.
315.88 Payment to Government officers.

Subpart R—Miscellaneous Provisions

315.90 Waiver of regulations.
315.91 Additional requirements; bond of indemnity; taxpayer identifying numbers.
315.92 Preservation of rights.
315.93 Supplements, amendments, or revisions.

AUTHORITY: The provisions of this Part 315 issued under secs. 22 and 25 of the Second Liberty Bond Act, as amended, 49 Stat. 21, as amended, 73 Stat. 621 (31 U.S.C. 757c, 757c–1).

## Subpart A—General Information

### § 315.0 Applicability of regulations.

The regulations in this part apply to all United States Savings Bonds of whatever series designation (hereinafter referred to as "savings bonds" or "bonds") bearing any issue dates whatever, to the extent specified herein and in the offering circulars governing such bonds. The provisions of these regulations with respect to bonds registered in the names of certain classes of individuals, fiduciaries, and organizations are equally applicable to bonds to which such individuals, fiduciaries, and organizations are otherwise shown to be entitled under these regulations. The provisions of Department Circular No. 300, current revision (Part 306 of this chapter), have no application to savings bonds.

### § 315.1 Official agencies.

The Bureau of the Public Debt of the Treasury Department is charged with matters relating to savings bonds. Correspondence concerning transactions after original issue and requests for appropriate forms should be addressed to (a) the Federal Reserve Bank or Branch of the district in which the correspondent is located, or (b) the Bureau of the Public Debt, Division of Loans and Currency Branch, 536 South Clark Street, Chicago, Ill. 60605, or (c) the Office of the Treasurer of the United States, Securities Division, Washington, D.C. 20220, except where specific instructions are otherwise given in these regulations. Notices or documents not filed in accordance with instructions in these regulations will not be recognized. The addresses of the Federal Reserve Banks and Branches are:

Federal Reserve Bank of Boston,
Boston, Mass., 02106.
Federal Reserve Bank of New York,
New York, N.Y., 10045.
Buffalo Branch,
Buffalo, N.Y., 14240.
Federal Reserve Bank of Philadelphia,
Philadelphia, Pa., 19101.
Federal Reserve Bank of Cleveland,
Cleveland, Ohio, 44101.
Cincinnati Branch,
Cincinnati, Ohio, 45201.
Pittsburgh Branch,
Pittsburgh, Pa., 15230.
Federal Reserve Bank of Richmond,
Richmond, Va., 23213.
Baltimore Branch,
Baltimore, Md., 21203.
Charlotte Branch,
Charlotte, N.C., 28201.
Federal Reserve Bank of Atlanta,
Atlanta, Ga., 30303.
Birmingham Branch,
Birmingham, Ala., 35202.
Jacksonville Branch,
Jacksonville, Fla., 32201.
Nashville Branch,
Nashville Tenn., 37203.
New Orleans Branch,
New Orleans, La., 70160.
Federal Reserve Bank of Chicago,
Post Office Box 834,
Chicago, Ill., 60690.
Detroit Branch,
Post Office Box 1059,
Detroit, Mich., 48231.
Federal Reserve Bank of St. Louis,
Post Office Box 442,
St. Louis, Mo., 63166.
Little Rock Branch,
Post Office Box 1261,
Little Rock, Ark., 72203.
Louisville Branch,
Post Office Box 899,
Louisville, Ky., 40201.
Memphis Branch,
Post Office Box 407,
Memphis, Tenn., 38101.
Federal Reserve Bank of Minneapolis,
Minneapolis, Minn., 55440.
Helena Branch,
Helena, Mont., 59601.
Federal Reserve Bank of Kansas City,
Kansas City, Mo., 64106.
Denver Branch,
Denver, Colo., 80217.
Oklahoma City Branch,
Oklahoma City, Okla., 73101.
Omaha Branch,
Omaha, Nebr., 68102.
Federal Reserve Bank of Dallas,
Station K,
Dallas, Tex., 75222.
El Paso Branch,
Post Office Box 100,
El Paso, Tex., 79999.
Houston Branch,
Post Office Box 2578,
Houston, Tex., 77001.
San Antonio Branch,
Post Office Box 1471,
San Antonio, Tex., 78206.
Federal Reserve Bank of San Francisco,
San Francisco, Calif., 94120.
Los Angeles Branch,
Post Office Box 2077,
Los Angeles, Calif., 90054.
Portland Branch,
Post Office Box 3456,
Portland, Oreg., 97208.
Salt Lake City Branch,
Post Office Box 780,
Salt Lake City, Utah, 84110.
Seattle Branch,
Post Office Box 3567,
Seattle, Wash., 98124.

### § 315.2 Definition of words and terms as used in these regulations.

(a) "Authorized issuing agent" means an incorporated bank, trust company, savings bank, savings and loan association, other organization, or instrumentality of the United States, qualified as an issuing agent under the provisions of Department Circular No. 657, current revision (Part 317 of this chapter).

(b) "Authorized paying agent" means an incorporated bank, trust company, savings bank, savings and loan association, or other organization qualified as a paying agent under the provisions of Department Circular No. 750, current revision (Part 321 of this chapter).

(c) "Court" means one which has jurisdiction over the parties and subject matter.

(d) "Extended maturity date" is the date on which a bond will mature and cease to bear interest under applicable optional extension provisions.

(e) "Extended maturity value" is the value of a bond at maturity under applicable optional extension provisions.

(f) "Face value" of a bond refers to the value of the bond as shown on the face thereof.

(g) "Incompetent" refers to a person under any legal disability except minority.

(h) "Maturity date" means the date on which the bond will mature by the terms of the circular offering it for sale without regard to any optional extension period.

(i) "Optional extension period"[1] means any period after maturity date during which the owner may retain the bonds and continue to earn interest on the maturity value in accordance with the terms of the circular offering such bonds for sale.

(j) "Payment" and "redemption" are used interchangeably, unless otherwise indicated. They refer to payment of a bond in accordance with these regulations.

(k) "Personal trust estate" means a trust estate established by natural persons in their own right for the benefit of themselves or other natural persons in whole or in part, and common trust funds comprised in whole or in part of such trust estates.

(l) "Presented and surrendered" and "presentation and surrender" mean the actual receipt of a bond, with an appropriate request for the particular transaction, by the Bureau of the Public Debt, Chicago or Washington offices, the Office of the Treasurer of the United States, Securities Division, or a Federal Reserve Bank or Branch, or, if the transaction is one which an authorized paying agent may handle, receipt by such authorized paying agent.

(m) "Representative of the estate of a minor, incompetent, aged person, absentee, etc.," means a guardian, conservator, or similar representative appointed by a court or otherwise legally qualified, regardless of the title by which designated. These terms do not refer to a voluntary guardian recognized under § 315.53, to a natural guardian, such as a parent, including a parent to whom custody of a child has been awarded through divorce proceedings or a parent by adoption, or to the executor or administrator of the estate of a decedent.

(n) "Reissue" means the cancellation and retirement of a bond and issue of a new bond or bonds of the same series, amount (face value) (or the remainder thereof in case of partial redemption), and issue date.

(o) "Taxpayer identifying number" means the appropriate identifying number as required on tax returns and other documents submitted to the Internal Revenue Service, i.e., an individual's social security account number or an employer identification number. The social security account number is composed of nine digits separated by two hyphens, for example, 123–45–6789; the employer identification number is composed of nine digits separated by one hyphen, for example, 12–3456789. The hyphens are an essential part of the numbers and must be included.

## Subpart B—Registration

### § 315.5 General.

Savings bonds are issued only in registered form. The registration used on issue or reissue must express the actual ownership of and interest in the bond and, except as otherwise specifically provided in Subpart E and § 315.48, will be considered as conclusive of such ownership and interest. No designation of an attorney, agent, or other representative to request or receive payment on behalf of the owner or a coowner, nor any restriction on the right of the owner or a coowner to receive payment of the bond or interest, except as provided in these regulations, may be made in the registration or otherwise. Registrations requested in applications for purchase or requests for reissue should be clear, accurate, and complete, conform with one of the forms set forth in this subpart, and include the appropriate taxpayer identifying number.[2] The registration of

[1] All Series E bonds have a 10-year optional extension period. Those bearing issue dates of May 1, 1941, through May 1, 1949, have a second 10-year optional extension period. Series H bonds bearing issue dates of June 1, 1952, through January 1, 1957, have a 10-year optional extension period. Other bonds do not have this feature.

[2] It is not mandatory to include taxpayer identifying numbers in registrations of Series E bonds. Issuing agents for Series E bonds issued under payroll savings plans who desire to place such numbers on the bonds should obtain instructions from the Bureau of the Public Debt, Washington, D.C., 20220. As the numbers must be included in Series H bond registrations except with respect to such persons and organizations as may be exempt from furnishing such numbers under the regulations of the Internal Revenue Service, they are shown in the examples in § 315.7 for guidance. Series H bonds inscribed in the name of an individual, with or without a beneficiary, must show the individual's social security account number. The social security account number of either coowner may be shown on bonds registered in coownership form, except that if the coowners are husband and wife, the husband's number should be shown. If the coowners are a minor and an adult, the adult's number should be shown. Questions concerning taxpayer identifying numbers and correct forms of registration should be submitted to the Federal Reserve Bank or Branch of the appropriate district, or to the Bureau

all bonds owned by the same person, organization, or fiduciary should be uniform with respect to the name of the

in either case by an appropriate reference to the guardianship. Bonds purchased by a representative of two or

(i) *Guardians, custodians, conservators, etc.* In the name and title or capacity of the legally appointed, desig-

within the meaning of these regulations.

(a) *Will, deed of trust, agreement or similar instrument.* Examples:

Superintendent of the Confederate Home for Men, in trust for the Benefit Fund under section 3183c, Vernon's Civil Statutes of Texas Ann.

a parent organization, the name or designation of the subordinate or local organization should be given first, followed by

all bonds owned by the same person, organization, or fiduciary should be uniform with respect to the name of the owner and, in the case of a fiduciary, the description of the fiduciary capacity. The owner, coowner, or beneficiary should be designated by the name by which he is ordinarily known or the one under which he does business, including preferably at least one full given name. The name may be preceded by any applicable title, such as "Dr." or "Rev.," or followed by "M.D.," "D.D.," or other similar designation. "Sr." or "Jr." or a similar suffix should be included, when ordinarily used or when necessary to distinguish the owner from a member of his family. The name of a woman must be preceded by "Miss" or "Mrs.," unless some other applicable title or designation is used. A married woman's own given name, not that of her husband, must be used, for example, "Mrs. Mary A. Jones," not "Mrs. Frank B. Jones." The post office address should include, where appropriate, the number and street, route, or any other local feature, and the ZIP Code.

**§ 315.6 Restrictions on registration.**

(a) *Residence.* Registration of bonds is restricted on original issue, but not on authorized reissue, to persons (whether natural persons or others) who are:

(1) Residents of the United States, its territories and possessions, the Commonwealth of Puerto Rico, and the Canal Zone;

(2) Citizens of the United States temporarily residing abroad; and

(3) Civilian employees of the United States or members of its Armed Forces, regardless of their residence or citizenship.

However, other natural persons may be designated as coowners or beneficiaries with natural persons of the above classes, whether on original issue or reissue, except that registration is not permitted in any form which includes the name of any alien who is resident of any area with respect to which the Treasury Department restricts or regulates the delivery of checks drawn against funds of the United States or any agency or instrumentality thereof.[3]

(b) *Minority.* (1) Bonds purchased by another person with funds belonging to a minor should be registered in the name of the minor without a coowner or beneficiary. A minor may name a coowner or beneficiary on bonds he purchases with his wages, earnings, or other funds belonging to him and under his control. A minor, whether or not under legal guardianship, may be named as owner, coowner, or beneficiary on bonds purchased by another individual with funds other than those belonging to the minor.

(2) If there is a representative of a minor's estate, bonds should be registered in the name of the minor, or in the name of the representative, followed in either case by an appropriate reference to the guardianship. Bonds purchased by a representative of two or more minors, even though appointed in a single proceeding, should be registered separately in a form to show each guardianship estate. A bond may be purchased as a gift to a minor under a gifts to minors statute in effect in a state in which either the donor or the minor resides, in which case the bond should be registered as provided in the statute, with the addition of a parenthetical reference identifying the statute if the registration does not clearly identify it. Registration in the name of a natural guardian is not authorized. See examples of forms of registration under § 315.7(b).

(c) *Incompetency.* Bonds should not be registered in the name of an incompetent unless there is a legal representative of his estate, except under the provisions of § 315.53. If there is a legal representative, the provisions of paragraph (b) of this section apply as to registration in the name of the legal representative or in the name of the incompetent followed by reference to the guardianship.

**§ 315.7 Authorized forms of registration.**

Subject to any limitations or restrictions contained in these regulations on the right of any person to be named as owner, coowner, or beneficiary, bonds may be registered in the following forms: [3]

(a) *Natural persons.* In the names of natural persons in their own right.

(1) *Single owner:* Example: John A. Jones 123-45-6789.

(2) *Coownership form—two persons (only).* In the alternative as coowners. Examples:

John A. Jones 123-45-6789 or Mrs. Ella S. Jones.
Mrs. Ella S. Jones or John A. Jones 123-45-9876.

No other form of registration establishing coownership is authorized.

(3) *Beneficiary form—two persons (only).* Examples:

John A. Jones 123-45-6789 payable on death to Mrs. Ella S. Jones.
John A. Jones 123-45-6789 P.O.D. Mrs. Ella S. Jones.

"Payable on death" may be abbreviated to "P.O.D." as indicated in the last example. The first person named is hereinafter referred to as the owner and the second named person as the beneficiary.

(b) *Fiduciaries and private or public organizations.* Only the single owner form of registration is available for bonds owned by other than natural persons, and the registration must conform to the forms authorized in this subsection.

(1) *Fiduciaries.* In the names of any persons or organizations, public or private, as fiduciaries, but not where the fiduciary would hold the bonds merely or principally as security for the performance of a duty, obligation, or service.

(i) *Guardians, custodians, conservators, etc.* In the name and title or capacity of the legally appointed, designated or authorized representative or representatives of the estate of a minor, incompetent, aged person, absentee, etc., or in the name of such individual, followed by an appropriate reference to the estate and showing the nature of the legal disability or referring to the applicable statute. Examples:

William C. Jones, guardian (or conservator, trustee, etc.) of the estate of James F. Brown 123-45-6789, a minor (or an incompetent, aged person, infirm person, or absentee).
John Smith 123-45-6789, a minor (or an incompetent, aged person, infirm person, or absentee) under legal guardianship (or conservatorship or trusteeship, etc.) of Henry C. Smith.
John Smith 123-45-6789, an adult, under conservatorship of Henry Smith pursuant to Sec. 572, 1963 Iowa Probate Code.
John Smith 123-45-6789, a minor (or incompetent), under custodianship by designation of the Veterans Administration.
John Smith 123-45-6789, an incompetent for whom Henry C. Smith has been designated trustee by the Department of the Army pursuant to 37 U.S.C. 351-354.
William C. Jones, as custodian for John Smith 123-45-6789 under the California Uniform Gifts of Securities to Minors Act.
William C. Jones, as custodian for John Smith 123-45-6789, a minor, under the laws of Georgia (Chapter 48-3, Code of Georgia Ann.).
Richard Roe 123-45-6789, a minor (or an incapacitated adult) beneficiary for whom Reva Roe has been designated representative payee by the Secretary of Health, Education, and Welfare, pursuant to 42 U.S.C. 405(j).

(ii) *Executors, administrators, etc.* (*a*) In the name of the representative or representatives of the estate of a decedent appointed by a court or otherwise legally qualified. The registration should include the name of the decedent and the name or names of all representatives. The name and title of the representative must be followed by adequate identifying reference to the estate. Example:

John Smith, executor of the will (or administrator of the estate) of Henry J. Smith, deceased 12-3456789.

(*b*) In the name of an executor authorized to administer a trust under the terms of a will although he is not named as trustee. Example:

John Smith, executor of the will of Henry J. Smith, deceased, in trust for Mrs. Jane Smith, with remainder over 12-3456789.

(iii) *Trustees.* In the name and title or capacity (or title or capacity alone where hereinafter provided) of the trustee or trustees of a single duly constituted trust estate (which will be considered as an entity), substantially in accordance with the examples set forth in this paragraph. Unless otherwise indicated, an adequate identifying reference should be made to the trust instrument or other authority creating the trust. A common trust fund established and maintained according to law by a financial institution duly authorized to act as a fiduciary will be considered as a single duly constituted trust estate within the meaning of these regulations.

(a) *Will, deed of trust, agreement or similar instrument.* Examples:

John Smith and the First National Bank, trustees under the will of Henry J. Smith, deceased 12-3456789.
The Second National Bank, trustee under an agreement with George E. White, dated February 1, 1935 12-3456789.

If the authority creating the trust designates by title only an officer of a board or an organization as trustee, only the title of the officer should be used in the registration. Example:

Chairman, Board of Trustees, First Church of Christ, Scientist, of Chicago, Ill., in trust under the will of Henry J. Smith, deceased 12-3456789.

If the trustees are too numerous to be designated in the inscription by names and capacity, the names or some of the names may be omitted. Examples:

John Smith, Henry Jones, et al., trustees under the will of Henry J. Smith, deceased 12-3456789.
Trustees under the will of Henry J. Smith, deceased 12-3456789.

(b) *Pension, retirement, or similar fund, or employees' savings plans.* In the name and title (or title alone) of the trustee or trustees of a pension, retirement, or similar fund, or an employees' savings plan. If the instrument creating the trust provides that the trustees shall serve for a limited term, the names of the trustees may be omitted. Examples:

First National Bank and Trust Company, trustee of the Employees' Savings Plan of Jones Company, Inc., U/A dated Jan. 17, 1959 12-3456789.
Trustees of the Employees' Savings Plan of Johnson Company, Inc., U/A dated Jan. 20, 1964 12-3456789.
First National Bank, trustee of pension fund of Industrial Manufacturing Company, under agreement with said company dated March 31, 1949 12-3456789.
Trustees of Retirement Fund of Industrial Manufacturing Company, under resolution adopted by its board of directors on March 31, 1949 12-3456789.

(c) *Funds of a lodge, church, society, or similar organization.* If the funds of a lodge, church, society, or similar organization, whether incorporated or not, are held in trust by a trustee or trustees or a board of trustees, only the capacity should be used in the registration. Examples:

Trustees of the First Baptist Church, Akron, Ohio, acting as a Board under Section 15 of its by-laws 12-3456789.
Trustees of Jamestown Lodge No. 1,000 Benevolent and Protective Order of Elks, under Section 10 of its by-laws 12-3456789.
Board of Trustees of the Lotus Club, Washington, Ind., under Article X of its constitution 12-3456789.

(d) *Public officers, corporations, or bodies.* If a public officer, public corporation, or public body acts as trustee under express authority of law, only the title should be used in the registration. Examples:

Rhode Island Sinking Fund Commission, trustee of the General Sinking Fund under Chapter 35, General Laws of Rhode Island.
Superintendent of the Confederate Home for Men, in trust for the Benefit Fund under section 3183c, Vernon's Civil Statutes of Texas Ann.

(e) *School, class, or activity fund.* If the principal or other officer of a public, private, or parochial school acts as trustee for the benefit of the student body or a class, group, or activity thereof, only the title should be used in the registration, and if the amount purchased for any one fund does not exceed $500 (face value), no reference need be made to a trust instrument. Examples:

Principal, Western High School, in trust for Class of 1955 Library Fund 12-3456789.
Director of Athletics, Western High School, in trust for Student Activities Association under resolution adopted May 12, 1955 12-3456789.

(iv) *Life tenants.* In the name of a life tenant, followed by adequate identifying reference to the instrument creating the life tenancy. Example:

Mrs. Jane Smith, life tenant under the will of Henry J. Smith, deceased 12-3456789.

(v) *Investment agents.* In the name of a bank, trust company, or other financial institution, or individual, holding funds of a religious, educational, charitable, or nonprofit organization, whether or not incorporated, as agent under an agreement with the organization for the sole purpose of investing and reinvesting the funds and paying the income to the organization. The name and designation of the agent should be followed by an adequate identifying reference to the agreement. Examples:

Black County National Bank, fiscal agent 12-3456789, under agreement with the Evangelical Lutheran Church of The Holy Trinity, dated December 28, 1949.
First National Bank and Trust Company, investment agent 12-3456789, under agreement dated September 16, 1964 with Central City Post No. 1000, Department of Illinois, American Legion.

(2) *Private organizations (corporations, associations, and partnerships, etc.).* In the name of any private organization, but not in the names of commercial banks, which are defined for this purpose as those accepting demand deposits. The full legal name of the organization, without mention of any officer or member by name or title, should be used, as follows:

(i) *A corporation.* A business, fraternal, religious, or other private corporation, followed preferably by the words "a corporation" (unless the fact of incorporation is shown in the name). Examples:

Smith Manufacturing Company, a corporation 12-3456789.
Jones and Brown, Inc. 12-3456789.

(ii) *An unincorporated association.* An unincorporated lodge, society, or similar self-governing association, followed preferably by the words "an unincorporated association." The term "an unincorporated association" should not be used to describe a trust fund, a board of trustees, a partnership, or a business conducted under a trade name or as a sole proprietorship. If the association is chartered by or affiliated with a parent organization, the name or designation of the subordinate or local organization should be given first, followed by the name of the parent organization. The name of the parent or national organization may be placed in parentheses and, if it is well known, may be abbreviated. Examples:

The Lotus Club, an unincorporated association 12-3456789.
Local 447, Brotherhood of Railroad Trainmen, an unincorporated association 12-3456789.
Eureka Lodge No. 317 (A.F. & A.M.), an unincorporated association 12-3456789.

(iii) *A partnership.* A partnership (which will be considered as an entity), followed by the words "a partnership." Examples:

Smith and Brown, a partnership, 12-3456789.
Acme Novelty Company, a partnership, 12-3456789.

(iv) *Institutions (churches, hospitals, homes, schools, etc.).* In the name of a church, hospital, home, school, or similar institution conducted by a private organization or by private trustees, regardless of the manner in which it is organized or governed or title to its property is held. Examples:

Shriners' Hospital for Crippled Children, St. Louis, Mo. 12-3456789.
St. Mary's Roman Catholic Church, Albany, N.Y. 12-3456789.
Rodeph Shalom Sunday School, Philadelphia, Pa. 12-3456789.

(3) *Governmental units, agencies, and officers.* In the full legal name or title of the owner or official custodian of public funds, other than trust funds, as follows:

(i) Any governmental unit, as a state, county, city, town, village, or school district. Examples:

State of Maine.
Town of Rye, N.Y. (Street Improvement Fund).

(ii) Any board, commission, government owned corporation, or other public body duly constituted by law. Example:

Maryland State Highway Commission.

(iii) Any public officer designated by title only. Example:

Treasurer, City of Chicago

(c) *Treasurer of the United States as coowner or beneficiary.* Those who desire to do so may make gifts to the United States by designating the Treasurer of the United States as coowner or beneficiary. Bonds so registered may not be reissued to change the designation. Examples:

John A. Jones 123-45-6789 or the Treasurer of the United States of America
John A. Jones 123-45-6789 P.O.D. the Treasurer of the United States of America

**§ 315.8 Unauthorized registration.**

A savings bond inscribed in a form not substantially in agreement with one of those authorized by this subpart will not be considered as validly issued, except that once it is established that the bond can be reissued in a form of registration which is valid under these regulations

of the Public Debt, Division of Loans and Currency Branch, 536 South Clark Street, Chicago, Ill. 60605, or to the Office of the Treasurer of the United States, Securities Division, Washington, D.C. 20220.

[3] See Department Circular No. 655, current revision (Part 211 of this chapter).

it will be considered as having been validly issued from the date of original issue.

## Subpart C—Limitations on Holdings

### § 315.10 Amount which may be held.

The amounts of savings bonds of each series, issued in any one calendar year, which may be held by any one person at any one time, computed in accordance with the provisions of § 315.11, are limited as follows: [4]

(a) *Series E.* $5,000 (face value) for each calendar year up to and including the calendar year 1947; $10,000 (face value) for the calendar years 1948 to 1951, inclusive; $20,000 (face value) for the calendar years 1952 to 1956, inclusive; $10,000 (face value) for the calendar year 1957 [5] and each calendar year thereafter; except that trustees of an employees' savings plan (as defined in Department Circular No. 653, current revision) may purchase $2,000 (face value) multiplied by the highest number of employees participating in the plan at any time during the calendar year in which the bonds are issued.

(b) *Series H.* $20,000 (face value) for each calendar year up to and including the calendar year 1956; $10,000 (face value) for the calendar years 1957 [5] to 1961, inclusive; $20,000 (face value) for the calendar year 1962 and each calendar year thereafter.

### § 315.11 Computation of amount.

(a) *Definition of "person".* The term "person" for purposes of this section shall mean any legal entity and shall include but not be limited to natural persons, corporations (public or private), partnerships, unincorporated associations, and trust estates. The holdings of each person individually and his holdings in any fiduciary capacity authorized by these regulations, such as, for example, his holdings as a guardian of the estate of a minor, as a life tenant, or as trustee under a will or deed of trust, shall be computed separately. A pension or retirement fund or an investment, insurance, annuity or similar fund or trust will be regarded as an entity regardless of the number of beneficiaries or the manner in which their respective interests are established or determined. Segregation of individual shares as a matter of bookkeeping or as a result of individual agreements with beneficiaries or the express designation of individual shares as separate trusts will not operate to constitute separate trusts under these regulations.

(b) *Bonds that must be included in computation.* Except as provided in paragraph (c) of this section, there must be taken into account in computing the holdings of each person:

(1) All bonds registered in the name of that person alone;

(2) All bonds registered in the name of the representative of the estate of that person;

(3) All bonds originally registered in the name of that person as coowner or reissued at the request of the original owner to add the name of that person as coowner or to designate him as coowner instead of a beneficiary. However, the amount of bonds of Series E and H held in coownership form may be applied to the holdings of either of the coowners but will not be applied to both, or the amount may be apportioned between them.

(c) *Bonds that may be excluded from computation.* There need not be taken into account:

(1) Bonds on which that person is named beneficiary;

(2) Bonds in which his interest is only that of a beneficiary under a trust;

(3) Bonds to which he has become entitled under § 315.66 as surviving beneficiary upon the death of the registered owner, as an heir or legatee of the deceased owner, or by virtue of the termination of a trust or the happening of any other event;

(4) Bonds of Series E purchased with the proceeds of matured bonds of Series A, C–1938, and D, where such matured bonds were presented for that purpose;

(5) Bonds of Series E bearing issue dates from May 1, 1941, to December 1, 1945, inclusive, held by individuals in their own right which are not more than $5,000 (face value) in excess of the prescribed limit;

(6) Bonds of Series E or H reissued under § 315.61(a)(1);

(7) Bonds of Series E or H reissued in the name of a trustee of a personal trust estate which did not represent excess holdings prior to such reissue;

(8) Bonds of Series E or H purchased with the proceeds of bonds of Series F, G, J, or K, at or after maturity, where such matured bonds are presented for that purpose in accordance with the provisions of Department Circulars Nos. 653, current revision (Part 316 of this chapter), offering bonds of Series E, and 905, current revision (Part 332 of this chapter), offering bonds of Series H;

(9) Bonds of Series H issued in exchange for bonds of Series E, F, or J under the provisions of Department Circular No. 1036, as amended.

### § 315.12 Disposition of excess.

If any person at any time acquires savings bonds issued during any one calendar year in excess of the prescribed amount, the excess must be immediately surrendered for refund of the purchase price, less (in the case of current income bonds) any interest which may have been paid thereon, or for such other adjustment as may be possible. For good cause found the Secretary of the Treasury may permit excess holdings to stand in any particular case or class of cases.

## Subpart D—Limitation on Transfer or Pledge

### § 315.15 Limitation on transfer or pledge.

Savings bonds are not transferable and are payable only to the owners named thereon, except as specifically provided in these regulations, and then only in the manner and to the extent so provided. A savings bond may not be hypothecated, pledged as collateral, or used as security for the performance of an obligation, except as provided in § 315.16.

### § 315.16 Pledge under Department Circulars Nos. 154 and 657.

A bond may be pledged by the registered owner in lieu of surety under the provisions of Department Circular No. 154, current revision (Part 225 of this chapter) if the bond approving officer is the Secretary of the Treasury, in which case an irrevocable power of attorney shall be executed authorizing the Secretary of the Treasury to request payment. A bond may also be deposited as security with a Federal Reserve Bank under the provisions of Department Circular No. 657, current revision (Part 317 of this chapter), by an institution certified under that circular as an issuing agent for Series E bonds.

## Subpart E—Limitation on Judicial Proceedings—No Stoppage or Caveats Permitted

### § 315.20 General.

(a) No judicial determination will be recognized which would give effect to an attempted voluntary transfer inter vivos of a bond or would defeat or impair the rights of survivorship conferred by these regulations upon a surviving coowner or beneficiary, and all other provisions of this subpart are subject to this restriction. Otherwise, a claim against an owner or coowner of a savings bond and conflicting claims as to ownership of, or interest in, such bond as between coowners or between the registered owner and beneficiary will be recognized, when established by valid judicial proceedings, upon presentation and surrender of the bond, but only as specifically provided in this subpart.

(b) Neither the Treasury Department nor any agency for the issue, reissue, or redemption of savings bonds will accept notices of adverse claims or of pending judicial proceedings or undertake to protect the interests of litigants who do not have possession of a bond.

### § 315.21 Payment to judgment creditors.

(a) *Creditors.* Payment (but not reissue) of a savings bond registered in single ownership, coownership, or beneficiary form will be made to the purchaser at a sale under a levy or to the officer authorized to levy upon the property of the registered owner or coowner under appropriate process to satisfy a money judgment. Payment will be made to such purchaser or officer only to the extent necessary to satisfy the judgment and will be limited to the redemption value current sixty days after the termination of judicial proceedings. Payment of a bond registered in coownership form pursuant to a judgment or levy against only one of the coowners will be limited to the extent of that coowner's interest in the bond; this interest may be established by an agreement between the coowners or by a judgment, decree, or order of court entered in a proceeding to which both coowners are parties.

(b) *Trustees in bankruptcy and receivers.* Payment of a savings bond will be made to a trustee in bankruptcy, a receiver of an insolvent's estate, a receiver in equity, or a similar officer of the court, under the applicable provisions of paragraph (a) of this section, except that payment will be made at the redemption value current on the date of payment.

### § 315.22 Payment or reissue pursuant to judgment.

(a) *Divorce.* A decree of divorce ratifying or confirming a property settlement agreement or otherwise settling the respective interests of the parties in a bond will not be regarded as a proceeding giving effect to an attempted voluntary transfer under the provisions of § 315.20. Consequently, reissue of a savings bond may be made to eliminate the name of one spouse as owner, coowner, or beneficiary, or to substitute the name of one spouse for that of the other as owner, coowner, or beneficiary pursuant to such a decree. The evidence required under § 315.23 must be submitted in any case. Where the decree does not set out the terms of the property settlement agreement a certified copy of the agreement must also be submitted. If bonds are registered with a person other than one of the spouses as owner or coowner there must be submitted either a request for reissue by such person or a certified copy of a judgment, decree, or order of court entered in a proceeding to which he was a party, determining the extent of the interest in the bond held by the spouse whose name is to be eliminated, and reissue will be permitted only to the extent of the spouse's interest in the bonds. Payment rather than reissue will be made if requested.

(b) *Gifts causa mortis.* A bond belonging solely to one person will be paid or reissued on the request of the person found by a court to be entitled thereto by reason of a gift causa mortis by the sole owner.

(c) *Date for determining rights.* For the purpose of determining whether or not reissue shall be made under this section pursuant to judicial proceedings, the rights of all parties involved shall be those existing under these regulations at the time of the entry of the final judgment, decree, or order.

### § 315.23 Evidence necessary.

To establish the validity of judicial proceedings, there must be submitted certified copies of a final judgment, decree, or order of court and of any necessary supplementary proceedings. If the judgment, decree, or order of court was rendered more than six months prior to the presentation of the bond, there must also be submitted a certificate from the clerk of the court, under its seal, dated within six months of the presentation of the bond showing that the judgment, decree, or order of court is in full force. A request for payment by a trustee in bankruptcy must be supported by duly certified evidence of his appointment and qualification. A request for payment by a receiver of an insolvent's estate must be supported by a copy of the order appointing him, certified by the clerk of the court, under its seal, as being in full force on a date not more than six months prior to the date of the presentation of the bond. A request for payment by a receiver in equity or a similar officer of the court, other than a receiver of an insolvent's estate, must be supported by a copy of an order authorizing him to present the bond for redemption, certified by the clerk of the court, under its seal, as being in full force on a date not more than six months prior to the presentation of the bond.

## Subpart F—Relief for Loss, Theft, Destruction, Mutilation, Defacement, or Nonreceipt of Bonds

### § 315.25 After receipt by owner or his representative.

Relief, either by the issue of a substitute bond marked "Duplicate" or by payment, may be given under section 8 of the Act of July 8, 1937, as amended (50 Stat. 481, as amended, 31 U.S.C. 738a), for the loss, theft, destruction, mutilation, or defacement of a bond after receipt by the owner or his representative. In granting relief under the act, the Secretary of the Treasury may require a bond of indemnity in such form and with such surety as may be deemed necessary for the protection of the United States of America. In all cases the bond must be identified and the applicant must submit satisfactory evidence of loss, theft, or destruction, or a satisfactory explanation of the mutilation or defacement. Relief on account of loss or theft ordinarily will not be granted until six months after the date of receipt by the Bureau of the Public Debt of the notice of such loss or theft.

### § 315.26 Procedure to be followed.

(a) Immediate notice of the facts concerning the loss, theft, destruction, mutilation, or defacement of a bond, together with its complete description (series, year and month of issue, serial number, name and address of the registered owner or coowners), should be given to the Bureau of the Public Debt, Division of Loans and Currency Branch. Defaced bonds and all available fragments of mutilated bonds in any form whatsoever should be submitted. That office will furnish the proper application form and instructions.

(b) The application must be made by the person or persons (including both coowners, if living), authorized under these regulations to request payment of the bond, except as follows:

(1) If the bond is in beneficiary form and the owner and beneficiary are both living, both ordinarily will be required to join in the application.

(2) If a minor named on a bond as owner, coowner, or beneficiary is not of sufficient competency and understanding to request payment, both parents ordinarily will be required to join in the application.

### § 315.27 Nonreceipt of bond.

If a bond, on original issue or on reissue, is not received from the issuing agent by the registered owner or other person to whom delivery of the bond was directed, the issuing agent should be notified as promptly as possible and given all information available about the transaction. The agent will then obtain appropriate instructions and forms. After approval of the application for relief, relief will be granted by the issuance of a bond, bearing the same issue date as the bond which was not received.

### § 315.28 Recovery or receipt of bonds reported lost, stolen, destroyed or not received.

If a bond reported lost, stolen, destroyed, or not received, is recovered or received before relief is granted, the Bureau of the Public Debt, Division of Loans and Currency Branch, should be notified promptly. If recovered or received after relief is granted, the bond should be surrendered promptly to the same office for cancellation.

## Subpart G—Interest

### § 315.30 General.

Savings bonds are issued in two forms:

(a) Appreciation bonds, issued on a discount basis and redeemable before final maturity at increasing fixed redemption values; and

(b) Current income bonds, issued at par, bearing interest payable semiannually [6] and redeemable before final maturity at par or at fixed redemption values less than par.

### § 315.31 Appreciation bonds.

Bonds issued on a discount basis increase in redemption value at the end of the first half-year from issue date and at the end of each successive half-year period thereafter until their maturity date, when the full face amount becomes payable.[7] Bonds of Series E bearing is-

[4] Bonds of Series F, G, J and K, no longer available for purchase, are subject to the limitations on holdings and rules for computation of holdings set forth in Secs. 315.8 and 315.9 of Department Circular No. 530, Seventh Revision.

[5] Effective May 1, 1957. Accordingly, investors who purchased $20,000 (face value) of bonds of Series E bearing issue dates of January 1 through April 1 were not entitled to purchase additional bonds of that series during 1957. The same limitation applies to bonds of Series H bearing those issue dates. Investors who purchased less than $10,000 (face value) of bonds of either series prior to May 1 were entitled only to purchase enough of either series to bring their total for that series for 1957 to $10,000 (face value).

[6] The final interest on bonds of Series H bearing issue dates of June 1, 1952, through January 1, 1957, covers a period of two months, from 9½ years to 9 years, 8 months. Bonds so dated will continue to earn interest for a 10-year optional extension period, during which time interest will accrue and be paid beginning six months from the original maturity date, in accordance with the provisions of Department Circular No. 905, current revision. Since May 1, 1957, the only current income bonds on sale are those of Series H. See Department Circulars Nos. 654, Third Revision, as amended, for Series G, and 906, as amended, for Series K.

[7] Series E bonds issued on or before April 30, 1952, and Series F bonds, the sale of which was terminated April 30, 1952, increased in redemption value at the end of the first year from issue date; Series E Bonds issued on and after May 1, 1952, and Series J bonds, the sale of which began on May 1, 1952, increased in redemption value at the end of the first half-year from issue date. The

sue dates of May 1, 1941, through May 1, 1949, will continue to increase in redemption value after the maturity date for twenty years and those bearing issue dates beginning with June 1, 1949, for ten years after the maturity date, in accordance with the provisions of Department Circular No. 653, current revision.[4] The increment in value (interest) on appreciation bonds is payable only on redemption of the bonds.

**§ 315.32 Current income bonds.**

(a) *Interest rates.* The interest payable on a current income bond is fixed by the provisions of the Department circular offering the particular series of bonds to the public.[5]

(b) *Method of interest payments.* Interest due on a current income bond is payable semiannually beginning six months from its issue date and will be paid on each interest payment date by check drawn to the order of the person or persons in whose names the bond is inscribed, in the same form as their names appear in the inscription on the bond, and mailed to the address of record (that given for the delivery of interest checks in the application for purchase or the request for reissue or, if no instruction is given as to the delivery of interest checks, the address given for the owner or the first-named coowner), except that:

(1) In the case of a bond registered in the form "A payable on death to B" the check will be drawn to the order of "A" alone until the Bureau of the Public Debt, Division of Loans and Currency Branch, receives notice of A's death, from which time the payment of interest will be suspended until the bond is presented for payment or reissue. Interest so withheld will be paid to the person found to be entitled to the bond.

(2) Upon receipt of notice of the death of the coowner to whom interest is being mailed, payment of interest will be suspended until a request for change of address is received from the other coowner, if living, or, if not, until satisfactory evidence is submitted as to who is authorized to endorse and collect such checks on behalf of the estate of the last deceased coowner in accordance with the provisions of Subpart O of this part.

(3) Upon receipt of notice of the death of the owner of a bond, payment of interest on the bond will be suspended until satisfactory evidence is submitted as to who is authorized to endorse and collect such checks on behalf of the estate of the decedent, in accordance with the provisions of Subpart O of this part.

(4) Whenever practicable the accounts for all current income bonds of the same series, with the same inscription, on which interest is payable on the same dates, will be consolidated and a single check will be issued on each interest payment date for interest on all such bonds. The check inscription may vary from the inscriptions on the bonds in cases of very long inscriptions or where there is lack of uniformity in the inscriptions on the bonds.

(5) The interest due at maturity in the case of bonds for which an optional extension privilege has not been granted and at the extended maturity date for all bonds for which an optional extension privilege has been granted will be paid with the principal and in the same manner. However, if the registered owner of a bond in beneficiary form dies on or after the due date without having presented and surrendered the bond for payment or authorized reissue, and is survived by the beneficiary, the interest may be paid to the legal representative of or the person entitled to the registered owner's estate. To obtain such payment, the bond with a request therefor by the beneficiary should be submitted together with evidence as required in Subpart O.

(c) *Notices affecting delivery of interest checks.* Notices affecting the delivery of interest checks, including changes in addresses, should be sent to the Bureau of the Public Debt, Division of Loans and Currency Branch, 536 South Clark Street, Chicago, Ill. 60605. Each bond should be described in the notice by issue date, serial number, series (including year of issue), and inscription appearing on the face of the bond. The bonds should not be submitted. The notice must be signed by the owner or a coowner, or in the case of a minor or incompetent as provided in paragraph (d) or (e) of this section. A notice which would affect delivery of an interest check will be acted upon as rapidly as possible, but if the notice is not received at least one month before an interest payment date, no assurance can be given that action can be taken in time to make the change, or suspend the mailing of the interest due on that date.

(d) *Representative appointed for the estate of a minor, incompetent, absentee, etc.* Interest on current income bonds will be paid to the representative appointed for the estate of the owner of such bonds who is a minor, incompetent, absentee, etc., in accordance with the provisions of § 315.50 relating to payment of the bonds. However, if the registration of the bonds does not include reference to the owner's status, the bonds should be submitted to the Bureau of the Public Debt, Division of Loans and Currency Branch, at the address shown in paragraph (c) of this section, or to a Federal Reserve Bank for appropriate reissue so that interest checks may be properly drawn and delivered. They must be accompanied by the proof of appointment required by § 315.50.

(e) *Adult incompetent's estate having no representative.* If an adult owner of a current income bond is incompetent to endorse and collect the interest checks and no legal guardian or similar representative is legally qualified to do so, the relative responsible for his care and support, or some other appropriate person, may apply to the Bureau of the Public Debt, Division of Loans and Currency Branch, for recognition as voluntary guardian for the purpose of receiving, endorsing, and collecting the checks. Form PD 2513 should be used in making application for this purpose.

(f) *Reissue during interest period.* Physical reissue of a bond will be made as soon as practicable without regard to interest payment dates. If a current income bond is reissued between interest payment dates, interest for the entire period will ordinarily be paid on the next interest payment date, by check drawn to the order of the person in whose name the bond is reissued. However, if reissue is made during the month preceding an interest payment date, the interest due on the first day of the next month may in some cases be paid to the former owner or the representative of his estate.

(g) *Termination of interest.* Interest on current income bonds will cease at maturity, or extended maturity in the case of bonds for which an optional extension period has been granted, or in case of redemption prior to maturity, on the last day of the interest period immediately preceding the date of redemption, except that, if the date of redemption falls on an interest payment date, interest will cease on that date. For example, if a bond on which interest is payable on January 1 and July 1 is redeemed on September 1, interest will cease on the preceding July 1, and no adjustment of interest will be made for the period from July 1 to September 1. The same rules apply in case of partial redemption with respect to the amount redeemed.

(h) *Endorsement of checks.* Interest checks may be collected upon the endorsement of the payee or his authorized representative in accordance with the regulations governing the endorsement and payment of Government warrants and checks, which are contained in Department Circular No. 21, current revision (Part 360 of this chapter). A form for the appointment of an attorney in fact for this purpose may be obtained from the Office of the Treasurer of the United States or from any Federal Reserve Bank. If the owner is incompetent or deceased and no legal representative of his estate has been or will be appointed, the Bureau of the Public Debt, Division of Loans and Currency Branch (address given in paragraph (c) of this section), or a Federal Reserve Bank will furnish instructions upon request.

(i) *Nonreceipt or loss of check.* If an interest check is not received or is lost after receipt, the Bureau of the Public Debt, Division of Loans and Currency Branch, should be notified of the facts and given information concerning the amount, number, and inscription of the bonds, as well as a description of the check, if possible.

---

last increase in redemption value of Series E bonds issued on or after May 1, 1952, prior to the start of the 10-year optional extension period covers these periods: Two months, from 9½ years through 9 years, 8 months, for bonds issued before February 1, 1957; five months, from 8½ years through 8 years, 11 months, for bonds issued on or after February 1, 1957, but before June 1, 1959; and three months, from 7½ years through 7 years, 9 months, for bonds issued on or after June 1, 1959.

[4] See Tables of Redemption Values of that circular for extended maturity values.

See footnote 6, page 19039.

**Subpart H—General Provisions for Payment and Redemption**

**§ 315.35 Provisions applicable both before and after maturity.[6]**

Payment of a savings bond will be made to the person or persons entitled thereto under the provisions of these regulations upon presentation and surrender of the bond with an appropriate request for payment, except that checks in payment will not be delivered to addresses in areas with respect to which the Treasury Department restricts or regulates the delivery of checks drawn against funds of the United States or any agency or instrumentality thereof. Payment will be made without regard to any notice of adverse claims to a bond and no stoppage or caveat against payment in accordance with the registration will be entered.

**§ 315.36 Before maturity.**

(a) *At option of owner.* Pursuant to its terms, a savings bond may not be called for redemption by the Secretary of the Treasury prior to maturity date, or extended maturity date in case of bonds for which an optional extension period has been granted, but may be redeemed in whole or in part at the option of the owner prior to maturity, or extended maturity, under the terms and conditions set forth in the offering circular for each series and in accordance with the provisions of these regulations, following presentation and surrender as provided in this subpart.

(b) *Series E.* A bond of Series E will be redeemed at any time after two months from issue date without advance notice, at the appropriate redemption value as shown in the revision of Department Circular No. 653 current at the time of redemption.

(c) *Series H, J and K.* A bond of Series J or K will be redeemed on one calendar month's notice and a bond of Series H will be redeemed after six months from issue date on one calendar month's notice to a Federal Reserve Bank or Branch, or the Bureau of the Public Debt, Division of Loans and Currency Branch, or the Office of the Treasurer of the United States, Securities Division. Such notice may be given separately in writing or by presenting and surrendering the bond with a duly executed request for payment. Payment will be made as of the first day of the first month following by at least one full calendar month the date of receipt of notice. For example, if notice is received on June 1, payment will be made as of July 1, but if notice is received between June 2 and July 1, inclusive, payment ordinarily will be made as of August 1. If notice is given separately, the bond must be presented and surrendered with a duly executed request for payment to the same agency to which notice is given, not less than 20 days before the date on which payment is to be made. For example, if notice is received on June 15, the bond should be received not later than July 12. (See § 315.32(g) for provisions as to interest on current income bonds redeemed prior to maturity.) A bond of Series H will be redeemed at PAR. A bond of Series J or K will be redeemed at the appropriate redemption value as shown in the table printed on the bond, except as provided in paragraph (d), of this section. (See § 315.37 for provisions as to notice to redeem current income bonds for which an optional extension period has been granted.)

(d) *Series K: Redemption at par.* (1) A bond of Series K issued in exchange for matured bonds of Series E under the provisions of Department Circular No. 906 is payable at par.

(2) A bond of Series K registered in the name of a natural person or persons in their own right will be paid at par upon the request of the person entitled to the bond upon the death of the owner or either coowner.

(3) A bond of Series K held by a trustee, life tenant, or other fiduciary (exclusive of trustees of a pension, retirement, investment, insurance, annuity or similar fund, or employees' savings plan) will be paid at par upon appropriate request upon the termination, in whole or in part, of a trust, life tenancy, or other fiduciary estate by reason of the death of a natural person, but in the case of partial termination, redemption at par will be made to the extent of not more than the pro rata portion of the trust or fiduciary estate so terminated. Bonds of Series K held by a financial institution in its name as trustee of its common trust fund will be paid at par upon the request of the fiduciary upon the termination, in whole or in part, of a participating trust by reason of the death of a natural person, to the extent of not more than the pro rata portion of the common trust fund so terminated.

The option to receive payment at par under subparagraph (d) (2) and (3) of this section may be exercised by a signed request for payment or by express written notice, in either case specifying that redemption at par is desired. Payment may be postponed to the second interest payment date following the date of death, if so requested; otherwise, payment will be made in regular course. A death certificate or other acceptable evidence of death must be submitted. In no case of redemption at par before maturity under subparagraph (2) and (3) of this paragraph will interest be payable beyond the second interest payment date following the date of death.

(e) *Withdrawal of request for redemption.* An owner who has presented and surrendered a savings bond to the Treasury Department or a Federal Reserve Bank or Branch or an authorized paying agent, for payment, with an appropriate request for payment, may withdraw such request if notice of intent to withdraw is given to and received by the same agency to which the bond was presented prior to the issuance of a check in payment by the Treasury Department or a Federal Reserve Bank, or payment by the authorized paying agent. Such request may be withdrawn under the same conditions by the executor or administrator of the estate of a deceased owner, or by the person or persons entitled to the bond under Subpart O of this part, or by the representative of the estate of a person under legal disability, unless presentation and surrender of the bond have cut off rights of survivorship under the provisions of Subpart M or Subpart N of this part.

**§ 315.37 At or after maturity.**

Pursuant to its terms, a savings bond of any series will be paid at or after maturity at the maturity value fixed by the terms of the Department Circular offering the particular series of bonds to the public, current at the time of redemption, and in no greater amount. No advance notice will be required for the redemption of matured savings bonds except that any current income bond for which an optional extension period has been provided will, beginning with the first day of the third calendar month following the calendar month in which the bond originally matured, be regarded as unmatured until it reaches its extended maturity date, and the same notice prior to redemption will be required for it as required for bonds of the same series which have not reached original maturity.

**§ 315.38 Requests for payment.**

(a) *Form and execution of requests.* A request for payment of a bond must be executed on the form appearing on the back of the bond unless (1) the bond is accepted by an authorized paying agent for payment or for presentation to a Federal Reserve Bank for payment without the owner's signature to the request for payment under the provisions of Department Circular No. 888, current revision (Part 330 of this chapter), or (2) authority is given for the execution of a separate or detached request.

(b) *Date of request.* Ordinarily, requests executed more than six months before the date of receipt of a bond for payment will not be accepted; nor will a bond ordinarily be accepted for redemption more than three calendar months prior to the date redemption is requested under these regulations.

(c) *Identification and signature of owner.* Unless the bond is presented under the provisions of paragraph (a) of this section or § 315.39(b), an owner in whose name the bond is inscribed or other person entitled to payment under the provisions of these regulations must appear before and establish his identity to an officer authorized to certify requests for payment (see Subpart I of this part), and in the presence of such officer sign the request for payment in ink, adding in the space provided the address to which the check issued in payment is to be mailed. A signature made by mark (X) must be witnessed by at least one disinterested person in addition to the certifying officer and must be attested by endorsement in the blank space, substantially as follows: "Witness to the above signature by mark," followed by the signature and address of the witness. If the name of the owner or other person entitled to payment as it appears in the registration or in evidence on file in the

---

[6] Bonds of Series A through D and Series F and G have all now matured. They earn no interest after maturity. Any such bonds which have not been redeemed should be presented for payment.

Bureau of the Public Debt, Division of Loans and Currency Branch, has been changed by marriage or in any other cases, or deceased owner cases, or other cases in which documentary evidence is

minister oaths, but his official character and jurisdiction should be certified by a

a request for reissue of a bond received prior to its maturity, or its extended

a minor, an incompetent, aged person, absentee, etc., and that there is a representative of his estate, payment will be

Bureau of the Public Debt, Division of Loans and Currency Branch, has been changed by marriage or in any other legal manner, the signature to the request for payment should show both names and the manner in which the change was made, for example, "Mrs. Mary T. Jones Smith (Mrs. Mary T. J. Smith or Mrs. Mary T. Smith), changed by marriage from Miss Mary T. Jones," or "John R. Young, changed by order of court from Hans R. Jung." (See § 315.49.) No request signed in behalf of the owner or person entitled to payment by an agent or a person acting under a power of attorney will be recognized by the Treasury Department, except when the bond has been pledged in lieu of surety under Department Circular No. 154, current revision (Part 225 of this chapter), as provided in § 315.16.

(d) After the request for payment has been signed by the owner, the certifying officer should complete and sign the certificate following the request for payment and the bond should then be presented and surrendered as provided in § 315.39(a).

**§ 315.39 Presentation and surrender.**

(a) *All series.* Except for cases coming within the provisions of paragraph (b) of this section, after the request for payment has been duly signed by the owner and certified as provided in Subpart I of this part, the bond should be presented and surrendered to (1) a Federal Reserve Bank or Branch, (2) the Bureau of the Public Debt, Division of Loans and Currency Branch, or (3) the Office of the Treasurer of the United States, Securities Division. Usually payment will be expedited by surrender to a Federal Reserve Bank or Branch. In all cases presentation will be at the expense and risk of the owner. Payment will be made by check drawn to the order of the registered owner or other person entitled and mailed to the address given in the request for payment or, if no address is given, to the address shown in instructions accompanying the bond.

(b) *Optional procedure limited to bonds of Series A to E, inclusive, in the names of individual owners or coowners only.* A natural person whose name is inscribed on the face of a bond of Series A, B, C, D, or E, either as owner or coowner in his own right, may present such bond for redemption to an authorized paying agent. If such a person is not known to the paying agent, he must establish his identity to the agent. (See § 315.43.) Such owner or coowner must sign the request for payment, and add his home or business address. Even though the request for payment may have been signed, or signed and certified, before presentation of the bond, the representative of the paying agent must be satisfied that the person presenting the bond for payment is the owner or coowner and may require him to sign the request for payment again. If the bond is in order for payment, the paying agent will make immediate payment at the appropriate redemption value without charge to the owner or coowner. This procedure is not applicable to partial redemption cases, or deceased owner cases, or other cases in which documentary evidence is required.

**§ 315.40 Partial redemption.**

A bond of any series may be redeemed in part at current redemption value, but only in amounts corresponding to authorized denominations, upon presentation and surrender of the bond in accordance with § 315.39(a). In any case in which partial redemption is authorized, before the request for payment is signed the phrase "to the extent of $-------- (face value) and reissue of the remainder" should be added to the first sentence of the request. Upon partial redemption of the bond, the remainder will be reissued as of the original issue date, as provided in Subpart J of this part. For payment of interest on current income bonds in case of partial redemption, see Subpart G of this part.

**§ 315.41 Nonreceipt or loss of checks issued in payment.**

In case a check in payment of a bond surrendered for redemption is not received within a reasonable time or in case such check is lost after receipt, notice should be given to the same agency to which the bond was surrendered for payment, accompanied by a description of the bond by series, denomination, serial number, and registration. The notice should state whether or not the check was received and should give the date upon which the bond was surrendered for payment.

## Subpart I—Certifying Officers

**§ 315.42 Persons who may certify.**

The following persons are authorized to act as certifying officers for the purpose of certifying requests for payment and forms with respect to bonds:

(a) *At United States post offices.* Any postmaster, acting postmaster, or inspector in charge or other post office official or clerk designated for that purpose. One or more of these officials will be found at every United States post office, classified branch, or station. A post office official or clerk other than a postmaster, acting postmaster, or inspector in charge should certify in the name of the postmaster or acting postmaster, followed by his own signature and official title, for example, "John Doe, postmaster, by Richard Roe, postal cashier." Signatures of these officers should be authenticated by a legible imprint of the post office dating stamp.

(b) *At banks, trust companies, and branches.* Any officer of any bank or trust company incorporated in the United States (including for this purpose its territories and possessions and the Commonwealth of Puerto Rico) or domestic or foreign branch of such bank or trust company; any officer of a Federal Reserve Bank, Federal Land Bank, and Federal Home Loan Bank; any employee of any such bank or trust company expressly authorized by the corporation for that purpose, who should sign over the title "Designated Employee"; and Federal Reserve Agents and Assistant Federal Reserve Agents located at the several Federal Reserve Banks. Certifications by any of these officers or designated employees should be authenticated by either a legible impression of the corporate seal of the bank or trust company or, in the case of banks or trust companies and their branches which are authorized issuing agents for bonds of Series E, by a legible imprint of the issuing agent's dating stamp.

(c) *Issuing agents not banks or trust companies.* Any officer of a corporation not a bank or trust company and of any other organization which is an authorized issuing agent for bonds of Series E. All certifications by such officers must be authenticated by a legible imprint of the issuing agent's dating stamp.

(d) *Commissioned and warrant officers of Armed Forces.* Commissioned and warrant officers of any of the Armed Forces of the United States, but only for members and the families of members of their respective services and civilian employees at Posts or Bases or Stations. Such certifying officer should indicate his rank and state that the person signing the request is one of the class whose request he is authorized to certify.

(e) *United States officials.* Judges, clerks, and deputy clerks of United States courts, including United States courts for the territories, possessions, the Commonwealth of Puerto Rico, and the Canal Zone; United States Commissioners; United States Attorneys; United States Collectors of customs and their deputies; Regional Commissioners and District Directors of Internal Revenue and Internal Revenue agents; the officer in charge of any home, hospital, or other facility of the Veterans Administration, but only for patients and employees of such facilities; certain officers of Federal penal institutions designated for that purpose by the Secretary of the Treasury; certain officers of the United States Public Health Service Hospitals at Lexington, Kentucky, and Fort Worth, Texas, and of United States Marine Hospitals at Fort Stanton, New Mexico, and Carville, Louisiana, designated for that purpose by the Secretary of the Treasury (in each case, however, only for inmates or employees of the institution involved).

(f) *Officers authorized in particular localities.* Certain designated officers in the Treasury Department; the Governor and Treasurer of Puerto Rico; the Governor and Commissioner of Finance of the Virgin Islands; the Governor and Director of Finance of Guam; the Governor and Director of Administrative Services of American Samoa; the Governor, paymaster, or acting paymaster and collector or acting collector of the Panama Canal; and postmasters and acting postmasters of the Bureau of Posts of the Canal Zone.

(g) *In foreign countries.* In a foreign country requests for payment may be signed in the presence of and be certified by any United States diplomatic or consular representative, or the manager or other officer of a foreign branch of a bank or trust company incorporated in the United States whose signature is attested by an impression of the corporate seal or is certified to the Treasury Department. If such an officer is not available, requests for payment may be signed in the presence of and be certified by a notary or other officer authorized to administer oaths, but his official character and jurisdiction should be certified by a United States diplomatic or consular officer under seal of his office.

(h) *Special provisions.* In the event none of the officers authorized to certify requests for payment of bonds is readily accessible, the Commissioner of the Public Debt, the Deputy Commissioner of the Public Debt in Charge of the Chicago Office, the Treasurer of the United States, or any Federal Reserve Bank or Branch is authorized to make special provision for any particular case.

**§ 315.43 General instructions to certifying officers.**

A certifying officer should require that a person presenting bonds, or forms with respect thereto, establish his identity by positive and reliable evidence before the bonds or forms are signed, unless the presenter is personally well known to the officer. Such officer and, if he is an officer or employee of an organization, the organization will be held fully responsible for the adequacy of the identification. The certifying officer should place an adequate notation on the back of the bond or form, or on a separate record, showing exactly how identification was established. The certifying officer must affix to the certification his official signature, title, seal or dating stamp, address (if not shown in the seal or stamp), and the date of execution. Officers of Veterans Administration Facilities, Public Health Service Hospitals, Marine Hospitals, and Federal penal institutions should use the seal of the particular institution or service, where such seal is available. A certifying officer other than a post office official, officer of a bank or trust company, or officer of an issuing agent who does not possess an official seal should add a statement to that effect to his certification.

**§ 315.44 Interested person not to certify.**

A certifying officer may not certify a request for payment of a bond, or a form with respect to a bond, in which he has or is acquiring an interest, either in his own right or in a representative capacity.

## Subpart J—Reissue and Denominational Exchange

**§ 315.45 General.**

(a) Reissue of a bond may be made only under the conditions specified in these regulations. Reissue is not authorized solely for the purpose of effecting an exchange as between authorized denominations, but in case of authorized reissue the new bond or bonds may be issued in any authorized denomination or denominations.

(b) Reissue will not be made if the request therefor is received less than one full calendar month before the maturity date, except for bonds of Series E and H for which optional extension periods have been provided in Department Circulars Nos. 653 and 905, current revisions (Parts 316 and 332 of this chapter). In the case of such bonds, reissue will not be made if the request is received less than one full month before the extended maturity date. However, a request for reissue of a bond received prior to its maturity, or its extended maturity date, will be effective to establish ownership as though the requested reissue had been made.

(c) A request for reissue of a bond received on or after its maturity, or its extended maturity date, will not be effective to name a coowner or beneficiary or to promote a beneficiary to a coowner, but requests for reissue in the names of persons who have become entitled by operation of law will be recognized as establishing the right of those persons to receive payment.

(d) Reissues under the provisions of this subpart may be made only at (1) a Federal Reserve Bank or Branch, (2) the Bureau of the Public Debt, Division of Loans and Currency Branch, or (3) the Office of the Treasurer of the United States, Securities Division.

**§ 315.46 Requests for reissue.**

A request for reissue should be made on the prescribed form by the person authorized under these regulations to make such request. Appropriate forms may be obtained from any Federal Reserve Bank, the Office of the Treasurer of the United States, or the Bureau of the Public Debt, Division of Loans and Currency Branch.

**§ 315.47 Effective date.**

In any case of authorized reissue, the Treasury Department will treat the receipt by (a) a Federal Reserve Bank or Branch, or (b) the Bureau of the Public Debt, Division of Loans and Currency Branch, or (c) the Office of the Treasurer of the United States, Securities Division, of a bond and an appropriate request for reissue thereof as determining the date upon which the reissue is effective. If the owner or either coowner of a bond dies after he has presented and surrendered the bond for authorized reissue, the bond will be regarded as though reissued in the decedent's lifetime.

**§ 315.48 Correction of errors.**

Reissue of a bond may be made to correct an error in the original issue, upon appropriate request supported by satisfactory proof of the error.

**§ 315.49 Change of name.**

An owner, coowner, or beneficiary whose name is changed by marriage, divorce, annulment, order of court, or in any other legal manner after the issue of a bond should submit the bond with a request on Form PD 1474 for reissue to substitute the new name for the name inscribed on the bond. The signature to the request for reissue should show the new name, the manner in which the change was made and the former name. If the change of name was made other than by marriage, the request must be supported by satisfactory proof of the change.

## Subpart K—Minors, Incompetents, Aged Persons, Absentees, etc.

**§ 315.50 Payment to representative of estate.**

(a) If the form of registration of a savings bond indicates that the owner is a minor, an incompetent, aged person, absentee, etc., and that there is a representative of his estate, payment will be made to such representative. During the lifetime of such owner, the representative of his estate will be recognized as entitled to obtain payment of a bond registered in the name of the ward as owner or coowner, or of a bond to which the ward has become entitled. After the death of such owner, his representative, so long as he is authorized to act for the estate, will be entitled to obtain payment of a bond to which the ward was solely entitled. If the form of registration does not indicate there is a representative of the estate of a minor owner or coowner, a notice that there is such a representative will not be accepted for the purpose of preventing payment to the minor or to a parent or other person on behalf of the minor, as provided in §§ 315.51 and 315.52.

(b) The request for payment appearing on the back of a bond should be signed by the representative as such, for example, "John A. Jones, guardian (committee) of the estate of Henry W. Smith, a minor (an incompetent)." Unless the form of registration gives the name of the representative requesting payment, a certificate, or a certified copy of the letters of appointment, from the court making the appointment, under court seal, or other proof of qualification if not appointed by a court, should be submitted with the bond.

**§ 315.51 Payment to minors.**

If the owner of a savings bond is a minor and the form of registration does not indicate that there is a representative of his estate, payment will be made to him upon his request, provided he is of sufficient competency to sign his name to the request for payment and to understand the nature of the transaction. In general, the fact that the request for payment has been signed by a minor and duly certified will be accepted as sufficient proof of competency and understanding.

**§ 315.52 Payment to a parent or other person on behalf of a minor.**

If the owner of a savings bond is a minor and the form of registration does not indicate that there is a representative of his estate, and if such minor owner is not of sufficient competency to sign his name to the request for payment and to understand the nature of the transaction, payment will be made to either parent of the minor with whom he resides or, if the minor does not reside with either parent, then to the person who furnishes his chief support. His parent or the person furnishing his chief support should execute the request for payment and furnish a certificate, which may be typed or written on the back of the bond, as to his right to act for the minor. If a parent signs the request, the certificate and signature thereto should be in substantially the following form:

"I certify that I am the mother (or father) of John C. Jones and the person with whom he resides. He is ------ years of age and is not of sufficient competency and understanding to make this request.

"Mrs. Mary Jones
on behalf of John C. Jones."

If a person other than a parent signs the request, the certificate and signature thereto, including a reference to the person's relationship, if any, to the minor, should be in substantially the following form:

"I certify that John C. Jones does not reside with either parent and that I furnish his chief support. He is ------ years of age and is not of sufficient competency and understanding to make this request.

"Mrs. Alice Brown, grandmother, on behalf of John C. Jones."

**§ 315.53 Payment or reinvestment upon request of voluntary guardian of incompetent.**

If the adult owner of bonds is incompetent to request and receive payment thereof and no other person is legally qualified to do so, the relative responsible for his care and support or some other person may submit an application as voluntary guardian for redemption of the bonds in the following cases:

(a) Where the proceeds of the bonds are needed to pay expenses already incurred, or to be incurred during any 90-day period, for the support of the incompetent or his legal dependents, bonds belonging to the incompetent, not exceeding $1,000 (face value), may be submitted for redemption;

(b) Where the bond has matured and it is desired to redeem it and reinvest the proceeds in savings bonds. The proceeds of any matured appreciation type bonds ordinarily will be required to be reinvested in Series E bonds. The proceeds of matured current income bonds may be invested in Series H or Series E bonds. The new bonds must be registered in the name of the incompetent followed by the words "an incompetent." A living coowner or beneficiary named on the matured bonds must be designated on the new bonds unless he is a competent adult and furnishes a certified statement consenting to omission of his name. If an amount insufficient to purchase an additional bond of any authorized denomination of any series remains after the reinvestment, the voluntary guardian may if he so desires, furnish additional funds sufficient to purchase another bond of either series in the lowest available denomination. If additional funds are not furnished, the remaining amount will be paid to the voluntary guardian for the use and benefit of the incompetent.

**§ 315.54 Reissue.**

A bond of which a minor or other person under legal disability is the owner or in which he has an interest may be reissued upon an authorized reissue transaction under the following conditions:

(a) A minor of sufficient competency to sign his name to the request and to understand the nature of the transaction may request reissue to add a coowner or beneficiary to a bond registered in his name alone or to which he is entitled in his own right.

(b) A bond on which a minor is named as beneficiary or coowner may be reissued in the name of a custodian for the minor under a statute authorizing gifts to minors upon the request of the adult whose name appears on the bond as owner or coowner.

(c) Except to the extent provided in paragraphs (a) and (b) of this section, reissue will be restricted to a form of registration which does not adversely affect the existing ownership or interest of the minor or such other person. Requests for reissue should be executed by the person authorized to request payment under §§ 315.50 and 315.52, or who may request recognition as voluntary guardian under Sec. 315.53 and in the same manner.

## Subpart L—Natural Person as Sole Owner

**§ 315.55 Payment.**

A savings bond registered in the name of a natural person in his own right, without a coowner or beneficiary, will be paid to him during his lifetime under Subpart H of this part. Upon the death of the owner such bond will be considered as belonging to his estate and will be paid under Subpart O of this part, except as otherwise provided in these regulations.

**§ 315.56 Reissue for certain purposes.**

A savings bond registered in the name of a natural person in his own right may be reissued upon appropriate request by him (subject to the provisions of § 315.54), upon presentation and surrender during his lifetime, for the following purposes:

(a) *Addition of a coowner or beneficiary.* To name another natural person as coowner or as beneficiary. Form PD 1787 should be used.

(b) *Divorce or annulment.* To name as registered owner the other party to a divorce or annulment occurring after issue of the bond. Form PD 3360 should be used.

(c) *Certain degrees of relationship.* To name as registered owner a person related to the owner as provided in § 315.61(a)(1)(i), with a beneficiary or coowner, if so desired. Form PD 3360 should be used.

(d) *Trustees.* To name the trustee of (1) a personal trust estate created by the owner, or (2) a personal trust estate created by other than the owner if a beneficiary of the trust and the owner are related as provided in § 315.61(a)(1)(i). Form PD 1851 should be used.

## Subpart M—Two Natural Persons as Coowners

**§ 315.60 Payment during the lives of both coowners.**

A savings bond registered in coownership form, for example, "John A. Jones or Mrs. Mary C. Jones," will be paid to either upon his separate request, and upon payment to him the other shall cease to have any interest in the bond. If both request payment jointly, payment will be made by check drawn to their order jointly, for example, "John A. Jones AND Mrs. Mary C. Jones."

**§ 315.61 Reissue during the lives of both coowners.**

(a) *General.* A bond registered in coownership form may be reissued upon its presentation and surrender during the lifetime and competency of both coowners, upon the request of both, as follows:

(1) In the name of either coowner, alone or with a new coowner or beneficiary—

(i) If the coowner whose name is to remain on the bond is related to the coowner whose name is to be eliminated as: husband, wife; parent, child (including stepchild); brother, sister (including the half blood, stepbrother, stepsister, or brother or sister through adoption); grandparent, grandchild; great grandparent, great grandchild; uncle, aunt, nephew, niece (including a child of a brother or sister of the present spouse); granduncle, grandaunt, grandnephew, grandniece; father-in-law, mother-in-law, son-in-law, daughter-in-law; brother-in-law, sister-in-law.

(ii) If one of them marries after issue of the bond.

(iii) If they are divorced or legally separated from each other, or their marriage is annulled, after issue of the bond.

(2) In the name of a third person related to either coowner, as provided in subparagraph (1)(i) of this paragraph, with a coowner or beneficiary, if so desired. (Form PD 1938 should be used for any of the above classes.)

(3) In the name of a trustee of (i) a personal trust estate created by either coowner, or (ii) a personal trust estate created by other than a coowner if a beneficiary of the trust is related to either coowner as provided in subparagraph (1)(i) of this paragraph. Form PD 1851 should be used.

(b) *Minor coowners.* A request for reissue signed by a minor coowner of sufficient competency to sign his name to the request and understand the nature of the transaction, and for whose estate no representative has been appointed, will be recognized if the bond is to be reissued in his name alone, or in his name with a new coowner or beneficiary. A request for reissue to eliminate the other coowner, signed in behalf of a minor coowner by the representative of his estate will be recognized; however, a request to eliminate the name of the minor will be recognized only if supported by evidence that a court has ordered the representative to request such reissue (see § 315.23). A minor coowner for whose estate no representative has been appointed may be promoted to sole owner upon the request of the competent coowner. A competent coowner may, upon his own request, have the bond reissued to remove his name and name a custodian for the minor under a statute authorizing gifts to minors.

(c) *Incompetent coowners.* Reissue will not be made if one coowner is incompetent and a representative of the incompetent's estate has not been appointed, except to add "an incompetent" after his name or to eliminate the other coowner from the registration. If there is a representative, the provisions of paragraph (b) of this section apply as to his execution of a request for reissue.

**§ 315.62 After the death of one or both coowners.**

If either coowner dies without the bond having been presented and surrendered for payment or authorized reissue, the survivor will be recognized as the sole and absolute owner. Thereafter, payment or reissue will be made as though the bond were registered in the name of the survivor alone (see Subpart L of this part), except that a request for reissue by him must be supported by proof of death of the other coowner, and except further that after the death of the survivor proof of death of both coowners and of the order in which they died will be required. The presentation and surrender of a bond by one coowner for payment establishes his right to receive the proceeds of the bond, and if he should die before the transaction is completed, payment will be made to the legal representative of, or persons entitled to, his estate in accordance with the provisions of Subpart O of this part. If either coowner dies after the bond has been presented and surrendered for authorized reissue (see § 315.47), the bond will be regarded as though reissued during his lifetime.

**§ 315.63 Upon death of both coowners in a common disaster, etc.**

If both coowners die under such conditions that it cannot be established either by presumption of law or otherwise which died first, the bond will be considered as belonging to the estates of both equally, and payment or reissue will be made accordingly. (See Subpart O of this part.)

## Subpart N—Two Natural Persons as Owner and Beneficiary

**§ 315.65 During the lifetime of the registered owner.**

A savings bond registered in beneficiary form, for example, "John A. Jones payable on death to Mrs. Mary C. Jones," will be paid or reissued upon presentation and surrender during the lifetime of the registered owner, as follows:

(a) *Payment.* The bond will be paid to the registered owner during his lifetime upon his properly executed request as though no beneficiary had been named in the registration. The presentation and surrender of the bond by the registered owner for payment establishes his exclusive right to the proceeds of the bond, and if he should die before the transaction is completed, payment will be made to the legal representative of, or the persons entitled to, his estate upon receipt of proof of the appointment and qualification of the representative or the identity of the persons entitled, in accordance with the provisions of Subpart O of this part.

(b) *Reissue.* (1) The bond will be reissued on a duly certified request of the owner:

(i) To name the beneficiary designated on the bond as coowner. Form PD 1787 should be used.

(ii) To eliminate his name as owner and to name as owner a custodian for the beneficiary, if a minor, under a statute authorizing gifts to minors. Form PD 3360 should be used.

(iii) To eliminate the beneficiary, to substitute another person as beneficiary, or to name another person as coowner, if the request of the owner is supported by the beneficiary's duly certified consent to elimination of his name or by proof of his death.[10] Form PD 1787 should be used.

(iv) In the name of a trustee of (*a*) a personal trust estate created by the owner, or (*b*) a personal trust estate created by other than the owner if the owner and a beneficiary of the trust are related as provided in § 315.61(a)(1)(i), and the request of the owner is supported by the duly certified consent of the beneficiary, or by proof of his death.[10] Form PD 1851 should be used by the owner and the beneficiary.

**§ 315.66 After the death of the registered owner.**

If the registered owner dies without the bond having been presented and surrendered for payment or authorized reissue and is survived by the beneficiary, upon proof of death of the owner the beneficiary will be recognized as the sole and absolute owner, and payment or reissue will be made as though the bond were registered in his name alone (see Subpart L of this part).

## Subpart O—Deceased Owners

**§ 315.70 General.**

Upon the death of the owner of a savings bond who is not survived by a coowner or designated beneficiary and who had not during his lifetime presented and surrendered the bond for payment or an authorized reissue, the bond will be considered as belonging to his estate and will be paid or reissued accordingly as hereinafter provided, except that reissue under this subpart will not be permitted if otherwise in conflict with these regulations. If the person entitled is an alien who is a resident of an area with respect to which the Treasury Department restricts or regulates the delivery of checks drawn against funds of the United States of America or any agency or instrumentality thereof, payment of, and interest on a bond will not be made so long as the restriction applies. A creditor is entitled only to payment of a to the extent of not more than his claim.

**§ 315.71 Special provisions applicable to small amounts of savings bonds, interest checks or redemption checks.**

Entitlement to, or the authority to dispose of, a small amount of bonds and checks issued in payment thereof or in payment of interest thereon, belonging to the estate of a decedent, may be established through the use of certain short forms, according to the aggregate face amount of bonds and checks involved (excluding checks representing interest on the bonds), as indicated by the following table:

| Amount | Circumstances | Form | To be executed by |
|---|---|---|---|
| $100 | No administration | PD 2216 | Person who paid burial expenses. |
| $500 | Estate being administered | PD 2488-1 | Executor or administrator. |
| $500 | Estate settled | PD 2488 | Former executor or administrator, attorney or other qualified person. |

**§ 315.72 Estates administered.**

(a) *In course of administration.* If the estate of a decedent is being administered in court, the bond will be paid to the duly qualified representative of the estate or will be reissued in the names of the persons entitled to share in the estate, upon the request of the representative and compliance with the following requirements:

(1) Where there are two or more legal representatives, all must join in the request for payment or reissue, except as provided in §§ 315.77 and 315.78.

(2) The request for payment or reissue should be signed in the form, for example, "John A. Jones, administrator of the estate (or executor of the will) of Henry W. Jones, deceased," and must be supported by proof of the representative's authority in the form of a court certificate or a certified copy of the representative's letters of appointment. The certificate or the certification to the letters must be under seal of the court and, except in the case of a corporate representative, must contain a statement that the appointment is in full force and should be dated within six months of the date of presentation of the bond, unless the certificate or letters show that the appointment was made within one year immediately prior to such presentation.

(3) In case of reissue the legal representative of the estate should certify that each person in whose name reissue is requested is entitled to the extent specified for each and has consented to such reissue. A request for reissue by the legal representative should be made on Form PD 1455. If a person in whose name reissue is requested desires to name a coowner or beneficiary, such person should execute an additional request for that purpose, using Form PD 1787.

(b) *After settlement through court proceedings.* If the estate of the decedent has been settled in court, the bond will be paid to, or reissued in the name of, the person entitled thereto as determined by the court. The request for payment or reissue should be made by the person shown to be entitled, supported by a duly certified copy of the representative's final account as approved by the court, decree of distribution, or other pertinent court records, supplemented, if there are two or more persons having an apparent interest in the bond, by an agreement executed by them concerning the disposition of the bond. Form PD 1787 should be used by the person entitled if he wishes to name a coowner or beneficiary.

**§ 315.73 Estates not administered.**

(a) *Special provisions under State laws.* If, under State law, a person has been recognized or appointed to receive or distribute the assets of a decedent's estate without regular administration, his request for payment or reissue of a bond to the person or persons entitled will be

[10] The provisions of this section do not apply to bonds on which the Treasurer of the United States of America is named as beneficiary.

accepted provided he submits appropriate evidence of his authority.

(b) *Agreement of persons entitled.* When it appears that no legal representative of a decedent's estate has been or will be appointed, the bond will be paid to, or reissued in the name of, the person or persons entitled, including those entitled as donees of a gift causa mortis, pursuant to an agreement and request by all persons entitled to share in the decedent's personal estate. A form of agreement for settlement without administration, Form PD 1946-1, should be used for cases in which the total face amount of bonds and redemption and interest checks belonging to the decedent's estate is in excess of $500. Where the total face amount does not exceed $500, Form PD 1946 may be used. If the persons entitled to share in the personal estate include minors or incompetents, payment or reissue of the bond will not be permitted without administration except to them or in their names unless their interests are otherwise protected to the satisfaction of the Treasury Department.

## Subpart P—Fiduciaries

### § 315.75 Payment.

A savings bond registered in the name of a fiduciary or otherwise belonging to a fiduciary estate will be paid to the fiduciary or fiduciaries in accordance with the provisions of §§ 315.77 and 315.78.

### § 315.76 Reissue.

(a) *In the name of person entitled—*(1) *Distribution of trust estate in kind.* A bond to which a beneficiary of a trust estate has become lawfully entitled in his own right or in a fiduciary capacity, in whole or in part, under the terms of a trust instrument, will be reissued in his name to the extent of his interest, upon the request of the trustee or trustees and their certification that such person is entitled and has agreed to reissue in his name.

(2) *After termination of trust estate.* If the person who would be lawfully entitled to a bond upon the termination of a trust does not desire to have distribution made to him in kind, as provided in subparagraph (1) of this paragraph, the trustee or trustees should present the bond for payment before the estate is terminated. If, however, the estate is terminated without such payment or reissue having been made, the bond will thereafter be paid to or reissued in the name of the person lawfully entitled upon his request and satisfactory proof of ownership, supplemented, if there are two or more persons having any apparent interest in the bond, by an agreement executed by all such persons concerning the disposition of the bond.

(3) *Upon termination of guardianship estate.* If the estate of a minor or incompetent or of an absentee is terminated, during the ward's lifetime, a bond registered to show that there is a representative of the estate will be reissued in the name of the former ward upon the representative's request and certification that the former ward is entitled and has agreed to reissue in his name (Form PD 1455 should be used), or will be paid to or reissued in the name of the former ward upon his own request, supported in either case by satisfactory evidence that his disability has been removed or that an absentee has returned to claim his property. Certification by the representative that a former minor has attained his majority, that a former incompetent has been legally restored to competency, that a legal disability of a female ward has been removed by marriage, if the state law so provides, or that an absentee has appeared to claim his property, will ordinarily be accepted as sufficient (see § 315.77 if the representative's name is not shown in the registration). Upon the termination of the estate as the result of the death of the ward, a bond registered to show that there is a representative of his estate will be reissued in accordance with the provisions of Subpart O of this part.

(4) *Upon termination of life estate.* Upon the death of a life tenant, a bond registered in his name as life tenant may be reissued in the name of the person or persons entitled pursuant to an agreement and request of all of the persons having an interest in the remainder.

(b) *In the name of a succeeding fiduciary.* If a fiduciary in whose name a bond is registered has been succeeded by another, the bond will be reissued in the name of the succeeding fiduciary upon appropriate request and satisfactory evidence of successorship. Form PD 1455 should be used.

(c) *In the name of financial institution as trustee of common trust fund.* A bond held by a bank, trust company, or other financial institution as a trustee, guardian or similar representative, executor or administrator may be reissued in its name as trustee of its common trust fund to the extent that participation therein by the institution in such capacity is authorized by law or applicable regulations. A request for reissue to the institution as trustee of its common trust fund should be executed on its behalf in the capacity in which the bond is held and by the co-fiduciary, if any. Form PD 1455 should be used.

### § 315.77 Requests for reissue or payment prior to maturity or extended maturity.

The following rules apply to both requests for reissue and payment by fiduciaries: A request for reissue or payment prior to maturity, or extended maturity for bonds for which an optional extension period has been provided, must be signed by all acting fiduciaries unless by express statute, decree of court, or the terms of the instrument under which the fiduciaries are acting, some one or more of them may properly execute the request. If the fiduciaries named in the registration are still acting, no further evidence of authority will be required. Otherwise, a request must be supported by evidence as specified below:

(a) *Fiduciaries by title only.* If the bond is registered in the titles, without the names, of fiduciaries not acting as a board, satisfactory evidence of their incumbency must be furnished, except in the case of bonds registered in the title of public officers as trustees.

(b) *Succeeding fiduciaries.* If the fiduciaries in whose names the bond is registered have been succeeded by other fiduciaries, satisfactory evidence of successorship must be furnished.

(c) *Boards, committees, etc.* A savings bond registered in the name of a board, committee, commission, or other body, empowered to act as a unit and to hold title to the property of a religious, educational, charitable, or non-profit organization or public corporation will be paid upon a request for payment signed in the name of the board or other body by an authorized officer thereof. A request so signed and duly certified will ordinarily be accepted without further evidence of the officer's authority. The check in payment of the bond will be drawn in the name of the board or other body as fiduciary for the organization named in the registration or shown by satisfactory evidence to be entitled as successor thereto.

(d) *Corporate fiduciaries.* If a public or private corporation or a political body, such as a state or county, is acting as a fiduciary, a request must be signed in the name of the corporation or other body in the fiduciary capacity in which it is acting, by an authorized officer thereof. A request so signed and duly certified will ordinarily be accepted without further evidence of the officer's authority.

(e) *Registration not disclosing trust or other fiduciary estate.* If the registration of the bond does not show that it belongs to a trust or other fiduciary estate or does not identify the estate to which it belongs, satisfactory evidence of ownership must be furnished in addition to any other evidence required by this section.

### § 315.78 Requests for payment at or after maturity.

A request for payment at or after the maturity date or extended maturity date for bonds for which an optional extension period has been provided, signed by any one or more acting fiduciaries, will be accepted. Payment ordinarily will be made by check drawn as the bond is inscribed.

## Subpart Q—Private Organizations (Corporations, Associations, Partnerships, etc.) and Governmental Agencies, Units and Officers

### § 315.80 Payment to corporations or unincorporated associations.

A savings bond registered in the name of a private corporation or an unincorporated association will be paid to the corporation or unincorporated association upon request for payment on its behalf by a duly authorized officer thereof. The signature to the request should be in the form, for example, "The Jones Coal Company, a corporation, by John Jones, President," or "The Lotus Club, an unincorporated association, by William A. Smith, Treasurer." A request for payment so signed and duly certified will ordinarily be accepted without further evidence of the officer's authority.

### § 315.81 Payment to partnerships.

A savings bond registered in the name of an existing partnership will be paid upon a request for payment signed by a general partner. The signature to the request should be in the form, for example, "Smith and Jones, a partnership, by John Jones, a general partner." A request for payment so signed and duly certified will ordinarily be accepted as sufficient evidence that the partnership is still in existence and that the person signing the request is duly authorized.

### § 315.82 Reissue or payment to successors of corporations, unincorporated associations, or partnerships.

A savings bond registered in the name of a private corporation, an unincorporated association, or a partnership which has been succeeded by another corporation, unincorporated association, or partnership by operation of law or otherwise, as the result of merger, consolidation, incorporation, reincorporation, conversion, or reorganization, or which has been lawfully succeeded in any manner whereby the business or activities of the original organization are continued without substantial change, will be paid to or reissued in the name of the succeeding organization upon appropriate request on its behalf, supported by satisfactory evidence of successorship. Form PD 1540 should be used.

### § 315.83 Reissue or payment on dissolution of corporation or partnership.

(a) *Corporations.* A savings bond registered in the name of a private corporation which is in the process of dissolution will be paid to the authorized representative of the corporation upon a duly executed request for payment, supported by satisfactory evidence of the representative's authority. Upon the termination of dissolution proceedings, the bond may be reissued in the names of those persons, other than creditors, entitled to the assets of the corporation, to the extent of their respective interests. Reissue under this subsection will be made upon the duly executed request of the authorized representative of the corporation and upon proof that all statutory provisions governing the dissolution of the corporation have been complied with and that the persons in whose names reissue is requested are entitled and have agreed to the reissue. If the dissolution proceedings are under the direction of a court, a certified copy of an order of the court, showing the authority of the representative to make the distribution requested, must be furnished.

(b) *Partnerships.* A savings bond registered in the name of a partnership which has been dissolved by death or withdrawal of a partner, or in any other manner, will be paid upon a request for payment by any partner or partners authorized by law to act on behalf of the dissolved partnership, or will be paid to or reissued in the names of the persons, other than creditors, entitled thereto as the result of such dissolution to the extent of their respective interests, upon their request supported by satisfactory evidence of their title, including proof that the debts of the partnership have been paid or properly provided for. Form PD 2514 should be used.

### § 315.84 Payment to institutions (churches, hospitals, homes, schools, etc.).

A savings bond registered in the name of a church, hospital, home, school, or similar institution without reference in the registration to the manner in which it is organized or governed or to the manner in which title to its property is held will be paid upon a request for payment signed on behalf of such institution by an authorized representative. For the purpose of this section, a request for payment signed by a pastor of a church, superintendent of a hospital, president of a college, or by any official generally recognized as having authority to conduct the financial affairs of the particular institution will ordinarily be accepted without further proof of his authority. The signature to the request should be in the form, for example, "Shriners' Hospital for Crippled Children, St. Louis, Mo., by William A. Smith, superintendent," or "St. Mary's Roman Catholic Church, Albany, N.Y., by John Jones, pastor."

### § 315.85 Reissue in name of trustee or agent for investment purposes.

A savings bond registered in the name of a religious, educational, charitable or nonprofit organization, whether or not incorporated, may be reissued in the name of a bank, trust company or other financial institution, or an individual, as trustee or agent under an agreement with the organization under which the trustee or agent holds funds of the organization, in whole or in part, for the purpose of investing and reinvesting the principal and paying the income to the organization. Form PD 2177 should be used and should be signed on behalf of the organization by an authorized officer.

### § 315.86 Reissue upon termination of investment agency.

A savings bond registered in the name of a bank, trust company, or other financial institution, or individual, as agent for investment purposes only, under an agreement with a religious, educational, charitable, or nonprofit organization, may be reissued in the name of the organization upon termination of the agency. The former agent should request such reissue and should certify that the organization is entitled by reason of the termination of the agency, using Form PD 1455. If such request and certification are not obtainable, the bond will be reissued in the name of the organization upon its own request, supported by satisfactory evidence of the termination of the agency.

### § 315.87 Payment to governmental agencies and units.

A savings bond registered in the name of a state, county, city, town, or village, or in the name of a federal, state, or local governmental agency such as a board, commission, or corporation, will be paid upon a request signed in the name of the governmental agency or unit by a duly authorized officer thereof. A request for payment so signed and duly certified will ordinarily be accepted without further proof of the officer's authority.

### § 315.88 Payment to Government officers.

A savings bond registered in the official title of an officer of a governmental agency or unit will be paid upon a request for payment signed by the designated officer. The fact that the request for payment is so signed and duly certified will ordinarily be accepted as proof that the person signing is the incumbent of the designated office.

## Subpart R—Miscellaneous Provisions

### § 315.90 Waiver of regulations.

The Secretary of the Treasury reserves the right, in his discretion, to waive or modify any provision or provisions of these regulations in any particular case or class of cases for the convenience of the United States of America or in order to relieve any person or persons of unnecessary hardship, if such action would not be inconsistent with law and would not impair any existing rights, and if he is satisfied that such action would not subject the United States of America to any substantial expense or liability.

### § 315.91 Additional requirements; bond of indemnity; taxpayer identifying numbers.

The Secretary of the Treasury may require (a) such additional evidence as he may consider necessary or advisable, (b) a bond of indemnity, with or without surety, in any case where he may consider such a bond necessary for the protection of the interests of the United States of America, and (c) without prior notice, that appropriate taxpayer identifying numbers be furnished for issue, reissue, or payment of any savings bond.

### § 315.92 Preservation of rights.

Nothing contained in these regulations shall be construed to limit or restrict existing rights which holders of savings bonds heretofore issued may have acquired under the circulars offering the bonds for sale or under the regulations in force at the time of purchase.

### § 315.93 Supplements, amendments, or revisions.

The Secretary of the Treasury may at any time, or from time to time, prescribe additional, supplemental, amendatory, or revised rules and regulations governing United States Savings Bonds.

---

# PART 316—OFFERING OF UNITED STATES SAVINGS BONDS, SERIES E

Department Circular No. 653, Fifth Revision, dated September 23, 1959, as amended (31 CFR 316), is hereby further amended and issued as the Sixth Revision.[1]

[1] The basic terms of the bonds offered under the Fifth Revision have not been changed. The material in the Fifth Revision and its three amendments has been reorganized and edited in connection with the publication of the 1965 edition of Title 31 of the Code of Federal Regulations.

Sec.
316.1 Offering of bonds.
316.2 Description of bonds currently offered.
316.3 Governing regulations.
316.4 Registration.
316.5 Limitations on holdings.
316.6 Purchase of bonds.
316.7 Delivery of bonds by mail.
316.8 Extended terms and improved yields for outstanding bonds.
316.9 Taxation.
316.10 Payment or redemption.
316.11 Reservation as to issue of bonds.
316.12 Preservation of rights.
316.13 Fiscal agents.
316.14 Reservations as to terms of offer.

AUTHORITY: The provisions of this Part 316 issued under authority of sections 22 and 25 of the Second Liberty Bond Act, as amended, 49 Stat. 21, as amended, and 73 Stat. 621 (31 U.S.C. 757c, 757c-1).

### § 316.1 Offering of bonds.

The Secretary of the Treasury offers for sale to the people of the United States, United States Savings Bonds of Series E, hereinafter generally referred to as Series E bonds. These bonds are substantially a continuation of the Series E bonds heretofore available.

This offering of bonds will continue until terminated by the Secretary of the Treasury.

### § 316.2 Description of bonds currently offered.

(a) *General.* Series E bonds bear a facsimile of the signature of the Secretary of the Treasury and of the Seal of the Treasury Department. The bonds are issued only in registered form and are nontransferable.

(b) *Denominations and prices.* Series E bonds are issued on a discount basis of 75 percent of their face values. The denominations and issue prices are:

| *Denomination (face value)* | *Issue (purchase) price* |
|---|---|
| $25 | $18.75 |
| $50 | 37.50 |
| $75 | 56.25 |
| $100 | 75.00 |
| $200 | 150.00 |
| $500 | 375.00 |
| $1,000 | 750.00 |
| $10,000 | 7,500.00 |
| $100,000 [1] | 75,000.00 |

[1] The $100,000 denomination is available only for purchase by trustees of employees' savings plans as described in Sec. 316.5(c).

(c) *Inscription and issue.* At the time of issue the issuing agent will (1) inscribe on the face of each Series E bond the name and address of the owner, and the name of the beneficiary, if any, or the name and address of one coowner, and the name of the other coowner, (2) enter in the upper right-hand portion of the bond the issue date, and (3) imprint the agent's dating stamp in the lower right-hand portion to show the date the bond is actually inscribed. A Series E bond shall be valid only if an authorized issuing agent receives payment therefor and duly inscribes, dates, stamps, and makes delivery of the bond in accordance with the purchaser's instructions. The Treasury Department may require, without prior notice, that the appropriate identifying number as required on tax returns and other documents submitted to the Internal Revenue Service be furnished for inclusion in the inscription.

(d) *Term.* A Series E bond shall be dated as of the first day of the month in which payment of the issue price is received by an agent authorized to issue such bonds. This date is the issue date and the bond will mature and be payable at face value 7 years and 9 months from such issue date. The bond may not be called for redemption by the Secretary of the Treasury prior to maturity or the end of the extended maturity period (see § 316.8(a)(1)). The bond may be redeemed at the owner's option at any time after two months from issue date at fixed redemption values; however, the Treasury Department may require reasonable notice of presentation of a bond for redemption prior to maturity. The owner has the option of continuing to hold the bond for an extended maturity period at a rate of interest to be determined prior to the original maturity of such bond.

(e) *Investment yield (interest).* The investment yield (interest) on a Series E bond will be approximately 3.75 percent per annum compounded semiannually if the bond is held to maturity; [2] but the yield will be less if the bond is redeemed prior to maturity. The interest will be paid as a part of the redemption value. During the first six months from issue date the bonds will be redeemable only at issue price. The redemption value will increase at the end of the first half-year period from issue date and successive periods thereafter (see Table 1).

### § 316.3 Governing regulations.

Series E bonds are subject to the regulations of the Treasury Department, now or hereafter prescribed, governing United States Savings Bonds, contained in Department Circular No. 530, current revision (Part 315 of this chapter). [4]

### § 316.4 Registration.

(a) *General.* Generally, only residents of the United States, its territories and possessions, the Commonwealth of Puerto Rico, the Canal Zone and citizens of the United States temporarily residing abroad are eligible to be named as owners of Series E bonds. The bonds may be registered in the names of natural persons in their own right as provided in paragraph (b) of this section, and in the names and titles or capacities of fiduciaries and organizations as provided in paragraph (c) of this section. Full information regarding authorized forms of registration and restrictions with respect thereto will be found in the governing regulations.

(b) *Natural persons in their own right.* The bonds may be registered in the names of natural persons (whether adults or minors) in their own right, in single ownership, coownership, and beneficiary forms.

(c) *Others.* The bonds may be registered in single ownership form in the names of fiduciaries and private and public organizations, as follows:

(1) *Fiduciaries.* In the names of and showing the titles or capacities of any persons or organizations, public or private, as fiduciaries (including trustees, legal guardians or similar representatives, and certain custodians), but not where the fiduciary would hold the bonds merely or principally as security for the performance of a duty, obligation, or service.

(2) *Private and public organizations.* In the names of private or public organizations (including private corporations, partnerships, and unincorporated associations, and States, counties, public corporations, and other public bodies) in their own right, but not in the names of commercial banks. [5]

### § 316.5 Limitations on holdings.

The amount of Series E bonds originally issued during any one calendar year that may be held by any one person, at any one time, computed in accordance with the governing regulations, is limited, as follows:

(a) *General limitation.* $10,000 (face value) for the calendar year 1959 and each calendar year thereafter.

(b) *Special limitation for owners of savings bonds of Series F, G, J and K.* Owners, except commercial banks [6] in their own right (as distinguished from a representative or fiduciary capacity), of outstanding bonds of Series F and G, all of which are now matured, and bonds of Series J and K, at or after maturity, may purchase Series E bonds with the proceeds of redemption without regard to the general limitation on holdings, under the following restrictions and conditions:

(1) The bonds must be presented to a Federal Reserve Bank or Branch, the Office of the Treasurer of the United States, Securities Division, or the Bureau of the Public Debt, Division of Loans and Currency Branch, for the specific purpose of taking advantage of this privilege. The Series E bonds will be dated as of the first day of the month in which the bonds presented are received by the agency.

(2) Series E bonds may be purchased with the proceeds of the bonds presented only up to the denominational amounts that the proceeds thereof will fully cover. Any difference between such proceeds and the purchase price of the Series E bonds will be paid to the owner.

(3) The Series E bonds will be registered in the name of the owner in any authorized form of registration, subject to the restrictions prescribed by the governing regulations.

[2] Under authority of section 25, 73 Stat. 621 (31 U.S.C. 757c–1), the President of the United States on September 22, 1959, concluded that with respect to Series E bonds it was necessary in the national interest to exceed the maximum interest rate and investment yield prescribed by section 22 of the Second Liberty Bond Act, as amended (31 U.S.C. 757c).

[4] Copies may be obtained from any Federal Reserve Bank or Branch, or the Bureau of the Public Debt, Washington, D.C. 20220, or its Chicago office, 536 South Clark St., Chicago, Ill. 60605.

[5] Commercial banks, as defined in Section 315.7(d)(2) of Department Circular No. 530, current revision, the governing regulations, for this purpose are those accepting demand deposits.

(4) This privilege will continue until terminated by the Secretary of the Treasury.

(c) *Special limitation for employees' savings plans.* $2,000 (face value) multiplied by the highest number of participants in an employees' savings plan, as defined in subparagraph (1) of this paragraph, at any time during the year in which the bonds are issued. [6]

(1) *Definition of plan and conditions of eligibility.* (i) The employees' savings plan must have been established by the employer for the exclusive and irrevocable benefit of his employees or their beneficiaries, afford employees the means of making regular savings from their wages through payroll deductions, and provide for employer contributions to be added to such savings.

(ii) The entire assets thereof must be credited to the individual accounts of participating employees and assets credited to the account of an employee may be distributed only to him or his beneficiary, except as otherwise provided herein.

(iii) Series E bonds may be purchased only with assets credited to the accounts of participating employees and only if the amount taken from any account at any time for that purpose is equal to the purchase price of a bond or bonds in an authorized denomination or denominations, and shares therein are credited to the accounts of the individuals from which the purchase price thereof was derived, in amounts corresponding with their shares. For example, if $37.50 credited to the account of John Jones is commingled with funds credited to the accounts of other employees to make a total of $7,500, with which a Series E bond in denomination of $10,000 (face value) is purchased in January 1965 and registered in the name and title of the trustee or trustees, the plan must provide, in effect, that John Jones' account shall be credited to show that he is the owner of a Series E bond in the denomination of $50 (face value) bearing the issue date of January 1, 1965.

(iv) Each participating employee shall have an irrevocable right at any time to demand and receive from the trustee or trustees all assets credited to his account or the value thereof, if he so prefers, without regard to any condition other than the loss or suspension of the privilege of participating further in the plan, except that a plan will not be deemed to be inconsistent herewith if it limits or modifies the exercise of any such right by providing that the employer's contribution does not vest absolutely until the employee shall have made contributions under the plan in each of not more than 60 calendar months succeeding the month for which the employer's contribution is made.

(v) Upon the death of an employee, his beneficiary shall have the absolute and unconditional right to demand and receive from the trustee or trustees all the assets credited to the account of the employee, or the value thereof, if he so prefers.

(vi) When settlement is made with an employee or his beneficiary with respect to any Series E bond registered in the name and title of the trustee or trustees in which the employee has a share (see subdivision (ii) of this subparagraph), the bond must be submitted for redemption or reissue to the extent of such share; if an employee or his beneficiary is to receive distribution in kind, bonds bearing the same issue dates as those credited to the employee's account will be reissued in the name of the distributee to the extent to which he is entitled, in authorized denominations, in any authorized form of registration, upon the request and certification of the trustee or trustees in accordance with the regulations governing United States Savings Bonds.

(2) *Definitions of terms used in this section and related provisions.* (i) The term "savings plan" includes any regulations issued under the plan with regard to Series E bonds; a copy of the plan and any such regulations, together with a copy of the trust agreement certified by a trustee to be true copies, must be submitted to the Federal Reserve Bank of the District in order to establish the eligibility of the trustee or trustees to purchase bonds in excess of the general limitation in any calendar year.

(ii) The term "assets" means all funds, including the employees' contributions and employer's contributions and assets purchased therewith as well as accretions thereto, such as dividends on stock, the increment in value on bonds and all other income; but, notwithstanding any other provision of this section, the right to demand and receive "all assets" credited to the account of an employee shall not be construed to require the distribution of assets in kind when it would not be possible or practicable to make such distribution; for example, Series E bonds may not be reissued in unauthorized denominations, and fractional shares of stock are not readily distributable in kind.

(iii) The term "beneficiary" means the person or persons, if any, designated by the employee in accordance with the terms of the plan to receive the benefits of the trust upon his death or the estate of the employee, and the term "distributee" means the employee or his beneficiary.

### § 316.6 Purchase of bonds.

Series E bonds may be purchased, as follows:

(a) *Over-the-counter for cash—(1) Bonds registered in names of natural persons in their own right only.* At such incorporated banks, trust companies, and other agencies as have been duly qualified as issuing agents and at selected United States post offices.

(2) *Bonds registered in all authorized forms.* At Federal Reserve Banks and Branches and at the Office of the Treasurer of the United States, Securities Division, Washington, D.C., 20220.

(b) *On mail order.* By mail upon application to any Federal Reserve Bank or Branch or to the Office of the Treasurer of the United States, Securities Division, Washington, D.C., 20220, accompanied by a remittance to cover the issue price. Any form of exchange, including personal checks, will be accepted subject to collection. Checks or other forms of exchange should be drawn to the order of the Federal Reserve Bank or the Treasurer of the United States, as the case may be. Checks payable by endorsement are not acceptable. Any depositary qualified pursuant to the provisions of Treasury Department Circular No. 92, current revision (Part 203 of this chapter), will be permitted to make payment by credit for bonds applied for on behalf of its customers up to any amount for which it shall be qualified in excess of existing deposits, when so notified by the Federal Reserve Bank of its district.

(c) *Savings stamps.* Savings stamps, in authorized denominations, may be purchased at any post office where Series E bonds are on sale and at such other agencies as may be designated from time to time. The stamps may be used to accumulate credits for the purchase of Series E bonds. Albums for affixing the stamps will be available without charge, and such albums will be receivable by any authorized issuing agent in the amount of the affixed stamps on the purchase price of the bonds.

### § 316.7 Delivery of bonds by mail.

Issuing agents are authorized to deliver Series E bonds by mail at the risk and expense of the United States, at the address given by the purchaser, but only within the United States, its territories and possessions, the Commonwealth of Puerto Rico, and the Canal Zone. No mail deliveries elsewhere will be made. If purchased by citizens of the United States temporarily residing abroad, the bonds will be delivered at such address in the United States as the purchaser directs.

### § 316.8 Extended terms and improved yields for outstanding bonds.

(a) *Optional extension privileges—(1) General.* The term "optional extension privilege," when used herein, means the privilege of retaining Series E bonds after maturity for a period, known as the extended maturity period," or as the "second extended maturity period," and of earning interest upon the maturity values or extended maturity values thereof, as the case may be. [7] The tables at the end of this circular, which are incorporated herein, show current redemption values and investment yields. No special action is required of owners desiring to take advantage of any optional extension privilege. Merely by continuing to hold their bonds after maturity, they will continue to earn further interest. Interest will accrue at the end of the first half-year period following maturity or extended

[6] Savings and vacation plans may be eligible for this special limitation. Questions concerning eligibility of such plans should be addressed to the Bureau of the Public Debt, Division of Loans and Currency Branch, 536 South Clark St., Chicago, Ill. 60605.

[7] The redemption value of any bond at original maturity is the base upon which interest will accrue during the extended maturity period. The redemption value of any bond at the end of the extended maturity period is the base upon which interest accrues during the second extended maturity period.

maturity and at the end of each successive half-year period thereafter until final maturity.

(2) *For bonds with issue dates of May 1, 1941, through May 1, 1949.* Owners of Series E bonds with issue dates of May 1, 1941, through May 1, 1949, have the option of retaining their bonds for a second extended maturity period of ten years.

(3) *For bonds with issue dates of June 1, 1949, through April 1, 1957.* Owners of Series E bonds with issue dates of June 1, 1949, through April 1, 1957, have the option of continuing to hold their bonds for an extended maturity period of ten years.

(4) *For bonds with issue date of May 1, 1957, or thereafter.* Owners of Series E bonds with issue date of May 1, 1957, or thereafter have the option of continuing to hold such bonds for an extended maturity period at rates of interest to be determined prior to the original maturity of such bonds.

(b) *Improved yields*—(1) *For bonds with issue dates of May 1, 1941, through May 1, 1949.* The investment yields on outstanding Series E bonds with issue dates of May 1, 1941, through May 1, 1949, were increased for the remaining period of their extended maturity (i) by not less than six-tenths of one percent per annum on bonds with issue dates of May 1, 1941, through April 1, 1942 and (ii) five-tenths of one percent per annum on bonds with issue dates of May 1, 1942, through May 1, 1949, if held to the end of the extended maturity period, and by lesser amounts if redeemed earlier.[8] The improvement in investment yields started on June 1, 1959, for bonds with the issue months of June or December and on the date of the first increase in redemption value after June 1, 1959, for a bond with any other issue month. The resulting yields are in terms of rate percent per annum, compounded semiannually. See Tables 2 through 19 for current redemption values and investment yields.

(2) *For bonds with issue dates of June 1, 1949, through April 1 1957.*[9] The investment yields on outstanding Series E bonds with issue dates of June 1, 1949, through April 1, 1957, were increased for the extended maturity period by approximately three-fourths of one percent per annum, compounded semiannually for bonds held at the end of that period and by lesser amounts if redeemed earlier. See Tables 20 through 37 for current redemption values and investment yields.

(3) *For bonds with issue dates of May 1, 1957, through May 1, 1959.*[9] The investment yields on outstanding Series E bonds with issue dates of May 1, 1957, through May 1, 1959, were increased beginning June 1, 1959, by five-tenths of one percent per annum if held to original maturity and by lesser amounts if redeemed earlier. The improvement in investment yields started on June 1, 1959, for bonds with the issue months of June or December and on the date of the first increase in redemption value after June 1, 1959, for a bond with any other issue month. The resulting yields are in terms of rate percent per annum, compounded semiannually. See Tables 38 through 42 for current redemption values and investment yields.

### § 316.9 Taxation.

(a) *General.* For the purpose of determining taxes and tax exemptions, the increment in value represented by the difference between the price paid for Series E bonds (which are issued on a discount basis) and the redemption value received therefor shall be considered as interest. Such interest is subject to all taxes imposed under the Internal Revenue Code of 1954. The bonds are subject to estate, inheritance, gift, or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, or any of the possessions of the United States, or by any local taxing authority.

(b) *Federal income tax on Series E bonds.* An owner of Series E bonds who is a cash basis taxpayer and accordingly not required to report the increase in redemption value of his bonds each year as it accrues is required to include such amount in gross income for Federal income tax purposes for the taxable year of final maturity, actual redemption, or other disposition, whichever is earlier. An owner not reporting the increase in redemption value of such bonds currently for income tax purposes may elect in any year prior to final maturity, subject to the provisions of Section 454 of the Internal Revenue Code of 1954 and the regulations prescribed thereunder, for such year and subsequent years to report such income annually. An owner who is required, or chooses, to report the increase in redemption value of his bonds each year as it accrues must continue to do so so long as he retains the bonds, unless in accordance with the income tax regulations he obtains permission from the Internal Revenue Service to change to a different method of reporting income from such obligations. Inquiry concerning further information on Federal taxes should be addressed to the District Director, Internal Revenue Service, of the taxpayer's district, or the Internal Revenue Service, Washington, D.C., 20224.

### § 316.10 Payment or redemption.

(a) *General.* A Series E bond may be redeemed in accordance with its terms at the appropriate redemption value as shown in the applicable tables hereof for bonds bearing various issue dates back to May 1, 1941. The redemption values of bonds in the denomination of $100,000 [1] (which was authorized as of January 1, 1954) are not shown in the tables. However, the redemption values of bonds in that denomination will be equal to the total redemption values of ten $10,000 bonds bearing the same issue dates. A Series E bond in a denomination higher than $25 (face value) may be redeemed in part but only in the amount of an authorized denomination or multiple thereof.

(b) *Federal Reserve Banks and Branches and Treasurer of the United States.* Owners of Series E bonds may obtain payment upon presentation and surrender of the bonds to a Federal Reserve Bank or Branch or to the Office of the Treasurer of the United States, Securities Division, Washington, D.C., 20220, with the requests for payment on the bonds duly executed and certified in accordance with the governing regulations.

(c) *Incorporated banks, trust companies and other financial institutions.* An individual (natural person) whose name is inscribed on a Series E bond either as owner or coowner in his own right may also present such bond to any incorporated bank or trust company or other financial institution which is qualified as a paying agent under Department Circular No. 750, current revision (Part 321 of this chapter). If such bond is in order for payment by the paying agent, the owner or coowner, upon establishing his identity to the satisfaction of the agent and upon signing the request for payment and adding his home or business address, may receive immediate payment of the current redemption value.

### § 316.11 Reservation as to issue of bonds.

The Secretary of the Treasury reserves the right to reject any application for Series E bonds, in whole or in part, and to refuse to issue or permit to be issued hereunder any such bonds in any case or any class or classes of cases if he deems such action to be in the public interest, and his action in any such respect shall be final.

### § 316.12 Preservation of rights.

Nothing contained herein shall limit or restrict rights which owners of Series E bonds heretofore issued have acquired under offers previously in force.

### § 316.13 Fiscal agents.

Federal Reserve Banks and Branches, as fiscal agents of the United States, are authorized to perform such services as may be requested of them by the Secretary of the Treasury in connection with the issue, delivery, redemption, and payment of Series E bonds.

[8] The investment yields for the full extended maturity period of the bonds referred to in § 316.8 (a) (2) and (b) (1) were, according to issue dates, as follows:

| | |
|---|---|
| May 1, 1941, through April 1, 1942 | 2.90 |
| May 1, 1942, through May 1, 1949 | 3.00 |

percent per annum, compounded semiannually.

[9] The investment yields for the full original maturity period of bonds referred to in § 316.8(b) (2) and (3), were according to issue dates, as follows:

| | |
|---|---|
| December 1, 1949, through April 1, 1952 | 2.90 |
| May 1, 1952, through January 1, 1957 | 3.00 |
| February 1, 1957, through May 1, 1959 | 3.25 |

These yields were increased, effective one-half year from the next date after June 1, 1959, on which the redemption value increased, by not less than six-tenths of one percent for bonds with issue dates of December 1, 1949, through April 1, 1952, and by five-tenths of one percent for bonds with issue dates of May 1, 1952, through May 1, 1959. All of these yields are in terms of rate percent per annum, compounded semiannually.

### § 316.14 Reservations as to terms of offer.

The Secretary of the Treasury may at any time or from time to time supplement or amend the terms of this offering of bonds (Part 316 of this chapter), or of any amendments or supplements thereto.

TABLES OF REDEMPTION VALUES AND INVESTMENT YIELDS FOR UNITED STATES SAVINGS BONDS OF SERIES E

Each table shows: (1) How bonds of Series E bearing the issue dates covered by the table, by denominations, increase in redemption value for each successive half-year period (a) following the date of issue for bonds bearing issue dates beginning December 1, 1954; (b) following original maturity for bonds bearing issue dates of December 1, 1944, through November 1, 1954; (c) following first extended maturity for bonds bearing issue dates of May 1, 1941, through November 1, 1944 (for the latest revised redemption values and investment yields during original maturity and first extended maturity periods not shown in these tables see Department Circular 653, Fifth Revision, dated September 23, 1959); (2) the approximate investment yield on the purchase price from issue date to the beginning of each half-year period shown on the table; and (3) the approximate investment yield on the current redemption value from the beginning of each half-year period shown on the table to maturity. Yields are expressed in terms of rate percent per annum, compounded semiannually.

TABLE I—BONDS BEARING ISSUE DATES BEGINNING JUNE 1, 1959

| Issue price / Maturity value | $18.75 / 25.00 | $37.50 / 50.00 | $56.25 / 75.00 | $75.00 / 100.00 | $150.00 / 200.00 | $375.00 / 500.00 | $750.00 / 1,000.00 | $7,500 / 10,000 | Approximate investment yield* | |
|---|---|---|---|---|---|---|---|---|---|---|
| Period after issue date | (1) Redemption values during each half-year period [1] (Values increase on first day of period shown) | | | | | | | | (2) On purchase price from issue date to beginning of each half-year period [1] | (3) On current redemption value from beginning of each half-year period [1] to maturity |

## PART 321—PAYMENTS BY BANKS AND OTHER FINANCIAL INSTITUTIONS IN CONNECTION WITH THE REDEMPTION OF UNITED STATES SAVINGS BONDS

Paragraph (a) of § 321.4, Department Circular No. 750, Revised, dated June 30, 1945, as amended and supplemented (31 CFR, Part 321), is hereby further amended as follows :

**§ 321.4 Meaning of terms in this circular.**

* * * * *

(a) "Paying agent(s)" or "agent(s)" shall mean (1) any eligible financial institution duly qualified pursuant to the provisions of this part to make payments in connection with the redemption and redemption-exchange of the United States Savings Bonds hereinafter specified, including branches of such institutions located within the United States, its territories and possessions, the Commonwealth of Puerto Rico and the Canal Zone, and (2) banking facilities of such institutions established at Armed Forces installations and other places with the specific approval of the Treasury Department.

## PART 332—OFFERING OF UNITED STATES SAVINGS BONDS, SERIES H

Department Circular No. 905, Second Revision, dated September 23, 1959, as amended (31 CFR 332), is hereby further amended and issued as the Third Revision.[1]

Sec.
332.1 Offering of bonds.
332.2 Description of bonds currently offered.
332.3 Governing regulations.
332.4 Registration.
332.5 Limitations on holdings.
332.6 Purchase of bonds.
332.7 Delivery of bonds.
332.8 Improved yield and extension of term for outstanding bonds.
332.9 Taxation.
332.10 Payment or redemption.
332.11 Reservation as to issue of bonds.
332.12 Preservation of rights.
332.13 Fiscal agents.
332.14 Reservation as to terms of offer.

AUTHORITY: The provisions of this Part 332 issued under authority of sections 22 and 25 of the Second Liberty Bond Act, as amended, 49 Stat. 21, as amended, and 73 Stat. 621 (31 U.S.C. 757c, 757c–1).

**§ 332.1 Offering of bonds.**

The Secretary of the Treasury offers for sale to the people of the United States, United States Savings Bonds of Series H, hereinafter generally referred to as Series H bonds. These bonds are substantially a continuation of the Series H bonds heretofore available. This offering of bonds will continue until terminated by the Secretary of the Treasury.

**§ 332.2 Description of bonds currently offered.**

(a) *General.* Series H bonds bear a facsimile of the signature of the Secretary of the Treasury and of the Seal of the Treasury Department. The bonds are issued only in registered form and are nontransferable.

(b) *Denominations and prices.* Series H bonds are issued at par and are available in denominations of $500, $1,000, $5,000 and $10,000.

(c) *Inscription and issue.* At the time of issue the issuing agent will (1) inscribe on the face of each Series H bond the name, taxpayer identifying number,[2] and address of the owner, and the name of the beneficiary, if any, or the names of the coowners, the taxpayer identifying number of one coowner,[2] and the address of one coowner, (2) enter in the upper right-hand portion of the bond the issue date, and (3) imprint the agent's dating stamp in the lower right-hand portion to show the date the bond is actually inscribed. A Series H bond shall be valid only if an authorized issuing agent receives payment therefor and duly inscribes, dates, stamps, and makes delivery of the bond in accordance with the purchaser's instructions.

(d) *Term.* A Series H bond will be dated as of the first day of the month in which payment therefor is received by an agent authorized to issue such bonds. This date is the issue date and the bond will mature and be payable ten years from such issue date. The bond may not be called for redemption by the Secretary of the Treasury prior to maturity, but may be redeemed at par after six months from issue date, at the owner's option, but only upon one calendar month's notice as provided in § 332.10.

(e) *Interest (investment yield).* The interest on a Series H bond will be paid semiannually by check drawn to the order of the registered owner or coowners, beginning six months from issue date. Interest payments will be on a graduated scale, fixed to afford an investment yield of approximately 3.75 percent per annum, compounded semiannually if the bond is held to maturity; [3] but the yield will be less if the bond is redeemed prior to maturity. (See Table 1 of the tables

[1] The basic terms of the bonds offered under the Second Revision have not been changed. The material in the Second Revision and its four amendments has been reorganized and edited in connection with the publication of the 1965 edition of Title 31 of the Code of Federal Regulations.

[2] The number required to be used on tax returns and other documents submitted to the Internal Revenue Service (an individual's social security account number or employer identification number). If the coowners are husband and wife, the husband's number should be furnished. If the coowners are a minor and an adult, the adult's number should be furnished.

[3] Under authority of section 25, 73 Stat. 621 (31 U.S.C. 757c–1), the President of the United States on September 22, 1959, concluded that with respect to Series H bonds it was necessary in the national interest to exceed the maximum interest rate and investment yield prescribed by Section 22 of the Second Liberty Bond Act, as amended (31 U.S.C. 757c).

at the end of this circular, which are incorporated herein.) Interest will cease at maturity, or in the case of redemption before maturity, at the end of the interest period next preceding the date of redemption, except that if the date of redemption falls on an interest payment date, interest will cease on that date.

**§ 332.3 Governing regulations.**

Series H bonds are subject to the regulations of the Treasury Department, now or hereafter prescribed, governing United States Savings Bonds, contained in Department Circular No. 530, current revision (Part 315 of this chapter).[4]

**§ 332.4 Registration.**

(a) *General.* Generally, only residents of the United States, its territories and possessions, the Commonwealth of Puerto Rico, the Canal Zone and citizens of the United States temporarily residing abroad are eligible to be named as owners of Series H bonds. The bonds may be registered in the names of natural persons in their own right as provided in paragraph (b) of this section, and in the names and titles or capacities of fiduciaries and organizations as provided in paragraph (c) of this section. Full information regarding authorized forms of registration and restrictions with respect thereto will be found in the governing regulations.

(b) *Natural persons in their own right.* The bonds may be registered in the names of natural persons (whether adults or minors) in their own right, in single ownership, coownership, and beneficiary forms.

(c) The bonds may be registered in single ownership form in the names of fiduciaries and private and public organizations, as follows:

(1) *Fiduciaries.* In the names of and showing the titles or capacities of any persons or organizations, public or private, as fiduciaries (including trustees, legal guardians or similar representatives, and certain custodians) but not where the fiduciary would hold the bonds merely or principally as security for the performance of a duty, obligation, or service.

(2) *Private and public organizations.* In the names of private or public organizations (including private corporations, partnerships, and unincorporated associations, and States, counties, public corporations, and other public bodies) in their own right, but not in the names of commercial banks.[5]

**§ 332.5 Limitations on holdings.**

The amount of Series H bonds originally issued during any one calendar year that may be held by any one person at any one time, computed in accordance with the governing regulations, is limited, as follows:

(a) *General limitation.* $20,000 (face value) for the calendar year 1962 and each calendar year thereafter.

[4] Copies may be obtained on application to any Federal Reserve Bank or Branch or the Bureau of the Public Debt, Washington, D.C. 20220, or its Chicago office, 536 South Clark St., Chicago, Ill. 60605.

(b) *Special limitation for owners of savings bonds of Series F, G, J and K.* Owners, except commercial banks [5] in their own right (as distinguished from a representative or fiduciary capacity), of outstanding bonds of Series F and G, all of which are now matured, and bonds of Series J and K, at or after maturity, may apply the proceeds of such bonds to the purchase of Series H bonds without regard to the general limitation on holdings, under the following restrictions and conditions:

(1) The bonds must be presented to a Federal Reserve Bank or Branch, the Office of the Treasurer of the United States, Securities Division, or the Bureau of the Public Debt, Division of Loans and Currency Branch, for the specific purpose of taking advantage of this privilege. The Series H bonds will be dated as of the first day of the month in which the bonds presented are received by the issuing agent.

(2) Series H bonds may be purchased with the proceeds of the bonds presented only up to the denominational amounts that the proceeds thereof will fully cover. Any difference between such proceeds and the purchase price of the Series H bonds will be paid to the owner.

(3) The Series H bonds will be registered in the name of the owner in any authorized form of registration subject to the restrictions prescribed by the governing regulations.

(4) This privilege will continue until terminated by the Secretary of the Treasury.

(c) *Exchanges pursuant to Department Circular No. 1036, as amended.* Series H bonds issued in exchange for bonds of Series E, Series F, or Series J under the provisions of Department Circular No. 1036, as amended (Part 339 of this chapter), are exempt from the annual limitation.

**§ 332.6 Purchase of bonds.**

(a) *Agents.* Only the Federal Reserve Banks and Branches and the Treasury Department are authorized to act as official issuing agents for the sale of Series H bonds. However, commercial banks and trust companies may forward applications for purchase of the bonds. The date of receipt of the application and payment to an issuing agent will govern the issue date of the bonds purchased.

(b) *Application for purchase and remittance.* The applicant for purchase of Series H bonds should furnish (1) instructions for registration of the bonds to be issued, which must be in an authorized form, (2) the appropriate taxpayer identifying number or numbers,[2] (3) the post office address of the owner or a coowner (preferably the first-named), (4) the address for delivery of the bonds, and (5) the address for mailing checks in payment of interest. The application should be forwarded to a Federal Reserve Bank or Branch or the Office of the Treasurer of the United States, Securities Division, Washington, D.C. 20220, accompanied by a remittance to cover the purchase price. Any form of exchange including personal checks will be accepted subject to collection. Checks or other forms of exchange should be drawn to the order of the Federal Reserve Bank or Treasurer of the United States, as the case may be. Checks payable by endorsement are not acceptable. Any depositary qualified pursuant to Treasury Department Circular No. 92, current revision (Part 203 of this chapter), will be permitted to make payment by credit for bonds applied for on behalf of its customers up to any amount for which it shall be qualified in excess of existing deposits, when so notified by the Federal Reserve Bank of its district.

[5] Commercial banks, as defined in § 315.7 (d)(2) of this chapter (Department Circular No. 530, current revision) the governing regulations, for this purpose are those accepting demand deposits.

**§ 332.7 Delivery of bonds.**

Authorized issuing agents will deliver the Series H bonds either in person, or by mail at the risk and expense of the United States, at the address given by the purchaser, but only within the United States, its territories and possessions, the Commonwealth of Puerto Rico, and the Canal Zone. No mail deliveries elsewhere will be made. If purchased by citizens of the United States temporarily residing abroad, the bonds will be delivered at such address in the United States as the purchaser directs.

**§ 332.8 Improved yield and extension of term for outstanding bonds.**

(a) *Improved yield to maturity for outstanding bonds with issue dates of June 1, 1952, through May 1, 1959.* The investment yields on all outstanding Series H bonds with issue dates prior to June 1, 1959, were increased, beginning on and after June 1, 1959, as described below, for the remaining period to maturity, by not less than one-half of one percent, and by lesser amounts if redeemed earlier.[6] The resulting yields are in terms of rate percent per annum, compounded semiannually. See Tables 2 through 16 for current schedules of interest payments and investment yields. This increase became effective beginning with interest payments due December 1, 1959, for bonds with the issue month of June or December of any year prior to 1959, and for all other bonds on the next interest payment date after December 1, 1959.

(b) *Extended maturity period for bonds with issue dates of June 1, 1952, through January 1, 1957.* Owners of Series H bonds with these issue dates have the option of continuing to hold such bonds for an extended maturity period of ten years with an investment

[6] The investment yield to maturity heretofore prescribed for the bonds referred to in § 332.8(a) were (according to issue dates) as follows:

| | |
|---|---|
| June 1, 1952, through January 1, 1957 | 3.00 |
| February 1, 1957, through May 1, 1959 | 3.25 |

percent per annum compounded semiannually.

yield of approximately 3.75 percent payable semiannually. Bonds held after maturity will earn further interest which will accrue and be paid semiannually by check drawn to the order of the owner or coowners beginning six months from the original maturity dates. Interest payments will be made in the amounts shown in Tables 2 through 11.

**§ 332.9 Taxation.**

The income derived from Series H bonds is subject to all taxes imposed under the Internal Revenue Code of 1954. The bonds are subject to estate, inheritance, gift, or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, by any of the possessions of the United States, or by any local taxing authority.

**§ 332.10 Payment or redemption.**

(a) *Prior to maturity.* Prior to maturity a Series H bond will be redeemed AT PAR, in whole or in part, in the amount of an authorized denomination or multiple thereof, at the option of the owner, after six months from the issue date upon one calendar month's notice to (1) a Federal Reserve Bank or Branch, (2) the Office of the Treasurer of the United States, Securities Division, Washington, D.C., 20220, or (3) the Bureau of the Public Debt, Division of Loans and Currency Branch, 536 South Clark Street, Chicago, Ill., 60605. Such notice may be given separately, in writing, or by presenting and surrendering the bond with a duly executed request for payment. If notice is given separately, the bond must be presented with a duly executed request for payment to the same agent not less than twenty days before the redemption date fixed by the notice. Payment will be made as of the first day of the first month following by at least one full calendar month the date of the receipt of notice.

(b) *At maturity.* Upon maturity a Series H bond will be redeemed at par upon presentation of the bond with a duly executed request for payment to one of the agents designated in paragraph (a) of this section. Any Series H bond having an extended maturity period will be redeemed at par upon original maturity and for two calendar months following the month in which the bond originally matures without advance notice.[1]

(c) *During extended maturity period.* A Series H bond having an extended maturity period will, beginning with the first day of the third calendar month following the calendar month in which the bond originally matures, be regarded as unmatured until it reaches its final maturity date and may be redeemed in the same manner and subject to the same notice for redemption as provided in paragraph (a) of this section.

[1] For example, if a bond is dated June 1, 1955, the date of original maturity is February 1, 1965. The date on which the right to payment without advance notice will be suspended is May 1, 1965.

TABLES OF CHECKS ISSUED AND INVESTMENT YIELDS FOR UNITED STATES SAVINGS BONDS OF SERIES H

Each table shows: (1) Amounts of interest checks paid on United States Savings Bonds of Series H bearing issue dates covered by the table, by denominations, on each interest payment date (a) following the date of issue for bonds bearing issue dates beginning December 1, 1954; (b) following original maturity date for bonds bearing issue dates of June 1, 1952, through November 1, 1954 (for the latest revised amounts of interest checks and investment yields during the original maturity period not shown in these tables, see Department Circular 905, Second Revision, dated September 23, 1959); (2) the approximate investment yield on the face value from issue date to each interest payment date; and (3) the approximate investment yield on the face value from each interest payment date to maturity. Yields are expressed in terms of rate percent per annum, compounded semiannually.

*Approximate investment yield on the basis of original (prior to June 1, 1959 revision) schedule of interest checks is: 3.25 percent per annum for entire period from issuance to maturity.
†Revised approximate investment yield from effective date of revision to maturity.
[1] At all times, except that bond is not redeemable during first 6 months.

**§ 332.11 Reservation as to issue of bonds.**

The Secretary of the Treasury reserves the right to reject any application for Series H bonds, in whole or in part, and to refuse to issue or permit to be issued hereunder any such bonds in any case or any class or classes of cases if he deems such action to be in the public interest, and his action in any such respect shall be final.

**§ 332.12 Preservation of rights.**

Nothing contained herein shall limit or restrict rights which owners of Series H bonds heretofore issued have acquired under offers previously in force.

**§ 332.13 Fiscal agents.**

Federal Reserve Banks and Branches, as fiscal agents of the United States, are authorized to perform such services as may be requested of them by the Secretary of the Treasury in connection with the issue, delivery, redemption and payment of Series H bonds.

**§ 332.14 Reservation as to terms of offer.**

The Secretary of the Treasury may at any time or from time to time supplement or amend the terms of this offering of bonds (Part 332 of this chapter), or of any amendments or supplements thereto.

# Title 46—SHIPPING

## Chapter II—Maritime Administration, Department of Commerce

SUBCHAPTER G—EMERGENCY OPERATIONS

[General Order 82, 11th Rev.]

## PART 309—VALUES FOR WAR RISK INSURANCE

### Miscellaneous Amendments

Part 309 is hereby amended by changing §§ 309.1–309.101, to read as follows:

FINDINGS AND SCOPE

Sec.
309.1 Findings.
309.2 Scope.

BASIC VALUES

309.3 Vessels built during or after 1939.
309.4 Vessels built prior to 1939.

GENERAL PROVISIONS

309.5 Adjustments for condition, equipment and other considerations.
309.6 Definitions.
309.7 Modifications.
309.8 Vessel data forms.

VALUES FOR INDIVIDUAL VESSELS

309.101 Determination of values.

AUTHORITY: §§ 309.1 through 309.8 and 309.101 issued under sec. 204, 49 Stat. 1987, as amended, sec. 1209, 64 Stat. 775, as amended, 70 Stat. 984; 46 U.S.C. 1114, 1289.

FINDINGS AND SCOPE

**§ 309.1 Findings.**

The Ship Valuation Committee, Maritime Administration, has found that the values provided in this part constitute just compensation for the vessels to which they apply, computed in accordance with subsection 902(a) of the Merchant Marine Act, 1936, as amended (46 U.S.C. 1242), pursuant to section 1209 (a), Merchant Marine Act, 1936, as amended (46 U.S.C. 1289(a)), Public Law 958, 84th Congress, and the authority delegated to the Maritime Administrator by the Secretary of Commerce in section 3, of Department Order No. 117 (Revised) (27 F.R. 3637, April 17, 1962), and redelegated to the Ship Valuation Committee (28 F.R. 12330, November 21, 1963).

**§ 309.2 Scope.**

(a) *Vessels included.* This part establishes values for self-propelled ocean-going iron and steel vessels (other than vessels excluded pursuant to paragraph (b) of this section) for which war risk insurance is provided by the Maritime Administration pursuant to Title XII, Merchant Marine Act, 1936, as amended (46 U.S.C. 1281–1294), Public Law 763, 81st Congress, Public Law 209, 84th Congress, Public Law 958, 84th Congress. The values established by this part represent the maximum amounts for which the Maritime Administration will provide war risk hull insurance for damage to or actual or constructive total loss of the vessel and for which claims for damage to or actual or constructive total loss of such insured vessels may be adjusted, compromised, settled, adjudged, or paid, by the Maritime Administration with respect to insurance attaching on or after July 1, 1964, under the Standard Forms of War Risk Hull insurance Interim Binder or policy prescribed by §§ 308.106 and 308.107 of this chapter (General Order 75, 2d Rev., 26 F.R. 4541, May 26, 1961). Revised values will be prescribed in subsequent revisions of this part, which are expected to be issued at least every six months. The latest published values will remain in effect until new ones are published.

(b) *Vessels excluded.* The values established pursuant to §§ 309.3 through 309.5 do not apply to passenger vessels, lumber schooners, car ferries, seatrains, cable ships, bulk cement and ore carriers, vessels operated on the Great Lakes and inland waterways, fully refrigerated vessels, vessels of less than 1,500 gross tons, or any other vessels or class of vessels to which the Maritime Administration finds that the provisions of said sections would not be appropriate. Values for vessels excluded by this paragraph (b), shall be specifically determined by the Maritime Administration and set forth in § 309.101.

(c) *Fuel, stores, and supplies.* Values for fuel, stores and supplies shall be determined in accordance with §§ 309.201 through 309.204 (General Order 100, 29 F.R. 2944, March 4, 1964.)

BASIC VALUES

**§ 309.3 Vessels built during or after 1939.**

(a) *Basic values.* The values of vessels built during or after 1939 shall be determined in accordance with this section, subject to the applicable adjustments provided in § 309.5.

(b) *War-built vessels.* (1) The values of the standard types of war-built vessels under United States flag listed in this subparagraph (1) which have the lawful right to engage in the coastwise trade of the United States (which are the current domestic market values of such vessels as determined by the Ship Valuation Committee) are as follows:

| Standard-type vessel: | *Value* |
|---|---|
| EC2–S–C1 | $275,000 |
| EC2–S–AW1 | 260,000 |
| VC2–S–AP2 | 495,000 |
| C1–M–AV1 | 270,000 |
| C1–A and B (Steam) | 285,000 |
| C1–A and B (Diesel) | 285,000 |
| C2–S–B1 | 540,000 |
| C3–S–A2 | 860,000 |
| C4–S–B5 | 970,000 |
| T1–M–BT | 315,000 |
| T2–SE–A1 | 495,000 |
| T3–S–A1 | 490,000 |
| T3–S–BZ1 | 940,000 |

(2) The values of the standard types of war-built vessels under United States flag listed in this subparagraph (2) which do not have the lawful right to engage in the coastwise trade of the United States (which are the current domestic market values of such vessels as determined by the Ship Valuation Committee) are as follows:

| Standard-type vessel: | *Value* |
|---|---|
| EC2–S–C1 | $225,000 |
| C1–M–AV1 | 210,000 |
| VC2–S–AP2 | 420,000 |
| C2–S–B1 | 460,000 |
| T2–SE–A1 | 275,000 |
| T1–M–BT2 | 150,000 |

(3) The values of the standard types of war-built vessels under foreign flag listed in this subparagraph (3) (which are the lower of (i) the restricted world market values, or (ii) the domestic market values of comparable United States flag vessels which do not have the lawful right to engage in the coastwise trade of the United States, as determined by the Ship Valuation Committee) are as follows:

| Standard-type vessel: | *Value* |
|---|---|
| EC2–S–C1 | $202,500 |
| T2–SE–A1 | 275,000 |
| T1–M–BT2 | 150,000 |
| T3–S–A1 | 270,000 |

(4) The values of the standard subtypes of war-built vessels listed in this subparagraph (4) shall be determined as follows:

(i) If the subtype vessel is under United States flag and has the lawful right to engage in the coastwise trade of the United States, by multiplying the basic value of the standard-type vessel listed in subparagraph (1) of this paragraph by the factor shown opposite the subtype in the table set forth in this subparagraph (4), or

(ii) If the subtype vessel is under United States flag but does not have the lawful right to engage in the coastwise trade of the United States, by multiplying the basic value of the standard-type vessel listed in subparagraph (2) of this paragraph by the factor shown opposite the subtype in the table set forth in the subparagraph (4), or

(iii) If the subtype vessel is under foreign flag, by multiplying the basic value of the standard-type vessel listed in subparagraph (3) of this paragraph by the factor shown opposite the subtype in the table set forth in the subparagraph (4).

TABLE

| *Subtype* | *Factor* |
|---|---|
| VC2–S–AP3 | 110%—VC2–S–AP2 |
| VC2–M–AP4 | 90%—VC2–S–AP2 |
| C1–M–AV6 | 100%—C1–M–AV1 |
| C1–M–AV8 | 100%—C1–M–AV1 |
| C2–S–A1 | 85%—C2–S–B1 |
| C2–S–AJ1 | 100%—C2–S–B1 |
| C2–S–AJ2 | 105%—C2–S–B1 |
| C2–S–AJ3 | 100%—C2–S–B1 |
| C2–S–AJ5 | 103%—C2–S–B1 |
| C2–Cargo | 100%—C2–S–B1 |
| C2–S–E1 | 103%—C2–S–B1 |
| C2–F | 100%—C2–S–B1 |
| C2–S | 100%—C2–S–B1 |
| C2–SU | 95%—C2–S–B1 |
| C3–Cargo | 100%—C3–S–A2 |
| C3–S–A1 | 100%—C3–S–A2 |
| C3–S–A3 | 76%—C3–S–A2 |
| C3–S–A4 | 106%—C3–S–A2 |
| C3–S–A5 | 106%—C3–S–A2 |
| C3–E | 70%—C3–S–A2 |
| C3–M | 100%—C3–S–A2 |
| C3–S–BH1 | 100%—C3–S–A2 |
| C3–S–BH2 | 105%—C3–S–A2 |
| C4–S–A4 | 100%—C4–S–B5 |
| T1–M–BT1 | 100%—T1–M–BT |
| T1–M–BT2 | 100%—T1–M–BT |
| T2–SE–A2 | 108%—T2–SE–A1 |
| T2–SE–A3 | 108%—T2–SE–A1 |
| T2 | 108%—T2–SE–A1 |
| T3–M–AZ1 | 105%—T3–S–A1 |
| T3–S–BF1 | 130%—T3–S–A1 |

(c) *Other vessels.* The value of a vessel built during or after 1939 which is not included in paragraph (b) of this section shall be the current domestic market value as determined by the Maritime Administration.

**§ 309.4 Vessels built prior to 1939.**

The values of vessels built prior to 1939 shall be specifically determined by the Maritime Administration and set forth in § 309.101.

GENERAL PROVISIONS

**§ 309.5 Adjustments for condition, equipment and other considerations.**

The basic values provided in § 309.3 shall be adjusted for individual vessels to the extent provided in paragraphs (a) to (d) of this section.

(a) *Adjustment for a vessel of substandard condition.* If the Maritime Administration determines that a vessel is not in class or is in substandard condition for a vessel of her type or subtype and age, there shall be subtracted from the basic value of such vessel, as determined pursuant to § 309.3 the amount estimated by the Maritime Administration as the cost of putting the vessel in class or the amount estimated by the Maritime Administration as the difference in value of the substandard vessel and a vessel in standard condition.

(b) *Special equipment.* For any special equipment of material utility in the handling of cargo or utilization of the vessel, not otherwise included in determining the basic value pursuant to § 309.3, if the depreciated reproduction cost less construction subsidy, if any, of all such special equipment is in excess of $50,000.00, an allowance in such amount as the Maritime Administration shall determine to be the fair and reasonable value of such equipment less construction-differential subsidy thereon, shall be added to the basic value.

(c) *Government installations.* The values provided by this part shall not include any allowance for any special installations or equipment to the extent that their cost was borne by the United States.

(d) *Construction subsidized vessel.* In the case of a construction subsidized vessel, for the period of insurance prior to requisition for title or use the valuation determined in accordance with § 309.3 shall be reduced by such proportion as the amount of construction subsidy paid with respect to the vessel bears to the entire construction cost and capital improvements thereof (excluding the cost of national defense features), and for the period of insurance after requisition for use the valuation determined in accordance with § 309.3 shall not exceed the amount which would be payable under section 802 of the Merchant Marine Act, 1936, as amended (46 U.S.C. 1212), in the case of requisition for title or use. (See, however, Public Law 88–478, approved August 22, 1964.)

**§ 309.6 Definitions.**

(a) *Date vessel is built.* The date a vessel is built is the date upon which the vessel is delivered by the shipbuilder.

(b) *Deadweight tonnage.* The deadweight tonnage of a vessel means her deadweight capacity established in accordance with normal Summer Freeboard as assigned pursuant to the International Load Line Convention, 1930, and shall be her capacity (in tons of 2,240 pounds) for cargo, fuel, fresh water, spare parts, and stores, but exclusive of permanent ballast.

(c) *Speed of vessel.* The speed of a vessel means the speed determined in accordance with the formulae provided in Part 246 of this chapter (General Order 43, 3d Revision, 24 F.R. 3793, May 12, 1959).

(d) *Passenger vessel.* A passenger vessel is a ship which carries more than twelve passengers.

(e) *Construction subsidized vessel.* A construction subsidized vessel is a vessel built, reconstructed, or reconditioned with the aid of a construction-differential subsidy under Title V of the Merchant Marine Act, 1936, as amended, or a vessel sold by the United States which is subject by operation of law or contract to the provisions of section 802 of the Merchant Marine Act, 1936, as amended.

(f) *Vessel.* The stated valuation of a vessel in this order applies to a vessel in Class A–1 American Bureau of Shipping or equivalent, with all required certificates, including but not limited to marine inspection certificates of the Coast Guard, Treasury Department, with all outstanding requirements and recommendations necessary for retention of class accomplished; and so far as due diligence can make her so, tight, staunch, strong and well and sufficiently tackled, appareled, furnished and equipped, and in every respect seaworthy and in good running condition and repair, with clean swept holds and in all respects fit for service. A vessel in substandard condition is subject to § 309.5(a). The stated valuation of a vessel provided in this order does not include vessel stores and supplies, which consist of (1) Consumable Stores, (2) Subsistence Stores, (3) Slop Chest, (4) Bar Stock, and (5) Fuel, as defined in Maritime Administration Inventory Manual, Vessel Inventories, Part 1, and Maritime Administration Inventory Books, Forms MA–4736, A through K, which will be valued separately.

**§ 309.7 Modifications.**

The Maritime Administration reserves the right to exempt specific vessels from the scope of this part, or to amend, modify, or terminate the provisions hereof.

**§ 309.8 Vessel data forms.**

(a) *To accompany application for insurance.* Each application for war risk hull insurance submitted in accordance with § 308.101 of this chapter (General Order 75, 2d Rev., 26 F.R. 4541, May 26, 1961) shall be accompanied by information relating to the vessel for use by the Maritime Administration in determining the value pursuant to this part. The information shall be submitted in duplicate on the applicable form prescribed in this section copies of which may be obtained from the American War Risk Agency, 99 John Street, New York, N.Y., 10038, or the Chief, Division of Insurance, Maritime Administration, Washington, D.C., 20235.

(b) *Vessels of 1500 gross tons or more.* Vessel data for all vessels of 1500 gross tons or more shall be submitted on Form MA–510.

(c) *Vessels under 1500 gross tons.* Vessel data for all vessels under 1500 gross tons shall be submitted on Form MA–511.

(d) *Modifications to vessels.* Revised vessel data shall be submitted on the appropriate form prescribed above whenever a vessel undergoes a physical change which increases or decreases its value by five percent or more.

VALUES FOR INDIVIDUAL VESSELS

**§ 309.101 Determination of values.**

(a) *Vessels covered by §§ 309.3 through 309.5.* (1) Whereas, the Maritime Administration has found that the values established pursuant to §§ 309.3 through 309.5 constitute just compensation for the vessels to which they apply, computed in accordance with section 902(a) of the Merchant Marine Act, 1936, as amended (46 U.S.C. 1242); and section 1209(a) of the Merchant Marine Act, 1936, as amended (46 U.S.C. 1289), Public Law 958, 84th Congress (70 Stat. 984); and pursuant thereto has determined the values of vessels covered by interim binders for war risk hull insurance, Form MA–184, prescribed by Part 308 of this chapter (General Order 75, 2d Rev., 26 F.R. 4541, May 26, 1961).

(2) Therefore, it is ordered that the interim binders listed below shall be deemed to have been amended as of July 1, 1964, by inserting in the space provided therefor or in substitution for any value now appearing in such space the stated valuation of the vessels set forth below for the binders and vessels as designated. Nevertheless, the Assured shall have the right within sixty days after date of publication of this order or within sixty days after the attachment of the insurance under said binder, whichever is later, to reject such valuation and proceed as authorized by section 1209(a)(2) of the Merchant Marine Act, 1936, as amended (46 U.S.C. 1289).

| Binder No. | Name of vessel | Official No. | Stated valuation |
|---|---|---|---|
| 870 | Achilles | 281702 | $8,625,000 |
| 94 | Afoundria | 244018 | 550,000 |

(b) *Vessels of less than 1,500 gross tons—As of July 1, 1964.* (1) Whereas, the Maritime Administration has determined for certain vessels of less than 1,500 gross tons the values which constitute just compensation for the vessels to which they apply, computed in accordance with section 902(a) of the Merchant Marine Act, 1936, as amended (46 U.S.C. 1242); and section 1209(a) of the Merchant Marine Act, 1936, as amended (46 U.S.C. 1289), Public Law 958, 84th Congress (70 Stat. 984); and pursuant thereto has determined the values of vessels covered by interim binders for war risk hull insurance, Form MA–184 prescribed by Part 308 of this chapter (General Order 75, 2d Rev., 26 F.R. 4541, May 26, 1961).

(2) Therefore, it is ordered that the interim binders listed below shall be deemed to have been amended as of July 1, 1964, by inserting in the space provided therefor or in substitution for any value now appearing in such space the stated valuation of the vessels set forth below for the binders and vessels as designated. Nevertheless, the Assured shall have the right within sixty days after date of publication of this order or within sixty days after the attachment of the insurance under said binder, whichever is later, to reject such valuation and proceed as authorized by section 1209(a)(2) of the Merchant Marine Act, 1936, as amended (46 U.S.C. 1289).

# Title 39—POSTAL SERVICE

## Chapter I—Post Office Department

## PART 112—RATES AND CONDITIONS FOR SPECIFIC CLASSES

### Printed Matter

In § 112.4 *Printed matter* (29 F.R. 2758), subdivision (iii) of paragraph (e)(3) is amended for clarification, and to show an increase in the per copy rate of postage on bundled second-class publications mailed to Canada, effective January 1, 1965. As so amended subdivision (iii) reads as follows:

§ 112.4 **Printed matter.**

* * * * *

(e) *Preparation and mailing.* * * *

(3) *Payment of postage.* * * *

(iii) Canada only. When second-class publications addressed to Canada are bundled as prescribed in subparagraph (4)(iii) of this paragraph postage may be computed subject to the following special conditions:

(*a*) If the postage is paid with stamps affixed to the bundles, the publisher or news agent will weigh and rate each bundle at 2 cents for the first 2 ounces and 1 cent for each additional 2 ounces or fraction.

(*b*) If the postage is paid in cash or from money deposited with the postmaster, the publisher or news agent must place a write-in CANADA-BUNDLED entry on Form 3542 showing the number of bundles and the total number of copies included in the bundles. Unaddressed copies enclosed in packages addressed to one addressee may also be included. Compute the postage charges at 1 cent for each 2 ounces plus 1 cent for each bundle, or at 1 cent per copy, whichever is higher, and carry the computed postage to the appropriate line of column I on Form 3541.

NOTE: The corresponding Postal Manual section is 222.453c.

(R.S. 161, as amended; 5 U.S.C. 22, 39 U.S.C. 501, 505)

LOUIS J. DOYLE,
*General Counsel.*

# Title 43—PUBLIC LANDS: INTERIOR

## Chapter II—Bureau of Land Management, Department of the Interior

### APPENDIX—PUBLIC LAND ORDERS

[Public Land Order 3517]

[Idaho 013296]

### IDAHO

### Order Opening Reclamation Withdrawn Lands to Mineral Location, Entry and Patent

By virtue of the authority contained in the Act of April 23, 1932 (47 Stat. 136; 43 U.S.C. 154), it is ordered as follows:

1. Subject to valid existing rights and the provisions of existing withdrawals, the following described national forest lands shall, at 10 a.m. on January 28, 1965, be open to location, entry and patent under the United States mining laws:

BOISE MERIDIAN

T. 1 S., R. 8 E.,
Sec. 14, lots 1 and 3.

Containing 57.70 acres in the Boise National Forest.

2. The opening made by this order shall be subject to the stipulations set forth below and which are made a part of this order, to be executed and acknowledged in favor of the United States by the locators for themselves, their heirs, successors, and assigns, and recorded in the county records, and in the United States Land Office at Boise, Idaho, before any rights attach by virtue of this order:

a. No dredging or placer mining operations shall at any time be conducted on the premises, and no other type of prospecting or mining operations shall be carried on upon the premises, nor anything else be done thereon, which would subject downstream irrigation facilities owned or controlled by the United States to siltation in the course of normal or extraordinary stream flow.

b. No operations or practices shall at any time be conducted on the premises, which would contribute to the pollution of the waters below, adjacent thereto, or downstream therefrom. County and State sanitation codes and regulations shall be adhered to at all times.

c. There shall be reserved unto the United States of America:

(1) An easement right-of-way on and across the land for irrigation facilities including, but not limited to pipelines, ditches, canals, roads, and electrical transmission and distribution lines;

(2) a flowage easement over the land for any reservoir, including the right as of the time of the exercise of the flowage easement, to have full supervision and control of the area submerged and of a 300-foot strip parallel to and measured horizontally from the high water line of the reservoir;

(3) the right to fluctuate the flow of water in the South Fork of the Boise River, and in connection therewith the United States shall be held blameless for any damage to the land or improvements thereon as a result of erosion, flooding, decreased water supply or other matters resulting from such fluctuation;

(4) the right to take and remove from the lands construction material for use in the construction, operation or maintenance of irrigation facilities;

(5) the right to remove all buildings, structures, trees, plants, shrubs and other surface obstructions or materials interfering with, or which might interfere with, the construction, operation and maintenance of reservoirs or other irrigation facilities.

3. As the lands are included in withdrawals for power purposes, the provisions of the act of August 11, 1955 (69 Stat. 682; 30 U.S.C. 621), apply.

JOHN A. CARVER, JR.,
*Assistant Secretary of the Interior.*

DECEMBER 23, 1964.

# Title 22—FOREIGN RELATIONS

## Chapter I—Department of State

## PART 41—VISAS: DOCUMENTATION OF NONIMMIGRANTS UNDER THE IMMIGRATION AND NATIONALITY ACT, AS AMENDED

### Issuance of Nonimmigrant Visas in U.S.

Part 41, Chapter I, Title 22 of the Code of Federal Regulations is being amended to add H visas to the classes of visas which may be revalidated in the Department of State.

Paragraph (b)(2) of § 41.120 is being amended to read as follows:

§ 41.120 **Authority to issue visas.**

* * * * *

(b) *Issuance or revalidation in the United States for certain other nonimmigrants.* * * *

(2) The Director of the Visa Office of the Department and such other officers of the Department as he may designate are authorized, in their discretion, to revalidate F, H and J visas, including diplomatic visas, for qualified aliens in the United States who intend, after a temporary absence, to reenter the United States in the nonimmigrant status specified in their visas.

*Effective date.* The amendment to the regulation contained in this order shall be effective upon publication in the FEDERAL REGISTER.

The provisions of section 4 of the Administrative Procedure Act (60 Stat. 238; 5 U.S.C. 1003) relative to notice of proposed rule making are inapplicable to this order because the regulations con-

tained herein involve foreign affairs functions of the United States.

Dated: December 7, 1964.

CHARLES H. MACE,
*Acting Administrator, Bureau of Security and Consular Affairs, Department of State.*

# Title 47—TELECOMMUNICATION

## Chapter I—Federal Communications Commission

## PART 2—FREQUENCY ALLOCATIONS AND RADIO TREATY MATTERS; GENERAL RULES AND REGULATIONS

### Miscellaneous Amendments

In the matter of amendment of part 2, subpart G of the Commission's rules and regulations to effect certain editorial changes therein:

The Commission having under consideration the desirability of making certain editorial changes in Part 2, Subpart G of its rules and regulations; and

It appearing, that the amendments adopted herein are editorial in nature, and, therefore, prior publication of Notice of Proposed Rule Making under the provisions of section 4 of the Administrative Procedure Act is unnecessary, and the amendments may become effective immediately; and

It further appearing, that the amendments adopted herein are issued pursuant to authority contained in sections 4(i), (5)(d)(1) and 303(r) of the Communications Act of 1934, as amended, and section 0.261(a) of the Commission's rules;

*It is ordered*, This 22d day of December, 1964, that effective January 1, 1965, Part 2, Subpart G is amended as set forth below.

(Sec. 4, 48 Stat. 1066, as amended; 47 U.S.C. 154. Interpret or apply sec. 303, 48 Stat. 1082, as amended; sec. 5, 66 Stat. 713; 47 U.S.C. 303, 155)

Released: December 22, 1964.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] BEN F. WAPLE,
*Secretary.*

1. Section 2.601 is amended to read as follows:

**§ 2.601 General.**

This subpart is corrected to January 1, 1965. The Commission does not distribute copies of these documents. Inquiry may be made to the U.S. Government Printing Office concerning availability for purchase.

2. In § 2.603, paragraphs (a) and (c) are amended to read as follows:

**§ 2.603 Treaties and other international agreements relating to radio.**

(a) The applicable treaties and other international agreements in force relating to radio and to which the United States of America is a party are listed below:

| Date | Citations | Subject |
|---|---|---|
| 1925 | IV Trenwith 4248, 4250 and 4251 TS 724-A | US-UK (also for Canada and Newfoundland) Bilateral Arrangements providing for the Prevention of Interference by Ships off the Coasts of these Countries with Radio Broadcasting. Effected by exchange of notes Sept. and Oct., 1925. Entered into force Oct. 1, 1926. |

# Title 41—PUBLIC CONTRACTS

## Chapter 11—Coast Guard, Department of the Treasury

[CGFR 64-69]

## PART 11-60—CONTRACT DISPUTE APPEALS

### Contract Dispute Appeal Requirements

*Correction*

In F.R. Doc. 64-13223 appearing in the issue for Thursday, December 24, 1964, at page 18368, paragraph (a) of § 11-60.-209 should read as follows:

(a) A presiding officer (the chairman or vice chairman for a particular case) and two members shall constitute a quorum.

## Chapter 101—Federal Property Management Regulations

### SUBCHAPTER B—ARCHIVES AND RECORDS

## PART 101-13—PRESERVATION OF RECORDS BY WAR CONTRACTORS

### SUBCHAPTER D—PUBLIC BUILDINGS AND SPACE

## PART 101-18—ACQUISITION OF REAL PROPERTY

### Subpart 101-18.1—Acquisition by Lease

1. Chapter 101 is amended by adding Part 101-13, transferred (and redesignated) from 44 CFR Part 151.

2. Subpart 101-18.1 is amended by adding new § 101-18.108, as follows:

**§ 101-18.108 Contingent fees and related procedure.**

The provisions of Subpart 1-1.5 with respect to contingent fees and related procedure are hereby made applicable to all negotiated and advertised contracts for the acquisition of real property by lease. The covenant shall be appropriately adapted for use in leases of real property for Government use.

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c))

*Effective date.* This regulation is effective upon publication in the FEDERAL REGISTER.

Dated: December 23, 1964.

LAWSON B. KNOTT, JR.,
*Acting Administrator of General Services.*

# Title 7—AGRICULTURE

## Chapter I—Agricultural Marketing Service (Standards, Inspections, Marketing Services), Department of Agriculture

## PART 58—GRADING AND INSPECTION, MINIMUM SPECIFICATIONS FOR APPROVED PLANTS AND STANDARDS FOR GRADES OF DAIRY PRODUCTS

### Nonfat Dry Milk; Grade Not Assignable

On August 4, 1964, a notice of proposed rule making was published in the FEDERAL REGISTER (29 F.R. 11192) regarding proposed amendments to the U.S. Standards for Grades of Nonfat Dry Milk (Spray Process), and (Roller Process), and interested persons were given an opportunity to submit written data, views, or arguments in connection therewith.

The proposed effective date as published in the FEDERAL REGISTER was April 1, 1965 in order to give industry sufficient time in which to make the necessary improvements for compliance. The proposed amendments provided under Subparts L and N § 58.2529 and § 58.2594, respectively, "U.S. Grade not assignable" for a reduction in the direct microscopic bacterial count level of Nonfat Dry Milk in which a U.S. Grade will be assigned.

*Statement of consideration.* No objections were received to the proposed amendments as published. Therefore, the proposal as set forth in the aforesaid Notice of Proposed Rule Making is hereby promulgated pursuant to the authority contained in the Agricultural Marketing Act of 1946 (secs. 202-203, 60 Stat. 1087, as amended, 7 U.S.C. 1621-1627) to become effective April 1, 1965.

The amendments are as follows:

1. Change Subpart L, § 58.2529 "U.S. Grade not assignable," to read as follows:

**§ 58.2529 U.S. Grade not assignable.**

Nonfat Dry Milk which fails to meet the requirements for U.S. Standard Grade and/or shows a direct microscopic clump count exceeding 200 million per gram shall not be assigned a U.S. Grade.

2. Change Subpart M, § 58.2554, "U.S. Grade not assignable," to read as follows:

**§ 58.2554 U.S. Grade not assignable.**

Nonfat Dry Milk which fails to meet the requirements for U.S. Standard

**Grade and/or shows a direct microscopic clump count exceeding 200 million per gram shall not be assigned a U.S. Grade.**

**(60 Stat. 1090; 7 U.S.C. 1624)**

**Done at Washington, D.C., this 23d day of December 1964.**

**G. R. GRANGE,**
*Deputy Administrator,*
*Agricultural Marketing Service.*

## Chapter VII—Agricultural Stabilization and Conservation Service (Agricultural Adjustment), Department of Agriculture

### SUBCHAPTER B—FARM MARKETING QUOTAS AND ACREAGE ALLOTMENTS

[Amdt. 5]

## PART 728—WHEAT

### Subpart—Regulations Pertaining to Farm Acreage Allotments, Small Farm Bases and Normal Yield for 1964 and Subsequent Crop Years

TRANSFER OF WHEAT ACREAGE AFFECTED BY A NATURAL DISASTER

The amendments herein are issued pursuant to the Agricultural Adjustment Act of 1938, as amended, for the purpose of providing by regulation for the transfer of wheat acreage allotments in counties where, because of a natural disaster, a portion of the farm wheat acreage allotments cannot be timely planted. This amendment is specifically authorized by section 334(k) of the Act, as added by section 202(5) of the Agricultural Act of 1964.

In order that determinations with respect to transfers of acreage for the 1965 crop may be made pursuant to this amendment prior to the end of the wheat planting season, it is essential that this amendment be made effective as soon as possible. Accordingly, it is hereby determined and found that compliance with the notice, public procedure, and 30-day effective date provisions of section 4 of the Administrative Procedure Act (5 U.S.C. 1003) is impracticable and contrary to the public interest and this amendment shall be effective upon the filing of this document with the Director, Office of the Federal Register.

1. Section 728.28 relating to the applicability of regulations is redesignated as § 728.30 and the language "Sections 728.10 to 728.28" at the beginning of paragraph (a) of said section is changed to read "Sections 728.10 to 728.30".

2. An amended § 728.28 is added as follows:

**§ 728.28 Transfer of farm wheat acreage affected by a natural disaster.**

(a) *General authority.* Upon a determination for any year that because of a natural disaster a portion of the farm allotments in a county cannot be timely planted or replanted in such year, a transfer of such acreage may be authorized under section 339(k) of the act. For any year in which a natural disaster within the meaning of section 334(k) of the act occurs, the necessary determinations and designation of affected States and counties and closing date for filing applications for transfer will be published as paragraphs of this section.

(b) *Application for transfer.* The owner or operator of a farm in a county designated for any year under paragraph (a) of this section may file a written application for transfer of wheat acreage, within the farm wheat allotment, for such year to another farm in the same county or in an adjoining county in the same or another State if such acreage cannot be timely planted or replanted because of the natural disaster determined for such year. The application shall be filed with the county committee for the county in which the farm affected by such disaster is located. If the application involves a transfer to an adjoining county, the county committee for the adjoining county shall be consulted before action is taken by the county committee receiving the application.

(c) *Amount of transfer.* The acreage to be transferred shall not exceed the smaller of (1) the farm allotment established less such acreage planted to wheat and not destroyed by the natural disaster, or (2) the acreage requested to be transferred.

(d) *County Committee approval.* The county committee shall approve the transfer if it finds that the following conditions have been met:

(1) All or part of the farm allotment for the farm from which the acreage is to be transferred could not be timely planted or replanted because of the natural disaster and planting was not prohibited by the lease in case of lands owned by the Federal Government.

(2) One or more producers of wheat on the farm from which the acreage is to be transferred will be a bona fide producer engaged in the production of wheat on the farm to which the acreage is to be transferred and will share in the crop or in the proceeds of the wheat. Such sharing shall be in the manner customary in the area in order to establish the status of such producer as a bona fide producer on the farm to which the acreage is to be transferred.

(e) *Cancellation of transfer.* If a transfer is approved under this section and it is later determined that the conditions in paragraph (d) of this section have not been met, the county committee, State committee or the Deputy Administrator may cancel such transfer. Action by the county committee to cancel a transfer shall be subject to the approval of the State committee or its representative.

(f) *Acreage history credits and eligibility as an old wheat farm.* Transferred acreage shall be deemed planted on the farm from which transferred for purposes of determining history credits and eligibility as an old wheat farm whether or not such acreage was actually planted.

(g) *Closing date.* The closing date for filing application for transfers with the county committee shall be December 30 of the calendar year immediately preceding the calendar year in which the crop is harvested in the winter wheat area and June 1 of the calendar year in which the crop is harvested in the spring wheat area.

(h) *Designated States and counties affected by natural disaster.* It is hereby determined that a natural disaster consisting of flood or excessive rainfall in 1964 has prevented timely planting or replanting of a portion of the 1965 farm wheat allotments on some farms in the following designated States and counties: Florida, counties of Calhoun and Liberty.

(Secs. 334, 375, 52 Stat. 53, as amended, 66, 78 Stat. 179; 7 U.S.C. 1334, 1375)

*Effective date.* Date of filing this document with the Director, Office of the Federal Register.

Signed at Washington, D.C., on December 23, 1964.

H. D. GODFREY,
*Administrator, Agricultural Stabilization and Conservation Service.*

## Chapter VIII—Agricultural Stabilization and Conservation Service (Sugar), Department of Agriculture

### SUBCHAPTER B—SUGAR REQUIREMENTS AND QUOTAS

[Sugar Reg. 814.2, Amdt. 1]

## PART 814—ALLOTMENT OF SUGAR QUOTAS, MAINLAND CANE SUGAR AREA

### 1964

*Basis and purpose.* This amendment is issued under section 205(a) of the Sugar Act of 1948, as amended (61 Stat. 922), hereinafter called the "Act," for the purpose of amending Sugar Regulation 814.2 (7 CFR 814.2, 29 F.R. 14163) which established allotments for the Mainland Cane Sugar Area for the calendar year 1964.

This amendment is necessary to revise allotments to make effective: (1) corrections of data used in the determination of allotments and (2) the determination and proration of deficits in allotments.

The corrections of basic data made herein relate only to the Glades County Sugar Growers Cooperative Association and are as follows: 1961–63 average quota marketings of 5,447 tons was corrected to 6,886 tons; 1961–63 new-crop quota marketings of 1,356 tons was corrected to 2,795 tons, and January 1, 1964, effective inventory of 20,120 tons was corrected to 15,875 tons. Corrections of basic data made herein result in revisions of the percentages used in determining allotments.

The quantities of sugar and the percentages, based upon corrected data, and the computation of allotments are set forth in the following table:

| Processor | Processings of sugar from 1963 crop: Short tons, raw value | Processings of sugar from 1963 crop: Percent of total | Average quota marketings, 1961–63: Short tons, raw value | Average quota marketings, 1961–63: Percent of total | Ability to market (short tons, raw value): Effective inventory 1–1–64 | Ability to market (short tons, raw value): New-crop quota marketings: Average 1961–63 | Ability to market (short tons, raw value): New-crop quota marketings: "Shares" of difference [1] | Ability to market (short tons, raw value): Measures used: Col. (5) plus col. (7) | Ability to market (short tons, raw value): Measures used: Percent of total | Processor's basic allotment [2]: Percent of total | Processor's basic allotment [2]: Short tons, raw value | Processor's adjusted allotment [3] (short tons, raw value) |

| Young's Industries, Inc. | 10,534 | .891 | 7,782 | .882 | 691 | 7,460 | 5,766 | 6,457 | .709 | .853 | 7,773 | 7,744 |
| Total | 1,182,484 | 100.000 | 882,399 | 100.000 | 425,318 | 628,721 | 485,942 | 911,260 | 100.000 | 100.000 | 911,260 | 911,260 |

[1] The difference between 911,260 tons (basic quota for 1964 established by S.R. 811, effective Jan. 1, 1964, less 150 ton reserve for Louisiana State University) and total Jan. 1, 1964, effective inventories for all processors amounting to 425,318 tons. This difference of 485,942 tons prorated on the basis of each processor's average 1961–63 new-crop marketings.

[2] Determined by weighting "processings", col. (2) by 60 percent; "marketings", col. (4) by 20 percent; and "ability", col. (9) by 20 percent.

[3] Basic allotments adjusted to provide each allottee a minimum allotment equal to his Jan. 1, 1964 effective inventory.

On the basis of written advice from each allottee, the Secretary of Agriculture has determined that 18 allottees are unable to fully utilize 1964 allotments of the Mainland Cane Sugar Area Quota in excess of stated maximum quantities, and that there is a deficit in the allotments of such allottees amounting to 16,166 short tons, raw value, as follows:

| Processor | Short tons, raw value |
|---|---|
| Caldwell Sugar Co., Inc. | 3,392 |
| Columbia Sugar Co. | 48 |
| Dugas and LeBlanc, Ltd. | 507 |
| Duhe & Bourgeois Sugar Co. | 668 |
| Erath Sugar Co., Ltd. | 298 |
| Evan Hall Sugar Cooperative, Inc. | 2,133 |
| Glenwood Cooperative, Inc. | 1,539 |
| LaFourche Sugar Co. | 1,112 |
| Louisa Sugar Cooperative, Inc. | 53 |
| Louisiana State Penitentiary | 12 |
| Louisiana State University | 60 |
| Savoie Industries | 1,697 |
| St. Mary Sugar Cooperative, Inc. | 1,080 |
| Sterling Sugars, Inc. | 2,650 |
| J. Supple's Sons Planting Co., Inc. | 28 |
| Vida Sugars, Inc. | 28 |
| A. Wilbert's Sons Lbr. & Shr. Co. | 58 |
| Young's Industries, Inc. | 803 |
| Total | 16,166 |

Accordingly, a deficit of 16,166 short tons, raw value, is declared and is herein prorated to other allottees, who have indicated they can effectively use additional allotments, on the basis of the processors' basic allotments as revised herein for corrections of data.

It was found after notice and public hearing that this order shall be revised, without further notice or hearing, for the purpose of (1) revising allotments by the substitution of corrected data which have become a part of the official records of the Department and (2) allotting any quantity of an allotment to other allottees when written notification of release by an allottee of any part of an allotment becomes a part of the official records of the Department.

The allotments set forth herein have been established in accordance with findings heretofore made by the Secretary in the course of this proceeding (29 F.R. 14163).

*Effective date.* Because of the limited time remaining in the quota year to which the allotments apply, it is imperative that this amendment become effective at the earliest possible date in order to permit processors to fully utilize the entire quota for the area. Accordingly, it is hereby found that compliance with the 30-day effective date requirement of the Administrative Procedure Act (60 Stat. 237) is impracticable and contrary to the public interest and consequently, this amendment shall be effective when filed for public inspection in the Office of the Federal Register.

*Order.* Pursuant to the authority vested in the Secretary of Agriculture by section 205(a) of the Act: *It is hereby ordered,* That paragraph (a) of § 814.2, be amended to read as follows:

**§ 814.2 Allotment of the 1964 Sugar Quota for the Mainland Cane Sugar Area.**

(a) *Allotments.* The 1964 sugar quota for the Mainland Cane Sugar Area of 911,410 short tons, raw value, is hereby allotted to the following processors in the quantities which appear opposite their respective names:

| Processor | Allotments (Short tons, raw value) |
|---|---|
| Albania Sugar Co., Inc | 12,013 |
| Alma Plantation, Ltd | 10,765 |
| J. Aron & Co., Inc | 16,522 |
| Billeaud Sugar Factory | 9,897 |

## Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders; Fruits, Vegetables, Tree Nuts), Department of Agriculture

## PART 917—FRESH BARTLETT PEARS, PLUMS, AND ELBERTA PEACHES GROWN IN CALIFORNIA

### Changes in Representation of Certain Districts on the Plum Commodity Committee

Notice was published in the FEDERAL REGISTER issue of December 11, 1964 (29 F.R. 16993), that the Department was giving consideration to proposed amendments to the rules and regulations (Subpart—Rules and Regulations; 7 CFR 917.100–917.179) currently in effect pursuant to the marketing agreement, as amended, and Order No. 917, as amended (7 CFR Part 917), regulating the handling of Bartlett pears, plums, and Elberta peaches grown in California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674).

After consideration of all relevant matters presented, including the proposal set forth in the aforesaid notice which was submitted by the Control Committee (established pursuant to said amended marketing agreement and order as the agency to administer the provisions thereof), it is hereby found that the amendment, as hereinafter set forth, of the said rules and regulations is in accordance with the provisions of the said amended marketing agreement and order and will tend to effectuate the declared purposes of the Agricultural Marketing Agreement Act of 1937, as amended. Such amendment is hereby approved; and the said rules and regulations are amended as follows:

1. Delete § 917.118 and substitute therefor the following:

**§ 917.118 Changes in representation of certain districts on the Plum Commodity Committee.**

The representation or membership on the Plum Commodity Committee is changed to provide for:

(a) Three (3) members to represent the area included in the Fresno District;

(b) One (1) member to represent the area included in the Tulare District;

(c) One (1) member to represent the area included in the Kern District and Southern California District;

(d) One (1) member to represent the area included in the Placer District and Colfax District; and

(e) One (1) member to represent all the territory in California not included in the foregoing districts.

Dated, December 24, 1964, to become effective 30 days after publication in the FEDERAL REGISTER.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

FLOYD F. HEDLUND,
*Director, Fruit and Vegetable Division, Agricultural Marketing Service.*

[F.R. Doc. 64-13443; Filed, Dec. 29, 1964; 8:50 a.m.]

## PART 971—LETTUCE GROWN IN THE LOWER RIO GRANDE VALLEY IN SOUTH TEXAS

### Approval of Expenses and Rate of Assessment

Notice of rule making regarding proposed expenses and rate of assessment for the fiscal period ending July 31, 1965, and the amended expenses for the fiscal period ending July 31, 1964, to be effective under Marketing Agreement No. 144 and Marketing Order No. 971 (7 CFR Part 971), regulating the handling of lettuce grown in the Lower Rio Grande Valley in South Texas, was published in the FEDERAL REGISTER December 8, 1964 (29 F.R. 16833). This regulatory program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.). The notice afforded interested persons an opportunity to submit data, views or arguments pertaining thereto not later than 15 days following publication in the FEDERAL REGISTER.

The South Texas Lettuce Committee considered the notice and unanimously recommend a reduction to one-half cent ($0.005) per carton in the rate of assessment for the 1964–65 fiscal period. Their recommendations are approved herein, as prospective revenues from such assessments and available reserves are adequate to cover budgeted expenses.

After consideration of all relevant matters, including the proposal set forth in the aforesaid notice, which was recommended by the South Texas Lettuce Committee, established pursuant to the amended marketing agreement and order, it is hereby found and determined that:

**§ 971.204 Expenses amended.**

(a) The reasonable expenses incurred by the South Texas Lettuce Committee enabling such committee to perform its functions during the fiscal period ended July 31, 1964, amounted to $16,869.82. The budget for such fiscal period shall be and is hereby amended, pursuant to § 971.42(c), and the recommendations of the committee, to approve expenses for $16,869.82. No change in the rate of assessment is necessary.

**§ 971.205 Expenses and rate of assessment.**

(a) The reasonable expenses that are likely to be incurred during the fiscal period August 1, 1964, through July 31, 1965, by the South Texas Lettuce Committee for its maintenance and functioning and for such purposes as the Secretary determines to be appropriate, will amount to $16,975.00.

(b) The rate of assessment to be paid by each handler in accordance with the marketing agreement and this part shall be one-half cent ($0.005) per carton of lettuce handled by him as the first handler thereof during said fiscal period.

It is hereby found that good cause exists for not postponing the effective date of this section until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 1003) in that: (1) the relevant provisions of the amended marketing agreement and this part require that rates of assessment fixed for a particular fiscal period shall be applicable to all assessable lettuce from the beginning of such period, and (2) the current fiscal period began on August 1, 1964, and the rate of assessment herein fixed will automatically apply to all assessable lettuce beginning with such date.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601 et seq.)

Dated: December 24, 1964.

FLOYD F. HEDLUND,
*Director, Fruit and Vegetable Division.*

# Title 15—COMMERCE AND FOREIGN TRADE

## Subtitle A—Office of the Secretary of Commerce

## PART 3—RULES OF PROCEDURE FOR HANDLING CONTRACT APPEALS

Part 3 is added to Title 15 of the Code of Federal Regulations to read as follows:

Sec.
3.1 Scope and authority.
3.2 Purpose.
3.3 How to begin an appeal.
3.4 Duties of Contracting Officer and Government Counsel.
3.5 Duties of Board upon receipt of notice of appeal.
3.6 Service of papers.
3.7 Appellant's statement of claim.
3.8 Answer.
3.9 Prehearing conference.
3.10 Depositions, interrogatories, production of documents.
3.11 Settlement.
3.12 Hearings.
3.13 Decisions.
3.14 Reconsideration.
3.15 Optional accelerated procedure.
3.16 Extensions of time.

AUTHORITY: The provisions of this Part 3 issued under R.S. 161; 5 U.S.C. 22, Department Order No. 106 (Revised), 25 F.R. 2603, 3-26-60.

**§ 3.1 Scope and authority.**

(a) The standard forms of construction, supplies and services contracts used within the Department of Commerce contain provisions to the effect that disputes arising thereunder and not disposed of by agreement shall be decided by the contracting officer, subject to appeal by the contractor to the head of the Department, i.e., the Secretary of Commerce. This is a contractual method of resolving disagreement and can be invoked only where and to the extent a contract so provides.

(b) Pursuant to Revised Statutes, section 161 (5 U.S.C. 22) and sections 2 and 4 of Reorganization Plan No. 5 of 1950 (5 U.S.C. 133z–15), the Secretary has established an Appeals Board (Department Order No. 106 (?) 25 F.R. 2603, 3–26–60), within the Office of the Assistant Secretary for Administration, and has delegated to this Board authority to consider and decide disputes under contracts entered into by the several bureaus (other than the Maritime Administration) within the Department. There is no further administrative appeal within the Department of Commerce from decisions of the Board. (The Secretary has also authorized the Board to consider appeals from the public in respect to certain specified administrative and regulatory actions within the Department, e.g., under the Export Control Act, Parts 382 and 383 of this title, Defense Production Act, Regs. 5 under Chap. VI of Title 32A, and Surplus Property Disposal Act, § 401.13, Chap. IV of Title 44.)

(c) The Appeals Board consists of a full-time Chairman and fifteen (15) to twenty (20) departmental officials specially qualified to serve as members and designated as such by the Secretary. The Chairman is the administrative head of the Board and is authorized to assign each matter on appeal to a panel of three (3) Board members. The Chairman may serve as a member of each panel, but in the event of his absence or unavailability for any other reason he may designate another Board member to serve in that capacity.

**§ 3.2 Purpose.**

It is the purpose of these procedures to provide for impartial, inexpensive, and expeditious handling of contract appeals, consistent with the contract terms and other requirements of law, the orderly conduct of the proceeding, and the necessity for making a complete record.

**§ 3.3 How to begin an appeal.**

(a) An appeal from the findings of fact and determination of the contracting officer shall be made by notice in writing in the manner and within the time specified in the contract.

(b) The notice of appeal shall indicate that an appeal is intended, identify the contract and the contracting officer, and the particular findings of fact and determination from which the appeal is taken. It shall be signed by appellant personally, if an individual, or if not, by an authorized officer of the appellant organization or by the appellant's attorney. The supporting statement of claim referred to in § 3.7 may be filed with the notice of appeal or it may be filed as set forth in § 3.7.

**§ 3.4 Duties of Contracting Officer and Government Counsel.**

(a) Promptly upon receipt of a copy of the notice of appeal, the contracting officer shall notify and request the legal adviser of the agency administering the contract involved to designate a Government counsel to represent the interests of the Government. The Government counsel shall promptly file notice of appearance with the Appeals Board.

(b) Within thirty (30) days after receipt of the notice of appeal, the contracting officer shall compile and transmit to the Government counsel an appeal file consisting of:

(1) The findings of fact and determination and all documents upon which his decision was based;

(2) The invitation for bids, the contract, and all plans and specifications, amendments, change orders, directives, supplemental agreements, and work order records related to the dispute;

(3) Substantive correspondence between the parties;

(4) Map or other descriptive material of the subject matter.

(c) The Government counsel will forward the appeal file to the Board, and so advise the appellant and that it may be examined at the office of the Board or the contracting officer.

**§ 3.5 Duties of Board upon receipt of notice of appeal.**

Upon receipt of notice of appeal, the Appeals Board shall docket the case by giving it an appropriate number and shall send a notice of receipt and the docket number to the Government counsel, the appellant and his attorney. A copy of the Board rules of procedure will also be sent to appellant and his attorney.

**§ 3.6 Service of papers.**

A copy of all statements, pleadings, briefs and any other documents and data of whatever nature, except the appeal file, shall be served on the other party at the time of filing with the Appeals Board.

**§ 3.7 Appellant's statement of claim.**

Within thirty (30) days after the mailing or filing of a notice of appeal appellant shall file with the Appeals Board a concise and detailed statement of the nature and amount of each claim, the reasons why the contracting officer's determination in respect thereto is deemed erroneous, and any documentation upon which he relies.

**§ 3.8 Answer.**

(a) Within thirty (30) days after receipt of the appellant's statement of claim, Government counsel shall prepare and file with the Appeals Board an answer setting forth the Government's position on each claim and the reasons therefor.

(b) Upon request made within ten (10) days, the Board shall afford the appellant a reasonable opportunity to file a statement in rebuttal of the Government's answer.

**§ 3.9 Prehearing conference.**

The Appeals Board may require the parties to appear for a conference to consider agreement and simplification of the issues, possible stipulations as to facts and documents, limitation of the number of expert and other witnesses, and any other matters that may assist in the disposition of the appeal.

**§ 3.10 Depositions, interrogatories, production of documents.**

The Appeals Board may consider requests for permission to take the testimony of any person by deposition, to serve written interrogatories upon the opposing party, and to produce and permit the inspection of designated documents. Such requests shall be approved only to the extent and upon such conditions as the Board in its discretion considers to be consistent with the objective of securing a fair, expeditious and inexpensive determination of the dispute on appeal.

**§ 3.11 Settlement.**

Whenever at any time it appears that appellant and Government counsel are in agreement as to disposition of the dispute, the Appeals Board may suspend further processing of the appeal in order to permit settlement by the contracting officer or other proper authority.

**§ 3.12 Hearings.**

(a) The Appeals Board will provide an oral hearing unless waived by both par-

ties, and will give the parties at least thirty (30) days' notice of the time and place of the hearing. Hearings will be held in Washington, D.C., unless there is, in the Board's judgment, a special and substantial justification for holding the hearing elsewhere.

(b) Witnesses at hearings will not be required to testify under oath. However, the presiding officer will call to the attention of each witness that his statements are subject to the provisions of Federal law imposing penalties for knowingly making false representations in connection with claims against the United States or in any matter within the jurisdiction of any Government department or agency. All witnesses may be examined or cross-examined by the Board members, the parties or their representatives.

(c) Both parties may offer oral and written evidence, subject to exclusion, in the presiding officer's discretion, of irrelevant, immaterial or unnecessarily repetitious evidence. The probative value of all evidence received will be determined by the Board. Testimony at hearings shall be reported verbatim.

(d) Post-hearing briefs may be submitted by either party or required by the Board, and appropriate rebuttal arrangements may also be authorized by the Board.

**§ 3.13 Decisions.**

(a) All decisions of the Appeals Board shall be based solely on the record made before it, and the Board may decide all questions of fact and law arising under the provisions of the contract in question. Under the provisions of the so-called Wunderlich Act, 68 Stat. 81 (1954), 41 U.S.C. sections 321 and 322, a departmental decision on a question of fact arising under a contract disputes clause is declared to be final and conclusive and not subject to judicial review "unless the same is fraudulent or capricious or arbitrary or so grossly erroneous as necessarily to imply bad faith or is not supported by substantial evidence." A Board decision on a question of law, on the other hand, is subject to full judicial review.

(b) The decision of a majority of the panel in a particular case constitutes the decision of the Board. Decisions will be made in writing and copies furnished to all parties. All decisions will be available to public inspection except those required for good cause to be held confidential to the parties and not cited as precedents.

**§ 3.14 Reconsideration.**

Requests for reconsideration may be made by either party within thirty (30) days from the date of receipt of its copy of the Board's decision. Such requests will be considered only upon a showing of significant error or on the basis that new and material evidence has been discovered. The other party will be afforded a reasonable time to oppose such request for reconsideration, and the Board will as soon as practicable thereafter rule on the request. Failure to request reconsideration shall not be deemed to be a failure to exhaust administrative remedies.

**§ 3.15 Optional accelerated procedure.**

If the amount involved in an appeal is relatively small or the appeal otherwise specially lends itself to expeditious consideration, the Appeals Board may, with the concurrence of the parties, reach a decision on the basis of the available record as furnished by the parties. Such appeals will be decided as soon as practicable without regard to their normal position on the docket and in such summary form as may be appropriate.

**§ 3.16 Extensions of time.**

Upon request, time extensions may be granted by the Appeals Board except with respect to the filing of the notice of appeal.

*Effective date.* The provisions of section 4 of the Administrative Procedure Act (5 U.S.C. 1003) which require notice of proposed rule making, opportunity for public participation, and delay in effective date are not applicable because these rules relate to agency management and public contracts. Accordingly, these regulations shall become effective upon publication in the FEDERAL REGISTER, and except as otherwise directed by the Chairman of the Appeals Board they shall not apply to appeals which have been docketed prior to that date.

Dated: December 22, 1964.

NATHAN OSTROFF,
*Chairman, Appeals Board.*

# Title 14—AERONAUTICS AND SPACE

## Chapter I—Federal Aviation Agency

SUBCHAPTER E—AIRSPACE [NEW]

[Airspace Docket No. 64-SO-70]

## PART 71—DESIGNATION OF FEDERAL AIRWAYS, CONTROLLED AIRSPACE, AND REPORTING POINTS [NEW]

### Alteration of Control Zone

The purpose of this amendment to § 71.171 of the Federal Aviation Regulations is to alter the time of designation of the Winston-Salem, N.C., control zone.

The Winston-Salem control zone is presently designated as a full-time control zone. The United States Department of Commerce intends to discontinue the Weather Bureau Office located at Smith-Reynolds Airport, Winston-Salem, N.C., on or about March 4, 1965.

Therefore, action is taken herein to reduce the time of designation of the control zone to coincide with the operating hours of the Winston-Salem Airport Traffic Control Tower.

Since the change effected by this amendment is less restrictive in nature than the present requirements and imposes no additional burden on any person, notice and public procedure hereon are unnecessary and it shall become effective 0001 e.s.t., March 4, 1965.

In consideration of the foregoing, the following action is taken:

In § 71.171 (29 F.R. 1101, 29 F.R. 16245) the Winston-Salem, N.C., control zone is amended to read:

WINSTON-SALEM, N.C.

Within a 5-mile radius of Smith-Reynolds Airport (latitude 36°08'00" N., longitude 80°-13'20" W.), effective from 0700 to 2300 hours, local time daily.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a))

Issued in East Point, Ga., on December 18, 1964.

[Special Federal Aviation Regulations 12, 13, 14, and 15]

## PART 91—GENERAL OPERATING AND FLIGHT RULES

## PART 127—CERTIFICATION AND OPERATION OF SCHEDULED AIR CARRIERS WITH HELICOPTERS

## PART 129—OPERATIONS OF FOREIGN AIR CARRIERS

## PART 135—AIR TAXI OPERATORS AND COMMERCIAL OPERATORS OF SMALL AIRCRAFT

## PART 141—PILOT SCHOOLS

## PART 171—NON-FEDERAL NAVIGATION FACILITIES

### Miscellaneous Amendments

The purpose of these amendments is to complete the remainder of the Agency's recodification program. The program was first announced in Draft Release 61-25, published in the FEDERAL REGISTER on November 15, 1961 (26 F.R. 10698).

All Civil Air Regulations in Chapter I of Title 14 of the Code of Federal Regulations will have been replaced with the issue of Part 121 of the Federal Aviation Regulations. That part is being issued separately and will become effective at the same time as these amendments.[1]

The recodification of the regulations in Chapter III (Regulations of the Administrator) of Title 14 and the Special Civil Air Regulations is completed with the issue of the following miscellaneous amendments to Chapter I of Title 14. No regulations of the FAA will remain in Chapter III. Henceforth, all Federal Aviation Regulations and Special Federal Aviation Regulations will be contained in Chapter I of Title 14 of the Code of Federal Regulations.

Section 406.17(a) of the Regulations of the Administrator provided authority for the operation of a "true light" as an aid to air navigation. Under the Federal Aviation Regulations, such a provision belongs in Part 171—"Non-Federal Navigation Facilities". Therefore, a new Subpart D is being added to Part 171, recodifying § 406.17(a) of the Regulations of the Administrator.

This addition to Part 171 completes the recodification of Part 406 and enables the Agency to delete the Regulations of the Administrator in Chapter III of Title 14 of the Code of Federal Regulations. All other parts in this chapter have been previously recodified. Those sections of Part 406 neither heretofore recodified nor being recodified in Part 121 have been determined to be surplusage. Their substance either duplicates other provisions in the Federal Aviation Regulations or is advisory only.

In an attempt to limit the use of "special" regulations to those occasions of temporary or peculiar regulatory need, this amendment deletes certain Special Civil Air Regulations (SRs) of indefinite duration and incorporates them into the Federal Aviation Regulations:

1. SR 330 is being recodified by including its substance in a new § 141.31, "Special Flight Instruction for Military Personnel of a Foreign Government".

2. SR 389B is being recodified by including its substance in a new § 91.47, "Emergency exits for airplanes carrying passengers for hire".

3. SR 411B, as applicable to foreign air carriers, is being recodified by including its substance in a new § 129.23, "Transport category cargo service airplanes: increased zero fuel and landing weights".

4. SR 448A, except for paragraph (2), is being recodified by including its substance in a new § 91.8, "Prohibition Against Interference with Crewmembers".

5. SR 456 is being recodified by including its substance in a new § 91.103, "Operation of Civil Aircraft of Cuban Registry".

Part 121 of the Federal Aviation Regulations will contain the substance of SR 411B as it applies to air carriers other than foreign air carriers.

Because the applicability of neither SR 389B nor SR 448A(1) was restricted to operation within the United States but in effect, extended throughout air commerce, § 91.1 is being amended to except new §§ 91.47 and 91.8 from applicability only within the United States. Also included within this exception are two other sections already in Part 91. These sections, §§ 91.19 and 91.45 as originally recodified, were limited in applicability by § 91.1, to within the United States. The applicability provisions of those Civil Air Regulations from which these sections were recodified were not so limited. The effect of the new exception in § 91.1(c), is to relieve the four specified sections from the geographic limitation of § 91.1(a). It should also be noted that this exception is limited to aircraft of U.S. registry. Clarifying provisions are being added to new § 91.1 (c) to assure that, for the purposes of the excepted sections, there can be no regulatory conflict for U.S. registered aircraft operating in foreign countries or over the high seas. In addition, the word order in § 91.1(a) is being revised to show more clearly that the exception refers only to the limitation of the part's applicability to operations within the United States.

Paragraph (2) of SR 448A dealt with the prohibition against carrying a dangerous weapon while on board air carrier aircraft. Since its applicability extended only to air carrier aircraft, SR 448A(2) is being recodified by adding §§ 121.585 (to be issued separately) and a new 135.64. Section 127.227(c) already reflects SR 448A(2). Since SR 448A(1), which was the basis for paragraphs (a) and (b) of § 127.227, is hereby being recodified as § 91.8, § 127.227 is being amended to delete those paragraphs. In addition, § 127.139 is being clarified by adding to it a definition, taken from CAM 40.241-1, of "directly in charge". This definition reflects the sense in which the term is used in this section and in § 121.378, where it will also be added.

The following Special Civil Air Regulations are being deleted, because each has accomplished its intended purpose and is no longer necessary: 395B 430; 431; and 433. Because the geographic applicability of § 91.19 is being extended by amendment of § 91.1, SR 446B may now be deleted. SR 450A has not been recodified since it will lapse of its own force on February 1, 1965. In addition, SR 397, which in effect was an exemption from the Civil Air Regulations, rather than a regulation, is being deleted. In its place the Agency is issuing separately, a grant of exemption from the Federal Aviation Regulations for aircraft and airmen engaged in operations conducted for the United States Forest Service.

Certain Special Civil Air Regulations are being redesignated as Special Federal Aviation Regulations (SFARs). These are former SRs 399D, 407, 426, and 454A.

Of these, the first deals with the maximum certificated weight for airplanes operated in Alaska by Alaskan air carriers, air taxi operators, and the Department of the Interior. This regulation becomes SFAR 12 and its expiration date remains October 25, 1965.

SR 407 provides for approval of modified Douglas DC-3 and Lockheed L-18 type airplanes, and SR 426 provides for performance credit for transport category airplanes equipped with standby power. The present expiration date of each is indefinite. They are being redesignated as SFAR 13 and 14, respectively. One reason for not recodifying them into the basic FARs is that the need for each regulation has diminished over the years and is now quite limited. In addition, neither SR belonged in any one part of the Federal Aviation Regulations. In light of these peculiarities and since a special regulation does not differ in legal effect from any other regulation, the Agency determined to redesignate SR 407 as SFAR 13 and SR 426 as SFAR 14.

SR 454A provides for operation over certain areas of Florida and adjacent waters. In view of the significant tie of this regulation with National Defense interests and the international political atmosphere, either of which could change on very short notice, the Agency finds that National Defense and safety in air commerce are best served by redesignating SR 454A as SFAR 15.

In addition, it is no longer necessary to use the word "[New]" when referring to a part of the Federal Aviation Regulations. This is possible because all Civil Air Regulations in Chapter I of Title 14, with the issue of Part 121, have now been replaced by Federal Aviation Regulations.

None of these amendments impose an additional burden on any person. Some are clarifying in nature, while most simply restate the substance of the specified regulations. Because of this I find that notice and public procedure hereon are unnecessary.

In consideration of the foregoing, Title 14 is amended by striking out the Regulations of the Administrator in Chapter III and by amending Chapter I as follows, effective April 1, 1965.

1. By striking out Special Civil Air Regulations 330, 389B, 395B, 397, 411B, 430, 431, 433, 446B, 448A, 450A, and 456.

2. By amending Part 91 "General Operating and Flight Rules" as follows:

A. By amending § 91.1 to read as follows:

**§ 91.1 Applicability.**

(a) This part prescribes rules governing the operation of aircraft (other than moored balloons, kites, unmanned rockets, and unmanned free balloons) within (except as provided in paragraphs (b) and (c) of this section) the United States.

(b) Each person operating an aircraft of U.S. registry in air commerce over the high seas shall comply with Annex 2 (Rules of the Air) to the convention on International Civil Aviation.

(c) Sections 91.8, 91.19, 91.45, and 91.47 also govern the operation of aircraft of U.S. registry outside of the United States so far as these sections are not inconsistent with applicable regulations of any foreign country or Annex 2 to the convention on International Civil Aviation.

B. By adding a new § 91.8 to read as follows:

**§ 91.8 Prohibition against interference with crewmembers.**

(a) No person may assault, threaten, intimidate, or interfere with a crewmember in the performance of his duties aboard an aircraft being operated in air commerce.

(b) No person may attempt to cause or cause the flight crew of an aircraft being operated in air commerce to divert its flight from its intended course or destination.

C. By adding a new § 91.47 to read as follows:

**§ 91.47 Emergency exits for airplanes carrying passengers for hire.**

(a) Notwithstanding any other provision of this chapter, no person may operate a large airplane (type certificated under the Civil Air Regulations before April 9, 1957) in passenger-carrying operations for hire, with more than the number of occupants allowed under Civil Air Regulation § 4b.362 (a), (b), and (c), as in effect on December 20, 1951. However, an airplane type listed in the following table may be operated with up

[1] To be published in the FEDERAL REGISTER of Thursday, December 31, 1964.

to the listed number of occupants (including crewmembers) and the corresponding number of exits (including emergency exits and doors) approved for the emergency exit of passengers:

| Airplane type | Maximum number of occupants including crewmembers | Corresponding number of exits authorized for passenger use |
|---|---|---|
| B–307 | 61 | 4 |
| B–377 | 96 | 9 |
| C–46 | 67 | 4 |
| CV–240 | 53 | 6 |
| CV–340 and CV–440 | 53 | 6 |
| DC–3 | 35 | 4 |
| DC–3 (Super) | 39 | 5 |
| DC–4 | 86 | 5 |
| DC–6 | 87 | 7 |
| DC–6B [1] | 112 | 11 |
| L–18 | 17 | 3 |
| L–049, L–649, L–749 | 87 | 7 |
| L–1049 (series) | 96 | 9 |
| M–202 | 53 | 6 |
| M–404 | 53 | 7 |
| Viscount 700 series | 53 | 7 |

[1] The DC–6A, if converted to a passenger transport configuration, is governed by the maximum number applicable to DC–6B.

(b) Additional occupants may be carried if there are additional exits comparable to at least a Type II or Type IV exit as prescribed in § 25.807, but not more than eight additional occupants may be carried for each additional exit. In the case of exits not comparable to at least a Type II or Type IV exit, the Administrator may authorize a lesser number of additional occupants, after considering the type, size, and location of the exit and other pertinent factors.

(c) For airplanes having a ratio (as computed from the table in paragraph (a) of this section) of maximum number of occupants to number of exits greater than 14:1, and for airplanes that do not have at least one full-size door-type exit in the side of the fuselage in the rear part of the cabin, the first additional exit must be a floor-level exit not less than 24 inches wide, by 48 inches high, and located in the side of the fuselage in the rear part of the cabin. However, no person may operate an airplane under this section carrying more than 115 occupants unless there is such an exit on each side of the fuselage.

(d) The Administrator reduces the maximum number of occupants authorized by the table whenever the number of approved exits is less than shown in the table, after taking into account the effectiveness of the remaining exits for emergency evacuation. However, the maximum number of occupants is reduced by at least eight for each eliminated exit, and in no case may the resulting ratio of occupants to exits be greater than 14:1. In addition, there must be at least one exit on each side of the fuselage, regardless of the number of occupants.

D. By adding a new § 91.103 to read as follows:

**§ 91.103 Operation of civil aircraft of Cuban registry.**

No person may operate a civil aircraft of Cuban registry outside of controlled airspace.

E. By adding to the distribution table:

| Former section | Revised section |
|---|---|
| SR 389B | 91.47 |
| SR 448A (less paragraph (2)) | 91.8 |
| SR 456 | 91.103 |

3. By amending Part 127 "Certification and Operations of Scheduled Air Carriers with Helicopters" as follows:

A. By amending § 127.139 to read as follows:

**§ 127.139 Certificate requirements.**

(a) Each person who is directly in charge of maintenanee, preventive maintenance, or alteration, and each person performing required inspections must hold an appropriate airman certificate.

(b) For the purposes of this section, a person "directly in charge" is each person assigned to a position in which he is responsible for the work of a shop or station that performs maintenance, preventive maintenance, alterations, or other functions affecting aircraft airworthiness. A person who is "directly in charge" need not physically observe and direct each worker constantly but must be available for consultation and decision on matters requiring instruction or decision from higher authority than that of the persons performing the work.

B. By amending § 127.227 to read as follows:

**§ 127.227 Prohibition against carriage of weapons.**

No person may, while on board a helicopter being operated under this Part, carry on or about his person a deadly or dangerous weapon, either concealed or unconcealed. This section does not apply to—

(a) Officials or employees of a municipality or a State, or of the United States, who are authorized to carry arms; or

(b) Crewmembers and other persons authorized by the air carrier to carry arms.

C. By amending the distribution table as applicable to SR 448A to read:

| Former section | Revised section |
|---|---|
| SR 448A, paragraph (2) | 127.227 |

D. By adding to the distribution table:

| Former section | Revised section |
|---|---|
| 40.241–1 | 127.139 |

4. By amending Part 129 "Operations of Foreign Air Carriers" as follows:

A. By adding a new § 129.23 to read as follows:

**§ 129.23 Transport category cargo service airplanes: increased zero fuel and landing weights.**

(a) Notwithstanding the applicable structural provisions of the transport category airworthiness regulations, but subject to paragraphs (b) through (g) of this section, a foreign air carrier may operate (for cargo service only) any of the following transport category airplanes (certificated under Part 4b of the Civil Air Regulations effective before March 13, 1956) at increased zero fuel and landing weights—

(1) DC–6A, DC–6B, DC–7B, and DC–7C; and

(2) L–1049 B, C, D, E, F, G, and H, and the L–1649A when modified in accordance with supplemental type certificate SA 4–1402.

(b) The zero fuel weight (maximum weight of the airplane with no disposable fuel and oil) and the structural landing weight may be increased beyond the maximum approved in full compliance with applicable rules only if the Administrator finds that—

(1) The increase is not likely to reduce seriously the structural strength;

(2) The probability of sudden fatigue failure is not noticeably increased;

(3) The flutter, deformation, and vibration characteristics do not fall below those required by applicable regulations; and

(4) All other applicable weight limitations will be met.

(c) No zero fuel weight may be increased by more than five percent, and the increase in the structural landing weight may not exceed the amount, in pounds, of the increase in zero fuel weight.

(d) Each airplane must be inspected in accordance with the approved special inspection procedures, for operations at increased weights, established and issued by the manufacturer of the type of airplane.

(e) A foreign air carrier may not operate an airplane under this section unless the country of registry requires the airplane to be operated in accordance with the passenger-carrying transport category performance operating limitations in Part 121 or the equivalent.

(f) The Airplane Flight Manual for each airplane operated under this section must be appropriately revised to include the operating limitations and information needed for operation at the increased weights.

(g) Each airplane operated at an increased weight under this section must, before it is used in passenger service, be inspected under the special inspection procedures for return to passenger service established and issued by the manufacturer and approved by the Administrator.

B. By adding to the distribution table:

| Former section | Revised section |
|---|---|
| SR 411B | 129.23 |

5. By amending Part 135 "Air Taxi Operators and Commercial Operators of Small Aircraft" to add a new § 135.64 to read as follows:

**§ 135.64 Prohibition against carriage of weapons.**

No person may, while aboard an aircraft being operated by an air taxi operator, carry on or about his person a deadly or dangerous weapon, either concealed or unconcealed. This section does not apply to—

(a) Officials or employees of a municipality or a State, or of the United States, who are authorized to carry arms; or

(b) Crewmembers and other persons authorized by the air taxi operator to carry arms.

6. By amending Part 141 "Pilot Schools" as follows:

A. By adding a new § 141.31 to read as follows:

**§ 141.31 Special flight instruction for military personnel of a foreign government.**

Notwithstanding any other provision of this chapter, a pilot school certificated under this part with a flying school rating may train personnel of any foreign government in maneuvers that are not within the approved airplane operating limitations if—

(a) An official request is made to the Administrator by an accredited representative of the foreign government;

(b) The Administrator finds that the training can be accomplished with a standard of safety equal to that maintained by the United States Air Force or Navy;

(c) The training is accomplished in accordance with appropriate United States Air Force or Navy Technical Orders; and

(d) No airplane is used to show compliance with an acrobatic maneuver required in a flight test for the issue of an airman certificate or rating, against which it has been placarded.

B. By adding to the distribution table:

| Former section | Revised section |
|---|---|
| SR 330 | 141.31 |

7. By amending Part 171 "Non-Federal Navigation Facilities" as follows:

A. By redesignating Subpart D as Subpart E and § 171.61 as § 171.71.

B. By adding a new Subpart D to read as follows:

### Subpart D—True Lights

**§ 171.61 Authority to operate a true light.**

(a) An applicant who certifies that he will, in accordance with applicable requirements of the FAA, establish, maintain, and operate a light as an aid to air navigation, is issued an air navigation certificate, authorizing him to operate that light as a "true light".

(b) An application for authority to operate a true light is made on Form FAA–114 "Certification and Lawful Authority to Operate a True Light".

C. By adding to the distribution table:

| Former section | Revised section |
|---|---|
| 406.17 (less (b)) | 171.61 |

8. By redesignating Special Civil Air Regulation 399D, "Provisional Certificated Maximum Weights for Certain Airplanes Operated by Alaskan Air Carriers, Air Taxi Operators in Alaska, and the Department of the Interior" as Special Federal Aviation Regulation (SFAR) 12, to be effective until October 25, 1965.

9. By redesignating Special Civil Air Regulation 407, "Basis for Approval of Modification of Airplane Types Douglas DC–3 and Lockheed L–18", as Special Federal Aviation Regulation (SFAR) 13, to be effective indefinitely.

10. By redesignating Special Civil Air Regulation 426, "Performance Credit for Transport Category Airplanes Equipped with Standby Power", as Special Federal Aviation Regulation (SFAR) 14, to be effective indefinitely.

11. By redesignating Special Civil Air Regulation 454A, "Special Operating Rule Within Certain Areas of the State of Florida and Over Waters Adjacent Thereto", as Special Federal Aviation Regulation SFAR) 15, to be effective indefinitely.

(Secs. 307, 313(a), 314, 501, 601–610, 902(c), 1102, 1110, and 1202, Federal Aviation Act of 1958, 49 U.S.C. 1348, 1354(a), 1355, 1401, 1421–1430, 1472(c), 1502, 1510, 1522)

Issued in Washington, D.C., on December 23, 1964.

# Title 17—COMMODITY AND SECURITIES EXCHANGES

## Chapter II—Securities and Exchange Commission

[Release No. 33–4749]

## PART 230—GENERAL RULES AND REGULATIONS, SECURITIES ACT OF 1933

### Delivery of Prospectuses by Dealers

On September 15, 1964, in Securities Act Release No. 4726 (29 F.R. 13486, September 30, 1964), the Securities and Exchange Commission published its proposal to adopt Rules 425A (17 CFR 230.425A) and 174 (17 CFR 230.174) under the Securities Act of 1933. Rule 425A was proposed in order that dealers will be apprised more readily of their obligation to deliver a prospectus in transactions in securities as to which a registration statement has become effective under the Act. Rule 174 shortens or eliminates the statutory prospectus delivery requirements of section 4(3) of the Act for a dealer who is not an underwriter continuing to act as such or a dealer participating in a distribution in a transaction in securities constituting an unsold allotment to or subscription by such dealer in three instances.

In effect the dealer's transaction exemption in section 4(3) [1] of the Act requires all dealers, whether or not they participate in the initial distribution of a registered security, to deliver a prospectus for a designated period in connection with all transactions in such registered security in which any means or instrumentalities of interstate commerce or the mails are used, excepting only unsolicited brokers' transactions.[2]

It should be noted that a prospectus must be delivered by an underwriter continuing to act as such and by a dealer effecting transactions in securities constituting the whole or part of an unsold allotment to or subscription by such dealer as a participant in the distribution. This obligation of underwriters and dealers continue so long as they are participating in a distribution no matter how much time has elapsed since the commencement of the offering. Otherwise, a dealer effecting transactions in such securities is required to deliver a prospectus for 40 days after the registration statement becomes effective or the date the security is first bona fide offered to the public, whichever is later. However, if the issuer has not made a previous offering under an effective Securities Act registration statement, the aforementioned 40 day period is extended to 90 days.

A number of helpful comments were received in response to the above release. After further consideration of the matter and consideration of all of the comments received, the Commission has adopted the rules with certain additions and modifications.

As adopted, Rule 425A requires a statement on the cover of a prospectus stating the date on which the relevant 40 or 90 day period will expire. The rule as proposed has been revised to make clear that the statement may be set forth on the outside front or back cover page or the inside front cover page of the prospectus. The proposed rule has also been revised to provide that the statement is not required if, pursuant to Rule 174, dealers are not required to deliver a prospectus pursuant to the provisions of section 4(3)(B) of the Act or if the exemptive provisions of section 4(3) are not applicable pursuant to the provisions of section 24(d) of the Investment Company Act of 1940. Section 24(d) provides that the exemption provided by section 4(3) is not applicable in transactions in a security issued by a face-amount certificate company or in a redeemable security issued by an open-end management company or unit investment trust, if any other security of the same class is currently being offered or sold by the issuer or by an underwriter in a distribution which is not exempted from section 5 of the Act, except as otherwise provided by Commission rule or regulation.

It was pointed out in a number of comments that issuers do not always know the exact date when an offering will begin at the time a registration statement becomes effective. Therefore, the rule as adopted provides that the expi-

[1] Prior to the 1964 Amendments to the Securities Acts this exemption was contained in the third unnumbered clause of Section 4(1). The amendments to the Securities Act and the background of Rules 425A and 174 are more fully described in Securities Act Release No. 4726.

[2] The definition of "dealer" in the Securities Act of 1933 includes brokers. The brokers' transaction exemption in Section 4(4) of the Act (designated Section 4(2) prior to the 1964 Amendments) applies to brokers' transactions executed upon customers' orders on any exchange or in the over-the-counter market but not the solicitation of such orders.

ration date of the period prescribed by section 4(3) of the Act and Rule 174 may be inserted in the prospectuses to be used after the effective date which must be filed pursuant to Rule 424(b) (17 CFR 230.424(b)). Before the date when the security is first offered, issuers will be required to state in the blank provided for the expiration date whether the applicable prospectus delivery period is 40 or 90 days.

As adopted Rule 174 shortens or eliminates the aforementioned 40 or 90 day statutory prospectus delivery period in the instances hereinafter discussed. The rule provides that no dealer is required to deliver a prospectus with respect to a security registered on Form S–8 (17 CFR 239.16b) (relating to certain offerings to employees), Form S–9 (17 CFR 239.22) (relating to certain non-convertible fixed interest debt securities), Form S–12 (17 CFR 239.19) (relating to American Depositary Receipts), and Form F–1 (17 CFR 239.9) (relating to voting trust certificates); except that, in the case of registration on Form S–12 or F–1, the exemption does not apply if the deposited securities are also required to be registered. It also provides that the maximum period during which dealers must deliver a prospectus will expire in 40 days if the issuer has a class of securities listed and registered on a national securities exchange under Section 12(b) of the Securities Exchange Act of 1934.

Paragraph (c) of the rule as proposed has been deleted. As proposed paragraph (c) provided that the maximum period during which dealers must deliver a prospectus expired after 40 days with respect to all registration statements which became effective on or prior to August 20, 1964, the effective date of the Securities Acts Amendments of 1964. In view of the expiration of 90 days after such effective date the Commission has determined that it is no longer necessary to include this interpretation of the Act, as amended, and has provided in lieu thereof a new paragraph (c).

New paragraph (c) of the rule as adopted relates to offerings to be made from time to time under a single registration statement. The purpose of the paragraph is to make clear in such cases, e.g., where securities are to be offered at different times by one or more of several offerees, commonly referred to as a "shelf" registration, that no new prospectus delivery period will begin for dealers trading in the offering after the first 40 or 90 day prospectus delivery period has expired following the initial offering of any of the registered securities for the accounts of any of the offerees.

The rule as adopted provides that its special provisions are inapplicable if the registration statement was the subject of a stop order. It also reserves to the Commission the power to modify the applicable period by order upon application or on its own motion in particular cases. Since the rule is addressed only to the obligation of dealers to deliver a prospectus in the trading market, provision is inserted to make clear that it does not apply to an underwriter continuing to act as such, or to a dealer participating in a distribution in a transaction in the registered securities constituting an unsold allotment to or subscription by such dealer.

Other suitable relaxations of the dealers' exemption in section 4(3) will doubtless become apparent as the Commission and the financial community gain experience under the amended requirements of the Securities Act. Meanwhile, provision is made in Paragraph (d)(2) of the rule for variations from this pattern upon application to the Commission in appropriate cases.

*Commission action.* Part 230 of Title 17, Chapter II of the Code of Federal Regulations is amended by adding new §§ 230.425a and 230.174 to read as follows:

**§ 230.425a Statement required on prospectus regarding delivery of prospectuses by dealers.**

(a) The statement set forth in paragraph (b) of this section shall be set forth on the outside front or back cover page or on the inside front cover page of every prospectus, inserting the expiration date of the period prescribed by section 4(3) of the act and § 230.174 thereunder; except that, this section shall not apply if, pursuant to § 230.174, dealers are not required to deliver a prospectus pursuant to the provisions of section 4(3)(B) of the act, or if the exemption provided by section 4(3) of the act is not applicable pursuant to the provisions of section 24(d) of the Investment Company Act of 1940. If the said expiration date is not known on the effective date of the registration statement it may be inserted in the prospectus filed pursuant to § 230.424(b). Prior to such time the applicable period prescribed in section 4(3) of the act and § 230.174 thereunder shall be included in the blank.

(b) The following legend required by paragraph (a) of this section shall be printed in bold-face type or italic type at least as large as eight point modern type and at least two points leaded:

Until _____ (insert date) all dealers effecting transactions in registered securities, whether or not participating in this distribution, may be required to deliver a prospectus. This is an addition to the obligation of dealers to deliver a prospectus when acting as underwriters and with respect to their unsold allotments or subscriptions.

**§ 230.174 Delivery of prospectus by dealers; exemptions under section 4(3) of the act.**

The obligations of a dealer (including an underwriter no longer acting as an underwriter in respect of the security involved in such transactions) to deliver a prospectus in transactions in a security as to which a registration statement has been filed taking place prior to the expiration of the 40 or 90 day period specified in section 4(3) of the act after the effective date of such registration statement or prior to the expiration of such period after the first date upon which the security was bona fide offered to the public by the issuer or by or through an underwriter after such effective date, whichever is later, shall be subject to the following provisions:

(a) No prospectus need be delivered if the registration statement is on Forms S–8 (17 CFR 239.16b), S–9 (17 CFR 239.22), S–12 (17 CFR 239.19), or F–1 (17 CFR 239.9): *Provided*, In the case of a registration statement on Forms S–12 (17 CFR 239.19) or F–1 (17 CFR 239.9), this provision shall not apply if registration of the deposited securities is also required.

(b) If the issuer has a class of security listed and registered on a national securities exchange pursuant to section 12(b) of the Securities Exchange Act of 1934, the period during which a prospectus must be delivered shall be 40 days.

(c) Where a registration statement relates to offerings to be made from time to time no prospectus need be delivered after the expiration of the initial prospectus delivery period specified in section 4(3) of the act or in paragraphs (a) or (b) of this section following the first bona fide offering of securities under such registration statement.

(d) Notwithstanding the foregoing, the period during which a prospectus must be delivered by a dealer shall be:

(1) As specified in section 4(3) of the act if the registration statement was the subject of a stop order issued under section 8 of the act; or

(2) As the Commission may provide upon application or on its own motion in a particular case.

(e) Nothing in this section shall affect the obligation to deliver a prospectus pursuant to the provisions of section 5 of the act by a dealer who is acting as an underwriter with respect to the securities involved or who is engaged in a transaction as to securities constituting the whole or a part of an unsold allotment to or subscription by such dealer as a participant in the distribution of such securities by the issuer or by or through an underwriter.

(Sec. 12, 78 Stat. 580, 15 U.S.C. 77d; sec. 19, 48 stat. 85, as amended, 15 U.S.C. 77d)

*Effective date.* The amendment shall become effective on January 25, 1965.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

DECEMBER 23, 1964.

[Release 40–4105]

## PART 270—RULES AND REGULATIONS, INVESTMENT COMPANY ACT OF 1940

### Periodic Calculation of Current Net Asset Value of Redeemable Security

On July 2, 1964, in Investment Company Act Release No. 4006, and in the FEDERAL REGISTER on July 10, 1964 (29 F.R. 9456), the Securities and Exchange Commission published notice that it had under consideration the adoption of a proposed § 270.2a–4 (Rule 2a–4 under the Investment Company Act of 1940 ("Act")) and invited the comments of interested persons. Upon consideration of the comments received, the Commission has determined pursuant to the authority conferred by sections 38(a) and 22 of the Act to adopt § 270.2a–4 in the form set forth below.

Section 38(a) authorizes the Commission to make rules and regulations, inter alia, defining "accounting, technical, and trade terms" used in the Act. "Current net asset value" is a term used in section 22 of the Act relating to "distribution, redemption, and repurchase of redeemable securities," and the concept is employed in the definition of the term "redeemable security" in section 2(a)(31) of the Act.

The Commission's experience in the administration of the Act and its analysis of data provided by the periodic inspection of books and records maintained by registered investment companies pursuant to section 31 of the Act indicate that uniformity with respect to the calculation of net asset value of redeemable securities issued by registered investment companies would be in the public interest and in the interest of investors. Accordingly, pursuant to the authority conferred by sections 38(a) and 22 of the Act, the Commission has promulgated § 270.2a–4 defining the term "current net asset value" as it is used in the Act with reference to redeemable securities issued by a registered investment company.

The Commission has considered that the public interest and the interest of investors require that the rule be effective as promptly as is reasonably practicable in order that the current net asset value of redeemable securities currently being distributed, redeemed, and repurchased by registered investment companies be appropriately calculated. Consideration has also been given to the obligations of registered investment companies to file reports under the provisions of the Act and the rules thereunder relating to the fiscal periods of said companies, and to the substantial number of registered investment companies which will begin new fiscal periods on January 1, 1965. The Commission therefore finds that there is good cause for the rule to become effective on January 1, 1965. Accordingly, the effective date of the rule shall be January 1, 1965.

The text of § 270.2a–4 is as follows:

**§ 270.2a–4 Definition of "Current Net Asset Value" for use in computing periodically the current price of redeemable security.**

(a) The current net asset value of any redeemable security issued by a registered investment company used in computing periodically the current price for the purpose of distribution, redemption, and repurchase means an amount which reflects calculations, whether or not recorded in the books of account, made substantially in accordance with the following, with estimates used where necessary or appropriate:

(1) Portfolio securities with respect to which market quotations are readily available shall be valued at current market value, and other securities and assets shall be valued at fair value as determined in good faith by the board of directors of the registered company.

(2) Changes in holdings of portfolio securities shall be reflected no later than in the first calculation on the first business day following the trade date.

(3) Changes in the number of outstanding shares of the registered company resulting from distributions, redemptions, and repurchases shall be reflected no later than in the first calculation on the first business day following such change.

(4) Expenses, including any investment advisory fees, shall be included to date of calculation.

(5) Dividends receivable shall be included to date of calculation either at ex-dividend dates or record dates, as appropriate.

(6) Interest income and other income shall be included to date of calculation.

(b) The items which would otherwise be required to be reflected by paragraph (a)(4) and (6) of this section need not be so reflected if cumulatively, when netted, they do not amount to as much as one cent per outstanding share.

(c) Notwithstanding the requirements of paragraph (a) of this section, any interim determination of current net asset value between calculations made as of the close of the New York Stock Exchange on the preceding business day and the current business day may be estimated so as to reflect any change in current net asset value since the closing calculation on the preceding business day.

(Sec. 22, 38(a), 54 Stat. 823, 841, 15 U.S.C. 80a–22, 80a–37)

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

DECEMBER 22, 1964.

# Title 20—EMPLOYEES' BENEFITS

## Chapter V—Bureau of Employment Security, Department of Labor

## PART 602—COOPERATION OF UNITED STATES EMPLOYMENT SERVICE AND STATES IN ESTABLISHING AND MAINTAINING A NATIONAL SYSTEM OF PUBLIC EMPLOYMENT OFFICES

### Foreign Agricultural Labor

Expiration of Public Law 78 on December 31, 1964, thereby indicating a Congressional intent to end reliance on Mexican Braceros for agricultural work in the United States, requires regulations effecting an orderly transition to the use of United States workers in areas where reliance has previously been placed upon foreign workers. These regulations, hereinafter set forth, are issued to carry out the function of the Secretary of Labor in advising the Attorney General, in accordance with his request under section 214 of the Immigration and Nationality Act of 1952, as to whether unemployed persons capable of performing such agricultural labor can be found in this country. Of primary consideration in issuing these Regulations is the principle that foreign workers will not be admitted where unemployed domestic workers are available and, in no event, will be admitted under circumstances adversely affecting domestic wage levels.

In response to this Congressional direction and after due consideration of the evidence and views presented at hearings which were held pursuant to notice (29 F.R. 15191) at Washington, D.C. on November 30, 1964; Miami, Fla., on December 2; Dallas, Tex., on December 4; and San Francisco, Calif., on December 7, 8, and 9, the Regulations set forth below specifying the terms and conditions which must be offered to domestic workers before certification will be made for the admission of foreign workers under Public Law 414 have been adopted.

Because these rules constitute general statements of agency procedure and policy, further notice of proposed rule making, public participation, and delay in effective date are not required by section 4 of the Administrative Procedure Act (5 U.S.C. 1003), I do not believe additional proceedings or delay would serve a useful purpose here.

Now, therefore, pursuant to regulations issued by the Commissioner of Immigration and Naturalization (8 CFR 214.2(h); 29 F.R. 11959) implementing provisions of the Immigration and Nationality Act (8 U.S.C. 1184(c)), I hereby revise 29 CFR 602.10, effective immediately, to read as follows:

**§ 610.10 Certification and use of foreign labor for agricultural employment.**

(a) Any agricultural employer with a forseeable labor shortage remaining after reasonable efforts utilizing all sources of available domestic workers, including the interstate clearance process, may request through the appropriate State agency the certification of need for foreign labor. Before such certification will be made by the appropriate Regional Office of the Bureau of Employment Security, it must be shown that:

(1) Reasonable efforts have been made and will continue to be made to obtain domestic workers for the period for which these workers are requested. "Reasonable efforts" will include full use of (i) day-haul operations in accordance with the general practices of other employers in the area, or, in the absence of local day-haul operations, day-haul operations in accordance with the general practices within the State; (ii) other appropriate recruitment efforts; and (iii) the interstate clearance process for recruitment in areas within a reasonable distance, including use of the Annual Worker Plan, where practical. (In order to recruit workers from out of State, a minimum period of 15 days prior to the date of need will be required by the Labor-supply State agency for positive recruitment. In addition, the offer for local workers must be at the same rate which is specified on the date of need in the clearance order, or a request for foreign workers will be denied.)

(2) Employment of such labor will not adversely affect the wages or working conditions of domestic workers similarly employed.

(b) On and after January 1, 1965, the State agency will not process a request for workers more than 60 days nor less than 30 days prior to the date of need; and such request shall be reviewed by the State agency not more than 15 days prior to the date of need and the State agency will advise the appropriate Bureau of Employment Security regional office whether the conditions necessitating foreign workers previously certified to by the State agency still prevail, or whether the request should be cancelled or revised.

(c) No certification shall be made for the admission of foreign workers under Section 214 of the Immigration and Nationality Act for agricultural employment in the United States unless the following criteria have been followed and adhered to:

(1) Effective January 1, 1965, and through March 31, 1965:

(i) Employment offered to domestic workers must provide for wage payment rates which are no less than the applicable amount listed on Schedule "A" of paragraph (d) of this section for the State in which the work is being performed, except that where the prevailing rate for the crop activity in the area is higher, the higher rate shall be paid. Piece rates shall be designed to produce hourly earnings at least equivalent to the prescribed hourly rates and in no event shall the worker be paid less than the prescribed hourly rate.

(ii) Except as otherwise specifically provided, domestic workers must be offered, as a minimum, all the terms and conditions of employment that are offered to Mexican workers under the Migrant Labor Agreement of 1951, as amended, including a written contract embodying those conditions.

(iii) Family housing must be provided where feasible and necessary.

(2) Effective April 1, 1965:

(i) Employment offered to domestic workers must provide for wage payment rates which are no less than the applicable amount listed on Schedule "B" of paragraph (d) of this section for the State in which the work is being performed, except that where the prevailing rate for the crop activity in the area is higher, the higher rate shall be paid. Piece rates shall be designed to produce hourly earnings at least equivalent to the prescribed hourly rates and in no event shall the worker be paid less than the prescribed hourly rate.

(ii) Except as otherwise specifically provided in this section, domestic workers must be offered, as a minimum, all the terms and conditions of employment that are offered to Mexican workers under the Migrant Labor Agreement of 1951, as amended, including a written contract embodying those conditions.

(iii) Family housing must be provided where feasible and necessary.

(3) Effective January 1, 1965:

(i) Reasonable costs of transportation to and from the place of employment must be borne by the employer.

(ii) No certification shall be made permitting the employment of any foreign worker for a period exceeding 120 days; nor shall any certification be made with respect to any petition of any employer which would result in the employment of foreign workers by such employer for more than 120 days in any calendar year, except in specific cases, when necessary to avoid undue hardship, in accordance with criteria prescribed by the Department of Labor.

(iii) No certification shall be made with respect to the petition of any employer who has been found by the Secretary of Labor or his designated representative to have failed, without good cause, to comply with the work contracts entered into with any domestic or foreign agricultural workers, or who has in his employ or is found to have had in his employ after the effective date of these regulations, any foreign worker when such employer knows or has reasonable grounds to believe or suspect or by reasonable inquiry could have ascertained that such foreign worker is not lawfully within the United States.

(iv) When domestic workers become available for jobs in which foreign workers are employed, the domestic workers must be given preference.

(v) No foreign workers shall be assigned to fill any job to which referral of United States workers would be prohibited under regulations or policies of the United States Department of Labor governing the referral of workers to jobs involved in strikes or other labor disputes.

(4) These criteria shall not be applicable to Basque sheepherders.

(d) The schedules referred to in paragraph (c) are as follows:

SCHEDULE A

| State: | Wage rate |
|---|---|
| Arizona | $1.05 |
| California | 1.25 |
| Connecticut | 1.25 |
| Florida | .95 |
| Massachusetts | 1.25 |
| New Mexico | .90 |
| Texas | .90 |

SCHEDULE B

| State: | Wage rate |
|---|---|
| Arizona | $1.25 |
| Arkansas | 1.15 |
| California | 1.40 |
| Colorado | 1.30 |
| Connecticut | 1.40 |
| Florida | 1.15 |
| Indiana | 1.25 |
| Kansas | 1.40 |
| Maine | 1.25 |
| Massachusetts | 1.30 |
| Michigan | 1.25 |
| Minnesota | 1.40 |
| Montana | 1.40 |
| Nebraska | 1.40 |
| New Hampshire | 1.30 |
| New Jersey | 1.30 |
| New Mexico | 1.15 |
| New York | 1.30 |
| Oregon | 1.30 |
| Rhode Island | 1.30 |
| South Dakota | 1.40 |
| Texas | 1.15 |
| Utah | 1.40 |
| Vermont | 1.30 |
| Virginia | 1.15 |
| West Virginia | 1.15 |
| Wisconsin | 1.30 |
| Wyoming | 1.25 |

Signed at Washington, D.C., this 19th day of December 1964.

W. WILLARD WIRTZ,
*Secretary of Labor.*

[F.R. Doc. 64-13436; Filed, Dec. 29, 1964; 8:50 a.m.]

# Title 26—INTERNAL REVENUE

## Chapter I—Internal Revenue Service, Department of the Treasury

SUBCHAPTER D—MISCELLANEOUS EXCISE TAXES

[T.D. 6788]

## PART 146—SALE OF REBUILT AUTOMOTIVE PARTS AND ACCESSORIES ON AND AFTER JANUARY 1, 1965

### Tax-Exempt Sale of Rebuilt Automotive Parts and Accessories

The following rules, prescribed under section 5 of the Act of October 13, 1964 (Public Law 88-653, 78 Stat. 1086), relate to the exemption from the tax imposed by section 4061(b), applicable under section 4063(c) of the Internal Revenue Code of 1954 in the case of rebuilt automotive parts and accessories sold on or after January 1, 1965.

The rules set forth herein are to remain in force and effect until superseded by applicable amendments to the Manufacturers and Retailers Excise Tax Regulations (26 CFR Part 48). Until such amendments are made, the regulations set forth herein with respect to the subject matter within the scope thereof supersede the regulations set forth in the Manufacturers and Retailers Excise Tax Regulations.

In order to prescribe temporary rules relating to the subject matter referred to above, the following rules are hereby adopted:

**§ 146.1-1 Tax-exempt sales of rebuilt automotive parts or accessories.**

Section 4063(c) of the Internal Revenue Code of 1954, as added by section 5 of the Act of October 13, 1964 (Public Law 88-653, 78 Stat. 1086), provides that "under regulations prescribed by the Secretary or his delegate" the tax imposed by section 4061(b) shall not apply in the case of rebuilt parts or accessories. Section 4063(c) applies with respect to rebuilt parts and accessories sold on or after January 1, 1965. In accordance with the foregoing it is hereby provided that the rebuilding of a part or accessory on or after January 1, 1965, shall not be treated as the "manufacture" of such part or accessory and, accordingly, the sale of a rebuilt part or accessory on or after such date shall not be subject to the tax imposed by section 4061(b). Therefore, a rebuilder may not, on and after January 1, 1965, purchase new parts or accessories free of tax for use in the rebuilding by him of parts or accessories. Furthermore, he must pay tax under the provisions of section 4218 on all new parts or accessories manufactured by him, or acquired by him free of tax under section 4221(a)(1), which are used by him on or after January 1, 1965, in his rebuilding of parts or accessories.

Because of the immediate need for temporary rules under which taxpayers may determine whether the sale of rebuilt parts and accessories on or after January 1, 1965, is free from tax, it is found impracticable to issue this Treasury decision with notice and public procedure thereon under section 4(a) of the Administrative Procedure Act, approved June 11, 1946, or subject to the effective date limitation of section 4(c) of that Act.

(Sec. 7805 of the Internal Revenue Code of 1954; 68A Stat. 917; 26 U.S.C. 7805)

[SEAL] BERTRAND M. HARDING,
*Acting Commissioner of Internal Revenue.*

Approved: December 24, 1964.

STANLEY S. SURREY,
*Assistant Secretary of the Treasury.*

# Title 29—LABOR

## Chapter V—Wage and Hour Division, Department of Labor

SUBCHAPTER A—REGULATIONS

## PART 615—MEN'S AND BOYS' CLOTHING AND RELATED PRODUCTS INDUSTRY IN PUERTO RICO

### Wage Rates

Pursuant to section 5 of the Fair Labor Standards Act of 1938, as amended (29 U.S.C. 205), and by means of Administrative Order No. 586 (29 F.R. 13903), the Secretary of Labor appointed and convened Industry Committee No. 69-D. Administrative Order No. 586 referred to Industry Committee No. 69-D the question of the minimum wage rate or rates to be paid under section 6(c) of the Act to employees in the men's and boys' clothing and related products industry in Puerto Rico and gave due notice of the hearing of the Committee, as provided in 29 CFR 511.2.

Subsequent to an investigation and a hearing conducted pursuant to the notice, the Committee filed with the Administrator a report containing its findings of fact and recommendations with respect to the matters referred to it.

Accordingly, as authorized and required by section 8 of the Fair Labor Standards Act of 1938 (29 U.S.C. 208), Reorganization Plan No. 6 of 1950 (3 CFR 1949-53 Comp., p. 1004), and General Order No. 45-A of the Secretary of Labor (15 F.R. 3290), the recommendations of Industry Committee No. 69-D are hereinafter published in this revision of 29 CFR 615.2.

Effective January 15, 1965, 29 CFR 615.2 is hereby revised to read as follows:

§ 615.2 **Wage rates.**

The men's and boys' clothing and related products industry in Puerto Rico is divided into four classifications. Wages at rates not less than those prescribed in this section shall be paid under section 6(c) of the Fair Labor Standards Act of 1938 by every employer to each of his employees in each of the classifications in the industry who in any workweek is engaged in commerce or in the production of goods for commerce or is employed in an enterprise engaged in commerce or in the production of goods for commerce as those terms are defined in section 3 of the Act.

(a) *Previously covered classifications.* The classifications in this paragraph (a) apply to all activities of employees in the industry to whom section 6 of the Act applies without reference to the Fair Labor Standards Amendments of 1961.

(1) *The work clothing and separate trousers classification.* (i) The minimum wage for this classification is $1.045 an hour.

(ii) This classification is defined as the manufacture of men's, youths', and boys' work shirts, pants, and other work clothing and washable service apparel, and separate trousers and slacks.

(2) *The military-style hats and caps classification.* (i) The minimum wage for this classification is $1.15 an hour.

(ii) This classification is defined as the manufacture of military-style hats and caps.

(3) *The general classification.* (i) The minimum wage for this classification is 98 cents an hour.

(ii) This classification is defined as the manufacture of all products included in the men's and boys' clothing and related products industry not included in the other classifications of this industry.

(b) *The new coverage classification.* (1) The minimum wage for this classification is 87.5 cents an hour between January 15, 1965 and September 2, 1965, and 90 cents an hour thereafter.

(2) This classification is defined as all activities of employees covered by section 6 of the Act only by reason of the Fair Labor Standards Amendments of 1961.

(Sec. 8, 52 Stat. 1064 as amended; 29 U.S.C. 208)

Signed at Washington, D.C., this 23d day of December 1964.

CLARENCE T. LUNDQUIST,
*Administrator.*

[F.R. Doc. 64-13437; Filed, Dec. 29, 1964; 8:50 a.m.]

## PART 681—HOMEWORKERS IN CERTAIN INDUSTRIES IN PUERTO RICO

### Hand-Braiding Leather Buttons

On November 10, 1964, a notice proposing to amend the piece rate contained in 29 CFR 681.9(b) commensurate with a minimum hourly wage rate increase was published in the FEDERAL REGISTER (29 F.R. 15173). Interested persons were given 15 days to file written statements of data, views, or argument in regard to the proposal. None were received. Accordingly, the proposal is hereby adopted to read as set forth below.

As this amendment merely articulates a changed piece rate already in effect pursuant to 29 CFR 681.9(a), good cause is hereby found to make it effective without delay, and it shall be effective immediately.

As amended, 29 CFR 681.9(b) reads as follows:

**§ 681.9 Minimum piece rates prescribed by the Administrator.**

* * * * *

(b) *Piece rate for hand-braiding leather buttons.* A minimum piece rate of 46 cents a gross shall be paid to homeworkers in Puerto Rico engaged in the hand-braiding of leather buttons, 24 to 30 ligne by the following method: Tying a braided knot around the tip of a finger, bringing the knot into a rounded button shape by pulling the ends of the strip, forming the button shank from the prepared shank end of the strip, and trimming the loose end by cutting off the excess leather; all operations to be performed upon undegreased leather strips, each of which has been cut in advance to suitable dimensions so that one end may be formed into the button shank and the remainder braided to become the rounded button.

* * * * *

(Sec. 6, 52 Stat. 1062; 29 U.S.C. 206)

Signed at Washington, D.C., this 23d of December 1964.

[F.R. Doc. 64-13438; Filed, Dec. 29, 1964; 8:50 a.m.]

## PART 779—THE FAIR LABOR STANDARDS ACT AS APPLIED TO RETAILERS OF GOODS OR SERVICES

### Miscellaneous Amendments

Pursuant to the Fair Labor Standards Act of 1938 (29 U.S.C. 201 et seq.), Reorganization Plan No. 6 of 1950 (3 CFR 1949-1953 Comp., p. 1004), and General Order No. 45-A of the Secretary of Labor (15 F.R. 3290), I hereby correct 29 CFR 779.403, 779.419(b), and 779.507(a)(6) as set forth below.

The amendments consist of minor editorial corrections and clarifications of text. The provisions of section 4 of the Administrative Procedure Act (5 U.S.C. 1003) which require notice of proposed rule making, opportunity for public participation, and delay in effective date are not applicable because these are interpretative rules. I do not believe such procedures will serve a useful purpose here. Accordingly, these amendments shall become effective upon publication in the FEDERAL REGISTER.

1. Title 29 CFR 779.403 is amended to read as follows:

**§ 779.403 "Executive" and "administrative" employees, defined.**

The terms "executive" and "administrative" as used in section 13(a)(1) have appeared therein prior to the 1961 amendments and have been defined and delimited in Subpart A of Part 541 of this chapter and explained in Subpart B of that part. These regulations are applicable under the amended section 13(a)(1) in determining which employees are bona fide executive or administrative employees. The amended

provision does, however, liberalize, in one respect, the pre-1961 regulations as they pertain to executive and administrative

counts and instructions for Class II motor carriers should be transferred from Part 184 and be codified under Part 182

part of the income statement, add new centerhead, sections, titles and text, as follows:

provision does, however, liberalize, in one respect, the pre-1961 regulations as they pertain to executive and administrative employees of retail or service establishments. That is, an executive or administrative employee of a retail or service establishment may devote up to 40 percent of his hours worked in a workweek to activities which are not directly and closely related to the performance of executive or administrative activities and still qualify as a bona fide executive or administrative employee, whereas, in any other type of establishment such a tolerence is limited to 20 percent, except where special provisions are made in Part 541 of this chapter.

2. The figure "$250" in the last sentence of 29 CFR 779.419(b) is corrected to read "$325".

3. Subparagraph (6) of 29 CFR 779.507 (a) is amended to read as follows:

**§ 779.507 Fourteen-year minimum.**

(a) *Prohibited occupations.* • • •

(6) Occupations in connection with (i) transportation of persons or property by rail, highway, air, water, pipeline, or other means; (ii) warehousing and storage; (iii) communications and public utilities; and (iv) construction (including demolition and repair). Office and sales work performed in connection with the occupations specified in this subparagraph is permitted if such work is not performed on trains or any other media of transportation or at the actual site of construction operations.

(52 Stat. 1060, as amended; 29 U.S.C. 201 et seq.)

Signed at Washington, D.C., this 24th day of December 1964.

CLARENCE T. LUNDQUIST,

# Title 49—TRANSPORTATION

## Chapter I—Interstate Commerce Commission

SUBCHAPTER B—CARRIERS BY MOTOR VEHICLES

[No. 32155, No. 32155 Sub. No. 1]

## PART 182—UNIFORM SYSTEM OF ACCOUNTS FOR CLASS I AND CLASS II COMMON AND CONTRACT MOTOR CARRIERS OF PROPERTY

## PART 184—CHART OF ACCOUNTS FOR CLASS II MOTOR CARRIERS OF PROPERTY

### Miscellaneous Amendments

At a session of the Interstate Commerce Commission, division 2, held at its office in Washington, D.C., on the 10th day of December A.D. 1964.

The Commission having under consideration the matter of amending the chart of accounts prescribed for Class II motor carriers of property pursuant to provisions of sections 204 and 220 of the Interstate Commerce Act, as amended;

It appearing, that for proper administration of the Act the chart of accounts and instructions for Class II motor carriers should be transferred from Part 184 and be codified under Part 182 of Title 49 of the Code of Federal Regulations;

It further appearing, that the chart of accounts and instructions for Class II motor carriers of property (which is a condensation of accounts prescribed for Class I carriers) require amendment to give effect to the amendments of the Class I system of accounts prescribed by order of November 12, 1964, which is governing; the amendments herein for Class II carriers impose no new or additional obligation or duty so that additional public rule-making procedures pursuant to provisions of the Administrative Procedures Act are deemed unnecessary; and for good cause shown;

*It is ordered,* That the amendments appearing below and by this reference made a part hereof shall become effective January 1, 1965; and

*It is further ordered,* That notice of this order shall be given to Class II common and contract motor carriers of property subject to its provision, and to every trustee, receiver, executor, administrator, or assignee of such motor carrier, and notice shall be given to the general public by depositing a copy thereof in the Office of the Secretary of the Commission in Washington, D.C., and by filing the order with the Director, Office of the Federal Register.

(Sec. 204, 49 Stat. 546, as amended; 49 U.S.C. 304. Interpret or apply sec. 220, 49 Stat. 563, as amended; 49 U.S.C. 320.

By the Commission, division 2.

[SEAL] HAROLD D. McCOY,
*Secretary.*

The title of Part 182 of Title 49 of the Code of Federal Regulations is amended to read as set forth above.

Part 182 is amended by adding new sections, titles and text.

After § 182.8900 *Form of Income Statement,* following the last item and part of the income statement, add new centerhead, sections, titles and text, as follows:

**§ 182.9000 Condensed Classification of Accounts for Class II Carriers.**

**§ 182.9001 Order of the Commission.**

Effective January 1, 1965, all Class II common and contract motor carriers of property shall maintain their accounts in conformity with the regulations in this part. (See Instruction 182.01-1.)

**§ 182.9002 Instructions.**

Entries recorded in the accounts prescribed for Class II motor carriers shall conform to the texts of corresponding Class I accounts.

**§ 182.9003 Pickup and delivery.**

Class II common carriers which derive an average of 75 percent or more of their revenues from the intercity transportation of general commodities and which have average annual gross revenues of $500,000 or more, based on the three calendar years ending December 31, 1956, and on the latest three calendar years threafter, shall separate expenses between line haul and pickup and delivery as provided in § 182.01-27 *Allocation of expenses between line haul and pickup and delivery.*

**§ 182.9004 Optional accounts.**

Any Class II carrier subject to the provisions of this chart of accounts may, at its option, conform its accounting to the regulations prescribed for Class I carriers: *Provided, however,* That the exercise of such option shall not interfere with assembling or grouping such accounts, as hereinafter prescribed, for annual report purposes.

**§ 182.9005 Accounts prescribed.**

Accounts maintained by Class II carriers shall be designated as follows and shall include the substance of the several Class I accounts to which they respectively correspond:

# Proposed Rule Making

## DEPARTMENT OF AGRICULTURE

### Agricultural Marketing Service

[7 CFR Part 51]

### BLUEBERRIES

### United States Standards for Grades; Extension of Time

A proposal for issuance of the United States Standards for Grades of Blueberries (7 CFR, §§ 51.3475–51.3487 was set forth in the notice which was published in the FEDERAL REGISTER on May 22, 1964 (29 F.R. 6688).

In consideration of comments and suggestions received indicating the need for further study of the proposal, the time within which written data, views, and arguments may be submitted by interested parties for consideration in connection with the aforesaid proposal is hereby extended until September 30, 1965.

All persons who desire to submit written data, views or arguments for consideration in connection with the proposal should file the same in duplicate, not later than September 30, 1965, with the Hearing Clerk, U.S. Department of Agriculture, Room 112, Administration Building, Washington, D.C., 20250, where they will be available for public inspection during official hours of business (paragraph (b) of § 1.27, as amended at 29 F.R. 7311).

(Secs. 203, 205, 60 Stat. 1087, as amended, 1090 as amended; 7 U.S.C. 1622, 1624)

Dated: December 24, 1964.

## DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

### Food and Drug Administration

[21 CFR Part 27]

### FROZEN CONCENTRATED ORANGE JUICE

### Notice of Proposal To Amend the Standard of Identity

Notice is given that the Florida Citrus Commission, the National Association of Frozen Food Packers, and the Florida Canners Association have jointly filed a petition proposing an amendment to the standard of identity for frozen concentrated orange juice (21 CFR 27.109; 29 F.R. 3701). The proposed amendment sets forth that it is not intended that the Federal standard shall interfere with higher or more restrictive requirements imposed by the standards of a State in which frozen concentrated orange juice is produced. The proposed amendment would not apply to frozen concentrated orange juice shipped into a producing State having higher or more restrictive State standards, provided that such food complies with the provisions of the Federal standard.

The petitioners propose that a new paragraph (f) reading as follows, be added to § 27.109 as follows:

**§ 27.109 Frozen concentrated orange juice, frozen orange juice concentrate; identity; label statement of optional ingredients.**

* * * * *

(f) Nothing in this definition and standard is intended to interfere with the adoption and enforcement by any State, in which frozen concentrated orange juice is produced, of State standards, consistent with this standard, but which impose higher or more restrictive requirements than those set forth in this section.

Pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (secs. 401, 701, 52 Stat. 1046, 1055, as amended 70 Stat. 919, 72 Stat. 948; 21 U.S.C. 341, 371) and in accordance with the authority delegated to the Commissioner of Food and Drugs by the Secretary of Health, Education, and Welfare (21 CFR 2.90; 29 F.R. 471), all interested persons are invited to submit their views in writing, preferably in quintuplicate, regarding the proposal published herein. Such views and comments should be submitted to the Hearing Clerk, Department of Health, Education, and Welfare, Room 5440, 330 Independence Avenue SW., Washington, D.C., 20201, within 30 days following the date of publication of this notice in the FEDERAL REGISTER.

Dated: December 23, 1964.

JOHN L. HARVEY,
*Deputy Commissioner of Food and Drugs.*

### CHLORAMPHENICOL PALMITATE, CHLORAMPHENICOL PALMITATE ORAL SUSPENSION

### Notice of Proposal To Amend Regulations for Certification and Tests and Methods of Assay

The Commissioner of Food and Drugs, pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 507, 59 Stat. 463 as amended; 21 U.S.C. 357), and under the authority delegated to him by the Secretary of Health, Education, and Welfare (21 CFR 2.90; 29 F.R. 471), proposes that the regulations for certification and tests and methods of assay for chloramphenicol palmitate (21 CFR 141d.305, 146d.305) be amended to provide a revised melting range for the drug and to add a new test for specific rotation, and also that the regulations for chloramphenicol palmitate oral suspension (21 CFR 141d.306, 146d.306) be amended to provide a new test for its polymorph type A crystal form, as hereinafter set forth:

1. It is proposed that § 141d.305 be amended by adding thereto the following new paragraph:

**§ 141d.305 Chloramphenicol palmitate.**

* * * * *

(d) *Specific rotation.* Accurately weigh approximately 1.25 grams of sample in a 25-milliliter, glass-stoppered volumetric flask and dissolve in about 15 milliliters of absolute alcohol, warming if necessary to effect solution. Bring the solution to 25° C. Dilute the solution to 25 milliliters with absolute alcohol and mix thoroughly. Transfer a portion of the solution to a 200-millimeter polarimeter tube and determine the angular rotation in a suitable polarimeter using sodium light or a 5,893-angstrom filter. Calculate the specific rotation.

2. It is proposed that § 141.306 be amended by adding thereto the following new paragraph:

**§ 141d.306 Chloramphenicol palmitate oral suspension.**

* * * * *

(c) *Content of polymorph A crystals*—(1) *Preparation of standards*—(i) *Standard containing 20 percent of polymorph A.* Prepare a thoroughly mixed, dry powder composed by weight of 1 part of polymorph A crystals of chloramphenicol palmitate and 4 parts of nonpolymorph A crystals of chloramphenicol palmitate.

(ii) *Standard containing 10 percent of polymorph A.* Prepare a thoroughly mixed, dry powder composed by weight of 1 part of polymorph A crystals of chloramphenicol palmitate and 9 parts of nonpolymorph A crystals of chloramphenicol palmitate.

(2) *Preparation of sample.* Place 20 milliliters of thoroughly mixed oral suspension into a 50-milliliter centrifuge tube. Add 20 milliliters of water and mix. Centrifuge for 10 to 15 minutes at high speed. Decant the supernatant liquid. Wash the residue as follows: Add 2 milliliters of water to the residue, mix to make paste, add 18 milliliters of water, and mix thoroughly. Centrifuge, decant off the supernatant liquid, and wash the residue two more times. Remove the washed residue from the centrifuge tube and dry it at least 14 hours in a vacuum desiccator at room temperature.

(3) *Procedure.* Weigh 150 to 200 milligrams of liquid petrolatum into an agate mortar and add about 100 milligrams of standard or sample. Mix with a small spatula and then mull thoroughly with a pestle until a uniform consistency is obtained. Use two rock salt

plates as an absorption cell. Place a small drop of the mull in the center of

**§ 146d.306 Chloramphenicol palmitate oral suspension.**

[21 CFR Part 144]

(iii) The petitioner, if he is the manufacturer of the drug, will use in the com-

under section 505, thus subjecting the exempted antibiotic drug to the require-

is taken on the proposed amendment. The proposal contained in this notice

plates as an absorption cell. Place a small drop of the mull in the center of one of the plates. Gently put the other plate on the mull and slowly squeeze the plates together to spread the mull uniformly. Clamp the two plates firmly together in a metal cell holder. Examine the assembled cell by holding it up to the light. It should appear smooth and free of any air bubbles. Place the cell in a suitable infrared spectrophotometer and record the absorption spectrum from 11.0 to 13.0 microns.

(4) *Treatment of spectra*—(i) *Standard containing 20 percent of polymorph A.* Determine by inspection of the recorded spectrum the exact wavelengths of minimum absorption at approximately 11.3 and 12.65 microns. Also determine by inspection the exact wavelengths of maximum absorption at approximately 11.65 and 11.86 microns. In the following subdivisions, references to these four nominal wavelengths are to the exact wavelengths observed on the particular instrument being used.

(ii) *Standard containing 10 percent of polymorph A.* Draw a straight baseline between the minima occurring at 11.3 and 12.65 microns. Draw straight lines at 11.65 and 11.86 microns intersecting both the recorded spectrum and the baseline. Obtain the corrected absorbances at 11.65 and 11.86 microns and calculate the absorbance ratios as follows:

$$\text{Absorbance ratio} = \frac{{}^{a}11.65 - {}^{b}11.65}{{}^{a}11.86 - {}^{b}11.86}$$

where:

$^{a}11.65$ = Absorbance value of recorded spectrum at 11.65 microns.

$^{b}11.65$ = Absorbance value at point of intersection of the 11.65-micron line with the baseline.

$^{a}11.86$ = Absorbance value of recorded spectrum at 11.86 microns.

$^{b}11.86$ = Absorbance value at point of intersection of the 11.86-micron line with the baseline.

(iii) *Sample.* Proceed as described in subdivision (ii) of this subparagraph.

(5) *Calculation.* The absorbance ratio of the sample must be greater than the absorbance ratio of the standard containing 10 percent of polymorph A.

3. It is proposed that § 146d.305 *Cloramphenicol palmitate* be amended in the following respects:

a. By changing paragraph (a) (3) and adding thereafter a new subparagraph (4). The affected portions would read as follows:

(a) • • •

(3) Its melting point is 90°±4° C.

(4) Its specific rotation in absolute ethyl alcohol at 25° C. is +23°±2°.

b. By changing in paragraph (d) (1) the words at the end of the last sentence "and melting point" to read "melting point, and specific rotation."

c. By changing in paragraph (d) (2) "300 milligrams" in the first clause to read "500 milligrams."

4. It is proposed to amend § 146d.306 by changing paragraph (a), subparagraphs (2) (i) and (ii) and (3) (i) and (ii) of paragraph (d), and paragraph (e) (1) to read as follows:

**§ 146d.306 Chloramphenicol palmitate oral suspension.**

(a) *Standards of identity, strength, quality, and purity.* Chloramphenicol palmitate oral suspension is chloramphenicol palmitate and one or more suitable and harmless buffer substances, suspending agents, preservatives, colorings, and flavorings, with or without one or more suitable and harmless vitamin substances, suspended in a suitable and harmless vehicle. It contains not less than 25 milligrams of chloramphenicol per milliliter. Its pH is not less than 4.5 and not more than 7.0. Its content of polymorph A crystals does not exceed 10 percent. The chloramphenicol palmitate used conforms to the requirements of § 146d.305(a). Each other substance used, if its name is recognized in the U.S.P. or N.F., conforms to the standards prescribed therefor by such official compendium.

• • • • • •

(d) • • •

(2) • • •

(i) The batch; average potency per milliliter, pH, content of polymorph A crystals.

(ii) The chloramphenicol palmitate used in making the batch; potency, toxicity, melting point, absorptivity, specific rotation.

(3) • • •

(i) The batch; one package for each 5,000 packages in the batch, but in no case less than 6, collected by taking single packages at such intervals throughout the entire time of packaging the batch that the quantities packaged during the intervals are approximately equal.

(ii) The chloramphenicol palmitate used in making the batch; 10 packages, each containing approximately equal portions of not less than 500 milligrams, packaged in accordance with the requirements of § 146d.305(b).

• • • • • •

(e) • • •

(1) $5.00 for each package in the samples submitted in accordance with paragraph (d) (3) (i) of this section; $4.00 for each package in the sample submitted in accordance with paragraph (d) (3) (ii) and (iii) of this section.

All interested persons are invited to submit written views and comments on these proposals, preferably in quintuplicate, within 90 days from the date of the publication of this notice in the FEDERAL REGISTER. Such views and comments may be accompanied by a memorandum or brief in support thereof and should be addressed to the Hearing Clerk, Department of Health, Education, and Welfare, Room 5440, 330 Independence Avenue SW., Washington, D.C., 20201.

Dated: December 23, 1964.

JOHN L. HARVEY,
*Deputy Commissioner of Food and Drugs.*

[F.R. Doc. 64-13430; Filed, Dec. 29, 1964; 8:49 a.m.]

## [ 21 CFR Part 144 ]

## ANTIBIOTIC DRUGS IN LOCAL OR TOPICAL DOSAGE FORM

### Proposed Exemption From Certification

Under the authority provided in the Federal Food, Drug, and Cosmetic Act (sec. 507, 59 Stat. 463 as amended; 21 U.S.C. 357), and delegated to him by the Secretary of Health, Education, and Welfare (21 CFR 2.90; 29 F.R. 471), the Commissioner of Food and Drugs proposes to issue regulations prescribing procedure for exemption from certification of certain antibiotic drugs.

Any interested person may, within 90 days from the date of publication of this notice in the FEDERAL REGISTER, file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 5440, 330 Independence Avenue SW., Washington, D.C., 20201, written comments, preferably in quintuplicate, on this proposal. Comments may be accompanied by a memorandum or brief in support thereof.

**§ 144.1 Antibiotic drugs; procedure for obtaining exemption from certification.**

(a) The Commissioner finds that if the conditions of this section are met, the certification of antibiotics for local or topical use by man will not be necessary to insure safety and efficacy of such drugs. The conditions are as follows:

(1) The antibiotic used in the manufacture of the drug has been marketed commercially in the United States as a drug for at least 5 years.

(2) The dosage form has been marketed commercially in the United States for at least 2 years.

(3) The drug is packaged and labeled for dispensing (drugs packaged for manufacturing use or for repacking are not eligible for exemptions under this section).

(4) The person seeking exemption has submitted to the Commissioner of Food and Drugs a petition establishing the following:

(i) The petitioner has used the certification services for the drug for not less than 12 months.

(ii) The petitioner has produced or repackaged and submitted for release or for certification the following number of batches of drugs within a period of time not exceeding 18 months, and no batch has failed to comply with its professed or prescribed standards of identity, strength, quality, or purity:

(*a*) Not less than 50 consecutive batches of the drug for which the petition is submitted; or

(*b*) Not less than 25 consecutive batches of such drug and not less than 25 consecutive batches of other antibiotic drugs of the same specific dosage form as the petitioned drug; *Provided, however,* That such other drugs contained among their ingredients the same antibiotic(s) as that (those) contained in the petitioned drug.

(iii) The petitioner, if he is the manufacturer of the drug, will use in the compounding of the exempt drug only batches of antibiotics that meet (as determined from samples tested by the Food and Drug Administration) the standards of identity, strength, quality, and purity specified for their use in the manufacture of such drug by the applicable regulations in this chapter.

(iv) The petitioner will perform all the laboratory tests and assays required as a condition for certification on each batch produced and will not distribute batches until such tests and assays have demonstrated that the exempt drug complies with the specifications for certification.

(v) The petitioner will maintain records of all the laboratory tests and assays referred to in subdivision (iv) of this subparagraph and make such records available to any officer or employee of the Food and Drug Administration at any reasonable time within 3 years after the date of the last shipment of each batch.

(vi) The petitioner will maintain records of distribution of batches and make them available for inspection on the same basis as is required for certified antibiotic dosage forms.

(b) In deciding whether such drug is to be exempted from such requirements, the Commissioner will give consideration, among other relevant factors, to:

(1) The possible effect of significant shortages or overages of the antibiotic in the drug.

(2) The stability of the drug.

(3) The results of a review made by an officer or employee of the Food and Drug Administration of all records required by regulations to be maintained for the drug by the petitioner.

(4) Results of examination of a market sample of the drug collected by the Food and Drug Administration from commercial channels.

(c) Exemption from batch certification will, in accordance with the provisions of these regulations, be applicable only to the petitioner requesting it and will not exempt any other person from the requirements of section 507 of the act.

(d) If the Commissioner concludes that the data in a petition, or otherwise before him, enable him to determine that the conditions for an exemption have been met, he will inform the petitioner that the requested exemption is granted. The Commissioner, upon granting any such exemption, will have published in the FEDERAL REGISTER a notice to that effect.

(e) If the Commissioner concludes that the conditions for an exemption specified in this section have not been met, he will inform the petitioner of his decision and his reasons therefor.

(f) In accordance with the requirements of section 507(e) of the act, any antibiotic-containing drug exempted under this section is deemed subject to section 505; and accordingly, the act of exempting the drug from the requirements of sections 507 and 502(l) shall be considered also as constituting an act of approval of a new-drug application under section 505, thus subjecting the exempted antibiotic drug to the requirements of that section.

**§ 144.2 Conditions on the effectiveness of exemptions from certification granted under § 144.1.**

(a) If at any time after an exemption for an antibiotic drug has been granted, the Commissioner finds on the basis of new information before him with respect to such exempted drug, evaluated together with the evidence available to him when such exemption was granted, that certification of each batch is necessary to insure its safety and efficacy of use, he shall act immediately to revoke all exemptions granted for such drug.

(b) If the Commissioner finds that the person granted an exemption for an antibiotic has failed to comply with the requirements of section 505 of the act and the regulations promulgated thereunder; or if he finds that the requirements of § 144.1 have not been met; or if he finds that the petition for exemption from batch certification contains any false statements of fact, the Commissioner may revoke such exemption immediately and require certification of the drug until such person shows adequate cause why such exemption should be reinstated.

(c) A hearing will be granted to any person who requests an opportunity to show that the exemption should be reinstated.

(d) If an exemption for an antibiotic drug or the approved new-drug application or an exemption granted to a petitioner is repealed or suspended by the Commissioner, a notice to that effect and the reasons therefor will be published in the FEDERAL REGISTER.

Dated: December 23, 1964.

JOHN L. HARVEY,
*Deputy Commissioner of Food and Drugs.*

# FEDERAL AVIATION AGENCY

## [ 14 CFR Part 71 [New] ]

[Airspace Docket No. 64-PC-6]

## TRANSITION AREA

### Proposed Designation

The Federal Aviation Agency is considering an amendment to Part 71 [New] of the Federal Aviation Regulations to designate a transition area at South Kauai, Hawaii.

Interested persons may participate in the proposed rule making by submitting such written data, views, or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Pacific Region, Attention: Chief, Air Traffic Division, Federal Aviation Agency, Post Office Box 4009, Honolulu, Hawaii, 96812. All communications received within 45 days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received.

An official docket will be available for examination by interested persons at the Federal Aviation Agency, Office of the General Counsel, Attention: Rules Docket, 800 Independence Avenue SW., Washington, D.C. An informal docket also will be available for examination at the office of the Regional Air Traffic Division Chief.

As parts of this proposal relate to the navigable airspace outside the United States, this notice is submitted in consonance with the ICAO International Standards and Recommended Practices.

Applicability of International Standards and Recommended Practices, by the Air Traffic Service, FAA, in areas outside domestic airspace of the U.S. is governed by Article 12 and Annex 11 to the Convention on International Civil Aviation (ICAO), which pertains to the establishment of air navigation facilities and services necessary to promoting safe, orderly and expeditious flow of civil air traffic. Its purpose is to insure that civil flying on international air routes is carried out under uniform conditions designed to improve the safety and efficiency of air operations.

The International Standards and Recommended Practices in Annex 11 apply in those parts of the airspace under the jurisdiction of a contracting state, derived from ICAO, wherein air traffic services are provided and also whenever a contracting state accepts the responsibility of providing air traffic services over high seas or in airspace of undetermined sovereignty. A contracting state accepting such responsibility may apply the International Standards and Recommended Practices to civil aircraft in a manner consistent with that adopted for airspace under its domestic jurisdiction.

In accordance with Article 3 of the Convention on International Civil Aviation, Chicago, 1944, state aircraft are exempt from the provisions of Annex 11 and its Standards and Recommended Practices. As a contracting state, the United States agreed by Article 3(d) that its state aircraft will be operated in international airspace with due regard for the safety of civil aircraft.

Since this action involves, in part, the designation of navigable airspace outside the United States, the Administrator has consulted with the Secretary of State and the Secretary of Defense in accordance with the provisions of Executive Order 10854.

The U.S. Navy has requested that a transition area be designated to provide controlled airspace necessary for the implementation of a proposed instrument approach procedure to the Bonham Auxiliary Landing Field, Kauai, Hawaii. The transition area, as proposed, would include that airspace extending upward from 700 feet above the surface and within 2 miles north and 4 miles south of the South Kauai VOR 271° True radial, beginning at the VOR and extending 8 miles west.

This amendment is proposed under the authority of sections 307(a) and 1110 of the Federal Aviation Act of 1958 (49 U.S.C. 1348, 1510) and Executive Order 10854, 24 F.R. 9565.

Issued in Washington, D.C., on December 22, 1964.

H. B. HELSTROM,
*Acting Chief, Airspace Regulations and Procedures Division.*

### WELDED STANDARD STEEL PIPE FROM JAPAN

### Fair Value Determination

DECEMBER 22, 1964.

A complaint was received on December 21, 1962, that during the latter part of 1962 welded standard steel pipe from Japan was being sold in the United States at less than fair value within the meaning of the Antidumping Act, 1921, as amended. This complaint has now been withdrawn.

I hereby determine that this case be closed on the basis of no sales at less than fair value within the meaning of section 201(a) of the Antidumping Act, 1921, as amended (19 U.S.C. 160(a)).

*Statement of reasons.* The investigation in this case has covered only the period specified in the complaint received by the Treasury Department, viz, the latter part of calendar year 1962. All entries complained of have been appraised. The complainant, having been made aware of these facts, has withdrawn its complaint.

Under these circumstances I see no reason to continue with the investigation, and I conclude that there is no basis for determining sales at less than fair value.

This determination and the statement of reasons therefor are published pursuant to section 201(c) of the Antidumping Act, 1921, as amended (19 U.S.C. 160(c)).

[SEAL] JAMES A. REED,
*Assistant Secretary of the Treasury.*

[AA 643.3-H]

### COLD-ROLLED STEEL SHEET AND PLATE FROM JAPAN

### Fair Value Determination

DECEMBER 22, 1964.

A complaint was received on March 21, 1963, that during the latter part of 1962 and the first part of 1963, cold-rolled steel sheet and plate from Japan was being sold in the United States at less than fair value within the meaning of the Antidumping Act, 1921, as amended. This complaint has now been withdrawn.

I hereby determine that this case be closed on the basis of no sales at less than fair value within the meaning of section 201(a) of the Antidumping Act, 1921, as amended (19 U.S.C. 160(a)).

*Statement of reasons.* The investigation in this case has covered only the period specified in the complaint received by the Treasury Department, viz, the latter part of calendar year 1962 and the first part of calendar year 1963. All entries complained of have been appraised. The complainant, having been made aware of these facts, has withdrawn its complaint.

Under these circumstances I see no reason to continue with the investigation, and I conclude that there is no basis for determining sales at less than fair value.

This determination and the statment of reasons therefor are published pursuant to section 201(c) of the Antidumping Act, 1921, as amended (19 U.S.C. 160(c)).

[SEAL] JAMES A. REED,
*Assistant Secretary of the Treasury.*

[F.R. Doc. 64-13426; Filed, Dec. 29, 1964; 8:48 a.m.]

[AA 643.3-H]

### HOT-ROLLED STEEL SHEET FROM JAPAN

### Fair Value Determination

DECEMBER 22, 1964.

A complaint was received on February 1, 1963, that during the latter part of 1962 and the first part of 1963, hot-rolled steel sheet, plate, steel skelp, and steel strip from Japan was being sold in the United States at less than fair value within the meaning of the Antidumping Act, 1921, as amended. This complaint has now been withdrawn.

I hereby determine that this case be closed on the basis of no sales at less than fair value within the meaning of section 201(a) of the Antidumping Act, 1921, as amended (19 U.S.C. 160(a)).

*Statement of reasons.* The investigation in this case has covered only the period specified in the complaint received by the Treasury Department, viz, the latter part of calendar year 1962 and the first part of calendar year 1963. All entries complained of have been appraised. The complainant, having been made aware of these facts, has withdrawn its complaint.

Under these circumstances I see no reason to continue with the investigation, and I conclude that there is no basis for determining sales at less than fair value.

This determination and the statement of reasons therefor are published pursuant to section 201(c) of the Antidumping Act, 1921, as amended (19 U.S.C. 160(c)).

[SEAL] JAMES A. REED,
*Assistant Secretary of the Treasury.*

[F.R. Doc. 64-13427; Filed, Dec. 29, 1964; 8:49 a.m.]

[AA 643.3-W]

### WIRE STRAND FROM JAPAN

### Fair Value Determination

DECEMBER 22, 1964.

Information was received that wire strand from Japan was being sold in the United States at less than fair value within the meaning of the Antidumping Act of 1921.

I hereby determine that wire strand from Japan is not being, nor likely to be, sold at less than fair value within the meaning of section 201(a) of the Antidumping Act, 1921, as amended (19 U.S.C. 160(a)).

*Statement of reasons.* Based on the information available, it was determined that the appropriate comparison for fair value purposes should be between purchase price and the price for exportation to countries other than the United States (third country price).

Both purchase price and third country price were represented by the f.o.b. packed prices, exclusive of commission to sales agents. As the inland freight, f.o.b. charges and packing charges were the same whether sold for exportation to the United States or to third countries, no adjustments were necessary. Because of constantly fluctuating prices, comparisons were made on a weighted-average basis.

Purchase price was found to be not lower than the third country price on the basis of the weighted average of prices during the period under consideration.

This determination and the statement of reasons therefor are published pursuant to section 201(c) of the Antidumping Act, 1921, as amended (19 U.S.C. 160(c)).

[SEAL] JAMES A. REED,
*Assistant Secretary of the Treasury.*

## Office of the Secretary

## MEAT IMPORT LIMITATIONS

P.L. 88-482, approved August 22, 1964 (hereinafter referred to as the Act), contains provisions for limiting the quantity of fresh, chilled or frozen cattle meat (TSUS 106.10) and fresh, chilled or frozen meat of goats and sheep, except lambs (TSUS 106.20), which may be imported into the United States in any calendar year, beginning with the calendar year 1965, when the quantity of such articles, which it is estimated by the Secretary of Agriculture would be imported in such calendar year in the absence of limitations under the Act, equals or exceeds 110 percent of the estimated quantity of such articles prescribed by section 2(a) of the Act.

The Act requires the Secretary of Agriculture to estimate and publish before the first day of each calendar quarter in a calendar year, the quantity of such articles which would, in the absence of limitations under the Act, be imported in such calendar year and to estimate and publish before the beginning of each calendar year, the quantity of such articles prescribed for such calendar year by section 2(a) of the Act. In accordance with these requirements the following estimates are published:

1. The aggregate quantity of fresh, chilled or frozen cattle meat (TSUS 106.10) and fresh, chilled or frozen meat of goats and sheep, except lambs (TSUS 106.20), which it is estimated will, in the absence of limitations under the Act, be imported in the calendar year 1965, is 733 million pounds.

2. The estimated quantity of such articles prescribed by section 2(a) of the Act, which is to be used in determining whether limitations are required to be imposed under the Act during the calendar year 1965, is 848.7 million pounds.

Since the estimated quantity of imports, set forth in paragraph 1 above, does not equal or exceed 110 percent of the estimated quantity prescribed by section 2(a) of the Act, set forth in paragraph 2 above, limitations on the importation of fresh, chilled or frozen cattle meat (TSUS 106.10) and fresh, chilled or frozen meat of goats and sheep (TSUS 106.20) are not authorized to be imposed pursuant to P.L. 88-482 for the calendar year 1965 at this time.

Done at Washington, D.C., this 23d day of December 1964.

ORVILLE L. FREEMAN,
*Secretary.*

[F.R. Doc. 64-13409; Filed, Dec. 29, 1964; 8:47 a.m.]

## MONTANA AND NORTH DAKOTA

### Designation of Areas for Emergency Loans

For the purpose of making emergency loans pursuant to section 321 of the Consolidated Farmers Home Administration Act of 1961 (7 U.S.C. 1961), it has been determined that in the hereinafter-named counties in the States of Montana and North Dakota a natural disaster has caused a need for agricultural credit not readily available from commercial banks, cooperative lending agencies, or other responsible sources.

MONTANA

| | |
|---|---|
| Carter | Powder River |
| Custer | Prairie |
| Dawson | Rosebud |
| Fallon | Wibaux |

NORTH DAKOTA

| | |
|---|---|
| Adams | Slope |
| Bowman | Hettinger |

Pursuant to the authority set forth above, emergency loans will not be made in the above-named Montana and North Dakota counties after December 31, 1965, except to applicants who previously received emergency or special livestock loan assistance and who can qualify under established policies and procedures.

Done at Washington, D.C., this 21st day of December 1964.

ORVILLE L. FREEMAN,
*Secretary.*

## OCEANIC STEAMSHIP CO.

### Notice of Application and of Hearing

Notice is hereby given of the application of The Oceanic Steamship Company, for written permission of the Maritime Administration, under section 805(a) of the Merchant Marine Act, 1936, as amended, 46 U.S.C. 1223, to permit vessels, operated by its parent company, Matson Navigation Company, in the California-Hawaii passenger service to carry passengers, passengers' baggage and passengers' automobiles as an ocean common carrier for hire on a space available basis between San Francisco and Los Angeles in the course of a number of voyages between California and Hawaii beginning February 27, 1965.

A hearing on the application has been set for January 13, 1965, at 10:00 a.m. in Room 4519, General Accounting Office Building, 441 G St. NW., Washington, D.C., 20235.

Any person, firm, or corporation having any interest (within the meaning of section 805(a)) in such application and desiring to be heard on issues pertinent to section 805(a) must, before close of business on January 11, 1965, notify the Secretary, Maritime Subsidy Board/Maritime Administration, in writing in triplicate, and file petition for leave to intervene which shall state clearly and concisely the grounds of interest, and the alleged facts relied on for relief. Notwithstanding anything in Rule 5(n) of the Rules of Practice and Procedure, Maritime Subsidy Board/Maritime Administration, petitions for leave to intervene received after the close of business on January 11, 1965, will not be granted in this proceeding.

Dated: December 23, 1964.

By order of the Maritime Subsidy Board/Maritime Administrator.

JAMES S. DAWSON, JR.,
*Secretary.*

## AMERICAN CAN CO.

### Notice of Filing of Petition for Food Additives Nylon Resins

Pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5), 72 Stat. 1786; 21 U.S.C. 348(b)(5)), notice is given that a petition (FAP 5B1621) has been filed by American Can Company, Eleventh Ave. and St. Charles Rd., Maywood, Ill., 60154, proposing that paragraph (b) of § 121.2502 *Nylon resins* be amended by changing item 5.2 in the table by revising the text of that item in the first column headed "Nylon resins" to read as follows:

5.2 Nylon 11 resins for use only:
a. In articles intended for repeated use in contact with food.
b. In side-seam cements for articles that are intended for one-time use in contact with food and that are in compliance with § 121.2514.

Dated: December 22, 1964.

MALCOLM R. STEPHENS,
*Assistant Commissioner for Regulations.*

[F.R. Doc. 64-13432; Filed, Dec. 29, 1964; 8:50 a.m.]

## AMERICAN CYANAMID CO.

### Notice of Withdrawal of Petition for Food Additive Chlortetracycline

Pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409(b), 72 Stat. 1786; 21 U.S.C. 348(b)), the following notice is issued:

In accordance with § 121.52 *Withdrawal of petitions without prejudice* of the procedural food additive regulations (21 CFR 121.52), American Cyanamid Company, Agricultural Division, Post Office Box 400, Princeton, N.J., has withdrawn its petition (FAP 4C1429), published in the FEDERAL REGISTER of June 20, 1964 (29 F.R. 7895) proposing the issuance of an amendment to § 121.225 to provide for the safe use of not less than 7.5 grams nor more than 50 grams of chlortetracycline per ton of complete swine feed for growth promotion.

The withdrawal of this petition is without prejudice to a future filing.

Dated: December 22, 1964.

MALCOLM R. STEPHENS,
*Assistant Commissioner for Regulations.*

[F.R. Doc. 64-13433; Filed, Dec. 29, 1964; 8:50 a.m.]

## HUMBLE OIL AND REFINING CO.

### Notice of Filing of Petition for Food Additive Mineral Oil

Pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5), 72 Stat. 1786; 21 U.S.C. 348(b)(5)), notice is given that a petition (FAP 4B1311) has been filed by Humble Oil and Refining Company, Post Office Box 2180, Houston 1, Tex., proposing an amendment to § 121.2589 of the food additive regulations to provide for the safe use of mineral oil identified in paragraph 1 of this notice and used as proposed in paragraph 2 of this notice.

1. It is proposed that the mineral oil consist of virgin petroleum distillates refined to meet the following ultraviolet absorbance limits as determined by the proposed analytical method described in this paragraph:

| Wavelength | Maximum absorbance per centimeter optical pathlength |
|---|---|
| mμ | |
| 280-299 | 1.0 |
| 300-359 | 0.8 |
| 360-400 | 0.1 |

ANALYTICAL METHOD FOR DETERMINING ULTRAVIOLET ABSORBANCE LIMITS

GENERAL INSTRUCTIONS

Because of the sensitivity of the test, the possibility of errors arising from contamination is great. It is of the greatest importance that all glassware be scrupulously cleaned to remove all organic matter such as oil, grease, detergent residues, etc. Examine all glassware, including stoppers and stopcocks, under ultraviolet light to detect any residual fluorescent contamination. As a precautionary measure it is recommended practice to rinse all glassware with purified isooctane immediately before use. No grease is to be used on stopcocks or joints. Great care to avoid contamination of oil samples in handling and to assure absence of any extraneous material arising from inadequate packaging is essential. Because some of the polynuclear hydrocarbons sought in this test are very susceptible to photo-oxidation, the entire procedure is to be carried out under subdued light.

APPARATUS

*Separatory funnels.* 250-milliliter, 500-milliliter, 1,000-milliliter, and preferably 2,000-milliliter capacity, equipped with tetrafluoroethylene polymer stopcocks.

*Reservoir.* 500-milliliter capacity, equipped with a 24/40 standard taper male fitting at the bottom and a suitable ball-joint at the top for connecting to the nitrogen supply. The male fitting should be equipped with glass hooks.

*Chromatographic tube.* 180 millimeters in length, inside diameter to be 15.7 millimeters ±0.1 millimeter, equipped with a coarse, fritted-glass disc, a tetrafluoroethylene polymer stopcock, and a female 24/40 standard tapered fitting at the opposite end. (Over-all length of the column with the female joint is 235 millimeters.) The female fitting should be equipped with glass hooks.

*Disc.* Tetrafluoroethylene polymer 2-inch diameter disc approximately $\frac{3}{8}$-inch thick with a hole bored in the center to closely fit the stem of the chromatographic tube.

*Suction flask.* 250-milliliter or 500-milliliter filter flask.

*Condenser.* 24/40 joints, fitted with a drying tube, length optional.

*Evaporation flask (optional).* 250-milliliter or 500-milliliter capacity all-glass flask equipped with standard taper stopper having inlet and outlet tubes to permit passage of nitrogen across the surface of contained liquid to be evaporated.

*Spectrophotometric cells.* Fused quartz cells, optical path length in the range of 5,000 centimeters ±0.005 centimeter; also for checking spectrophotometer performance only, optical path length in the range 1,000 centimeter ±0.005 centimeter. With distilled water in the cells, determine any absorbance differences.

*Spectrophotometer.* Spectral range 250 millimicrons-400 millimicrons with spectral slit width of 2 millimicrons or less; under instrument operating conditions for these absorbance measurements, the spectrophotometer shall also meet the following performance requirements:

Absorbance repeatability, ±0.01 at 0.4 absorbance.

Absorbance accuracy,[1] ±0.05 at 0.4 absorbance.

[1] As determined by procedure using potassium chromate for reference standard and described in National Bureau of Standards Circular 484, Spectrophotometry, U.S. Department of Commerce, 1949. The accuracy is to be determined by comparison with the standard values at 290, 345, and 400 millimicrons.

Wavelength repeatability, ±0.2 millimicron.

Wavelength accuracy, ±1.0 millimicron.

*Nitrogen cylinder.* Water-pumped or equivalent purity nitrogen in cylinder equipped with regulator and valve to control flow at 5 p.s.i.g.

REAGENTS AND MATERIALS

*Organic solvents.* All solvents used throughout the procedure shall meet the specifications and tests described in this specification. The isooctane, benzene, acetone, and methyl alcohol designated in the list following this paragraph shall pass the following test:

To the specified quantity of solvent in a 250-milliliter Erlenmeyer flask, add 1 milliliter of purified *n*-hexadecane and evaporate on the steam bath under a stream of nitrogen (a loose aluminum foil jacket around the flask will speed evaporation). Discontinue evaporation when not over 1 milliliter of residue remains. (To the residue from benzene add a 10-milliliter portion of purified isooctane, reevaporate, and repeat once to insure complete removal of benzene.)

Alternatively, the evaporation time can be reduced by using the optional evaporation flask. In this case the solvent and *n*-hexadecane are placed in the flask on the steam bath, the tube assembly is inserted, and a stream of nitrogen is fed through the inlet tube while the outlet tube is connected to a solvent trap and vacuum line in such a way as to prevent any flow-back of condensate into the flask.

Dissolve the 1 milliter of hexadecane residue in isooctane and make to 25 milliliters volume. Determine the absorbance in the 5-centimeter path length cells compared to isooctane as reference. The absorbance of the solution of the solvent residue (except for methyl alcohol) shall not exceed 0.01 per centimeter path length between 280 and 400 mμ. For methyl alcohol this absorbance value shall be 0.00.

*Isooctane (2,2,4-trimethylpentane).* Use 180 milliliters for the test described in the preceding paragraph. Purify, if necessary, by passage through a column of activated silica gel (Grade 12, Davison Chemical Company, Baltimore, Maryland, or equivalent) about 90 centimeters in length and 5 centimeters to 8 centimeters in diameter.

*Benzene, A.C.S. reagent grade.* Use 150 milliliters for the test. Purify, if necessary, by distillation or otherwise.

*Acetone, A.C.S. reagent grade.* Use 200 milliliters for the test. Purify, if necessary, by distillation.

Eluting mixtures:

1. *10 percent benzene in isooctane.* Pipet 50 milliliters of benzene into a 500-milliliter glass-stoppered volumetric flask and adjust to volume with isooctane, with mixing.

2. *20 percent benzene in isooctane.* Pipet 50 milliliters of benzene into a 250-milliliter glass-stoppered volumetric flask, and adjust to volume with isooctane, with mixing.

3. *Acetone - benzene - water mixture.* Add 20 milliliters of water to 380 milliliters of acetone and 200 milliliters of benzene, and mix.

*n-Hexadecane, 99-percent olefin-free.* Dilute 1.0 milliliter of *n*-hexadecane to 25 milliliters with isooctane and determine the absorbance in a 5-centimeter cell compared to isooctane as reference point between 280 mμ–400mμ. The absorbance per centimeter path length shall not exceed 0.00 in this range. Purify, if necessary, by percolation through activated silica gel or by distillation.

*Methyl alcohol, A.C.S. reagent grade.* Use 10.0 milliliters of methyl alcohol. Purify, if necessary, by distillation.

*Dimethyl sulfoxide.* Spectrophotometric grade (Crown Zellerbach Corporation, Camas, Washington, or equivalent). Absorbance (1-centimeter cell, distilled water reference, sample completely saturated with nitrogen).

| Wavelength: | Absorbance (Maximum) |
|---|---|
| 261.5 | 1.00 |
| 270 | 0.20 |
| 275 | 0.09 |
| 280 | 0.06 |
| 300 | 0.015 |

There shall be no irregularities in the absorbance curve within these wavelengths.

*Phosphoric acid.* 85 percent A.C.S. reagent grade.

*Sodium borohydride.* 98 percent.

*Magnesium oxide (Sea Sorb 43, Food Machinery Company, Westvaco Division, distributed by chemical supply firms, or equivalent).* Place 100 grams of the magnesium oxide in a large beaker, add 700 milliliters of distilled water to make a thin slurry, and heat on a steam bath for 30 minutes with intermittent stirring. Stir well initially to insure that all the adsorbent is completely wetted. Using a Buchner funnel and a filter paper (Schleicher & Schuell No. 597, or equivalent) of suitable diameter, filter with suction. Continue suction until water no longer drips from the funnel. Transfer the adsorbent to a glass trough lined with aluminum foil (free from rolling oil). Break up the magnesia with a clean spatula and spread out the adsorbent on the aluminum foil in a layer about 1 centimeter to 2 centimeters thick. Dry for 24 hours at 160° C. ±1° C. Pulverize the magnesia with mortar and pestle. Sieve the pulverized adsorbent between 60–180 mesh. Use the magnesia retained on the 180-mesh sieve.

*Celite 545.* Johns Mansville Company, diatomaceous earth, or equivalent.

*Magnesium oxide-Celite 545 mixture (2+1) by weight.* Place the magnesium oxide (60–180 mesh) and the Celite 545 in 2 to 1 proportions, respectively, by weight in a glass-stoppered flask large enough for adequate mixing. Shake vigorously for 10 minutes. Transfer the mixture to a glass trough lined with aluminum foil (free from rolling oil) and spread it out on a layer about 1 centimeter to 2 centimeters thick. Reheat the mixture at 160° C. ±1° C. for 2 hours, and store in a tightly closed flask.

*Sodium sulfate, anhydrous, A.C.S. reagent grade, preferably in granular form.* For each bottle of sodium sulfate reagent used, establish as follows the necessary sodium sulfate prewash to provide such filters required in the method: Place approximately 35 grams of anhydrous sodium sulfate in a 30-milliliter course, fritted-glass funnel or in a 65-millimeter filter funnel with glass wool plug; wash with successive 15-milliliter portions of the indicated solvent until a 15-milliliter portion of the wash shows 0.00 absorbance per centimeter path length between 280 mμ and 400 mμ when tested as prescribed under "Organic solvents." Usually three portions of wash solvent are sufficient.

Before proceeding with analysis of a sample, determine the absorbance in a 5-centimeter path cell between 250 millimicrons and 400 millimicrons for the reagent blank by carrying out the procedure, without an oil sample, recording the spectra after the extraction stage and after the complete procedure as prescribed. The absorbance per centimeter path length following the extraction stage should not exceed 0.02 in the wavelength range from 280 mμ to 400 mμ; the absorbance per centimeter path length following the complete procedure should not exceed 0.02 in the wavelength range from 280 mμ to 400 mμ. If in either spectrum the characteristic benzene peaks in the 250 mμ–260 mμ region are present, remove the benzene by the procedure under "Organic solvents" and record absorbance again.

Place 300 milliliters of dimethyl sulfoxide in a 1-liter separatory funnel and add 75 milliliters of phosphoric acid. Mix the contents of the funnel and allow to stand for 10 minutes. (The reaction between the sulfoxide and the acid is exothermic. Release pressure after mixing, then keep funnel stoppered.) Add 150 milliliters of isooctane and shake to pre-equilibrate the solvents. Draw off the individual layers and store in glass-stoppered flasks.

Weigh a 20-gram sample of the oil and transfer to a 500-milliliter separatory funnel containing 100 milliliters of pre-equilibrated sulfoxide-phosphoric acid mixture. Complete the transfer of the sample with small portions of pre-equilibrated isooctane to give a total volume of the oil and solvent of 75 milliliters. Shake the funnel vigorously for 2 minutes. Set up three 250-milliliter separatory funnels with each containing 30 milliliters of pre-equilibrated isooctane. After separation of liquid phases, carefully draw off lower layer into the first 250-milliliter separatory funnel and wash in tandem with the 30-milliliter portions of isooctane contained in the 250-milliliter separatory funnels. Shaking time for each wash is 1 minute. Repeat the extraction operation with two additional portions of the sulfoxide-acid mixture and wash each extractive in tandem through the same three portions of isooctane.

Collect the sucessive extractives (300 milliliters total) in a separatory funnel (preferably 2-liter) containing 480 milliliters of distilled water; mix, and allow to cool for a few minutes after the last extractive has been added. Add 80 milliliters of isooctane to the solution and extract by shaking the funnel vigorously for 2 minutes. Draw off the lower aqueous layer into a second separatory funnel (preferably 2-liter) and repeat the extraction with 80 milliliters of isooctane. Draw off and discard the aqueous layer. Wash each of the 80-milliliter extractives three times with 100-milliliter portions of distilled water. Shaking time for each wash is 1 minute. Discard the aqueous layers. Filter the first extractive through anhydrous sodium sulfate prewashed with isooctane (see Sodium sulfate under "Reagents and Materials" for preparation of filter) into a 250-milliliter Erlenmeyer flask (or optionally into the evaporation flask). Wash the first separatory funnel with the second 80-milliliter isooctane extractive and pass through the sodium sulfate. Then wash the second and first separatory funnels successively with a 20-milliliter portion of isooctane and pass the solvent through the sodium sulfate into the flask. Add 1 milliliter of *n*-hexadecane and evaporate the isooctane on the steam bath under nitrogen. Discontinue evaporation when not over 1 milliliter of residue remains. To the residue, add a 10-milliliter portion of isooctane, reevaporate to 1 milliliter of hexadecane, and repeat this operation once.

Quantitatively transfer the residue with isooctane to a 200-milliliter volumetric flask, make to volume, and mix. Determine the absorbance of the solution in the 1-centimeter pathlength cells compared to isooctane as reference between 280 mμ–400 mμ (take care to lose none of the solution in filling the sample cell). Correct the absorbance values for any absorbance derived from reagents as determined by carrying out the procedure without an oil sample. If the corrected absorbance does not exceed the limits prescribed in this paragraph, the oil meets the ultraviolet absorbance specifications. If the corrected absorbance per centimeter pathlength exceeds the limits prescribed in this paragraph, proceed as follows: Quantitatively transfer the isooctane solution to a 125-milliliter flask equipped with 24/40 joint, and evaporate the isooctane on the steam bath under a stream of nitrogen to a volume of 1 milliliter of hexadecane. Add 10 milliliters of methyl alcohol and approximately 0.3 gram of sodium borohydride. (Minimize exposure of the borohydride to the atmosphere. A measuring dipper may be used.) Immediately fit a water-cooled condenser equipped with a 24/40 joint and with a drying tube into the flask, mix until the borohydride is dissolved, and allow to stand for 30 minutes at room temperature, with intermittent swirling. At the end of this period, disconnect the flask and evaporate the methyl alcohol on the steam bath under nitrogen until the sodium borohydride begins to come out of the solution. Then add 10 milliliters of isooctane and evaporate to a volume of about 2–3 milliliters. Again, add 10 milliliters of isooctane and concentrate to a volume of approximately 5 milliliters. Swirl the flask repeatedly to assure adequate washing of the sodium borohydride residues.

Fit the tetrafluoroethylene polymer disc on the upper part of the stem of the chromatographic tube, then place the tube with the disc on the suction flask and apply the vacuum (approximately 135 millimeters Hg pressure). Weight out 14 grams of the 2:1 magnesium oxide-Celite 545 mixture and pour the adsorbent mixture into the chromatographic tube in approximately 3-centimeter layers. After the addition of each layer, level off the top of the adsorbent with a flat glass rod or metal plunger by pressing down firmly until the adsorbent is well packed. Loosen the topmost few millimeters of each adsorbent layer with the end of a metal rod before the addition of the next layer. Continue packing in this manner until all the 14 grams of the adsorbent is added to the tube. Level off the top of the adsorbent by pressing down firmly with a flat glass rod or metal plunger to make the depth of the adsorbent bed approximately 12.5 centimeters in depth. Turn off the vacuum and remove the suction flask. Fit the 500-milliliter reservoir onto the top of the chromatographic column and prewet the column by passing 100 milliliters of isooctane through the column. Adjust the nitrogen pressure so that the rate of descent of the isooctane coming off the column is between 2–3 milliliters per minute. Discontinue pressure just before the last of the isooctane reaches the level of the adsorbent. (Caution: Do not allow the liquid level to recede below the adsorbent level at any time.) Remove the reservoir and decant the 5-milliliter isooctane concentrate solution onto the column and with slight pressure again allow the liquid level to recede to barely above the adsorbent level. Rapidly complete the transfer similarly with two 5-milliliter portions of isooctane, swirling the flask repeatedly each time to assure adequate washing of the residue. Just before the final 5-milliliter wash reaches the top of the adsorbent, add 100 milliliters of isooctane to the reservoir and continue the percolation at the 2–3 milliliters per minute rate. Just before the last of the isooctane reaches the adsorbent level, add 100 milliliters of 10 percent benzene in isooctane to the reservoir and continue the percolation at the aforementioned rate. Just before the solvent mixture reaches adsorbent level, add 25 milliliters of 20 percent benzene in isooctane to the reservoir and continue the percolation at 2–3 milliliters per minute until all this solvent mixture has been removed from the column. Discard all the elution solvents collected up to this point. Add 300 milliliters of the acetone-benzene-water mixture to the reservoir and percolate through the column to elute the polynuclear compounds. Collect the eluate in a clear 1-liter separatory funnel. Allow the column to drain until most of the solvent mixture is removed. Wash the eluate three times with 300-milliliter portions of distilled water, shaking well for each wash. (The addition of small amounts of sodium chloride facilitates separation.) Discard the aqueous layer after each wash. After the final separation, filter the residual benzene through anhydrous sodium sulfate pre-washed with benzene (see Sodium sulfate under "Reagents and Materials" for preparation of filter) into a 250-milliliter Erlenmeyer flask (or optionally into the evaporation flask). Wash the separatory funnel with two additional 20-milliliter portions of benzene which are also filtered through the sodium sulfate. Add 1 milliliter of *n*-hexadecane and completely remove the benzene by evaporation under nitrogen, using the special procedure to eliminate benzene as previously described under "Organic solvents." Quantitatively transfer the residue with isooctane to a 200-milliliter volumetric flask and adjust to volume. Determine the absorbance of the solution in the 1-centimeter pathlength cells compared to isooctane as reference between 250 mμ–400 mμ. Correct for any absorbance derived from the reagents as determined by carrying out the procedure without an oil sample. If either spectrum shows the characteristic benzene peaks in the 250 mμ–260 mμ region, evaporate the solution to remove benzene by the procedure under "Organic solvents." Dissolve the residue, transfer quantitatively, and adjust to volume in isooctane in a 200-milliliter volumetric flask. Record the absorbance again. If the corrected absorbance does not exceed the limits proposed in this paragraph, the oil meets the proposed ultraviolet absorbance specifications.

2. It is proposed that the mineral oil be permitted for use wherever mineral oil is permitted for use as a component of nonfood articles complying with §§ 121.2519, 121.2520, 121.2531 (for use only in rolling of metallic foil and sheet stock), 121.2535, 121.2536, 121.2557, and 121.2562.

Dated: December 22, 1964.

# BUREAU OF THE BUDGET

## ESTABLISHMENT OR EXTENSION OF STANDING INTERAGENCY COMMITTEES CHAIRED BY THE BUREAU OF THE BUDGET

### Fiscal Year 1964

Bureau of the Budget Circular No. A-63 of March 2, 1964, requires that notice of the establishment or extension of standing interagency committees be published in the FEDERAL REGISTER "in order to facilitate convenient and permanent reference by Federal agencies, unless this would be inconsistent with law or regulations, or where such publication would not be in the national interest." In compliance with this requirement the following information is provided relating to standing interagency committees chaired by the Bureau of the Budget.

A. Standing Committees Established During Fiscal Year 1964:

Working Group on the Application of the Commodity Classification for Transportation Statistics.

B. Standing Committees Extended Beyond June 30, 1964:

Technical Committee on Standard Industrial Classification.
Policy Committee on the Current Population Survey.
Occupational Classification Committee.
Interagency Committee on Foreign Trade Statistics.
Interagency Committee on Financial Statistics.
Federal Committee on Standard Metropolitan Statistical Areas.
Technical Committee on Area Definitions.
Federal Committee on International Statistics.
Committee on Labor Supply, Employment and Unemployment Statistics.
Committee on Cartography.
Interagency Committee on Statistical Security.
Advisory Committee to the Civil Service Commission on Financial Management Training.
Committee for the Development of Cost Principles for Research Agreements with Educational Institutions.
Government-wide Steering Committee of the Joint Financial Management Improvement Program.

Dated: December 23, 1964.

WILLIAM D. CAREY,
*Executive Assistant Director.*

# CIVIL AERONAUTICS BOARD

[Docket No. 15419]

## BLOCKED SPACE AIR FREIGHT TARIFFS

### Notice of Postponement of Prehearing Conference

Pursuant to the telegraphic request of United Air Lines, Inc., to which no objection has been entered, the procedural dates herein, including that for prehearing conference, are postponed. A notice

with respect to new dates will be issued after receipt of the letter United indicates it intends to send and of the comments of the other parties thereon.

Dated at Washington, D.C., December 23, 1964.

[SEAL] RALPH L. WISER,
*Hearing Examiner.*

[F.R. Doc. 64-13442; Filed, Dec. 29, 1964; 8:50 a.m.]

# CIVIL SERVICE COMMISSION

## MICROBIOLOGIST

### Position for Which There Is Determined To Be a Manpower Shortage

Under the provisions of Public Law 86-587, the Civil Service Commission has determined that there is a manpower shortage for the following:

| Series and grade | Positions | Location | Effective date |
|---|---|---|---|
| GS-403-12/13 | Microbiologist | Washington, D.C., metropolitan area. | Dec. 17, 1964 |

Comparable positions not subject to the Classification Act also are covered.

Expenses of travel and transportation to their first duty stations may be paid for appointees to positions as listed above. Any such payments as a result of this determination must be made in accordance with travel regulations issued by the Bureau of the Budget.

UNITED STATES CIVIL SERVICE COMMISSION,
[SEAL] MARY V. WENZEL,
*Executive Assistant to the Commissioners.*

[F.R. Doc. 64-13411; Filed, Dec. 29, 1964; 8:47 a.m.]

# FEDERAL AVIATION AGENCY

[OE Docket No. 64-EA-12]

## KENYON L. EDWARDS AND W. B. SANTMYER

### Determination of Hazard to Air Navigation

The Federal Aviation Agency has circularized the following proposal for aeronautical comment and has conducted a study (EA-OE-5350) to determine its effect upon the safe and efficient utilization of navigable airspace.

Kenyon L. Edwards and W. B. Santmyer, Annandale, Va., proposes to construct a building near Alexandria, Va., at latitude 38°50'45" north, longitude 77°07'31" west. The overall height of the structure would be 290 feet above mean sea level (AMSL), 40 feet above ground level (AGL).

The proposed structure would be located on the extended centerline of Runway 12 of the Washington-Virginia Airport approximately 275 feet from the approach end of the runway. It would exceed the standards for determining hazards to air navigation as defined in § 77.27(b)(2) of the Federal Aviation Regulations by its entire height.

Runway 12/30 is 2,300 feet in length. Agency standards establish an approach-departure slope ratio of 20:1 for such runways. The application of the 20:1 slope ratio to provide standard obstruction clearance of the proposed building revealed that only 1,775 feet of runway would be usable for aircraft landing on Runway 12 and departing Runway 30. At present, the controlling obstruction for Runway 12 is a service station which is 15 feet AGL and located in the approach area 125 feet from the end of the runway. However, when the 20:1 slope ratio is applied to the service station, a usable runway length of 2,115 feet remains.

Runway 12/30 is lighted and the longest of the airport's two runways. Therefore, night operations are limited to Runway 12/30 and larger aircraft use it whenever possible due to its length.

The current Airport Facility Record, Form 29A, for the Washington-Virginia Airport indicates there are 13,000 itinerant operations and a total of 68,000 aircraft operations yearly at the airport. There are 130 aircraft based at the airport, five of which are multiengine aircraft.

Based upon the aeronautical study, it is the finding of the Agency that the proposed structure would have a substantial adverse effect upon aircraft operations at the Washington-Virginia Airport.

Therefore, pursuant to the authority delegated to me by the Administrator (§ 77.37), it is found that the proposed structure would have a substantial adverse effect upon the safe and efficient utilization of navigable airspace; and it is hereby determined that the proposed structure would be a hazard to air navigation.

This determination is effective and will become final 30 days after the date of issuance unless an appeal is filed under § 77.39 (27 F.R. 10352). If the appeal is denied, the determination will then become final as of the date of the denial or 30 days after the issuance of the determination, whichever is later.

Issued in Washington, D.C., on December 18, 1964.

JOSEPH VIVARI,
*Acting Chief,*
*Obstruction Evaluation Branch.*

[OE Docket No. 64-EA-14]

## D. H. OVERMYER

### Determination of No Hazard to Air Navigation

The Federal Aviation Agency has circularized the following proposal for aeronautical comment and has conducted study (EA-OE-6179) to determine its effect upon the safe and efficient utilization of the navigable airspace.

D. H. Overmyer, Toledo, Ohio, proposes to construct a television antenna structure at latitude 41°40'03" north, longitude 83°21'22" west, near Toledo, Ohio. The overall height of the structure would be 1,621 feet above mean sea level (AMSL), 1,042 feet above ground level (AGL).

This is an alternate proposal for the tower described in Study No. 1-OE-3520 for which a Determination of No Hazard was issued on September 25, 1963. That study involved a tower 1,621 feet AMSL (1,035 feet AGL) to be located at latitude 41°40'22" north, longitude 83°25'39" west. Since that tower will not be constructed the determination is hereby canceled.

The proposed structure would exceed the standards for determining hazards to air navigation in § 77.23(a)(1) of the Federal Aviation Regulations by 541 feet.

The study disclosed that the structure would not require an increase in instrument flight rule (IFR) minimum en route altitudes and would not have an adverse effect on any IFR procedures. Further, by its location near existing structures of like height in the antenna farm concept, the structure would not be located in proximity to a known visual flight rule (VFR) route or in an area where there is a significant volume of VFR traffic.

Based upon the aeronautical study, it is the finding of the Agency that the proposed structure would have no adverse effect upon aeronautical operations, procedures or minimum flight altitudes.

Therefore, pursuant to the authority delegated to me by the Administrator (§ 77.37), it is found that the proposed structure would have no substantial adverse effect upon the safe and efficient utilization of navigable airspace and it is hereby determined that the proposed structure would not be a hazard to air navigation provided that it is obstruction marked and lighted in accordance with Agency standards.

This determination is effective and will become final 30 days after the date of issuance unless an appeal is filed under § 77.39 (27 F.R. 10352). If the appeal is denied, the determination will then become final as of the date of the denial or 30 days after the issuance of the determination, whichever is later. Unless otherwise revised or terminated, a final determination hereunder will expire 18 months after its effective date or upon earlier abandonment of the construction proposal (§ 77.41).

Issued in Washington, D.C., on December 21, 1964.

JOSEPH VIVARI,
*Acting Chief,*
*Obstruction Evaluation Branch.*

# FEDERAL COMMUNICATIONS COMMISSION

[Docket Nos. 15745, 15746; FCC 64-1158]

## MIDWEST TELEVISION, INC. (WMBD-FM) AND PEORIA JOURNAL STAR, INC.

### Order Designating Applications for Consolidated Hearing on Stated Issues

In re applications of Midwest Television, Inc. (WMBD-FM) Peoria, Ill., has: 92.5 mc, #223, 27 kw, 606 ft. requests: 93.3 mc, #227, 27 kw, 562 ft., Docket No. 15745, File No. BPH-4277; the Peoria Journal Star, Inc., Peoria, Ill., requests: 93.3 mc, #227, 41.7 kw, 533 ft., Docket No. 15746, File No. BPH-4351; for construction permits.

At a session of the Federal Communications Commission held at its offices in Washington, D.C., on the 16th day of December 1964;

The Commission having under consideration the above-captioned and described applications;

It appearing, that, except as indicated by the issues specified below, each of the applicants is legally, technically, financially, and otherwise qualified to construct and operate as proposed; and

It further appearing, that the above-captioned applications are mutually exclusive in that operation by the applicants as proposed would result in mutually destructive interference with each other; and

It further appearing, that the Peoria Journal Star, Inc. publishes the Journal Star, the only daily newspaper of general circulation in Peoria, Ill.; that the Lindsay-Schaub Newspapers, Inc., 20 percent stockholder in Midwest Television, Inc., publishes the following newspapers in Illinois: Decatur Herald and Review, Champaign-Urbana (Ill.) Evening Courier, St. Clair and Madison Counties Journal (East St. Louis), and the Carbondale-Herrin-Murphysboro Southern Illinoisian; that several stockholders in Lindsay-Schaub Newspapers, Inc. also have interests in Quincy Newspapers, Inc., publisher of the Herald-Whig, Quincy, Ill.; that Helen M. Stevick and Marajen Stevick Dyess Chinigo, each 10 percent stockholders in Midwest Television, Inc., own 60 percent and 40 percent respectively of the stock of the Champaign News-Gazette, Inc., publisher of the Champaign News-Gazette; that several stockholders in Midwest Television, Inc. have interests in the following FM broadcast stations in Illinois: WDWS-FM (Champaign), WSOY-FM (Decatur), WSEI-TV (Olney), and WGEM-FM (Quincy), and also in the following additional broadcast stations in Illinois: WMBD, WMBD-TV (Peoria), WDWS (Champaign), WSOY (Decatur), WVLN (Olney), WGEM, WGEM-TV (Quincy) and WCIA-TV (Champaign); and that these facts may be considered under the standard comparative issue in this proceeding.

It further appearing, that, in view of the foregoing, the Commission is unable to make the statutory finding that a grant of the applications would serve the public interest, convenience, and necessity, and is of the opinion that the applications must be designated for hearing in a consolidated proceeding on the issues set forth below:

*It is ordered,* That, pursuant to section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, at a time and place to be specified in a subsequent order, upon the following issues:

1. To determine, on a comparative basis, which of the proposals would better serve the public interest, convenience, and necessity in light of the evidence adduced pursuant to the foregoing issue and the record made with respect to the significant differences between the applicants as to:

(a) The background and experience of each of having a bearing on the applicant's ability to own and operate the FM station as proposed.

(b) Proposals of each of the applicants with respect to the management and operation of the FM broadcast station as proposed.

(c) The programming services proposed in each of the above-captioned applications.

2. To determine, in the light of the evidence adduced pursuant to the foregoing issues, which of the applications should be granted.

*It is further ordered,* That, to avail themselves of the opportunity to be heard, the applicants herein, pursuant to section 1.221(c) of the Commission Rules, in person or by attorney, shall, within 20 days of the mailing of this Order, file with the Commission in triplicate a written appearance stating an intention to appear on the date fixed for the hearing and present evidence on the issues specified in this Order.

*It is further ordered,* That the applicants herein shall, pursuant to § 311(a)(2) of the Communications Act of 1934, as amended, and § 1.594 of the Commission rules, give notice of the hearing, either individually or, if feasible and consistent with the rules, jointly, within the time and in the manner prescribed in such rule, and shall advise the Commission of the publication of such notice as required by § 1.594(g) of the rules.

*It is further ordered,* That, the issues in the above-captioned proceeding may be enlarged by the Examiner, on his own motion or on petition properly filed by a party to the proceeding, and upon sufficient allegations of fact in support thereof, by the addition of the following issue: To determine whether the funds available to the applicant will give reasonable assurance that the proposals set forth in the application will be effectuated.

Released: December 18, 1964.

# FEDERAL MARITIME COMMISSION

## BARBER-WILHELMSEN LINE AND NORWEGIAN ASIA LINE

### Notice of Agreement Filed for Approval

Notice is hereby given that the following Agreements have been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement(s) at the Washington office of the Federal Maritime Commission, 1321 H Street NW.,

Room 301; or may inspect agreements at the offices of the District Managers, New York, N.Y., New Orleans, La., and San Francisco, Calif. Comments with reference to an agreement including a request for hearing, if desired, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, within 20 days after publication of this notice in the FEDERAL REGISTER. A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter), and the comments should indicate that this has been done.

Notice of agreement filed for approval by:

John G. de Roos, Esq.
Barber Steamship Lines, Inc.
Sheraton-Whitehall Building
17 Battery Place
New York, N.Y., 10004

Agreement 8968-1, between the carriers comprising the Barber-Wilhelmsen Line joint service (operating pursuant to approved joint service Agreement 7589, as amended) and Norwegian Asia Line (Bruusgaard Kiosterud Skibs-A/S), modifies approved Agreement 8968 which covers a through billing arrangement in the trade from British North Borneo and Sarawak to U.S. Pacific and Atlantic Coast ports, with transhipment at Hong Kong. The purpose of the modification is to substitute the carriers presently comprising the Barber-Wilhelmsen Line joint service (Agreement 7589, as amended) as parties to Agreement 8968, in place of the carriers formerly operating as the Barber-Wilhelmsen Line joint service, as provided by Agreement 7749, as amended.

Dated: December 24, 1964.

By order of the Federal Maritime Commission.

# FEDERAL POWER COMMISSION

[Docket No. G-3833 etc.]

## ALICE A. NEUNER ET AL.

### Findings and Order

DECEMBER 22, 1964.

Findings and order after statutory hearing issuing certificates of public convenience and necessity, amending certificates, permitting and approving abandonment of service, terminating certificates, making successor in interest co-respondent, requiring filing of agreement and undertaking, accepting related rate schedules and supplements for filing and permitting withdrawal of petition to intervene.

Each of the Applicants listed herein has filed an application pursuant to section 7 of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale and delivery of natural gas in interstate commerce, for permission and approval to abandon service, or a petition to amend an existing certificate authorization, all as more fully described in the respective applications and petitions (and any supplements or amendments thereto) which are on file with the Commission.

The Applicants herein have filed related FPC Gas Rate Schedules and propose to initiate or abandon, add or delete natural gas service in interstate commerce as indicated by the tabulation herein. All sales certificated herein are either equal to or below the ceiling prices established by the Commission's Statement of Policy 61-1, as amended, or involve sales for which permanent certificates have been previously issued.

Jeanne E. Kerbs, Applicant in Docket No. CI62-1163, proposes to continue in part the sale of natural gas heretofore authorized in Docket No. G-18852 and initiated by J. Wes Johnson d/b/a Tower Oil & Gas Company of Texas, pursuant to a contract heretofore designated as Johnson's FPC Gas Rate Schedule No. 1 which has also been designated as Kerbs' FPC Gas Rate Schedule No. 1. The presently effective rate under said contract is in effect subject to refund in Docket No. RI60-276.[1] Kerbs is a co-respondent in said proceeding with respect to sales made pursuant to the contract designated as Johnson's FPC Gas Rate Schedule No. 2 and redesignated as Kerbs' FPC Gas Rate Schedule No. 2. In addition, Kerbs will be made a co-respondent with respect to sales made pursuant to her FPC Gas Rate Schedule No. 1 as of May 3, 1962, and she will be required to file an agreement and undertaking to assure the refund of any amounts collected by her pursuant to her FPC Gas Rate Schedule No. 1 in excess of the amount determined to be just and reasonable in Docket No. RI60-276.

After due notice a joint petition to intervene by Southern California Gas Company and Southern Counties Gas Company of California was filed on October 5, 1964, in Docket No. CI65-185. A notice of withdrawal was filed on November 27, 1964. No other petition to intervene, notice of intervention, or protest to the granting of any of the respective applications or petitions have been filed.

At a hearing held on December 11, 1964, the Commission on its own motion received and made a part of the record in these proceedings all evidence, including the applications, amendments, and exhibits thereto, submitted in support of the respective authorizations sought herein, and upon consideration of the record,

The Commission finds:

(1) Each Applicant herein is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission or will be engaged in the sale of natural gas in interstate commerce for resale for ultimate public consumption, subject to the jurisdiction of the Commission, and will, therefore, be a "natural-gas company" within the meaning of said Act upon the commencement of the service under the respective authorizations granted hereinafter.

(2) The sales of natural gas hereinbefore described, as more fully described in the respective applications, amendments and/or supplements herein, will be made in interstate commerce, subject to the jurisdiction of the Commission, and such sales by the respective Applicants, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, are subject to the requirements of subsections (c) and (e) of section 7 of the Natural Gas Act.

(3) The sales of natural gas by the respective Applicants, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, are required by the public convenience and necessity and certificates therefor should be issued as hereinafter ordered and conditioned.

(4) The respective Applicants are able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Natural Gas Act and the requirements, rules and regulations of the Commission thereunder.

(5) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the certificate authorizations heretofore issued by the Commission in Docket Nos. G-3833, G-4825, G-14402, G-18041, G-18852, CI60-293, CI62-1135, CI64-960, CI64-1405 and CI65-120 should be amended as hereinafter ordered.

(6) The sales of natural gas proposed to be abandoned by the respective Applicants, as hereinbefore described, all as more fully described in the tabulation herein and in the respective applications, are subject to the requirements of subsection (b) of section 7 of the Natural Gas Act, and such abandonments should be permitted and approved as hereinafter ordered.

(7) The certificates of public convenience and necessity heretofore issued to the Applicants herein, relating to the several abandonments hereinafter permitted and approved should be terminated.

(8) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that the abandonment of service should be permitted and approved in Docket No. CI60-478 and the temporary certificate heretofore issued in said docket should be terminated.

(9) It is necessary and appropriate in carrying out the provisions of the Natural

[1] Consolidated with Docket No. AR61-1, et al.

Gas Act that Jeanne E. Kerbs should be made a co-respondent in the proceeding pending in Docket No. RI60–276 with respect to sales made pursuant to her FPC Gas Rate Schedule No. 1 and that she should be required to file an agreement and undertaking to assure the refund of any amounts collected by her pursuant to said rate schedule in excess of the amount determined to be just and reasonable in Docket No. RI60–276.

(10) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that Southern California Gas Company and Southern Counties Gas Company of California should be permitted to withdraw their joint petition to intervene filed October 5, 1964, in Docket No. CI65–185.

(11) The respective related rate schedules and supplements as designated or redesignated in the tabulation herein, should be accepted for filing as hereinafter ordered.

The Commission orders:

(A) Certificates of public convenience and necessity be and the same are hereby issued, upon the terms and conditions of this order, authorizing the sales by the respective Applicants herein of natural gas in interstate commerce for resale, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary for such sales, all as hereinbefore described and as more fully described in the respective applications, amendments, supplements and exhibits in this consolidated proceeding.

(B) The certificates granted in paragraph (A) above are not transferable and shall be effective only so long as Applicants continue the acts or operations hereby authorized in accordance with the provisions of the Natural Gas Act and the applicable rules, regulations and orders of the Commission.

(C) The grant of the certificates issued in paragraph (A) above shall not be construed as a waiver of the requirements of section 4 of the Natural Gas Act or of Part 154 or Part 157 of the Commission's regulations thereunder, and is without prejudice to any findings or orders which have been or may hereafter be made by the Commission in any proceeding now pending or hereafter instituted by or against the respective Applicants. Further, our action in this proceeding shall not foreclose nor prejudice any future proceedings or objections relating to the operation of any price or related provisions in the gas purchase contracts herein involved. Nor shall the grant of the certificates aforesaid for service to the particular customers involved imply approval of all of the terms of the respective contracts, particularly as to the cessation of service upon termination of said contracts, as provided by section 7(b) of the Natural Gas Act. Nor shall the grant of the certificates aforesaid be construed to preclude the imposition of any sanctions pursuant to the provisions of the Natural Gas Act for the unauthorized commencement of any sales of natural gas subject to said certificate.

(D) The certificate authorizations heretofore granted to the respective Applicants in Docket Nos. G–14402, CI62–1135, CI64–960, CI64–1405 and CI65–120 are hereby amended by adding thereto and deleting therefrom authorization to sell natural gas to the same purchasers and in the same areas as covered by the original authorizations, pursuant to the rate schedule supplements as indicated in the tabulation herein.

(E) The certificates heretofore issued in Docket Nos. G–4825, G–14402 and G–18852 are hereby amended by deleting therefrom authorization granted herein, in Docket Nos. CI65–395, CI65–398 and CI62–1163.

(F) The certificate heretofore issued in Docket No. G–18041 is hereby amended to reflect the sale of gas to Hope Natural Gas Company in lieu of Amere Gas Utilities Company.

(G) The certificates heretofore issued in Docket Nos. G–3833 and CI60–293 are hereby amended by changing the certificate holders to the successors in interest as indicated in the tabulation herein.

(H) Permission for and approval of the abandonment of service by the respective Applicants, as hereinbefore described and as more fully described in the respective applications herein, are hereby granted.

(I) The certificates heretofore issued in Docket Nos. G–2750 and CI64–1064 are hereby granted.

(J) Permission for and approval of the abandonment of service by Applicant in Docket No. CI60–478 is hereby granted and the temporary certificate heretofore issued in said docket is terminated.

(K) Jeanne E. Kerbs be and she is hereby made a co-respondent in the proceeding pending in Docket No. RI60–276 insofar as said proceeding pertains to sales made pursuant to the contract designated as Kerbs' FPC Gas Rate Schedule No. 1 as of May 3, 1962.

(L) Within 30 days from the issuance of this order, Jeanne E. Kerbs shall execute, in the form set out below, and shall file with the Secretary of the Commission, an acceptable agreement and undertaking in Docket No. RI60–276 to assure the refund of any amount, together with interest at the rate of seven percent per annum, collected by her as of May 3, 1962, pursuant to her FPC Gas Rate Schedule No. 1, in excess of the amount determined to be just and reasonable in Docket No. RI60–276. Unless notified to the contrary by the Secretary of the Commission within 30 days from the date of submission, such agreement and undertaking shall be deemed to have been accepted for filing.

(M) Jeanne E. Kerbs shall comply with the refunding and reporting procedure required by the Natural Gas Act and § 154.102 of the regulations thereunder, and Kerbs' agreement and undertaking filed in Docket No. RI60–276 with respect to sales made pursuant to her FPC Gas Rate Schedule No. 1 shall remain in full force and effect until discharged by the Commission.

(N) Southern California Gas Company and Southern Counties Gas Company of California is hereby permitted to withdraw their joint petition to intervene filed on October 5, 1964, in Docket No. CI65–185.

(O) The respective related rate schedules and supplements as indicated in the tabulation herein, are hereby accepted for filing; further, the rate schedules relating to the successions herein, are hereby redesignated and accepted, subject to the applicable Commission regulations under the Natural Gas Act to be effective on the dates indicated in the tabulation herein.

By the Commission.

[SEAL] JOSEPH H. GUTRIDE, *Secretary.*

[1] By Probate Court of Johnson County, Kans., permitting Alice A. Neuner, executrix of the estate to distribute gas leases and other properties of the estate to heirs.
[2] Effective date: Date of transfer of properties.
[3] Assignment to Tan Oil Co.
[4] Assignment to Phillips Petroleum Co.
[5] Effective date: Date of this order.
[6] Petition to amend the certificate to reflect the sale of gas to Hope in lieu of Amere Gas Utilities Co.
[7] The related rate schedules have previously been accepted for filing.
[8] Temporary certificate issued 6-9-60.
[9] Source of gas depleted.
[10] Filing made by predecessor, Tenneco Corp.
[11] Adds acreage and deletes indefinite pricing provisions insofar as they pertain to the additional acreage.
[12] Applicant filed to abandon service to Amere Gas Utilities Co. and to initiate same sale of gas to Hope; subject sale being authorized in docket No. G-19041.
[13] Effective date: Date of initial delivery.
[14] Jake L. Hamon adopts applicant's basic contract and adds his 2 percent interest in the Doby Unit.
[15] Supplement filed 11-4-64.
[16] To Applicant from A. J. Hodges Industries.
[17] Ascher's (predecessor) certificate application and rate schedule were rejected by letters dated 11-19-55 and 7-6-62, respectively, for failure to prove signatory status. F. A. Clark is now a signatory party.
[18] To Applicant from M. Ascher.
[19] Assignment between Atlantic and Phillips Petroleum Co.
[20] Assignment between Atlantic and Tan Oil Co.
[21] Presently in the name of P-T Corp.
[22] Includes letter agreement between Texaco Inc. (successor to P-T Corp., et al.) and Tennessee Gas Transmission Co. terminating contract and assignment whereby Texaco acquired the acreage from P-T Corp.

# FEDERAL TRADE COMMISSION

## MARKETING OF GASOLINE

### Statement Announcing Broad Inquiry Into Problems of Competition

The marketing of automotive gasoline to the public is a matter of direct and immediate concern to every American who owns a car, to the more than one hundred thousand independent retail gasoline dealers, to the producers, refiners, jobbers, and wholesale distributors of gasoline and other petroleum products, and to the nation's economy generally. The Federal Trade Commission has a broad range of responsibilities with respect to the preservation of fair and free competition in such marketing. The Commission is responsible for the prevention of deceptive and misleading advertising of gasoline to the consuming public. It is responsible for preventing discriminatory and other monopolistic and anti-competitive methods and practices in the distribution of gasoline. Most comprehensively, the Commission, in the role of watchdog of the free competitive system, has a responsibility to scrutinize the competitive functioning of the gasoline industry and, if necessary, to take appropriate administrative action within its powers, and recommend legislative or other remedies to such competitive problems as may not be susceptible of effective solution under existing laws and procedures.

The Commission has received a large number of inquiries, complaints, and petitions from various groups in the gasoline industry, from Members of Congress, and from members of the consuming public, with respect to competitive problems in the marketing of gasoline. It is evident both from these submissions and from the Commission's experience in this industry in enforcing the laws which it administers that a broad, comprehensive, and industry-wide approach to the competitive problems of the industry is necessary, and that specific remedial measures required in the public interest should not be attempted before obtaining a solid factual foundation in regard to the competitive conditions of gasoline distribution. As the Supreme Court stated in a recent decision, proper and effective remedial action in this industry requires that the Commission make realistic appraisals of relevant competitive facts, and these facts are highly complex. The Commission has accordingly determined forthwith to institute an industry-wide inquiry into the competitive problems of marketing gasoline. The Commission intends to employ its flexible administrative powers of investigation and fact-finding as may be found necessary to assure a complete, fair, and realistic understanding of the structure and dynamics of competition in the industry.

As the initial step in this inquiry, the Commission will conduct public hearings, to be held before the members of the Commission in Room 532 of the Federal Trade Commission Building, Pennsylvania Avenue and Sixth Street NW., Washington, D.C., commencing at 10:00 a.m., e.s.t., on May 3, 1965. All interested persons, including but not limited to members of the public and of the gasoline industry, are invited to participate in these hearings. Participants are invited to submit data, views, and argument on the following topics: (1) The market structure and competitive behavior of the various segments and levels of the gasoline industry; (2) the pricing of gasoline at all levels of distribution; (3) the causes and effects of so-called "price wars"; (4) competition between branded and unbranded gasoline and between integrated and non-integrated refiners; (5) gasoline grades and qualities, with specific reference to the bearing of gasoline exchange agreements, additives, and octane ratings; (6) other matters pertinent to competition in the marketing of automotive gasoline.

All interested persons are invited to file written data, views, or argument concerning the subject-matter of these hearings with the Secretary of the Federal Trade Commission, Pennsylvania Avenue and Sixth Street NW., Washington, D.C., 20580, not later than April 5, 1965. If practicable, twenty (20) copies of all written submissions should be filed. Any person desiring to present his views orally at the hearings commencing May 3, 1965, should so inform the Secretary of the Commission by April 26, 1965, and also inform the Secretary of the estimated time required for oral presentation. The Commission may impose reasonable limitations upon the time allotted to any person or organization. The data, views, and argument presented orally or in writing will be available for examination by interested persons at the Federal Trade Commission, Washington, D.C.

[SEAL] JOSEPH W. SHEA, *Secretary.*

[F.R. Doc. 64-13358; Filed, Dec. 29, 1964; 8:45 a.m.]

# GENERAL SERVICES ADMINISTRATION

## DELEGATIONS OF AUTHORITY TO CERTAIN OFFICIALS

The following delegations of authority are issued with respect to certain officials of the General Services Administration:

PART A—AUTHORITIES DELEGATED TO ALL ORGANIZATIONAL UNITS IN GSA

HEADS OF CENTRAL OFFICE SERVICES AND STAFF OFFICES AND REGIONAL ADMINISTRATORS

(a) *Documents and instruments.* They shall execute, acknowledge, and deliver appropriate written documents and instruments, including deeds, leases, permits, contracts, receipts, and bills of sale, in connection with the acquisition and disposal of real property, and the disposal of personal property.

(b) *Security instruments.* They shall accept any notes, bonds, mortgages, deeds of trust, or other security instruments taken in consideration, in whole or in part, in connection with the disposal of property.

(c) *Release and discharge of instruments.* They shall perform all acts necessary or proper to release and discharge any security instrument or any lien created thereby or otherwise.

(d) *Transfers of title.* They shall perform any other acts necessary to effectuate the transfer of title to property.

(e) *Advertising.* They shall advertise, give public notice, or determine the manner of advertising, including the authority to publish advertisements or notices in newspapers or other periodicals.

(f) *Noncollusive bidding intent.* They may determine that a disclosure was not made with collusive intent under paragraph (d) of the certification prescribed in Federal Procurement Regulations § 1-1.317 (41 CFR 1-1.317).

PART B—SPECIFIC DELEGATIONS OF AUTHORITY BY THE ADMINISTRATOR OF GENERAL SERVICES

DEPUTY ADMINISTRATOR

*Authorities.* The Deputy Administrator exercises all the authorities vested in the Administrator by the Federal Property and Administrative Services Act of 1949 (63 Stat. 377), as amended, and other applicable statutes and Executive orders, except as limited by section 205(d) of the Act. This authority may not be redelegated.

ASSISTANT ADMINISTRATOR

(a) *Authorities.* The Assistant Administrator, during the absence or disability of both the Administrator and the Deputy Administrator, acts for the Administrator in the performance of the functions of the office of Administrator of General Services.

(b) *Limitation on authority delegated.* The above delegation of authority does not cover any authority that is not delegable under section 205(d) of the Federal Property and Administrative Services Act of 1949, as amended, such as the authority under section 106 to regroup, transfer, and distribute functions within the General Services Administration, and the authority under section 302(a) to delegate authority to another executive agency, nor do they cover any authority that pursuant to other provisions of law is not so delegable.

THE ASSISTANT ADMINISTRATOR FOR FINANCE AND ADMINISTRATION

(a) *Authority to act for the Administrator.* The Assistant Administrator for Finance and Administration, during the absence or disability of the Administrator, Deputy Administrator, and Assistant Administrator acts for the Administrator in the performance of the functions of the office of Administrator of General Services.

(b) *Limitation on authority delegated.* The above delegation of authority does not cover any authority that is not delegable under section 205(d) of the Federal Property and Administrative Services Act of 1949, as amended, such as the authority under section 106 to regroup, transfer, and distribute functions within the General Services Administration; and the authority under section 302(a) to delegate authority to another executive agency, nor do they cover any authority that pursuant to other provisions of law is not so delegable.

(c) *General.* The Assistant Administrator for Finance and Administration, in carrying out his assigned program responsibilities, exercises authority, such as, but not limited to, those stated in paragraph (d), following.

(d) *Authorities*—(1) *Audit of contractors' and subcontractors' records.* Audits the books and records of contractors doing business with GSA, or of any subcontractor engaged by such contractors (40 U.S.C. 481 (a), 41 U.S.C. 254(c)).

(2) *Contracts with public accounting firms and public accountants.* Enters into contracts with recognized public accounting firms and certified public accountants for the performance of audits of GSA's agents and prime contractors and subcontractors (5 U.S.C. 630h(b)).

(3) *Renegotiation Act of 1951.* Exercises all authority contained in Sec. 201 of the Renegotiation Act of 1951 except the authority to issue regulations (50 U.S.C. App. 1231).

(4) *Guaranteed loans.* Authorizes guarantees of loans under the Defense Production Act of 1950, as amended, and otherwise acts on behalf of GSA in connection with such loan guarantee program (50 U.S.C. App. 2091).

(5) *Letters of credit.* Enters into contracts with any bank for the establishment of letters of credit to agents or suppliers of GSA, applies to such banks for the establishment of letters of credit under the terms of such contracts, and, when it is in the interest of the Government, amends and modifies such letters of credit and waives discrepancies in documents presented thereunder.

(6) *Contract financing.* Determines the financial responsibility of contractors, the financial terms and conditions of all forms of contracts, services the financial aspects of contracts, and authorizes advance payments on contracts under the so-called Permanent War Powers Act (50 U.S.C. 1431-1435) and the Defense Production Act of 1950, as amended (50 U.S.C. App. 2094(b)).

(7) *GSA defense production programs.* Determines the financial provisions and borrowing authority requirements of GSA defense production programs (50 U.S.C. App. 2094(b)).

(8) *Certificates of essentiality.* Approves certificates of essentiality in connection with loans made by the Treasury Department and Export-Import Bank of Washington under the Defense Production Act (Sec. 311(b), Executive Order 10281, Aug. 28, 1951, 3 CFR).

(9) *Abaca Production Act of 1950.* Exercises the authority vested in the Administrator under Section 4 of Executive Order No. 10539 in connection with the financial management activities necessary under the Abaca Production Act of 1950 (50 U.S.C. 544).

(10) *Surplus property disposal credit terms.* Approves credit in connection with the disposal of surplus property and the establishment of credit terms and conditions (40 U.S.C. 484(c)).

(11) *Lease or permit credit management.* Administers and manages any credit, lease or permit, and security therefor, and adjusts and settles any right of the Government with respect thereto, and collects all moneys due the Government on account thereof: *Provided,* That such authority shall not apply to (a) supervision of use or occupancy of property including inspections; actions on violations of use restrictions; and termination, amendment, renewal, or restoration obligations relating to leases or permits and (b) any legal action to adjust, enforce, and settle any right of the Government with respect thereto (40 U.S.C. 485(g)).

(12) *Lead and zinc mining stabilization program.* Reviews and evaluates the financial aspects of applications for participation in the Lead and Zinc Mining Stabilization Program and furnishes advice to the operating officials with respect thereto; furnishes financial advice and assistance to operating officials in determination of quotas and limitations (30 U.S.C. 681-689).

(13) *Negotiated contracts with educational institutions.* Negotiates contracts without advertising for any service to be rendered by any university, college, or other educational institution (41 U.S.C. 252(c)(5)).

(14) *Purchases.* Makes purchases of office supplies, equipment, and nonpersonal services, not available from GSA stores stock, or through the use of supply and service contracts executed by FSS. The authority shall include the use of imprest funds and Standard Form 44, Revised, U.S. Government Purchase Order-Invoice-Voucher (41 U.S.C. 252 (c), 252(c)(3)).

(15) *Advertised contracts.* Makes purchases and contracts for operating equipment and supplies by advertising, and determines that the rejection of all bids is in the public interest (41 U.S.C. 252(c), 253(b)).

(16) *Other negotiated contracts.* Negotiates purchases and contracts for operating equipment and supplies without advertising and makes certain determinations in connection therewith (41 U.S.C. 252(c) (1)-(6), (15)).

(17) *Investigations — administering oaths.* Authorizes officers and employees having investigatory functions, while engaged in the performance of their duties in conducting investigations, to administer oaths to any person (40 U.S.C. 486).

GENERAL COUNSEL

(a) *General.* The General Counsel, in carrying out his assigned program re-

sponsibilities, exercises authority, such as, but not limited to, those stated in (b), following.

(b) *Authorities*—(1) *Representation.* Represents executive agencies in proceedings involving carriers and other public utilities before Federal and State regulatory bodies, with respect to transportation and other public utility services for the use of such agencies (40 U.S.C. 481(a)(4)).

(2) *Abandoned, unclaimed, and surplus property.* Considers, ascertains, determines, adjusts, and settles claims in connection with abandoned or unclaimed property; and initiates legal action to enforce, adjust, and settle rights of the Government arising out of the disposition of surplus property (40 U.S.C. 484(m), 485(d), (g)).

(3) *Claims.* Considers, ascertains, determines, adjusts, and settles any claim, demand, or request for adjustment in the nature of a claim, arising out of or incident to any contract, agreement, lease, or permit executed pursuant to competent authority covering the procurement by purchase, condemnation, or otherwise of personal property, real property, and services, or disposal of personal property or real property (other than the authority vested in the contracting officers and the Board of Contract Appeals to decide questions of fact: *Provided, however,* That in connection with any disputed question of fact arising under a contract or agreement, which is the subject of an appeal to the Board of Contracts Appeals, and as to which the trial attorney has determined that the position of the Government cannot be sustained in the proceeding before the Board, but the interested Commissioner has refused to concur with the trial attorney's recommendation, forwarded through the appropriate Assistant General Counsel, that settlement be effected, the matter shall be submitted to the General Counsel who shall have final authority to determine the Government's position, including the authority to settle or adjust any such matter), and any claim under the Federal Tort Claims Act, and any claim in tort by GSA on behalf of the Government. (40 U.S.C. 481(a), 484(a), (b), (c); 5 U.S.C. 603h (b), 40 U.S.C. 490(a)(12), (b), (c); 28 U.S.C. 2672).

(4) *Certification of delegations and redelegations of authority.* Certifies true copies of delegations of authority by the Administrator and redelegations of authority by other GSA officials and provides such further certification as may be necessary to effectuate the intent of such delegations in form for recording in any jurisdiction, as may be required (40 U.S.C. 486 (d), (e)).

(5) *Disposal.* Notifies the Attorney General for the purpose of obtaining appropriate antitrust advice of proposed disposals, and the probable terms or conditions thereof, and furnishes information related thereto (40 U.S.C. 488).

(6) *Forfeitures.* Applies for court order for delivery of property subject to forfeiture proceedings under Sec. 304 of the Act of August 27, 1935 (40 U.S.C. 304l).

(7) *Appointment of special counsel.* In connection with functions transferred to and vested in the Administrator by Reorganization Plan No. 1 of 1957, engages and directs the services of private or special counsel and experts, establishes fees or compensation for, and approves vouchers, invoices, or statements submitted incident to, such services, and approves fees and expenses of witnesses for payment (Sec. 2, 71 Stat. 647, 5 U.S.C. 133z–15, note).

COMMISSIONER, DEFENSE MATERIALS SERVICE

(a) *General.* The Commissioner, DMS, in carrying out his assigned program responsibilities exercises authority, such as but not limited to those stated in (b), following.

(b) *Authorities*—(1) *Procurement and supply.* Procures and supplies personal property and nonpersonal services for the use of executive agencies and performs functions related to such procurement and supply; and, upon its request, provides these services to any Federal agency, mixed-ownership.

(2) *Agency head.* The Commissioner, DMS, is designated as an agency head for the purposes of Title III of the Federal Property and Administrative Services Act of 1949, as amended (41 U.S.C. 259(a)).

(3) *Negotiated contracts.* Negotiates purchases and contracts for property and services without advertising and makes any determinations and decisions required in connection therewith (41 U.S.C. 252(c)(1) through (15)). In connection with the negotiation of purchases or contracts which should not be publicly disclosed, and purchases or contracts which are to be negotiated in order to assure standardization of equipment and interchangeability of parts, the authority to make the determinations and decisions is not redelegable. In connection with the negotiation of purchases or contracts for experimental, developmental, or research work, or for the manufacture or furnishing of property for experimentation, development, research, or test, the authority to make the determinations or decisions is redelegable only to a chief officer responsible for procurement and only with respect to contracts which will not require the expenditure of more than $25,000 (41 U.S.C. 252(c), 257(b)).

(4) *Advertised contracts.* Makes purchases and contracts for property and services by advertising, and determines that the rejection of all bids is in the public interest (41 U.S.C. 252(c), 253(b)).

(5) *Type of negotiated contract.* Determines the type of negotiated contract which will promote the best interests of the Government and makes the determinations required in connection with cost, cost-plus-a-fixed-fee, and incentive-type contracts (41 U.S.C. 254(a), 254(b)).

(6) *Advance and other payments.* Makes advance, partial, progress, or other payments under contracts for property or services and makes the determinations and decisions required in connection therewith (41 U.S.C. 255(a)).

(7) *Renegotiation Board Regulations.* Determines that a contract has a direct and immediate connection with the national defense pursuant to the Renegotiation Board Regulations. This authority is not redelegable (32 CFR 1453.5(c)).

(8) *Buy American Act.* Determines whether articles, materials, or supplies of the class or kind to be used, or the articles, materials, or supplies from which they are manufactured are mined, produced, or manufactured in the United States in sufficient and reasonable available commercial quantities and of a satisfactory quality, and determines, as a condition precedent to the purchase of materials of foreign origin for public use within the United States, that the price of like materials of domestic origin is unreasonable or that the purchase of like materials of domestic origin is inconsistent with the public interest, under the provisions of 41 U.S.C. 10a and Executive Order No. 10582 of December 17, 1954, as amended, and makes the findings pursuant to 41 U.S.C. 10b (41 U.S.C. 10a, 10b).

(9) *Contracts facilitating the national defense.* Enters into contracts or into amendments or modifications of contracts heretofore or hereafter made, and makes advance payments thereon, without regard to other provisions of law relating to the making, performance, amendment, or modification of contracts, whenever he determines that any such action would facilitate the national defense, subject to the limitations specified in Public Law 85–804 (50 U.S.C. 1431).

(10) *Purchase of strategic and critical materials.* Purchases strategic and critical materials (50 U.S.C. 98b(a)).

(11) *Disposal.* Disposes of any stockpile materials which are no longer needed because of revised determinations by the Office of Emergency Planning and sells or otherwise disposes of materials released from the stockpile for use, sale, or other disposition for the purposes of common defense, or in time of war or during a national emergency (50 U.S.C. 98b(e); 50 U.S.C. 98d; E.O. 11051).

(12) *Exchange.* Accepts strategic or critical materials in lieu of cash in connection with the lease, sale, or other disposition of surplus property (40 U.S.C. 485(f)).

(13) *Defense Production Act of 1950.* Executes the following authorities of the Administrator under section 303 of the Defense Production Act of 1950, as amended (50 U.S.C. App. 2093), in accordance with programs certified by the Director of the Office of Emergency Planning:

(i) Purchases and makes commitments to purchase metals, minerals, and other material for Government use or resale (50 U.S.C. App. 2093(a)).

(ii) Determines the quantities, terms, and conditions including advance payments, and periods of such purchases, commitments to purchase, and sales (50 U.S.C. App. 2093(b)).

(iii) Makes provision for subsidy payments, determines the amounts, manner, terms, and conditions thereof, and makes findings required in connection therewith (50 U.S.C. App. 2093(c)).

(iv) Encourages the exploration, development, and mining of strategic and critical metals and minerals, in accordance with policy directives issued by the Director of the Office of Emergency Planning, in connection with foreign projects which were under the jurisdiction of the Administrator on November 12, 1954, and in carrying out any program certified to the Administrator by the Director of the Office of Emergency Planning (50 U.S.C. App. 2093).

(14) *Tax amortization.* Screens and makes recommendations to the Office of Emergency Planning on requests for tax amortization and on procurement contracts with respect to the aspects of production and processing of metals and minerals assigned to the Secretary of the Interior by the Office of Emergency Planning (32A CFR ch. I).

(15) *Purchases with foreign currencies.* Purchases or contracts for the purchase, with foreign currencies, of materials for the supplemental stockpile, in accordance with programs certified by the Office of Emergency Planning, pursuant to section 104(b) of the Agricultural Trade Development and Assistance Act of 1954, as amended; Executive Order No. 10900 of January 5, 1961, as amended; and Executive Order No. 11051 of September 27, 1962, and Delegation of Authority from the Director of the Office of Emergency Planning (7 U.S.C. 1704(b)); (DMO 8600.1) (29 F.R. 5076).

(16) *Industrial equipment.* Accepts the transfer of and provides for the handling, care, storage, protection, maintenance, utilization, repair, restoration, renovation, lending, leasing, and disposition of excess machine tools and industrial manufacturing equipment, except such tools and equipment as are part of an industrial plant, as directed by the Secretary of Defense (50 U.S.C. 451–462).

(17) *Lead and zinc mining stabilization program.* Pursuant to delegation of authority by the Secretary of the Interior in accordance with the provisions of Public Law 87–347, establishes and maintains a program of stabilization payments to small domestic producers of lead and zinc ores and concentrates, and makes such determinations required by sections 2, 3, and 6 of the Act (30 U.S.C. 681–689; 27 F.R. 7432).

COMMISSIONER, FEDERAL SUPPLY SERVICE

(a) *General.* The Commissioner, FSS, in carrying out his assigned program responsibilities, exercises authority, such as, but not limited to, those stated in (b), following.

(b) *Authorities*—(1) *Procurement and supply.* Procures and supplies personal property and nonpersonal services for the use of executive agencies and performs functions related to such procurement and supply, such as contracting, inspection, storage, issue, property identification and classification; and, upon its request, provides these services to any Federal agency, mixed-ownership corporation, the District of Columbia, the Senate, the House of Representatives, or the Architect of the Capitol (40 U.S.C. 481(a)(3), 481(b), 474).

(2) *Medicines and medical property for resale.* Makes determinations as to the suitability of advance publicity, with due regard to the type of property involved and other relevant considerations, and makes determinations as to the practicability of giving such publicity for a period of at least fifteen days, in connection with contracts or purchases in excess of $10,000 negotiated for medicines or medical property or property purchased for authorized resale (41 U.S.C. 252(b)).

(3) *Agency head.* Acts as an "agency head" for the purposes of Title III, of the Federal Property and Administrative Services Act of 1949, except for the making of delegations or determinations specified in section 302(a) (41 U.S.C. 259(a)).

(4) *Negotiated contracts.* Negotiates purchases and contracts for property and services without advertising, and makes any determinations and decisions required in connection therewith (41 U.S.C. 252(c)(1) through (15)). In connection with the negotiation of purchases or contracts which should not be publicly disclosed, and purchases or contracts which are to be negotiated in order to assure standardization of equipment and interchangeability of parts, the authority to make the determinations and decisions is not redelegable. In connection with the negotiation of purchases or contracts for experimental, developmental, or research work, or for the manufacture or furnishing of property for experimentation, development, research, or test, the authority to make the determinations or decisions is redelegable only to a chief officer responsible for procurement and only with respect to contracts which will not require the expenditure of more than $25,000 (41 U.S.C. 252(c)).

(5) *Advertised contracts.* Makes purchases and contracts for property and services by advertising and determines that the rejection of all bids is in the public interest (41 U.S.C. 252(c), 253(b)).

(6) *Type of negotiated contract.* Determines the type of negotiated contract which will promote the best interests of the Government and makes the determinations required in connection with cost, cost-plus-a-fixed-fee, and incentive-type contracts (41 U.S.C. 254(a), (b)).

(7) *Advance and other payments.* Determines that it would be in the public interest to make advance payments under contracts for property or services; makes advance, partial, progress or other payments under contracts for property or services; and inserts in bid solicitations for procurement of property or services provision limiting to small business concerns advance or progress payments (41 U.S.C. 255(a), (c)).

(8) *Renegotiation Board Regulations.* Determines that a contract has a direct and immediate connection with the national defense pursuant to the Renegotiation Board Regulations. This authority is not redelegable (32 CFR 1453.5(c)).

(9) *Buy American Act.* Determines whether articles, materials, or supplies of the class or kind to be used or the articles, materials, or supplies from which they are manufactured are mined, produced, or manufactured in the United States in sufficient and reasonably available commercial quantities and of a satisfactory quality, and determines, as a condition precedent to the purchase of materials of foreign origin for public use within the United States, that the price of like materials of domestic origin is unreasonable, or that the purchase of like materials of domestic origin is inconsistent with the public interest, under the provisions of 41 U.S.C. 10a, and Executive Order No. 10582 of December 17, 1954, and makes the findings pursuant to 41 U.S.C. 10b (41 U.S.C. 10a, 10b).

(10) *Customs Regulations.* Executes certificates required in support of drawback entries pursuant to Customs Regulations, endorses export bills of lading, and executes certificates of exportation (19 CFR 22.37).

(11) *Exchange.* Exchanges or sells similar items and applies the exchange allowance or proceeds of sale in whole or part payment for the property acquired (40 U.S.C. 481(c)).

(12) *Gifts.* Accepts or rejects on behalf of the United States, any gift of tangible personal property made on condition that it be used for a particular defense purpose (50 U.S.C. 1151).

(13) *Contracts facilitating the national defense.* Enters into contracts and into amendments or modifications of contracts heretofore or hereafter made, and approves advance, progress, and other payments thereon, without regard to the provisions of law relating to the making, performance, amendment, or modification of contracts, including authority to modify, or amend, or settle, by agreement, claims under contracts heretofore or hereafter made; approves advance, progress, and other payments upon such contracts and enters into agreements with contractors or obligors modifying or releasing accrued obligations of any sort, including accrued liquidated damages or liability under surety or other bonds, and determines that any such action would facilitate the national defense (50 U.S.C. 1431–1435 and Executive Order No. 10789 of November 14, 1958).

(14) *Product testing.* With the consent of the producers or vendors, causes tests to be conducted, in such manner as he may specify, either to determine whether articles or commodities tendered by such producers or vendors for sale or lease to GSA conform to prescribed specifications and standards, or to aid in the development of contemplated specifications and standards; determines whether the making of such tests will serve predominantly the interest of such producers or vendors; fixes fees in such amounts as will recover the cost of conducting such tests when he determines that the making of such tests will serve predominantly the interest of such producers or vendors; fixes fees in such amounts as he determines reasonable for the furnishing of such testing service when he determines that the making of such tests will not serve predominantly the interest of such producers or vendors; and charges fees as so fixed to, and collects them from, such producers or vendors (5 U.S.C. 630g(g)).

(15) *Major disaster functions.* Exercises the following functions assigned to the Administrator in any major disaster pursuant to 42 U.S.C. 1855–1855g, Executive Order No. 10427 of January 16,

1953, as amended, and Executive Order No. 10737 of October 29, 1957, as amended:

(a) Utilizes or lends to States and local governments GSA equipment, supplies, facilities, personnel, and other resources (other than the extension of credit).

(b) Distributes medicine, food, and other consumable supplies.

ARCHIVIST OF THE UNITED STATES

(a) *General.* The Archivist of the United States, in carrying out his assigned program responsibilities, exercises authority, such as, but not limited to, those stated in (b), following.

(b) *Authorities*—(1) *Restriction in use of records.* Imposes, relaxes, or removes restrictions on the use of records, papers, documents, or other historical materials transferred to GSA, subject to prescribed limitations (44 U.S.C. 397 (b), (e), (f)).

(2) *Acceptance of material.* Accepts for deposit and directs and effects the transfer of documents and other materials, including motion picture films, still pictures, and sound recordings, from private sources, that are appropriate for preservation by the United States Government (44 U.S.C. 397 (a) (4), (e) (2)).

(3) *Management and publication.* Preserves, arranges, repairs and rehabilitates, duplicates and reproduces (including the making of microcopy reproductions), describes, exhibits, and services records or other documentary material transferred to GSA; prepares and publishes inventories, indexes, catalogs and other finding aids or guides facilitating the use of records transferred to GSA; and prepares guides and other finding aids to Federal records and, when approved by the National Historical Publications Commission, publishes such historical works and collections as seem appropriate for printing or otherwise recording at the public expense (44 U.S.C. 397(c), (d), 401(c)).

(4) *Authentication and reproduction.* Authenticates, certifies, and furnishes copies or reproductions of records and other materials deposited with the National Archives of the United States, Federal records centers, and Presidential depositories; charges fees and accepts reimbursement therefor; and deposits such fees and reimbursement into the National Archives Trust Fund (44 U.S.C. 399 (b), (c), 401(c)).

(5) *Transfer of records.* Transfers, with the approval of the head of the originating agency (or his successor in functions, if any), records deposited (or approved for deposit) with the National Archives of the United States to public or educational institutions or associations (44 U.S.C. 397(a)(3)).

(6) *Motion pictures and sound recordings.* Makes and preserves appropriate motion picture films, still pictures, and sound recordings, pertaining to and illustrative of the United States Government and its activities; and releases for nonprofit educational purposes motion picture films, still pictures, and sound recordings in the National Archives (44 U.S.C. 397(1)).

(7) *Negotiated contracts.* Negotiates purchases and contracts for property and services without advertising, and makes certain determinations and decisions required in connection therewith (41 U.S.C. 252(c) (1), (3), (4), (5), (15)).

(8) *Type of negotiated contract.* Determines the type of negotiated contract which will promote the best interests of the Government (41 U.S.C. 254(a)).

(9) *National Archives Trust Fund.* Exercises any authority vested in the Administrator relating to the execution of certified vouchers or the sale of publications under section 5 of the National Archives Trust Fund Board Act, as amended (44 U.S.C. 300ee).

(10) *Presidential historical materials.* Accepts for deposit and directs and effects the transfer of personal papers and other historical materials of any President or former President of the United States, or any other official or former official of the Government, and other papers relating to and contemporary with any President or former President of the United States (44 U.S.C. 397(a) (4), (e) (1)).

(11) *Presidential libraries.* Maintains, operates, and protects Presidential archival depositories; charges and collects reasonable fees for the privilege of visiting and viewing any exhibit room or museum space in any Presidential archival depository; accepts gifts or bequests of money or other property; and expends, under the provisions of section 5 of the National Archives Trust Fund Board Act, as amended (44 U.S.C. 300ee), funds paid into National Archives Trust Fund, for the benefit of the Presidential archival depository in connection with which they were received, including administrative and custodial expenses (44 U.S.C. 397(f) (1), (3), (5), (7)).

(12) *Cooperation with educational institutions.* Cooperates with and assists universities, institutions of higher learning, institutes, foundations, or other organizations or qualified individuals to conduct study or research in any historical materials deposited in Presidential archival depositories (44 U.S.C. 397(f) (4)).

(13) *Federal Register.* Exercises, in accordance with the provisions of the Federal Register Act, as amended, and the regulations of the Administrative Committee of the Federal Register, any authority of the Administrator relating to the custody, filing for public inspection, and publication of documents in the FEDERAL REGISTER, and publication of the U.S. Government Organization Manual, the Code of Federal Regulations, Public Papers of the Presidents, and other supplemental editions of the FEDERAL REGISTER (44 U.S.C. 301–314).

(14) *Acts of Congress.* Exercises any authority of the Administrator relating to the receipt, custody, and publication of the Acts of Congress (1 U.S.C. 106a, 112; 44 U.S.C. 191a, 192, 197).

(15) *Constitution of the United States.* Exercises any authority of the Administrator relating to publication, certification, and adoption of amendments to the Constitution of the United States (1 U.S.C. 106b).

(16) *Presidential electoral vote.* Exercises, in accordance with the provisions of the Act of June 25, 1948, as amended, any authority of the Administrator relating to the receipt, custody, and filing for public inspection of the Presidential electoral vote of the several States, and any authority of the Administrator relating to receipt, custody, and filing for public inspection of credentials of electors of President or Vice President (3 U.S.C. 6).

(17) *State compacts.* Receives duplicate originals or duly authenticated copies of agreements or compacts entered into, pursuant to the Constitution of the United States, between States now or hereafter admitted to the Union, and preserves and services them (44 U.S.C. 397(h)).

COMMISSIONER, PUBLIC BUILDINGS SERVICES

(a) *General.* The Commissioner, PBS, in carrying out his assigned program responsibilities exercises authority, such as, but not limited to, those stated in (b), following.

(b) *Authorities*—(1) *Outleasing.* Enters into leases of Federal Building sites and additions to sites, including improvements thereon, and specifies the terms and conditions deemed necessary in the public interest (40 U.S.C. 490(a) (13)).

(2) *Acquisition.* Acquires by purchase, condemnation, donation, exchange, transfer of jurisdiction, or otherwise, real property or interests therein. (40 U.S.C. 490(a) (12), 490(c); 40 U.S.C. 257, 258 a, c, e, 298a, 602, 604, 605; 50 U.S.C. 1151; 40 U.S.C. 122; 45 Stat. 1415, as amended, D.C. Code (1961 edition) Secs. 16–619 to 644).

(2) *Exchange or sale of buildings and sites.* (i) Utilizes a site on which there is a building for construction of a new public building by demolition of the existing building or exchanges such building and site, or such site, for another site (40 U.S.C. 605(a)).

(ii) Determines that a site acquired for the construction of a public building is not suitable for that purpose and exchanges such site for another. (40 U.S.C. 605(b)).

(3) *Highways, streets, and alleys.* (i) Makes the determination and secures agreements concerning the closing and vacating of streets and alleys in the District of Columbia (40 U.S.C. 607(c)).

(ii) Performs the functions required under 23 U.S.C. 107 and 317 relating to GSA property determined to be necessary for highway purposes.

(iii) Conveys or otherwise transfers, pursuant to 40 U.S.C. 345c, interests in real property under the control of GSA for an authorized widening of public highway, street, or alley.

(4) *Acquisition by lease.* Acquires space for GSA and other agencies by lease, assigns and reassigns space therein, and obtains, when appropriate, reimbursement therefor (40 U.S.C. 304, 304c note 490(h)(1)).

(5) *Easements.* Grants easements in, over, or upon real property under the control of GSA for right-of-way or other purpose (40 U.S.C. 319).

(6) *Ground rent.* Approves payment of ground rent for buildings owned by the United States or occupied by Federal agencies, and approves payment of such rent in advance when required by law or determines such to be in the public interest (40 U.S.C. 490(a)(3)).

(7) *Permits and licenses.* Issues permits and licenses, revocable at will, for the use of GSA lands and buildings, and makes the determination that the Government's interest will be subserved thereby (22 Ops. Atty. Gen. 240).

(8) *Uniforms.* Purchases, repairs, and cleans uniforms for civilian employees of GSA (40 U.S.C. 490(a)(1)).

(9) *Procurement and supply.* Procures and supplies personal property and nonpersonal services for the use of executive agencies and performs functions related to such procurement and supply and, upon its request, provides these services to any Federal agency, mixed-ownership corporation, or the District of Columbia (40 U.S.C. 481(a)(3), 481(b)).

(10) *Major disaster functions.* Exercises the authority of the Administrator in any major disaster pursuant to 42 U.S.C. 1855–1855g, Executive Order No. 10427 of January 16, 1953, as amended, and Executive Order No. 10737 of October 29, 1957, as amended, to perform protective and other work on public or private lands essential for the preservation of life and property, clearing debris and wreckage, making emergency repairs to and temporary replacements of public facilities of local governments damaged or destroyed.

(11) *Employment of architects and engineers.* Employs, by contract or otherwise, the services of established architectural or engineering corporations, firms, or individuals (40 U.S.C. 609).

(12) *Construction and alteration of public buildings.* Constructs and alters public buildings, including the interpretation of construction contracts, the approval of materials and workmanship supplied pursuant to a construction contract, approval of changes in the construction contract, certification of vouchers for payments due the contractor, and final settlement of the contract (40 U.S.C. 128, 601, 603(a), 608, 609, 612).

(13) *Agency head.* Acts as an "agency head" for the purposes of Title III of the Federal Property and Administrative Services Act of 1949, except for the making of delegations or determinations specified in section 302(a) (41 U.S.C. 259(a)).

(14) *Negotiated contracts.* Negotiates purchases and contracts for property and services without advertising and makes any determinations and decisions required in connection therewith (41 U.S.C. 252(c) (1) through (15)). In connection with contracts or purchases in excess of $10,000 negotiated for medicines or medical property, or property purchased for authorized resale, makes the determinations and gives the publicity required by 41 U.S.C. 252(b). In connection with the negotiation of purchases or contracts which should not be publicly disclosed, and purchases or contracts which are to be negotiated in order to assure standardization of equipment and interchangeability of parts, the authority to make the determinations and decisions is not redelegable. In connection with the negotiation of purchases or contracts for experimental, developmental, or research work, or for the manufacture or furnishing of property for experimentation, development, research, or test, the authority to make determinations or decisions is redelegable only to a chief officer responsible for procurement and only with respect to contracts which will not require the expenditure of more than $25,000 (41 U.S.C. 252(c)).

(15) *Advertised contracts.* Makes purchases and contracts for property and services by advertising, and determines that the rejection of all bids is in the public interest (41 U.S.C. 252(c), 253(b)).

(16) *Testing.* Exercises authority relating to conducting tests, making charges and fixing fees therefor (5 U.S.C. 630g(g)).

(17) *Type of negotiated contract.* Determines the type of negotiated contract which will promote the best interests of the Government and makes the determinations required in connection with cost, cost-plus-a-fixed-fee, and incentive-type contracts (41 U.S.C. 254 (a), (b)).

(18) *Advance payments.* Approves advance payments and makes the determinations and decisions required in connection therewith. This authority is not redelegable (41 U.S.C. 255 (a), (c)).

(19) *Buy American Act.* Determines whether articles, materials, or supplies of the class or kind to be used or the articles, materials, or supplies from which they are manufactured are mined, produced, or manufactured in the United States in sufficient and reasonably available commercial quantities and of a satisfactory quality, and determines, as a condition precedent to the purchase of materials of foreign origin for public use within the United States, that the price of like materials of domestic origin is unreasonable, or that the purchase of like materials of domestic origin is inconsistent with the public interest, under the provisions of 41 U.S.C. 10a and Executive Order No. 10582 of December 17, 1954, and makes the findings pursuant to 41 U.S.C. 10b (41 U.S.C. 10a, 10b).

(20) *Lease-purchase contracts.* Makes the determinations, enters into purchase contracts and other agreements, and exercises the other powers and authorities granted in sections 411 and 412 of the Public Buildings Act of 1949, as amended, added by the Public Buildings Purchase Contract Act of 1954, and by the Act approved July 12, 1955 (40 U.S.C. 356, 356a).

(21) *Contracts facilitating the national defense.* Enters into contracts and into amendments or modifications of contracts heretofore or hereafter made, and approves advance, progress, and other payments thereon, without regard to the provisions of law relating to the making, performance, amendment, or modification of contracts, including authority to modify or amend or settle, by agreement, claims under contracts heretofore or hereafter made; approves advance, progress, and other payments upon such contracts and enters into agreements with contractors or obligors modifying or releasing accrued obligations of any sort, including accrued liquidated damages or liability under surety or other bonds, and determines that any such action would facilitate the national defense (50 U.S.C. 1431–1435, and Executive Order No. 10789 of November 14, 1958).

(22) *Renegotiation Board Regulations.* Determines that a contract has a direct and immediate connection with the national defense pursuant to the Renegotiation Board Regulations. This authority is not redelegable (32 CFR 1453.5(c)).

COMMISSIONER, TRANSPORTATION AND COMMUNICATION SERVICE

(a) *General.* The Commissioner, TCS, in carrying out his assigned program responsibilities, exercises authority, such as, but not limited to, those stated in (b), following.

(b) *Authorities*—(1) *Procurement.* Procures and supplies personal property and nonpersonal services for the use of executive agencies and performs functions related to such procurement and supply; and, upon its request, provides these services to any Federal agency, mixed-ownership corporation, the District of Columbia, the Senate, the House of Representatives, or the Architect of the Capitol (40 U.S.C. 481(a)(3), 481 (b), 474; 50 U.S.C. 491; 5 U.S.C. 630g–1).

(2) *Agency head.* Acts as an "agency head" for the purposes of Title III, Federal Property and Administrative Services Act of 1949, except for the making of delegations or determinations specified in section 302(a) (41 U.S.C. 259(a)).

(3) *Negotiated contracts.* Negotiates purchases for property and services without advertising, and makes any determinations and decisions required in connection therewith (41 U.S.C. 252(c) (1) through (15)). In connection with the negotiation of purchases or contracts which should not be publicly disclosed, and purchases or contracts which are to be negotiated in order to assure standardization of equipment and interchangeability of parts, the authority to make the determinations and decisions is not redelegable. In connection with the negotiation of purchases or contracts for experimental, developmental, or research work, or for the manufacture or furnishing of property for experimentation, development, research, or test, the authority to make the determinations or decisions is redelegable only to a chief officer responsible for procurement and only with respect to contracts which will not require the expenditure of more than $25,000 (41 U.S.C. 252(c)).

(4) *Advertised contracts.* Makes purchases and contracts for property and services by advertising, and determines that the rejection of all bids is in the public interest (41 U.S.C. 252(c), 253(b)).

(5) *Type of negotiated contract.* Determines the type of negotiated contract which will promote the best interests of the Government and makes the determinations required in connection with cost, cost-plus-a-fixed-fee, and incentive type contracts (41 U.S.C. 254(a), 254 (b)).

(6) *Transportation of strategic and critical materials.* Negotiates and exe-

cutes all contracts for transportation or related services arising under:

(i) The Strategic and Critical Materials Stock Piling Act or the Defense Production Act of 1950, as amended (50 U.S.C. 98; 50 U.S.C. App. 2061).

(ii) The supplemental stockpile, pursuant to the Agricultural Trade Development and Assistance Act of 1954, as amended, Executive Order No. 10560 of September 9, 1954, and Delegation of Authority from the Director of the Office of Civil and Defense Mobilization, dated November 17, 1954 (7 U.S.C. 1691 et seq.; DMO V–4, 32A CFR Ch. 1).

(iii) The agreement between Commodity Credit Corporation and GSA relating to services to be furnished by GSA with respect to strategic materials acquired by Commodity Credit Corporation through barter of surplus agricultural commodities.

(7) *Agency representation.* Represents executive agencies (including GSA) in negotiations with carriers and other public utilities involving transportation, communications, and other public utilities services.

(8) *Motor vehicle pools and equipment.* Consolidates, takes over, acquires, or arranges for the operation by any executive agency of, motor vehicles and other related equipment and supplies, for the establishment of motor vehicle pools and systems, pursuant to determinations made by the Administrator, and carries out the procedures established by the President, for the taking effect of these determinations (40 U.S.C. 491(b)(1), 491(c)).

(9) *Motor vehicle services.* Determines whether motor vehicle and related services will be furnished through the use, under rental or other arrangements, of motor vehicles of private fleet operators, taxicab companies, local or interstate common carriers, or Government-owned vehicles, or combinations thereof, and carries out the procedures established by the President for the taking effect of these determinations (40 U.S.C. 491(b)(2), 491(c)).

(10) *Procurement of telecommunications services.* Administers the Federal Telecommunications Fund for procuring and providing telecommunications services and facilities for the use of Federal agencies in the proper discharge of their responsibilities (5 U.S.C. 630g–1).

(11) *Civil defense.* Provides GSA personnel, materials, and facilities to the Director of the Office of Emergency Planning, during the period of any civil defense emergency, for the aid of the States, and prepares civil emergency plans, in consultation with the Office of Emergency Planning, pursuant to the Federal Civil Defense Act of 1950, as amended, and Executive Order No. 10346 of April 17, 1952, as amended.

COMMISSIONER, UTILIZATION AND DISPOSAL SERVICE

(a) *General.* The Commissioner, UDS, in carrying out his assigned program responsibilities, exercises authority, such as, but not limited to, those stated in (b), following.

(b) *Authorities*—(1) *Advertised contracts.* Makes purchases and contracts for property and services by advertising, and determines that the rejection of all bids is in the public interest (40 U.S.C. 481(a)(3); 41 U.S.C. 252(c), 253(b)).

(2) *Negotiated contracts.* Negotiates purchases and contracts for property and services without advertising, and makes certain determinations and decisions required in connection therewith (41 U.S.C. 252(c)(1), (2), (3), (4), (5), (10)).

(3) *Type of negotiated contract.* Determines the type of negotiated contract which will promote the best interests of the Government and makes the determinations required in connection with cost, cost-plus-a-fixed-fee, and incentive-type contracts (41 U.S.C. 254(a), (b)).

*Personal Property*

(4) *Surplus personal property generally.* Determines property surplus, disposes of surplus property, assumes custody and accountability of surplus property, and performs, or provides for the performance of, the care and handling of surplus property (40 U.S.C. 472(g), 484(a), (b), (c), (e)).

(5) *Abandonment, destruction, or donation to public bodies.* Authorizes abandonment, destruction, or donation of property to public bodies, and makes any determinations and findings incident thereto (40 U.S.C. 483(h)).

(6) *Credit and security.* Prescribes and utilizes appropriate terms and conditions for disposals of surplus property by GSA and grants credit and takes security in connection with any disposal of surplus property authorized (40 U.S.C. 484(c)).

(7) *Auctioneers.* Qualifies, retains, inactivates, and reinstates private auctioneers and auction service organizations for the sale of Government-owned surplus personal property: *Provided,* That such authority shall not include the authority to decide appeals to the Administrator against nonqualification or inactivation (40 U.S.C. 484(a), (c)).

(8) *Negotiated sales.* Makes negotiated sales at fixed prices, either directly or through the use of disposal contractors, of such categories of surplus personal property as the Administrator determines (40 U.S.C. 484(e)(5)).

(9) *Donation.* Donates surplus property for purposes of education, public health, or civil defense, or for research for any such purpose, and donates certain surplus property to the American National Red Cross (40 U.S.C. 484(j)(1), 484(l)).

(10) *Leases and permits.* Administers and manages leases and permits, where disposal has been by lease or permit, and deferred payment sales: *Provided,* That such authority shall not apply to (a) collections or security servicing and (b) any legal action to adjust, enforce, and settle any claim arising thereunder (40 U.S.C. 485(g)).

(11) *Abandoned and unclaimed property.* Utilizes, transfers, or disposes of, abandoned and other unclaimed property (40 U.S.C. 484(m)).

(12) *Abandoned, forfeited, or seized property.* Exercises authority of the Administrator covering the disposition of abandoned, forfeited, or seized property, under the Act of August 27, 1935 (40 U.S.C. 304 f–m), and sections 5862(b) and 5688(a) of the Internal Revenue Code of 1954 (26 U.S.C. 5862(b), 5688(a)): *Provided,* That such authority shall not include the authority to require reports from other agencies, to make rules and regulations, and to apply for a court order.

(13) *Disaster orders.* Exercises the following authorities of the Administrator as prescribed by the Disaster Orders issued from time to time by the Office of Emergency Planning pursuant to 42 U.S.C. 1855–1855g, Executive Order No. 10427 of January 16, 1953, as amended, Executive Order No. 10737 of October 29, 1957, as amended, and Executive Order No. 11051 of September 27, 1962:

(i) Enters into and executes memoranda of understanding with duly authorized officials of any State within a major disaster area which has been designated by the President, and with duly authorized representatives of the Office of Emergency Planning, to the end that GSA may appropriately assist in providing surplus supplies and equipment for the relief of small businesses whose places of business have been damaged or destroyed by major disaster.

(ii) Carries out and fulfills all commitments properly made and obligations properly undertaken by GSA by virtue of such memoranda of understanding.

(14) *Major disaster functions.* Exercises the following functions assigned to the Administrator in any major disaster pursuant to 42 U.S.C. 1855–1855g, Executive Order No. 10427 of January 16, 1953, as amended, Executive Order No. 10737 of October 29, 1957, as amended, and Executive Order No. 11051 of September 27, 1962:

(i) Utilizes, or lends to States and local governments, GSA equipment, supplies, facilities, personnel, and other resources (other than the extension of credit).

(ii) Distributes medicine, food, and other consumable supplies.

(iii) Donates surplus equipment and supplies to States for use or distribution by them.

(15) *Civil defense.* Performs civil defense responsibilities delegated by the Director of the Office of Emergency Planning and the Secretary of Defense and cooperates with the Office of Emergency Planning and the Department of Defense pursuant to the Federal Civil Defense Act of 1950, as amended (50 U.S.C. App. 2251–2297).

(16) *Gifts.* Converts into money, at the best terms available, any gift of tangible personal property, made on condition that it be used for a particular defense purpose, or transfers to any other Federal agency without reimbursement such property as he may determine usable for the particular purpose for which it was donated (50 U.S.C. 1152).

(17) *Disposal for public airport.* Exercises authority of the Administrator to approve or disapprove disposal of any surplus property to any State, political subdivision, municipality, or tax-supported institution, for public airport purposes, upon appropriate determination of the Administrator of the Federal Aviation Agency (50 U.S.C. App. 1622(g)).

(18) *Sale of firearms.* Exercises authority of the Administrator to approve or disapprove the sale of firearms to State or local governments (40 U.S.C. 484(a)).

(19) *Disposition to States.* Approves or disapproves the making available to State surplus property distribution agencies for their use of surplus property which has been approved for donation for purposes of education, public health, or civil defense, or for research for any such purpose, and approves or disapproves the vesting in such State agencies of title to such surplus property (40 U.S.C. 484(n)).

(20) *Maintenance, repair, and rehabilitation of personal property.* Authorizes the maintenance, repair, and rehabilitation of in-use and excess personal property except operating automotive and other motorized equipment.

*Real Property*

(21) *Surplus real property generally.* Determines property surplus, assumes custody and accountability of surplus property, prescribes and utilizes appropriate terms and conditions for disposals of surplus property by GSA, and disposes of surplus property (40 U.S.C. 472(g), 484(a), (b), (c), (e); 50 U.S.C. App. 1622(d), (g), (h)).

(22) *Interim rights.* Grants interim rights for use and occupancy of surplus property and disapproves or notifies that no objection will be interposed to holding agencies granting such rights (40 U.S.C. 484(c)).

(23) *Credit and security.* Grants credit and takes security in connection with any disposal authorized (40 U.S.C. 484(c)).

(24) *Assignment for education and public health.* Assigns, or disapproves requests for assignment of, surplus real property and related personal property to the Secretary of Health, Education, and Welfare for disposal for school, classroom, or other educational use, or for use in the protection of public health, including research (40 U.S.C. 484(k)(1)).

(25) *Abandonment, destruction, or donation to public bodies.* Authorizes abandonment, destruction or donation of property to public bodies, and makes any determinations and findings incident thereto (40 U.S.C. 483(h)).

(26) *Leases and permits.* Administers and manages leases and permits, where disposal has been by lease or permit, and deferred payment sales: *Provided,* That such authority shall not apply to (a) collections or security servicing and (b) any legal action to adjust, enforce, and settle any claim arising thereunder (40 U.S.C. 485(g)).

(27) *Disposition of leased space.* Determines leased space to be surplus and disposes of such space by sublease, defrays costs necessary to provide services to the Government's lessee, and pays the rent not otherwise provided for on the lease of the space to the Government (40 U.S.C. 490(h)(2)).

(28) *Widening of public highway, street, or alley.* Conveys or otherwise transfers interests in surplus real property under the control of GSA for an authorized widening of a public highway, street, or alley (40 U.S.C. 345c).

(29) *Determination of necessity for highway purposes.* Performs the functions required under 23 U.S.C. 107 and 317 relating to excess and surplus property determined to be necessary for highway purposes.

(30) *Utilities.* Furnishes utilities and other services to occupants or users of National Industrial Reserve plants and surplus property installations (40 U.S.C. 490(a)(10)).

(31) *National Industrial Reserve Plants—utilization and disposition.* Accepts the transfer of, and utilizes, leases, transfers, or disposes of industrial plants and related personal property in the National Industrial Reserve as authorized or directed by the Secretary of Defense (50 U.S.C. 455).

(32) *Transfer of property for wildlife conservation.* Makes determinations as to availability of and transfers property for wildlife conservation purposes and makes and has published in the FEDERAL REGISTER an appropriate order whenever any such transfer is made (16 U.S.C. 667b, c).

(33) *Transfers for public airport.* Transfers property pursuant to section 16 of the Federal Airport Act, and makes determinations incident thereto (49 U.S.C. 1115).

(34) *Payment in lieu of taxes.* Approves payment of sums in lieu of taxes (40 U.S.C. 523, 524).

(35) *Abandoned or unclaimed property.* Utilizes, transfers, or disposes of, abandoned and other unclaimed property (40 U.S.C. 484(m)).

(36) *National Industrial Reserve Plants—maintenance and protection.* Maintains, protects, repairs, restores, and renovates industrial plants and related personal property in the National Industrial Reserve as authorized or directed by the Secretary of Defense (50 U.S.C. 455), and uses proceeds from insurance to repair or restore damaged National Industrial Reserve property (40 U.S.C. 490(a)(11)).

(37) *Rubber producing facilities.* Administers the contracts of sale of the Government-owned rubber producing facilities made pursuant to the Rubber Producing Facilities Disposal Act of 1953 (67 Stat. 414), as amended, and administers the national security clause contained in said contracts of sale, including necessary inspections of such facilities (Public Law 87–190, 75 Stat. 418).

(38) *Easements.* Grants easements on, over, or upon excess and surplus real property (40 U.S.C. 319–319(c)).

(39) *Devise of real property.* Performs the functions required under 40 U.S.C. 304 relating to such lands as have been or may be acquired by the United States by devise.

(40) *Gifts of real property generally.* Performs the acceptance and disposal functions required under 31 U.S.C. 901–903 relating to any gift of real property made to the United States on the sole condition that it be sold and the proceeds used to reduce the public debt of the United States. (Recommendations to reject such a gift are to be submitted to the Administrator.)

(41) *Gifts of real property in connection with national defense.* Converts into money, at the best terms available, any gift of real property made on condition that it be used for a particular defense purpose, or transfers to any other Federal agency without reimbursement such real property as he may determine usable for the particular purpose for which it was donated (50 U.S.C. 1152).

REGIONAL ADMINISTRATORS

(a) *General.* The Regional Administrator, in carrying out his assigned program responsibilities, exercises authority, such as, but not limited to, those stated in (b), following.

(b) *Authorities*—(1) *Surplus property disposal credit terms.* Approves credit in connection with the disposal of surplus property and the establishment of credit terms and conditions (40 U.S.C. 484(c)).

(2) *Lease and permit credit management.* Administers and manages any credit, lease, or permit, and any security therefor, and collects all moneys due the Government on account thereof: Provided, That such authority shall not apply to any legal action to adjust, enforce, and settle any right of the Government with respect thereto (40 U.S.C. 485(g)).

(3) *Renegotiation Act of 1951.* Examines and settles, under section 201(f) of the Renegotiation Act of 1951, contractor's claims for rebates of excess profits paid to the Government by such contractors as a result of contract renegotiations pursuant to law (Region 3 only) (50 U.S.C. App. 1231(f)).

(4) *Claims.* Considers, ascertains, determines, adjusts, and settles the following claims:

(i) Any claim, demand, or request for adjustment in the nature of a claim, other than those described in (iii), below, arising out of or incident to any contract, agreement, lease, or permit executed pursuant to competent authority covering the procurement by purchase, construction, or otherwise, or disposal of personal property, real property, and services;

(ii) Any claim under the Federal Tort Claims Act, and any claim in tort by GSA on behalf of the Government; and

(iii) Any claim in connection with abandoned or unclaimed property and claims or adjustments, and enforcements, adjustments, or settlements with respect to surplus property sales and credit;

*Provided, however,* That this authority shall not impair or affect authority otherwise vested in contracting officers to decide questions of fact under disputed clauses of contracts, or any responsibility vested in the Board of Review.

(5) *Forfeitures.* Applies for a court order for delivery of property subject to forfeiture proceedings under section 304 of the Act of August 27, 1935. This authority may be redelegated to the Regional Counsel only (40 U.S.C. 304f).

(6) *Certification of delegations and redelegations of authority.* Certifies true copies of delegations of authority by the Administrator and redelegations by other GSA officials, and provides such further certifications as may be necessary to

effectuate the intent of such delegations and redelegations in form for recording in any jurisdiction, as may be required.

(7) *Abandonment, destruction, or donation to public bodies of GSA personal property.* Authorizes abandonment, destruction, or donation of GSA personal property to public bodies, and makes any determinations and findings incidental thereto (40 U.S.C. 483(h)).

(8) *Abandoned and unclaimed personal property.* Takes possession of, utilizes, transfers, or disposes of abandoned and unclaimed personal property, and determines the fair value and costs of care and handling thereof (40 U.S.C. 484(m)).

(9) *Purchases.* Makes purchases of office supplies, equipment, and nonpersonal services, not available from GSA stores stock, or through the use of supply and service contracts executed by FSS. The above authority shall include the use of imprest funds and Standard Form 44, Revised, U.S. Government Purchase Order-Invoice-Voucher (41 U.S.C. 252(c), 252(c)(3)).

(10) *Negotiated contracts with educational institutions.* Negotiates contracts, without advertising for any service to be rendered by any university, college, or other educational institution (41 U.S.C. 252(c)(5)).

(11) *Advertised contracts.* Makes purchases and contracts for operating equipment and supplies by advertising, and determines that the rejection of all bids is in the public interest (41 U.S.C. 252(c), 253(b)).

(12) *Negotiated contracts.* Negotiates purchases and contracts for operating equipment and supplies without advertising and makes any determinations in connection therewith (41 U.S.C. 252(c)(1)–(6), (15)).

(13) *Agency representation.* Represents executive agencies in proceedings involving carriers and other public utilities before Federal and State regulatory bodies, with respect to transportation and other public utility services for the use of such agencies (40 U.S.C. 481(a)(4)).

Dated: December 23, 1964.

LAWSON B. KNOTT, Jr.,
*Acting Administrator of General Services.*

[F.R. Doc. 64-13417; Filed, Dec. 29, 1964; 8:48 a.m.]

# SECURITIES AND EXCHANGE COMMISSION

[File No. 812-1742]

## DIVIDEND SHARES, INC.

### Notice of Filing of Application for Order Exempting From Sale by Open-End Company of Its Shares at Other Than the Public Offering Price in Exchange for Assets of Closely Held Company

DECEMBER 23, 1964.

Notice is hereby given that Dividend Shares, Inc. ("Dividend Shares"), One Wall Street, New York, N.Y., a Maryland corporation which is registered under the Investment Company Act of 1940 ("Act") as an open-end diversified investment company, has filed an application pursuant to section 6(c) of the Act. Dividend Shares requests an order of the Commission exempting from the provisions of section 22(d) of the Act the proposed issuance of its shares at net asset value for substantially all of the cash and securities of Kling Bros. Engineering Works ("Kling"). Since the sale of Dividend Shares stock will be other than at the public offering price, which normally includes sales charges, an exemption is deemed necessary. All interested persons are referred to the application as filed with the Commission for a complete statement of the representations therein which are summarized below.

Shares of Dividend Shares are offered to the public on a continuous basis at net asset value plus varying sales charges dependent on the amount purchased. As of November 17, 1964, the net assets of Dividend Shares amounted to approximately $378,491,000.

Kling, an Illinois corporation, whose shares are held by four persons, is engaged in investing and reinvesting its funds. Pursuant to an agreement between Dividend Shares and Kling, substantially all of the cash and securities of Kling, with a value of approximately $1,150,000 on November 17, 1964, will be transferred to Dividend Shares in exchange for stock of Dividend Shares which will be distributed to the shareholders of Kling upon liquidation. None of the stockholders has any present intention of redeeming or transferring the shares of Dividend Shares which they acquire. The amount of stock of Dividend Shares to be delivered to Kling will be determined at the time of closing by dividing the net asset value per share of Dividend Shares into the value of the assets of Kling.

The valuation of the assets of Kling will be determined on the basis of market value on January 6, 1965 and will reflect an adjustment for federal income taxes payable upon liquidation of such assets according to a formula set forth in the application. Based on market values at November 17, 1964, no such adjustment would be required. Of the assets to be acquired, Dividend Shares intends to retain, subject to changes in investment conditions and considerations, securities having a value as of November 17, 1964 of approximately $375,000, and to sell securities having a value of approximately $726,000.

The application states that the Board of Directors of Dividend Shares, Inc. approved the agreement as being in the best interests of its shareholders, the terms of the entire transaction were arrived at through arm's-length bargaining, and there is no affiliation between the officers and directors of Dividend Shares and the officers, directors and stockholders of Kling.

Notice is further given that any interested person may, not later than January 7, 1965 at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request and the issues of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C.; 20549. A copy of such request shall be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon applicant at the address stated above. Proof of such service (by affidavit or in case of an attorney-at-law by certificate) shall be filed contemporaneously with the request. At any time after said date, as provided by Rule 0–5 of the rules and regulations promulgated under the Act, an order disposing of the application herein may be issued by the Commission upon the basis of the information stated in said application, unless an order for hearing upon said application shall be issued upon request or upon the Commission's own motion.

For the Commission (pursuant to delegated authority).

[SEAL] ORVAL L. DUBOIS,
*Secretary.*

[F.R. Doc. 64-13397; Filed, Dec. 29, 1964; 8:46 a.m.]

## FEDERATED DEPARTMENT STORES, INC.

### Notice of Application for Unlisted Trading Privileges and of Opportunity for Hearing

DECEMBER 23, 1964.

In the matter of application of the Pacific Coast Stock Exchange, for unlisted trading privileges in a certain security.

The above named national securities exchange has filed an application with the Securities and Exchange Commission pursuant to Section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f-1 thereunder, for unlisted trading privileges in the common stock of the following company, which security is listed and registered on one or more other national securities exchanges:

Federated Department Stores, Inc., File 7-2418.

Upon receipt of a request, on or before January 8, 1964 from any interested person, the Commission will determine whether the application shall be set down for hearing. Any such request should state briefly the nature of the interest of the person making the request and the position he proposes to take at the hearing, if ordered. In addition, any interested person may submit his views or any additional facts bearing on the said application by means of a letter addressed to the Secretary, Securities and Exchange Commission, Washington 25, D.C., not later than the date specified. If no one requests a hearing, this application will be determined by order of the Commission on the basis of the facts stated therein and other information contained in the official files of the Commission pertaining thereto.

For the Commission (pursuant to delegated authority).

ORVAL L. DUBOIS,
*Secretary.*

[File No. 812-1718]

## SOUTHEASTERN CAPITAL CORP. AND FULTON INVESTMENT CO.

### Notice of Filing of Application for Orders Exempting From

DECEMBER 23, 1964.

Notice is hereby given that Southeastern Capital Corp. ("Southeastern"), Life and Casualty Tower, Nashville 3, Tenn., a Tennessee corporation registered under the Investment Company Act of 1940 ("Act") as a closed-end non-diversified investment company and a licensee under the Small Business Investment Act of 1958, and Fulton Investment Co. ("Fulton"), Post Office Box 995, Atlanta, Ga., 30301, a Georgia corporation, have filed a joint application pursuant to section 17(b) of the Act. The applicants request an order of the Commission exempting from the provisions of section 17(a) of the Act the sale of Fulton's assets to Southeastern in connection with a proposed merger between Southeastern and Fulton. Southeastern is to be the surviving corporation under the same name. Upon consummation of the proposed merger, all of Fulton's assets will become the property of Southeastern, which will assume all of Fulton's liabilities. Fulton has also applied pursuant to section 6(c) of the Act for an order exempting it from the provisions of section 7(a) of the Act to enable it to effectuate the transactions involved in the proposed merger. All interested persons are referred to the application on file with the Commission for a full statement of the representations therein which are summarized below.

Southeastern and Fulton are affiliated persons of each other as that term is defined in section 2(a)(3) of the Act by virtue of Fulton's ownership of approximately 19 percent of Southeastern's outstanding voting securities.

DESCRIPTION OF CONSTITUENT COMPANIES

*Fulton.* Fulton owns 110,237 shares approximately 19 percent) of Southeastern's 568,253 outstanding shares of common stock. Fulton acquired 96,700 shares of the above-mentioned shares of Southeastern's common stock during July 1964 at a cost of $8 per share. Of the 96,700 shares, 60,000 shares were purchased from Phoenix, Inc. ("Phoenix"), which may be an affiliate of Fulton within the meaning of Section 2(a)(3) of the Act by reason of the circumstance that C. Edward Hansell is a director of both companies and owned more than five (5) percent of the outstanding voting securities of each company; the remaining 36,700 shares were purchased from Sidney Swensrud, a former director of Southeastern. This price was slightly more than the then current over-the-counter market price, but approximately $3 per share less than the book value per share of Southeastern's common stock. The remaining shares were acquired in the over-the-counter market during July 1964. These 110,237 shares of Southeastern's common stock will be retired upon the consummation of the proposed merger.

The directors of Phoenix, Fulton and Southeastern, as a group, own in the aggregate 51.7 percent, 19.4 percent and 7.2 percent of the outstanding voting securities of the companies, respectively. In addition, Phoenix owns 4.1 percent and 7.9 percent of the outstanding voting securities of Fulton and Southeastern, respectively.

On July 24, 1950 Fulton was incorporated under the laws of Georgia as Atlanta Transit Co. for the purpose of acquiring and operating the public transportation system of the city of Atlanta and its environs. It continued these operations until April 30, 1954 when it sold its public transportation system assets, including all franchises, to Atlanta Transit System, Inc. ("System"), a newly organized corporation in which it had no stock interest. These assets were sold for approximately $5,170,000. Arising from the sale of these assets, Fulton presently holds a $2,725,000 face amount 3¾ percent promissory note issued by System, which is payable in $100,000 semi-annual installments. For purposes of the proposed merger, this note has been valued by Fulton at $2,505,000 to reflect an effective return of 6 percent per annum. After disposing of its transit properties, Atlanta Transit Company changed its name to Fulton. Since October 1962 Fulton had been engaged in real estate development and has serviced real estate mortgage loans. Other than this activity Fulton has undertaken no functions since 1954, except the realization of proceeds of approximately $3,450,000 from the sale of certain transportation equipment in 1952 and from the sale of its transportation system assets.

Fulton has paid quarterly cash dividends since 1952 amounting to eighty cents per share per annum. These cash dividends have been paid primarily from profits arising from the above mentioned sales of its transit properties.

A pro forma balance sheet of Fulton as of the date of the proposed merger indicates that it will have total assets of $6,019,708 and a net worth of $5,016,943. Its assets will include: cash of $1,408,568, $2,505,000 of promissory notes issued by System, an investment in its wholly-owned subsidiary valued at $1,011,500 and an investment of $881,896 in 110,237 shares of Southeastern's common stock which, as mentioned above, will be retired upon consummation of the proposed merger.

Fulton has never registered under the Act. It is represented that Fulton's management, on advice from its counsel, believed that such registration was not required. While reserving its right to claim that it is not an investment company as that term is defined in the Act, Fulton intends to comply with all the provisions of the Act until the proposed merger is consummated, including submitting copies to this Commission of any information to be sent to the stockholders of Fulton in connection with the solicitation of their proxies.

*Southeastern.* As of March 31, 1964, Southeastern had total assets of $6,264,769 which included $220,892 in cash, loans and investments of $3,525,296 and treasury bills and certificates of deposit amounting to $2,441,299; and a net worth of $6,251,527 including an earned surplus deficit of $170,225. Southeastern's investment portfolio consists of the notes, convertible debentures and common and preferred stock of seventeen different small business companies. Its investments encompass retail, wholesale and manufacturing operations, as well as real estate and warehouses. Southeastern has never paid any dividends to its shareholders.

*The proposed merger.* The merger agreement provides that all of Fulton's assets and liabilities will be transferred to and become the property of Southeastern, the surviving company, and Fulton will cease to have a separate existence. Southeastern will continue to carry on the same type of business activity in which it has been engaged. It is proposed that the stockholders of Fulton will receive two shares of Southeastern's common stock in return for one share of Fulton's capital stock. The Southeastern common stock to be issued in exchange for Fulton's capital stock will be identical in all respects to Southeastern's presently outstanding common stock.

The proposed ratio of exchange is based upon the respective market values and asset values of Southeastern's and Fulton's stock. During the period January 1, 1964 through July 17, 1964 the range of the bid and asked prices for Southeastern and Fulton's stock was as follows: [1]

| | Southeastern | | Fulton | |
|---|---|---|---|---|
| | Bid | Asked | Bid | Asked |
| Low | 4¾ | 4⅞ | 10 | 11 |
| High | 7¼ | 7⅜ | 13¾ | 14¾ |

| | Bid | Asked |
|---|---|---|
| Fulton | 12 | 12¾ |
| Southeastern | 6 | 6¼ |

As of March 31, 1964, the book value of Southeastern's common stock was $11.00 per share. The pro forma book value of Fulton's capital stock at the time of the merger will be $25.08 per share (this figure reflects several adjustments which must be made in Fulton's assets in order to comply with the rules of the Small Business Administration). Southeastern's pro forma book value after the consummation of the merger will be $12.11 per share.

Counsel for Southeastern and Fulton is of the opinion that the proposed merger will qualify as a "tax free reorganization" under the Internal Revenue Code of 1954. Consequently, it is anticipated that neither Southeastern nor Fulton (or their shareholders) will

[1] On December 16, 1964, the bid and asked quotations for Fulton's and Southeastern's stock, published by the National Daily Quotation Service, were as follows:

realize any gain or loss if the proposed merger is consummated.

The Boards of Directors of Southeastern and Fulton have unanimously authorized the merger of Fulton into Southeastern. Under the laws of Tennessee and Georgia, the affirmative vote of the holders of record of a majority of the outstanding shares of Southeastern and Fulton is required for approval of the proposed merger. The proposed merger has been approved by the Small Business Administration subject to certain conditions, including, among other things, that the proposed merger be approved by a vote of the holders of two-thirds of the total number of Southeastern and Fulton's shares voted on the proposed merger: *Provided, however,* That such affirmative vote constitutes at least a majority of the outstanding voting stock of each company.

Notice is further given that any interested person may, not later than January 6, 1965, at 5:30 p.m. submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request and the issues of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C., 20549. A copy of such request shall be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon applicants at the addresses set forth above. Proof of such service (by affidavit or in case of an attorney-at-law by certificate) shall be filed contemporaneously with the request. At any time after said date, as provided by Rule 0–5 of the rules and regulations promulgated under the Act, an order disposing of the application herein may be issued by the Commission upon the basis of the information stated in said application, unless an order for hearing upon said application shall be issued upon request or upon the Commission's own motion.

*It is ordered,* That the Secretary of the Commission shall send a copy of this notice by certified mail to the Director, Office of Investment Assistance, Small Business Administration, Washington, D.C., 20416.

For the Commission (pursuant to delegated authority).

[SEAL] ORVAL L. DUBOIS, *Secretary.*

# TARIFF COMMISSION

[TEA–F–5]

## NATIONAL TILE & MANUFACTURING CO.

### Report to the President on Petition for Adjustment Assistance

DECEMBER 21, 1964.

The United States Tariff Commission today reported to the President the results of its investigation No. TEA–F–5, conducted under section 301(c)(1) of the Trade Expansion Act of 1962, in response to a firm's petition for the determination of eligibility to apply for adjustment assistance. The petition was filed with the Commission on October 22, 1964, by the National Tile & Manufacturing Co. of Anderson, Ind., a producer of certain ceramic floor and wall tiles.

The purpose of the Commission's investigation was to determine whether, as a result in major part of concessions granted under trade agreements, ceramic mosaic floor and wall tiles and glazed ceramic (other than mosaic) floor and wall tiles, provided for in items 532.21 and 532.24 of the Tariff Schedules of the United States (TSUS), are being imported into the United States in such increased quantities as to cause, or threaten to cause, serious injury to the National Tile & Manufacturing Co.

On the basis of its investigation, the Commission found (Commissioners Fenn and Talbot dissenting) that ceramic floor and wall tiles provided for in TSUS items 532.21 and 532.24 are not, as a result in major part of concessions granted under trade agreements, being imported in such increased quantities as to cause, or threaten to cause, serious injury to the National Tile & Manufacturing Co.

Copies of the Commission's report to the President, exclusive of information received in confidence, are available upon request as long as the limited supply lasts. Address requests to the Secretary, U.S. Tariff Commission, Eighth and E Streets NW., Washington, D.C., 20436.

By direction of the Commission.

[SEAL] DONN N. BENT, *Secretary.*

# DEPARTMENT OF LABOR

## Wage and Hour Division

### CERTIFICATES AUTHORIZING EMPLOYMENT OF FULL-TIME STUDENTS WORKING OUTSIDE OF SCHOOL HOURS IN RETAIL OR SERVICE ESTABLISHMENTS AT SPECIAL MINIMUM WAGES

Notice is hereby given that pursuant to section 14 of the Fair Labor Standards Act of 1938 (52 Stat. 1060, as amended, 29 U.S.C. 201 et seq.), the regulation on employment of full-time students (29 CFR Part 519), and Administrative Order No. 579 (28 F.R. 11524), the establishments listed in this notice have been issued special certificates authorizing the employment of full-time students working outside of school hours at hourly wage rates lower than the minimum wage rates otherwise applicable under section 6 of the act. The effective and expiration dates are from September 3, 1964 to September 2, 1965. Pursuant to § 519.6(b) of the regulation, the minimum certificate rates are not less than 85 percent of the minimum applicable under section 6 of the act.

The following certificates were issued pursuant to paragraphs (c) and (g) of § 519.6 of 29 CFR, Part 519, providing for an allowance not to exceed the proportion of the total number of hours worked by full-time students at rates below $1.00 an hour to the total number of hours worked by all employees in the establishment during the base period, or 10 percent, whichever is less, in occupations of the same general classes in which the establishment employed full-time students at wages below $1.00 an hour in the base period.

Each certificate has been issued upon the representations of the employer which, among other things, were that employment of full-time students at special minimum rates is necessary to prevent curtailment of opportunities for employment, and the hiring of full-time students at special minimum rates will not tend to displace full-time employees. The certificates may be annulled or withdrawn, as indicated therein, in the manner provided in Part 528 of Title 29 of the Code of Federal Regulations. Any person aggrieved by the issuance of any of these certificates may seek a review or reconsideration thereof within fifteen days after publication of this notice in the FEDERAL REGISTER pursuant to the provisions of 29 CFR 519.9.

Signed at Washington, D.C., this 23d day of December 1964.

# INTERSTATE COMMERCE COMMISSION

[Notice 714]

## MOTOR CARRIER APPLICATIONS AND CERTAIN OTHER PROCEEDINGS

DECEMBER 24, 1964.

The following publications are governed by the new Special Rule 1.247 of the Commission's rules of practice, published in the FEDERAL REGISTER, issue of December 3, 1963, which became effective January 1, 1964.

APPLICATIONS ASSIGNED FOR ORAL HEARING

No. MC 111302 (Sub-No. 30), filed December 14, 1964. Applicant: HIGHWAY TRANSPORT, INC., Albany Highway (Post Office Box XX), Thomasville, Ga. Applicant's representative: Lamar Kennedy, Vice President, Highway Transport, Inc., Post Office Box XX—Albany Highway, Thomasville, Ga. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Chemicals*, in bulk, in tank vehicles, from Cadet, Mo., to points in Alabama, Arkansas, California, Colorado, Delaware, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maryland, Massachusetts, Michigan, Minnesota, New Jersey, New York, North Carolina, Ohio, Oklahoma, Oregon, Pennsylvania, South Carolina, Tennessee, Texas, Utah, Virginia, Washington, West Virginia, and Wisconsin, and *rejected shipments* of the above-specified commodities, on return.

NOTE: Common control may be involved.

*HEARING:* February 1, 1965, in Room 1620, New Federal Building, 1520 Market Street, St. Louis, Mo., before Examiner William J. O'Brien, Jr.

No. MC 45736 (Sub-No. 14) (REPUBLICATION), filed August 24, 1964, published FEDERAL REGISTER, issue of September 10, 1964, and republished this issue. Applicant: GUIGNARD FREIGHT LINES, INC., 646 Atando Avenue, Charlotte, N.C., 28206. Applicant's representative: W. D. Turner, Post Office Box 3661, Charlotte, N.C., 28203. By application filed August 24, 1964, applicant seeks a certificate of public convenience and necessity authorizing operation, in interstate or foreign commerce, as a *common carrier*, by motor vehicle, over irregular routes, of *roofing, roofing materials, siding, and siding materials*, on flatbed equipment, from Charleston, S.C., to points in Virginia east of U.S. Highway 1 from the North Carolina-Virginia line to Richmond, Va., and on and east of U.S. Highway 301 from Richmond, Va., to the Potomac River. An order, by Operating Rights Board No. 1, dated December 11, 1964, served December 21, 1964, finds that the present and future public convenience and necessity require operation by applicant, in interstate or foreign commerce, as a *common carrier*, by motor vehicle, over irregular routes, of *roofing, roofing materials, siding, and siding materials*, from Charleston, S.C., to points in Virginia east of a line beginning at the North Carolina-Virginia State line and extending in a northerly direction along U.S. Highway 1 to Richmond, Va., and thence extending in a northerly direction along U.S. Highway 301 to the Virginia-Maryland State line; and that because it is possible that other parties, who have relied upon the notice of the application as published, may have an interest in and would be prejudiced by the lack of proper notice of the authority granted, a notice will be published in the FEDERAL REGISTER, and issuance of a certificate herein will be withheld for a period of 30 days from the date of such publication, during which period any proper party in interest may file an appropriate protest or other pleading.

No. MC 117184 (Sub-No. 2), (REPUBLICATION), filed April 16, 1964, published FEDERAL REGISTER, issues of May 6, and May 20, 1964, and republished this issue. Applicant: APEX TRUCKING CO., INC., New York, N.Y. Applicant's representative: William D. Traub, 10 East 40th Street, New York, N.Y. By application filed April 16, 1964, as amended, authority is sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Such commodities as are dealt in by manufacturers of duplicating, copying, and reproducing machines*, and *materials, supplies, accessories, components and equipment*, used in the distribution, operation, and maintenance of such machines, between points in the New York, N.Y., commercial zone, as defined by the Commission and Northvale, N.J., on the one hand, and on the other, points in Westchester, Dutchess, Putnam, Rockland, Orange, Ulster, Sullivan, Nassau, and Suffolk Counties, N.Y. A Report and Order, Recommended by Isadore Freidson, Hearing Examiner, served November 25, 1964, effective December 15, 1964, finds that applicant is fit, willing, and able properly to perform the service of a contract carrier by motor vehicle and to conform to the provisions of the Interstate Commerce Act and with the lawful requirements, rules, and regulations of the Commission thereunder, and that operation, in interstate or foreign commerce by applicant as a contract carrier by motor vehicle, under a continuing contract with Xerox Corporation, of Rochester, N.Y., over irregular routes, (A) Such commodities as are dealt in by manufacturers of duplicating, copying, and reproducing machines and, when moving in conjunction therewith, materials, supplies, accessories, components, and equipment used in the distribution, operation, and maintenance of such machines: (1) Between points in the New York, N.Y., commercial zone, as defined by the Commission, on the one hand, and, on the other, Northvale, N.J. (2) Between points in the New York, N.Y., commercial zone, as defined by the Commission, and Northvale, N.J., on the one hand, and, on the other, points in Westchester, Dutchess, Putnam, Rockland, Orange, Ulster, Sullivan, Nassau, and Suffolk Counties, N.Y. (B) Materials, supplies, accessories, components, and equipment used in the distribution, operation, and maintenance of the machines described in (A) above: (1) Between New York, N.Y., on the one hand, and, on the other, Northvale, N.J. (2) Between New York, N.Y., and Northvale, N.J., on the one hand, and, on the other, points in Westchester, Dutchess, Putnam, Rockland, Orange, Ulster, Sullivan, Nassau, and Suffolk Counties, N.Y. The Report also recommends that an appropriate permit should be granted, after the elapse of 30 days from the date of publication of the authority granted herein in the FEDERAL REGISTER, and provided further that no petition for further hearing is filed during that period.

No. MC 123966 (Sub-No. 1) (REPUBLICATION), filed July 23, 1964, published FEDERAL REGISTER, issue of August 12, 1964, and republished this issue. Applicant: J. R. COX, 504 Crestwood, Springdale, Ark. Applicant's attorney: Thomas Harper, Kelley Building, Post Office Box 297, Fort Smith, Ark. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Concrete and lightweight building blocks and component metal wall ties and metal joint reinforcers, and concrete staves for the erection of silos, and all necessary equipment* for the erection of concrete silos, such as *unloaders, blowers, feed containers and feeding equipment*, between Springdale, Ark., on the one hand, and, on the other, points in Missouri on and south of U.S. Highway 40, on and west of U.S. Highway 63, points in Kansas on and south of U.S. Highway 40, and on and east of U.S. Highway 81, and points in Oklahoma. An Order, Operating Rights Board No. 1, dated November 25, 1964, served December 15, 1964, finds that the present and future public convenience and necessity require operation by applicant, in interstate or foreign commerce, as a *common carrier* by motor vehicle, over irregular routes, (1) of (a) *concrete and lightweight building blocks* and *component metal wall ties* and *metal joint reinforcers* and (b) *equipment and materials incidental to the erection and completion of concrete silos* between Springdale, Ark., on the one hand, and, on the other, points in Oklahoma west of U.S. Highway 81 and (2) of commodities described in (b) above between Springdale, Ark., on the one hand, and, on the other, points in Missouri on and south of U.S. Highway 40, and on and west of U.S. Highway 63, points in Kansas on and south of U.S. Highway 40, and on and east of U.S. Highway 81, and points in Oklahoma on and east of U.S. Highway 81; and,

that because it is possible that other parties, who have relied upon the notice of the application as published, may have an interest in and would be prejudiced by the lack of proper notice of the authority described in the findings herein, a corrected notice of the authority actually granted will be published in the FEDERAL REGISTER and issuance of a certificate will be withheld for a period of 30 days from the date of such publication, during which period any proper party in interest may file an appropriate protest or other pleading.

MOTOR CARRIERS OF PASSENGERS

No. MC 125076 (REPUBLICATION), filed February 4, 1963, published FEDERAL REGISTER, issue of March 13, 1963, and republished this issue. Applicant: SUPERIOR BUS SERVICE, INCORPORATED, Knotts Island, N.C. Applicant's attorney: L. C. Major, Jr., 2001 Massachusetts Avenue NW., Washington, D.C. By application filed February 4, 1963, as amended, applicant seeks a certificate of public convenience and necessity authorizing operation, in interstate or foreign commerce, as a *common carrier* by motor vehicle, over regular routes, of *passengers and their baggage*, and *express parcels*, in the same vehicle with passengers, between Franklin, W. Va., and Cumberland, Md., over specified routes, subject to the restriction that no passengers will be picked up or discharged on a segment of the proposed route over West Virginia Highway 28 where it overlaps U.S. Highway 50 for a distance of 7 miles between Junction, W. Va., and Romney, W. Va. An Order, dated December 11, 1964, served December 21, 1964, Operating Rights Board No. 1, finds that the present and future public convenience and necessity require operation by applicant, in interstate or foreign commerce, as a *common carrier* by motor vehicle, of *passengers and their baggage*, and *express* in the same vehicle with passengers, between Franklin, W. Va., and Cumberland, Md., from Franklin over U.S. Highway 220 to Junction, W. Va., thence over U.S. Highway 50 (West Virginia Highway 28) to Romney, W. Va., thence over West Virginia Highway 28 to the West Virginia-Maryland State line, thence over the Potomac River Bridge joining Ridgeley, W. Va., and Cumberland, Md., to Cumberland, and return over the same route, serving all intermediate points; and that because it is possible that other parties who may have an interest in and would be prejudiced by the lack of notice of the authority granted, a corrected notice of the authority will be published in the FEDERAL REGISTER, and issuance of a certificate herein will be withheld for a period of 30 days from the date of such publication, during which period any proper party in interest may file an appropriate protest or other pleading.

APPLICATIONS FOR CERTIFICATES OR PERMITS WHICH ARE TO BE PROCESSED CONCURRENTLY WITH APPLICATIONS UNDER SECTION 5 GOVERNED BY SPECIAL RULE 1.240 TO THE EXTENT APPLICABLE

No. MC 120297 (Sub-No. 3), filed December 14, 1964. Applicant: CATANIA BROTHERS CARTAGE COMPANY, INC., 539 West 14th Place, Chicago, Ill. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except articles of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment) between points within a 50-mile radius of 706–08 West Harrison St., Chicago, Ill.

NOTE: This is a matter directly related to MC–F 8969, published in the FEDERAL REGISTER, issue of December 23, 1964.

APPLICATIONS UNDER SECTIONS 5 AND 210a(b)

The following applications are governed by the Interstate Commerce Commission's Special Rules governing notice of filing of applications by motor carriers of property or passengers under sections 5(a) and 210a(b) of the Interstate Commerce Act and certain other proceedings with respect thereto (49 CFR 1.240).

MOTOR CARRIERS OF PROPERTY

No. MC–F–8980. Authority sought for purchase by MICHIGAN REFRIGERATED TRUCKING SERVICE, INC., 713 North Junction Street, Detroit 9, Mich., of the operating rights of WILLIAM L. TRIPP and HENRY T. WINCHESTER, doing business as TRIPP TRUCKING COMPANY, Allegan, Mich., and for acquisition by JOHN M. JOHNSON, 10404 Kingston, Huntington Woods, Mich., of control of such rights through the purchase. Applicants' attorneys: William B. Elmer, 22644 Gratiot Avenue, East Detroit, Mich., and Leonard Verdier, 300 Michigan Trust Building, Grand Rapids, Mich. Operating rights sought to be transferred: *General commodities*, excepting, among others, household goods and commodities in bulk, as a *common carrier* over regular routes, between Allegan, Mich., and Chicago, Ill., serving certain intermediate and off-route points, with and without restrictions. Vendee is authorized to operate as a *common carrier* in the State of Michigan. Application has not been filed for temporary authority under section 210a(b).

No. MC–F–8981. Authority sought for purchase by McCLOUD RIVER TRUCKING COMPANY, McCloud, Calif., of the operating rights of MILTON W. ZAMBONI, MARY L. LIGHTFOOT AND JACK E. SHAVER, a partnership, doing business as ZLS TRUCKING, Post Office Box 929, Redding, Calif., and for acquisition by McCLOUD RIVER RAILROAD COMPANY, McCloud, Siskiyou County, Calif., and, in turn by, UNITED STATES PLYWOOD CORPORATION, 777 Third Avenue, New York, N.Y., of control of such rights through the purchase. Applicants' attorneys: Gerald H. Trautman and Frederick O. Koenig, 601 California Street, San Francisco, Calif., 94108. Operating rights sought to be transferred: Under a certificate of registration, in Docket No. MC–120431 (Sub-1), covering the transportation of lumber and lumber products, as a *common carrier*, in intrastate commerce, within the State of California. Vendee seeks a certificate of registration in Docket No. MC–125604 (Sub-1) in the State of California. McCLOUD RIVER RAILROAD COMPANY is authorized to operate as a *common carrier* in the State of California. Application has not been filed for temporary authority under section 210a(b).

No. MC–F–8982. Authority sought for purchase by LEONARD BROS. TRANSFER, INC., 2595 Northwest 20th Street, Miami 52, Fla., of a portion of the operating rights of HEAVY HAULING AND RIGGING CORPORATION OF AMERICA, 414 Union Avenue, Westbury, N.Y., and for acquisition by ARMLON LEONARD, also of Miami, Fla., of control of such rights through the purchase. Applicants' attorney and representative: W. O. Turney, 2001 Massachusetts Avenue NW., Washington, D.C., 20036, and Armlon Leonard, 2595 Northwest 20th Street, Miami 52, Fla. Operating rights sought to be transferred: *Damaged airplanes* and *airplane parts*, as a *common carrier*, over irregular routes, between points in New York, Connecticut, Rhode Island, Massachusetts, Vermont, New Hampshire, Maine, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, Ohio, Michigan, the District of Columbia; and *airplanes and airplane* equipment, between Bendix, N.J., on the one hand, and, on the other, Stamford and Bridgeport, Conn., Wilmington, Del., Philadelphia and Hawley, Pa., points in Massachusetts east of the Cape Cod Canal, and certain points in New York. Vendee is authorized to operate as a *common carrier* in Maine, New Hampshire, Vermont, Massachusetts, Nebraska, Connecticut, Rhode Island, New York, Pennsylvania, Maryland, Kansas, Delaware, Virginia, West Virginia, Oklahoma, North Carolina, Michigan, Ohio, Indiana, New Mexico, Wisconsin, Illinois, South Carolina, Georgia, Florida, California, Alabama, Mississippi, Louisiana, Arkansas, Missouri, Texas, and the District of Columbia. Application has been filed for temporary authority under section 210a(b).

No. MC–F–8983. Authority sought for purchase by PITTSBURGH & NEW ENGLAND TRUCKING CO., Post Office Box 67, 211 Washington Avenue, Dravosburg, Pa., of a portion of the operating rights of TOLEDO CARTAGE COMPANY (K. V. NICOLA, TRUSTEE IN BANKRUPTCY), 1277 East 40th Street, Cleveland, Ohio, 44114, and for acquisition by FREDERICK T. HILLER, also of Dravosburg, Pa., of control of such rights through the purchase. Applicants' attorneys: Henry B. Johnson, 730 Standard Building, Cleveland, Ohio, 44113, K. V. Nicola, 1205 Terminal Building, Cleveland, Ohio, 44113, and A. Charles Tell, 44 East Broad Street, Columbus, Ohio, 43215. Operating rights sought to be transferred: Heavy machinery, and articles which because of their size or weight require specialized handling or rigging, as a common carrier, over irregular routes, between points in Fulton, Ottawa, Sandusky, Wood, and Erie Counties, Ohio, on the one hand, and, on the other, points in Michigan, on and south of the U.S. Highway 12; *cement*, from Baybridge, Ohio, to points in the lower peninsula of Michigan; *empty containers and skids*, used in the transportation of cement, from points in the above-specified destination territory to Baybridge, Ohio; and *cement*, in bags and in bulk, from points in Monroe County, Mich., to points in Indiana and Ohio. Vendee is authorized to operate as a *common carrier* in Ohio, Pennsylvania, West Virginia, Maine, New Hampshire, Vermont, Massachusetts, New York, New Jersey, Rhode Island, and Connecticut. Application has been filed for temporary authority under section 210a(b).

MOTOR CARRIERS OF PASSENGERS

No. MC–F–8962 (correction) (CAPITAL MOTOR LINES—PURCHASE (PORTION) — COASTAL STAGES, INC.), published in the December 16, 1964, issue of the FEDERAL REGISTER, on page 17865. The application as published, incorrectly stated that the application was a purchase of a *"portion"*, when in fact, it is a purchase of the *"entire"* operating rights. The operating rights which were inadvertently omitted, and contained in Docket No. MC–105759 Sub-9, are as follows: Passengers and their baggage, and express and newspapers, in the same vehicle with passengers, between Crestview, Fla., and Georgiana, Ala., between Crestview, Fla., and Evergreen, Ala., between Red Level, Ala., and junction Covington County Highway 7, and U.S. Highway 84, serving all intermediate points.

By the Commission.

[SEAL] HAROLD D. McCOY, *Secretary.*

[F.R. Doc. 64–13421; Filed, Dec. 29, 1964; 8:48 a.m.]

[Notice 715]

## MOTOR CARRIER, BROKER, WATER CARRIER, AND FREIGHT FORWARDER APPLICATIONS

DECEMBER 24, 1964.

The following applications are governed by Special Rule 1.247[1] of the Commission's general rules of practice (49 CFR 1.247), published in the FEDERAL REGISTER, issue of December 3, 1963, effective January 1, 1964. These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after date of notice of filing of the application is published in the FEDERAL REGISTER. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest under these rules should comply with § 1.40 of the general rules of practice which requires that it set forth specifically the grounds upon which it is made and specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and six (6) copies of the protest shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or applicant if no representative is named. If the protest includes a request for oral hearing, such request shall meet the requirements of § 1.247(d)(4) of the special rule. Subsequent assignment of these proceedings for oral hearing, if any, will be by Commission order which will be served on each party of record.

[1] Copies of Special Rule 1.247 can be obtained by writing to the Secretary, Interstate Commerce Commission, Washington, D.C., 20423.

No. MC 239 (Sub-No. 22), filed December 10, 1964. Applicant: ECKLAR-MOORE EXPRESS, INC., Forbes Road Extended, Lexington, Ky. Applicant's attorney: Harry V. McChesney, Jr., Seventh Floor, McClure Building, Frankfort, Ky. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment) between Nashville, Tenn., and Lexington, Ky.; from Nashville, Tenn., over U.S. Highway 31–W to junction U.S. Highway 62, at Elizabethtown, Ky., thence over U.S. Highway 62 through Lawrenceburg, Ky., to Versailles, Ky., thence over U.S. Highway 60 to Lexington, Ky., and return over the same route, serving the intermediate points of Lawrenceburg and Versailles, Ky., restricted against the handling of any traffic originating at, destined to or interchanged at Cincinnati, Ohio, or Louisville, Ky., or any point in the Commercial Zone of either city.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Lexington, Ky., or Nashville, Tenn.

No. MC 1042 (Sub-No. 4), filed December 10, 1964. Applicant: C. P. T. FREIGHT, INC., 2600 Calumet Avenue, Hammond, Ind. Applicant's attorney: Eugene L. Cohn, One North LaSalle Street, Chicago 2, Ill. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment (other than those requiring specialized handling or rigging because of size or weight), and those injurious or contaminating to other lading) between the plant site of the Bethlehem Steel Company, Burns Harbor Plant, located in Porter County, Ind., on the one hand, and, on the other, points in Illinois within a territory bounded by a line commencing at the Illinois-Indiana State line, thence west over Illinois Highway 114 to junction Illinois Highway 17, thence west over Illinois Highway 17 to junction U.S. Highway 66, thence southwest over U.S. Highway 66 to junction U.S. Highway 24, thence west over U.S. Highway 24 to junction U.S. Highway 150, thence northwest over U.S. Highway 150 to junction Illinois Highway 88, thence north over Illinois Highway 88 to junction Illinois Highway 2, thence north and northeast over Illinois Highway 2 to the Illinois-Wisconsin State line, including all points on the aforesaid highways.

NOTE: Applicant states no duplicating authority is sought. If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 1630 (Sub-No. 6), filed December 11, 1964. Applicant: D. D. JONES TRANSFER & WAREHOUSE COMPANY, INCORPORATED, 225 West Main Street, Norfolk, Va. Applicant's attorney: Morton E. Kiel, 140 Cedar Street, New York 6, N.Y. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Gypsum, gypsum products*, and *building materials*, between the plant site or warehouse of the United States Gypsum Company, Norfolk, Va., on the one hand, and on the other, points in North Carolina.

NOTE: Applicant states that no duplicating authority is sought. If a hearing is deemed necessary, applicant requests it be held at Atlanta, Ga.

No. MC 1759 (Sub-No. 18), filed December 14, 1964. Applicant: FROEHLICH TRANSPORTATION CO., INC., 31 Victory Street, Stamford, Conn. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Bakery products* (except unleavened and frozen bakery products), from the plant site of Arnold Bakers, Inc., located at Greenwich, Conn., to points in Massachusetts on and west of U.S. Highway 5, points in Passaic, Bergen, Morris, Somerset, Middlesex and Monmouth Counties, N.J.; Albany, Broome, Chenango, Columbia, Fulton, Delaware, Dutchess, Greene, Montgomery, Nassau, Oneida, Orange, Otsego, Putnam, Rockland, Rensselaer, Saratoga, Schenectady, Schoharie, Suffolk, Sullivan, Ulster, Warren, Washington, Westchester, Tioga, Chemung, Tompkins, Cortland, Cayuga, Onondaga, Madison, and Herkimer Counties, N.Y., and that part of the New York, N.Y., Commercial Zone which lies within the State of New York, and Bennington and Rutland Counties, Vt., and *stale, damaged, refused, and rejected shipments of bakery products*, on return.

NOTE: If a hearing is deemed necessary, applicant requests it be held at New York, N.Y.

No. MC 2392 (Sub-No. 35), filed December 16, 1964. Applicant: WHEELER TRANSPORT SERVICE, INC., Box 432, Genoa, Nebr. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Anhydrous ammonia*, in bulk, in tank vehicles, from the plant site of Monsanto Company terminal at or near Murphy, Nebr., to points in Colorado, Iowa, Kansas, Missouri, South Dakota, and Wyoming, and *damaged and rejected shipments* of the above named commodities, on return.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Omaha, Nebr.

No. MC 3261 (Sub-No. 34), filed December 10, 1964. Applicant: KRAMER-CONSOLIDATED FREIGHT LINES,

INC., 4195 Central Avenue, Detroit, Mich., 48210. Applicant's attorney: Walter N. Bieneman, Suite 1700—One Woodward Avenue, Detroit, Mich., 48226. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, and except dangerous explosives, livestock, household goods as defined in *Practices of Motor Common Carriers of Household Goods*, 17 M.C.C. 467, and those requiring special equipment) (1) from junction Michigan Highway 54 (formerly U.S. Highway 10) and Michigan Highway 57 near Clio, Mich., and thence over Michigan Highway 57 to junction Michigan Highway 47 near Chesaning, Mich., and return over the same route, serving applicant's authorized intermediate points of Clio and Chesaning and the junction of Michigan Highways 57 and 13, (2) from Flushing, Mich., over unnumbered highway known as Pierson Road to junction Michigan Highway 13, and return over the same route, serving no intermediate points, (3) from Saginaw, Mich., over Michigan Highway 13 to junction Michigan Highway 78, and return over the same route, serving no intermediate points except the junction Michigan Highways 13 and 57, and the junction Michigan Highways 13 and 21, (4) from Zilwaukee, Mich., over unnumbered highway known as Titabawassee Road to junction with Michigan Highway 47 (formerly U.S. Highway 10) and return over the same route, serving only those intermediate points in the Commercial Zone of Saginaw as presently authorized, and (5) from junction Michigan Highway 47 and Garfield Road near Freeland, Mich., thence over Garfield Road to junction Midland Road (formerly Michigan Highway 20) near Auburn, Mich., and return over the same route, serving only those intermediate points within the Commercial Zones of Freeland, Fisherville, and Auburn as presently authorized.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Lansing, Mich.

No. MC 11207 (Sub-No. 230), filed December 17, 1964. Applicant: DEATON TRUCK LINE, INC., 3409 10th Avenue North, Birmingham, Ala. Applicant's attorney: A. Alvis Layne, Pennsylvania Building, Washington, D.C., 20004. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Gypsum, gypsum products and building materials* from Jacksonville, Fla. to points in Alabama.

NOTE: Applicant states the proposed operations will be restricted to the plant site and warehouses of United States Gypsum Co., located at Jacksonville, Fla. If a hearing is deemed necessary, applicant requests it be held at Jacksonville, Fla.

No. MC 13123 (Sub-No. 31), filed December 14, 1964. Applicant: WILSON FREIGHT FORWARDING COMPANY, a corporation, 3636 Follett Avenue, Cincinnati, Ohio. Applicant's attorney: Milton H. Bortz, Wilson Freight Forwarding Company, 3636 Follett Avenue, Cincinnati, Ohio. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), (A) between South Charleston, Ohio and Washington Court House, Ohio, over Ohio Highway 41; (B) between Xenia, Ohio and Wilmington, Ohio, over U.S. Highway 68; (C) between Xenia, Ohio and Chillicothe, Ohio, over U.S. Highway 35; (D) between Columbus, Ohio and Chillicothe, Ohio, over U.S. Highway 23; (E) between Cedarville, Ohio and Sabina, Ohio, over Ohio Highway 72; (F) between South Charleston, Ohio and Wilmington, Ohio; from South Charleston, over Ohio Highway 41 to junction Interstate Highway 71, thence over Interstate Highway 71 to junction U.S. Highway 68, thence over U.S. Highway 68 to Wilmington, and return over the same route, (G) between London, Ohio and Circleville, Ohio, over Ohio Highway 56; (H) between Springfield, Ohio and Urbana, Ohio over U.S. Highway 68; and (I) between Springfield, Ohio and Troy, Ohio, over Ohio Highway 41, serving no intermediate points except for the purpose of joinder only, as alternate routes for operating convenience only, in connection with applicant's authorized regular-route operations.

NOTE: Applicant states it seeks no authority to serve points it is not already authorized to serve. The purpose of this application is to conduct pickup and delivery operations at its authorized service points in the area from its new terminal at South Charleston, Ohio instead of from its old terminals at Dayton and Columbus, Ohio which old terminals have been replaced by said South Charleston, Ohio terminal. If a hearing is deemed necessary applicant requests it be held at Cincinnati, Ohio.

No. MC 21531 (Sub-No. 4), filed December 15, 1964. Applicant: STEWART TRUCKING CO., INC., 18 Beech Street, Manchester, N.H. Applicant's attorney: Leonard A. Jaskiewicz, 1155 15th Street NW., Washington, D.C., 20005. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, livestock, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading), between Boston, Mass., and Colebrook, N.H.; (1) from Boston, Mass., over U.S. Highway 1 through Newburyport, Mass., to Portsmouth, N.H., thence over U.S. Highway 4 to junction New Hampshire Highway 16, thence over New Hampshire Highway 16 through Dover, N.H., to Errol, N.H., thence over New Hampshire Highway 26 to Colebrook, N.H., and return over the same route, serving all intermediate points north of Rochester, N.H., and restricted at Exeter and Durham, N.H., to the delivery of groceries on northbound traffic only, (2) from Boston, Mass., over U.S. Highway 1 to Newburyport, Mass., thence over unnumbered highway to junction Massachusetts Highway 110, thence over Massachusetts Highway 110 to Amesbury, Mass., thence over Massachusetts Highway 150 to the Massachusetts-New Hampshire State line, thence over New Hampshire Highway 150 to junction New Hampshire Highway 108, thence over New Hampshire Highway 108 to Dover, N.H., thence over New Hampshire Highway 16 to Errol, N.H., thence over New Hampshire Highway 26 to Colebrook, N.H., and return over the same route, serving all intermediate points north of Rochester, N.H., and restricted at Exeter and Durham, N.H., to the delivery of groceries on northbound traffic only, (3) from Boston, Mass., over U.S. Highway 3 through Plymouth, N.H., to junction New Hampshire Highway 18, thence over New Hampshire Highway 18 to Littleton, N.H., thence over New Hampshire Highway 116 to Whitefield, N.H., thence over U.S. Highway 3 to Colebrook, N.H., and return over the same route, serving all intermediate points north of Plymouth, N.H., and (4) from Boston, Mass., over Massachusetts Highway 28 to the Massachusetts-New Hampshire State line, thence over New Hampshire Highway 28 to Manchester, N.H., thence over New Hampshire Highway 3A to Concord, N.H., thence over U.S. Highway 3 to Franklin, N.H., thence over New Hampshire Highway 3A to junction New Hampshire Highway 25, thence over New Hampshire Highway 25 to Plymouth, N.H., thence over U.S. Highway 3 to junction New Hampshire Highway 18, thence over New Hampshire Highway 18 to Littleton, N.H., thence over New Hampshire Highway 116 to Whitefield, N.H., thence over U.S. Highway 3 to Colebrook, N.H., and return over the same route, serving all intermediate points north of Plymouth, N.H., and the off-route points of Bartlett, Bethlehem, Bretton Woods, Crawford Notch, Jefferson, Twin Mountain, and Fabyan, N.H., and those in Massachusetts within five miles of Boston, Mass., and restricted at Lynn and Beverly, Mass., to delivery only.

NOTE: Applicant states that the purpose of this application is "solely to remove the seasonal restriction to a portion of applicant's authority in No. MC 21531." If a hearing is deemed necessary, applicant requests it be held at Manchester, N.H., or Boston, Mass.

No. MC 24115 (Sub-No. 16), filed December 14, 1964. Applicant: EDYTHE MAE KESSMAN, Post Office Box 95, Hamel, Ill. Applicant's attorney: B. W. LaTourette, Jr., Suite 1230 Boatmen's Bank Building, St. Louis, Mo., 63102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Lumnite cement*, from Buffington, Ind., to St. Louis, Mo., (2) *powdered silica sand* (Potters Flint), from Ottawa, Ill., to St. Louis, Mo., and (3) *crude fire clay*, from Mayfield, Ky., and Clover, S.C., to St. Louis, Mo.

NOTE: If a hearing is deemed necessary, applicant requests it be held at St. Louis, Mo.

No. MC 25798 (Sub-No. 121), filed December 4, 1964. Applicant: CLAY HYDER TRUCKING LINES, INC., 301 Highway North, Dade City, Fla. Applicant's attorney: Daniel B. Johnson, 1815 H Street NW., Washington, D.C. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, meat byproducts*, and *articles distributed by meat packinghouses*, as described in Sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766, from Mason City, Iowa to points in Alabama, Georgia, Florida, Kentucky, Maryland, North Carolina, South Carolina, Tennessee, Virginia, Delaware, West Virginia, and the District of Columbia.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 27063 (Sub-No. 11), filed December 14, 1964. Applicant: LIBERTY TRANSFER COMPANY, INC., 1601 Cuba Street, Baltimore, Md. Applicant's attorney: S. Harrison Kahn, Suite 733, Investment Building, Washington, D.C. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Liquid starch, spray starch, and fabric softeners, in mixed loads with condiments, vegetable oils, butter and lard substitutes* from Bayonne, N.J. to Baltimore, Md. and Washington, D.C.

NOTE: If a hearing is deemed necessary, applicant requests it be held at New York, N.Y.

No. MC 28961 (Sub-No. 18), filed December 10, 1964. Applicant: McDUFFEE MOTOR FREIGHT, INC., 332 Hood Avenue, Lebanon, Ky. Applicant's attorney: Harry V. McChesney, Jr., McClure Building, Frankfort, Ky. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between Nashville, Tenn. and Lexington, Ky., from Nashville over U.S. Highway 31–W to junction U.S. Highway 62 at Elizabethtown, Ky., thence over U.S. Highway 62 to Versailles, Ky. and thence over U.S. Highway 60 to Lexington and return over the same route serving the intermediate points of Bardstown, and Bloomfield, Ky. and (2) between Nashville, Tenn. and Lebanon, Ky. from Nashville over U.S. Highway 31–W to Cave City, Ky., thence over Kentucky Highway 70 to junction U.S. Highway 68 near Sulphur Well, Ky., thence over U.S. Highway 68 to Lebanon and return over the same route serving all intermediate points between Greensburg and Lebanon, Ky., including Greensburg, Ky.

NOTE: Routes (1) and (2) above will be restricted against the handling of any traffic originating at, destined to or interchanged at Cincinnati, Ohio or Louisville, Ky. or any point in the commercial zone of either city. Applicant is also authorized to conduct operations as a contract carrier in Permit MC 119374 therefore, dual operations may be involved. If a hearing is deemed necessary, applicant requests it be held at Lexington, Ky. or Nashville, Tenn.

No. MC 29555 (Sub-No. 42), filed December 9, 1964. Applicant: BRIGGS TRANSPORTATION CO., a corporation, 2360 West County Road "C", St. Paul 13, Minn. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, livestock, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment (except those requiring temperature control) and those injurious or contaminating to other lading), serving the plant site of Bethlehem Steel Company, Burns Harbor, Ind., located on U.S. Highway 12, as an off-route point in connection with applicant's regular-route operations in Wisconsin, Minnesota, Illinois, Iowa, Nebraska, and the portion of Indiana included in the commercial zone of Chicago, Ill.

NOTE: Applicant states that part of the plant is in the town of Portage, Ind., and part is located east thereof extending into the community known as Dune Acres, Ind. If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC31600 (Sub-No. 578), filed December 14, 1964. Applicant: P. B. MUTRIE MOTOR TRANSPORTATION, INC., Calvary Street, Waltham, Mass. Applicant's attorney: Harry C. Ames, Jr., Transportation Building, Washington, D.C. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Liquid and dry bulk commodities*, from Camden and Jersey City, N.J., to points in Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, District of Columbia, Virginia, West Virginia, Ohio, Indiana, Illinois, and Michigan.

NOTE: Applicant states that the proposed service will be restricted to shipments having a prior movement by railroad. If a hearing is deemed necessary applicant requests it be held at New York, N.Y.

No. MC 50002 (Sub-No. 44), filed December 10, 1964. Applicant: T. CLARENCE BRIDGE AND HENRY W. BRIDGE, a co-partnership, doing business as BRIDGE BROTHERS, North Santa Fe Trail, Lamar, Colo. Applicant's attorney: C. Zimmerman, 503 Schweiter Building, Wichita, Kans., 67202. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Anhydrous ammonia and fertilizer solutions*, in bulk, in tank vehicles and *dry fertilizer*, in bulk, from the plant site of Cominco Products, Inc., at or near Hoag, Nebr., to points in Iowa, Missouri, Kansas, Colorado, and Wyoming, and *damaged or rejected shipments*, on return.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Omaha, Nebr.

No. MC 55896 (Sub-No. 20) (AMENDMENT), filed November 25, 1964, published FEDERAL REGISTER issue of December 9, 1964, amended December 17, 1964, and republished, as amended, this issue. Applicant: R. W. EXPRESS, INC., 4840 Wyoming Avenue, Dearborn, Mich. Applicant's attorney: Rex Eames, 1800 Buhl Building, Detroit, Mich., 48226. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, and except dangerous explosives, household goods as defined in *Practices of Motor Common Carriers of Household Goods*, 17 M.C.C. 467, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading), between Burns Harbor, Porter County, Ind., on the one hand, and, on the other, points in Illinois, Indiana, Michigan, Ohio, and St. Louis, Mo.

NOTE: The purpose of this republication is to broaden the proposed operation. If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 57757 (Sub-No. 5), filed December 1, 1964. Applicant: J. MOODY ELLINGTON (DECEASED) AND SUE E. ELLINGTON, doing business as ELLINGTON TRANSFER & WAREHOUSE COMPANY, 1902 Main Street, Alexandria, La. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Household goods*, as defined by the Commission, packed and unpacked, crated and uncrated, and for the purpose of packing, unpacking, crating and uncrating, between Alexandria, La., on the one hand, and, on the other, points in Louisiana within one hundred (100) miles of Alexandria, on traffic originating at or destined to out-of-state points.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Baton Rouge, La.

No. MC 59150 (Sub-No. 17), filed December 14, 1964. Applicant: PLOOF TRANSFER COMPANY, INC., 1901 Hill Street, Jacksonville, Fla. Applicant's attorney: Martin Sack, Atlantic National Bank Building, Jacksonville 2, Fla. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Building materials, gypsum, and gypsum products*, from the plant site and warehouses of U.S. Gypsum Co., at Jacksonville, Fla., to points in Alabama.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Jacksonville, Fla.

No. MC 61403 (Sub-No. 116), filed December 14, 1964. Applicant: THE MASON AND DIXON TANK LINES, INC., Eastman Road, Kingsport, Tenn. Applicant's attorney: W. C. Mitchell, 140 Cedar Street, New York 6, N.Y. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Acids and chemicals*, in bulk, in tank vehicles, from The Tri-City Regional Port Complex, located in Madison County, Ill., to points in the United States (except Alaska and Hawaii).

NOTE: If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 68980 (Sub-No. 5), filed December 14, 1964. Applicant: CHECKER EXPRESS CO., a corporation, 960 West Montana, Milwaukee, Wis. Applicant's attorney: Glenn W. Stephens, 121 West Doty Street, Madison, Wis., 53703. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value,

and except high explosives, household goods (when transported as a separate and distinct service in connection with so-called "household movings"), commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading), serving the plant site of Midwest Steel Co., a Division of National Steel Co., Portage, Ind., as an off-route point in connection with applicant's regular route operations in Wisconsin.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Indianapolis, Ind.

No. MC 70151 (Sub-No. 37), filed December 14, 1964. Applicant: UNITED TRUCKING SERVICE, INCORPORATED, 3047 Lonyo Road, Detroit 9, Mich. Applicant's attorney: Archie C. Fraser, 1400 Michigan National Tower, Lansing, Mich., 48933. Authority sought to operate as a *common carrier*, by motor vehicle, over a regular route, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, livestock, household goods as defined in *Practices of Motor Common Carriers of Household Goods*, 17 M.C.C. 467, commodities in bulk, not including salt in bulk, and those requiring special equipment), between Cincinnati and Columbus, Ohio, over Interstate Highway 71, serving no intermediate points, as an alternate route for operating convenience only in connection with applicant's regular-route operations.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Columbus, Ohio.

No. MC 76985 (Sub-No. 4), filed December 14, 1964. Applicant: LAVERY TRANSPORTATION, INC., 7430 South Ashland Avenue, Chicago, Ill., 60636. Applicant's attorney: Eugene L. Cohn, One North La Salle Street, Chicago 2, Ill. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment (other than those requiring specialized handling or rigging because of size or weight), and those injurious or contaminating to other lading), serving the plant site of the Bethlehem Steel Company, Burns Harbor Plant, located in Porter County, Ind., as an off-route point in connection with applicant's authorized regular-route operations in Illinois, Indiana and Wisconsin.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 77588 (Sub-No. 2), filed December 11, 1964. Applicant: GREER TRUCKING COMPANY, INC., 138 East 11th Avenue, Roselle, N.J. Applicant's representative: George A. Olsen, 69 Tonnele Avenue, Jersey City, N.J., 07306. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such commodities* as are dealt in by manufacturers of copying, duplicating and reproducing machines, and *materials, supplies and equipment* used in the distributing, operation, and maintenance of such machines, between the plant site of Xerox Corporation at Blauvelt, N.Y., on the one hand, and, on the other, points in New Jersey, New York, N.Y., and points in Nassau and Suffolk Counties, N.Y.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Washington, D.C., or New York, N.Y.

No. MC 86003 (Sub-No. 13), filed December 14, 1964. Applicant: HOWARD G. SLAUGHTER, doing business as SLAUGHTER BEVERAGE TRANSPORT, RFD, Townsend, Del. Applicant's representative: Donald E. Freeman, 172 East Green Street, Westminster, Md. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Rotex dust* from Dover, Del., to Camden, N.J., under a continuing contract with U.S. Cocoa Corporation, Camden, N.J.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 94265 (Sub-No. 146), filed December 10, 1964. Applicant: BONNEY MOTOR EXPRESS, INC., Post Office Box 12388, Thomas Corner Station, Norfolk, Va. Applicant's attorney: E. Stephen Heisley, Transportation Building, Washington, D.C. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foods*, from La Porte, Ind. to points in Illinois, Wisconsin, Minnesota, Iowa, Missouri, Kansas, Nebraska, South Dakota, Colorado, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, and the District of Columbia.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 94350 (Sub-No. 47), filed December 14, 1964. Applicant: TRANSIT HOMES, INC., 210 West McBee Avenue, Post Office Box 1628, Greenville, S.C. Applicant's attorney: Henry P. Willimon, Box 1075, Greenville, S.C. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Trailers and special purpose trailers* designed to be drawn by passenger automobiles, in initial movements from Cross Hill, S.C., to points in Louisiana and points in states east of the Mississippi River, namely, Alabama, Connecticut, Delaware, Florida, Georgia, Illinois, Indiana, Kentucky, Maine, Maryland, Michigan, Massachusetts, Mississippi, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Carolina, Tennessee, Vermont, Virginia, West Virginia, Wisconsin, New Hampshire, and the District of Columbia, and *damaged or rejected shipments* on return.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Columbia, S.C.

No. MC 95180 (Sub-No. 10), filed December 9, 1964. Applicant: HARRY SMOLOWITZ AND MORRIS SMOLOWITZ, a partnership, doing business as SMOLOWITZ BROS., 909 Utica Avenue, Brooklyn, N.Y. Applicant's attorney: Morris Honig, 150 Broadway, New York 38, N.Y. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Household goods*, as defined by the Commission, between points in New York, New Jersey, Connecticut, Massachusetts, Pennsylvania, Delaware, Maryland, Rhode Island, Ohio, Virginia, Vermont, New Hampshire, Maine, Illinois, Indiana, Michigan, North Carolina, South Carolina, Georgia, Florida, West Virginia, Kentucky, Tennessee, Alabama, Iowa, Wisconsin, Missouri, and the District of Columbia.

NOTE: Applicant states this application is filed for the dual purpose of clarifying its operating authority, and for the purpose of eliminating gateways so that the authority becomes non-radial between the states it is now authorized to serve. Applicant holds contract carrier authority under MC 109890, therefore dual operations may be involved. If a hearing is deemed necessary, applicant requests it be held at New York, N.Y.

No. MC 105269 (Sub-No. 36), filed December 10, 1964. Applicant: GRAFF TRUCKING COMPANY, INC., 2110 Lake Street, Kalamazoo, Mich. Applicant's attorney: Robert D. Schuler, Suite 1700–1 Woodward Avenue, Detroit, Mich., 48226. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Paper* and *paper products* from South Bend, Ind., to Louisville, Ky., St. Louis, Mo., Davenport, Iowa, and Milwaukee, Wis., and points in Illinois, Indiana, Michigan, and Ohio and *pallets* and *damaged or rejected shipments* on return.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Lansing, Mich.

No. MC 105269 (Sub-No. 37), filed December 14, 1964. Applicant: GRAFF TRUCKING COMPANY, INC., 2110 Lake Street, Kalamazoo, Mich. Applicant's attorney: Eugene C. Ewald, Suite 1700 One Woodward Avenue, Detroit, Mich., 48226. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Wastepaper* from Covington, Ky., to points in Michigan.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Lansing, Mich.

No. MC 105461 (Sub-No. 63), filed December 15, 1964. Applicant: HERR'S MOTOR EXPRESS, INC., Quarryville, Pa. Applicant's representative: Bernard N. Gingerich, Herr's Motor Express, Inc., Quarryville, Pa. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Furniture, play yards, cribs*, and *walkers*, from Newburgh, N.Y., to points in Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont, and points in Ashtabula, Belmont, Carroll, Columbiana, Cuyahoga, Geauga, Harrison, Jefferson, Lake, Lorain, Mahoning, Medina, Portage, Stark, Summit, Trumbull, Tuscarawas, and Wayne Counties, Ohio.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 106163 (Sub-No. 17), filed November 6, 1964. Applicant: RED LINE TRANSFER AND STORAGE COMPANY, INC., 2600 West Sixth Avenue, Pine Bluff, Ark. Applicant's attorney: Louis Tarlowski, Pyramid Life Building, Little Rock, Ark. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), (1) between Pine Bluff, Ark., and the site of Lock and Dam No. 3 on the Arkansas River; from Pine Bluff over U.S. Highway 79 to junction Arkansas Highway 88, thence over Arkansas Highway 88 to junction unnumbered access road, thence over unnumbered access road to the site of Lock and Dam No. 3, and return over the same route, serving no intermediate points, (2) between Pine Bluff, Ark., and the site of Lock and Dam No. 3 on the Arkansas River; from Pine Bluff over U.S. Highway 79 to junction County Road 53 and Arkansas Highway 88, thence over County Road 53 and Arkansas Highway 88 to junction unnumbered access road, thence over unnumbered access road to the site of Lock and Dam No. 3, and return over the same route, serving no intermediate points, (3) between Pine Bluff, Ark., and the site of Lock and Dam No. 4 on the Arkansas River; from Pine Bluff over U.S. Highway 79 to junction Arkansas Highway 88, thence over Arkansas Highway 88 to junction County Road 53, thence over County Road 53 to junction unnumbered access road, and thence over unnumbered access road to site of Lock and Dam No. 4, and return over the same route, serving no intermediate points, and (4) between Pine Bluff, Ark., and the site of Lock and Dam No. 4 on the Arkansas River; from Pine Bluff over U.S. Highway 79 to junction County Road 53, and thence over County Road 53 to junction unnumbered access road, and thence over unnumbered access road to the site of Lock and Dam No. 4, and return over the same route, serving no intermediate points.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Little Rock, Ark.

No. MC 106297 (Sub-No. 36), filed December 17, 1964. Applicant: MID-STATES TRAILER TRANSPORT, INC., Post Office Box 243, Oak Glen Station, Lansing, Ill. Applicant's attorney: Joseph M. Scanlan, 111 West Washington Street, Chicago 2, Ill. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Mobile homes*, designed to be drawn by passenger automobiles, and *equipment, furnishings and accessories*, when moving as a part of and in conjunction therewith from points in Adams County, Wis., and Logan County, Ky., to points in the United States including Alaska (but excluding Hawaii).

NOTE: If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 107403 (Sub-No. 594), filed December 11, 1964. Applicant: MATLACK, INC., 10 West Baltimore Avenue, Lansdowne, Pa. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Chemicals*, dry, in bulk, from Ironton and South Point, Ohio, to points in Illinois, Indiana, Kentucky, Michigan, New York, Pennsylvania, Virginia, and West Virginia.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 107496 (Sub-No. 343) (AMENDMENT) filed December 7, 1964, published FEDERAL REGISTER issue December 23, 1964, amended and republished this issue. Applicant: RUAN TRANSPORT CORPORATION, 303 Keosauqua Way, Des Moines, Iowa. Applicant's attorney: H. L. Fabritz, 303 Keosauqua Way, Des Moines, Iowa.

NOTE: The purpose of this republication is to correctly show origin point as Fulton, Ind., in lieu of Fulton, Ill., as shown in previous publication. If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 107496 (Sub-No. 344), filed December 10, 1964. Applicant: RUAN TRANSPORT CORPORATION, 303 Keosauqua Way, Des Moines, Iowa. Applicant's attorney: H. L. Fabritz, Box 855, Des Moines, Iowa. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Fertilizer and fertilizer ingredients*, in bags, from the plant and warehouses of Nitrin, Inc., located at or near Cordova, Ill., to points in Iowa, Nebraska, Minnesota, Missouri, Wisconsin, Indiana, Kentucky, North Dakota, South Dakota, Kansas, Ohio, and Michigan.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 107496 (Sub-No. 345), filed December 11, 1964. Applicant: RUAN TRANSPORT CORPORATION, 303 Keosauqua Way, Des Moines, Iowa. Applicant's attorney: H. L. Fabritz, Box 855, Des Moines, Iowa. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Fertilizer and fertilizer ingredients*, from Olathe, Kans. to points in Nebraska.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Des Moines, Iowa.

No. MC 107496 (Sub-No. 346), filed December 11, 1964. Applicant: RUAN TRANSPORT CORPORATION, 303 Keosauqua Way, Des Moines, Iowa. Applicant's attorney: H. L. Fabritz, Post Office Box 855, Des Moines, Iowa. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Fertilizer and fertilizer ingredients*, in bulk, from Dubuque, Iowa, and points in Iowa within 10 miles thereof to points in Illinois, Iowa, Minnesota, Missouri, and Wisconsin.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Des Moines, Iowa.

No. MC 107496 (Sub-No. 347), filed December 16, 1964. Applicant: RUAN TRANSPORT CORPORATION, 303 Keosauqua Way, Des Moines, Iowa. Applicant's attorney: H. L. Fabritz, Box 855, Des Moines, Iowa. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Anhydrous ammonia*, in bulk, in tank vehicles, from the site of Monsanto Company's Terminal located at or near Murphy, Nebr., to points in Colorado, Iowa, Kansas, Missouri, South Dakota, and Wyoming.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Omaha, Nebr.

No. MC 107515 (Sub-No. 505), filed December 9, 1964. Applicant: REFRIGERATED TRANSPORT CO., INC., 290 University Avenue SW., Atlanta, Ga. Applicant's attorney: Paul M. Daniell, Suite 1600, First Federal Building, Atlanta, Ga., 30303. NOTE: If a hearing is deemed necessary, applicant requests it be held at San Antonio, Tex.

No. MC 107698 (Sub-No. 34), filed December 11, 1964. Applicant: BONANZA, INC., Post Office Box 5526, Midwest City, Okla. Applicant's attorney: Wilburn L. Williamson, 443–54 American Nat'l Building, Oklahoma City 2, Okla. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Dairy products, chilled and frozen bakery products, frozen fruits, frozen vegetables, frozen berries, frozen french fries, frozen pizza, and pizza pie ingredients*, between points in Colorado, on the one hand, and, on the other, points in Oklahoma, Texas, and New Mexico.

NOTE: If a hearing is deemed necessary applicant requests it be held at Denver, Colo.

No. MC 107757 (Sub-No. 22), filed December 16, 1964. Applicant: M. C. SLATER, INC., Post Office Box 369, Granite City, Ill. Applicant's attorney: Eugene L. Cohn, One North La Salle Street, Chicago 2, Ill. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment (other than those requiring specialized handling or rigging because of size or weight), and those injurious or contaminating to other lading), serving the plantsite of the Bethlehem Steel Company, Burns Harbor Plant, located in Porter County, Ind., as an off-route point in connection with applicant's authorized regular-route operations in Illinois, Indiana, and Missouri.

NOTE: Applicant states no duplicating authority is sought. If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 109478 (Sub-No. 79), filed December 9, 1964. Applicant: WORSTER MOTOR LINES, INC., East Main Road,

Rural Delivery No. 1, North East, Pa. Applicant's attorney: William W. Knox,

carrier, by motor vehicle, over irregular routes, transporting: *Natural latex*, in

carrier, by motor vehicle, over irregular routes, transporting: *Anhydrous am-*

No. MC 113828 (Sub-No. 74), filed December 16, 1964. Applicant: O'BOYLE

cago 2, Ill. Authority sought to operate as a *common carrier*, by motor vehicle,

Iowa, Michigan, Kansas, Oklahoma, and New York.

Rural Delivery No. 1, North East, Pa. Applicant's attorney: William W. Knox, 23 West 10th Street, Erie, Pa., 16501. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Empty containers and parts therefor*, from Mifflin Junction, Pa., and Clarksburg, W. Va., to Lawton, Mich.

NOTE: Applicant states no duplicating authority is sought. Applicant already holds authority to make the above movements through North East, Pa. The purpose of the application is to eliminate this gateway. If a hearing is deemed necessary, applicant requests it be held at Pittsburgh, Pa., or Washington, D.C.

No. MC 109637 (Sub-No. 271), filed December 14, 1964. Applicant: SOUTHERN TANK LINES, INC., 4107 Bells Lane, Louisville, Ky. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Anhydrous ammonia, nitrogen fertilizer solutions, ammoniating solutions and aqua ammonia*, in bulk, in tank vehicles, from the plantsite of Southern Nitrogen Company, Inc., located at or near Columbia Park (Finney), Hamilton County, Ohio, to points in Illinois, Indiana, and the lower peninsula of Michigan.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 109689 (Sub-No. 160), filed December 10, 1964. Applicant: W. S. HATCH CO., a corporation, 643 South 800 West, Woods Cross, Utah. Applicant's attorney: Mark K. Boyle, 345 South State Street, Salt Lake City 1, Utah. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Nitric Acid*, in bulk, from Louviers, Colo., to points in Sweetwater County, Wyo.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Denver, Colo.

No. MC 110193 (Sub-No. 81), filed December 11, 1964. Applicant: SAFEWAY TRUCK LINES, INC., 20450 Ireland Road, South Bend, Ind. Applicant's representative: Walter J. Kobos, 20450 Ireland Road, South Bend, Ind. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foods*, from Buffalo, N.Y., to South Bend, Mishawaka, Elkhart, Holland, Peru, Goshen, Richmond, Fort Wayne, Logansport, Indianapolis, La Porte, Lafayette, Berne and Evansville, Ind.; Carbondale, Champaign, Danville, Decatur, Joliet, Streator, Kankakee, Rockford, Peoria, Springfield, Rock Island, Milan, and Moline, Ill.; St. Louis, Mo.; and Duluth, Minn .

NOTE: If a hearing is deemed necessary, applicant requests it be held at Buffalo, N.Y., or Washington, D.C.

No. MC 110525 (Sub-No. 694), filed December 14, 1964. Applicant: CHEMICAL LEAMAN TANK LINES, INC., 520 East Lancaster Avenue, Downingtown, Pa. Applicant's attorneys: Leonard A. Jaskiewicz, 1155 15th Street NW., Madison Building, Washington, D.C., 20005; and Edwin H. van Deusen, 506 East Lancaster Avenue, Downingtown, Pa. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Natural latex*, in bulk, from New Haven, Conn., to Naugatuck, Conn.

NOTE: Applicant states the above proposed operations will be restricted to traffic having a prior movement by water. If a hearing is deemed necessary, applicant requests it be held at Hartford, Conn.

No. MC 110988 (Sub-No. 101), filed December 10, 1964. Applicant: KAMPO TRANSIT, INC., 200 West Cecil Street, Neenah, Wis. Applicant's attorneys: Harry C. Ames, Jr., Transportation Building, Washington, D.C., 20006; and E. Stephen Heisley (same address). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Fertilizer and fertilizer materials*, in bulk, in tank or hopper-type vehicles, and in bags, from Chicago and Chicago Heights, Ill., to points in Iowa, Indiana, Michigan, and Wisconsin.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 110988 (Sub-No. 102), filed December 10, 1964. Applicant: KAMPO TRANSIT, INC., 200 West Cecil Street, Neenah, Wis. Applicant's attorney Harry C. Ames, Jr., Transportation Building, Washington, D.C., 20006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Fertilizer, fertilizer solutions, and fertilizer materials*, in bulk, and in bags, from Erie, Ill., and points within five (5) miles thereof, to points in Indiana, Iowa, Michigan, Wisconsin, Illinois, Minnesota, and Missouri.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 110988 (Sub-No. 103), filed December 10, 1964. Applicant: KAMPO TRANSIT, INC., 200 West Cecil Street, Neenah, Wis. Applicant's attorney: Harry C. Ames, Jr., Transportation Building, Washington, D.C., 20006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Fertilizer and fertilizer materials*, in bulk, from Delmar, Iowa, to points in Illinois, Indiana, Michigan, and Wisconsin.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 111045 (Sub-No. 44), filed December 16, 1964. Applicant: REDWING CARRIERS, INC., Post Office Box 426, Palm River Road, Tampa, Fla. Applicant's attorney: Frank B. Hand, Jr., 921 17th Street NW., Washington 6, D.C. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Chemicals* in bulk, from points in Nassau County, Fla., to points in Georgia and Alabama.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Tampa, Fla.

No. MC 111302 (Sub-No. 29), filed December 14, 1964. Applicant: HIGHWAY TRANSPORT, INC., Albany Highway (Post Office Box XX), Thomasville, Ga. Applicant's representative: Lamar Kennedy, Vice President, Highway Transport, Inc. (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Anhydrous ammonia, nitrogen fertilizers, ammoniating solutions* and *aqua ammonia*, in bulk, in tank vehicles, from the plantsite of Southern Nitrogen, Inc., at or near Columbia Park (Finney), Hamilton County, Ohio, to points in Illinois, Indiana, and the lower peninsula of Michigan.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 113666 (Sub-No. 19), filed December 14, 1964. Applicant: FREEPORT TRANSPORT, INC., 1200 Butler Road, Freeport, Pa. Applicant's attorney: James W. Hagar, Commerce Building, Harrisburg, Pa. Authority sought to operate as a *common carrier* by motor vehicle, over irregular routes, transporting: (1) *Cast stone, cast stone panels, mortar and application instructions*, and *advertising materials and supplies*, when moving with shipments of cast stone and cast stone panels from Sebring, Ohio, to points in the United States east of and including Texas, Oklahoma, Kansas, Nebraska, South Dakota, and North Dakota and (2) *iron oxide pigments*, from Philadelphia, Pa., to Sebring, Ohio.

No. MC 126798, filed December 11, 1964. Applicant: BEN J. TEATER AND EFFIE N. TEATER, a partnership, doing business as BLUE RIBBON DELIVERY SERVICE, Box 21102, Standiford Field, Louisville, Ky. Applicant's attorney: Robert M. Pearce, 221 St. Clair, Frankfort, Ky. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except Classes A and B explosives), (1) between Standiford Field Airport, located at Louisville, Ky., on the one hand, and, on the other, points in Kentucky, Illinois, Indiana, Ohio, Tennessee, and West Virginia, (2) between Greater Cincinnati Airport located near Erlanger, Ky., on the one hand, and, on the other, points in Ohio, Kentucky, Indiana, Tennessee, Illinois, and West Virginia, (3) between Blue Grass Field, located near Lexington, Ky., on the one hand, and, on the other, points in Kentucky, Ohio, Indiana, Illinois, Tennessee, and West Virginia, and (4) between Standiford Field Airport located at Louisville, Ky., Blue Grass Field located near Lexington, Ky., Greater Cincinnati Airport located near Erlanger, Ky., and Weir-Cook Airport located at Indianapolis, Ind.

NOTE: Applicant states the proposed service is to be restricted to the handling of traffic having a prior or subsequent movement by air. If a hearing is deemed necessary applicant requests it be held at Louisville, Ky.

No. MC 126799, filed December 11, 1964. Applicant: VERNON PETERSON AND PAT KEENEY, a partnership, doing business as K&P TRUCKING, 95 Market Street, Oakland, Calif. Applicant's attorney: Daniel W. Baker, 625 Market Street, San Francisco 5, Calif. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities*, between Oakland, Alameda, Richmond, and San Francisco, Calif.

NOTE: If a hearing is deemed necessary, applicant requests it be held at San Francisco, Calif.

No. MC 126800, filed December 10, 1964. Applicant: J. R. TRANSPORT, INC., Glen Cove and Voice Roads, Carle Place, N.Y., 11514. Applicant's representative: George A. Olsen, 69 Tonnele Avenue, Jersey City, N.J., 07306. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Such commodities, materials, supplies, machines*, and *records*, as are used or sold by the printing industry, between Carle Place, Westbury and Locust Valley, N.Y., on the one hand, and, on the other, New York, N.Y., points in Union and Essex Counties, N.J., east of U.S. Highway 1, and points in Hudson and Bergen Counties, N.J., east of the New Jersey Turnpike, and Guilford, Conn., under continuing contract with Consolidated Lithographing Corporation, Carle Place, N.Y., International Banding Machine Company, Inc., Carle Place, Long Island, N.Y., and Educational Aids Publishing Corp., Carle Place, N.Y.

NOTE: If a hearing is deemed necessary, applicant requests it be held at New York, N.Y.

No. MC 126810, filed December 16, 1964. Applicant: GREIFF TRUCKING CORP., 34 Bogart Street, Brooklyn, N.Y. Applicant's attorney: Abel Just, 135 Broadway, New York 6, N.Y. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Garments, textiles, finished textiles, and curtains*, between New York, N.Y., on the one hand, and, on the other, points in Nassau County, N.Y.

NOTE: If a hearing is deemed necessary, applicant requests it be held at New York, N.Y.

MOTOR CARRIERS OF PASSENGERS

No. MC 61016 (Sub-No. 22), filed December 16, 1964. Applicant: PETER PAN BUS LINES, INC., 144 Bridge Street, Springfield, Mass. Applicant's attorney: Frank Daniels, 11 Beacon Street, Boston, Mass. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *Passengers and their baggage*, and *express and newspapers*, in the same vehicle with passengers, between Amherst, Mass., and Holyoke, Mass., over Massachusetts Highway 116, serving all intermediate points.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Springfield, Mass.

No. MC 69394 (Sub-No. 4), filed December 11, 1964. Applicant: THE GRAY LINE, INC., Sheraton Plaza Hotel, Boston, Mass., 02116. Applicant's attorney: William J. Lippman, 1824 R Street NW., Washington, D.C., 20009. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Passengers and their baggage*, in special operations, consisting of roundtrip conducted sightseeing pleasure tours, beginning and ending at points in Middlesex and Essex Counties, Mass., and extending to points in the Continental United States.

NOTE: Applicant states it now holds authority to transport passengers and their baggage, in special operations of round trip, sightseeing or pleasure tours, during the season extending from the 1st day of June to the 15th day of October inclusive, from Boston, Mass., to points in Maine, New Hampshire, Vermont, Massachusetts, and a described portion of New York. The purpose of the instant application is (1) to remove the seasonal restriction in applicant's present authority and (2) to broaden its authorized base and destination territories as herein described. No duplicating authority is sought by this application. If a hearing is deemed necessary, applicant requests it be held at Boston, Mass.

No. MC 109736 (Sub-No. 19), filed November 25, 1964. Applicant: CAPITOL BUS COMPANY, a corporation, Fourth and Chestnut Streets, Harrisburg, Pa. Applicant's attorney: James E. Wilson, 1111 E Street NW., Washington 4, D.C. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Passengers and their baggage and express and newspapers* in the same vehicle with passengers, in round-trip special operations, beginning and ending at points in Berks County, Pa., and extending to Cherry Hill, Camden County, N.J., and Moorestown, Burlington County, N.J.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Philadelphia, Pa.

No. MC 115116 (Sub-No. 14), (CLARIFICATION), filed October 14, 1964, published FEDERAL REGISTER issue of October 28, 1964, and clarified and republished, this issue. Applicant: SUBURBAN TRANSIT CORP., 750 Somerset Street, New Brunswick, N.J. Applicant's attorney: Michael J. Marzano, 17 Academy Street, Newark, N.J., 07102. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *Passengers and their baggage*, and *newspapers* and *express*, in the same vehicle with passengers, (1) between Borough of Hopewell, N.J., and Montgomery Township, N.J.;

From Borough of Hopewell, over County Highway 518 to junction U.S. Highway 206, Montgomery Township, N.J., and return over the same route, serving all intermediate points, (2) between Borough of Hopewell, N.J. and Borough of Princeton, N.J.; From Borough of Hopewell over County Highway 569 to junction Rosedale Road, Rosedale, N.J., thence over Rosedale Road to Borough of Princeton, and return over the same route, serving all intermediate points, (3) between West Trenton, N.J., and Trenton, N.J.; From West Trenton, over County Highway 579 to junction New Jersey Highway 29 (John Fitch Parkway), thence over New Jersey Highway 29 to junction access roads to Calhoun Street in Trenton, N.J., thence over access roads and Calhoun Street to junction West Hanover Street, thence over West Hanover Street to junction North Warren Street, thence over North Warren Street to junction Perry Street, thence over Perry Street to Perry Street Bus Terminal in Trenton, N.J., and return from Perry Street Bus Terminal in Trenton, N.J., over Perry Street to junction North Warren Street, Perry Street, and Bank Street, thence over Bank Street to junction Calhoun Street, thence over Calhoun Street to junction access roads to New Jersey Highway 29 (John Fitch Parkway).

Thence over access roads and New Jersey Highway 29 to junction County Highway 579, thence over County Highway 579 to West Trenton, N.J., serving all intermediate points, (4) between West Trenton, N.J., and East Brunswick, N.J.; From West Trenton over County Highway 579 to junction New Jersey Highway 29 (John Fitch Parkway), thence over New Jersey Highway 29 to Trenton, N.J., thence over city streets to New Jersey Highway 33, thence over New Jersey Highway 33 to junction U.S. Highway 130, Robbinsville, N.J., thence over U.S. Highway 130 to junction New Jersey Highway 33 in East Windsor Township, N.J., thence over New Jersey Highway 33 to access roads to New Jersey Turnpike at Interchange No. 8, near Hightstown, N.J., thence over New Jersey Turnpike Interchange No. 8 access roads to the New Jersey Turnpike, thence over the New Jersey Turnpike to New Jersey Turnpike at Interchange No. 9 at East Brunswick, N.J. (a point on applicant's presently authorized route), and return over the same route with the right to join the aforesaid route with the existing route of Suburban Transit Corp. on the New Jersey Turnpike at Interchange No. 9 in East Brunswick, N.J., serving all intermediate points, (5) between Trenton, N.J., and Trenton, N.J.; From Perry Street Bus Terminal in Trenton, over city streets to New Jersey Highway 33 in Trenton, and return over the same route, serving all intermediate points, and (6) between East Windsor Township, N.J., and North Brunswick Township, N.J.; From junction U.S. Highway 130 and New Jersey Highway 33 in East Windsor Township, N.J., over U.S. Highway 130 to junction U.S. Highway 1 in North Brunswick, N.J., and return over the same route, serving all intermediate points.

NOTE: Applicant states it proposes to provide service to and from New York, N.Y., by joining the proposed routes to its existing routes. The purpose of this republication is to clearly set forth the highways proposed to be used in the above operations. If a hearing is deemed necessary, applicant requests it be held at Newark, N.J.

APPLICATIONS IN WHICH HANDLING WITHOUT ORAL HEARING HAS BEEN REQUESTED

MOTOR CARRIERS OF PROPERTY

No. MC 9115 (Sub-No. 52), filed December 11, 1964. Applicant: OREGON NEVADA CALIFORNIA FAST FREIGHT, INC., 2800 West Bayshore Road, Palo Alto, Calif. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *Household goods*, as defined by the Commission, and *general commodities* (except those of unusual value (not including ore and concentrates), Classes A and B explosives, livestock, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading), (1) between Sacramento, Calif., and Chico, Calif.: from Sacramento over California Highway 24 to Marysville, Calif., thence over U.S. Highway 99E to Chico, and return over the same route, serving no intermediate points and (2) between Sacramento, Calif., and Woodland, Calif.: from Sacramento over California Highway 16 to Woodland, and return over the same route, serving no intermediate points as alternate routes for operating convenience only, in connection with applicant's presently authorized regular route operations.

No. MC 29910 (Sub-No. 65), filed December 16, 1964. Applicant: ARKANSAS-BEST FREIGHT SYSTEM, INC., 301 South 11th Street, Fort Smith, Ark. Applicant's attorney: Thomas Harper, Post Office Box 297, Fort Smith, Ark., 72902. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except loose bulk commodities, livestock, Classes A and B explosives, currency, bullion, articles of virtu, commodities which exceed ordinary equipment and loading facilities, and those injurious or contaminating to other lading), between Fort Smith, Ark., and McAlester, Okla.; from Fort Smith, Ark., over U.S. Highway 271 to junction Oklahoma Highway 31 at Coal Creek, Okla., thence over Oklahoma Highway 31 to McAlester, Okla., and return over the same route, serving no intermediate points, as an alternate route for operating convenience only, in connection with applicant's authorized regular-route operations.

No. MC 35890 (Sub-No. 30), filed December 11, 1964. Applicant: BLODGETT UNCRATED FURNITURE SERVICE, INC., 845 Chestnut Street SW., Grand Rapids, Mich. Applicant's representative: Charles H. Trayford, 220 East 42d Street, New York 17, N.Y. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Combination storm-and-screen windows and doors* (aluminum), and *fiberglass awnings* (aluminum framed), and *parts therefor*, from Chicago, Ill., to Atlanta, Ga.; Dallas, Tex., Lansing, Mich., Toledo, Ohio, Oklahoma City, Okla., Buffalo, N.Y., Denver, Colo., Memphis and Nashville, Tenn.

No. MC 71096 (Sub-No. 52), filed December 10, 1964. Applicant: NORWALK TRUCK LINES, INC., 180 Milan Avenue, Norwalk, Ohio. Applicant's representative: Marion M. Emery, 180 Milan Avenue, Norwalk, Ohio. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *Hardware, bolts, nuts, automotive parts*, and *steel tubing* serving LaGrange, Ohio, as an off-route point in connection with applicant's regular-route authority.

No. MC 109095 (Sub-No. 15), filed December 10, 1964. Applicant: ANDERSON MOTOR SERVICE, INC., 1516 East 14th Street, St. Louis, Mo. Applicant's attorney: Gregory M. Rebman, Suite 1230 Boatmen's Bank Building, St. Louis, Mo., 63102. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between junction U.S. Highway 24 and Indiana Highway 14, and junction U.S. Highway 224 and Ohio Highway 15; from junction U.S. Highway 24 and Indiana Highway 14, over Indiana Highway 14 to the Indiana-Ohio State line, thence over Ohio Highway 113 to junction Ohio Highway 15, thence over Ohio Highway 15 to junction U.S. Highway 224, and return over the same route, serving junction of U.S. Highway 24 and Indiana Highway 14, and junction U.S. Highway 224 and Ohio Highway 15 for joinder purposes only, as an alternate route for operating convenience only, in connection with applicant's authorized regular-route operations between Fort Wayne, Ind., and Akron, Ohio.

No. MC 111170 (Sub-No. 93), filed December 9, 1964. Applicant: WHEELING PIPE LINE, INC., Post Office Box 1718, El Dorado, Ark. Applicant's attorney: Thomas Harper, Kelley Building, Post Office Box 43, Fort Smith, Ark., 72902. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Liquid ethylene dibromide* in bulk in tank vehicles, from points in Union County, Ark., to points in Colorado, Idaho, Utah, and Wyoming.

MOTOR CARRIERS OF PASSENGERS

No. MC 1515 (Sub-No. 58), filed August 10, 1964. Applicant: GREYHOUND LINES, INC., 140 South Dearborn Street, Chicago, Ill. Applicant's attorney: Raymond H. Warns, Eastern Greyhound Lines Division, 1400 West Third Street, Cleveland, Ohio, 44113. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *Passengers and their baggage*, and *express* and *newspapers*, in the same vehicle with passengers, between Elizabeth, N.J., and New York, N.Y., over New

Jersey Highway 439, serving all intermediate points.

NOTE: Applicant states it intends to tack or join the proposed route with its existing certificated routes at both Elizabeth, N.J., and New York, N.Y. Common control may be involved. This application was accompanied by a Motion to Dismiss.

No. MC 1515 (Sub-No. 69), filed December 14, 1964. Applicant: GREYHOUND LINES, INC., 140 South Dearborn Street, Chicago, Ill., 60603. Applicant's attorney: W. T. Meinhold, 371 Market Street, San Francisco, Calif., 94106. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *Passengers and their baggage*, and *express and newspapers* in the same vehicle with passengers. *Revision of California Route No. 55 on Certificate Sheet No. 14:* Establish a new regular route of operation over a relocated segment of California Highway 36 betwen Susanville and the junction of relocated U.S. Highway 395 (Johnstonville Junction), and a segment of relocated U.S. Highway 395 between Johnstonville Junction and Johnstonville, as regular Route No. 55 in lieu of the present Route No. 55 between Susanville and Johnstonville over former California Highway 36 herein proposed to be revoked, to read as follows: "55. Between Susanville and Johnstonville: from Susanville over California Highway 36 to junction U.S. Highway 395 (Johnstonville Junction), thence over U.S. Highway 395 to Johnstonville," and return over the same route, serving all intermediate points, subject to the general conditions and orders set forth on First Revised Sheet No. 1A of said proposed Certificate No. MC 1515 (Sub-No. 7) (formerly MC 1501 (Sub-No. 138)).

NOTE: The changes in operating authority hereinabove shown and explained are proposed to be incorporated in the designated revised sheet to said proposed Certificate No. MC 1515 (Sub-No. 7) (formerly MC 1501 (Sub-No. 138)).

NOTE: Common control may be involved.

By the Commission.

[SEAL] HAROLD D. MCCOY, *Secretary.*

## MOTOR CARRIER TRANSFER PROCEEDINGS

DECEMBER 24, 1964.

Synopses of orders entered pursuant to section 212(b) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 179), appear below:

As provided in the Commission's special rules of practice any interested person may file a petition seeking reconsideration of the following numbered proceedings within 20 days from the date of publication of this notice. Pursuant to section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC-FC 67355. By order of December 16, 1964, The Transfer Board approved the transfer to Wisconsin-Michigan Coaches, Inc., Green Bay, Wis., of the operating rights issued by the Commission March 13, 1942, under Certificate No. MC 6876, to The Motor Bus Company, a corporation, Chippewa Falls, Wis., authorizing the transportation, over regular routes, of passengers and their baggage, between Eau Claire, Wis., and Wausau, Wis.

Adolph J. Bierberstein, 121 West Doty Street, Madison, Wis., 53703, attorney for applicants.

No. MC-FC 67408. By order of December 16, 1964, The Transfer Board approved the transfer to Arlington Express, Inc., Kearny, N.J., of that portion of the operating rights authorized in Certificate No. MC 123057, issued July 27, 1964, to James Ricciardi & Sons, Inc., authorizing the transportation, over irregular routes, of general commodities, except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading, between points in Essex and Hudson Counties, N.J., on the one hand, and, on the other, New York, N.Y.

Bert Collins, 140 Cedar Street, New York 6, N.Y., representative for applicants.

No. MC-FC 67434. By order of December 17, 1964, The Transfer Board approved the transfer to Shorty Hall Rig Co., Inc., Odessa, Tex., of a portion of the operating rights in Certificate No. MC 30042, issued October 1, 1964, to Security Trucking Company, a corporation, Tulsa, Okla., authorizing the transportation, over irregular routes, of: Machinery, equipment, materials, and supplies, used in, or in connection with the natural gas and petroleum industry and the sulphur industry, and the drilling of water wells, between points in New Mexico, Texas, Kansas, and Oklahoma.

George Fowler, 520 North Lee, Odessa, Tex., Attorney for transferee and Rufus H. Lawson, Post Office Box 75124, Oklahoma City, Okla., Attorney for transferor.

No. MC-FC 67435. By order of December 17, 1964, The Transfer Board approved the transfer to Fannie Lee Mitchell, Inc., Lovington, N. Mex., of the operating rights in Certificate No. MC 99365 Sub 1, issued February 1, 1960, to Shorty Hall Rig Co., Inc., Odessa, Tex., authorizing the transportation, over irregular routes, of: Machinery, materials, supplies, and equipment, incidental to, or used in, the construction, development, operation, and maintenance of facilities for the discovery, development, and production of natural gas and petroleum, between points in Lea County, N. Mex., and Oldham, Potter, Carson, Gray, Wheeler, Deaf Smith, Randall, Armstrong, Donley, Collingsworth, Parmer, Castro, Swisher, Briscoe, Hall, Childress, Bailey, Lamb, Hale, Floyd, Motley, Cottle, Cochran, Hockley, Lubbock, Crosby, Dickens, King, Yoakum, Terry, Lynn, Garza, Kent, Stonewall, Gaines, Dawson, Borden, Scurry, Fisher, Andrews, Martin, Howard, Mitchell, Nolan, Culberson, Loving, Winkler, Ector, Midland, Glasscock, Sterling, Coke, Reeves, Ward, Crane, Upton, and Reagan Counties, Tex.

George Fowler, 520 North Lee, Odessa, Tex., Attorney for transferee and Rufus H. Lawson, Post Office Box 75124, Oklahoma City, Okla., Attorney for transferor.

HAROLD D. MCCOY, *Secretary.*

# Codification Guide

**The following numerical guide is a list of the parts of each title of the Code of Federal Regulations affected by documents published in today's issue. A cumulative list of parts affected, covering the current month to date, appears at the end of each issue beginning with the second issue of the month.**

**A cumulative guide is published separately at the end of each month. The guide lists the parts and sections affected by documents published since January 1, 1964, and specifies how they are affected.**

**GUIDE TO RECORD RETENTION REQUIREMENTS**

**[Revised as of January 1, 1964]**

Compiled from U.S. Statutes, and from regulations issued by the various Federal agencies, the "Guide" contains 873 digests detailing the retention periods for the many types of records required to be kept under Federal laws and rules. It tells the user (1) what records must be kept, (2) who must keep them, and (3) how long they must be kept. Each digest also includes a reference to the full text of the basic law or regulation governing such retention.

**Price: 40 cents**

Compiled by Office of the Federal Register, National Archives and Records Service, General Services Administration

Order from Superintendent of Documents, United States Government Printing Office, Washington, D.C., 20402

FEDERAL REGISTER

Area Code 202 Phone 963–3261

Published daily, Tuesday through Saturday (no publication on Sundays, Mondays, or on the day after an official Federal holiday), by the Office of the Federal Register, National Archives and Records Service, General Services Administration (mail address National Archives Building, Washington, D.C. 20408), pursuant to the authority contained in the Federal Register Act, approved July 26, 1935 (49 Stat. 500, as amended; 44 U.S.C., ch. 8B), under regulations prescribed by the Administrative Committee of the Federal Register, approved by the President (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $1.50 per month or $15.00 per year, payable in advance. The charge for individual copies (minimum 15 cents) varies in proportion to the size of the issue. Remit check or money order, made payable to the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402.

The regulatory material appearing herein is keyed to the CODE OF FEDERAL REGULATIONS, which is published, under 50 titles, pursuant to section 11 of the Federal Register Act, as amended. The CODE OF FEDERAL REGULATIONS is sold by the Superintendent of Documents. Prices of books and pocket supplements are listed in the first FEDERAL REGISTER issue of each month.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER or the CODE OF FEDERAL REGULATIONS.

## Title 3—THE PRESIDENT

### Proclamation 3632

### REGULATIONS FOR PREVENTING COLLISIONS AT SEA

**By the President of the United States of America**

**A Proclamation**

WHEREAS certain regulations designated as Regulations for Preventing Collisions at Sea, 1960, were approved by the International Conference on Safety of Life at Sea, 1960, held at London from May 17 to June 17, 1960; and

WHEREAS the Act of September 24, 1963 (Public Law 88–131, 77 Stat. 194), hereinafter referred to as the Act, authorizes the President of the United States of America to proclaim those regulations, which are set forth in Section 4 of the Act, and to specify the effective date thereof, the regulations to have effect (after the effective date thus specified), as if enacted by statute; and

WHEREAS on March 12, 1964, the Government of the United States of America communicated to the Inter-Governmental Maritime Consultative Organization, as depository agency, its acceptance of the regulations; and

WHEREAS the Government of the United States of America has been notified by the Inter-Governmental Maritime Consultative Organization, as depository agency, that substantial unanimity has been reached as to the acceptance by interested countries, and that it has fixed September 1, 1965, as the date on and after which the regulations shall be applied by the governments which have accepted them; and

WHEREAS the Act provides that the Regulations for Preventing Collisions at Sea, 1948 (65 Stat. 406), as proclaimed and made effective as of January 1, 1954, by Proclamation No. 3030 of August 15, 1953, shall be of no further force or effect after the effective date proclaimed for the Regulations for Preventing Collisions at Sea, 1960.

NOW, THEREFORE, I, LYNDON B. JOHNSON, President of the United States of America, under and by virtue of the authority vested in me by the Act, do hereby proclaim the Regulations for Preventing Collisions at Sea, 1960, as set forth in Section 4 of the Act, which regulations are attached hereto and made a part hereof, and do hereby specify that the effective date thereof shall be September 1, 1965.

Proclamation No. 3030 is superseded effective as of September 1, 1965.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the Seal of the United States of America to be affixed.

DONE at the City of Washington this twenty-ninth day of December in the year of our Lord nineteen hundred and sixty-four, and of the Independence of the United States of America the one hundred and eighty-ninth.

[SEAL]

LYNDON B. JOHNSON

By the President:

DEAN RUSK,
*Secretary of State.*

"REGULATIONS FOR PREVENTING COLLISIONS AT SEA

"PART A.—PRELIMINARY AND DEFINITIONS

"Rule 1

"(a) These Rules shall be followed by all vessels and seaplanes upon the high seas and in all waters connected therewith navigable by seagoing vessels, except as provided in Rule 30. Where, as a result of their special construction, it is not possible for seaplanes to comply fully with the provisions of Rules specifying the carrying of lights and shapes, these provisions shall be followed as closely as circumstances permit.

"(b) The Rules concerning lights shall be complied with in all weathers from sunset to sunrise, and during such times no other lights shall be exhibited, except such lights as cannot be mistaken for the prescribed lights or do not impair their visibility or distinctive character, or interfere with the keeping of a proper look-out. The lights prescribed by these Rules may also be exhibited from sunrise to sunset in restricted visibility and in all other circumstances when it is deemed necessary.

"(c) In the following Rules, except where the context otherwise requires—

"(i) the word 'vessel' includes every description of water craft, other than a seaplane on the water, used or capable of being used as a means of transportation on water;

"(ii) the word 'seaplane' includes a flying boat and any other aircraft designed to manoeuvre on the water;

"(iii) the term 'power-driven vessel' means any vessel propelled by machinery;

"(iv) every power-driven vessel which is under sail and not under power is to be considered a sailing vessel, and every vessel under power, whether under sail or not, is to be considered a power-driven vessel;

"(v) a vessel or seaplane on the water is 'under way' when she is not at anchor, or made fast to the shore, or aground;

"(vi) the term 'height above the hull' means height above the uppermost continuous deck;

"(vii) the length and breadth of a vessel shall be her length overall and largest breadth;

"(viii) the length and span of a seaplane shall be its maximum length and span as shown in its certificate of airworthiness, or as determined by measurement in the absence of such certificate;

"(ix) vessels shall be deemed to be in sight of one another only when one can be observed visually from the other;

"(x) the word 'visible', when applied to lights, means visible on a dark night with a clear atmosphere;

"(xi) the term 'short blast' means a blast of about one second's duration;

"(xii) the term 'prolonged blast' means a blast of from four to six seconds' duration;

"(xiii) the word 'whistle' means any appliance capable of producing the prescribed short and prolonged blasts;

"(xiv) the term 'engaged in fishing' means fishing with nets, lines or trawls but does not including fishing with trolling lines.

"PART B.—LIGHTS AND SHAPES

"Rule 2

"(a) A power-driven vessel when under way shall carry—

"(i) On or in front of the foremast, or if a vessel without a foremast then in the forepart of the vessel, a white light so constructed as to show an unbroken light over an arc of the horizon of 225 degrees (20 points of the compass), so fixed as to show the light 112½ degrees (10 points) on each side of the vessel, that is, from right ahead to 22½ degrees (2 points) abaft the beam on either side, and of such a character as to be visible at a distance of at least 5 miles.

"(ii) Either forward or abaft the white light prescribed in sub-section (i) a second white light similar in construction and character to that light. Vessels of less than 150 feet in length shall not be required to carry this second white light but may do so.

"(iii) These two white lights shall be so placed in a line with and over the keel that one shall be at least 15 feet higher than the other and in such a position that the forward light shall always be shown lower than the after one. The horizontal distance between the two white lights shall be at least three times the vertical distance. The lower of these two white lights or, if only one is carried, then that light, shall be placed at a height above the hull of not less than 20 feet, and, if the breadth of the vessel exceeds 20 feet, then at a height above the hull not less than such breadth, so however that the light need not be placed at a greater height above the hull than 40 feet. In all circumstances the light or lights, as the case may be, shall be so placed as to be clear of and above all other lights and obstructing superstructures.

"(iv) On the starboard side a green light so constructed as to show an unbroken light over an arc of the horizon of 112½ degrees (10 points of the compass), so fixed as to show the light from right ahead to 22½ degrees (2 points) abaft the beam on the starboard side, and of such a character as to be visible at a distance of at least 2 miles.

"(v) On the port side a red light so constructed as to show an unbroken light over an arc of the horizon of 112½ degrees (10 points of the compass), so fixed as to show the light from right ahead to 22½ degrees (2 points) abaft the beam on the port side, and of such a character as to be visible at a distance of at least 2 miles.

"(vi) The said green and red sidelights shall be fitted with inboard screens projecting at least 3 feet forward from the light, so as to prevent these lights from being seen across the bows.

"(b) A seaplane under way on the water shall carry—

"(i) In the forepart amidships where it can best be seen a white light, so constructed as to show an unbroken light over an arc of the horizon of 220 degrees of the compass, so fixed as to show the light 110 degrees on each side of the seaplane, namely, from right ahead to 20 degrees abaft the beam on either side, and of such a character as to be visible at a distance of at least 3 miles.

"(ii) On the right or starboard wing tip a green light, so constructed as to show an unbroken light over an arc of the horizon of 110 degrees of the compass, so fixed as to show the light from right ahead to 20 degrees abaft the beam on the starboard side, and of such a character as to be visible at a distance of at least 2 miles.

"(iii) On the left or port wing tip a red light, so constructed as to show an unbroken light over an arc of the horizon of 110 degrees of the compass, so fixed as to show the light from right ahead to 20 degrees abaft the beam on the port side, and of such a character as to be visible at a distance of at least 2 miles.

"Rule 3

"(a) A power-driven vessel when towing or pushing another vessel or seaplane shall, in addition to her sidelights, carry two white lights in a vertical line one over the other, not less than 6 feet apart, and when towing and the length of the tow, measuring from the stern of the towing vessel to the stern of the last vessel towed, exceeds 600 feet, shall carry three white lights in a vertical line one over the other, so that the upper and lower lights shall be the same distance from, and not less than 6 feet above or below, the middle light. Each of these lights shall be of the same construction and character and one of them shall be carried in the same position as the white light prescribed in Rule 2(a)(i). None of these lights shall be carried at a height of less than 14 feet above the hull. In a vessel with a single mast, such lights may be carried on the mast.

"(b) The towing vessel shall also show either the stern light prescribed in Rule 10 or in lieu of that light a small white light abaft the funnel or aftermast for the tow to steer by, but such light shall not be visible forward of the beam.

"(c) Between sunrise and sunset a power-driven vessel engaged in towing, if the length of tow exceeds 600 feet, shall carry, where it can best be seen, a black diamond shape at least 2 feet in diameter.

"(d) A seaplane on the water, when towing one or more seaplanes or vessels, shall carry the lights prescribed in Rule 2(b) (i), (ii) and (iii); and, in addition, she shall carry a second white light of the same construction and character as the white light prescribed in Rule 2(b) (i), and in a vertical line at least 6 feet above or below such light.

"Rule 4

"(a) A vessel which is not under command shall carry, where they can best be seen, and, if a power-driven vessel, in lieu of the lights prescribed in Rule 2(a) (i) and (ii), two red lights in a vertical line one over the other not less than 6 feet apart, and of such a character as to be visible all round the horizon at a distance of at least 2 miles. By day, she shall carry in a vertical line one over the other not less than 6 feet apart, where they can best be seen, two black balls or shapes each not less than 2 feet in diameter.

"(b) A seaplane on the water which is not under command may carry, where they can best be seen, and in lieu of the light prescribed in Rule 2(b)(i), two red lights in a vertical line, one over the other, not less than 3 feet apart, and of such a character as to be visible all round the horizon at a distance of at least 2 miles, and may by day carry in a vertical line one over the other not less than 3 feet apart, where they can best be seen, two black balls or shapes, each not less than 2 feet in diameter.

"(c) A vessel engaged in laying or in picking up a submarine cable or navigation mark, or a vessel engaged in surveying or underwater operations, or a vessel engaged in replenishment at sea, or in the launching or recovery of aircraft when from the nature of her work she is unable to get out of the way of approaching vessels, shall carry, in lieu of the lights prescribed in Rule 2(a) (i) and (ii), or Rule 7(a)(i), three lights in a vertical line one over the other so that the upper and lower lights shall be the same distance from, and not less than 6 feet above or below, the middle light. The highest and lowest of these lights shall be red, and the middle light shall be white, and they shall be of such a character as to be visible all round the horizon at a distance of at least 2 miles. By day, she shall carry in a vertical line one over the other not less than 6 feet apart, where they can best be seen, three shapes each not less than 2 feet in diameter, of which the highest and lowest shall be globular in shape and red in colour, and the middle one diamond in shape and white.

"(d)(i) A vessel engaged in minesweeping operations shall carry at the fore truck a green light, and at the end or ends of the fore yard on the side or sides on which danger exists, another such light or lights. These lights shall be carried in addition to the light prescribed in Rule 2(a)(i) or Rule 7(a)(i), as appropriate, and shall be of such a character as to be visible all round the horizon at a distance of at least 2 miles. By day she shall carry black balls, not less than 2 feet in diameter, in the same position as the green lights.

"(ii) the showing of these lights or balls indicates that it is dangerous for other vessels to approach closer than 3,000 feet astern of the minesweeper or 1,500 feet on the side or sides on which danger exists.

"(e) The vessels and seaplanes referred to in this Rule, when not making way through the water, shall show neither the coloured sidelights nor the stern light, but when making way they shall show them.

"(f) The lights and shapes prescribed in this Rule are to be taken by other vessels and seaplanes as signals that the vessel or seaplane showing them is not under command and cannot therefore get out of the way.

"(g) These signals are not signals of vessels in distress and requiring assistance. Such signals are contained in Rule 31.

"Rule 5

"(a) A sailing vessel under way and any vessel or seaplane being towed shall carry the same lights as are prescribed in Rule 2 for a power-driven vessel or a seaplane under way, respectively, with the exception of the white lights prescribed therein, which they shall never carry. They shall also carry stern lights as prescribed in Rule 10, provided that vessels towed, except the last vessel of a tow, may carry, in lieu of such stern light, a small white light as prescribed in Rule 3(b).

"(b) In addition to the lights prescribed in section (a), a sailing vessel may carry on the top of the foremast two lights in a vertical line one over the other, sufficiently separated so as to be clearly distinguished. The upper light shall be red and the lower light shall be green. Both lights shall be constructed and fixed as prescribed in Rule 2(a)(i) and shall be visible at a distance of at least 2 miles.

"(c) A vessel being pushed ahead shall carry, at the forward end, on the starboard side a green light and on the port side a red light, which shall have the same characteristics as the lights prescribed in Rule 2(a) (iv) and (v) and shall be screened as provided in Rule 2(a)(vi), provided that any number of vessels pushed ahead in a group shall be lighted as one vessel.

"(d) Between sunrise and sunset a vessel being towed, if the length of the tow exceeds 600 feet, shall carry where it can best be seen a black diamond shape at least 2 feet in diameter.

"Rule 6

"(a) When it is not possible on account of bad weather or other sufficient cause to fix the green and red sidelights, these lights shall be kept at hand lighted and ready for immediate use, and shall, on the approach of or to other vessels, be exhibited on their respective sides in sufficient time to prevent collision, in such manner as to make them most visible, and so that the green light shall not be seen on the port side nor the red light on the starboard side, nor, if practicable, more than 22½ degrees (2 points) abaft the beam on their respective sides.

"(b) To make the use of these portable lights more certain and easy, the lanterns containing them shall each be painted outside with the colour of the lights they respectively contain, and shall be provided with proper screens.

"Rule 7

"Power-driven vessels of less than 65 feet in length, vessels under oars or sails of less than 40 feet in length, and rowing boats, when under way shall not be required to carry the lights prescribed in Rules 2, 3 and 5, but if they do not carry them they shall be provided with the following lights—

"(a) Power-driven vessels of less than 65 feet in length, except as provided in sections (b) and (c), shall carry—

"(i) In the forepart of the vessel, where it can best be seen, and at a height above the gunwale of not less than 9 feet, a white light constructed and fixed as prescribed in Rule 2(a)(i) and of such a character as to be visible at a distance of at least 3 miles.

"(ii) Green and red sidelights constructed and fixed as prescribed in Rule 2(a)(iv) and (v), and of such a character as to be visible at a distance of at least 1 mile, or a combined lantern showing a green light and a red light from right ahead to 22½ degrees (2 points) abaft the beam on their respective sides. Such lantern shall be carried not less than 3 feet below the white light.

"(b) Power-driven vessels of less than 65 feet in length when towing or pushing another vessel shall carry—

"(i) In addition to the sidelights or the combined lantern prescribed in section (a)(ii) two white lights in a vertical line, one over the other not less than 4 feet apart. Each of these lights shall be of the same construction and character as the white light prescribed in section (a)(i) and one of them shall be carried in the same position. In a vessel with a single mast such lights may be carried on the mast.

"(ii) Either a stern light as prescribed in Rule 10 or in lieu of that light a small white light abaft the funnel or aftermast for the tow to steer by, but such light shall not be visible forward of the beam.

"(c) Power-driven vessels of less than 40 feet in length may carry the white light at a less height than 9 feet above the gunwale but it shall be carried not less than 3 feet above the sidelights or the combined lantern prescribed in section (a)(ii).

"(d) Vessels of less than 40 feet in length, under oars or sails, except as provided in section (f), shall, if they do not carry the sidelights, carry, where it can best be seen, a lantern showing a green light on one side and a red light on the other, of such a character as to be visible at a distance of at least 1 mile, and so fixed that the green light shall not be seen on the port side, nor the red light on the starboard side. Where it is not possible to fix this light, it shall be kept ready for immediate use and shall be exhibited in sufficient time to prevent collision and so that the green light shall not be seen on the port side nor the red light on the starboard side.

"(e) The vessels referred to in this Rule when being towed shall carry the sidelights or the combined lantern prescribed in sections (a) or (d) of this Rule, as appropriate, and a stern light as prescribed in Rule 10, or, except the last vessel of the tow, a small white light as prescribed in section (b)(ii). When being pushed ahead they shall carry at the forward end the sidelights or combined lantern prescribed in sections (a) or (d) of this Rule, as appropriate, provided that any number of vessels referred to in this Rule when pushed ahead in a group shall be lighted as one vessel under this Rule unless the overall length of the group exceeds 65 feet when the provisions of Rule 5(c) shall apply.

"(f) Small rowing boats, whether under oars or sail, shall only be required to have ready at hand an electric torch or a lighted lantern, showing a white light, which shall be exhibited in sufficient time to prevent collision.

"(g) The vessels and boats referred to in this Rule shall not be required to carry the lights or shapes prescribed in Rules 4(a) and 11(e) and the size of their day signals may be less than is prescribed in Rules 4(c) and 11(c).

"Rule 8

"(a) A power-driven pilot-vessel when engaged on pilotage duty and under way—

"(i) Shall carry a white light at the masthead at a height of not less than 20 feet above the hull, visible all round the horizon at a distance of at least 3 miles and at a distance of 8 feet below it a red light similar in construction and character. If such a vessel is of less than 65 feet in length she may carry the white light at a height of not less than 9 feet above the gunwale and the red light at a distance of 4 feet below the white light.

"(ii) Shall carry the sidelights or lanterns prescribed in Rule 2(a)(iv) and (v) or Rule 7(a)(ii) or (d), as appropriate, and the stern light prescribed in Rule 10.

"(iii) Shall show one or more flare-up lights at intervals not exceeding 10 minutes. An intermittent white light visible all round the horizon may be used in lieu of flare-up lights.

"(b) A sailing pilot-vessel when engaged on pilotage duty and under way—

"(i) Shall carry a white light at the masthead visible all round the horizon at a distance of at least 3 miles.

"(ii) Shall be provided with the sidelights or lantern prescribed in Rules 5(a) or 7(d), as appropriate, and shall, on the near approach of or to other vessels, have such lights ready for use, and shall show them at short intervals to indicate the direction in which she is heading, but the green light shall not be shown on the port side nor the red light on the starboard side. She shall also carry the stern light prescribed in Rule 10.

"(iii) Shall show one or more flare-up lights at intervals not exceeding ten minutes.

"(c) A pilot-vessel when engaged on pilotage duty and not under way shall carry the lights and show the flares prescribed in sections (a)(i) and (iii) or (b)(i) and (iii), as appropriate, and if at anchor shall also carry the anchor lights prescribed in Rule 11.

"(d) A pilot-vessel when not engaged on pilotage duty shall show the lights or shapes for a similar vessel of her length.

"Rule 9

"Rule 10

"Rule 9

"(a) Fishing vessels when not engaged in fishing shall show the lights or shapes for similar vessels of their length.

"(b) Vessels engaged in fishing, when under way or at anchor, shall show only the lights and shapes prescribed in this Rule, which lights and shapes shall be visible at a distance of at least 2 miles.

"(c) (i) Vessels when engaged in trawling, by which is meant the dragging of a dredge net or other apparatus through the water, shall carry two lights in a vertical line, one over the other, not less than 4 feet nor more than 12 feet apart. The upper of these lights shall be green and the lower light white and each shall be visible all round the horizon. The lower of these two lights shall be carried at a height above the sidelights not less than twice the distance between the two vertical lights.

"(ii) Such vessels may in addition carry a white light similar in construction to the white light prescribed in Rule 2(a)(i) but such light shall be carried lower than and abaft the all-round green and white lights.

"(d) Vessels when engaged in fishing, except vessels engaged in trawling, shall carry the lights prescribed in section (c)(i) except that the upper of the two vertical lights shall be red. Such vessels if of less than 40 feet in length may carry the red light at a height of not less than 9 feet above the gunwale and the white light not less than 3 feet below the red light.

"(e) Vessels referred to in sections (c) and (d), when making way through the water, shall carry the sidelights or lanterns prescribed in Rule 2(a) (iv) and (v) or Rule 7 (a)(ii) or (d), as appropriate, and the stern light prescribed in Rule 10. When not making way through the water they shall show neither the sidelights nor the stern light.

"(f) Vessels referred to in section (d) with outlying gear extending more than 500 feet horizontally into the seaway shall carry an additional all-round white light at a horizontal distance of not less than 6 feet nor more than 20 feet away from the vertical lights in the direction of the outlying gear. This additional white light shall be placed at a height not exceeding that of the white light prescribed in section (c)(i) and not lower than the sidelights.

"(g) In addition to the lights which they are required by this Rule to carry, vessels engaged in fishing may, if necessary in order to attract the attention of an approaching vessel, use a flare-up light, or may direct the beam of their searchlight in the direction of a danger threatening the approaching vessel, in such a way as not to embarrass other vessels. They may also use working lights but fishermen shall take into account that specially bright or insufficiently screened working lights may impair the visibility and distinctive character of the lights prescribed in this Rule.

"(h) By day vessels when engaged in fishing shall indicate their occupation by displaying where it can best be seen a black shape consisting of two cones each not less than 2 feet in diameter with their points together one above the other. Such vessels if of less than 65 feet in length may substitute a basket for such black shape. If their outlying gear extends more than 500 feet horizontally into the seaway vessels engaged in fishing shall display in addition one black conical shape, point upwards, in the direction of the outlying gear.

"NOTE.—Vessels fishing with trolling lines are not 'engaged in fishing' as defined in Rule 1(c)(xiv).

"Rule 10

"(a) Except where otherwise provided in these Rules, a vessel when under way shall carry at her stern a white light, so constructed that it shall show an unbroken light over an arc of the horizon of 135 degrees (12 Points of the compass), so fixed as to show the light 67½ degrees (6 points) from right aft on each side of the vessel, and of such a character as to be visible at a distance of at least 2 miles.

"(b) In a small vessel, if it is not possible on account of bad weather or other sufficient cause for this light to be fixed, an electric torch or a lighted lantern showing a white light shall be kept at hand ready for use and shall, on the approach of an overtaking vessel, be shown in sufficient time to prevent collision.

"(c) A seaplane on the water when under way shall carry on her tail a white light, so constructed as to show an unbroken light over an arc of the horizon of 140 degrees of the compass, so fixed as to show the light 70 degrees from right aft on each side of the seaplane, and of such a character as to be visible at a distance of at least 2 miles.

"Rule 11

"(a) A vessel of less than 150 feet in length, when at anchor, shall carry in the forepart of the vessel, where it can best be seen, a white light visible all round the horizon at a distance of at least 2 miles. Such a vessel may also carry a second white light in the position prescribed in section (b) of this Rule but shall not be required to do so. The second white light, if carried, shall be visible at a distance of at least 2 miles and so placed as to be as far as possible visible all round the horizon.

"(b) A vessel of 150 feet or more in length, when at anchor, shall carry near the stem of the vessel, at a height of not less than 20 feet above the hull, one such light, and at or near the stern of the vessel and at such a height that it shall be not less than 15 feet lower than the forward light, another such light. Both these lights shall be visible at a distance of at least 3 miles and so placed as to be as far as possible visible all round the horizon.

"(c) Between sunrise and sunset every vessel when at anchor shall carry in the forepart of the vessel, where it can best be seen, one black ball not less than 2 feet in diameter.

"(d) A vessel engaged in laying or in picking up a submarine cable or navigation mark, or a vessel engaged in surveying or underwater operations, when at anchor, shall carry the lights or shapes prescribed in Rule 4(c) in addition to those prescribed in the appropriate preceding sections of this Rule.

"(e) A vessel aground shall carry the light or lights prescribed in sections (a) or (b) and the two red lights prescribed in Rule 4(a). By day she shall carry, where they can best be seen, three black balls, each not less than 2 feet in diameter, placed in a vertical line one over the other, not less than 6 feet apart.

"(f) A seaplane on the water under 150 feet in length, when at anchor, shall carry, where it can best be seen, a white light, visible all round the horizon at a distance of at least 2 miles.

"(g) A seaplane on the water 150 feet or upwards in length, when at anchor, shall carry, where they can best be seen, a white light forward and a white light aft, both lights visible all round the horizon at a distance of at least 3 miles; and, in addition, if the seaplane is more than 150 feet in span, a white light on each side to indicate the maximum span, and visible, so far as practicable, all round the horizon at a distance of 1 mile.

"(h) A seaplane aground shall carry on anchor light or lights as prescribed in sections (f) and (g), and in addition may carry two red lights in a vertical line, at least 3 feet apart, so placed as to be visible all round the horizon.

"Rule 12

"Every vessel or seaplane on the water may, if necessary in order to attract attention, in addition to the lights which she is by these Rules required to carry, show a flare-up light or use a detonating or other efficient sound signal that cannot be mistaken for any signal authorised elsewhere under these Rules.

"Rule 13

"(a) Nothing in these Rules shall interfere with the operation of any special rules made by the Government of any nation with respect to additional station and signal lights for ships of war, for vessels sailing under convoy, for fishing vessels engaged in fishing as a fleet or for seaplanes on the water.

"(b) Whenever the Government concerned shall have determined that a naval or other military vessel or waterborne seaplane of special construction or purpose cannot comply fully with the provisions of any of these Rules with respect to the number, position, range or arc of visibility of lights or shapes, without interfering with the military function of the vessel or seaplane, such vessel or seaplane shall comply with such other provisions in regard to the number, position, range or arc of visibility of lights or shapes as her Government shall have determined to be the closest possible compliance with these Rules in respect of that vessel or seaplane.

"Rule 14

"A vessel proceeding under sail, when also being propelled by machinery, shall carry in the daytime forward, where it can best be seen, one black conical shape, point downwards, not less than 2 feet in diameter at its base.

"PART C.—SOUND SIGNALS AND CONDUCT IN RESTRICTED VISIBILITY

"PRELIMINARY

"1. The possession of information obtained from radar does not relieve any vessel of the obligation of conforming strictly with the Rules and, in particular, the obligations contained in Rules 15 and 16.

"2. The Annex to the Rules contains recommendations intended to assist in the use of radar as an aid to avoiding collision in restricted visibility.

"Rule 15

"(a) A power-driven vessel of 40 feet or more in length shall be provided with an efficient whistle, sounded by steam or by some substitute for steam, so placed that the sound may not be intercepted by any obstruction, and with an efficient fog horn to be sounded by mechanical means, and also with an efficient bell. A sailing vessel of 40 feet or more in length shall be provided with a similar fog horn and bell.

"(b) All signals prescribed in this Rule for vessels under way shall be given—

"(i) by power-driven vessels on the whistle;

"(ii) by sailing vessels on the fog horn;

"(iii) by vessels towed on the whistle or fog horn.

"(c) In fog, mist, falling snow, heavy rainstorms, or any other condition similarly restricting visibility, whether by day or night, the signals prescribed in this Rule shall be used as follows—

"(i) A power-driven vessel making way through the water shall sound at intervals of not more than 2 minutes a prolonged blast.

"(ii) A power-driven vessel under way, but stopped and making no way through the water, shall sound at intervals of not more than 2 minutes two prolonged blasts, with an interval of about 1 second between them.

"(iii) A sailing vessel under way shall sound, at intervals of not more than 1 minute, when on the starboard tack one blast, when on the port tack two blasts in succession, and when with the wind abaft the beam three blasts in succession.

"(iv) A vessel when at anchor shall at intervals of not more than 1 minute ring the bell rapidly for about 5 seconds. In vessels of more than 350 feet in length the bell shall be sounded in the forepart of the vessel, and in addition there shall be sounded in the after part of the vessel, at intervals of not more than 1 minute for about 5 seconds, a gong or other instrument, the tone and sounding of which cannot be confused with that of the bell. Every vessel at anchor may in addition, in accordance with Rule 12, sound three blasts in succession, namely, one short, one prolonged, and one short blast, to give warning of her position and of the possibility of collision to an approaching vessel.

"(v) A vessel when towing, a vessel engaged in laying or in picking up a submarine cable or navigation mark, and a vessel under way which is unable to get out of the way of an approaching vessel through being not under command or unable to manoeuvre as required by these Rules shall, instead of the signals prescribed in subsections (i), (ii) and (iii) sound, at intervals of not more than 1 minute, three blasts in succession, namely, one prolonged blast followed by two short blasts.

"(vi) A vessel towed, or, if more than one vessel is towed, only the last vessel of the tow, if manned, shall, at intervals of not more than 1 minute, sound four blasts in succession, namely, one prolonged blast followed by three short blasts. When practicable, this signal shall be made immediately after the signal made by the towing vessel.

"(vii) A vessel aground shall give the bell signal and, if required, the gong signal, prescribed in sub-section (iv) and shall, in addition, give 3 separate and distinct strokes on the bell immediately before and after such rapid ringing of the bell.

"(viii) A vessel engaged in fishing when under way or at anchor shall at intervals of not more than 1 minute sound the signal prescribed in sub-section (v). A vessel when fishing with trolling lines and under way shall sound the signals prescribed in sub-sections (i), (ii) or (iii) as may be appropriate.

"(ix) A vessel of less than 40 feet in length, a rowing boat, or a seaplane on the water, shall not be obliged to give the above-mentioned signals but if she does not, she shall make some other efficient sound signal at intervals of not more than 1 minute.

"(x) A power-driven pilot-vessel when engaged on pilotage duty may, in addition to the signals prescribed in sub-sections

(i), (ii) and (iv), sound an identity signal consisting of 4 short blasts.

"Rule 16

"(a) Every vessel, or seaplane when taxi-ing on the water, shall, in fog, mist, falling snow, heavy rainstorms or any other condition similarly restricting visibility, go at a moderate speed, having careful regard to the existing circumstances and conditions.

"(b) A power-driven vessel hearing, apparently forward of her beam, the fog-signal of a vessel the position of which is not ascertained, shall, so far as the circumstances of the case admit, stop her engines, and then navigate with caution until danger of collision is over.

"(c) A power-driven vessel which detects the presence of another vessel forward of her beam before hearing her fog signal or sighting her visually may take early and substantial action to avoid a close quarters situation but, if this cannot be avoided, she shall, so far as the circumstances of the case admit, stop her engines in proper time to avoid collision and then navigate with caution until danger of collision is over.

"PART D.—STEERING AND SAILING RULES

"PRELIMINARY

"1. In obeying and construing these Rules, any action taken should be positive, in ample time, and with due regard to the observance of good seamanship.

"2. Risk of collision can, when circumstances permit, be ascertained by carefully watching the compass bearing of an approaching vessel. If the bearing does not appreciably change, such risk should be deemed to exist.

"3. Mariners should bear in mind that seaplanes in the act of landing or taking off, or operating under adverse weather conditions, may be unable to change their intended action at the last moment.

"4. Rules 17 to 24 apply only to vessels in sight of one another.

"Rule 17

"(a) When two sailing vessels are approaching one another, so as to involve risk of collision, one of them shall keep out of the way of the other as follows—

"(i) When each has the wind on a different side, the vessel which has the wind on the port side shall keep out of the way of the other.

"(ii) When both have the wind on the same side, the vessel which is to windward shall keep out of the way of the vessel which is to leeward.

"(b) For the purposes of this Rule the windward side shall be deemed to be the side opposite to that on which the mainsail is carried or, in the case of a square-rigged vessel, the side opposite to that on which the largest fore-and-aft sail is carried.

"Rule 18

"(a) When two power-driven vessels are meeting end on, or nearly end on, so as to involve risk of collision, each shall alter her course to starboard, so that each may pass on the port side of the other. This Rule only applies to cases where vessels are meeting end on, or nearly end on, in such a manner as to involve risk of collision, and does not apply to two vessels which must, if both keep on their respective course, pass clear of each other. The only cases to which it does apply

are when each of two vessels is end on, or nearly end on, to the other; in other words, to cases in which, by day, each vessel sees the masts of the other in a line, or nearly in a line, with her own; and by night, to cases in which each vessel is in such a position as to see both the sidelights of the other. It does not apply, by day, to cases in which a vessel sees another ahead crossing her own course; or, by night, to cases where the red light of one vessel is opposed to the red light of the other or where the green light of one vessel is opposed to the green light of the other or where a red light without a green light or a green light without a red light is seen ahead, or where both green and red lights are seen anywhere but ahead.

"(b) For the purposes of this Rule and Rules 19 to 29 inclusive, except Rule 20(c) and Rule 28, a seaplane on the water shall be deemed to be a vessel, and the expression 'power-driven vessel' shall be construed accordingly.

"Rule 19

"When two power-driven vessels are crossing, so as to involve risk of collision, the vessel which has the other on her own starboard side shall keep out of the way of the other.

"Rule 20

"(a) When a power-driven vessel and a sailing vessel are proceeding in such directions as to involve risk of collision, except as provided for in Rules 24 and 26, the power-driven vessel shall keep out of the way of the sailing vessel.

"(b) This Rule shall not give to a sailing vessel the right to hamper, in a narrow channel, the safe passage of a power-driven vessel which can navigate only inside such channel.

"(c) A seaplane on the water shall, in general, keep well clear of all vessels and avoid impeding their navigation. In circumstances, however, where risk of collision exists, she shall comply with these Rules.

"Rule 21

"Where by any of these Rules one of two vessels is to keep out of the way, the other shall keep her course and speed. When, from any cause, the latter vessel finds herself so close that collision cannot be avoided by the action of the giving-way vessel alone, she also shall take such action as will best aid to avert collision (see Rules 27 and 29).

"Rule 22

"Every vessel which is directed by these Rules to keep out of the way of another vessel shall, so far as possible, take positive early action to comply with this obligation, and shall, if the circumstances of the case admit, avoid crossing ahead of the other.

"Rule 23

"Every power-driven vessel which is directed by these Rules to keep out of the way of another vessel shall, on approaching her, if necessary, slacken her speed or stop or reverse.

"Rule 24

"(a) Notwithstanding anything contained in these Rules, every vessel overtaking any other shall keep out of the way of the overtaken vessel.

"(b) Every vessel coming up with another vessel from any direction more than 22½ degrees (2 points) abaft her beam, i.e., in such a position, with reference to the vessel which she is overtaking, that at night she would be unable to see either of that vessel's sidelights, shall be deemed to be an overtaking vessel; and no subsequent alteration of the bearing between the two vessels shall make the overtaking vessel a crossing vessel within the meaning of these Rules, or relieve her of the duty of keeping clear of the overtaken vessel until she is finally past and clear.

"(c) If the overtaking vessel cannot determine with certainty whether she is forward of or abaft this direction from the other vessel, she shall assume that she is an overtaking vessel and keep out of the way.

"Rule 25

"(a) In a narrow channel every power-driven vessel when proceeding along the course of the channel shall, when it is safe and practicable, keep to that side of the fairway or mid-channel which lies on the starboard side of such vessel.

"(b) Whenever a power-driven vessel is nearing a bend in a channel where a vessel approaching from the other direction cannot be seen, such power-driven vessel, when she shall have arrived within one-half (½) mile of the bend, shall give a signal by one prolonged blast on her whistle which signal shall be answered by a similar blast given by any approaching power-driven vessel that may be within hearing around the bend. Regardless of whether an approaching vessel on the farther side of the bend is heard, such bend shall be rounded with alertness and caution.

"(c) In a narrow channel a power-driven vessel of less than 65 feet in length shall not hamper the safe passage of a vessel which can navigate only inside such channel.

"Rule 26

"All vessels not engaged in fishing, except vessels to which the provisions of Rule 4 apply, shall, when under way, keep out of the way of vessels engaged in fishing. This Rule shall not give to any vessel engaged in fishing the right of obstructing a fairway used by vessels other than fishing vessels.

"Rule 27

"In obeying and construing these Rules due regard shall be had to all dangers of navigation and collision, and to any special circumstances, including the limitations of the craft involved, which may render a departure from the above Rules necessary in order to avoid immediate danger.

"PART E.—SOUND SIGNALS FOR VESSELS IN SIGHT OF ONE ANOTHER

"Rule 28

"(a) When vessels are in sight of one another, a power-driven vessel under way, in taking any course authorised or required by these Rules, shall indicate that course by the following signals on her whistle, namely—

"One short blast to mean 'I am altering my course to starboard'.

"Two short blasts to mean 'I am altering my course to port'.

"Three short blasts to mean 'My engines are going astern'.

"(b) Whenever a power-driven vessel which, under these Rules, is to keep her course and speed, is in sight of another vessel and is in doubt whether sufficient action is being taken by the other vessel to avert collision, she may indicate such doubt by giving at least five short and rapid blasts on the whistle. The giving of such a signal shall not relieve a vessel of her obligations under Rules 27 and 29 or any other Rule, or of her duty to indicate any action taken under these Rules by giving the appropriate sound signals laid down in this Rule.

"(c) Any whistle signal mentioned in this Rule may be further indicated by a visual signal consisting of a white light visible all round the horizon at a distance of at least 5 miles, and so devised that it will operate simultaneously and in conjunction with the whistle-sounding mechanism and remain lighted and visible during the same period as the sound signal.

"(d) Nothing in these Rules shall interfere with the operation of any special rules made by the Government of any nation with respect to the use of additional whistle signals between ships of war or vessels sailing under convoy.

"PART F.—MISCELLANEOUS

"Rule 29

"Nothing in these Rules shall exonerate any vessel, or the owner, master or crew thereof, from the consequences of any neglect to carry lights or signals, or of any neglect to keep a proper look-out, or of the neglect of any precaution which may be required by the ordinary practice of seamen, or by the special circumstances of the case.

"Rule 30

"Reservation of Rules for Harbours and Inland Navigation

"Nothing in these Rules shall interfere with the operation of a special rule duly made by local authority relative to the navigation of any harbour, river, lake, or inland water, including a reserved seaplane area.

"Rule 31

"Distress Signals

"(a) When a vessel or seaplane on the water is in distress and requires assistance from other vessels or from the shore, the following shall be the signals to be used or displayed by her, either together or separately, namely—

"(i) A gun or other explosive signal fired at intervals of about a minute.

"(ii) A continuous sounding with any fog-signalling apparatus.

"(iii) Rockets or shells, throwing red stars fired one at a time at short intervals.

"(iv) A signal made by radiotelegraphy or by any other signalling method consisting of the group . . . — — — . . . in the Morse Code.

"(v) A signal sent by radiotelephony consisting of the spoken word 'Mayday'.

"(vi) The International Code Signal of distress indicated by N.C.

"(vii) A signal consisting of a square flag having above or below it a ball or anything resembling a ball.

"(viii) Flames on the vessel (as from a burning tar barrel, oil barrel, &c.).

"(ix) A rocket parachute flare or a hand flare showing a red light.

"(x) A smoke signal giving off a volume of orange-coloured smoke.

"(xi) Slowly and repeatedly raising and lowering arms outstretched to each side.

"NOTE.—Vessels in distress may use the radiotelegraph alarm signal or the radiotelephone alarm signal to secure attention to distress calls and messages. The radiotelegraph alarm signal, which is designed to actuate the radiotelegraph auto alarms of vessels so fitted, consists of a series of twelve dashes, sent in 1 minute, the duration of each dash being 4 seconds, and the duration of the interval between 2 consecutive dashes being 1 second. The radiotelephone alarm signal consists of 2 tones transmitted alternately over periods of from 30 seconds to 1 minute.

"(b) The use of any of the foregoing signals, except for the purpose of indicating that a vessel or seaplane is in distress, and the use of any signals which may be confused with any of the above signals, is prohibited.

"ANNEX TO THE RULES

"RECOMMENDATIONS ON THE USE OF RADAR INFORMATION AS AN AID TO AVOIDING COLLISIONS AT SEA

"(1) Assumptions made on scanty information may be dangerous and should be avoided.

"(2) A vessel navigating with the aid of radar in restricted visibility must, in compliance with Rule 16(a), go at a moderate speed. Information obtained from the use of radar is one of the circumstances to be taken into account when determining moderate speed. In this regard it must be recognised that small vessels, small icebergs and similar floating objects may not be detected by radar. Radar indications of one or more vessels in the vicinity may mean that "moderate speed" should be slower than a mariner without radar might consider moderate in the circumstances.

"(3) When navigating in restricted visibility the radar range and bearing alone do not constitute ascertainment of the position of the other vessel under Rule 16(b) sufficiently to relieve a vessel of the duty to stop her engines and navigate with caution when a fog signal is heard forward of the beam.

"(4) When action has been taken under Rule 16(c) to avoid a close quarters situation, it is essential to make sure that such action is having the desired effect. Alterations of course or speed or both are matters as to which the mariner must be guided by the circumstances of the case.

"(5) Alteration of course alone may be the most effective action to avoid close quarters provided that—

"(a) There is sufficient sea room.

"(b) It is made in good time.

"(c) It is substantial. A succession of small alterations of course should be avoided.

"(d) It does not result in a close quarters situation with other vessels.

"(6) The direction of an alteration of course is a matter in which the mariner must be guided by the circumstances of the case. An alteration to starboard, particularly when vessels are approaching apparently on opposite or nearly opposite courses, is generally preferable to an alteration to port.

"(7) An alteration of speed, either alone or in conjunction with an alteration of course, should be substantial. A number of small alterations of speed should be avoided.

"(8) If a close quarters situation is imminent, the most prudent action may be to take all way off the vessel."

[F.R. Doc. 64–13541; Filed, Dec. 30, 1964; 1:30 p.m.]

## Executive Order 11190

### PROVIDING FOR THE SCREENING OF THE READY RESERVE OF THE ARMED FORCES

By virtue of the authority vested in me by section 301 of title 3 of the United States Code, and as President of the United States and Commander in Chief of the Armed Forces of the United States, it is ordered as follows:

SECTION 1. There is delegated to the Secretary of Defense (and to the Secretary of the Treasury with regard to the United States Coast Guard) the authority vested in the President by section 271 of title 10 of the United States Code to prescribe regulations for the screening of units and members of the Ready Reserve of the Armed Forces.

SEC. 2. Executive Order No. 10651 of January 6, 1956, is revoked.

LYNDON B. JOHNSON

THE WHITE HOUSE,
*December 29, 1964.*

[F.R. Doc. 64–13542; Filed, Dec. 30, 1964; 1:30 p.m.]

# Rules and Regulations

## Title 14—AERONAUTICS AND SPACE

### Chapter I—Federal Aviation Agency

[Airspace Docket No. 63-AL-29]

### PART 71—DESIGNATION OF FEDERAL AIRWAYS, CONTROLLED AIRSPACE, AND REPORTING POINTS [NEW]

### PART 75—ESTABLISHMENT OF JET ROUTES [NEW]

### Establishment of Jet Routes and Designation of Reporting Points, Alteration of Continental Control Area, Revocation and Alteration of Transition Areas

On August 27, 1964, a Notice of Proposed Rule Making was published in the FEDERAL REGISTER (29 F.R. 12317) stating that the Federal Aviation Agency was considering amendments to Part 71 [New] and Part 75 [New] of the Federal Aviation Regulations that would make applicable to Alaska changes in the vertical extent of the airway structure similar to those recently effectuated in the 48 contiguous states by Airspace Docket No. 63-WA-74 (29 F.R. 8471).

Interested persons were afforded an opportunity to participate in the rule making through submission of comments. All comments received were favorable. Responses made to inquiries from air carriers included an assurance that airline jet operations would not be confined to the jet route structure.

The Notice stated that the Agency proposed the designation of control areas associated with jet routes outside the continental control area by adding to § 71.161 segments of Jet Routes No. 111 and 501. Segments of Jet Routes No. 115 from King Salmon, Alaska, to Anchorage, Alaska, and No. 122 from Galena, Alaska, to Nome, Alaska, were omitted because the offshore portions of these routes lie substantially within presently designated control areas. It has since been determined that a designation of these offshore control areas associated with jet routes should be independent of existing control areas, therefore, such action is taken in this rule. The Administrator has found that notice and public procedure on the inclusion of these control areas in § 71.161 is unnecessary because the public is not particularly interested in the designation of the offshore portion of these segments which are otherwise substantially included within controlled airspace.

The Notice proposed alignment of Jet Route No. 502 in part from Pon Lake, Yukon Territory, RBN, via Haines, Alaska, RBN. The Canadian Department of Transport has requested alignment of this segment from Snag, Yukon Territory, RR, via Haines RBN. This redescription will not alter the alignment of this jet route segment within the United States, therefore such action is taken herein.

Amendments (a), (b), (e), and (f) revise the relevant sections of Part 71. The other amendments and amendment (f) alter the airspace designations that are published separately in the FEDERAL REGISTER due to their length and complexity.

In consideration of the foregoing, Parts 71 [New] and 75 [New] of the Federal Aviation Regulations are amended as hereinafter set forth, effective 0001 e.s.t., March 4, 1965.

These amendments are issued under the authority of sections 307 and 1110 of the Federal Aviation Act of 1958 (49 U.S.C. 1348 and 1510) and Executive Order 10854 (24 F.R. 9565).

Issued in Washington, D.C., on December 24, 1964.

N. E. HALABY,
*Administrator.*

(a) In § 71.5(c)(1) "Alaska and" is deleted.

(b) Section 71.9 is amended to read as follows:

**§ 71.9 Continental control area.**

The continental control area consists of the airspace of the 48 contiguous states, the District of Columbia, and Alaska south of latitude 68°00'00" N., excluding the Alaska peninsula west of longitude 160°00'00" W., at and above 14,500 feet MSL, but does not include—

(a) The airspace less than 1,500 feet above the surface of the earth; or

(b) Prohibited and restricted areas, other than restricted area military climb corridors and the restricted areas listed in Subpart D of this part.

(c) Section 71.151 (29 F.R. 17550) is amended by adding the following restricted areas:

R-2202 Big Delta, Alaska.
R-2203A Eagle River, Alaska.
R-2203B Eagle River, Alaska.
R-2205 Yukon, Alaska.

(d) Section 71.161 (29 F.R. 17552) is amended by adding the following:

Jet Route No. 111, from Nome, Alaska, to McGrath, Alaska.
Jet Route No. 115, from King Salmon, Alaska, via Kenai, Alaska, to Anchorage, Alaska.
Jet Route No. 122, from Galena, Alaska, to Nome, Alaska.
Jet Route No. 501, from the United States/Canadian border, via Yakutat, Alaska, to Anchorage, Alaska.

(e) Section 71.211 (29 F.R. 17723) is amended to read as follows:

**§ 71.211 Alaskan low altitude reporting points.**

The reporting points listed below are designated up to but not including 18,000 feet MSL.

(No change in listing.)

(f) Section 71.213 (29 F.R. 17725) is amended to read as follows:

**§ 71.213 Alaskan high altitude reporting points.**

The reporting points listed below are designated at 18,000 feet MSL to Flight Level 450.

Adak, Alaska, RR.
Anchorage, Alaska.
Annette Island, Alaska, RR.
Bethel, Alaska.
Biorka Island, Alaska.
Cold Bay, Alaska, RR.

Yakutat, Alaska, RR.

(g) In § 75.100 (29 F.R. 17776) the following jet routes are added or amended to read:

Jet Route No. 111 (Nome, Alaska, to Middleton Island, Alaska), from Nome, Alaska, via McGrath, Alaska; Anchorage, Alaska; to Middleton Island, Alaska.
Jet Route No. 115 (King Salmon, Alaska, to Nenana, Alaska), from King Salmon, Alaska, via Kenai, Alaska; Anchorage, Alaska; Talkeetna, Alaska; to Nenana, Alaska.

Jet Route No. 117 (McGrath, Alaska, to Kotzebue, Alaska), from McGrath, Alaska, via Galena, Alaska; to Kotzebue, Alaska, RBN.

Jet Route No. 120 (Bethel, Alaska, to Fort Yukon, Alaska), from Bethel, Alaska, via McGrath, Alaska; Nenana, Alaska; Fairbanks, Alaska, RR; to Fort Yukon, Alaska.

Jet Route No. 122 (Nenana, Alaska, to Nome, Alaska), from Nenana, Alaska, via Galena, Alaska; to Nome, Alaska.

Jet Route No. 124 (Dillingham, Alaska, to Anchorage, Alaska), from Dillingham, Alaska, to Anchorage, Alaska.

Jet Route No. 501 (Seattle, Washington, to Bethel, Alaska). (Joins Canadian High Level Airway No. 501.) From Seattle, Wash., to the INT of the Seattle 331° radial and the United States/Canadian border. From Sandspit B.C. RR, via Biorka Island, Alaska; Yakutat, Alaska; Anchorage, Alaska; to Bethel, Alaska, excluding that airspace within Canadian territory.

Jet Route No. 502 (Fairbanks, Alaska, to United States-Canadian border). (Joins Canadian High Level Airways No. 515 and 502.) From Fairbanks, Alaska, RR, via Northway, Alaska, RR; Snag, Yukon Territory, RR; Haines, Alaska, RBN; Petersburg, Alaska, RR; Annette Island, Alaska, RR; to Ethelda Bay, B.C., RBN, excluding that airspace within Canadian territory.

Jet Route No. 507 (Northway, Alaska, to Yakutat, Alaska), from Northway, Alaska, RR, to Yakutat, Alaska, excluding airspace within Canadian territory.

(h) § 71.181 (29 F.R. 17643) is amended as hereinafter set forth.

(1) The Anchorage, Alaska transition area is amended to read:

ANCHORAGE, ALASKA

That airspace extending upward from 14,500 feet MSL within a 172-mile radius of the Anchorage VOR. The portions within the United States, Federal airways, Control 1218, Control 1310, the Cordova, Alaska, and Middleton Island, Alaska, control area extensions, the King Salmon transition area and the Anchorage Oceanic Control area would be excluded.

(2) The King Salmon, Alaska transition area is amended to read:

KING SALMON, ALASKA

That airspace extending upward from 1,200 feet above the surface within a 25-mile radius of the King Salmon Airport (latitude 58°41′ N., longitude 156°39′ W.) and within 47 miles SW and 15 miles NE of the 312° bearing from the King Salmon RR, extending from the RR to 85 miles NW; and that airspace extending upward from 14,500 feet MSL outside of the United States within a 172-mile radius of the King Salmon VOR. Federal airways, Control 1217, Control 1400, Control 1401, Control 1484, the Kodiak, Alaska, control area extension and the Anchorage control area extension are excluded from the portion extending upward from 14,500 feet MSL.

(3) The Fairbanks, Alaska transition area is revoked.

[F.R. Doc. 64-13448; Filed, Dec. 30, 1964; 8:45 a.m.]

[Docket Nos. 3059, 5033, 5036, 5094, 6161, 6258; Amdt. 1-7]

## PART 1—DEFINITIONS AND ABBREVIATIONS

## PART 40—SCHEDULED INTERSTATE AIR CARRIER CERTIFICATION AND OPERATION RULES

## PART 41—CERTIFICATION AND OPERATION RULES FOR CERTIFICATED ROUTE AIR CARRIERS ENGAGING IN OVERSEAS AND FOREIGN AIR TRANSPORTATION AND AIR TRANSPORTATION WITHIN HAWAII AND ALASKA

## PART 42—AIRCRAFT CERTIFICATION AND OPERATION RULES FOR SUPPLEMENTAL AIR CARRIERS, COMMERCIAL OPERATORS USING LARGE AIRCRAFT, AND CERTIFICATED ROUTE AIR CARRIERS ENGAGING IN CHARTER FLIGHTS OR OTHER SPECIAL SERVICES

## PART 121—CERTIFICATION AND OPERATIONS: DOMESTIC, FLAG, AND SUPPLEMENTAL AIR CARRIERS AND COMMERCIAL OPERATORS OF LARGE AIRCRAFT [NEW]

This amendment adds Part 121 to the Federal Aviation Regulations to replace Civil Air Regulations Parts 40, 41, and 42 and certain Special Civil Air Regulations. This amendment completes the Agency recodification program announced in Draft Release 61-25, published in the FEDERAL REGISTER on November 15, 1961 (26 F.R. 10698).

Part 121 was published as a notice of proposed rule making in the FEDERAL REGISTER on August 26, 1964 (29 F.R. 12182) and given further circulation as Notice No. 64-40. As stated in that notice, this Part 121 is basically a consolidation of the rules presently contained in CAR Parts 40, 41, and 42 and is in most cases identical with the proposed recodification of those Parts as issued in separate notices of proposed rule making (proposed Part 121 (CAR 40) published in the FEDERAL REGISTER on May 9, 1964 (29 F.R. 620); proposed Part 123 (CAR 41) published in the FEDERAL REGISTER on January 25, 1964 (29 F.R. 1348); and proposed Part 125 (CAR 42) published in the FEDERAL REGISTER on May 8, 1964 (29 F.R. 6112)).

Comments were received from: the Civil Aeronautics Board; Seaboard World Airlines, Inc.; the Air Line Pilots Association, International; the National Air Carriers Association, Inc.; the Helicopter Association of America; the Air Transport Association of America; and Aerospace Industries Association of America, Inc.

Some of the comments received recommended specific substantive changes to the regulations. Although some of these recommendations appear to be meritorious, they cannot be adopted as a part of the recodification program. The purpose of the program is simply to streamline and clarify present regulatory language and delete obsolete or redundant provisions. To attempt substantive changes, other than relaxatory ones that are completely noncontroversial, would delay the project and be contrary to the ground rules specified for it in Draft Release 61-25. However, all substantive comments received will be retained and will be given careful consideration in future regulatory projects.

Throughout Part 121 there are references to other recodified Federal Aviation Regulations such as the reference in § 121.181(c)(1) to airplanes "certificated under Part 25". In a recodification program, such a reference automatically includes the predecessors to the new parts and therefore it is unnecessary to include a reference to former part numbers. This policy has been followed throughout the recodified regulations. As a consequence, references to Federal Aviation Regulations include their CAR predecessors unless otherwise specifically stated.

Section 121.11 has been rewritten to delete the reference to Part 91 of the Federal Aviation Regulations and also the requirement that certain certificate holders must comply with the ICAO rules when over the high seas. These provisions are deleted since they simply repeat requirements already contained in Part 91 which is applicable to all aircraft, including air carrier aircraft.

One comment stated that the wording of § 121.119(b) would require supplemental air carriers and commercial operators to "prepare forecasts", which is not the intent of CAR § 42.35. Sections 121.101 and 121.119 have been rewritten to make it clear than an air carrier or commercial operator may use forecasts prepared by someone else provided they are prepared from weather reports that meet the stated requirements.

Section 121.189 has been completely rewritten to avoid any implication that the "net takeoff flight path" includes the "minimum distance required for takeoff". Also a new paragraph has been added stating that for the purposes of the section, the terms "takeoff distance, takeoff run, net takeoff flight path, and takeoff path" have the meanings set forth in the rules under which the airplane was certificated. Most of these terms were defined differently in SRs 422, 422A, and 422B and the inclusion of this statement preserves the different definitions for the purposes of this section while avoiding repeating each definition within the section.

Section 121.185(a)(1): Subparagraph (1) of § 121.185(a) has been rewritten to read "The airplane is landed on the most favorable runway and direction in still air". This is the language presently contained in § 40.77 and is also consistent with § 121.195(b)(1) that is based on the SR 422 series.

Section 121.351 has been rewritten to include a paragraph (b) that reflects paragraph (b) of CAR §§ 41.233 and 42.233. While the revision note to this section in the notice indicated that it reflected all of §§ 40.233, 41.233, and 42.233, these provisions were inadvertently omitted in the notice of proposed rule making.

Section 121.369(b)(2) has been amended to delete the words "preventive maintenance". This paragraph requires the maintenance manual to include a designation of the items of maintenance and alteration that must undergo "required inspections". Since no "preventive maintenance" item is required to undergo a "required inspection," the term may be deleted here.

Section 121.377 has been amended to limit its applicability to "within the United States, its territories, and possessions". This section is now consistent with the regulations upon which it is based.

Section 121.441(b)(24) has been amended to reflect a part of CAM 40.302-1(q). Subparagraph (24) is based on CAR §§ 40.302(b)(2)(ii), 41.302(b)(2)(ii), and 42.302(b)(2)(ii). It provides that certain flight maneuvers required for the proficiency check may be given in a synthetic trainer but that maneuvers associated with approach procedures for which the lowest minimums are approved must be given in flight. The CAM provision contained a further exception for an air carrier authorized landing minimums based on instrument landing systems and ground control approach. For such a carrier only the maneuvers related to the predominant landing aid on a system wide basis need be given in flight. CAR Parts 41 and 42 before their recent revision contained comparable CAM provisions that were dropped in the revised parts. The Agency believes that this relaxation has worked well in the past and since the deletion of this provision was not based on any Agency finding that safety was involved, that it should be restored.

Section 121.523 reflects the amendment to § 42.322(c) (42.14) published in the FEDERAL REGISTER on December 11, 1964 (29 F.R. 16968).

Section 121.533 (based on § 40.351) has been amended to include a paragraph stating the authority of the pilot in command over other crewmembers during flight time. This paragraph is comparable to the provisions of § 121.535(d) and 121.537(d) which are based on §§ 41.531 and 42.531, respectively. While § 40.531 did not contain this statement as a rule, it was included in the regulation in a note as an interpretation of § 40.531(c).

A new § 121.537 has been added to include the provisions of §§ 40.373, 41.373, and 42.373 related to the closing and locking of the flight crew compartment door during flight. These sections were added to CAR Parts 40, 41, and 42 by amendments 40-45, 41-10, and 42-9, respectively, effective August 6, 1964.

One comment requested that § 121.555 be amended to reflect the deviation authority contained in the .359 sections of CARs 40, 41, and 42. Each of these sections began with the clause "Except when a deviation is necessary in accordance with § 40. (41 or 42) 360, a pilot * * *". The .360 sections contained the emergency situation provisions reflected in § 121.557. Since the emergency provisions authorizing a pilot to deviate from the requirements of the FARs "to the extent required in the interests of safety" apply across the board, it is not necessary to specifically state that deviation authority in § 121.555. In fact, to specifically state the authority in any individual section would raise a question as to the applicability of § 121.557 to other sections where no such statement is contained.

Section 121.647 has been rewritten to state that each person computing fuel requirements shall "consider" certain listed items. "Consider" more closely reflects the requirements of CAR §§ 40.397, 41.397, and 42.397 than did the words "take into account" which were contained in the notice of proposed rule making.

The term "restricted area" used in § 121.649 has been replaced by the phrase "area of local surface visibility restriction". This change was made to avoid any confusion with a "restricted area" as defined in Part 1 and used in Part 73.

A new Subpart W has been added to include the provisions of § 406.19 of the Regulations of the Administrator. That section established crewmember certificates to be issued to crewmembers of United States registered aircraft engaged in international air commerce. The certificates are issued under Annex 9, as amended, to the Convention on International Civil Aviation, to facilitate the entry and clearance of the crewmembers into ICAO contracting States.

Part 121 includes the miscellaneous amendments to CAR Parts 40, 41, and 42 proposed in Notice No. 64-32 published in the FEDERAL REGISTER on May 28, 1964 (29 F.R. 7026). As indicated in that notice, the proposed changes were of a minor substantive nature and would remove unjustified differences in CAR Parts 40, 41, and 42 that would facilitate the recodification of those Parts. With the exception of three items discussed below, the comments received by the Agency either supported the proposed changes or offered no objection thereto.

Section 40.15 (§ 121.73): The amendment to this section requires a domestic air carrier to keep its operations specifications available for inspection at its principal operations office. Section 40.15 currently requires only that the carrier's operating certificate be kept so available. However, the comparable provisions of Parts 41 and 42 include the operations specifications. The Air Transport Association of America (ATA) objected to this proposed amendment on the ground that it would place an unwarranted burden on those air carriers who have separate operations and maintenance bases and who presently keep the appropriate portion of the operations specifications at the appropriate base. The Agency does not agree that this amendment places any additional burden on a carrier. CAR § 40.20 currently requires that "a set of specifications shall be maintained by the air carrier as a separate and complete document." Therefore this amendment would merely require that the separate and complete document required by § 40.20 be kept at the carrier's principal operations office. If the carrier wishes to separate the operations specifications between the maintenance and operations bases, copies of the pertinent portions can easily be furnished by it to each base.

Section 41.302 (§ 121.441): The ATA objected to that part of the proposed amendment to this section that would prohibit a pilot who has unsatisfactorily performed a proficiency check from being used in air carrier operations until he has satisfactorily passed such a check. The ATA contends that this requirement would be burdensome in the case of incomplete checks due to traffic, weather, etc. in which there is insufficient time for additional training and rechecking of the pilot. The Agency realizes that there conceivably could be instances where due to traffic control, weather, or some similar problem, a check could be interrupted and this rule could cause some hardship. However, the Agency feels strongly that a pilot who has failed some part of his proficiency check should not be allowed to return to scheduled flight until he has satisfactorily completed that check. The hardship that could be caused by one of the possibilities discussed above does not, in our opinion, overcome the potential safety hazard that could result if this proposed amendment were withdrawn.

Section 42.396 (§ 121.643): While ATA had no objection to the Agency's proposed amendment to § 42.396, it requested that a relaxatory change be made in this section pertaining to certain charter or off-route flights into Canada. However, since some of these flights are into remote areas of Canada, it is considered that the present fuel requirements should continue to apply to these operations.

Paragraph (c) of § 121.701 has been deleted as proposed in Notice No. 64-48 published in the FEDERAL REGISTER on October 17, 1964 (29 F.R. 14367). Several of the comments received from certain pilots, flight engineers, and aircraft mechanics organizations stated that the posting of the time since last overhaul of the engines in the maintenance log was important to the flight crew. These comments are essentially the same as the comments received from these organizations in connection with Notice No. 63-20 that were discussed in Notice No. 64-48. The Agency had considered these comments before this notice was issued and still believes that this requirement is not necessary and that if a flight crew desires this information it may be obtained from other records.

This amendment adds to Part 1 definitions of "air carrier", "commercial operator", and "show". If additional defi-

nitions prove to be necessary they will be added as needed. It should be noted that all of the definitions, abbreviations, and rules of construction contained in Part 1 apply to Part 121.

This amendment deletes CAR Parts 40, 41, and 42 and Special Civil Air Regulations 422, 422A, 422B, 425C, and 446B.

Other minor changes of a technical nature have been made. They are not substantive and do not impose any burden on regulated persons.

Interested persons have been afforded an opportunity to participate in the making of this regulation, and due consideration has been given to all relevant matter presented. As previously stated this amendment is the final part of the Agency's recodification project begun in 1961. The Agency wishes to thank those persons who submitted comments on this notice and on all other parts of the recodification program. The completion of this program would have been impossible without the constant cooperation of the many aviation associations and individuals interested in aviation who have submitted their comments throughout the program.

In consideration of the foregoing, Chapter I of Title 14 of the Code of Federal Regulations is amended as hereinafter set forth effective April 1, 1965.

1. By amending Part 1 by adding the definitions to § 1.1 as follows:

**§ 1.1 General definitions.**

* * * * *

"Air carrier" means a person who undertakes directly by lease, or other arrangement, to engage in air transportation.

* * * * *

"Commercial operator" means a person who engages in the carriage by aircraft in air commerce of persons or property as a major enterprise for profit, and not merely incidental to his other business, other than as an air carrier or foreign air carrier or under the authority of Part 375 of this title.

* * * * *

"Show", unless the context otherwise requires, means to show to the satisfaction of the Administrator.

* * * * *

2. By striking out Parts 40, 41, and 42 and Special Civil Air Regulations 422, 422A, 422B, 425C, and 446B.

3. By adding a Part 121 [New] reading as hereinafter set forth:

This amendment is made under the authority of secs. 313(a), 501, 601 through 610, and 1102 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421 through 1430, and 1502).

Issued in Washington, D.C., on December 23, 1964.

N. E. HALABY,
*Administrator.*

**Subpart A—General**

Sec.
121.1 Applicability.
121.3 Certification requirements: general.
121.5 Charter flights or other special service operation: flag and domestic air carriers.
121.7 Intrastate common carriage by commercial operator.
121.9 Certain operations of small aircraft.
121.11 Additional rules applicable to operations subject to this part: flag air carriers, supplemental air carriers, and commercial operators.
121.13 Rules applicable to helicopter operations: deviation authority.

**Subpart B—Certification Rules for Domestic and Flag Air Carriers**

121.21 Applicability.
121.23 Operations specifications not a part of certificate.
121.25 Contents of certificate and operations specifications.
121.27 Issue of certificate.
121.29 Duration of certificate.

**Subpart C—Certification Rules for Supplemental Air Carriers and Commercial Operators**

121.41 Applicability.
121.43 Operations specifications not a part of certificate.
121.45 Contents of certificate and operations specifications.
121.47 Application for supplemental air carrier and commercial operator certificates.
121.49 Commercial operator: financial information required.
121.51 Issue of certificate.
121.53 Duration of certificate.
121.55 Commercial operator: supplemental periodic financial report.
121.57 Obtaining waivers and authority for deviations.
121.59 Management personnel required.
121.61 Management personnel: qualifications.

**Subpart D—Rules Governing All Certificate Holders Under This Part**

121.71 Applicability.
121.73 Availability of certificate and operations specifications.
121.75 Use of operations specifications.
121.77 Amendment of certificate.
121.79 Amendment of operations specifications.
121.81 Inspection authority.
121.83 Change of address.

**Subpart E—Approval of Routes; Domestic and Flag Air Carriers**

121.91 Applicability.
121.93 Route requirements: general.
121.95 Route width.
121.97 Airports.
121.99 Communications facilities.
121.101 Weather reporting facilities.
121.103 En route navigational facilities.
121.105 Servicing and maintenance facilities.
121.107 Dispatch centers.

**Subpart F—Approval of Areas and Routes for Supplemental Air Carriers and Commercial Operators**

121.111 Applicability.
121.113 Area and route requirements: general.
121.115 Route width.
121.117 Airports.
121.119 Weather reporting facilities.
121.121 En route navigational facilities.
121.123 Servicing and maintenance facilities.
121.125 Flight following system.
121.127 Flight following system: requirements.

**Subpart G—Manual Requirements**

121.131 Applicability.
121.133 Preparation.
121.135 Contents.
121.137 Distribution.
121.139 Requirement for manual aboard aircraft: supplemental air carriers and commercial operators.
121.141 Aircraft Flight Manual.

**Subpart H—Aircraft Requirements**

121.151 Applicability.
121.153 Aircraft requirements: general.
121.155 Exclusive use requirements: supplemental air carriers and commercial operators.
121.157 Aircraft certification and equipment requirements.
121.159 Single-engine airplanes prohibited.
121.161 Airplane limitations: type of route.
121.163 Aircraft proving tests.

**Subpart I—Airplane Performance Operating Limitations**

121.171 Applicability.
121.173 General.
121.175 Transport category airplanes: reciprocating engine powered: weight limitations.
121.177 Transport category airplanes: reciprocating engine powered: takeoff limitations.
121.179 Transport category airplanes: reciprocating engine powered: en route limitations: all engines operating.
121.181 Transport category airplanes: reciprocating engine powered: en route limitations: one engine inoperative.
121.183 Part 25 transport category airplanes with four or more engines: reciprocating engine powered: en route limitations: two engines inoperative.
121.185 Transport category airplanes: reciprocating engine powered: landing limitations: destination airport.
121.187 Transport category airplanes: reciprocating engine powered: landing limitations: alternate airport.
121.189 Transport category airplanes: turbine engine powered: takeoff limitations.
121.191 Transport category airplanes: turbine engine powered: en route limitations: one engine inoperative.
121.193 Transport category airplanes: turbine engine powered: en route limitations: two engines inoperative.
121.195 Transport category airplanes: turbine engine powered: landing limitations: destination airports.
121.197 Transport category airplanes: turbine engine powered: landing limitations: alternate airports.
121.198 Transport category cargo service airplanes: increased zero fuel and landing weights.
121.199 Nontransport category airplanes: takeoff limitations.
121.201 Nontransport category airplanes: en route limitations: one engine inoperative.
121.203 Nontransport category airplanes: landing limitations: destination airport.
121.205 Nontransport category airplanes: landing limitations: alternate airport.
121.207 Provisionally certificated air carrier airplane: operating limitations.

**Subpart J—Special Airworthiness Requirements**

121.211 Applicability.
121.213 Special airworthiness requirements: general.
121.215 Cabin interiors.
121.217 Internal doors.
121.219 Ventilation.
121.221 Fire precautions.
121.223 Proof of compliance with § 121.221.
121.225 Propeller deicing fluid.
121.227 Pressure cross-feed arrangements.
121.229 Location of fuel tanks.
121.231 Fuel system lines and fittings.

Sec.
121.233 Fuel lines and fittings in designated fire zones.
121.235 Fuel valves.
121.237 Oil lines and fittings in designated fire zones.
121.239 Oil valves.
121.241 Oil system drains.
121.243 Engine breather lines.
121.245 Fire walls.
121.247 Fire-wall construction.
121.249 Cowling.
121.251 Engine accessory section diaphragm.
121.253 Powerplant fire protection.
121.255 Flammable fluids.
121.257 Shutoff means.
121.259 Lines and fittings.
121.261 Vent and drain lines.
121.263 Fire-extinguishing systems.
121.265 Fire-extinguishing agents.
121.267 Extinguishing agent container pressure relief.
121.269 Extinguishing agent container compartment temperature.
121.271 Fire-extinguishing system materials.
121.273 Fire-detector systems.
121.275 Fire detectors.
121.277 Protection of other airplane components against fire.
121.279 Control of engine rotation.
121.281 Fuel system independence.
121.283 Induction system ice prevention.
121.285 Carriage of cargo in passenger compartments.
121.287 Carriage of cargo in cargo compartments.
121.289 Landing gear; aural warning device.

**Subpart K—Instrument and Equipment Requirements**

121.301 Applicability.
121.303 Airplane instruments and equipment.
121.305 Flight and navigational equipment.
121.307 Engine instruments.
121.309 Emergency equipment.
121.311 Seat and safety belts.
121.313 Miscellaneous equipment.
121.315 Cockpit check procedure.
121.317 Passenger information.
121.319 Exterior exits and evacuation markings.
121.321 Shoulder harness.
121.323 Instruments and equipment for operations at night.
121.325 Instruments and equipment for operations under IFR or over-the-top.
121.327 Supplemental oxygen; reciprocating engine powered airplanes.
121.329 Supplemental oxygen for sustenance; turbine engine powered airplanes.
121.331 Supplemental oxygen requirements for pressurized cabin airplanes: reciprocating engine powered airplanes.
121.333 Supplemental oxygen for emergency descent and for first aid; turbine engine powered airplanes with pressurized cabins.
121.335 Equipment standards.
121.337 Protective breathing equipment for the flight crew.
121.339 Equipment for extended overwater operations.
121.341 Equipment for operations in icing conditions.
121.343 Flight recorders.
121.345 Radio equipment.
121.347 Radio equipment for operations under VFR over routes navigated by pilotage.
121.349 Radio equipment for operations under VFR over routes not navigated by pilotage or for operations under IFR or over-the-top.
121.351 Radio equipment for extended overwater operations and for certain other operations.
121.353 Equipment for operations over uninhabited terrain areas: flag and supplemental air carriers and commercial operators.
121.355 Equipment for operations on which specialized means of navigation are required: flag and supplemental air carriers and commercial operators.
121.357 Airborne weather radar equipment requirements: passenger-carrying airplanes.
121.359 Cockpit voice recorders.

**Subpart L—Maintenance, Preventive Maintenance, and Alterations**

121.361 Applicability.
121.363 Responsibility for airworthiness.
121.365 Maintenance, preventive maintenance, and alteration organization.
121.367 Maintenance, preventive maintenance, and alterations programs.
121.369 Manual requirements.
121.371 Required inspection personnel.
121.373 Continuing analysis and surveillance.
121.375 Maintenance and preventive maintenance training program.
121.377 Maintenance and preventive maintenance personnel duty time limitations.
121.378 Certificate requirements.
121.379 Authority to perform and approve maintenance, preventive maintenance, and alterations.

**Subpart M—Airman and Crewmember Requirements**

121.381 Applicability.
121.383 Airman: limitations on use of services.
121.385 Composition of flight crew.
121.387 Flight engineer.
121.389 Flight navigator: flag and supplemental air carriers and commercial operators.
121.391 Flight attendants: domestic air carriers.
121.393 Flight attendants: flag and supplemental air carriers and commercial operators.
121.395 Aircraft dispatcher: domestic and flag air carriers.
121.396 Emergency and emergency evacuation duties: domestic air carriers.
121.397 Emergency and emergency evacuation duties: flag and supplemental air carriers and commercial operators.

**Subpart N—Training Program**

121.410 Applicability.
121.411 Establishment.
121.413 Ground training: pilots.
121.415 Flight training: pilots.
121.417 Flight navigator training: flag air carriers.
121.419 Flight navigator training: supplemental air carriers and commercial operators.
121.421 Flight engineer training.
121.423 Crewmember emergency training.
121.425 Aircraft dispatcher training: domestic and flag air carriers.

**Subpart O—Flight Crewmember Qualifications**

121.431 Applicability.
121.433 General.
121.435 Helicopter operations: supplemental air carriers and commercial operators.
121.437 Pilot qualification: certificates required.
121.439 Pilot qualification: recent experience.
121.441 Pilot checks.
121.443 Pilot in command qualification: routes and airports: domestic and flag air carriers.
121.445 Pilot in command qualification: routes and airports: supplemental air carriers and commercial operators.
121.447 Pilot route and airport qualifications for particular trips: domestic and flag air carriers.
121.449 Proficiency checks: second in command.
121.451 Flight navigator qualification: flag and supplemental air carriers and commercial operators.
121.453 Flight engineer qualification.

**Subpart P—Aircraft Dispatcher Qualifications and Duty Time Limitations: Domestic and Flag Air Carriers**

121.461 Applicability.
121.463 Aircraft dispatcher qualifications.
121.465 Duty time limitations: domestic and flag air carriers.

**Subpart Q—Flight Time Limitations: Domestic Air Carriers**

121.470 Applicability.
121.471 Flight time limitations: all flight crewmembers.

**Subpart R—Flight Time Limitations: Flag Air Carriers**

121.480 Applicability.
121.481 Flight time limitations: one or two pilot crews.
121.483 Flight time limitations: two pilots and one additional flight crewmember.
121.485 Flight time limitations: three or more pilots and an additional flight crewmember.
121.487 Flight time limitations: pilots not regularly assigned.
121.489 Flight time limitations: other commercial flying.
121.491 Flight time limitations: deadhead transportation.
121.493 Flight time limitations: flight engineers and flight navigators.

**Subpart S—Flight Time Limitations: Supplemental Air Carriers and Commercial Operators**

121.500 Applicability.
121.501 Flight time limitations: helicopters.
121.503 Flight time limitations; pilots: airplanes.
121.505 Flight time limitations: two pilot crews: airplanes.
121.507 Flight time limitations: three pilot crews: airplanes.
121.509 Flight time limitations: four pilot crews: airplanes.
121.511 Flight time limitations: flight engineers: airplanes.
121.513 Flight time limitations: overseas and international operations: airplanes.
121.515 Flight time limitations: all airmen: airplanes.
121.517 Flight time limitations: other commercial flying: airplanes.
121.519 Flight time limitations: deadhead transportation: airplanes.
121.521 Flight time limitations: crew of two pilots and one additional airman as required.
121.523 Flight time limitations: crew of three or more pilots and additional airmen as required.
121.525 Flight time limitations: pilots serving in more than one kind of flight crew.

**Subpart T—Flight Operations**

121.531 Applicability.
121.533 Responsibility for operational control: domestic air carriers.
121.535 Responsibility for operational control: flag air carriers.

Sec.
121.537 Responsibility for operational control: supplemental air carriers and commercial operators.
121.539 Operations notices.
121.541 Operations schedules: domestic and flag air carriers.
121.543 Flight crewmembers at controls.
121.545 Manipulation of controls.
121.547 Admission to flight deck.
121.548 Air carrier inspector's credentials: admission to pilot's compartment.
121.549 Flying equipment.
121.551 Restriction or suspension of operation: domestic and flag air carriers.
121.553 Restriction or suspension of operation: supplemental air carriers and commercial operators.
121.555 Compliance with approved routes and limitations: domestic and flag air carriers.
121.557 Emergencies: domestic and flag air carriers.
121.559 Emergencies: supplemental air carriers and commercial operators.
121.561 Reporting potentially hazardous meteorological conditions and irregularities of ground and navigation facilities.
121.563 Reporting mechanical irregularities.
121.565 Engine inoperative; landing; reporting.
121.567 Instrument approach procedures and IFR landing minimums.
121.569 Equipment interchange: domestic and flag air carriers.
121.571 Briefing passengers: extended overwater flights.
121.573 Briefing passengers before takeoff: supplemental air carriers and commercial operators.
121.575 Alcoholic beverages.
121.579 Minimum altitudes for use of automatic pilot.
121.581 Forward observer's seat: en route inspections: air carriers.
121.583 Carriage of persons aboard airplane in cargo-only operations all-cargo aircraft.
121.585 Prohibition against carriage of weapons.
121.587 Closing and locking of flight crew compartment doors.

Subpart U—Dispatching and Flight Release Rules

121.591 Applicability.
121.593 Dispatching authority: domestic air carriers.
121.595 Dispatching authority: flag air carriers.
121.597 Flight release authority: supplemental air carriers and commercial operators.
121.599 Familiarity with weather conditions.
121.601 Aircraft dispatcher information to pilot in command: domestic and flag air carriers.
121.603 Facilities and services: supplemental air carriers and commercial operators.
121.605 Airplane equipment.
121.607 Communication and navigation facilities: domestic and flag air carriers.
121.609 Communication and navigation facilities: supplemental air carriers and commercial operators.
121.611 Dispatch or flight release under VFR.
121.613 Dispatch or flight release under IFR or over-the-top.
121.615 Dispatch or flight release over water: flag and supplemental air carriers and commercial operators.
121.617 Alternate airport for departure.
121.619 Alternate airport for destination: IFR or over-the-top: domestic air carriers.
121.621 Alternate airport for destination: flag air carriers.
121.623 Alternate airport for destination; IFR or over-the-top: supplemental air carriers and commercial operators.
121.625 Alternate airport weather minimums.
121.627 Continuing flight in unsafe conditions.
121.629 Operation in icing conditions.
121.631 Original dispatch or flight release, redispatch or amendment of dispatch or flight release.
121.633 Dispatch to and from provisional airports: domestic air carriers.
121.635 Dispatch to and from refueling or provisional airports: flag air carriers.
121.637 Takeoffs from unlisted and alternate airports: domestic and flag air carriers.
121.639 Fuel supply; all operations: domestic air carriers.
121.641 Fuel supply; nonturbine and turbopropeller-powered airplanes: flag air carriers.
121.643 Fuel supply: nonturbine and turbopropeller-powered airplanes: supplemental air carriers and commercial operators.
121.645 Fuel supply; turbine engine-powered airplanes, other than turbo propeller; flag and supplemental air carriers and commercial operators.
121.647 Factors for computing fuel required.
121.649 Takeoff and landing weather minimums: VFR: domestic air carriers.
121.651 Takeoff and landing weather minimums: IFR: domestic and flag air carriers.
121.653 Takeoff and landing weather minimums: IFR: supplemental air carriers and commercial operators.
121.655 Applicability of reported weather minimums.
121.657 Flight altitude rules.
121.659 Initial approach altitude: domestic and supplemental air carriers and commercial operators.
121.661 Initial approach altitude: flag air carriers.
121.663 Responsibility for dispatch release: domestic and flag air carriers.
121.665 Load manifest.
121.667 Flight plan: VFR and IFR: supplemental air carriers and commercial operators.

Subpart V—Records and Reports

121.681 Applicability.
121.683 Crewmember and dispatcher record.
121.685 Aircraft record: flag and domestic air carriers.
121.687 Dispatch release: flag and domestic air carriers.
121.689 Flight release form: supplemental air carriers and commercial operators.
121.691 Load manifest: domestic and flag air carriers.
121.693 Load manifest: supplemental air carriers and commercial operators.
121.695 Disposition of load manifest, dispatch release, and flight plans: domestic and flag air carriers.
121.697 Disposition of load manifest, flight release, and flight plans: supplemental air carriers and commercial operators.
121.699 Maintenance records.
121.701 Maintenance log: aircraft.
121.703 Mechanical reliability reports.
121.705 Mechanical interruption summary report.
121.707 Alteration and repair reports.
121.709 Airworthiness release or aircraft log entry.
121.711 Communication records: domestic and flag air carriers.
121.713 Retention of contracts and amendments: commercial operator.

Subpart W—Crewmember Certificate; International

121.721 Applicability.
121.723 Application and issue.

APPENDIX A—FIRST-AID KITS

APPENDIX B—MINIMUM STANDARDS FOR THE APPROVAL OF AIRPLANE SIMULATORS

APPENDIX C—C-46 NONTRANSPORT CATEGORY AIRPLANES

AUTHORITY: The provisions of this Part 121 issued under secs. 313(a), 501, 601 through 610, and 1102, Federal Aviation Act of 1958, 49 U.S.C. 1354(a), 1421 through 1430, and 1502.

## Subpart A—General

### § 121.1 Applicability.

(a) Except as prescribed in paragraph (b) of this section, this part prescribes rules governing the certification and operations of the following:

(1) Each air carrier engaging in interstate or overseas air transportation under a certificate of public convenience and necessity or other appropriate economic authority issued by the CAB.

(2) Each air carrier engaging in foreign air transportation under a certificate of public convenience and necessity or other appropriate economic authority issued by the CAB.

(3) Each air carrier covered by subparagraph (1) or (2) of this paragraph when engaging in charter flights or other special service operations.

(4) Each supplemental air carrier when it engages in the carriage of persons or property in air commerce for compensation or hire.

(5) Each commercial operator.

(b) This part does not apply to operations conducted under Part 127, Part 133, or Part 135.

(c) In addition, this part prescribes rules governing—

(1) Each person employed or used by an air carrier or commercial operator in operations under this part, including the maintenance, preventive maintenance and alteration of aircraft; and

(2) Each person who is on board an aircraft being operated under this part.

(d) For the purpose of determining whether a person is a commercial operator under this part, operations are considered to be for compensation or hire when they are a major enterprise for profit and not merely incidental to the person's other business.

(e) For the purpose of this part, "passenger-carrying aircraft" or "passenger-carrying operation" means one carrying any person other than a flight crewmember or other crewmember, company employee, authorized government representative, or person accompanying a shipment.

### § 121.3 Certification requirements: general.

(a) Except as provided in paragraph (b) of this section, no person may engage in scheduled interstate air transportation within the 48 contiguous States or the District of Columbia without, or in violation of, a domestic air carrier operating certificate and appropriate operations specifications issued under this part. An air carrier holding such a certificate is hereafter in this part referred to as a "domestic air carrier".

(b) The Administrator may authorize any air carrier holding authority to engage in scheduled cargo operations under Title IV of the Federal Aviation Act to conduct those operations under the certification and operation rules applicable to carriers covered by paragraph (e) of this section.

(c) Except as provided in paragraph (d) of this section, no person may engage in scheduled air transportation, other than that described in paragraph (a), without, or in violation of, a flag air carrier operating certificate and appropriate operations specifications issued under this part. An air carrier holding such a certificate is hereafter in this part referred to as a "flag air carrier".

(d) A domestic air carrier may, in the case of segments of routes extending outside the 48 contiguous States and the District of Columbia, be authorized to conduct operations over those route segments under the domestic air carrier certification and operation rules.

(e) No person may engage in air transportation (other than that described in paragraph (a) or (c) of this section) without, or in violation of, a supplemental air carrier certificate and appropriate operations specifications issued under this part. An air carrier holding a supplemental air carrier certificate is hereafter in this part referred to as a "supplemental air carrier".

(f) No person (except a person covered by paragraph (a), (b), (c), (d), or (e) of this section) may engage in the carriage of persons or property for compensation or hire in air commerce without, or in violation of a commercial operator certificate and appropriate operations specifications issued under this part.

(g) A domestic or flag air carrier or an air carrier holding a certificate under Part 127 is not eligible for or required to obtain a separate certificate for operations under paragraph (e) or (f) of this section, but must obtain authority to conduct those operations by appropriate amendments to its operations specifications.

### § 121.5 Charter flights or other special service operation: flag and domestic air carriers.

Each flag or domestic air carrier, or air carrier holding an operating certificate under Part 127 shall conduct the following operations under the rules of this part applicable to supplemental air carriers and commercial operators:

(a) Any charter flight or other special service conducted over routes into airports listed in its operations specifications, unless the air carrier obtains authority from the Administrator to conduct those operations under the rules that would otherwise apply to that air carrier's operations.

(b) Any charter flight or other special service that involves, in whole or in part, off-route operations.

### § 121.7 Intrastate common carriage by commercial operator.

An applicant for a commercial operator certificate, or a commercial operator, who carries or intends to carry passengers for compensation or hire as a common carrier between two points entirely within any State with the frequency set forth in paragraph (a) or (b) of this section shall show that it is able to, and will conduct, those operations under the rules applicable to domestic air carriers or any other rules that the Administrator finds to be necessary to provide an appropriate level of safety for the operation:

(a) Two flights, or one round trip a week on the same day or days of the week for eight or more weeks in any 90 consecutive days.

(b) A total of 36 or more flights or 18 or more round trips in any 90 consecutive days.

### § 121.9 Certain operations of small aircraft.

Upon application, the Administrator may issue operations specifications to an air carrier conducting operations under this part, authorizing it to conduct operations with small aircraft under Part 135 if he finds that safety in air transportation and the public interest allows it. Operations specifications issued under this section contain such operating limitations and requirements as the Administrator finds necessary.

### § 121.11 Additional rules applicable to operations subject to this part: flag air carriers, supplemental air carriers, and commercial operators.

Each flag air carrier, supplemental air carrier, and commercial operator shall while operating an airplane within a foreign country, comply with the air traffic rules of the country concerned and local airport rules, except where any rule of this part is more restrictive and may be followed without violating the rules of that country.

### § 121.13 Rules applicable to helicopter operations: deviation authority.

(a) Each person operating a helicopter under this part shall comply with §§ 121.5, 121.9, 121.11, Subpart C (except holders of certificates under Part 127), Subpart F (except holders of certificates under Part 127), Subpart G, 121.153, 121.155, 121.157(e), 121.163, 121.315, Subpart L, 121.383, 121.385, 121.433, 121.435, 121.437, 121.501, 121.533 through 121.563, 121.567, 121.575, 121.597, 121.599, 121.603, 121.609, 121.611 through 121.617, 121.623 through 121.631, 121.647, 121.653, 121.655, 121.657, 121.659, 121.665, 121.667, and Subpart V.

(b) In addition to the rules of this part listed in paragraph (a) of this section, each person operating a helicopter shall comply with §§ 127.81, 127.83, 127.91, 127.93, 127.101 through 127.117, 127.119, 127.121, 127.123, 127.125, 127.145, 127.151 through 127.161, 127.171 through 127.177, 127.231 through 127.261, and 127.301 through 127.319.

(c) The Administrator may issue operations specifications authorizing a deviation from any specific requirement for helicopter operations if he finds that the deviation provides a substantially equivalent standard of safety.

## Subpart B—Certification Rules for Domestic and Flag Air Carriers

### § 121.21 Applicability.

This subpart prescribes certification rules for domestic air carriers and flag air carriers.

### § 121.23 Operations specifications not a part of certificate.

Except for those operations specifications specifying airport and route or route segment authorizations, air carrier operations specifications are not a part of an air carrier's operating certificate.

### § 121.25 Contents of certificate and operations specifications.

(a) Each domestic and flag air carrier operating certificate contains the following:

(1) The air carrier's name.

(2) The airports to and from which it may operate.

(3) The approved routes over which it may operate.

These airports and routes are incorporated into the air carrier operating certificate by reference to the authorized airports and approved routes listed in that air carrier's operations specifications.

(b) Each air carrier's operations specifications contain the following:

(1) The kinds of operations authorized.

(2) The types of airplanes authorized for use.

(3) En route authorizations and limitations.

(4) Airport authorizations.

(5) Airport limitations.

(6) Time limitations, or standards for determining time limitations, for overhauls, inspections, and checks of airframes, engines, propellers, and appliances.

(7) Procedures for control of weight and balance of airplanes.

(8) Interline equipment interchange requirements, if relevant.

(9) Any other item that the Administrator determines is necessary to cover a particular situation.

### § 121.27 Issue of certificate.

(a) An applicant under this subpart is entitled to an operating certificate if—

(1) He holds a certificate of public convenience and necessity or other appropriate economic authority issued by the Civil Aeronautics Board; and

(2) The Administrator, after investigation, finds that the applicant is properly and adequately equipped and able to conduct a safe operation in accordance with this part and operations specifications issued under this part.

(b) In the case of operations conducted under the rules of this Part applicable to domestic air carriers in small airplanes, or conducted under a temporary authorization issued by the Civil Aeronautics Board, the Administrator issues operations specifications

prescribing appropriate requirements that deviate from the requirements of this part whenever, after investigation, he finds that general standards of safety for such an operation require or allow a deviation from such a requirement for a particular operation or class of operations for which an application for an air carrier operating certificate has been made.

(c) Whenever, after investigation, the Administrator determines that the general standards of safety for flag air carrier operations conducted—

(1) Between points in Alaska; or

(2) Under a temporary authorization issued by the Civil Aeronautics Board; require or allow a deviation from any requirement of this part for a particular operation or class of operations for which an application for an air carrier operating certificate has been made, he issues operations specifications prescribing appropriate requirements that deviate from the requirements of this Part.

**§ 121.29 Duration of certificate.**

(a) An air carrier operating certificate issued under this subpart is effective until termination of the certificate of public convenience and necessity or other economic authority issued by the Civil Aeronautics Board to the air carrier or until it is surrendered or the Administrator suspends, revokes, or otherwise terminates it.

(b) If the Administrator suspends or revokes such an air carrier operating certificate, the holder of that certificate shall return it to the administrator.

## Subpart C—Certification Rules for Supplemental Air Carriers and Commercial Operators

**§ 121.41 Applicability.**

This subpart prescribes certification rules for supplemental air carriers and commercial operators.

**§ 121.43 Operations specifications not a part of certificate.**

Operations specifications are not a part of a supplemental air carrier or commercial operator operating certificate.

**§ 121.45 Contents of certificate and operations specifications.**

(a) Each certificate issued under this subpart contains the following:

(1) The holder's name.

(2) A description of the operations authorized.

(3) The date it is issued and the date it terminates.

(b) The operations specifications issued under this subpart contain the following:

(1) The kinds of operations authorized.

(2) The types and registration numbers of aircraft authorized for use.

(3) En route authorizations and limitations, including areas of operation.

(4) Special airport authorizations.

(5) Special airport limitations.

(6) Time limitations, or standards for determining time limitations, for overhauls, inspections, and checks of airframes, aircraft engines, propellers, and appliances.

(7) Procedures for control of weight and balance of aircraft.

(8) Any other item that the Administrator determines is necessary to cover a particular situation.

**§ 121.47 Application for supplemental air carrier and commercial operator certificates.**

(a) Each applicant for the original issue or renewal of a supplemental air carrier or commercial operator certificate must submit his application, in a form and manner prescribed by the Administrator, to the FAA Air Carrier District Office in whose area the applicant proposes to establish or has established its principal operations base, at least 60 days before the date of intended operations, or in the case of a renewal application, at least 60 days before the expiration date of the certificate.

(b) Each application submitted under paragraph (a) of this section must contain a signed statement showing the following:

(1) For corporate applicants:

(i) The name and address of each stockholder who owns five percent or more of the total voting stock of the corporation, and if that stockholder is not the sole beneficial owner of the stock, the name and address of each beneficial owner. An individual is considered to own the stock owned, directly or indirectly, by or for his spouse, his children, his grandchildren, or his parents.

(ii) The name and address of each director and each officer, and each person employed or who will be employed in a management position described in § 121.59.

(iii) The name and address of each person directly or indirectly controlling or controlled by the applicant, and each person under direct or indirect control with the applicant.

(2) For non-corporate applicants:

(i) The name and address of each person having a financial interest therein and the nature and extent of that interest.

(ii) The name and address of each person employed or who will be employed in a management position described in § 121.59.

(c) In addition, each applicant for the original issue or renewal of a commercial operator certificate must submit with the application a signed statement showing—

(1) The financial information listed in § 121.49; and

(2) The nature and scope of its intended operation, including the name and address of each person, if any, with whom the applicant has a contract to provide services as a commercial operator and the scope, nature, date, and duration of each of those contracts.

(d) Each applicant for, or holder of, a certificate issued under this subpart, shall notify the Administrator within 10 days after—

(1) A change in any of the persons, or the names and addresses of any of the persons, submitted to the Administrator under paragraph (b) (1) or (2) of this section; or

(2) A change in the financial information submitted to the Administrator under § 121.49 that occurs while the application for the issue or renewal is pending before the FAA and that would make the applicant's financial situation substantially less favorable than originally reported.

**§ 121.49 Commercial operator: financial information required.**

(a) Each applicant for the original issue or renewal of a commercial operator certificate must submit the following financial information:

(1) A balance sheet that shows assets, liabilities, and net worth, as of a date not more than 60 days before the date of application.

(2) In the case of an application for renewal, a profit and loss statement for a fiscal year ending on a date not more than 60 days before the date of the application, with separation of items relating to applicant's commercial operator activities from his other business activities. The applicant shall submit a listing and brief description of the nature and scope of the commercial operator contracts that gave rise to the operating income shown on the profit and loss statement, including the names of the contracting parties and the date and duration of each contract. However, if the applicant's regular fiscal year for income tax purposes ends on a date more than 60 days before the date of application, the applicant may submit a profit and loss statement covering its normal fiscal year, plus a supplementary profit and loss statement for the period from the end of the regular fiscal year to a date not more than 60 days before the date of application.

(3) An itemization of over-due liabilities showing amounts, names and addresses of creditors, description of indebtedness, and due date of obligations.

(4) An itemization of claims in litigation against the applicant showing the amounts claimed, the name and address of each claimant, and a description of each claim.

(5) A detailed analysis covering the first three months of the proposed operation after the possible issue or renewal of the certificate applied for that shows—

(i) Estimated amount and source of both operating and non-operating revenue, including identification of its existing and anticipated income producing contracts and estimated revenue per mile or hour of operation by aircraft type;

(ii) Estimated amount of operating and non-operating expenses by expense objective classification; and

(iii) Estimated profit or loss.

(6) An estimate of the cash that will be needed during the first three months of the proposed operation after the possible issue or renewal date of the certificate applied for to cover—

(i) Acquisition of property and equipment;

(ii) Retirement of debt;

(iii) Additional working capital;

(iv) Operations (losses); and

(v) Other (explain).

(7) An estimate of the cash that will be available from the following sources during the first three months of the proposed operation after the possible issue or renewal of the certificate applied for that shows—

(i) Sale of property or flight equipment;

(ii) New debt;

(iii) New equity;

(iv) Working capital reduction;

(v) Operations (profits);

(vi) Depreciation and amortization; and

(vii) Other (explain).

(8) Any other financial information the Administrator requires to enable him to determine that the applicant has sufficient financial resources to conduct its operations with the degree of safety required in the public interest.

(b) Each financial statement filed with the FAA under this part must be based on accounts prepared and maintained on an accrual basis in accordance with generally accepted accounting principles applied on a consistent basis, and must contain the name and address of the applicant's public accounting firm, if any.

**§ 121.51 Issue of certificate.**

(a) An applicant for a certificate under this subpart is entitled to the certificate if he is a citizen of the United States and the Administrator, after investigation (including any necessary verification of financial and other information submitted) finds that the applicant—

(1) Holds the economic authority required by the Civil Aeronautics Board, if any;

(2) Is not disqualified under paragraph (b) of this section; and

(3) Is properly and adequately equipped and able to conduct a safe operation in accordance with the requirements of this part and the operations specifications provided for in this part.

(b) The Administrator may deny an application for a certificate under this subpart if he finds—

(1) That an air carrier or commercial operator certificate previously issued to the applicant was revoked;

(2) That a person who was employed in a management position similar to any listed under § 121.59 with (or has exercised control with respect to) any air carrier or commercial operator whose operating certificate has been revoked, will be employed in any of those positions or a similar position (or will be in control of or have a substantial ownership interest in the applicant), and that the person's employment or control contributed materially to the reasons for revoking that certificate; or

(3) In the case of an applicant for a commercial operator certificate, that for financial reasons the applicant is not able to conduct a safe operation.

**§ 121.53 Duration of certificate.**

(a) A certificate issued under this subpart is effective for one year unless the Administrator sooner suspends, revokes, or otherwise terminates it, or in the case of a supplemental air carrier, upon termination of the economic authority required by the Civil Aeronautics Board, if sooner.

(b) The Administrator may suspend or revoke a certificate under section 609 of the Federal Aviation Act of 1958 and the applicable procedures of Part 13 for any cause that, at the time of suspension or revocation, would have been grounds for denying an application for a certificate.

(c) If the Administrator suspends or revokes a certificate or it is otherwise terminated, the holder of that certificate shall return it to the Administrator.

**§ 121.55 Commercial operator: supplemental periodic financial report.**

(a) Each holder of a commercial operator certificate shall, within 45 days after his original or renewed certificate has been in effect for four months, submit a signed financial statement to the FAA that shows profit and loss for—

(1) The four-month period after the date the certificate was issued or renewed, as the case may be; and

(2) Any period immediately preceding the date of certificate issue or renewal not covered by the preceding financial statement filed under § 121.47(c)(1).

(b) Each holder shall submit a listing and brief description of the nature and scope of the contracts that gave rise to the operating income shown on the profit and loss statement, including the names of the contracting parties, and the date and duration of each contract. In addition, it shall submit all other information required for original issue of a certificate under § 121.47(c)(1).

**§ 121.57 Obtaining waivers and authority for deviations.**

(a) The Administrator may, upon application by the supplemental air carrier or commercial operator, authorize deviations from the applicable requirements of this part, by an appropriate amendment to the operations specifications, for military contract or for emergency operations. The Administrator may, at any time, terminate any grant of deviation authority or waiver issued under this section. Each supplemental air carrier and commercial operator authorized deviations under this section shall comply with the terms of the authorization when conducting operations affected thereby.

(b) If, in the case of military contracts, the Department of Defense certifies to the Administrator that an operation is essential to the national defense and requires a requested deviation, and the Administrator finds that the deviation is not based on an economic advantage or convenience to the air carrier or commercial operator or the United States, the Administrator may authorize deviations for—

(1) Operations conducted under a contract with an armed force as the primary contractor; or

(2) Operations conducted for an armed force under a subcontract with a primary contractor.

(c) In emergency conditions the Administrator may authorize deviations for operations if those conditions necessitate the transportation of persons or supplies for the protection of life or property, and he finds that a deviation is necessary for the expeditious conduct of the operation.

(d) The Administrator may, by an appropriate amendment to the operations specifications, waive, in whole or in part, submission of the financial information required from a commercial operator in a renewal application or supplemental periodic financial report if—

(1) Application for the waiver is filed at least 30 days before the information is due; and

(2) The Administrator finds that the submission is not required in the public interest, based on information as to the operator's—

(i) Financial standing;

(ii) Management; and

(iii) Kind of operations.

The filing of an application for a waiver under this paragraph does not automatically extend the time for submitting the required information.

**§ 121.59 Management personnel required.**

(a) Each applicant for a certificate under this subpart must show that it has enough qualified management personnel to provide the highest degree of safety in its operations and that those personnel are employed on a full-time basis in the following or equivalent positions:

(1) General manager.

(2) Director of operations (who may be the general manager if qualified).

(3) Director of maintenance.

(4) Chief pilot.

(5) Chief inspector.

(b) Upon application by the supplemental air carrier or commercial operator the Administrator may approve different positions or numbers of positions than those listed in paragraph (a) of this section for a particular operation if the air carrier or commercial operator shows that it can perform the operation with the highest degree of safety under the direction of fewer or different categories of management personnel due to—

(1) The kind of operation involved;

(2) The number and type of aircraft used; and

(3) The area of operations.

The title and number of positions so approved are set forth in the operations specifications of the air carrier or commercial operator.

(c) Each supplemental air carrier and commercial operator shall—

(1) Set forth the duties, responsibilities, and authority, of the personnel required by this section, in the general policy section of the air carrier manual or commercial operator manual;

(2) List in the manual the names and addresses of the persons assigned to those positions; and

(3) Within at least 10 days, notify the FAA Air Carrier District Office charged with the overall inspection of the air carrier or commercial operator, of any change made in the assignment of persons to the listed positions.

**§ 121.61 Management personnel: qualifications.**

(a) No person may serve as director of operations unless he knows the contents of the air carrier's or commercial operator's operations manual and operations specifications, and the provisions of this part necessary to the proper performance of his duties and—

(1) Holds, or has held, an airline transport pilot certificate and has had at least three years of experience as pilot in command of a large aircraft; or

(2) Has had at least three years of experience as director of operations, of an operation using large aircraft, or a position of comparable responsibility.

(b) No person may serve as chief pilot unless he—

(1) Holds a current airline transport pilot certificate with appropriate ratings for the type of aircraft used;

(2) Has had at least three years of experience as a pilot in command of a large aircraft with an air carrier or commercial operator; and

(3) Knows the contents of the air carrier's or commercial operator's manual and operations specifications, and the provisions of this part necessary to the proper performance of his duties.

(c) No person may serve as director of maintenance unless he—

(1) Holds a current mechanic certificate with either an airframe or powerplant rating, and has had at least five years of experience in the maintenance of large aircraft, one year of which must have been in a supervisory capacity; and

(2) Knows the maintenance parts of the air carrier's or commercial operator's manual and operations specifications and the applicable maintenance provisions of this part.

(d) No person may serve as chief inspector unless he—

(1) Holds a current mechanic certificate with both airframe and powerplant ratings, and has held these ratings for at least three years;

(2) Has had at least three years of diversified maintenance experience on large aircraft with an air carrier, commercial operator, or certificated repair station, one year of which must have been as a maintenance inspector; and

(3) Knows the maintenance parts of the air carrier's or commercial operator's manual and operations specifications, and the applicable maintenance provisions of this part.

## Subpart D—Rules Governing All Certificate Holders Under This Part

### § 121.71 Applicability.

This subpart prescribes rules governing all certificate holders under this Part.

### § 121.73 Availability of certificate and operations specifications.

Each certificate holder shall make its operating certificate and operations specifications available for inspection by the Administrator at its principal operations office.

### § 121.75 Use of operations specifications.

(a) Each certificate holder shall keep each of its employees informed of the provisions of its operations specifications that apply to the employee's duties and responsibilities.

(b) Each certificate holder shall maintain a complete and separate set of its operations specifications. In addition, each certificate holder shall insert pertinent excerpts of its operations specifications, or reference thereto, in its manual in such a manner that they retain their identity as operations specifications.

### § 121.77 Amendment of certificate.

(a) The Administrator may amend an operating certificate issued under this Part—

(1) Upon application by the holder, if the Administrator determines that safety in air transportation (or in air commerce, in the case of a commercial operator) and the public interest allows the amendment; or

(2) Under section 609 of the Federal Aviation Act of 1958 (49 U.S.C. 1429) and Part 13 of this chapter, if the Administrator determines that safety in air transportation (or in air commerce, in the case of a commercial operator) and the public interest requires the amendment.

(b) An applicant for an amendment to an operating certificate must file his application with the FAA Air Carrier District Office charged with the overall inspection of his operations at least 15 days before the proposed effective date of that amendment, unless a shorter filing period is allowed by that office.

(c) At any time within 30 days after refusal of the District Office to approve an application for amendment, the holder may petition the Administrator personally to reconsider the refusal.

### § 121.79 Amendment of operations specifications.

(a) The Administrator may amend any operations specifications issued under this Part, except those that are a part of the air carrier operating certificate—

(1) Upon application by the holder, if the Administrator determines that safety in air transportation (or in air commerce, in the case of a commercial operator) and the public interest allows the amendment; or

(2) If the Administrator determines that safety in air transportation (or in air commerce, in the case of a commercial operator) and the public interest requires the amendment.

(b) In the case of an amendment under paragraph (a)(2) of this section, the Administrator notifies the holder, in writing, of the proposed amendment, fixing a reasonable period (but not less than seven days) within which the holder may submit written information, views, and arguments on the amendment. After considering all relevant material presented, the Administrator notifies the holder of any amendment adopted, or rescinds the notice. The amendment becomes effective not less than 30 days after the holder receives notice of it, unless the holder petitions the Administrator personally to reconsider the amendment, in which case its effective date is stayed pending a decision by the Administrator. If the Administrator finds that there is an emergency requiring immediate action with respect to safety in air transportation, that makes the procedure in this paragraph impracticable or contrary to the public interest, he may issue an amendment, effective without stay, on the date the holder receives notice of it. In such a case, the Administrator incorporates the finding, and a brief statement of the reasons for it, in the notice of the amended operations specifications to be adopted.

(c) An applicant must file his application for an amendment of operations specifications with the FAA District Office charged with the overall inspection of its operations at least 15 days before the date that he proposes for the amendment to become effective, unless a shorter filing period is allowed by that office.

(d) Within 30 days after receiving from the District Office a notice of refusal to approve the application for amendment, the applicant may petition the Administrator personally to reconsider the refusal to amend.

(e) Airport and route authorizations may be amended under § 121.77.

### § 121.81 Inspection authority.

(a) Each certificate holder shall allow the Administrator, at any time or place, to make any inspections or tests to determine its compliance with the Federal Aviation Act of 1958, the Federal Aviation Regulations, its operating certificate and operations specifications, or its eligibility to continue to hold its certificate.

(b) In the case of a supplemental air carrier or commercial operator, these inspections and tests include inspections and tests of financial books and records, except that the Administrator does not exercise this authority with respect to the financial books and records of a supplemental air carrier if the information sought can be obtained from the Civil Aeronautics Board.

### § 121.83 Change of address.

Each certificate holder shall notify the FAA Air Carrier District Office charged with the overall inspection of its operations, in writing, at least 30 days in advance, of any change in the address of its principal business office, its principal operations base, or its principal maintenance base.

## Subpart E—Approval of Routes: Domestic and Flag Air Carriers

### § 121.91 Applicability.

This subpart prescribes rules for obtaining approval of routes by domestic or flag air carriers.

### § 121.93 Route requirements: general.

(a) Each domestic or flag air carrier seeking a route approval must show—

(1) That it is able to conduct satisfactory scheduled operations between each regular, provisional, and refueling airport over that route or route segment; and

(2) That the facilities and services required by §§ 121.97 through 121.107 are available and adequate for the proposed operation.

The Administrator approves a route outside of controlled airspace if he determines that traffic density is such that an adequate level of safety can be assured.

(b) Paragraph (a) of this section does not require actual flight over a route or route segment if the air carrier shows that the flight is not essential to safety, considering the availability and adequacy of airports, lighting, maintenance, communication, navigation, fueling,

ground, and airplane radio facilities, and the ability of the personnel to be used in the proposed operation.

### § 121.95 Route width.

(a) Approved routes and route segments over U.S. Federal airways or foreign airways (and advisory routes in the case of flag air carriers) have a width equal to the designated width of those airways or routes. Whenever the Administrator finds it necessary to determine the width of other approved routes, he considers the following:

(1) Terrain clearance.

(2) Minimum en route altitudes.

(3) Ground and airborne navigation aids.

(4) Air traffic density.

(5) ATC procedures.

(b) Any route widths of other approved routes determined by the Administrator are specified in the air carrier's operations specifications.

### § 121.97 Airports.

Each domestic and flag air carrier must show that each route it submits for approval has enough airports that are properly equipped and adequate for the proposed operation, considering such items as size, surface, obstructions, facilities, public protection, lighting, navigational and communications aids, and ATC.

### § 121.99 Communications facilities.

Each domestic and flag air carrier must show that a two-way air/ground radio communication system is available at points that will ensure reliable and rapid communications, under normal operating conditions over the entire route (either direct or via approved point to point circuits) between each airplane and the appropriate dispatch office, and between each airplane and the appropriate air traffic control unit. For all domestic air carrier operations and for flag air carrier operations in the 48 contiguous States and the District of Columbia, the communications systems between each airplane and the dispatch office must be independent of any system operated by the United States.

### § 121.101 Weather reporting facilities.

(a) Each domestic and flag air carrier must show that enough weather reporting services are available along each route to ensure weather reports and forecasts necessary for the operation.

(b) No domestic or flag air carrier may use any weather report to control flight unless—

(1) For operations within the 48 contiguous States and the District of Columbia, it was prepared by the U.S. Weather Bureau or a source approved by the Weather Bureau; or

(2) For operations conducted outside the 48 contiguous States and the District of Columbia, it was prepared by a source approved by the Administrator.

(c) Each domestic or flag air carrier that uses forecasts to control flight movements shall use forecasts prepared from weather reports specified in paragraph (b) of this section.

### § 121.103 En route navigational facilities.

(a) Except as provided in paragraph (b) of this section, each domestic and flag air carrier must show, for each proposed route, that nonvisual ground aids are—

(1) Available over the route for navigating aircraft within the degree of accuracy required for ATC; and

(2) Located to allow navigation to any regular, provisional, refueling, or alternate airport, within the degree of accuracy necessary for the operation involved.

Except for those aids required for routes to alternate airports, nonvisual ground aids required for approval of routes outside of controlled airspace are listed in the air carrier's operations specifications.

(b) Nonvisual ground aids are not required for—

(1) Day VFR operations that the air carrier shows can be conducted safely by pilotage because of the characteristics of the terrain;

(2) Night VFR operations on routes that the air carrier shows have reliably lighted landmarks adequate for safe operation; and

(3) Operations on route segments where the use of celestial or other specialized means of navigation is approved by the Administrator.

### § 121.105 Servicing and maintenance facilities.

Each domestic and flag air carrier must show that competent personnel and adequate facilities and equipment (including spare parts, supplies, and materials) are available at such points along the air carrier's route as are necessary for the proper servicing, maintenance, and preventive maintenance of airplanes and auxiliary equipment.

### § 121.107 Dispatch centers.

Each domestic and flag air carrier must show that it has enough dispatch centers, adequate for the operations to be conducted, that are located at points necessary to ensure proper operational control of each flight.

## Subpart F—Approval of Areas and Routes for Supplemental Air Carriers and Commercial Operators

### § 121.111 Applicability.

This subpart prescribes rules for obtaining approval of areas and routes by supplemental air carriers and commercial operators.

### § 121.113 Area and route requirements: general.

(a) Each supplemental air carrier or commercial operator seeking route and area approval must show—

(1) That it is able to conduct operations within the United States in accordance with subparagraphs (3) and (4) of this paragraph;

(2) That it is able to conduct operations in accordance with the applicable requirements for each area outside the United States for which authorization is requested;

(3) That it is equipped and able to conduct operations over, and use the navigational facilities associated with, the Federal airways, foreign airways, or advisory routes (ADR's) to be used; and

(4) That it will conduct all IFR and night VFR operations over Federal airways, foreign airways, controlled airspace, or advisory routes (ADR's).

(b) Notwithstanding paragraph (a)(4) of this section, the Administrator may approve a route outside of controlled airspace if the supplemental air carrier or commercial operator shows the route is safe for operations and the Administrator finds that traffic density is such that an adequate level of safety can be assured. The air carrier or commercial operator may not use such a route unless it is approved by the Administrator and is listed in the air carrier's or commercial operator's operations specifications.

### § 121.115 Route width.

(a) Routes and route segments over Federal airways, foreign airways, or advisory routes have a width equal to the designated width of those airways or advisory routes. Whenever the Administrator finds it necessary to determine the width of other routes, he considers the following:

(1) Terrain clearance.

(2) Minimum en route altitudes.

(3) Ground and airborne navigation aids.

(4) Air traffic density.

(5) ATC procedures.

(b) Any route widths of other routes determined by the Administrator are specified in the air carrier's or commercial operator's operations specifications.

### § 121.117 Airports.

No supplemental air carrier or commercial operator may use any airport unless it is properly equipped and adequate for the proposed operation, considering such items as size, surface, obstructions, facilities, public protection, lighting, navigational and communications aids, and ATC.

### § 121.119 Weather reporting facilities.

(a) No supplemental air carrier or commercial operator may use any weather report to control flight unless it was prepared and released by the U.S. Weather Bureau or a source approved by the Weather Bureau. For operations outside the U.S., or at U.S. Military airports, where those reports are not available, the air carrier or commercial operator must show that its weather reports are prepared by a source found satisfactory by the Administrator.

(b) Each supplemental air carrier or commercial operator that uses forecasts to control flight movements shall use forecasts prepared from weather reports specified in paragraph (a) of this section.

### § 121.121 En route navigational facilities.

(a) Except as provided in paragraph (b) of this section, no supplemental air carrier or commercial operator may conduct any operation over a route unless nonvisual ground aids are—

(1) Available over the route for navi-

### § 121.127 Flight following system: re-

(2) Duties and responsibilities of each crewmember and appropriate members

overhauls, inspections, and checks of airframes, engines, propellers, and appli-

## Subpart H—Aircraft Requirements

performance requirements of §§ 4a.737-T through 4a.750-T of the Civil Air

(1) Available over the route for navigating airplanes within the degree of accuracy required for ATC; and

(2) Located to allow navigation to any airport of destination, or alternate airport, within the degree of accuracy necessary for the operation involved.

(b) Nonvisual ground aids are not required for—

(1) Day VFR operations that can be conducted safely by pilotage because of the characteristics of the terrain;

(2) Night VFR operations on lighted airways or on routes that the Administrator determines have reliable landmarks adequate for safe operation; or

(3) Operations on route segments where the use of celestial or other specialized means of navigation is approved.

(c) Except for those aids required for routes to alternate airports, the nonvisual ground navigational aids that are required for approval of routes outside of controlled airspace are specified in the air carrier's or commercial operator's operations specifications.

**§ 121.123 Servicing and maintenance facilities.**

Each supplemental air carrier or commercial operator must show that competent personnel and adequate facilities and equipment (including spare parts, supplies, and materials) are available for the proper servicing, maintenance, and preventive maintenance of aircraft and auxiliary equipment.

**§ 121.125 Flight following system.**

(a) Each supplemental air carrier or commercial operator must show that it has—

(1) An approved flight following system established in accordance with Subpart U of this part and adequate for the proper monitoring of each flight, considering the operations to be conducted; and

(2) Flight following centers located at those points necessary—

(i) To ensure the proper monitoring of the progress of each flight with respect to its departure at the point of origin and arrival at its destination, including intermediate stops and diversions therefrom, and maintenance or mechanical delays encountered at those points or stops; and

(ii) To ensure that the pilot in command is provided with all information necessary for the safety of the flight.

(b) A supplemental air carrier or commercial operator may arrange to have flight following facilities provided by persons other than its employees, but in such a case the air carrier or commercial operator continues to be primarily responsible for operational control of each flight.

(c) A flight following system need not provide for in-flight monitoring by a flight following center.

(d) The supplemental air carrier's or commercial operator's operations specifications specify the flight following system it is authorized to use and the location of the centers.

**§ 121.127 Flight following system: requirements.**

(a) Each supplemental air carrier or commercial operator using a flight following system must show that—

(1) The system has adequate facilities and personnel to provide the information necessary for the initiation and safe conduct of each flight to—

(i) The flight crew of each aircraft; and

(ii) The persons designated by the air carrier or commercial operator to perform the function of operational control of the aircraft; and

(2) The system has a means of communication by private or available public facilities (such as telephone, telegraph, or radio) to monitor the progress of each flight with respect to its departure at the point of origin and arrival at its destination, including intermediate stops and diversions therefrom, and maintenance or mechanical delays encountered at those points or stops.

(b) The supplemental air carrier or commercial operator must show that the personnel specified in paragraph (a) of this section, and those it designates to perform the function of operational control of the aircraft, are able to perform their required duties.

## Subpart G—Manual Requirements

**§ 121.131 Applicability.**

This subpart prescribes requirements for preparing and maintaining manuals by all certificate holders.

**§ 121.133 Preparation.**

(a) Each domestic and flag air carrier shall prepare and keep current a manual for the use and guidance of flight and ground operations personnel in conducting its operations.

(b) Each supplemental air carrier and commercial operator shall prepare and keep current a manual for the use and guidance of flight, ground operations, and management personnel in conducting its operations.

**§ 121.135 Contents.**

(a) Each manual required by § 121.133 must—

(1) Include instructions and information necessary to allow the personnel concerned to perform their duties and responsibilities with a high degree of safety;

(2) Be in a form that is easy to revise;

(3) Have the date of last revision on each page concerned; and

(4) Not be contrary to any applicable Federal regulation and, in the case of a flag or supplemental air carrier, any applicable foreign regulation, or the certificate holder's operations specifications or operating certificate.

(b) The manual may be in two or more separate parts, containing together all of the following information, but each part must contain that part of the information that is appropriate for each group of personnel:

(1) General policies.

(2) Duties and responsibilities of each crewmember and appropriate members of the ground organization and in the case of supplemental air carriers and commercial operators, management personnel.

(3) Reference to appropriate Federal Aviation Regulations.

(4) Flight dispatching and operational control, including procedures for coordinated dispatch or flight control or flight following procedures, as applicable.

(5) En route flight, navigation, and communication procedures, including procedures for the dispatch or release or continuance of flight if any item of equipment required for the particular type of operation becomes inoperative or unserviceable en route.

(6) For domestic or flag air carriers, appropriate information from the en route operations specifications, including for each approved route the types of aircraft authorized, their crew complement, the type of operation such as VFR, IFR, day, night, etc., and any other pertinent information.

(7) For supplemental air carriers or commercial operators, appropriate information from the operations specifications, including the area of operations authorized, the types of aircraft authorized, their crew complement, the type of operation such as VFR, IFR, day, night, etc., and any other pertinent information.

(8) Appropriate information from the airport operations specifications, including for each airport—

(i) Its location (domestic and flag air carrier operations only);

(ii) Its designation (regular, alternate, provisional, etc.) (domestic and flag air carrier operations only);

(iii) The types of aircraft authorized (domestic and flag air carrier operations only);

(iv) Instrument approach procedures;

(v) Landing and takeoff minimums; and

(vi) Any other pertinent information.

(9) Takeoff, en route, and landing weight limitations.

(10) Procedures for familiarizing passengers with the use of emergency equipment, during flight.

(11) Emergency equipment and procedures.

(12) The method of designating succession of command of flight crewmembers.

(13) Procedures for determining the usability of landing and takeoff areas, and for disseminating pertinent information thereon to operations personnel.

(14) Procedures for operating in periods of ice, hail, thunderstorms, turbulence, or any potentially hazardous meteorological condition.

(15) Airman training programs, including appropriate ground, flight, and emergency phases.

(16) Instructions and procedures for maintenance, preventive maintenance, and servicing.

(17) Time limitations, or standards for determining time limitations, for overhauls, inspections, and checks of airframes, engines, propellers, and appliances.

(18) Procedures for refueling aircraft, eliminating fuel contamination, protection from fire (including electrostatic protection), and supervising and protecting passengers during refueling.

(19) Airworthiness inspections, including instructions covering procedures, standards, responsibilities, and authority of inspection personnel.

(20) Methods and procedures for maintaining the aircraft weight and center of gravity within approved limits.

(21) Where applicable, pilot and dispatcher route and airport qualification procedures.

(22) Accident notification procedures.

(23) Other information or instructions relating to safety.

(c) Each certificate holder shall maintain at least one complete copy of the manual at its principal operations base.

**§ 121.137 Distribution.**

(a) Each certificate holder shall furnish copies of the manual required by § 121.133 (and the changes and additions thereto) or appropriate parts of the manual to—

(1) Its appropriate ground operations and maintenance personnel;

(2) Crewmembers; and

(3) Representatives of the Administrator assigned to it.

(b) Each person to whom a manual or appropriate parts of it are furnished under paragraph (a) of this section shall keep it up to date with the changes and additions furnished to him.

**§ 121.139 Requirement for manual aboard aircraft: supplemental air carriers and commercial operators.**

(a) Except as provided in paragraph (b) of this section, each supplemental air carrier and commercial operator shall carry appropriate parts of the manual on each aircraft when away from the principal base. The appropriate parts must be available for use of ground or flight personnel.

(b) If a supplemental air carrier or commercial operator is able to perform all scheduled maintenance at specified stations where it keeps maintenance parts of the manual, it does not have to carry those parts of the manual aboard the aircraft en route to those stations.

**§ 121.141 Aircraft Flight Manual.**

(a) Each certificate holder shall keep a current approved Aircraft Flight Manual for each type of transport category aircraft that it operates.

(b) Each certificate holder shall carry an approved Aircraft Flight Manual, or manual required by § 121.133 containing the information required for the Aircraft Flight Manual, in each transport category aircraft. If sections of the required information from the Aircraft Flight Manual are incorporated in the manual required by § 121.133, the holder shall clearly identify the sections as Aircraft Flight Manual requirements.

## Subpart H—Aircraft Requirements

**§ 121.151 Applicability.**

This subpart prescribes aircraft requirements for all certificate holders.

**§ 121.153 Aircraft requirements: general.**

(a) No certificate holder may operate an aircraft unless that aircraft—

(1) Is registered as a civil aircraft of the United States and carries an appropriate current airworthiness certificate issued under this chapter; and

(2) Is in an airworthy condition and meets the applicable airworthiness requirements of this chapter, including those relating to identification and equipment.

(b) A certificate holder may use an approved weight and balance control system based on average, assumed, or estimated weight to comply with applicable airworthiness requirements and operating limitations.

**§ 121.155 Exclusive use requirements: supplemental air carriers and commercial operators.**

(a) No supplemental air carrier or commercial operator may use any aircraft unless—

(1) It has exclusive use of the aircraft;

(2) The aircraft is listed in its operations specifications; and

(3) The aircraft is not listed in the operations specifications of any other air carrier or commercial operator.

(b) Within 10 days after a supplemental air carrier or commercial operator ceases to have exclusive use of an aircraft listed in its operations specifications it shall notify the FAA Air Carrier Inspector assigned to its operations, and request an appropriate amendment deleting the aircraft from its operations specifications.

(c) A supplemental air carrier or commercial operator that does not have the exclusive use of at least one aircraft does not meet the requirements of this part, and the Administrator may, in an appropriate case, suspend or revoke the supplemental air carrier's or commercial operator's certificate.

(d) For the purposes of this section, a supplemental air carrier or commercial operator has exclusive use of an aircraft if it has the sole possession, control, and use of it for flight, as owner, or has a written agreement (including arrangements for the performance of required maintenance) giving it that possession, control, and use for at least six months.

**§ 121.157 Aircraft certification and equipment requirements.**

(a) *Airplanes certificated before July 1, 1942.* No certificate holder may operate an airplane that was type certificated before July 1, 1942, unless—

(1) That airplane meets the requirements of § 121.173(c); or

(2) That airplane and all other airplanes of the same or related type operated by that certificate holder meet the performance requirements of §§ 4a.737–T through 4a.750–T of the Civil Air Regulations as in effect on January 31, 1965; or §§ 25.45 through 25.75 and § 121.173 (a), (b), (d), and (e).

(b) *Airplanes certificated after June 30, 1942.* Except as provided in paragraphs (c) and (d) of this section, no certificate holder may operate an airplane that was type certificated after June 30, 1942, unless it is certificated as a transport category airplane and meets the requirements of § 121.173 (a), (b), (d), and (e).

(c) *C–46 type airplanes: passenger-carrying operations.* No certificate holder may operate a C–46 airplane in passenger-carrying operations unless that airplane is operated in accordance with the operating limitations for transport category airplanes and meets the requirements of paragraph (b) of this section or meets the requirements of Part 4b, as in effect July 20, 1950, and the requirements of § 121.173 (a), (b), (d), and (e), except that—

(1) The requirements of §§ 4b.0 through 4b.19 as in effect May 18, 1954, must be complied with;

(2) The birdproof windshield requirements of § 4b.352 need not be complied with;

(3) The provisions of §§ 4b.480 through 4b.490 (except §§ 4b.484(a)(1) and 4b.487(e)), as in effect May 16, 1953, must be complied with; and

(4) The provisions of subparagraph 4b.484(a)(1), as in effect July 20, 1950, must be complied with.

In determining the takeoff path in accordance with § 4b.116 and the one-engine inoperative climb in accordance with § 4b.120 (a) and (b), the propeller of the inoperative engine may be assumed to be feathered if the airplane is equipped with either an approved means for automatically indicating when the particular engine has failed or an approved means for automatically feathering the propeller of the inoperative engine. The Administrator may authorize deviations from compliance with the requirements of §§ 4b.130 through 4b.190 and Subparts C, D, E, and F of Part 4b (as designated in this paragraph) if he finds that (considering the effect of design changes) compliance is extremely difficult to accomplish and that service experience with the C–46 airplane justifies the deviation.

(d) *C–46 type airplanes: cargo operations.* No certificate holder may use a nontransport category C–46 type airplane in cargo operations unless—

(1) It is certificated at a maximum gross weight that is not greater than 48,000 pounds;

(2) It meets the requirements of §§ 121.199 through 121.205 using the performance data in Appendix C to this part;

(3) Before each flight, each engine contains at least 25 gallons of oil; and

(4) After December 31, 1964—

(i) It is powered by a type and model engine as set forth in Appendix C of this part, when certificated at a maxi-

mum gross takeoff weight greater than 45,000 pounds; and

(ii) It complies with the special airworthiness requirement set forth in §§ 121.213 through 121.287 of this part or in Appendix C of this part.

(e) *Helicopters.* No supplemental air carrier or commercial operator may operate a helicopter unless it is operated, certificated, and equipped in accordance with §§ 127.71 through 127.125.

**§ 121.159 Single-engine airplanes prohibited.**

Except as provided in § 121.9, no certificate holder may operate a single-engine airplane.

**§ 121.161 Airplane limitations: type of route.**

(a) Unless otherwise authorized by the Administrator, based on the character of the terrain, the kind of operation, or the performance of the airplane to be used, no domestic or flag air carrier may operate in any operations, and no supplemental air carrier or commercial operator may operate in passenger-carrying operations, a two-engine or three-engine airplane (except a three-engine turbine-powered airplane) over a route that contains a point farther than one hour's flying time (in still air at normal cruising speed with one engine inoperative) from an adequate airport.

(b) No certificate holder may operate a land airplane (other than a DC–3, C–46, CV–340, or CV–440) in an extended overwater operation unless it is certificated or approved as adequate for ditching under the ditching provisions of Part 25 of this chapter.

**§ 121.163 Aircraft proving tests.**

(a) No domestic or flag air carrier may operate an aircraft not before proven for use in scheduled air carrier operations and no supplemental air carrier or commercial operator may operate an aircraft not before proven for use in air carrier or commercial operator operations unless an aircraft of that type has had, in addition to the aircraft certification tests, at least 100 hours of proving tests under the Administrator's supervision, at least 50 hours of which must have been flown over authorized routes (flag and domestic air carriers) or in en route operations (supplemental air carriers and commercial operators) and at least 10 hours of which must have been flown at night.

(b) A certificate holder may not operate an aircraft of a type that has been proven for use in its class of operations if it has not previously proved that type, or if that aircraft has been materially altered in design, unless—

(1) The aircraft has been tested for at least 50 hours, of which at least 25 hours were over authorized routes; or

(2) The Administrator specifically authorizes deviations because special circumstances of the particular case make a literal observance of the requirements of this paragraph unnecessary.

(c) A supplemental air carrier or commercial operator may operate a helicopter that has not before been proven for use in supplemental air carrier or commercial operator operations if the helicopter has been used extensively in the services of the armed forces and meets the requirements of paragraph (b) of this section.

(d) For the purposes of paragraph (b) of this section, a type of aircraft is considered to be materially altered in design if the alterations include—

(1) The installation of powerplants other than those of a type similar to those with which it is certificated; or

(2) Alterations to the aircraft or its components that materially affect flight characteristics.

(e) No certificate holder may carry passengers in an aircraft during proving tests, except for those needed to make the test and those designated by the Administrator. However, it may carry mail, express, or other cargo, when approved.

## Subpart I—Airplane Performance Operating Limitations

**§ 121.171 Applicability.**

(a) This subpart prescribes airplane performance operating limitations for all certificate holders.

(b) For the purposes of this part, "effective length of the runway", for takeoff means the distance from the end of the runway at which the takeoff is started to the point at which the obstruction clearance plane associated with the other end of the runway intersects the runway centerline. For landing, it means the distance from the point at which the obstruction clearance plane associated with the approach end of the runway intersects the centerline of the runway to the far end thereof.

(c) For the purposes of this subpart, "obstruction clearance plane" means a plane sloping upward from the runway at a slope of 1:20 to the horizontal, and tangent to or clearing all obstructions within a specified area surrounding the runway as shown in a profile view of that area. In the plan view, the centerline of the specified area coincides with the centerline of the runway, beginning at the point where the obstruction clearance plane intersects the centerline of the runway and proceeding to a point at least 1,500 feet from the beginning point. Thereafter the centerline coincides with the takeoff path over the ground for the runway (in the case of takeoffs) or with the instrument approach counterpart (for landings), or, where the applicable one of these paths has not been established, it proceeds consistent with turns of at least 4,000 foot radius until a point is reached beyond which the obstruction clearance plane clears all obstructions. This area extends laterally 200 feet on each side of the centerline at the point where the obstruction clearance plane intersects the runway and continues at this width to the end of the runway; then it increases uniformly to 500 feet on each side of the centerline at a point 1,500 feet from the intersection of the obstruction clearance plane with the runway; thereafter it extends laterally 500 feet on each side of the centerline.

**§ 121.173 General.**

(a) Each certificate holder operating a reciprocating engine powered transport category airplane shall comply with §§ 121.175 through 121.187.

(b) Each certificate holder operating a turbine engine powered transport category airplane shall comply with applicable provisions of §§ 121.189 through 121.197, except that when it operates a turbo-propeller powered transport category airplane certificated after August 29, 1959, but previously type certificated with the same number of reciprocating engines, it may comply with §§ 121.175 through 121.187.

(c) Each certificate holder operating a large nontransport category airplane shall comply with §§ 121.199 through 121.205 and any determination of compliance must be based only on approved performance data.

(d) The performance data in the Airplane Flight Manual applies in determining compliance with §§ 121.175 through 121.197. Where conditions are different from those on which the performance data is based, compliance is determined by interpolation or by computing the effects of changes in the specific variables, if the results of the interpolation or computations are substantially as accurate as the results of direct tests.

**§ 121.177 Transport category airplanes: reciprocating engine powered: takeoff limitations.**

(a) No person operating a reciprocating engine powered transport category airplane may takeoff that airplane unless it is possible—

(1) To stop the airplane safely on the runway, as shown by the accelerate stop distance data, at any time during takeoff until reaching critical-engine failure speed;

(2) If the critical engine fails at any time after the airplane reaches critical-engine failure speed $V_1$, to continue the takeoff and reach a height of 50 feet, as indicated by the takeoff path data, before passing over the end of the runway; and

(3) To clear all obstacles either by at least 50 feet vertically (as shown by the takeoff path data) or 200 feet horizontally within the airport boundaries and 300 feet horizontally beyond the boundaries, without banking before reaching a height of 50 feet (as shown by the takeoff path data) and thereafter without banking more than 15 degrees.

(b) In applying this section, corrections must be made for any runway gradient. To allow for wind effect, takeoff data based on still air may be corrected by taking into account not more than 50 percent of any reported headwind component and not less than 150 percent of any reported tailwind component.

**§ 121.179 Transport category airplanes: reciprocating engine powered: en route limitations: all engines operating.**

(a) No person operating a reciprocating engine powered transport category airplane may take off that airplane at a weight, allowing for normal consumption

of fuel and oil, that does not allow a rate of climb (in feet per minute), with all engines operating, of at least 6.90 $V_{S_0}$ (that is, the number of feet per minute is obtained by multiplying the number of knots by 6.90) at an altitude of at least 1,000 feet above the highest ground or obstruction within ten miles of each side of the intended track.

(b) This section does not apply to transport category airplanes certificated under Part 4a of the Civil Air Regulations.

**§ 121.181 Transport category airplanes: reciprocating engine powered: en route limitations: one engine inoperative.**

(a) Except as provided in paragraph (b) of this section, no person operating a reciprocating engine powered transport category airplane may take off that airplane at a weight, allowing for normal consumption of fuel and oil, that does not allow a rate of climb (in feet per minute), with one engine inoperative, of at least $0.079-\frac{0.106}{N}V_{S_0}{}^2$ (where $N$ is the number of engines installed and $V_{S_0}$ is expressed in knots) at an altitude of at least 1,000 feet above the highest ground or obstruction within 10 miles of each side of the intended track. However, for the purposes of this paragraph the rate of climb for transport category airplanes certificated under Part 4a of the Civil Air Regulations is $0.026\ V_{S_0}{}^2$.

(b) In place of the requirements of paragraph (a) of this section, a person may, under an approved procedure, operate a reciprocating engine powered transport category airplane, at an all-engines-operating altitude that allows the airplane to continue, after an engine failure, to an alternate airport where a landing can be made in accordance with § 121.187, allowing for normal consumption of fuel and oil. After the assumed failure, the flight path must clear the ground and any obstruction within five miles on each side of the intended track by at least 2,000 feet.

(c) If an approved procedure under paragraph (b) of this section is used, the certificate holder shall comply with the following:

(1) The rate of climb (as prescribed in the Airplane Flight Manual for the appropriate weight and altitude) used in calculating the airplane's flight path shall be diminished by an amount, in feet per minute, equal to $0.079-\frac{0.106}{N}V_{S_0}{}^2$ (when $N$ is the number of engines installed and $V_{S_0}$ is expressed in knots) for airplanes certificated under Part 25 of this chapter and by $0.026\ V_{S_0}{}^2$ for airplanes certificated under Part 4a of the Civil Air Regulations.

(2) The all-engines-operating altitude shall be sufficient so that in the event the critical engine becomes inoperative at any point along the route, the flight will be able to proceed to a predetermined alternate airport by use of this procedure. In determining the takeoff weight, the airplane is assumed to pass over the critical obstruction following engine failure at a point no closer to the critical obstruction than the nearest approved radio navigational fix, unless the Administrator approves a procedure established on a different basis upon finding that adequate operational safeguards exist.

(3) The airplane must meet the provisions of paragraph (a) of this section at 1,000 feet above the airport used as an alternate in this procedure.

(4) The procedure must include an approved method of accounting for winds and temperatures that would otherwise adversely affect the flight path.

(5) In complying with this procedure fuel jettisoning is allowed if the certificate holder shows that it has an adequate training program, that proper instructions are given to the flight crew, and all other precautions are taken to insure a safe procedure.

(6) The certificate holder shall specify in the dispatch or flight release an alternate airport that meets the requirements of § 121.625.

**§ 121.183 Part 25 transport category airplanes with four or more engines: reciprocating engine powered: en route limitations: two engines inoperative.**

(a) No person may operate an airplane certificated under Part 25 and having four or more engines unless—

(1) There is no place along the intended track that is more than 90 minutes (with all engines operating at cruising power) from an airport that meets the requirements of § 121.187; or

(2) It is operated at a weight allowing the airplane, with the two critical engines inoperative, to climb at 0.013 $V_{S_0}{}^2$ feet per minute (that is, the number of feet per minute is obtained by multiplying the number of knots squared by 0.013) at an altitude of 1,000 feet above the highest ground or obstruction within 10 miles on each side of the intended track, or at an altitude of 5,000 feet, whichever is higher.

(b) For the purposes of paragraph (a)(2) of this section, it is assumed that—

(1) The two engines fail at the point that is most critical with respect to the takeoff weight;

(2) Consumption of fuel and oil is normal with all engines operating up to the point where the two engines fail and with two engines operating beyond that point;

(3) Where the engines are assumed to fail at an altitude above the prescribed minimum altitude, compliance with the prescribed rate of climb at the prescribed minimum altitude need not be shown during the descent from the cruising altitude to the prescribed minimum altitude, if those requirements can be met once the prescribed minimum altitude is reached, and assuming descent to be along a net flight path and the rate of descent to be $0.013\ V_{S_0}{}^2$ greater than the rate in the approved performance data; and

(4) If fuel jettisoning is provided, the airplane's weight at the point where the two engines fail is considered to be not less than that which would include enough fuel to proceed to an airport meeting the requirements of § 121.187 and to arrive at an altitude of at least 1,000 feet directly over that airport.

**§ 121.185 Transport category airplanes: reciprocating engine powered: landing limitations: destination airport.**

(a) Except as provided in paragraph (b) of this section no person operating a reciprocating engine powered transport category airplane may take off that airplane, unless its weight on arrival, allowing for normal consumption of fuel and oil in flight, would allow a full stop landing at the intended destination within 60 percent of the effective length of each runway described below from a point 50 feet directly above the intersection of the obstruction clearance plane and the runway. For the purposes of determining the allowable landing weight at the destination airport the following is assumed:

(1) The airplane is landed on the most favorable runway and in the most favorable direction in still air.

(2) The airplane is landed on the most suitable runway considering the probable wind velocity and direction (forecast for the expected time of arrival), the ground handling characteristics of the type of airplane, and other conditions such as landing aids and terrain, and allowing for the effect of the landing path and roll of not more than 50 percent of the headwind component or not less than 150 percent of the tailwind component.

(b) An airplane that would be prohibited from being taken off because it could not meet the requirements of paragraph (a)(2) of this section may be taken off if an alternate airport is specified that meets all of the requirements of this section except that the airplane can accomplish a full stop landing within 70 percent of the effective length of the runway.

**§ 121.187 Transport category airplanes: reciprocating engine powered: landing limitations: alternate airport.**

No person may list an airport as an alternate airport in a dispatch or flight release unless the airplane (at the weight anticipated at the time of arrival at the airport), based on the assumptions in § 121.185, can be brought to a full stop landing, within 70 percent of the effective length of the runway.

**§ 121.189 Transport category airplanes: turbine engine powered: takeoff limitations.**

(a) No person operating a turbine engine powered transport category airplane may take off that airplane at a weight greater than that listed in the Airplane Flight Manual for the elevation of the airport and for the ambient temperature existing at takeoff.

(b) No person operating a turbine engine powered transport category airplane certificated after August 26, 1957, but before August 30, 1959 (SR422, 422A), may take off that airplane at a weight greater than that listed in the Airplane Flight Manual for the minimum distances required for takeoff. In the case of an airplane certificated after Sep-

tember 30, 1958 (SR422A, 422B), the takeoff distance may include a clearway distance but the clearway distance included may not be greater than ½ of the takeoff run.

(c) No person operating a turbine engine powered transport category airplane certificated after August 29, 1959 (SR422B), may take off that airplane at a weight greater than that listed in the Airplane Flight Manual at which compliance with the following may be shown:

(1) The accelerate-stop distance must not exceed the length of the runway plus the length of any stopway.

(2) The takeoff distance must not exceed the length of the runway plus the length of any clearway except that the length of any clearway included must not be greater than one-half the length of the runway.

(3) The takeoff run must not be greater than the length of the runway.

(d) No person operating a turbine engine powered transport category airplane may take off that airplane at a weight greater than that listed in the Airplane Flight Manual—

(1) In the case of an airplane certificated after August 26, 1957, but before October 1, 1958 (SR422), that allows a takeoff path that clears all obstacles either by at least (35+0.01D) feet vertically (D is the distance along the intended flight path from the end of the runway in feet), or by at least 200 feet horizontally within the airport boundaries and by at least 300 feet horizontally after passing the boundaries; or

(2) In the case of an airplane certificated after September 30, 1958 (SR 422A, 422B), that allows a net takeoff flight path that clears all obstacles either by a height of at least 35 feet vertically, or by at least 200 feet horizontally within the airport boundaries and by at least 300 feet horizontally after passing the boundaries.

(e) In Determining maximum weights, minimum distances and flight paths under paragraphs (a) through (d) of this section, correction must be made for the runway to be used, the elevation of the airport, the effective runway gradient, and the ambient temperature and wind component at the time of takeoff.

(f) For the purposes of this section, it is assumed that the airplane is not banked before reaching a height of 50 feet, as shown by the takeoff path or net takeoff flight path data (as appropriate) in the Airplane Flight Manual, and thereafter that the maximum bank is not more than 15 degrees.

(g) For the purposes of this section the terms, "takeoff distance," "takeoff run," "net takeoff flight path" and "takeoff path" have the same meanings as set forth in the rules under which the airplane was certificated.

**§ 121.191 Transport category airplanes: turbine engine powered: en route limitations: one engine inoperative.**

(a) No person operating a turbine engine powered transport category airplane may take off that airplane at a weight that is greater than that which (under the approved, one engine inoperative, en route net flight path data in the Airplane Flight Manual for that airplane) will allow compliance with subparagraph (1) or (2) of this paragraph, based on the ambient temperatures expected en route:

(1) There is a positive slope at an altitude of at least 1,000 feet above all terrain and obstructions within five statute miles on each side of the intended track, and, in addition, if that airplane was certificated after August 29, 1959 (SR 422B) there is a positive slope at 1,500 feet above the airport where the airplane is assumed to land after an engine fails.

(2) The net flight path allows the airplane to continue flight from the cruising altitude to an airport where a landing can be made under § 121.197, clearing all terrain and obstructions within five statute miles of the intended track by at least 2,000 feet vertically and with a positive slope at 1,000 feet above the airport where the airplane lands after an engine fails, or, if that airplane was certificated after September 30, 1958 (SR 422A, 422B), with a positive slope at 1,500 feet above the airport where the airplane lands after an engine fails.

(b) For the purposes of paragraph (a)(2) of this section, it is assumed that—

(1) The engine fails at the most critical point en route;

(2) The airplane passes over the critical obstruction, after engine failure at a point that is no closer to the obstruction than the nearest approved radio navigation fix, unless the Administrator authorizes a different procedure based on adequate operational safeguards;

(3) An approved method is used to allow for adverse winds;

(4) Fuel jettisoning will be allowed if the certificate holder shows that the crew is properly instructed, that the training program is adequate, and that all other precautions are taken to insure a safe procedure;

(5) The alternate airport is specified in the dispatch or flight release and meets the prescribed weather minimums; and

(6) The consumption of fuel and oil after engine failure is the same as the consumption that is allowed for in the approved net flight path data in the Airplane Flight Manual.

**§ 121.193 Transport category airplanes: turbine engine powered: en route limitations: two engines inoperative.**

(a) *Airplanes certificated after August 26, 1957, but before October 1, 1958* (SR 422). No person may operate a turbine engine powered transport category airplane along an intended route unless he complies with either of the following:

(1) There is no place along the intended track that is more than 90 minutes (with all engines operating at cruising power) from an airport that meets the requirements of § 121.197.

(2) Its weight, according to the two-engine-inoperative, en route, net flight path data in the Airplane Flight Manual, allows the airplane to fly from the point where the two engines are assumed to fail simultaneously to an airport that meets the requirements of § 121.197, with a net flight path (considering the ambient temperatures anticipated along the track) having a positive slope at an altitude of at least 1,000 feet above all terrain and obstructions within five miles on each side of the intended track, or at an altitude of 5,000 feet, whichever is higher.

For the purposes of subparagraph (2) of this paragraph, it is assumed that the two engines fail at the most critical point en route, that if fuel jettisoning is provided, the airplane's weight at the point where the engines fail includes enough fuel to continue to the airport and to arrive at an altitude of at least 1,000 feet directly over the airport, and that the fuel and oil consumption after engine failure is the same as the consumption allowed for in the net flight path data in the Airplane Flight Manual.

(b) *Aircraft certificated after September 30, 1958, but before August 30, 1959* (SR 422A). No person may operate a turbine engine powered transport category airplane along an intended route unless he complies with either of the following:

(1) There is no place along the intended track that is more than 90 minutes (with all engines operating at cruising power) from an airport that meets the requirements of § 121.197.

(2) Its weight, according to the two-engine-inoperative, en route, net flight path data in the Airplane Flight Manual, allows the airplane to fly from the point where the two engines are assumed to fail simultaneously to an airport that meets the requirements of § 121.197, with a net flight path (considering the ambient temperatures anticipated along the track) having a positive slope at an altitude of at least 1,000 feet above all terrain and obstructions within five miles on each side of the intended track, or at an altitude of 2,000 feet, whichever is higher.

For the purposes of subparagraph (2) of this paragraph, it is assumed that the two engines fail at the most critical point en route, that if fuel jettisoning is provided, the airplane's weight at the point where the engines fail includes enough fuel to continue to the airport, to arrive at an altitude of at least 1,500 feet directly over the airport, and thereafter to fly for 15 minutes at cruise power or thrust, or both, and that the consumption of fuel and oil after engine failure is the same as the consumption allowed for in the net flight path data in the Airplane Flight Manual.

(c) *Aircraft certificated after August 29, 1959* (SR 422B). No person may operate a turbine engine powered transport category airplane along an intended route unless he complies with either of the following:

(1) There is no place along the intended track that is more than 90 minutes (with all engines operating at cruising power) from an airport that meets the requirements of § 121.197.

(2) Its weight, according to the two-engine inoperative, en route, net flight path data in the Airplane Flight Manual, allows the airplane to fly from the point where the two engines are assumed to fail simultaneously to an airport that meets the requirements of § 121.197, with the net flight path (considering the ambient temperatures anticipated along the track) clearing vertically by at least 2,000 feet all terrain and obstructions within five statute miles (4.34 nautical miles) on each side of the intended track. For the purposes of this subparagraph, it is assumed that—

(i) The two engines fail at the most critical point en route;

(ii) The net flight path has a positive slope at 1,500 feet above the airport where the landing is assumed to be made after the engines fail;

(iii) Fuel jettisoning will be approved if the certificate holder shows that the crew is properly instructed, that the training program is adequate, and that all other precautions are taken to ensure a safe procedure;

(iv) The airplane's weight at the point where the two engines are assumed to fail provides enough fuel to continue to the airport, to arrive at an altitude of at least 1,500 feet directly over the airport, and thereafter to fly for 15 minutes at cruise power or thrust, or both; and

(v) The consumption of fuel and oil after the engine failure is the same as the consumption that is allowed for in the net flight path data in the Airplane Flight Manual.

**§ 121.195 Transport category airplanes: turbine engine powered: landing limitations: destination airports.**

(a) No person operating a turbine engine powered transport category airplane may take off that airplane at such a weight that (allowing for normal consumption of fuel and oil in flight to the destination or alternate airport) the weight of the airplane on arrival would exceed the landing weight set forth in the Airplane Flight Manual for the elevation of the destination or alternate airport and the ambient temperature anticipated at the time of landing.

(b) Except as provided in paragraph (c) of this section, no person operating a turbine engine powered transport category airplane may take off that airplane unless its weight on arrival, allowing for normal consumption of fuel and oil in flight (in accordance with the landing distance set forth in the Airplane Flight Manual for the elevation of the destination airport and the wind conditions anticipated there at the time of landing), would allow a full stop landing at the intended destination airport within 60 percent of the effective length of each runway described below from a point 50 feet above the intersection of the obstruction clearance plane and the runway. For the purpose of determining the allowable landing weight at the destination airport the following is assumed:

(1) The airplane is landed on the most favorable runway and in the most favorable direction, in still air.

(2) The airplane is landed on the most suitable runway considering the probable wind velocity and direction and the ground handling characteristics of the airplane, and considering other conditions such as landing aids and terrain.

(c) An airplane that would be prohibited from being taken off because it could not meet the requirements of paragraph (b)(2) of this section, may be taken off if an alternate airport is specified that meets all the requirements of this section except that the airplane can accomplish a full stop landing within 70 percent of the effective length of the runway.

**§ 121.197 Transport category airplanes: turbine engine powered: landing limitations: alternate airports.**

No person may list an airport as an alternate airport in a dispatch or flight release for a turbine engine powered transport category airplane unless (based on the assumptions in § 121.195 (b)) that airplane at the weight anticipated at the time of arrival can be brought to a full stop landing within 70 percent of the effective length of the runway from a point 50 feet above the intersection of the obstruction clearance plane and the runway.

**§ 121.198 Transport category cargo service airplanes: increased zero fuel and landing weights.**

(a) Notwithstanding the applicable structural provisions of the transport category airworthiness regulations but subject to paragraphs (b) through (g) of this section, a certificate holder may operate (for cargo service only) any of the following transport category airplanes (certificated under Part 4b of the Civil Air Regulations effective before March 13, 1956) at increased zero fuel and landing weights—

(1) DC–6A, DC–6B, DC–7B, and DC–7C; and

(2) L1049B, C, D, E, F, G, and H, and the L1649A when modified in accordance with supplemental type certificate SA 4–1402.

(b) The zero fuel weight (maximum weight of the airplane with no disposable fuel and oil) and the structural landing weight may be increased beyond the maximum approved in full compliance with applicable regulations only if the Administrator finds that—

(1) The increase is not likely to reduce seriously the structural strength;

(2) The probability of sudden fatigue failure is not noticeably increased;

(3) The flutter, deformation, and vibration characteristics do not fall below those required by applicable regulations; and

(4) All other applicable weight limitations will be met.

(c) No zero fuel weight may be increased by more than five percent, and the increase in the structural landing weight may not exceed the amount, in pounds, of the increase in zero fuel weight.

(d) Each airplane must be inspected in accordance with the approved special inspection procedures, for operations at increased weights, established and issued by the manufacturer of the type of airplane.

(e) Each airplane operated under this section must be operated in accordance with the passenger-carrying transport category performance operating limitations prescribed in this part.

(f) The Airplane Flight Manual for each airplane operated under this section must be appropriately revised to include the operating limitations and information needed for operation at the increased weights.

(g) Except as provided for the carrying of persons under § 121.583 each airplane operated at an increased weight under this section must, before it is used in passenger service, be inspected under the special inspection procedures for return to passenger service established and issued by the manufacturer and approved by the Administrator.

**§ 121.199 Nontransport category airplanes: takeoff limitations.**

(a) No person operating a nontransport category airplane may take off that airplane at a weight greater than the weight that would allow the airplane to be brought to a safe stop within the effective length of the runway, from any point during the takeoff before reaching 105 percent of minimum control speed (the minimum speed at which an airplane can be safely controlled in flight after an engine becomes inoperative) or 115 percent of the power off stalling speed in the takeoff configuration, whichever is greater.

(b) For the purposes of this section—

(1) It may be assumed that takeoff power is used on all engines during the acceleration;

(2) Not more than 50 percent of the reported headwind component, or not less than 150 percent of the reported tailwind component, may be taken into account;

(3) The average runway gradient (the difference between the elevations of the endpoints of the runway divided by the total length) must be considered if it is more than one-half of 1 percent; and

(4) It is assumed that the airplane is operating in standard atmosphere.

**§ 121.201 Nontransport category airplanes: en route limitations: one engine inoperative.**

(a) Except as provided in paragraph (b) of this section, no person operating a nontransport category airplane may take off that airplane at a weight that does not allow a rate of climb of at least 50 feet a minute, with the critical engine inoperative, at an altitude of at least 1,000 feet above the highest obstruction within five miles on each side of the intended track, or 5,000 feet, whichever is higher.

(b) Notwithstanding paragraph (a) of this section, if the Administrator finds that safe operations are not impaired, a person may operate the airplane at an altitude that allows the airplane, in case of engine failure, to clear all obstructions within 5 miles on each side of the intended track by 1,000 feet. If this procedure is used, the rate of descent for the appropriate weight and altitude is assumed to be 50 feet a minute greater than the rate in the approved performance data. Before approving such a procedure, the Administrator considers the following for the route, route segment, or area concerned:

(1) The reliability of wind and weather forecasting.

(2) The location and kinds of navigation aids.

(3) The prevailing weather conditions, particularly the frequency and amount of turbulence normally encountered.

(4) Terrain features.
(5) Air traffic control problems.
(6) Any other operational factors that affect the operation.

(c) For the purposes of this section, it is assumed that—

(1) The critical engine is inoperative;
(2) The propeller of the inoperative engine is in the minimum drag position;
(3) The wing flaps and landing gear are in the most favorable position;
(4) The operating engines are operating at the maximum continuous power available;
(5) The airplane is operating in standard atmosphere; and
(6) The weight of the airplane is progressively reduced by the anticipated consumption of fuel and oil.

**§ 121.203 Nontransport category airplanes: landing limitations: destination airport.**

(a) No person operating a nontransport category airplane may take off that airplane at a weight that—

(1) Allowing for anticipated consumption of fuel and oil, is greater than the weight that would allow a full stop landing within 60 percent of the effective length of the most suitable runway at the destination airport; and

(2) Is greater than the weight allowable if the landing is to be made on the runway—

(i) With the greatest effective length in still air; and

(ii) Required by the probable wind, taking into account not more than 50 percent of the headwind component or not less than 150 percent of the tailwind component.

(b) For the purposes of this section, it is assumed that—

(1) The airplane passes directly over the intersection of the obstruction clearance plane and the runway at a height of 50 feet in a steady gliding approach at a true indicated airspeed of at least $1.3\ V_{s_0}$;

(2) The landing does not require exceptional pilot skill; and

(3) The airplane is operating in standard atmosphere.

**§ 121.205 Nontransport category airplanes: landing limitations: alternate airport.**

No person may list an airport as an alternate airport in a dispatch or flight release for a nontransport category airplane unless that airplane (at the weight anticipated at the time of arrival) based on the assumptions contained in § 121.203, can be brought to a full stop landing within 70 percent of the effective length of the runway.

**§ 121.207 Provisionally certificated air carrier airplane: operating limitations.**

In addition to the limitations in §91.41, the following limitations apply to the operation of provisionally certificated airplane by air carriers:

(a) In addition to crewmembers, each air carrier may carry on such an airplane only those persons who are listed in §121.547(c) or who are specifically authorized by both the air carrier and the Administrator.

(b) Each air carrier shall keep a log of each flight conducted under this section and shall keep accurate and complete records of each inspection made and all maintenance performed on the airplane. The air carrier shall make the log and records made under this section available to the manufacturer and the Administrator.

## Subpart J—Special Airworthiness Requirements

**§ 121.211 Applicability.**

This subpart prescribes special airworthiness requirements for all certificate holders.

**§ 121.213 Special airworthiness requirements: general.**

(a) Except as provided in paragraph (b) of this section, no air carrier or commercial operator may use an airplane powered by aircraft engines rated at more than 600 horsepower each for maximum continuous operation unless that airplane meets the requirements of §§ 121.215 through 121.283.

(b) If the Administrator determines that, for a particular model of airplane used in cargo service, literal compliance with any requirement under paragraph (a) of this section would be extremely difficult and that compliance would not contribute materially to the objective sought, he may require compliance with only those requirements that are necessary to accomplish the basic objectives of this part.

(c) This section does not apply to any airplane certificated under—

(1) Part 4b of the Civil Air Regulations as in effect October 31, 1946;
(2) Part 25; or
(3) Special Civil Air Regulation 422, 422A, or 422B.

**§ 121.215 Cabin interiors.**

(a) Each compartment used by the crew or passengers must meet the requirements of this section.

(b) Materials must be at least flash resistant.

(c) The wall and ceiling linings and the covering of upholstering, floors, and furnishings must be flame resistant.

(d) Each compartment where smoking is to be allowed must be equipped with self-contained ash trays that are completely removable and other compartments must be placarded against smoking.

(e) Each receptacle for used towels, papers, and wastes must be of fire-resistant material and must have a cover or other means of containing possible fires started in the receptacles.

**§ 121.217 Internal doors.**

In any case where internal doors are equipped with louvres or other ventilating means, there must be a means convenient to the crew for closing the flow of air through the door when necessary.

**§ 121.219 Ventilation.**

Each passenger or crew compartment must be suitably ventilated. Carbon monoxide concentration may not be more than one part in 20,000 parts of air, and fuel fumes may not be present. In any case where partitions between compartments have louvres or other means allowing air to flow between compartments, there must be a means convenient to the crew for closing the flow of air through the partitions, when necessary.

**§ 121.221 Fire precautions.**

(a) Each compartment must be designed so that, when used for storing cargo or baggage, it meets the following requirements:

(1) No compartment may include controls, wiring, lines, equipment, or accessories that would upon damage or failure, affect the safe operation of the airplane unless the item is adequately shielded, isolated, or otherwise protected so that it cannot be damaged by movement of cargo in the compartment and so that damage to or failure of the item would not create a fire hazard in the compartment.

(2) Cargo or baggage may not interfere with the functioning of the fire-protective features of the compartment.

(3) Materials used in the construction of the compartments, including tie-down equipment, must be at least flame resistant.

(4) Each compartment must include provisions for safeguarding against fires according to the classifications set forth in paragraphs (b) through (f) of this section.

(b) *Class A.* Cargo and baggage compartments are classified in the "A" category if—

(1) A fire therein would be readily discernible to a member of the crew while at his station; and

(2) All parts of the compartment are easily accessible in flight.

There must be a hand fire extinguisher available for each Class A compartment.

(c) *Class B.* Cargo and baggage compartments are classified in the "B" category if enough access is provided while in flight to enable a member of the crew to effectively reach all of the compartment and its contents with a hand fire extinguisher and the compartment is so designed that, when the access provisions are being used, no hazardous amount of smoke, flames, or extinguishing agent enters any compartment occupied by the crew or passengers. Each Class B compartment must comply with the following:

(1) It must have a separate approved smoke or fire detector system to give warning at the pilot or flight engineer stations.

(2) There must be a hand fire extinguisher available for the compartment.

(3) It must be lined with fire-resistant material, except that additional service lining of flame-resistant material may be used.

(d) *Class C.* Cargo and baggage compartments are classified in the "C" category if they do not conform with the requirements for the "A", "B", "D", or "E" categories. Each Class C compartment must comply with the following:

(1) It must have a separate approved smoke or fire detector system to give warning at the pilot or flight engineer station.

(2) It must have an approved built-in fire-extinguishing system controlled from the pilot or flight engineer station.

(3) It must be designed to exclude hazardous quantities of smoke, flames, or extinguishing agents from entering into any compartment occupied by the crew or passengers.

(4) It must have ventilation and draft controlled so that the extinguishing agent provided can control any fire that may start in the compartment.

(5) It must be lined with fire-resistant material, except that additional service lining of flame-resistant material may be used.

(e) *Class D.* Cargo and baggage compartments are classified in the "D" category if they are so designed and constructed that a fire occurring therein will be completely confined without endangering the safety of the airplane or the occupants. Each Class D compartment must comply with the following:

(1) It must have a means to exclude hazardous quantities of smoke, flames, or noxious gases from entering any compartment occupied by the crew or passengers.

(2) Ventilation and drafts must be controlled within each compartment so that any fire likely to occur in the compartment will not progress beyond safe limits.

(3) It must be completely lined with fire-resistant material.

(4) Consideration must be given to the effect of heat within the compartment on adjacent critical parts of the airplane.

(f) *Class E.* On airplanes used for the carriage of cargo only, the cabin area may be classified as a Class "E" compartment. Each Class E compartment must comply with the following:

(1) It must be completely lined with fire-resistant material.

(2) It must have a separate system of an approved type smoke or fire detector to give warning at the pilot or flight engineer station.

(3) It must have a means to shut off the ventilating air flow to or within the compartment and the controls for that means must be accessible to the flight crew in the crew compartment.

(4) It must have a means to exclude hazardous quantities of smoke, flames, or noxious gases from entering the flight crew compartment.

(5) Required crew emergency exits must be accessible under all cargo loading conditions.

**§ 121.223 Proof of compliance with § 121.221.**

Compliance with those provisions of § 121.221 that refer to compartment accessibility, the entry of hazardous quantities of smoke or extinguishing agent into compartments occupied by the crew or passengers, and the dissipation of the extinguishing agent in Class "C" compartments must be shown by tests in flight. During these tests it must be shown that no inadvertent operation of smoke or fire detectors in other compartments within the airplane would occur as a result of fire contained in any one compartment, either during the time it is being extinguished, or thereafter, unless the extinguishing system floods those compartments simultaneously.

**§ 121.225 Propeller deicing fluid.**

If combustible fluid is used for propeller deicing, the certificate holder must comply with § 121.253.

**§ 121.227 Pressure cross-feed arrangements.**

(a) Pressure cross-feed lines may not pass through parts of the airplane used for carrying persons or cargo unless—

(1) There is a means to allow crewmembers to shut off the supply of fuel to these lines; or

(2) The lines are enclosed in a fuel and fume-proof enclosure that is ventilated and drained to the exterior of the airplane.

However, such an enclosure need not be used if those lines incorporate no fittings on or within the personnel or cargo areas and are suitably routed or protected to prevent accidental damage.

(b) Lines that can be isolated from the rest of the fuel system by valves at each end must incorporate provisions for relieving excessive pressures that may result from exposure of the isolated line to high temperatures.

**§ 121.229 Location of fuel tanks.**

(a) Fuel tanks must be located in accordance with § 121.255.

(b) No part of the engine nacelle skin that lies immediately behind a major air outlet from the engine compartment may be used as the wall of an integral tank.

(c) Fuel tanks must be isolated from personnel compartments by means of fume- and fuel-proof enclosures.

**§ 121.231 Fuel system lines and fittings.**

(a) Fuel lines must be installed and supported so as to prevent excessive vibration and so as to be adequate to withstand loads due to fuel pressure and accelerated flight conditions.

(b) Lines connected to components of the airplanes between which there may be relative motion must incorporate provisions for flexibility.

(c) Flexible connections in lines that may be under pressure and subject to axial loading must use flexible hose assemblies rather than hose clamp connections.

(d) Flexible hose must be of an acceptable type or proven suitable for the particular application.

**§ 121.233 Fuel lines and fittings in designated fire zones.**

Fuel lines and fittings in each designated fire zone must comply with § 121.259.

**§ 121.235 Fuel valves.**

Each fuel valve must—

(a) Comply with § 121.257;

(b) Have positive stops or suitable index provisions in the "on" and "off" positions; and

(c) Be supported so that loads resulting from its operation or from accelerated flight conditions are not transmitted to the lines connected to the valve.

**§ 121.237 Oil lines and fittings in designated fire zones.**

Oil line and fittings in each designated fire zone must comply with § 121.259.

**§ 121.239 Oil valves.**

(a) Each oil valve must—

(1) Comply with § 121.257;

(2) Have positive stops or suitable index provisions in the "on" and "off" positions; and

(3) Be supported so that loads resulting from its operation or from accelerated flight conditions are not transmitted to the lines attached to the valve.

(b) The closing of an oil shutoff means must not prevent feathering the propeller, unless equivalent safety provisions are incorporated.

**§ 121.241 Oil system drains.**

Accessible drains incorporating either a manual or automatic means for positive locking in the closed position, must be provided to allow safe drainage of the entire oil system.

**§ 121.243 Engine breather lines.**

(a) Engine breather lines must be so arranged that condensed water vapor that may freeze and obstruct the line cannot accumulate at any point.

(b) Engine breathers must discharge in a location that does not constitute a fir hazard in case foaming occurs and so that oil emitted from the line does not impinge upon the pilots' windshield.

(c) Engine breathers may not discharge into the engine air induction system.

**§ 121.245 Fire walls.**

Each engine, auxiliary power unit, fuel-burning heater, or other item of combustion equipment that is intended for operation in flight must be isolated from the rest of the airplane by means of firewalls or shrouds, or by other equivalent means.

**§ 121.247 Fire-wall construction.**

Each fire wall and shroud must—

(a) Be so made that no hazardous quantity of air, fluids, or flame can pass from the engine compartment to other parts of the airplane;

(b) Have all openings in the fire wall or shroud sealed with close-fitting fireproof grommets, bushings, or firewall fittings;

(c) Be made of fireproof material; and

(d) Be protected against corrosion.

**§ 121.249 Cowling.**

(a) Cowling must be made and supported so as to resist the vibration, inertia, and air loads to which it may be normally subjected.

(b) Provisions must be made to allow rapid and complete drainage of the cowling in normal ground and flight attitudes. Drains must not discharge in locations constituting a fire hazard. Parts of the cowling that are subjected to high temperatures because they are near exhaust system parts or because of exhaust gas impingement must be made of fireproof material. Unless otherwise specified in these regulations,

all other parts of the cowling must be made of material that is at least fire resistant.

**§ 121.251 Engine accessory section diaphragm.**

Unless equivalent protection can be shown by other means, a diaphragm that complies with § 121.247 must be provided on air-cooled engines to isolate the engine power section and all parts of the exhaust system from the engine accessory compartment.

**§ 121.253 Powerplant fire protection.**

(a) Designated fire zones must be protected from fire by compliance with §§ 121.255 through 121.261.

(b) Designated fire zones are—

(1) Engine accessory sections;

(2) Installations where no isolation is provided between the engine and accessory compartment; and

(3) Areas that contain auxiliary power units, fuel-burning heaters, and other combustion equipment.

**§ 121.255 Flammable fluids.**

(a) No tanks or reservoirs that are a part of a system containing flammable fluids or gases may be located in designated fire zones, except where the fluid contained, the design of the system, the materials used in the tank, the shutoff means, and the connections, lines, and controls provide equivalent safety.

(b) At least one-half inch of clear airspace must be provided between any tank or reservoir and a firewall or shroud isolating a designated fire zone.

**§ 121.257 Shutoff means.**

(a) Each engine must have a means for shutting off or otherwise preventing hazardous amounts of fuel, oil, deicer, and other flammable fluids from flowing into, within, or through any designated fire zone. However, means need not be provided to shut off flow in lines that are an integral part of an engine.

(b) The shutoff means must allow an emergency operating sequence that is compatible with the emergency operation of other equipment, such as feathering the propeller, to facilitate rapid and effective control of fires.

(c) Shutoff means must be located outside of designated fire zones, unless equivalent safety is provided, and it must be shown that no hazardous amount of flammable fluid will drain into any designated fire zone after a shut off.

(d) Adequate provisions must be made to guard against inadvertent operation of the shutoff means and to make it possible for the crew to reopen the shutoff means after it has been closed.

**§ 121.259 Lines and fittings.**

(a) Each line, and its fittings, that is located in a designated fire zone, if it carries flammable fluids or gases under pressure, or is attached directly to the engine, or is subject to relative motion between components (except lines and fittings forming an integral part of the engine), must be flexible and fire-resistant with fire-resistant, factory-fixed, detachable, or other approved fire-resistant ends.

(b) Lines and fittings that are not subject to pressure or to relative motion between components must be of fire-resistant materials.

**§ 121.261 Vent and drain lines.**

All vent and drain lines and their fittings, that are located in a designated fire zone must, if they carry flammable fluids or gases, comply with § 121.259, if the Administrator finds that the rupture or breakage of any vent or drain line may result in a fire hazard.

**§ 121.263 Fire-extinguishing systems.**

(a) Unless the certificate holder shows that equivalent protection against destruction of the airplane in case of fire is provided by the use of fireproof materials in the nacelle and other components that would be subjected to flame, fire-extinguishing systems must be provided to serve all designated fire zones.

(b) Materials in the fire-extinguishing system must not react chemically with the extinguishing agent so as to be a hazard.

**§ 121.265 Fire-extinguishing agents.**

Only methyl bromide, carbon dioxide, or another agent that has been shown to provide equivalent extinguishing action may be used as a fire-extinguishing agent. If methyl bromide or any other toxic extinguishing agent is used, provisions must be made to prevent harmful concentrations of fluid or fluid vapors from entering any personnel compartment either because of leakage during normal operation of the airplane or because of discharging the fire extinguisher on the ground or in flight when there is a defect in the extinguishing system. If a methyl bromide system is used, the containers must be charged with dry agent and sealed by the fire-extinguisher manufacturer or some other person using satisfactory recharging equipment. If carbon dioxide is used, it must not be possible to discharge enough gas into the personnel compartments to create a danger of suffocating the occupants.

**§ 121.267 Extinguishing agent container pressure relief.**

Extinguishing agent containers must be provided with a pressure relief to prevent bursting of the container because of excessive internal pressures. The discharge line from the relief connection must terminate outside the airplane in a place convenient for inspection on the ground. An indicator must be provided at the discharge end of the line to provide a visual indication when the container has discharged.

**§ 121.269 Extinguishing agent container compartment temperature.**

Precautions must be taken to insure that the extinguishing agent containers are installed in places where reasonable temperatures can be maintained for effective use of the extinguishing system.

**§ 121.271 Fire-extinguishing system materials.**

(a) Except as provided in paragraph (b) of this section, each component of a fire-extinguishing system that is in a designated fire zone must be made of fireproof materials.

(b) Connections that are subject to relative motion between components of the airplane must be made of flexible materials that are at least fire-resistant and be located so as to minimize the probability of failure.

**§ 121.273 Fire-detector systems.**

Enough quick-acting fire detectors must be provided in each designated fire zone to assure the detection of any fire that may occur in that zone.

**§ 121.275 Fire detectors.**

Fire detectors must be made and installed in a manner that assures their ability to resist, without failure, all vibration, inertia, and other loads to which they may be normally subjected. Fire detectors must be unaffected by exposure to fumes, oil, water, or other fluids that may be present.

**§ 121.277 Protection of other airplane components against fire.**

(a) Except as provided in paragraph (b) of this section, all airplane surfaces aft of the nacelles in the area of one nacelle diameter on both sides of the nacelle centerline must be made of material that is at least fire resistant.

(b) Paragraph (a) of this section does not apply to tail surfaces lying behind nacelles unless the dimensional configuration of the airplane is such that the tail surfaces could be affected readily by heat, flames, or sparks emanating from a designated fire zone or from the engine compartment of any nacelle.

**§ 121.279 Control of engine rotation.**

(a) Except as provided in paragraph (b) of this section,each airplane must have a means of individually stopping and restarting the rotation of any engine in flight.

(b) In the case of turbine engine installations, a means of stopping the rotation need be provided only if the Administrator finds that rotation could jeopardize the safety of the airplane.

**§ 121.281 Fuel system independence.**

(a) Each airplane fuel system must be arranged so that the failure of any one component does not result in the irrecoverable loss of power of more than one engine.

(b) A separate fuel tank need not be provided for each engine if the certificate holder shows that the fuel system incorporates features that provide equivalent safety.

**§ 121.283 Induction system ice prevention.**

A means for preventing the malfunctioning of each engine due to ice accumulation in the engine air induction system must be provided for each airplane.

**§ 121.285 Carriage of cargo in passenger compartments.**

(a) Except as provided in paragraph (b) or (c) of this section, no certificate holder may carry cargo in the passenger compartment of an airplane.

(b) Cargo may be carried aft of the foremost seated passengers if it is carried in an approved cargo bin that meets the following requirements:

(1) The bin must withstand the load factors and emergency landing conditions applicable to the passenger seats of the airplane in which the bin is installed, multiplied by a factor of 1.15, using the combined weight of the bin and the maximum weight of cargo that may be carried in the bin.

(2) The maximum weight of cargo that the bin is approved to carry and any instructions necessary to insure proper weight distribution within the bin must be conspicuously marked on the bin.

(3) The bin may not impose any load on the floor or other structure of the airplane that exceeds the load limitations of that structure.

(4) The bin must be attached to the seat tracks or to the floor structure of the airplane, and its attachment must withstand the load factors and emergency landing conditions applicable to the passenger seats of the airplane in which the bin is installed, multiplied by either the factor 1.15 or the seat attachment factor specified for the airplane, whichever is greater, using the combined weight of the bin and the maximum weight of cargo that may be carried in the bin.

(5) The bin may not be installed in a position that restricts access to or use of any required emergency exit, or of the aisle in the passenger compartment.

(6) The bin must be fully enclosed and made of material that is at least flame resistant.

(7) Suitable safeguards must be provided within the bin to prevent the cargo from shifting under emergency landing conditions.

(8) The bin may not be installed in a position that obscures any passenger's view of the "seat belt" sign "no smoking" sign, or any required exit sign, unless an auxiliary sign or other approved means for proper notification of the passenger is provided.

(c) Cargo may be carried forward of the foremost seated passengers if carried either in approved cargo bins as specified in paragraph (b) of this section, or in accordance with the following:

(1) It is properly secured by a safety belt or other tiedown having enough strength to eliminate the possibility of shifting under all normally anticipated flight and ground conditions.

(2) It is packaged or covered in a manner to avoid possible injury to passengers.

(3) It does not impose any load on seats or the floor structure that exceeds the load limitation for those components.

(4) Its location does not restrict access to or use of any required emergency or regular exit, or of the aisle in the passenger compartment.

(5) Its location does not obscure any passenger's view of the "seat belt" sign, "no smoking" sign, or required exit sign, unless an auxiliary sign or other approved means for proper notification of the passenger is provided.

**§ 121.287 Carriage of cargo in cargo compartments.**

When cargo is carried in cargo compartments that are designed to require the physical entry of a crewmember to extinguish any fire that may occur during flight, the cargo must be loaded so as to allow a crewmember to effectively reach all parts of the compartment with the contents of a hand fire extinguisher.

**§ 121.289 Landing gear: aural warning device.**

(a) Except as provided in paragraph (d) of this section, after April 30, 1965, each large landplane must have a landing gear aural warning device that functions continuously:

(1) For airplanes with an established approach wing-flap position, whenever the wing flaps are extended beyond the maximum certificated approach climb configuration position in the Airplane Flight Manual and the landing gear is not fully extended and locked.

(2) For airplanes without an established approach climb wing-flap position, whenever the wing flaps are extended beyond the position at which landing gear extension is normally performed and the landing gear is not fully extended and locked.

(b) The warning system required by paragraph (a) of this section—

(1) May not have a manual shutoff;

(2) Must be in addition to the throttle-actuated device installed under the type certification airworthiness requirements; and

(3) May utilize any part of the throttle-actuated system including the aural warning device.

(c) The flap position sensing unit may be installed at any suitable place in the airplane.

## Subpart K—Instrument and Equipment Requirements

**§ 121.301 Applicability.**

This subpart prescribes instrument and equipment requirements for all certificate holders.

**§ 121.303 Airplane instruments and equipment.**

(a) Unless otherwise specified, the instrument and equipment requirements of this subpart apply to all operations under this part.

(b) Instruments and equipment required by §§ 121.305 through 121.351 must be approved and installed in accordance with the airworthiness requirements applicable to them.

(c) Each airspeed indicator must be calibrated in knots, and each airspeed limitation and item of related information in the Airplane Flight Manual and pertinent placards must be expressed in knots.

(d) Except as provided in § 121.627 (b) and (c), no person may take off any airplane unless the following instruments and equipment are in operable condition:

(1) Instruments and equipment required to comply with airworthiness requirements under which the airplane is type certificated and as required by §§ 121.213 through 121.283 and 121.289.

(2) Instruments and equipment specified in §§ 121.305 through 121.321 for all operations, and the instruments and equipment specified in §§ 121.323 through 121.351 for the kind of operation indicated, wherever these items are not already required by subparagraph (1) of this paragraph.

**§ 121.305 Flight and navigational equipment.**

No person may operate an airplane unless it is equipped with the following flight and navigational instruments and equipment:

(a) An airspeed indicating system with heated pitot tube or equivalent means for preventing malfunctioning due to icing.

(b) A sensitive altimeter.

(c) A sweep-second hand clock.

(d) A free-air temperature indicator.

(e) A gyroscopic bank and pitch indicator (artificial horizon).

(f) A gyroscopic rate-of-turn indicator combined with a slip-skid indicator (turn-and-bank indicator).

(g) A gyroscopic direction indicator (directional gyro or equivalent).

(h) A magnetic compass.

(i) A vertical speed indicator (rate-of-climb indicator).

**§ 121.307 Engine instruments.**

Unless the Administrator allows or requires different instrumentation for turbine engine powered airplanes to provide equivalent safety, no person may conduct any operation under this part without the following engine instruments:

(a) A carburetor air temperature indicator for each engine.

(b) A cylinder head temperature indicator for each air-cooled engine.

(c) A fuel pressure indicator for each engine.

(d) A fuel flowmeter or fuel mixture indicator for each engine not equipped with an automatic altitude mixture control.

(e) A means for indicating fuel quantity in each fuel tank to be used.

(f) A manifold pressure indicator for each engine.

(g) An oil pressure indicator for each engine.

(h) An oil quantity indicator for each oil tank when a transfer or separate oil reserve supply is used.

(i) An oil-in temperature indicator for each engine.

(j) A tachometer for each engine.

(k) An independent fuel pressure warning device for each engine or a master warning device for all engines with a means for isolating the individual warning circuits from the master warning device.

(l) A device for each reversible propeller, to indicate to the pilot when the propeller is in reverse pitch, that complies with the following:

(1) The device may be actuated at any point in the reversing cycle between the normal low pitch stop position and full reverse pitch, but it may not give an

indication at or above the normal low pitch stop position.

(2) The source of indication must be actuated by the propeller blade angle or be directly responsive to it.

**§ 121.309 Emergency equipment.**

(a) *General.* No person may operate an airplane unless it is equipped with the emergency equipment listed in this section.

(b) Each item of emergency equipment—

(1) Must be inspected regularly in accordance with inspection periods established in the operations specifications to insure its continued serviceability and immediate readiness for its intended emergency purposes;

(2) Must be readily accessible to the crew;

(3) Must clearly indicate its method of operation; and

(4) When carried in a compartment or container, must have that compartment or container marked as to contents and date of last inspection.

(c) *Hand fire extinguishers for crew, passenger, and cargo compartments.* Hand fire extinguishers of an approved type must be provided for use in crew, passenger, and cargo compartments in accordance with the following:

(1) The type and quantity of extinguishing agent must be suitable for the kinds of fires likely to occur in the compartment where the extinguisher is intended to be used.

(2) At least one hand fire extinguisher must be provided and conveniently located on the flight deck for use by the flight crew.

(3) At least one hand fire extinguisher must be conveniently located in the passenger compartment of each airplane accommodating more than 6 but less than 31 passengers, and at least two hand fire extinguishers must be conveniently located in each airplane accommodating more than 30 passengers.

(d) *First-aid equipment.* Approved first-aid kits for treatment of injuries likely to occur in flight or in minor accidents must be provided and must meet the specifications and requirements of Appendix A.

(e) *Crash ax.* Each airplane must be equipped with a crash ax.

(f) *Means for emergency evacuation.* Each passenger-carrying airplane must have a means to help occupants descend from the airplane through each emergency exit that is more than six feet from the ground with the landing gear extended. At approved floor level emergency exits, this means must be a chute or equivalent device suitable for rapid evacuation of passengers and must be in position during flight time for immediate installation and ready use. This paragraph does not apply if the emergency exit is over a wing and the distance from the lower sill of the exit to the surface of the wing is 36 inches or less. However, this paragraph does not require a means to help the occupants of a passenger-carrying DC–3 airplane in descending from the airplane by way of the rear window emergency exit, unless that airplane is operated with more occupants than are specified in § 121.291 for DC–3 airplanes with four exits authorized for passenger use.

(g) *Interior emergency exit markings.* Each passenger-carrying airplane emergency exit, its means of access, and its means of opening, must be conspicuously marked. The identity and location of each emergency exit must be recognizable from a distance equal to the width of the cabin. The location of the emergency exit operating handle and the instructions for opening must be marked on or adjacent to the emergency exit and must be readable from at least 30 inches by a person with normal eyesight.

(h) *Lighting for interior emergency exit markings.* Each passenger-carrying airplane must have a source or sources of light with an energy supply that is independent of the main lighting system for passenger emergency exit markings. Each light must be designed to—

(1) Function automatically in a crash landing, to continue functioning thereafter, and to be manually operable; or

(2) Be manually operable only and to continue functioning after a crash landing.

If a light requires manual operation, it must be turned on before each takeoff and landing. If a light requires arming of the system to function automatically, the system must be armed before each takeoff and landing.

**§ 121.311 Seat and safety belts.**

(a) No certificate holder may operate an airplane unless there are available during the takeoff, en route flight, and landing—

(1) An approved seat or berth for each person over 2 years of age aboard the airplane; and

(2) An approved safety belt for separate use by each person over 2 years of age aboard the airplane, except that two persons occupying a berth may share one approved safety belt and two persons occupying a multiple lounge or divan seat may share one approved safety belt during en route flight only.

(b) During the takeoff or landing of an airplane, each person on board shall occuppy an approved seat or berth and secure himself with the approved safety belt provided him. However, a person who is 2 years of age or less may be held by an adult who is occupying a seat or berth. A safety belt provided for the occupant of a seat may not be used by more than one adult during takeoff or landing.

**§ 121.313 Miscellaneous equipment.**

No person may conduct any operation unless the following equipment is installed in the airplane:

(a) If protective fuses are installed on an airplane, the number of spare fuses approved for that airplane and appropriately described in the certificate holder's manual.

(b) A windshield wiper or equivalent for each pilot station.

(c) A power supply and distribution system that meets the requirements of §§ 25.1309, 25.1331, 25.1351(a) and (b)(1) through (4), 25.1353, 25.1355, and 25.1431 (b) or that is able to produce and distribute the load for the required instruments and equipment, with use of an external power supply if any one power source or component of the power distribution system fails. The use of common elements in the system may be approved if the Administrator finds that they are designed to be reasonably protected against malfunctioning. Engine-driven sources of energy, when used, must be on separate engines.

(d) A means for indicating the adequacy of the power being supplied to required flight instruments.

(e) Two independent static pressure systems, vented to the outside atmospheric pressure so that they will be least affected by air flow variation or moisture or other foreign matter, and installed so as to be airtight except for the vent. When a means is provided for transferring an instrument from its primary operating system to an alternate system, the means must include a positive positioning control and must be marked to indicate clearly which system is being used.

(f) A means for locking all companionway doors that separate passenger compartments from flight crew compartments.

(g) A key for each door that separates a passenger compartment from another compartment that has emergency exit provisions. The key must be readily available for each crewmember.

(h) A placard on each door that is the means of access to a required passenger emergency exit, to indicate that it must be open during takeoff and landing.

(i) A means for the crew, in an emergency to unlock each door that leads to a compartment that is normally accessible to passengers and that can be locked by passengers.

**§ 121.315 Cockpit check procedure.**

(a) Each certificate holder shall provide an approved cockpit check procedure for each type of aircraft.

(b) The approved procedures must include each item necessary for flight crewmembers to check for safety before starting engines, taking off, or landing, and in engine and systems emergencies. The procedures must be designed so that a flight crewmember will not need to rely upon his memory for items to be checked.

(c) The approved procedures must be readily usable in the cockpit of each aircraft and the flight crew shall follow them when operating the aircraft.

**§ 121.317 Passenger information.**

(a) No person may operate an airplane unless it is equipped with signs that are visible to passengers and cabin attendants to notify them when smoking is prohibited and when safety belts should be fastened. The signs must be so constructed that the crew can turn them on and off. They must be turned on for each takeoff and each landing and when otherwise considered to be necessary by the pilot in command.

(b) No passenger or cabin attendant may smoke while the no smoking sign is lighted and each passenger shall fasten his seat belt and keep it fastened while the seat belt sign is lighted.

**§ 121.319 Exterior exits and evacuation markings.**

No person may operate an airplane unless the exterior surfaces of the airplane are marked to clearly identify each required emergency exit. If the exits are operable from the outside, the markings must consist of or include information indicating the method of opening.

**§ 121.321 Shoulder harness.**

No person may operate a transport category airplane that was certificated after January 1, 1958, unless it is equipped with a shoulder harness at the pilot in command station, the second in command station, and the flight engineer station.

**§ 121.323 Instruments and equipment for operations at night.**

No person may operate an airplane at night unless it is equipped with the following instruments and equipment in addition to those required by §§ 121.305 through 121.321:

(a) Position lights.

(b) An anti-collision light, for large airplanes.

(c) Two landing lights.

(d) Instrument lights providing enough light to make each required instrument, switch, or similar instrument, easily readable and installed so that the direct rays are shielded from the flight crewmembers' eyes and that no objectionable reflections are visible to them. There must be a means of controlling the intensity of illumination unless it is shown that nondimming instrument lights are satisfactory.

(e) An airspeed-indicating system with heated pitot tube or equivalent means for preventing malfunctioning due to icing.

(f) A sensitive altimeter.

**§ 121.325 Instruments and equipment for operations under IFR or over-the-top.**

No person may operate an airplane under IFR or over-the-top conditions unless it is equipped with the following instruments and equipment, in addition to those required by §§ 121.305 through 121.321:

(a) An airspeed indicating system with heated pitot tube or equivalent means for preventing malfunctioning due to icing.

(b) A sensitive altimeter.

(c) Instrument lights providing enough light to make each required instrument, switch, or similar instrument, easily readable and so installed that the direct rays are shielded from the flight crewmembers' eyes and that no objectionable reflections are visible to them, and a means of controlling the intensity of illumination unless it is shown that nondimming instrument lights are satisfactory.

**§ 121.327 Supplemental oxygen; reciprocating engine powered airplanes.**

(a) *General.* Except where supplemental oxygen is provided in accordance with § 121.331, no person may operate an airplane unless supplemental oxygen is furnished and used as set forth in paragraphs (b) and (c) of this section. The amount of supplemental oxygen required for a particular operation is determined on the basis of flight altitudes and flight duration, consistent with the operation procedures established for each operation and route.

(b) *Crewmembers.* (1) At cabin pressure altitudes above 10,000 feet up to and including 12,000 feet, oxygen must be provided for, and used by, each member of the flight crew on flight deck duty, and must be provided for other crewmembers, for that part of the flight at those altitudes that is of more than 30 minutes duration.

(2) At cabin pressure altitudes above 12,000 feet, oxygen must be provided for, and used by, each member of the flight crew on flight deck duty, and must be provided for other crewmembers, during the entire flight time at those altitudes.

(3) When a flight crewmember is required to use oxygen, he must use it continuously, except when necessary to remove the oxygen mask or other dispenser in connection with his regular duties. Standby crewmembers who are on call or are definitely going to have flight deck duty before completing the flight must be provided with an amount of supplemental oxygen equal to that provided for crewmembers on duty other than on flight deck duty. If a standby crewmember is not on call and will not be on flight deck duty during the remainder of the flight, he is considered to be a passenger for the purposes of supplemental oxygen requirements.

(c) *Passengers.* Each certificate holder shall provide a supply of oxygen, approved for passenger safety, in accordance with the following:

(1) For flights of more than 30 minutes duration at cabin pressure altitudes above 8,000 feet up to and including 14,000 feet, enough oxygen for 30 minutes for 10 percent of the passengers.

(2) For flights at cabin pressure altitudes above 14,000 feet up to and including 15,000 feet, enough oxygen for that part of the flight at those altitudes for 30 percent of the passengers.

(3) For flights at cabin pressure altitudes above 15,000 feet, enough oxygen for each passenger carried during the entire flight at those altitudes.

(d) For the purposes of this subpart "cabin pressure altitude" means the pressure altitude corresponding with the pressure in the cabin of the airplane, and "flight altitude" means the altitude above sea level at which the airplane is operated. For airplanes without pressurized cabins, "cabin pressure altitude" and "flight altitude" mean the same thing.

**§ 121.329 Supplemental oxygen for sustenance; turbine engine powered airplanes.**

(a) *General.* When operating a turbine engine powered airplane, each certificate holder shall equip the airplane with sustaining oxygen and dispensing equipment for use as set forth in this section:

(1) The amount of oxygen provided must be at least the quantity necessary to comply with paragraphs (b) and (c) of this section.

(2) The amount of sustaining and first-aid oxygen required for a particular operation to comply with the rules in this part is determined on the basis of cabin pressure altitudes and flight duration, consistent with the operating procedures established for each operation and route.

(3) The requirements for airplanes with pressurized cabins are determined on the basis of cabin pressure altitude and the assumption that a cabin pressurization failure will occur at the altitude or point of flight that is most critical from the standpoint of oxygen need, and that after the failure the airplane will descend in accordance with the emergency procedures specified in the Airplane Flight Manual, without exceeding its operating limitations, to a flight altitude that will allow successful termination of the flight.

(4) Following the failure, the cabin pressure altitude is considered to be the same as the flight altitude unless it is shown that no probable failure of the cabin or pressurization equipment will result in a cabin pressure altitude equal to the flight altitude. Under those circumstances, the maximum cabin pressure altitude attained may be used as a basis for certification or determination of oxygen supply, or both.

(b) *Crewmembers.* Each certificate holder shall provide a supply of oxygen for crewmembers in accordance with the following:

(1) At cabin pressure altitudes above 10,000 feet, up to and including 12,000 feet, oxygen must be provided for and used by each member of the flight crew on flight deck duty and must be provided for other crewmembers for that part of the flight at those altitudes that is of more than 30 minutes duration.

(2) At cabin pressure altitudes above 12,000 feet, oxygen must be provided for, and used by, each member of the flight crew on flight deck duty, and must be provided for other crewmembers during the entire flight at those altitudes.

(3) When a flight crewmember is required to use oxygen, he must use it continuously except when necessary to remove the oxygen mask or other dispenser in connection with his regular duties. Standby crewmembers who are on call or are definitely going to have flight deck duty before completing the flight must be provided with an amount of supplemental oxygen equal to that provided for crewmembers on duty other than on flight duty. If a standby crewmember is not on call and will not be on flight deck duty during the remainder of the flight, he is considered to be a passenger for the purposes of supplemental oxygen requirements.

(c) *Passengers.* Each certificate holder shall provide a supply of oxygen for passengers in accordance with the following:

(1) For flights at cabin pressure altitudes above 10,000 feet, up to and including 14,000 feet, enough oxygen for that part of the flight at those altitudes that is of more than 30 minutes duration, for 10 percent of the passengers.

(2) For flights at cabin pressure altitudes above 14,000 feet, up to and includ-

ing 15,000 feet, enough oxygen for that part of the flight at those altitudes for 30 percent of the passengers.

(3) For flights at cabin pressure altitudes above 15,000 feet, enough oxygen for each passenger carried during the entire flight at those altitudes.

**§ 121.331 Supplemental oxygen requirements for pressurized cabin airplanes: reciprocating engine powered airplanes.**

(a) When operating a reciprocating engine powered airplane pressurized cabin, each certificate holder shall equip the airplane to comply with paragraphs (b) through (d) of this section in the event of cabin pressurization failure.

(b) *For crewmembers.* When operating at flight altitudes above 10,000 feet, the certificate holder shall provide enough oxygen for each crewmember for the entire flight at those altitudes and not less than a two-hour supply for each flight crewmember on flight deck duty. The oxygen required in the event of cabin pressurization failure by § 121.337 may be included in determining the supplemental breathing supply required for flight crewmembers on flight deck duty in the event of cabin pressurization failure.

(c) *For passengers.* When operating at flight altitudes above 8,000 feet, the certificate holder shall provide oxygen as follows:

(1) When an airplane is not flown at a flight altitude above flight level 250, enough oxygen for 30 minutes for 10 percent of the passengers, if at any point along the route to be flown the airplane can safely descend to a flight altitude of 14,000 feet or less within four minutes.

(2) If the airplane cannot descend to a flight altitude of 14,000 feet or less within four minutes, the following supply of oxygen must be provided:

(i) For that part of the flight that is more than four minutes duration at flight altitudes above 15,000 feet, the supply required by § 121.327(c)(3).

(ii) For that part of the flight at flight altitudes above 14,000 feet, up to and including 15,000 feet, the supply required by § 121.327(c)(2).

(iii) For flight at flight altitudes above 8,000 feet up to and including 14,000 feet, enough oxygen for 30 minutes for 10 percent of the passengers.

(3) When an airplane is flown at a flight altitude above flight level 250, enough oxygen for 30 minutes for 10 percent of the passengers for the entire flight (including emergency descent) above 8,000 feet, up to and including 14,000 feet, and to comply with § 121.327(c)(2) and (3) for flight above 14,000 feet.

(d) For the purposes of this section it is assumed that the cabin pressurization failure occurs at a time during flight that is critical from the standpoint of oxygen need and that after the failure the airplane will descend, without exceeding its normal operating limitations, to flight altitudes allowing safe flight with respect to terrain clearance.

**§ 121.333 Supplemental oxygen for emergency descent and for first aid; turbine engine powered airplanes with pressurized cabins.**

(a) *General.* When operating a turbine engine powered airplane with a pressurized cabin, the certificate holder shall furnish oxygen and dispensing equipment to comply with paragraphs (b) through (e) of this section in the event of cabin pressurization failure.

(b) *Crewmembers.* When operating at flight altitudes above 10,000 feet, the certificate holder shall supply enough oxygen to comply with § 121.329, but not less than a two-hour supply for each flight crewmember on flight deck duty. The oxygen required in the event of cabin pressurization failure by § 121.337 may be included in determining the supply required for flight crewmembers on flight deck duty.

(c) *Use of oxygen masks by flight crewmembers.* (1) When operating at flight altitudes above flight level 250, each flight crewmember on flight deck duty must be provided with an oxygen mask so designed that it can be rapidly placed on his face from its ready position, properly secured, sealed, and supplying oxygen upon demand; and so designed that after being placed on the face it does not prevent immediate communication between the flight crewmember and other crewmembers over the airplane intercommunication system. When it is not being used at flight altitudes above flight level 250, the oxygen mask must be kept in condition for ready use and located so as to be within the immediate reach of the flight crewmember while at his duty station.

(2) When operating at flight altitudes above flight level 250, one pilot at the controls of the airplane shall at all times wear and use an oxygen mask secured, sealed, and supplying oxygen, except that the one pilot need not wear and use an oxygen mask while at or below flight level 350 if each flight crewmember on flight deck duty has a quick-donning type of oxygen mask that the certificate holder has shown can be placed on the face from its ready position, properly secured, sealed, and supplying oxygen upon demand, with one hand and within five seconds. The certificate holder shall also show that the mask can be put on without disturbing eye glasses and without delaying the flight crewmember from proceeding with his assigned emergency duties. The oxygen mask after being put on must not prevent immediate communication between the flight crewmember and other crewmembers over the airplane intercommunication system.

(3) Notwithstanding subparagraph (2) of this paragraph, if for any reason at any time it is necessary for one pilot to leave his station at the controls of the airplane when operating at flight altitudes above flight level 250, the remaining pilot at the controls shall put on and use his oxygen mask until the other pilot has returned to his duty station.

(4) Before the takeoff of a flight, each flight crewmember shall personally preflight his oxygen equipment to insure that the oxygen mask is functioning, fitted properly, and connected to appropriate supply terminals, and that the oxygen supply and pressure are adequate for use.

(d) *Use of portable oxygen equipment by cabin attendants.* Each attendant shall, during flight above flight level 250 flight altitude, carry portable oxygen equipment with at least a 15-minute supply of oxygen unless it is shown that enough portable oxygen units with masks or spare outlets and masks are distributed throughout the cabin to insure immediate availability of oxygen to each cabin attendant, regardless of his location at the time of cabin depressurization.

(e) *Passenger cabin occupants.* When the airplane is operating at flight altitudes above 10,000 feet, the following supply of oxygen must be provided for the use of passenger cabin occupants:

(1) When an airplane certificated to operate at flight altitudes up to and including flight level 250, can at any point along the route to be flown, descend safely to a flight altitude of 14,000 feet or less within four minutes, oxygen must be available at the rate prescribed by this Part for a 30-minute period for at least 10 percent of the passenger cabin occupants.

(2) When an airplane is operated at flight altitudes up to and including flight level 250 and cannot descend safely to a flight altitude of 14,000 feet within four minutes, or when an airplane is operated at flight altitudes above flight level 250, oxygen must be available at the rate prescribed by this part for not less than 10 percent of the pasenger cabin occupants for the entire flight after cabin depressurization, at cabin pressure altitudes above 10,000 feet up to and including 14,000 feet and, as applicable, to allow compliance with § 121.329(c) (2) and (3), except that there must be not less than a 10-minute supply for the passenger cabin occupants.

(3) For first-aid treatment of occupants who for physiological reasons might require undiluted oxygen following descent from cabin pressure altitudes above flight level 250, a supply of oxygen in accordance with the requirements of § 25.1443(d) must be provided for two percent of the occupants for the entire flight after cabin depressurization at cabin pressure altitudes above 8,000 feet, but in no case to less than one person. An appropriate number of acceptable dispensing units, but in no case less than two, must be provided, with a means for the cabin attendants to use this supply.

(f) *Passenger briefing.* Before flight is conducted above flight level 250, a crewmember shall instruct the passengers on the necessity of using oxygen in the event of cabin depressurization and shall point out to them the location and demonstrate the use of the oxygen-dispensing equipment.

**§ 121.335 Equipment standards.**

(a) *Reciprocating engine powered airplanes.* The oxygen apparatus, the minimum rates of oxygen flow, and the supply of oxygen necessary to comply with § 121.327 must meet the standards established in § 4b.651 of the Civil Air Regulations as in effect on July 20, 1950, except that if the certificate holder shows full compliance with those standards to be impracticable, the Administrator may authorize any change in those standards that he finds will provide an equivalent level of safety.

(b) *Turbine engine powered airplanes.* The oxygen apparatus, the minimum rate of oxygen flow, and the supply of oxygen necessary to comply with §§ 121.329 and 121.333 must meet the standards established in § 4b.651 of the Civil Air Regulations as in effect on September 1, 1958, except that if the certificate holder shows full compliance with those standards to be impracticable, the Administrator may authorize any changes in those standards that he finds will provide an equivalent level of safety.

**§ 121.337 Protective breathing equipment for the flight crew.**

(a) *Pressurized cabin airplanes.* Each required flight crewmember on flight deck duty must have readily available at his station protective breathing equipment covering the eyes, nose, and mouth (or the nose and mouth if accessory equipment is provided to protect the eyes) to protect him from the effects of smoke or carbon dioxide or other harmful gases. There must be at least a 300-liter standard temperature and pressure dry supply of oxygen for each required flight crewmember on flight deck duty. (Standard temperature and pressure dry oxygen at 0° centigrade, 760 mm. Hg.)

(b) *Nonpressurized cabin airplanes: general.* The requirements of paragraph (a) of this section apply to nonpressurized cabin airplanes if the Administrator finds that it is possible to obtain a dangerous concentration of smoke or carbon dioxide or other harmful gases in the flight crew compartments in any attitude of flight that might occur when the airplane is flown in accordance with either normal or emergency procedures.

(c) *Nonpressurized cabin airplanes with built-in carbon dioxide fire extinguisher system in fuselage compartment.* Each certificate holder operating a nonpressurized cabin airplane that has a built-in carbon dioxide fire extinguisher system in a fuselage compartment shall provide protective breathing equipment for the flight crew, except where—

(1) Not more than five pounds of carbon dioxide would be discharged into any compartment in accordance with established fire control procedures; or

(2) The carbon dioxide concentration at each flight crew station has been determined in accordance with § 25.1197 and has been found to be less than three percent by volume (corrected to standard sea-level conditions).

**§ 121.339 Equipment for extended overwater operations.**

(a) Except where the Administrator, by amending the operations specifications of the certificate holder, requires the carriage of all or any specific items of the equipment listed below for any overwater operation, or upon application of the certificate holder, the Administrator allows deviation for a particular extended overwater operation, no person may operate an airplane in extended overwater operations without having on the airplane the following equipment:

(1) A life preserver equipped with an approved survivor locator light, for each occupant of the airplane.

(2) Enough liferafts (each equipped with an approved survivor locator light) of a rated capacity and buoyancy to accommodate the occupants of the airplane.

(3) Suitable pyrotechnic signaling devices.

(4) One self-buoyant, water-resistant, portable emergency radio signaling device, that is capable of transmission on the appropriate emergency frequency or frequencies, and not dependent upon the airplane power supply.

(b) The required life rafts, life preservers, and signaling devices must be easily accessible in the event of a ditching without appreciable time for preparatory procedures. This equipment must be installed in conspicuously marked approved locations.

(c) A survival kit, appropriately equipped for the route to be flown, must be attached to each required life raft.

**§ 121.341 Equipment for operations in icing conditions.**

(a) Unless an airplane is certificated under the transport category airworthiness requirements relating to ice protection, no person may operate an airplane in icing conditions unless it is equipped with means for the prevention or removal of ice on windshields, wings, empennage, propellers, and other parts of the airplane where ice formation will adversely affect the safety of the airplane.

(b) No person may operate an airplane in icing conditions at night unless means are provided for illuminating or otherwise determining the formation of ice on the parts of the wings that are critical from the standpoint of ice accumulation. Any illuminating that is used must be of a type that will not cause glare or reflection that would handicap crewmembers in the performance of their duties.

**§ 121.343 Flight recorders.**

(a) No person may operate any of the following airplanes unless it is equipped with an approved flight recorder that records at least time, altitude, air speed, vertical acceleration, and heading:

(1) A large airplane that is certificated for operations above 25,000 feet altitude:

(2) Any large turbine engine powered airplane.

(b) Whenever an approved flight recorder is installed, it must be operated continuously from the instant the airplane begins the takeoff roll until it has completed the landing roll at an airport.

(c) Each certificate holder shall keep the recorded information for at least 60 days and for a longer period upon the request of the Administrator or the Civil Aeronautics Board for a particular flight or series of flights.

**§ 121.345 Radio equipment.**

(a) No person may operate an airplane unless it is equipped with radio equipment required for the kind of operation being conducted.

(b) Where two independent (separate and complete) radio systems are required by §§ 121.347 and 121.349, each system must have an independent antenna installation except that, where rigidly supported nonwire antennas or other antenna installations of equivalent reliability are used, only one antenna is required.

**§ 121.347 Radio equipment for operations under VFR over routes navigated by pilotage.**

(a) No person may operate an airplane under VFR over routes that can be navigated by pilotage, unless it is equipped with the radio equipment necessary under normal operating conditions to fulfill the following:

(1) Communicate with at least one appropriate ground station from any point on the route.

(2) Communicate with appropriate traffic control facilities from any point in the control zone within which flights are intended.

(3) Receive meteorological information from any point en route by either of two independent systems. One of the means provided to comply with this subparagraph may be used to comply with subparagraphs (1) and (2) of this paragraph.

(b) No person may operate an airplane at night under VFR over routes than can be navigated by pilotage unless that airplane is equipped with the radio equipment necessary under normal operating conditions to fulfill the functions specified in paragraph (a) of this section and to receive radio navigational signals applicable to the route flown, except that a marker beacon receiver or ILS receiver is not required.

**§ 121.349 Radio equipment for operations under VFR over routes not navigated by pilotage or for operations under IFR or over-the-top.**

(a) No person may operate an airplane under VFR over routes that cannot be navigated by pilotage or for operations conducted under IFR or over-the-top, unless the airplane is equipped with that radio equipment necessary under normal operating conditions to fulfill the functions specified in § 121.347(a) and to receive satisfactorily by either of two independent systems, radio navigational signals from all primary en route and approach navigational facilities intended to be used. However, only one marker beacon receiver providing visual and aural signals and one ILS receiver need be provided. Equipment provided to receive signals en route may be used to receive signals on approach, if it is capable of receiving both signals.

(b) In the case of operation over routes on which navigation is based on

low frequency radio range or automatic direction finding, only one low frequency radio range or ADF receiver need be installed if the airplane is equipped with two VOR receivers, and VOR navigational aids are so located and the airplane is so fueled that, in the case of failure of the low frequency radio range receiver or ADF receiver, the flight may proceed safely to a suitable airport, by means of VOR aids, and complete an instrument approach by use of the remaining airplane radio system.

(c) Whenever VOR navigational receivers are required by paragraph (a) or (b) of this section, at least one approved distance measuring equipment unit (DME), capable of receiving and indicating distance information from VOR-TAC facilities, must be installed on each airplane when operated within the 48 contiguous States and the District of Columbia at and above 24,000 feet MSL and must be installed on each of the following airplanes, regardless of the altitude flown, when operating within the 48 contiguous States and the District of Columbia after the indicated dates.

(1) Turbojet airplanes—June 30, 1963.

(2) Turboprop airplanes—December 31, 1963.

(3) Pressurized reciprocating engine airplanes—June 30, 1964.

(4) Other large airplanes—June 30, 1965.

(d) If the distance measuring equipment (DME) becomes inoperative en route, the pilot shall notify ATC of that failure as soon as it occurs.

**§ 121.351 Radio equipment for extended overwater operations and for certain other operations.**

(a) No person may conduct an extended overwater operation unless the airplane is equipped with the radio equipment necessary to comply with § 121.349 and an independent system that complies with § 121.347(a)(1).

(b) No flag or supplemental air carrier or commercial operator may conduct an operation without the equipment specified in paragraph (a) of this section, if the Administrator finds that equipment to be necessary for search and rescue operations because of the nature of the terrain to be flown over.

**§ 121.353 Equipment for operations over uninhabited terrain areas: flag and supplemental air carriers and commercial operators.**

Unless it has the following equipment, no flag or supplemental air carrier or commercial operator may conduct an operation over an uninhabited area or any other area that (in its operations specifications) the Administrator specifies requires equipment for search and rescue in case of an emergency:

(a) Suitable pyrotechnic signaling devices.

(b) One self-buoyant, water-resistant, portable emergency radio signaling device capable of transmission on the appropriate emergency frequency or frequencies and not dependent upon the airplane power supply.

(c) Enough survival kits, appropriately equipped for the route to be flown, for the number of occupants of the airplane.

**§ 121.355 Equipment for operations on which specialized means of navigation are required: flag and supplemental air carriers and commercial operators.**

No flag or supplemental air carrier or commercial operator may conduct an operation for which specialized means of navigation are required unless it shows that adequate airborne equipment is provided for the specialized navigation authorized for the particular route to be operated.

**§ 121.357 Airborne weather radar equipment requirements: passenger-carrying airplanes.**

(a) No person may operate any airplane certificated under the transport category rules (except C-46 type airplanes), in passenger-carrying operations, unless approved airborne weather radar equipment has been installed in the airplane.

(b) Each person operating a transport category airplane with approved airborne weather radar installed shall, when using it in passenger operations under this Part, operate it in accordance with the following:

(1) *Dispatch.* No person may dispatch an airplane (or begin the flight of an airplane in the case of an air carrier or commercial operator that does not use a dispatch system) under IFR or night VFR conditions when current weather reports indicate that thunderstorms, or other potentially hazardous weather conditions that can be detected with airborne weather radar, may reasonably be expected along the route to be flown, unless the airborne weather radar equipment is in satisfactory operating condition.

(2) If the airborne weather radar becomes inoperative en route, the airplane must be operated in accordance with the approved instructions and procedures specified in the operations manual for such an event.

(c) This section does not apply to airplanes used solely within the State of Hawaii or within the State of Alaska and that part of Canada west of longitude 130 degrees W, between latitude 70 degrees N, and latitude 53 degrees N, or during any cargo only, training, test, or ferry flight.

(d) Notwithstanding any other provision of this chapter, an alternate electrical power supply is not required for airborne weather radar equipment.

**§ 121.359 Cockpit voice recorders.**

(a) No certificate holder may operate any of the following airplanes after the listed date unless an approved cockpit voice recorder is installed in that airplane and is operated continuously from the start of the use of the checklist (before starting engines for the purpose of flight), to completion of the final checklist at the termination of the flight:

(1) Large turbine engine powered airplanes—June 30, 1966.

(2) Large pressurized airplanes with four reciprocating engines—December 31, 1966.

(b) Each certificate holder shall establish a schedule for completion, before the prescribed dates, of the cockpit voice recorder installations required by paragraph (a) of this section. In addition the certificate holder shall identify any airplane specified in paragraph (a) of this section he intends to discontinue using before the prescribed dates.

(c) Each cockpit voice recorder must be installed in accordance with the requirements of Part 25 of this chapter.

(d) In complying with this section, an approved cockpit voice recorder having an erasure feature may be used, so that at any time during the operation of the recorder, information recorded more than 30 minutes earlier may be erased or otherwise obliterated.

(e) In the event of an accident or occurrence requiring immediate notification of the Civil Aeronautics Board under Part 320 of its regulations, the certificate holder shall keep the recorded information for at least 60 days or, if requested by the Administrator or the Board, for a longer period. Information obtained from the record is used to assist in determining the cause of accidents or occurrences in connection with investigations under Part 320. The Administrator does not use the record in any civil penalty or certificate action.

## Subpart L—Maintenance, Preventive Maintenance, and Alterations

**§ 121.361 Applicability.**

This subpart prescribes requirements for maintenance, preventive maintenance, and alterations for all certificate holders.

**§ 121.363 Responsibility for airworthiness.**

(a) Each certificate holder is primarily responsible for—

(1) The airworthiness of its aircraft, including airframes, aircraft engines, propellers, appliances, and parts thereof; and

(2) The performance of the maintenance, preventive maintenance, and alteration of its aircraft, including airframes, aircraft engines, propellers, or appliances, and parts thereof, in accordance with its manual and the regulations of this chapter.

(b) A certificate holder may make arrangements with another person for the performance of any maintenance, preventive maintenance, or alterations. However, this does not relieve the certificate holder of the responsibility specified in paragraph (a) of this section.

**§ 121.365 Maintenance, preventive maintenance, and alteration organization.**

(a) Each certificate holder that performs any of its maintenance (other than required inspections), preventive maintenance, or alterations, and each person with whom it arranges for the performance of that work must have an organization adequate to perform the work.

(b) Each certificate holder that performs any inspections required by its manual (in this subpart referred to as "required inspections") and each person with whom it arranges for the performance of that work must have an organization adequate to perform that work.

(c) Each person performing required inspections in addition to other maintenance, preventive maintenance, or alterations, shall organize the performance of those functions so as to separate the required inspection functions from the other maintenance, preventive maintenance, and alteration functions. The separation shall be below the level of administrative control at which overall responsibility for the required inspection functions and other maintenance, preventive maintenance, and alteration functions are exercised.

**§ 121.367 Maintenance, preventive maintenance, and alterations programs.**

Each certificate holder shall have an inspection program and a program covering other maintenance, preventive maintenance, and alterations that ensures that—

(a) Maintenance, preventive maintenance, and alterations performed by it, or by other persons, are performed in accordance with the certificate holder's manual;

(b) Competent personnel and adequate facilities and equipment are provided for the proper performance of maintenance, preventive maintenance, and alterations; and

(c) Each aircraft released to service is airworthy and has been properly maintained for operation in air transportation.

**§ 121.369 Manual requirements.**

(a) The certificate holder shall put in its manual a chart or description of the certificate holder's organization required by § 121.365 and a list of persons with whom it has arranged for the performance of any of its required inspections, other maintenance, preventive maintenance, or alterations, including a general description of that work.

(b) The certificate holder's manual must contain the programs required by §121.367 that must be followed in performing maintenance, preventive maintenance, and alterations of that certificate holder's airplanes, including airframes, aircraft engines, propellers, appliances, and parts thereof, and must include at least the following:

(1) The method of performing routine and nonroutine maintenance (other than required inspections), preventive maintenance, and alterations.

(2) A designation of the items of maintenance and alteration that must be inspected (required inspections), including at least those that could result in a failure, malfunction, or defect endangering the safe operation of the aircraft, if not performed properly or if improper parts or materials are used.

(3) The method of performing required inspections and a designation by occupational title of personnel authorized to perform each required inspection.

(4) Procedures for the reinspection of work performed pursuant to previous required inspection findings ("buy-back procedures").

(5) Procedures, standards, and limits necessary for required inspections and acceptance or rejection of the items required to be inspected and for periodic inspection and calibration of precision tools, measuring devices, and test equipment.

(6) Procedures to ensure that all required inspections are performed.

(7) Instructions to prevent any person who performs any item of work from performing any required inspection of that work.

(8) Instructions and procedures to prevent any decision of an inspector, regarding any required inspection from being countermanded by persons other than supervisory personnel of the inspection unit, or a person at that level of administrative control that has overall responsibility for the management of both the required inspection functions and the other maintenance, preventive maintenance, and alterations functions.

(9) Procedures to ensure that required inspections, other maintenance, preventive maintenance, and alterations that are not completed as a result of shift changes or similar work interruptions are properly completed before the aircraft is released to service.

**§ 121.371 Required inspection personnel.**

(a) No person may use any person to perform required inspections unless the person performing the inspection is appropriately certified, properly trained, qualified, and authorized to do so.

(b) No person may allow any person to perform a required inspection unless, at that time, the person performing that inspection is under the supervision and control of an inspection unit.

(c) No person may perform a required inspection if he performed the item of work required to be inspected.

(d) Each certificate holder shall maintain, or shall determine that each person with whom it arranges to perform its required inspections maintains, a current listing of persons who have been trained, qualified, and authorized to conduct required inspections. The persons must be identified by name, occupational title, and the inspections that they are authorized to perform. The certificate holder (or person with whom it arranges to perform its required inspections) shall give written information to each person so authorized describing the extent of his responsibilities, authorities, and inspectional limitations. The list shall be made available for inspection by the Administrator upon request.

**§ 121.373 Continuing analysis and surveillance.**

(a) Each certificate holder shall establish and maintain a system for the continuing analysis and surveillance of the performance and effectiveness of its inspection program and the program covering other maintenance, preventive maintenance, and alterations and for the correction of any deficiency in those programs, regardless of whether those programs are carried out by the certificate holder or by another person.

(b) Whenever the Administrator finds that either or both of the programs described in paragraph (a) of this paragraph does not contain adequate procedures and standards to meet the requirements of this Part, the certificate holder shall, after notification by the Administrator, make any changes in those programs that are necessary to meet those requirements.

(c) A certificate holder may petition the Administrator to reconsider the notice to make a change in a program. The petition must be filed with the FAA Air Carrier District Office charged with the overall inspection of the certificate holder's operations within 30 days after the certificate holder receives the notice. Except in the case of an emergency requiring immediate action in the interest of safety, the filing of the petition stays the notice pending a decision by the Administrator.

**§ 121.375 Maintenance and preventive maintenance training program.**

Each certificate holder or person performing maintenance or preventive maintenance functions for it shall have a training program to ensure that each person (including inspection personnel) who determines the adequacy of work done is fully informed about procedures and techniques and new equipment in use and is competent to perform his duties.

**§ 121.377 Maintenance and preventive maintenance personnel duty time limitations.**

Within the United States, each certificate holder (or person performing maintenance or preventive maintenance functions for it) shall relieve each person performing maintenance or preventive maintenance from duty for a period of at least 24 consecutive hours during any seven consecutive days, or the equivalent thereof within any one calendar month.

**§ 121.378 Certificate requirements.**

(a) Each person who is directly in charge of maintenance, preventive maintenance, or alteration, and each person performing required inspections must hold an appropriate airman certificate.

(b) For the purposes of this section, a person "directly in charge" is each person assigned to a position in which he is responsible for the work of a shop or station that performs maintenance, preventive maintenance, alterations, or other functions affecting aircraft airworthiness. A person who is "directly in charge" need not physically observe and direct each worker constantly but must be available for consultation and decision on matters requiring instruction or decision from higher authority than that of the persons performing the work.

**§ 121.379 Authority to perform and approve maintenance, preventive maintenance and alterations.**

(a) A certificate holder may perform maintenance, preventive maintenance, and alterations as provided in its continuous airworthiness maintenance program and its maintenance manual. In addition, an air carrier may perform these functions for another air carrier

as provided in the continuous airworthiness maintenance program and maintenance manual of the other air carrier.

(b) A certificate holder may approve any aircraft, airframe, aircraft engine, propeller, or appliance for return to service after maintenance, preventive maintenance, or alterations that it performed under paragraph (a) of this section. However, in the case of a major repair or major alteration, the work must have been done in accordance with technical data approved by the Administrator.

## Subpart M—Airman and Crewmember Requirements

### § 121.381 Applicability.

This subpart prescribes airman and crewmember requirements for all certificate holders.

### § 121.383 Airman: limitations on use of services.

(a) No certificate holder may use a person as an airman unless that person—

(1) Holds an appropriate current airman certificate issued by the FAA;

(2) Has any required appropriate current airman and medical certificates in his possession while engaged in operations under this part; and

(3) Is otherwise qualified for the operation for which he is to be used.

(b) Each airman covered by paragraph (a)(2) of this section shall present either or both certificates for inspection upon the request of the Administrator.

(c) No certificate holder may use the services of any person as a pilot on an airplane engaged in operations under this part if that person has reached his 60th birthday. No person may serve as a pilot on an airplane engaged in operations under this part if that person has reached his 60th birthday.

### § 121.385 Composition of flight crew.

(a) No certificate holder may operate an aircraft with less than the minimum flight crew in the airworthiness certificate or the aircraft Flight Manual approved for that type aircraft and required by this part for the kind of operation being conducted.

(b) In any case in which this part requires the performance of two or more functions for which an airman certificate is necessary, that requirement is not satisfied by the performance of multiple functions at the same time by one airman.

(c) The following minimum pilot crews apply:

(1) *Domestic air carriers.* If a domestic air carrier is authorized to operate under IFR, or if it operates large aircraft, the minimum pilot crew is two pilots and the air carrier shall designate one pilot as pilot in command and the other second in command.

(2) *Flag air carriers.* If a flag air carrier is authorized to operate under IFR, or if it operates large aircraft, the minimum pilot crew is two pilots.

(3) *Supplemental air carriers and commercial operators.* If a supplemental air carrier or commercial operator is authorized to operate helicopters under IFR, or if it operates large aircraft, the minimum pilot crew is two pilots and the supplemental air carrier or commercial operator shall designate one pilot as pilot in command and the other second in command.

(d) On each flight requiring a flight engineer at least one flight crewmember, other than the flight engineer, must be qualified to provide emergency performance of the flight engineer's functions for the safe completion of the flight if the flight engineer becomes ill or is otherwise incapacitated. A pilot need not hold a flight engineer's certificate to perform the flight engineer's functions in such a situation.

### § 121.387 Flight engineer.

(a) No certificate holder may operate an airplane having a maximum certificated takeoff weight of more than 80,000 pounds without a flight crewmember holding a current flight engineer certificate.

(b) Such a flight crewmember is also required on each four-engine airplane having a maximum certificated takeoff weight of more than 30,000 pounds, if the Administrator determines that the design of the airplane or the kind of operation requires a flight engineer for safe operation.

### § 121.389 Flight navigator: flag and supplemental air carriers and commercial operators.

(a) No flag or supplemental air carrier or commercial operator may operate an airplane over any area, route, or route segment that is outside the 48 contiguous States and the District of Columbia, without a flight crewmember holding a current flight navigator certificate, whenever the Administrator determines that celestial navigation is necessary or other specialized means of navigation necessary to obtain a reliable fix for the safety of the flight cannot be adequately accomplished from the pilot station for a period of more than one hour. However, the Administrator may also require a certificated flight navigator when those specialized means of navigation are necessary for one hour or less. In making that determination the Administrator considers—

(1) The speed of the airplane;

(2) Normal weather conditions en route;

(3) Extent of air traffic control;

(4) Traffic congestion;

(5) Area of land at destination;

(6) Fuel requirements;

(7) Fuel available for return to point of departure or alternates; and

(8) Predication of flight upon operation beyond the point-of-no-return.

(b) The areas, routes, or route segments over which a navigator is required are specified in the operations specifications of the air carrier or commercial operator.

### § 121.391 Flight attendants: domestic air carriers.

Each domestic air carrier conducting a passenger operation shall provide at least one flight attendant on each airplane with a capacity of more than nine passengers.

### § 121.393 Flight attendants: flag and supplemental air carriers and commercial operators.

(a) Except as provided in paragraph (b) of this section, each flag and supplemental air carrier and each commercial operator conducting a passenger operation shall provide at least the following flight attendants on each airplane used:

(1) For airplanes having a seating capacity of at least 10 but less than 45 passengers—one flight attendant.

(2) For airplanes having a seating capacity of at least 45 but less than 101 passengers—two flight attendants.

(3) For airplanes having a seating capacity of more than 100 passengers—three flight attendants.

(b) Upon application by the air carrier or commercial operator, the Administrator may approve the use of an airplane in a particular operation with less than the number of flight attendants required by paragraph (a) of this section, if the air carrier or commercial operator shows that, based on the following, safety and emergency procedures and functions established under § *121.397* for the particular type of airplane and operation can be adequately performed by fewer flight attendants:

(1) Kind of operation.

(2) The number of passenger seats.

(3) The number of compartments.

(4) The number of emergency exits.

(5) Emergency equipment.

(6) The presence of other trained flight crewmembers, not on flight deck duty, whose services may be used in emergencies.

### § 121.395 Aircraft dispatcher: domestic and flag air carriers.

Each domestic and flag air carrier shall provide enough qualified aircraft dispatchers at each dispatch center to ensure proper operational control of each flight.

### § 121.396 Emergency and emergency evacuation duties: domestic air carriers.

(a) Each domestic air carrier shall assign to each required crewmember the necessary functions that he is to perform in an emergency or a situation requiring emergency evacuation. The air carrier shall show that those functions are realistic and can be practically accomplished.

(b) The air carrier shall describe each required crewmember's functions under paragraph (a) of this section in its air carrier manual.

### § 121.397 Emergency and emergency evacuation duties: flag and supplemental air carriers and commercial operators.

(a) Each flag and supplemental air carrier and each commercial operator of airplanes shall assign to each required crewmember the necessary functions that he is to perform in an emergency or a situation requiring emergency evacuation. The air carrier or commercial operator shall assign those functions for each type of airplane that it uses and shall show that those functions are realistic and can be accomplished.

(b) The air carrier or commercial operator shall describe each required crewmember's functions under paragraph (a) of this section in its manual.

(c) The air carrier or commercial operator shall train each required crewmember in his functions under paragraph (a) of this section during the emergency training part of the approved training program prescribed in § 121.411.

## Subpart N—Training Program

### § 121.410 Applicability.

Except where otherwise stated, this subpart prescribes requirements applicable to each certificate holder for establishing and maintaining a training program.

### § 121.411 Establishment.

(a) Each certificate holder shall have an approved training program that assures that each crewmember and each aircraft dispatcher (where required) is adequately trained to perform his assigned duties. Each crewmember and each aircraft dispatcher (where required) must satisfactorily complete the initial training phases before serving in operations under this part.

(b) Each certificate holder shall provide adequate ground and flight training facilities and properly qualified instructors for the training required by this section, and enough check airmen to conduct the flight checks required by this part. Each check airman must hold the airman certificates and ratings that are required for the airman being checked.

(c) The training program for each flight crewmember must consist of appropriate ground and flight training, including proper flight crew coordination and training in emergency procedures. The certificate holder shall standardize procedures for each flight crew function to the extent that each flight crewmember knows the functions for which he is responsible and the relation of those functions to the functions of other flight crewmembers. The initial program must include at least the requirements set forth in §§ 121.413 through 121.423.

(d) The crewmember emergency procedures training program must include at least the requirements set forth in § 121.423.

(e) Each instructor, supervisor, or check airman that is responsible for a particular training or flight check shall certify as to the proficiency of the crewmember or dispatcher concerned after he completes his initial training and after he completes his recurrent training. That certification shall be made a part of the crewmember's or dispatcher's record.

### § 121.413 Ground training: pilots.

(a) The initial ground training that the certificate holder must provide for each pilot before he serves as a flight crewmember must include at least—

(1) Instruction in the appropriate provisions of the certificate holder's operations specifications and of this chapter, especially the operating and dispatcher flight release rules and airplane operating limitations;

(2) Dispatch procedures (domestic and flag air carriers) or flight release procedures (supplemental air carriers and commercial operators) and appropriate contents of the manuals;

(3) Duties and responsibilities of crewmembers;

(4) The type of aircraft to be flown, including a study of the aircraft, engines, major components and systems, performance limitations, standard and emergency operating procedure, and appropriate contents of the approved Aircraft Flight Manual;

(5) Principles and methods for determining weight and balance limitations for takeoff and landing;

(6) Navigation and the use of appropriate navigation aids, including instrument approach facilities and procedures that the certificate holder is authorized to use;

(7) Air traffic control systems and procedures, and pertinent ground control letdown procedures;

(8) Enough meteorology to ensure a practical knowledge of the principles of icing, fog, thunderstorms, and frontal systems; and

(9) Procedures for operating in turbulent air, icing, hail, thunderstorm, and other potentially hazardous meteorological conditions.

(b) In addition to the training required by paragraph (a) of this section, each flag and supplemental air carrier and each commercial operator shall provide training in communications procedures and communications equipment failure procedures.

(c) Each certificate holder shall provide the following for each pilot:

(1) Any additional ground training necessary to ensure qualifications in new equipment, procedures, or techniques.

(2) Checks (and, in the case of flag air carriers, supplemental air carriers, and commercial operators, recurrent ground training) at least once each twelve months to ensure his continued proficiency in procedures, techniques, and information essential to the satisfactory performance of his duties. A check may be given during the month before or after it is due without affecting its effective date.

### § 121.415 Flight training: pilots.

(a) The initial flight training that the certificate holder must provide for each pilot before he serves as a flight crewmember must include at least—

(1) Takeoffs and landings during day and night in each type of airplane he is to pilot in operations under this Part;

(2) Normal and emergency flight maneuvers in each type of airplane he is to pilot in operations under this Part; and

(3) Flight under simulated instrument conditions.

(b) A pilot qualifying to serve as other than pilot in command or second in command, shall show the Administrator or a check pilot that he is able to take off and land each type of airplane in which he is to serve.

(c) The initial flight training for each pilot qualifying to serve as a pilot in command (and, in the case of a flag or supplemental air carrier or commercial operator, the second in command of an airplane in an operation that requires three or more pilots) must include flight instruction and practice in at least the following maneuvers and procedures:

(1) In each type of airplane to be flown by him in operations under this part, he must perform the following:

(i) In the case of takeoffs at the authorized maximum takeoff weight using maximum takeoff power with a simulated failure of the critical engine. In transport category airplanes the simulated failure must be done as close as possible to the critical engine failure speed $V_1$ and climb-out must be made as close as possible to the takeoff safety speed $V_2$, and the pilot shall determine the values for $V_1$ and $V_2$.

(ii) If a three-engine or four-engine airplane, flight, including maneuvering to a landing at the authorized maximum landing weight, with the most critical combination of two engines inoperative, or operating at zero thrust, using where appropriate applicable climb speeds set forth in the Airplane Flight Manuals.

(iii) At the authorized maximum landing weight, simulated pull-out from the landing and approach configurations at a safe altitude with the critical engine inoperative or operating at zero thrust.

(2) Flight must be conducted under simulated IFR conditions using each kind of navigation facility and letdown procedure that is used in normal operations. If a particular kind of facility is not available in the training area, the training may be given in a synthetic trainer.

For the purposes of subparagraph (1) of this paragraph, weight and power combinations less than those specified in subdivisions (i), (ii), and (iii) of that subparagraph may be used if the performance capabilities of the airplane under the specified conditions are simulated.

(d) Initial flight training for each pilot qualifying to serve as second in command of an airplane in domestic operations (or second in command of an airplane that requires two pilots in flag or supplemental air carrier or commercial operator operations) must include flight instruction and practice in at least the following maneuvers and procedures:

(1) In each type of airplane to be flown by him in operations under this part, flight training must include—

(i) Assigned flight duties as second in command, including flight emergencies;

(ii) Taxiing;

(iii) Takeoffs and landings;

(iv) Climbs and climbing turns;

(v) Slow flight;

(vi) Approach to stall;

(vii) Engine shutdown and restart;

(viii) Takeoff and landing with simulated engine failure; and

(ix) Flight under simulated IFR conditions, including instrument approach at least down to circling approach minimums and missed approach procedures.

(2) Flight must be conducted under simulated IFR conditions using each kind of navigation facility and letdown procedure that is used in normal operations. Except for those approach procedures for which the lowest minimums are approved, letdown procedures may be given in a synthetic trainer that has the radio

equipment and instruments necessary to simulate other navigational and letdown procedures approved for the certificate holder.

(e) The certificate holder shall give each pilot any additional flight training necessary to insure his qualification for new equipment, procedures, or techniques. At least once each 12 months, as a part of the training program, it shall give him a check (and in the case of a flag or supplemental air carrier or commercial operator, recurrent flight training). A check may be given during the month before or after it is due without affecting its effective date. The purpose of these checks and training is to insure his continued proficiency with respect to procedures, techniques, and information essential to the satisfactory performance of his duties. If the check of a pilot in command or second in command requires actual flight, satisfactory completion of the applicable proficiency checks required by § 121.441 or 121.449 meets the requirements of this section.

**§ 121.417 Flight navigator training: flag air carriers.**

(a) The training for each flight navigator must include at least the applicable parts of subparagraphs (1) through (4) and (6) through (8) of § 121.413(a).

(b) Before serving as a flight crewmember, each flight navigator must have enough ground and flight training to be proficient in the duties assigned to him by the air carrier. The flight training may be given during scheduled flight in air transportation under the supervision of a qualified flight navigator.

(c) The flag air carrier shall give each flight navigator any additional ground and flight training necessary to ensure his qualification for new equipment, procedures, and techniques. At least once each 12 months, as a part of the training program, it shall give him recurrent ground training and a flight check to ensure his continued proficiency with respect to procedures, techniques, and information essential to the satisfactory performance of his duties. The flight check may be given during passenger or cargo flights under the supervision of a qualified navigator, or in a synthetic trainer in place of a check in flight. A competence check may be given during the month before or the month after it is due without affecting its effective date.

**§ 121.419 Flight navigator training: supplemental air carriers and commercial operators.**

(a) The training for each flight navigator must include at least the applicable parts of subparagraphs (1) through (4) and (6) through (8) of § 121.413(a).

(b) Before serving as a flight crewmember, each flight navigator must have enough ground and flight training to be proficient in the duties assigned to him by the air carrier or commercial operator. The flight training may be given during flights subject to this part under the supervision of a qualified flight navigator.

(c) The supplemental air carrier or commercial operator shall give each flight navigator any additional ground and flight training necessary to ensure his qualification for new equipment, procedures, and techniques. At least once within the preceding 12 months, as a part of the training program, it shall give him recurrent ground training and a flight check to ensure his continued proficiency with respect to procedures, techniques, and information essential to the satisfactory performance of his duties. The flight check may be given during passenger or cargo flights under the supervision of a qualified navigator, or in a synthetic trainer in place of a check in flight. A competence check may be given during the month before or the month after it is due without affecting its effective date.

**§ 121.421 Flight engineer training.**

(a) The training for each flight engineer must include at least the applicable parts of subparagraphs (1) through (5) of § 121.413(a).

(b) Before serving as a flight crewmember, each flight engineer must have enough flight training to be proficient in the duties assigned to him by the certificate holder. Except for emergency procedures, the flight training may be given during flights subject to the provisions of this part applicable to the certificate holder under the supervision of a qualified flight engineer.

(c) The certificate holder shall give each flight engineer any additional ground and flight training necessary to assure his qualification for new equipment, procedures, and techniques. At least once each 12 months, as a part of the training program, it shall give him a check (and in the case of a flag or supplemental air carrier or commercial operator, recurrent training) to assure his continued proficiency with respect to procedures, techniques, and information essential to the satisfactory performance of his duties. A competence check may be given during the month before or the month after it is due without affecting its effective date.

**§ 121.423 Crewmember emergency training.**

(a) Each certificate holder shall design its initial training in emergency procedures to give each required crewmember appropriate instruction in emergency procedures, including assignments in an emergency and coordination among crewmembers and appropriate individual instruction in at least the following subjects, as appropriate to the particular crewmember:

(1) Procedures for handling failure of an engine, engines, or other airplane components or systems.

(2) Procedures for handling—

(i) Emergency decompression;

(ii) Fire in the air or on the ground;

(iii) Ditching; and

(iv) Evacuation.

(3) The location of emergency equipment.

(4) The operation of emergency equipment.

(5) The power setting for maximum endurance and maximum range.

(b) The certificate holder shall give each crewmember, at least once each 12 months, a check (and, in the case of a flag or supplemental air carrier or a commercial operator, recurrent training) in the emergency procedures set forth in paragraph (a) of this section).

(c) Synthetic trainers approved to simulate flight operating emergency conditions may be used for training crewmembers in emergency procedures.

(d) The certificate holder shall give instruction, by lectures and films (or other equivalent means approved after demonstration) to each crewmember performing duties on pressurized airplanes operated above 25,000 feet covering at least—

(1) Respiration;

(2) Hypoxia;

(3) Duration of consciousness at altitudes without supplemental oxygen;

(4) Gas expansion;

(5) Gas bubble formation; and

(6) Physical phenomena and incidents of decompression.

(e) The certificate holder shall give each crewmember performing duties on pressurized airplanes operated above 25,000 feet, training and practice in putting on oxygen masks and operating oxygen equipment.

**§ 121.425 Aircraft dispatcher training: domestic and flag air carriers.**

(a) Each domestic and flag air carrier shall provide a training program for its aircraft dispatchers that includes—

(1) Training in their duties and responsibilities:

(2) Flight operations procedures;

(3) Air traffic control procedures;

(4) Performance of airplanes used;

(5) Navigation aids and facilities; and

(6) Meteorology.

(b) The training program must emphasize emergency procedures, including the alerting of proper governmental, company, and private agencies to give the maximum help to an airplane in distress.

(c) Each aircraft dispatcher shall, before performing duties as an aircraft dispatcher, show the supervisor or ground instructor authorized to certify his proficiency, his knowledge of the following:

(1) Contents of the air carrier operating certificate.

(2) Appropriate provisions of the air carrier's operations specifications, manual, and this chapter.

(3) Characteristics of airplanes used by the carrier.

(4) Cruise control data and cruising speeds for those airplanes.

(5) Maximum authorized airplane loads for the routes and airports used.

(6) Air carrier radio facilities.

(7) Characteristics and limitations of each kind of radio and navigation facility used.

(8) Effect of weather conditions on airplane radio reception.

(9) Airports used and the terrain en route.

(10) Prevailing weather phenomena.

(11) Sources of weather information available.

(12) Pertinent air traffic control procedures.

(13) Emergency procedures.

(d) The air carrier shall give each dispatcher any additional training necessary to assure his qualification for new equipment, procedures, and techniques. At least once each 12 months, as a part

of the training program, it shall give him a check (and, in the case of a flag or supplemental air carrier or a commercial operator, recurrent training) to assure his continued competence with respect to the procedures, techniques, and information essential to his duties.

## Subpart O—Flight Crewmember Qualifications

**§ 121.431 Applicability.**

This subpart prescribes flight crewmember qualifications for all certificate holders except where otherwise specified.

**§ 121.433 General.**

(a) No certificate holder may use a flight crewmember, and none of its flight crewmembers may perform duties under his airman certificate, unless he meets the appropriate requirements of §§ 121.411 through 121.423 and §§ 121.439 through 121.453.

(b) When a pilot completes a check required by this subpart, the check airman who is responsible for the particular check shall certify as to the pilot's proficiency. This certification shall be made a part of the pilot's record.

(c) If a flight crewmember who is required to take a check takes that check in the calendar month before, or the calendar month after, the month in which it becomes due, he is considered to have taken it during the month it became due.

**§ 121.435 Helicopter operations: Supplemental air carriers and commercial operators.**

No supplemental air carrier or commercial operator may use a flight crewmember, and none of its flight crewmembers may perform duties under his airman certificate in helicopter operations, unless that flight crewmember meets the requirements of §§ 127.151 or 127.161 and 127.175 and 127.177.

**§ 121.437 Pilot qualification: certificates required.**

(a) No pilot may act as pilot in command of an aircraft (or as second in command of an aircraft in a flag or supplemental air carrier or commercial operator operation that requires three or more pilots) unless he holds an airline transport pilot certificate and an appropriate type rating for that aircraft.

(b) Each pilot who acts as a pilot in a capacity other than those specified in paragraph (a) of this section must hold at least a commercial pilot certificate and an instrument rating.

**§ 121.439 Pilot qualification: recent experience.**

No certificate holder may use a pilot as a pilot in command or second in command in operations under this part unless, within the preceding 90 days, he has made at least three takeoffs and three landings in an airplane of the type in which he is to serve.

**§ 121.441 Pilot checks.**

(a) *Line check.* No certificate holder may use a pilot as pilot in command of an airplane until he has passed a line check in one of the types of airplanes that he is to fly as follows:

(1) For domestic and flag air carriers the check must—

(i) Be given by an approved check pilot who is qualified on both the route and the airplane; and

(ii) Consist of at least a scheduled flight over a typical part of the air carrier's route to which the pilot is normally assigned.

(2) For supplemental air carriers and commercial operators the check must—

(i) Be given by an approved check pilot who is qualified on the airplane; and

(ii) Consist of at least one flight over a part of a Federal airway, foreign airway, or advisory route over which the pilot may be assigned.

Thereafter, a pilot may not serve as pilot in command unless each 12 months he passes a similar line check. During the flight (that must be long enough for a determination to be made) the check pilot shall determine whether the pilot being checked satisfactorily performs the duties and responsibilities of a pilot in command.

(b) *Proficiency check.* No certificate holder may use a pilot as a pilot in command of an airplane in operations under this part unless he has satisfactorily shown to the Administrator or a check pilot that he is able to pilot and navigate airplanes that he is to fly. Thereafter he may not serve as a pilot in command unless each six months he passes a similar pilot proficiency check. If a pilot serves in more than one airplane type, at least each alternate check must be given in flight in the largest type of airplane in which he serves. The proficiency check must include the following:

(1) Equipment test (oral or written).

(2) Taxiing.

(3) Runup.

(4) Takeoff.

(5) Climb.

(6) Climbing turns.

(7) Steep turns.

(8) Maneuvers at minimum speeds.

(9) Approaches to stalls.

(10) Propeller feathering.

(11) Maneuvers with one or more engine(s) inoperative.

(12) Rapid descent and pullout.

(13) Radio tuning.

(14) Orientation.

(15) Approach procedures.

(16) Missed approach procedures.

(17) Traffic control procedures.

(18) Crosswind landings.

(19) Landing under circling approach conditions.

(20) Takeoffs and landings with engine(s) failure.

(21) Demonstration of pilot judgment.

(22) Emergency procedures.

(23) Flight maneuvers specified in § 121.415(c)(1), except that the simulated engine failure during takeoff need not be at speed $V_1$ or at the actual or simulated maximum authorized weight.

(24) Approved flight maneuvers under simulated instrument conditions using the navigational facilities and letdown procedures normally used by the pilot except that maneuvers other than those associated with approach procedures for which the lowest minimums are approved may be given in a synthetic trainer. However, where a certificate holder is authorized landing minimums based on instrument landing systems and ground control approach, only maneuvers associated with the predominant landing aid on a system-wide basis need be given in flight. A synthetic trainer used under this subparagraph must contain the radio equipment and instruments necessary to simulate the appropriate navigational and letdown procedures.

An equipment test given to an airman in the certificate holders ground school within the preceding six months may be accepted as equal to the test required by subparagraph (1) of this paragraph, in the discretion of the check pilot.

(c) If, in the judgment of the check pilot, the pilot being checked performs any of the items listed in paragraph (b) of this section in an unsatisfactory manner, the check pilot may give additional training to the pilot during the course of the proficiency check. If the pilot being checked is unable to demonstrate satisfactory performance to the check pilot, the certificate holder may not use him in operations under this part until he has satisfactorily shown his proficiency.

(d) *Use of flight simulator.* After the first proficiency check, the satisfactory completion of an approved training course in an approved airplane simulator may be substituted at alternate six-month intervals for the proficiency check required by paragraph (b) of this section, if the simulator meets the requirements of Appendix B of this part and—

(1) The simulator is maintained at the same level as required for initial approval;

(2) A functional preflight check of the simulator is performed each day before beginning simulator flight training or proficiency checks;

(3) A daily discrepancy log is kept and an entry of each discrepancy is made by the simulator instructor or check airman before the end of each training or check flight; and

(4) If a modification is made to the airplane, a corresponding modification is made to the simulator if necessary for flight crew training or proficiency checks.

The simulator may be used with inoperative instruments or equipment, if they are not applicable to the particular phase of training being given.

(e) Before serving as a pilot in command on any airplane, the pilot must have passed, during the preceding 12 months, either a proficiency check or a line check in that type of airplane.

**§ 121.443 Pilot in command qualification: routes and airports: domestic and flag air carriers.**

(a) No domestic or flag air carrier may use a pilot as pilot in command until he has qualified, for the route on which he is to serve, in accordance with this section, and the appropriate instructor or check pilot has so certified.

(b) The qualifying pilot shall show that he has adequate knowledge of the following with respect to each route he is to fly:

(1) Weather characteristics.

(2) Navigation facilities.

(3) Communication procedures.
(4) Kinds of terrain and obstruction hazards.
(5) Minimum safe flight levels.
(6) Position reporting points.
(7) Holding procedures.
(8) Pertinent air traffic control procedures.
(9) Congested areas, obstructions, physical layout, and instrument approach procedures for each regular, provisional, or refueling airport that is approved for the route.

Those parts of the requirements of this paragraph relating to holding procedures and instrument approach procedures may be accomplished in a synthetic trainer that contains the radio equipment and instruments necessary to simulate the navigation and letdown procedures approved for the air carrier.

(c) The qualifying pilot shall make an entry as a member of a flight crew at each regular, provisional, and refueling airport into which he is scheduled to fly. The entry must include a landing and a takeoff. The qualifying pilot must occupy a seat in the pilot compartment and must be accompanied by a pilot who is qualified for the airport.

(d) Paragraph (c) of this section does not apply if—

(1) The initial entry is made under VFR weather conditions at the airport involved;

(2) The air carrier shows that the qualification can be made by using approved pictorial means; or

(3) The air carrier notifies the Administrator that it intends to operate at an airport that is near an airport into which the pilot concerned is currently qualified by entry, and the Administrator finds that the pilot is adequately qualified at the new airport, considering at least the pilot's familiarity with the layout, surrounding terrain, location of obstacles, and instrument approach and traffic control procedures at the new airport.

(e) No pilot in command may serve on a route or route segment on which he must navigate by pilotage and fly at or below the level of terrain that is within 25 miles horizontally of the centerline of that route or route segment unless he has made at least two one-way trips over the route or route segment on the flight deck under VFR weather conditions.

### § 121.445 Pilot in command qualification: routes and airports: supplemental air carriers and commercial operators.

(a) Each supplemental air carrier and commercial operator shall establish in its manual a procedure whereby each pilot who has not flown over a route and into an airport within the preceding 60 days will certify on a form provided by the operator that he has studied and knows the subjects listed in paragraph (b) of this section in regard to the routes and airports into which he is to operate.

(b) Each qualifying pilot shall show that he has adequate knowledge of the following:

(1) Weather characteristics appropriate to the seasons.
(2) Navigation facilities.
(3) Communication procedures.
(4) Kinds of terrain and obstruction hazards.
(5) Minimum safe flight levels.
(6) Pertinent air traffic control procedures including terminal area, arrival, departure, and holding and all kinds of instrument approach procedures.
(7) Congested areas, obstruction, and physical layout of each airport in the terminal area in which the pilot will operate.

### § 121.447 Pilot route and airport qualifications for particular trips: Domestic and flag air carriers.

(a) A domestic or flag air carrier may not use a pilot as pilot in command unless, within the preceding 12 months, the pilot has made at least one trip as pilot or other member of a flight crew between terminals into which he is scheduled to fly and has complied with § 121.443(e), if applicable.

(b) To re-establish route and airport qualification after being absent from the route for a period of more than 12 months, a pilot must comply with the appropriate provisions of § 121.443.

### § 121.449 Proficiency checks: second in command.

(a) A certificate holder may not use a pilot as second in command unless he has satisfactorily shown to the Administrator or a check pilot that he is able to pilot and navigate airplanes that he is to fly and to perform his assigned duties. Thereafter, he may not serve as second in command unless each 12 months he satisfactorily completes a similar pilot proficiency check.

(b) If a pilot serves in more than one airplane type, at least each alternate check must be given in flight in the largest type of airplane in which he serves.

(c) The proficiency check must include at least an oral or written equipment test and the procedures and flight maneuvers specified in § 121.415(d)(1) (for domestic air carriers), or in § 121.415(d) (for other certificate holders). The check may be given from either the right or left pilot seat.

(d) After the initial check, satisfactory completion of an approved course of training in an aircraft simulator that meets the requirements of § 121.441(d) may be substituted at alternate 12-month intervals for the checks required by paragraphs (a) and (e) of this section. In addition, satisfactory completion of the proficiency check in accordance with § 121.441 (b), (c), and (d) meets the requirements of this section.

(e) For flag and supplemental air carriers and commercial operators, the proficiency check for the second in command of a required three-pilot crew is that set forth in § 121.441 (b), (c), and (d).

### § 121.451 Flight navigator qualification: flag and supplemental air carriers and commercial operators.

(a) No flag or supplemental air carrier or commercial operator may use a flight navigator unless, within the preceding 12-month period, he has had at least 50 hours of flight time as a flight navigator, or the air carrier or commercial operator or the Administrator has checked him (including a check in flight or in an approved synthetic trainer) and has determined that he is familiar with essential current navigation information pertaining to routes to be flown by him and that he is competent in the operating procedures and navigation equipment to be used.

(b) A flag or supplemental air carrier or commercial operator may check a flight navigator during a flight subject to this part, but it may not assign him as a required flight crewmember on that flight.

### § 121.453 Flight engineer qualification.

(a) No certificate holder may use a flight engineer unless, within the preceding six-month period, he has had at least 50 hours of flight time as a flight engineer on the type of airplane in which he is to serve, or the certificate holder or the Administrator has checked him (in a flight other than a flight under this Part) and has determined that he is familiar with all essential current information and operating procedures for the type of airplane to which he is assigned and is competent in that airplane.

(b) If a flight engineer has been previously qualified in the type of airplane in which he is to serve, the certificate holder may give the check in a synthetic trainer approved to simulate the necessary operating conditions in place of the flight check.

## Subpart P—Aircraft Dispatcher Qualifications and Duty Time Limitations: Domestic and Flag Air Carriers

### § 121.461 Applicability.

This subpart prescribes the qualifications and duty time limitations for aircraft dispatchers for domestic and flag air carriers.

### § 121.463 Aircraft dispatcher qualifications.

(a) No domestic or flag air carrier may use an aircraft dispatcher unless he meets the requirements in §§ 121.411 and 121.425.

(b) No domestic or flag air carrier may use a dispatcher to dispatch airplanes over any route or route segment unless the air carrier has determined that he is familiar with all essential operating procedures for the entire route and the airplanes to be used. However, a dispatcher who is qualified to dispatch airplanes over part of a route may dispatch airplanes after coordinating with dispatchers who are qualified to dispatch airplanes over the other parts of the route.

(c) No aircraft dispatcher may dispatch airplanes over any area in which he is authorized to exercise dispatch jurisdiction unless, within the preceding 12 months, he has made at least a one-way qualification trip over that area on the flight deck of an airplane. The trip must include entry into as many points as practicable; it is not necessary to make a flight over each route in the area.

### § 121.465 Duty time limitations: Domestic and flag air carriers.

(a) Each domestic and flag air carrier shall establish the daily duty period for a dispatcher so that it begins at a time that allows him to become thoroughly familiar with existing and anticipated weather conditions along the route before he dispatches any airplane. He shall remain on duty until each airplane dispatched by him has completed its flight, or has gone beyond his jurisdiction, or until he is relieved by another qualified dispatcher.

(b) Except in cases where circumstances or emergency conditions beyond the control of the air carrier require otherwise—

(1) No domestic or flag air carrier may schedule a dispatcher for more than 10 consecutive hours of duty;

(2) If a dispatcher is scheduled for more than 10 hours of duty in 24 consecutive hours, the carrier shall provide him a rest period of at least eight hours at or before the end of 10 hours of duty.

(3) Each dispatcher must be relieved of all duty with the air carrier for at least 24 consecutive hours during any seven consecutive days or the equivalent thereof within any month.

(c) Notwithstanding paragraphs (a) and (b) of this section, a flag air carrier may, if authorized by the Administrator, schedule an aircraft dispatcher at a duty station outside of the 48 contiguous States and the District of Columbia, for more than 10 consecutive hours of duty in a 24-hour period if that aircraft dispatcher is relieved of all duty with the carrier for at least eight hours during each 24-hour period.

## Subpart Q—Flight Time Limitations: Domestic Air Carriers

### § 121.470 Applicability.

This subpart prescribes flight time limitations for domestic air carriers.

### § 121.471 Flight time limitations: all flight crewmembers.

(a) No domestic air carrier may schedule any flight crewmember for duty aloft in scheduled air transportation or in other commercial flying if that crewmember's total flight time in all commercial flying will exceed:

(1) 1,000 hours in any year.
(2) 100 hours in any month.
(3) 30 hours in any seven consecutive days.

(b) No domestic air carrier may schedule a flight crewmember for duty aloft for more than eight hours during any 24 consecutive hours without a rest period at or before the end of that eight hours, equal to twice the number of hours of duty aloft since the last rest period, but not less than eight hours. However, in conducting a scheduled transcontinental nonstop flight, an air carrier may schedule a flight crewmember for more than eight but not more than 10 hours of continuous duty aloft without an intervening rest period, if—

(1) The flight is in an airplane with a pressurization system that is operative at the beginning of the flight;
(2) The flight crew consists of at least two pilots and a flight engineer.
(c) Each flight crewmember who has been on duty aloft for more than eight hours during any 24 consecutive hours must be given, upon completion of his assigned flight or series of flights, at least 16 hours of rest before being assigned to any duty with the air carrier.

(d) Each domestic air carrier shall relieve each flight crewmember engaged in scheduled air transportation from all further duty for at least 24 consecutive hours during any seven consecutive days.

(e) No domestic air carrier may assign any flight crewmember to any duty with the air carrier during any required rest period.

(f) Time spent in transportation, not local in character, that an air carrier requires of a flight crewmember and provides to transport the crewmember to an airport at which he is to serve on a flight as a crewmember, or from an airport at which he was relieved from duty to return to his home station, is not considered part of a rest period.

(g) A flight crewmember is not considered to be scheduled for duty in excess of flight time limitations if the flights to which he is assigned are scheduled and normally terminate within the limitations, but due to circumstances beyond the control of the air carrier (such as adverse weather conditions), are not at the time of departure expected to reach their destination within the scheduled time.

## Subpart R—Flight Time Limitations: Flag Air Carriers

### § 121.480 Applicability.

This subpart prescribes flight time limitations for flag air carriers.

### § 121.481 Flight time limitations: one or two pilot crews.

(a) A flag air carrier may schedule a pilot to fly in an airplane that has a crew of one or two pilots for eight hours or less during any 24 consecutive hours without a rest period during these eight hours.

(b) If a flag air carrier schedules a pilot to fly more than eight hours during any 24 consecutive hours, it shall give him an intervening rest period, at or before the end of eight scheduled hours of flight duty. This rest period must be at least twice the number of hours flown since the preceding rest period, but not less than eight hours. The air carrier shall relieve that pilot of all duty with it during that rest period.

(c) Each pilot who has flown more than eight hours during 24 consecutive hours must be given at least 18 hours of rest before being assigned to any duty with the air carrier.

(d) No pilot may fly more than 32 hours during any seven consecutive days, and each pilot must be relieved from all duty for at least 24 consecutive hours at least once during any seven consecutive days.

(e) No pilot may fly as a member of a crew more than 100 hours during any one month.

(f) No pilot may fly as a member of a crew more than 1,000 hours during any 12-month period.

### § 121.483 Flight time limitations: two pilots and one additional flight crewmember.

(a) No flag air carrier may schedule a pilot to fly, in an airplane that has a crew of two pilots and at least one additional flight crewmember, for a total of more than 12 hours during any 24 consecutive hours.

(b) If a pilot has flown 20 or more hours during any 48 consecutive hours or 24 or more hours during any 72 consecutive hours, he must be given at least 18 hours of rest before being assigned to any duty with the air carrier. In any case, he must be given at least 24 consecutive hours of rest during any seven consecutive days.

(c) No pilot may fly as a flight crewmember more than—

(1) 120 hours during any 30 consecutive days;
(2) 300 hours during any 90 consecutive days; or
(3) 1,000 hours during any 12-month period.

### § 121.485 Flight time limitations: three or more pilots and an additional flight crewmember.

(a) Each flag air carrier shall schedule its flight hours to provide adequate rest periods on the ground for each pilot who is away from his base and who is a pilot on an airplane that has a crew of three or more pilots and an additional flight crewmember. It shall also provide adequate sleeping quarters on the airplane whenever a pilot is scheduled to fly more than 12 hours during any 24 consecutive hours.

(b) The flag air carrier shall give each pilot, upon return to his base from any flight or series of flights, a rest period that is at least twice the total number of hours he flew since the last rest period at his base. During the rest period required by this paragraph, the air carrier may not require him to perform any duty for it. If the required rest period is more than seven days, that part of the rest period in excess of seven days may be given at any time before the pilot is again scheduled for flight duty on any route.

(c) No pilot may fly as a flight crewmember more than—

(1) 350 hours during any 90 consecutive days; or
(2) 1,000 hours during any 12-month period.

### § 121.487 Flight time limitations: pilots not regularly assigned.

(a) Except as provided in paragraphs (b) through (e) of this section, a pilot who is not regularly assigned as a flight crewmember for an entire month under § 121.483 or 121.485 may not fly more than 100 hours in any 30 consecutive days.

(b) The flight time limitations for a pilot who is scheduled for duty aloft for more than 20 hours in two-pilot crews in any month, or whose assignment in such a crew is interrupted more than once in that month by assignment to a crew consisting of two or more pilots and an additional flight crewmember, are those set forth in § 121.481.

(c) Except for a pilot covered by paragraph (b) of this section, the flight time limitations for a pilot who is scheduled for duty aloft for more than 20 hours in two-pilot and additional flight crewmember crews in any month, or whose

assignment in such a crew is interrupted more than once in that month by assignment to a crew consisting of three pilots and additional flight crewmember, are those set forth in § 121.483.

(d) The flight time limitations for a pilot to whom paragraphs (b) and (c) of this section do not apply and who is scheduled for duty aloft for a total of not more than 20 hours within any month in two-pilot crews (with or without additional flight crewmembers) are those set forth in § 121.485.

(e) The flight time limitations for a pilot assigned to each of two-pilot, two-pilot and additional flight crewmember, and three-pilot and additional flight crewmember crews in a given month, and who is not subject to paragraph (b), (c), or (d) of this section, are those set forth in § 121.483.

**§ 121.489 Flight time limitations: other commercial flying.**

No pilot that is employed as a pilot by a flag air carrier may do any other commercial flying if that commercial flying plus his flying in air transportation will exceed any flight time limitation in this part.

**§ 121.491 Flight time limitations: deadhead transportation.**

Time spent in deadhead transportation to or from duty assignment is not considered to be a part of a rest period.

**§ 121.493 Flight time limitations: flight engineers and flight navigators.**

(a) In any operation in which one flight engineer or flight navigator is required, the flight time limitations in § 121.483 apply to that flight engineer or flight navigator.

(b) In any operation in which more than one flight engineer or flight navigator is required, the flight time limitations in § 121.485 apply to those flight engineers or flight navigators.

## Subpart S—Flight Time Limitations: Supplemental Air Carriers and Commercial Operators

**§ 121.500 Applicability.**

This section prescribes flight time limitations for supplemental air carriers and commercial operators.

**§ 121.501 Flight time limitations: helicopters.**

No supplemental air carrier or commercial operator may schedule a flight crewmember for duty aloft in helicopter operations subject to this part, or in any other commercial flying, that would exceed the flight time limitations prescribed in § 127.191.

**§ 121.503 Flight time limitations: pilots: airplanes.**

(a) A supplemental air carrier or commercial operator may schedule a pilot to fly in an airplane for eight hours or less during any 24 consecutive hours without a rest period during those eight hours.

(b) Each pilot who has flown more than eight hours during any 24 consecutive hours must be given at least 16 hours of rest before being assigned to any duty with the air carrier or commercial operator.

(c) Each supplemental air carrier and commercial operator shall relieve each pilot from all duty for at least 24 consecutive hours at least once during any seven consecutive days.

(d) No pilot may fly as a crewmember in air carrier service more than 100 hours during any 30 consecutive days.

(e) No pilot may fly as a crewmember in air carrier service more than 1,000 hours during any calendar year.

(f) Notwithstanding paragraph (a) of this section, an air carrier may, in conducting a transcontinental nonstop flight, schedule a flight crewmember for more than eight but not more than 10 hours of continuous duty aloft without an intervening rest period, if—

(1) The flight is in an airplane with a pressurization system that is operative at the beginning of the flight;

(2) The Flight crew consists of at least two pilots and a flight engineer; and

(3) The air carrier uses, in conducting the operation, an air/ground communication service that is independent of systems operated by the United States, and a dispatch organization, both of which are approved by the Administrator as adequate to serve the terminal points concerned.

**§ 121.505 Flight time limitations: two pilot crews: airplanes.**

(a) If a supplemental air carrier or commercial operator schedules a pilot to fly more than eight hours during any 24 consecutive hours, it shall give him an intervening rest period at or before the end of eight scheduled hours of flight duty. This rest period must be at least twice the number of hours flown since the preceding rest period, but not less than eight hours. The supplemental air carrier or commercial operator shall relieve that pilot of all duty with it during that rest period.

(b) No pilot of an airplane that has a crew of two pilots may be on duty for more than 16 hours during any 24 consecutive hours.

**§ 121.507 Flight time limitations: three pilot crews: airplanes.**

(a) No supplemental air carrier or commercial operator may schedule a pilot—

(1) For flight deck duty in an airplane that has a crew of three pilots for more than eight hours in any 24 consecutive hours; or

(2) To be aloft in an airplane that has a crew of three pilot for more than 12 hours in any 24 consecutive hours.

(b) No pilot of an airplane that has a crew of three pilots may be on duty for more than 18 hours in any 24 consecutive hours.

**§ 121.509 Flight time limitations: four pilot crews: airplanes.**

(a) No supplemental air carrier or commercial operator may schedule a pilot—

(1) For flight deck duty in an airplane that has a crew of four pilots for more than eight hours in any 24 consecutive hours; or

(2) To be aloft in an airplane that has a crew of four pilots for more than 16 hours in any 24 consecutive hours.

(b) No pilot of an airplane that has a crew of four pilots may be on duty for more than 20 hours in any 24 consecutive hours.

**§ 121.511 Flight time limitations: flight engineers: airplanes.**

(a) In any operation in which one flight engineer is serving the flight time limitations in §§ 121.503 and 121.505 apply to that flight engineer.

(b) In any operation in which more than one flight engineer is serving and the flight crew contains more than two pilots the flight time limitations in § 121.509 apply in place of those in § 121.505.

**§ 121.513 Flight time limitations: overseas and international operations: airplanes.**

In place of the flight time limitations in §§ 121.503 through 121.511, a supplemental air carrier or commercial operator may elect to comply with the flight time limitations of §§ 121.515 and 121.521 through 121.525 for operations conducted—

(a) Between a place in the 48 contiguous States and the District of Columbia, or Alaska, and any place outside thereof;

(b) Between any two places outside the 48 contiguous States, the District of Columbia, and Alaska; or

(c) Between two places within the State of Alaska or the State of Hawaii.

**§ 121.515 Flight time limitations: all airmen: airplanes.**

No airman may be aloft as a flight crewmember more than 1,000 hours in any 12-month period.

**§ 121.517 Flight time limitations: other commercial flying: airplanes.**

No airman who is employed by a supplemental air carrier or commercial operator may do any other commercial flying, if that commercial flying plus his flying in operations under this part will exceed any flight time limitation in this part.

**§ 121.519 Flight time limitations: deadhead transportation: airplanes.**

Time spent by an airman in deadhead transportation to or from a duty assignment is not considered to be part of any rest period.

**§ 121.521 Flight time limitations: crew of two pilots and one additional airman as required.**

(a) No supplemental air carrier or commercial operator may schedule an airman to be aloft as a member of the flight crew in an airplane that has a crew of two pilots and at least one additional crewmember for more than 12 hours during any 24 consecutive hours.

(b) If an airman has been aloft as a member of a flight crew for 20 or more hours during any 48 consecutive hours or 24 or more hours during any 72 consecutive hours, he must be given at least 18 hours of rest before being assigned to any duty with the air carrier or commercial operator. In any case, he must be relieved of all duty for at least 24 consecutive hours during any seven consecutive days.

(c) No airman may be aloft as a flight crewmember more than—

(1) 120 hours during any 30 consecutive days; or

(2) 300 hours during any 90 consecutive days.

**§ 121.523 Flight time limitations: crew of three or more pilots and additional airmen as required.**

(a) No supplemental air carrier or commercial operator may schedule an airman for flight deck duty as a flight engineer, or navigator in a crew of three or more pilots and additional airmen for a total of more than 12 hours during any 24 consecutive hours.

(b) Each supplemental air carrier and commercial operator shall schedule its flight hours to provide adequate rest periods on the ground for each airman who is away from his principal operations base. It shall also provide adequate sleeping quarters on the airplane whenever an airman is scheduled to be aloft as a flight crewmember for more than 12 hours during any 24 consecutive hours.

(c) No supplemental air carrier or commercial operator may schedule any flight crewmember to be on continuous duty for more than 30 hours. Such a crewmember is considered to be on continuous duty from the time he reports for duty until the time he is released from duty for a rest period of at least 10 hours on the ground. If a flight crewmember is on continuous duty for more than 24 hours (whether scheduled or not) duty any scheduled duty period, he must be given at least 16 hours for rest on the ground after completing the last flight scheduled for that scheduled duty period before being assigned any further flight duty.

(d) If a flight crewmember is required to engage in deadhead transportation for more than four hours before beginning flight duty, one half of the time spent in deadhead transportation must be treated as duty time for the purpose of complying with duty time limitations, unless he is given at least 10 hours of rest on the ground before being assigned to flight duty.

(e) Each supplemental air carrier and commercial operator shall give each airman, upon return to his operations base from any flight or series of flights, a rest period that is at least twice the total number of hours he was aloft as a flight crewmember since the last rest period at his base, before assigning him to any further duty. If the required rest period is more than seven days, that part of the rest period that is more than seven days may be given at any time before the pilot is again scheduled for flight duty.

(f) No airman may be aloft as a flight crewmember for more than 350 hours in any 90 consecutive days.

**§ 121.525 Flight time limitations: pilots serving in more than one kind of flight crew.**

(a) This section applies to each pilot assigned during any 30 consecutive days to more than one type of flight crew.

(b) The flight time limitations for a pilot who is scheduled for duty aloft for more than 20 hours in two-pilot crews in 30 consecutive days, or whose assignment in such a crew is interrupted more than once in any 30 consecutive days by assignment to a crew of two or more pilots and an additional flight crewmember, are those listed in §§ 121.503 through 121.509, as appropriate.

(c) Except for a pilot covered by paragraph (b) of this section, the flight time limitations for a pilot scheduled for duty aloft for more than 20 hours in two-pilot and additional flight crewmember crews in 30 consecutive days or whose assignment in such a crew is interrupted more than once in any 30 consecutive days by assignment to a crew consisting of three pilots and an additional flight crewmember, are those set forth in § 121.521.

(d) The flight time limitations for a pilot to whom paragraphs (b) and (c) of this section do not apply, and who is scheduled for duty aloft for a total of not more than 20 hours within 30 consecutive days in two-pilot crews (with or without additional flight crewmembers) are those set forth in § 121.523.

(e) The flight time limitations for a pilot assigned to each of two-pilot, two-pilot and additional flight crewmember, and three-pilot and additional flight crewmember crews in 30 consecutive days, and who is not subject to paragraph (b), (c), or (d) of this section, are those listed in § 121.523.

## Subpart T—Flight Operations

**§ 121.531 Applicability.**

This subpart prescribes requirements for flight operations applicable to all certificate holders, except where otherwise specified.

**§ 121.533 Responsibility for operational control: domestic air carriers.**

(a) Each domestic air carrier is responsible for operational control.

(b) The pilot in command and the aircraft dispatcher are jointly responsible for the preflight planning, delay, and dispatch release of a flight in compliance with this chapter and operations specifications.

(c) The aircraft dispatcher is responsible for—

(1) Monitoring the progress of each flight;

(2) Issuing necessary information for the safety of the flight;

(3) Cancelling or redispatching a flight if, in his opinion or the opinion of the pilot in command, the flight cannot operate or continue to operate safely as planned or released.

(d) Each pilot in command of an aircraft is, during flight time, in command of the aircraft and crew and is responsible for the safety of the passengers, crewmembers, cargo, and airplane.

(e) Each pilot in command has full control and authority in the operation of the aircraft, without limitation, over other crewmembers and their duties during flight time, whether or not he holds valid certificates authorizing him to perform the duties of those crewmembers.

(f) No pilot may operate an aircraft in a careless or reckless manner so as to endanger life or property.

**§ 121.535 Responsibility for operational control: flag air carriers.**

(a) Each flag air carrier is responsible for operational control.

(b) The pilot in command and the aircraft dispatcher are jointly responsible for the preflight planning, delay, and dispatch release of a flight in compliance with this chapter and operations specifications.

(c) The aircraft dispatcher is responsible for—

(1) Monitoring the progress of each flight;

(2) Issuing necessary instructions and information for the safety of the flight; and

(3) Cancelling or redispatching a flight if, in his opinion or the opinion of the pilot in command, the flight cannot operate or continue to operate safely as planned or released.

(d) Each pilot in command of an aircraft is, during flight time, in command of the aircraft and crew and is responsible for the safety of the passengers, crewmembers, cargo, and airplane.

(e) Each pilot in command has full control and authority in the operation of the aircraft, without limitation, over other crewmembers and their duties during flight time, whether or not he holds valid certificates authorizing him to perform the duties of those crewmembers.

(f) No pilot may operate an aircraft in a careless or reckless manner so as to endanger life or property.

**§ 121.537 Responsibility for operational control: supplemental air carriers and commercial operators.**

(a) Each supplemental air carrier and commercial operator—

(1) Is responsible for operational control; and

(2) Shall list each person authorized by it to exercise operational control in its operator's manual.

(b) The pilot in command and the director of operations are jointly responsible for the initiation, continuation, diversion, and termination of a flight in compliance with this chapter and the operations specifications. The director of operations may delegate the functions for the initiation, continuation, diversion, and termination of a flight but he may not delegate the responsibility for those functions.

(c) The director of operations is responsible for canceling, diverting, or delaying a flight if in his opinion or the opinion of the pilot in command the flight cannot operate or continue to operate safely as planned or released. The director of operations is responsible for assuring that each flight is monitored with respect to at least the following:

(1) Departure of the flight from the place of origin and arrival at the place of destination, including intermediate stops and any diversions therefrom.

(2) Maintenance and mechanical delays encountered at places of origin and destination and intermediate stops.

(3) Any known conditions that may adversely affect the safety of flight.

(d) Each pilot in command of an aircraft is, during flight time, in command of the aircraft and crew and is responsi-

ble for the safety of the passengers, crewmembers, cargo, and aircraft. The pilot in command has full control and authority in the operation of the aircraft, without limitation, over other crewmembers and their duties during flight time, whether or not he holds valid certificates authorizing him to perform the duties of those crewmembers.

(e) Each pilot in command of an aircraft is responsible for the preflight planning and the operation of the flight in compliance with this chapter and the operations specifications.

(f) No pilot may operate an aircraft in a careless or reckless manner, so as to endanger life or property.

**§ 121.539 Operations notices.**

Each certificate holder shall notify its appropriate operations personnel of each change in equipment and operating procedures, including each known change in the use of navigation aids, airports, air traffic control procedures and regulations, local airport traffic control rules, and known hazards to flight, including icing and other potentially hazardous meteorological conditions and irregularities in ground and navigation facilities.

**§ 121.541 Operations schedules: domestic and flag air carriers.**

In establishing flight operations schedules, each domestic and flag air carrier shall allow enough time for the proper servicing of aircraft at intermediate stops, and shall consider the prevailing winds en route and the cruising speed of the type of aircraft used. This cruising speed may not be more than that resulting from the specified cruising output of the engines.

**§ 121.543 Flight crewmembers at controls.**

Each required flight crewmember on flight deck duty shall remain at his station while the aircraft is taking off or landing, and while it is en route unless the absence of one member is necessary for the performance of duties in connection with the operation of the airplane. Each flight crewmember shall keep his seat belt fastened when at his station.

**§ 121.545 Manipulation of controls.**

No person may manipulate the flight controls of an aircraft during flight unless he is—

(a) A qualified pilot of the certificate holder operating that aircraft.

(b) An authorized pilot safety representative of the Administrator or of the Civil Aeronautics Board who has the permission of the pilot in command, is qualified in the aircraft, and is checking flight operations; or

(c) A pilot of another certificate holder who has the permission of the pilot in command, is qualified in the aircraft, and is authorized by the certificate holder operating the aircraft.

**§ 121.547 Admission to flight deck.**

(a) No person may admit any person to the flight deck of an aircraft unless the person being admitted is—

(1) A crewmember;

(2) An FAA air carrier inspector, or an authorized representative of the Civil Aeronautics Board, who is performing official duties;

(3) An employee of the United States, a certificate holder, or an aeronautical enterprise who has the permission of the pilot in command and whose duties are such that admission to the flight deck is necessary or advantageous for safe operations; or

(4) Any person who has the permission of the pilot in command and is specifically authorized by the certificate holder management and by the Administrator.

Subparagraph (2) of this paragraph does not limit the emergency authority of the pilot in command to exclude any person from the flight deck in the interests of safety.

(b) For the purposes of paragraph (a) (3) of this section, employees of the United States who deal responsibly with matters relating to safety and employees of the certificate holder whose efficiency would be increased by familiarity with flight conditions, may be admitted by the certificate holder. However, the certificate holder may not admit employees of traffic, sales, or other departments that are not directly related to flight operations, unless they are eligible under paragraph (a) (4) of this section.

(c) No person may admit any person to the flight deck unless there is a seat available for his use in the passenger compartment, except—

(1) An FAA air carrier inspector or an authorized representative of the Administrator or Civil Aeronautics Board who is checking or observing flight operations;

(2) An air traffic controller who is authorized by the Administrator to observe ATC procedures;

(3) A certificated airman employed by the certificate holder whose duties require an airman certificate;

(4) A certificated airman employed by another certificate holder whose duties with that carrier require an airman certificate and who is authorized by the certificate holder operating the aircraft to make specific trips over a route;

(5) An employee of the certificate holder operating the aircraft whose duty is directly related to the conduct or planning of flight operations or the in-flight monitoring of aircraft equipment or operating procedures, if his presence on the flight deck is necessary to perform his duties and he has been authorized in writing by a responsible supervisor, listed in the Operations Manual as having that authority; and

(6) A technical representative of the manufacturer of the aircraft or its components whose duties are directly related to the in-flight monitoring of aircraft equipment or operating procedures, if his presence on the flight deck is necessary to perform his duties, and he has been authorized in writing by the Administrator and by a responsible supervisor of the operations department of the certificate holder, listed in the Operations Manual as having that authority.

**§ 121.548 Air carrier inspector's credentials: admission to pilot's compartment.**

Whenever, in performing his duties of conducting an inspection, an inspector of the Federal Aviation Agency presents his credential Form FAA 110A "Air Carrier Inspector's Credential" to the pilot in command of an aircraft operated by an air carrier or commercial operator, he must be given free and uninterrupted access to the pilot's compartment of that aircraft.

**§ 121.549 Flying equipment.**

(a) The pilot in command shall ensure that appropriate aeronautical charts containing adequate information concerning navigation aids and instrument approach procedures are aboard the aircraft for each flight.

(b) Each crewmember shall, on each flight, have readily available for his use a flashlight that is in good working order.

**§ 121.551 Restriction or suspension of operation: domestic and flag air carriers.**

When a domestic or flag air carrier knows of conditions, including airport and runway conditions, that are a hazard to safe operations, it shall restrict or suspend operations until those conditions are corrected.

**§ 121.553 Restriction or suspension of operation: supplemental air carriers and commercial operators.**

When a supplemental air carrier, commercial operator, or pilot in command knows of conditions, including airport and runway conditions, that are a hazard to safe operations, the air carrier, commercial operator, or pilot in command, as the case may be, shall restrict or suspend operations until those conditions are corrected.

**§ 121.555 Compliance with approved routes and limitations: domestic and flag air carriers.**

No pilot may operate an airplane in scheduled air transportation—

(a) Over any route or route segment unless it is specified in the domestic or flag air carrier's operations specifications; or

(b) Other than in accordance with the limitations in the operations specifications.

**§ 121.557 Emergencies: domestic and flag air carriers.**

(a) In an emergency situation that requires immediate decision and action the pilot in command may take any action that he considers necessary under the circumstances. In such a case he may deviate from prescribed operations procedures and methods, weather minimums, and this chapter, to the extent required in the interests of safety.

(b) In an emergency situation arising during flight that requires immediate decision and action by an aircraft dispatcher, and that is known to him, the aircraft dispatcher shall advise the pilot in command of the emergency, shall ascertain the decision of the pilot in command, and shall have the decision recorded. If the aircraft dispatcher cannot communicate with the pilot, he shall declare an emergency and take any action that he considers necessary under the circumstances.

(c) Whenever a pilot in command or dispatcher exercises emergency authority, he shall keep the appropriate ATC facility and dispatch centers fully informed of the progress of the flight. The person declaring the emergency shall send a written report of any deviation through the air carrier's operations manager, to the Administrator. A dispatcher shall send his report within 10 days after the date of the emergency, and a pilot in command shall send his report within 10 days after returning to his home base.

**§ 121.559 Emergencies: supplemental air carriers and commercial operators.**

(a) In an emergency situation that requires immediate decision and action, the pilot in command may take any action that he considers necessary under the circumstances. In such a case, he may deviate from prescribed operations, procedures and methods, weather minimums, and this chapter, to the extent required in the interests of safety.

(b) In an emergency situation arising during flight that requires immediate decision and action by appropriate management personnel in the case of operations conducted with a flight following service and which is known to them, those personnel shall advise the pilot in command of the emergency, shall ascertain the decision of the pilot in command, and shall have the decision recorded. If they cannot communicate with the pilot, they shall declare an emergency and take any action that they consider necessary under the circumstances.

(c) Whenever emergency authority is exercised, the pilot in command or the appropriate management personnel shall keep the appropriate ground radio station fully informed of the progress of the flight. The person declaring the emergency shall send a written report of any deviation, through the air carrier's or commercial operator's director of operations, to the Administrator within 10 days after the flight is completed or, in the case of operations outside the United States, upon return to the home base.

**§ 121.561 Reporting potentially hazardous meteorological conditions and irregularities of ground and navigation facilities.**

(a) Whenever he encounters a meteorological condition or an irregularity in a ground or navigational facility, in flight, the knowledge of which he considers essential to the safety of other flights, the pilot in command shall notify an appropriate ground station as soon as practicable.

(b) The ground radio station that is notified under paragraph (a) of this section shall report the information to the agency directly responsible for operating the facility.

**§ 121.563 Reporting mechanical irregularities.**

The pilot in command shall enter or have entered in the maintenance log of the airplane each mechanical irregularity that comes to his attention during flight time. Before each flight, he shall ascertain the status of each irregularity entered in the log at the end of the preceding flight.

**§ 121.565 Engine inoperative; landing; reporting.**

(a) Except as provided in paragraph (b) of this section, whenever an engine of an airplane fails or whenever the rotation of an engine is stopped to prevent possible damage, the pilot in command shall land the airplane at the nearest suitable airport, in point of time, at which a safe landing can be made.

(b) If not more than one engine of an airplane that has three or more engines fails or its rotation is stopped, the pilot in command may proceed to an airport that he selects if, after considering the following, he decides that proceeding to that airport is as safe as landing at the nearest suitable airport:

(1) The nature of the malfunction and the possible mechanical difficulties that may occur if flight is continued.

(2) The altitude, weight, and usable fuel at the time of engine stoppage.

(3) The weather conditions en route and at possible landing points.

(4) The air traffic congestion.

(5) The kind of terrain.

(6) His familiarity with the airport to be used.

(c) The pilot in command shall report each stoppage of engine rotation in flight to the appropriate ground radio station as soon as practicable and shall keep that station fully informed of the progress of the flight.

(d) If the pilot in command lands at an airport other than the nearest suitable airport, in point of time, he shall (upon completing the trip) send a written report, in duplicate, to his operations manager, (or director of operations in the case of a supplemental air carrier or commercial operator) stating his reasons for determining that his selection of an airport, other than the nearest airport, was as safe a course of action as landing at the nearest suitable airport. The operations manager or director of operations shall, within 10 days after the pilot returns to his home base, send a copy of this report with his comments to the FAA Air Carrier District Office charged with the overall inspection of the air carrier's operations.

**§ 121.567 Instrument approach procedures and IFR landing minimums.**

No person may make an instrument approach at an airport except in accordance with IFR weather minimums and instrument approach procedures set forth in the certificate holder's operations specifications.

**§ 121.569 Equipment interchange: domestic and flag air carriers.**

(a) Before operating under an interchange agreement, each domestic and flag air carrier shall show that—

(1) The procedures for the interchange operation conform with this chapter and with safe operating practices;

(2) Required crewmembers and dispatchers meet approved training requirements for the airplanes and equipment to be used and are familiar with the communications and dispatch procedures to be used;

(3) Maintenance personnel meet training requirements for the airplanes and equipment, and are familiar with the maintenance procedures to be used;

(4) Flight crewmembers and dispatchers meet appropriate route and airport qualifications; and

(5) The airplanes to be operated are essentially similar to the airplanes of the air carrier with whom the interchange is effected with respect to the arrangement of flight instruments and the arrangement and motion of controls that are critical to safety unless the Administrator determines that the air carrier has adequate training programs to insure that any potentially hazardous dissimilarities are safely overcome by flight crew familiarization.

(b) Each domestic and flag air carrier shall include the pertinent provisions and procedures involved in the equipment interchange agreement in its manuals.

**§ 121.571 Briefing passengers: extended overwater flights.**

(a) Each certificate holder operating an airplane in extended overwater operations shall ensure that all passengers are orally briefed on—

(1) The location and operation of emergency exists;

(2) The location and operation of life preservers, including a demonstration of donning and inflating a life preserver; and

(3) The location of life rafts.

(b) The certificate holder shall describe the procedure to be followed in the briefing in its manual.

(c) If the airplane proceeds directly over water after takeoff, the briefing on locations of life preservers and emergency exists must be done before takeoff, and the rest of the briefing must be done as soon as practicable after takeoff.

(d) If the airplane does not proceed directly over water after takeoff, no part of the briefing has to be given before takeoff but the entire briefing must be given before reaching the over water part of the flight.

**§ 121.573 Briefing passengers before takeoff: supplemental air carriers and commercial operators.**

Before each takeoff, each supplemental air carrier or commercial operator operating an airplane carrying passengers shall ensure that each passenger is orally briefed on—

(a) Smoking;

(b) The use of seat belts;

(c) The location and operation of emergency exits; and

(d) The emergency evacuation procedures to be used in an emergency evacuation of the airplane.

**§ 121.575 Alcoholic beverages.**

(a) No person may drink any alcoholic beverage aboard an aircraft unless the certificate holder operating the aircraft has served that beverage to him.

(b) No certificate holder may serve any alcoholic beverage to any person aboard any of its aircraft if that person appears to be intoxicated.

(c) No certificate holder may allow any person to board any of its aircraft if that person appears to be intoxicated.

(d) Each certificate holder shall, within five days after the incident, report to the Administrator the refusal of any person to comply with paragraph (a) of this section, or of any disturbance caused by a person who appears to be intoxicated aboard any of its aircraft.

**§ 121.579 Minimum altitudes for use of automatic pilot.**

(a) *En route operations.* Except as provided in paragraph (b) of this section, no person may use an automatic pilot en route, including climb and descent, at an altitude above the terrain that is less than twice the maximum altitude loss specified in the Airplane Flight Manual for a malfunction of the automatic pilot under cruise conditions, or less than 500 feet, whichever is higher.

(b) *Approaches.* When using an instrument approach facility, no person may use an automatic pilot at an altitude above the terrain that is less than twice the maximum altitude loss specified in the Airplane Flight Manual for a malfunction of the automatic pilot under approach conditions, or less than 50 feet below the approved minimum ceiling for the facility, whichever is higher, except—

(1) When reported weather conditions are less than the basic VFR weather conditions in § 91.105 of this chapter, no person may use an automatic pilot with an approach coupler for ILS approaches at an altitude above the terrain that is less than 50 feet higher than the maximum altitude loss specified in the Airplane Flight Manual for the malfunction of the automatic pilot with approach coupler under approach conditions; and

(2) When reported weather conditions are equal to or better than the basic VFR minimums in § 91.105 of this chapter, no person may use an automatic pilot with an approach coupler for ILS approaches at an altitude above the terrain that is less than the maximum altitude loss specified in the Airplane Flight Manual for the malfunction of the automatic pilot with approach coupler under approach conditions, or 50 feet, whichever is higher.

**§ 121.581 Forward observer's seat; en route inspections: air carriers.**

(a) Each air carrier shall make available a seat on the flight deck of each airplane, used by it in air transportation, for occupancy by the Administrator while conducting en route inspections. The location and equipment of the seat, with respect to its suitability for use in conducting en route inspections, is determined by the Administrator.

(b) In each airplane that has more than one observer's seat, in addition to the seats required for the crew complement for which the airplane was certificated, the forward observer's seat must be made available to the Administrator.

**§ 121.583 Carriage of persons aboard airplane in cargo-only operations all-cargo aircraft.**

(a) When authorized by the certificate holder operating the airplane, any of the following persons may be carried aboard an airplane engaged in the carriage of cargo only, without complying with the passenger-carrying or passenger-service airplane requirements of this chapter:

(1) Any person performing a specific duty assignment aboard the airplane in connection with the safety of the flight, the safe carriage of animals, or the safe carriage of radioactive materials as prescribed in §§ 103.1, 103.5, and 103.21 of this chapter.

(2) Any person traveling to or from a duty assignment described in subparagraph (1) of this paragraph, in any case in which the certificate holder finds that other means of transportation are not practicable.

(3) Any person performing duty as a security or honor guard aboard an airplane for shipments made by or under the authority of the United States.

(4) Any military courier, military route supervisor, or flight crewmembers of any military cargo contract air carrier or commercial operator, when operating under a military cargo contract and specifically authorized by the appropriate armed forces.

(5) Any employee of the certificate holder and his dependents when traveling on company business to or from outlying stations not served by adequate regular passenger flights.

(b) Whenever any person covered by paragraph (a)(5) of this section is carried on the airplane, the cargo must be loaded in such a manner that it does not obstruct access to the pilot compartment, or appropriate regular or emergency exits. In addition, for extended overwater flights, or for flights over uninhabited terrain, there must be on the airplane emergency and survival equipment adequate for the particular operation. Procedures for the safe carriage of company employees and their dependents must be incorporated into the air carrier's or commercial operator's operations manual.

(c) The certificate holder must have an approved seat with a safety belt for each person covered by paragraph (a) of this section. The seat must be located so that the occupant is not in any position to interfere with the flight crewmembers in performing their duties.

(d) The pilot in command may authorize any person covered by paragraph (a) of this section to be admitted to the flight deck of the airplane.

**§ 121.585 Prohibition against carriage of weapons.**

No person may, while aboard an airplane being operated by an air carrier in air transportation, carry on or about his person a deadly or dangerous weapon, either concealed or unconcealed. This paragraph does not apply to—

(a) Officials or employees of a municipality or a State, or of the United States, who are authorized to carry arms; and

(b) Crewmembers and other persons authorized by the air carrier to carry arms.

**§ 121.587 Closing and locking of flight crew compartment door.**

(a) Except as provided in paragraph (b) of this section, the pilot in command of a large airplane carrying passengers shall ensure that the door separating the flight crew compartment from the passenger compartment is closed and locked during flight.

(b) The provisions of paragraph (a) of this section do not apply—

(1) During takeoff and landing if the crew compartment door is the means of access to a required passenger emergency exit; or

(2) At any time that it is necessary to provide access to the flight crew or passenger compartment, to a crewmember in the performance of his duties or for a person authorized admission to the flight crew compartment under § 121.547.

## Subpart U—Dispatching and Flight Release Rules

**§ 121.591 Applicability.**

This subpart prescribes dispatching rules for domestic and flag air carriers and flight release rules for supplemental air carriers and commercial operators.

**§ 121.593 Dispatching authority: domestic air carriers.**

Except when an airplane lands at an intermediate airport specified in the original dispatch release and remains there for not more than one hour, no person may start a flight unless an aircraft dispatcher specifically authorizes that flight.

**§ 121.595 Dispatching authority: flag air carriers.**

(a) No person may start a flight unless an aircraft dispatcher specifically authorizes that flight.

(b) No person may continue a flight from an intermediate airport without redispatch if the airplane has been on the ground more than six hours.

**§ 121.597 Flight release authority: supplemental air carriers and commercial operators.**

(a) No person may start a flight under a flight following system without specific authority from the person authorized by the operator to exercise operational control over the flight.

(b) No person may start a flight unless the pilot in command has executed a flight release setting forth the conditions under which the flight will be conducted. The pilot in command may sign the flight release only when he and the person authorized by the operator to exercise operational control believe that the flight can be made with safety.

(c) No person may continue a flight from an intermediate airport without a new flight release if the aircraft has been on the ground more than six hours.

**§ 121.599 Familiarity with weather conditions.**

(a) *Domestic and flag air carriers.* No aircraft dispatcher may release a flight unless he is thoroughly familiar with reported and forecast weather conditions on the route to be flown.

(b) *Supplemental air carriers and commercial operators.* No pilot in command may begin a flight unless he is thoroughly familiar with reported and forecast weather conditions on the route to be flown.

**§ 121.601 Aircraft dispatcher information to pilot in command: domestic and flag air carriers.**

(a) The aircraft dispatcher shall provide the pilot in command all available current reports or information on airport conditions and irregularities of navigation facilities that may affect the safety of the flight.

(b) During a flight, the aircraft dispatcher shall provide the pilot in command any additional available information of meteorological conditions and irregularities of facilities and services that may affect the safety of the flight.

**§ 121.603 Facilities and services: supplemental air carriers and commercial operators.**

(a) Before beginning a flight, each pilot in command shall obtain all available current reports or information on airport conditions and irregularities of navigation facilities that may affect the safety of the flight.

(b) During a flight, the pilot in command shall obtain any additional available information of meteorological conditions and irregularities of facilities and services that may affect the safety of the flight.

**§ 121.605 Airplane equipment.**

No person may dispatch or release an airplane unless it is airworthy and is equipped as prescribed in § 121.303.

**§ 121.607 Communication and navigation facilities: domestic and flag air carriers.**

(a) Except as provided in paragraph (b) of this section for flag air carriers, no person may dispatch an airplane over an approved route or route segment unless the communication and navigation facilities required by §§ 121.99 and 121.103 for the approval of that route or segment are in satisfactory operating condition.

(b) If, because of technical reasons or other reasons beyond the control of a flag air carrier, the facilities required by §§ 121.99 and 121.103 are not available over a route or route segment outside the United States, the air carrier may dispatch an airplane over that route or route segment if the pilot in command and dispatcher find that communication and navigation facilities equal to those required are available and are in satisfactory operating condition.

**§ 121.609 Communication and navigation facilities: supplemental air carriers and commercial operators.**

No person may release an aircraft over any route or route segment unless communication and navigation facilities equal to those required by § 121.121 are in satisfactory operating condition.

**§ 121.611 Dispatch or flight release under VFR.**

No person may dispatch or release an aircraft for VFR operation unless the ceiling and visibility en route, as indicated by available weather reports or forecasts, or any combination thereof, are and will remain at or above applicable VFR minimums until the aircraft arrives at the airport or airports specified in the dispatch or flight release.

**§ 121.613 Dispatch or flight release under IFR or over the top.**

Except as provided in § 121.615, no person may dispatch or release an aircraft for operations under IFR or over-the-top, unless appropriate weather reports or forecasts, or any combination thereof, indicate that the ceilings and visibilities will be at or above the authorized minimums at the estimated time of arrival at the airport or airports to which dispatched or released.

**§ 121.615 Dispatch or flight release over water: flag and supplemental air carriers and commercial operators.**

(a) No person may dispatch or release an aircraft for a flight that involves extended overwater operation unless appropriate weather reports or forecasts, or any combination thereof, indicate that the ceilings and visibilities will be at or above the authorized minimums at the estimated time of arrival at any airport to which dispatched or released or to any required alternate airport.

(c) Each flag and supplemental air carrier and commercial operator shall conduct extended overwater operations under IFR unless it shows that operating under IFR is not necessary for safety.

(d) Each flag and supplemental air carrier and commercial operator shall conduct other overwater operations under IFR if the Administrator determines that operation under IFR is necessary for safety.

(e) Each authorization to conduct extended overwater operations under VFR and each requirement to conduct other overwater operations under IFR will be specified in the air carrier's or commercial operator's operations specifications.

**§ 121.617 Alternate airport for departure.**

(a) If the weather conditions at the airport of takeoff are below the landing minimums in the certificate holder's operations specifications for that airport, no person may dispatch or release an aircraft from that airport unless the dispatch or flight release specifies an alternate airport located within the following distances from the airport of takeoff.

(1) *Aircraft having two engines.* Not more than one hour from the departure airport at normal cruising speed in still air with one engine inoperative.

(2) *Aircraft having three or more engines.* Not more than two hours from the departure airport at normal cruising speed in still air with one engine inoperative.

(b) For the purpose of paragraph (a) of this section, the alternate airport weather conditions must meet the requirements of the certificate holder's operations specifications.

(c) No person may dispatch or release an aircraft from an airport unless he lists each required alternate airport in the dispatch or flight release.

**§ 121.619 Alternate airport for destination: IFR or over-the-top: domestic air carriers.**

(a) No person may dispatch an airplane under IFR or over-the-top unless he lists at least one alternate airport for each destination airport in the dispatch release. When the weather conditions forecast for the destination and first alternate airport are marginal at least one additional alternate must be designated. However, no alternate airport is required if—

(1) For at least two hours before and two hours after the estimated time of arrival, the ceiling at the airport to which the flight is dispatched is forecast to be at least 1,000 feet above the minimum initial approach altitude to that airport; and

(2) The visibility at that airport is forecast to be at least 3 miles.

(b) For the purposes of paragraph (a) of this section, the weather conditions at the alternate airport must meet the requirements of § 121.625.

(c) No person may dispatch a flight unless he lists each required alternate airport in the dispatch release.

**§ 121.621 Alternate airport for destination: flag air carriers.**

(a) No person may dispatch an airplane under IFR or over-the-top unless he lists at least one alternate airport for each destination airport in the dispatch release, unless—

(1) The flight is scheduled for not more than six hours and the ceiling is forecast to be at least 1,000 feet above the minimum initial approach altitude, and the visibility is forecast to be at least three miles, at the destination airport for two hours before and two hours after the estimated time of arrival; or

(2) The flight is over a route approved without an available alternate airport for a particular destination airport and the airplane has enough fuel to meet the requirements of §§ 121.641(b) or 121.645(b).

(b) For the purposes of paragraph (a) of this section, the weather conditions at the alternate airport must meet the requirements of the air carrier's operations specifications.

(c) No person may dispatch a flight unless he lists each required alternate airport in the dispatch release.

**§ 121.623 Alternate airport for destination; IFR or over-the-top: supplemental air carriers and commercial operators.**

(a) Except as provided in paragraph (b) of this section, each person releasing an aircraft for operation under IFR or over-the-top shall list at least one alternate airport for each destination airport in the flight release.

(b) An alternate airport need not be designated for IFR or over-the-top operations where the aircraft carries enough fuel to meet the requirements of §§ 121.643 and 121.645 for flights outside the 48 contiguous States and the District of Columbia over routes without an available alternate airport for a particular airport of destination.

(c) For the purposes of paragraph (a) of this section, the weather requirements at the alternate airport must meet the requirements of the air carrier's or commercial operator's operations specifications.

(d) No person may release a flight unless he lists each required alternate airport in the flight release.

**§ 121.625 Alternate airport weather minimums.**

No person may list an airport as an alternate airport in the dispatch or flight release unless the appropriate weather reports or forecasts, or any combination thereof, indicate that the ceilings and visibilities will be at or above the alternate weather minimums specified in the certificate holder's operations specifications for that airport when the flight arrives.

**§ 121.627 Continuing flight in unsafe conditions.**

(a) No pilot in command may allow a flight to continue toward any airport to which it has been dispatched or released if, in the opinion of the pilot in command or dispatcher (domestic and flag air carriers only), the flight cannot be completed safely; unless, in the opinion of the pilot in command, there is no safer procedure. In that event, continuation toward that airport is an emergency situation as set forth in § 121.557.

(b) If any instrument or item of equipment required under this chapter for the particular operation becomes inoperative en route, the pilot in command shall comply with the approved procedures for such an occurrence as specified in the certificate holder's manual.

(c) The minimum equipment list and procedures for continuing flight beyond a terminal point with equipment required in § 121.303(d) inoperative may be included in the certificate holder's manual if the Administrator finds that, in a particular situation literal compliance with those equipment requirements is not necessary in the interests of safety.

**§ 121.629 Operation in icing conditions.**

(a) No person may dispatch or release an aircraft, continue to operate an aircraft en route, or land an aircraft when in the opinion of the pilot in command or aircraft dispatcher (domestic and flag air carriers only), icing conditions are expected or met that might adversely affect the safety of the flight.

(b) No person may takeoff an aircraft when frost, snow, or ice is adhering to the wings, control surfaces, or propellers of the aircraft.

**§ 121.631 Original dispatch or flight release, redispatch or amendment of dispatch or flight release.**

(a) A certificate holder may specify any regular, provisional, or refueling airport, authorized for the type of aircraft, as a destination for the purpose of original dispatch or release.

(b) No person may allow a flight to continue to an airport to which it has been dispatched or released unless the weather conditions at an alternate airport that was specified in the dispatch or flight release are forecast to be at or above the alternate minimums specified in the operations specifications for that airport at the time the aircraft would arrive at the alternate airport. However, the dispatch or flight release may be amended en route to include any alternate airport that is within the fuel range of the aircraft as specified in §§ 121.639 through 121.649.

(c) No person may change an original destination or alternate airport that is specified in the original dispatch or flight release to another airport while the aircraft is en route unless the other airport is authorized for that type of aircraft and the appropriate requirements of §§ 121.593 through 121.659 and 121.173 are met at the time of redispatch or amendment of the flight release.

(d) Each person who amends a dispatch or flight release en route shall record that amendment.

**§ 121.633 Dispatch to and from provisional airports: domestic air carriers.**

(a) No person may dispatch an airplane to a provisional airport unless that airport meets the requirements of this part applicable to regular airports.

(b) No person may dispatch an airplane from a provisional airport except in accordance with the requirements of this part applicable to dispatch from regular airports.

**§ 121.635 Dispatch to and from refueling or provisional airports: flag air carriers.**

No person may dispatch an airplane to or from a refueling or provisional airport unless that airport meets the requirements of this part applicable to regular airports.

**§ 121.637 Takeoffs from unlisted and alternate airports: domestic and flag air carriers.**

(a) No pilot may take off an airplane from an airport that is not listed in the operations specifications unless—

(1) The airport and related facilities are adequate for the operation of the airplane;

(2) He can comply with the applicable airplane operating limitations;

(3) The airplane has been dispatched according to dispatching rules applicable to operation from an approved airport; and

(4) The ceiling and visibility at that airport are equal to or better than the following:

(i) *Airports in the United States.* The ceiling and visibility minimums for takeoff prescribed in Part 97 of this chapter, but not less than 300–1; or where minimums are not prescribed for the airport, 800–2, 900–1½, or 1,000–1.

(ii) *Airports outside the United States.* The ceiling and visibility minimums for takeoff prescribed or approved by the government of the country in which the airport is located, but not less than 300–1; or where minimums are not prescribed or approved for the airport, 800–2, 900–1½, or 1,000–1.

(b) No pilot may take off from an alternate airport unless the ceiling and visibility are at least equal to the minimums prescribed in the air carrier's operations specifications for alternate airports.

**§ 121.639 Fuel supply; all operations: domestic air carriers.**

No person may dispatch or take off an airplane unless it has enough fuel—

(a) To fly to the airport to which it is dispatched;

(b) Thereafter, to fly to and land at the most distant alternate airport (where required) for the airport to which dispatched; and

(c) Thereafter, to fly for 45 minutes at normal cruising fuel consumption.

**§ 121.641 Fuel supply; nonturbine and turbo-propeller-powered airplanes: flag air carriers.**

(a) No person may dispatch or take off a nonturbine or turbo-propeller-powered airplane unless, considering the wind and other weather conditions expected, it has enough fuel—

(1) To fly to and land at the airport to which it is dispatched;

(2) Thereafter, to fly to and land at the most distant alternate airport specified in the dispatch release; and

(3) Thereafter, to fly for 30 minutes plus 15 percent of the total time required to fly at normal cruising fuel consumption to the airports specified in subparagraphs (1) and (2) of this paragraph or to fly for 90 minutes at normal cruising fuel consumption, whichever is less.

(b) No person may dispatch a nonturbine or turbo-propeller-powered airplane to an airport for which an alternate is not specified under § 121.621(a)(2), unless it has enough fuel, considering wind and forecast weather conditions, to fly to that airport and thereafter to fly for three hours at normal cruising fuel consumption.

**§ 121.643 Fuel supply: nonturbine and turbo-propeller-powered airplanes: supplemental air carriers and commercial operators.**

(a) Except as provided in paragraph (b) of this section, no person may release for flight or takeoff a nonturbine or turbo-propeller-powered airplane unless, considering the wind and other weather conditions expected, it has enough fuel—

(1) To fly to and land at the airport to which it is released;

(2) Thereafter, to fly to and land at the most distant alternate airport specified in the flight release; and

(3) Thereafter, to fly for 45 minutes.

(b) If the airplane is released for any flight other than from one point in the contiguous United States to another point in the contiguous United States, it must carry enough fuel to meet the requirements of subparagraphs (1) and (2) of paragraph (a) of this section and thereafter fly for 30 minutes plus 15 percent of the total time required to fly at normal cruising fuel consumption to

the airports specified in subparagraphs (1) and (2) of paragraph (a) of this section, or to fly for 90 minutes at normal cruising fuel consumption, whichever is less.

(c) No person may release a nonturbine or turbo-propeller-powered airplane to an airport for which an alternate is not specified under § 121.623(b), unless it has enough fuel, considering wind and other weather conditions expected, to fly to that airport and thereafter to fly for three hours at normal cruising fuel consumption.

**§ 121.645 Fuel supply; turbine-engine-powered airplanes, other than turbo propeller; Flag and supplemental air carriers and commercial operators.**

(a) For any flag air carrier operation and for a supplemental air carrier or commercial operator operation outside the 48 contiguous States and the District of Columbia, no person may release for flight or take off a turbine-engine powered airplane (other than a turbo-propeller airplane) unless, considering wind and other weather conditions expected, it has enough fuel—

(1) To fly to and land at the airport to which it is released;

(2) Thereafter, to fly for a period of 10 percent of the total time required to fly from the airport of departure to, and land at, the airport to which it was released;

(3) Thereafter, to fly to and land at the most distant alternate airport specified in the flight release, if an alternate is required; and

(4) Thereafter, to fly for 30 minutes at holding speed at 1,500 feet above the alternate airport (or the destination airport if no alternate is required) under standard temperature conditions.

(b) No person may release a turbine-engine powered airplane (other than a turbo-propeller airplane) to an airport for which an alternate is not specified under § 121.621(a)(2) or 121.623(b) unless it has enough fuel, considering wind and other weather conditions expected, to fly to that airport and thereafter to fly for at least two hours at normal cruising fuel consumption.

(c) The Administrator may amend the operations specifications of a flag or supplemental air carrier or commercial operator to require more fuel than any of the minimums stated in paragraph (a) or (b) of this section if he finds that additional fuel is necessary on a particular route in the interest of safety.

**§ 121.647 Factors for computing fuel required.**

Each person computing fuel required for the purposes of this subpart shall consider the following:

(a) Wind and other weather conditions forecast.

(b) Anticipated traffic delays.

(c) One instrument approach and possible missed approach at destination.

(d) Any other conditions that may delay landing of the aircraft.

For the purposes of this section, required fuel is in addition to unusable fuel.

**§ 121.649 Takeoff and landing weather minimums: VFR: domestic air carriers.**

(a) Except as provided in paragraph (b) of this section, regardless of any clearance from ATC, no pilot may takeoff or land an airplane under VFR when the reported ceiling or visibility is less than the following:

(1) For day operations—1,000-foot ceiling and one-mile visibility.

(2) For night operations—1,000-foot ceiling and two-mile visibility.

(b) Where a local surface restriction to visibility exists (e.g., smoke, dust, blowing snow or sand) the visibility for day and night operations may be reduced to ½ mile, if all turns after takeoff and prior to landing, and all flight beyond one mile from the airport boundary can be accomplished above or outside the area of local surface visibility restriction.

**§ 121.651 Takeoff and landing weather minimums: IFR: domestic and flag air carriers.**

(a) Regardless of any clearance from ATC, no pilot may take off an airplane under IFR if the ceiling or ground visibility reported by the U.S. Weather Bureau or a source approved by the Weather Bureau is less than that specified for the takeoff airport in Part 97 [New] of this chapter, or in the air carrier's operations specifications for the airport.

(b) Except as provided in paragraphs (c) and (d) of this section, no pilot may execute an instrument approach procedure or land under IFR at an airport if the latest U.S. Weather Bureau Report or a source approved by the Weather Bureau for that airport indicates that the ceiling or visibility is less than that prescribed by the Administrator for landing at that airport.

(c) A pilot may execute an instrument approach procedure if the U.S. Weather Bureau report or a source approved by the Weather Bureau indicates that the ceiling or visibility is less than the approved minimum for landing, if the airport is served by operative ILS and PAR and both are used by the pilot. Thereafter, the pilot may land if the pilot in command finds, upon reaching the authorized minimum landing altitude, that actual weather conditions are at least equal to the prescribed minimums.

(d) If a pilot initiates an instrument approach procedure when the current U.S. Weather Bureau report or a source approved by the Weather Bureau indicates that the prescribed ceiling and visibility minimums exist, and a later weather report indicating below minimum conditions is received after the airplane—

(1) Is on an ILS final approach and has passed the outer marker;

(2) Is on final approach using a radio range station or comparable facility, or a final approach fix, has passed the appropriate facility, or a final approach fix, and has reached the authorized minimum landing altitude; or

(3) Is on GCA final approach and has been turned over to the final approach controller;

the approach may be continued and a landing may be made, if the pilot in command finds, upon reaching the authorized landing minimum landing altitude, that actual weather conditions are at least equal to the prescribed minimums.

(e) If the pilot in command of an airplane has not served 100 hours as pilot in command in air carrier or commercial operations in the type of airplane he is operating, the ceiling and visibility landing minimums in the air carrier operations specifications for regular, provisional, or refueling airports are increased by 100 feet and one-half mile, respectively. The ceiling and visibility minimums need not be increased above those applicable to the airport when used as an alternate airport. The sliding scale when authorized in the operations specifications does not apply until the pilot in command has served 100 hours as pilot in command in air carrier or commercial operations in the type of airplane he is operating.

**§ 121.653 Takeoff and landing weather minimums: IFR: supplemental air carriers and commercial operators.**

(a) Regardless of any clearance from ATC, if the reported ceiling or ground visibility is less than that specified in the supplemental air carrier or commercial operator's operations specifications, no pilot may—

(1) Take off an aircraft under IFR; or

(2) Except as provided in paragraph (c) of this section, land an aircraft under IFR.

(b) Except as provided in paragraph (c) of this section, no pilot may execute an instrument approach procedure if the latest reported ceiling or visibility is less than the landing minimums specified in the air carrier or commercial operator's operations specifications.

(c) If a pilot initiates an instrument approach procedure when the latest weather report indicates that the specified ceiling and visibility minimums exist, and a later weather report indicating below minimum conditions is received after the airplane—

(1) Is on an ILS final approach and has passed the outer marker;

(2) Is on final approach using a radio range station or comparable facility, has passed the appropriate facility, and has reached the authorized minimum landing altitude; or

(3) Is on PAR final approach and has been turned over to the final approach controller;

the approach may be continued and a landing may be made, if the pilot in command finds, upon reaching the authorized landing minimum altitude, that actual weather conditions are at least equal to the minimums prescribed in the operations specifications.

(d) If the pilot in command of an airplane has not served 100 hours as pilot in command in operations under this part or in the type of aircraft he is operating, the ceiling and visibility landing minimums in the air carrier or commercial operator's operations specifications for airports are increased by 100 feet and one-half mile, respectively. The ceiling

and visibility minimums need not be increased above those applicable to the airport when used as an alternate airport.

**§ 121.655 Applicability of reported weather minimums.**

In conducting operations under §§ 121.649 through 121.653, the ceiling and visibility values in the main body of the latest weather report control for VFR and IFR takeoffs and landings and for instrument approach procedures on all runways of an airport. However, if the latest weather report, including an oral report from the control tower, contains a visibility value specified as runway visibility or runway visual range for a particular runway of an airport, that specified value controls for VFR and IFR landings and takeoffs and straight-in instrument approaches for that runway.

**§ 121.657 Flight altitude rules.**

(a) *General.* Notwithstanding § 91.79 or any rule applicable outside the United States, no person may operate an aircraft below the minimums set forth in paragraphs (b) and (c) of this section, except when necessary for takeoff or landing, or except when, after considering the character of the terrain, the quality and quantity of meteorological services, the navigational facilities available, and other flight conditions, the Administrator prescribes other minimums for any route or part of a route where he finds that the safe conduct of the flight requires other altitudes. Outside of the United States the minimums prescribed in this section are controlling unless higher minimums are prescribed in the air carrier or commercial operator's operations specifications or by the foreign country over which the aircraft is operating.

(b) *Day VFR operations.* No domestic air carrier may operate a passenger-carrying aircraft and no flag or supplemental air carrier or commercial operator may operate any aircraft under VFR during the day at an altitude less than 1,000 feet above the surface or less than 1,000 feet from any mountain, hill, or other obstruction to flight.

(c) *Night VFR, IFR, and over-the-top operations.* No person may operate an aircraft under IFR including over-the-top or at night under VFR at an altitude less than 1,000 feet above the highest obstacle within a horizontal distance of five miles from the center of the intended course, or, in designated mountainous areas, less than 2,000 feet above the highest obstacle within a horizontal distance of five miles from the center of the intended course. However, any person operating an aircraft under VFR at night in designated mountainous areas may operate over an approved lighted airway at a minimum altitude of 1,000 feet above such an obstacle. For supplemental air carriers and commercial operators adherence to a flight altitude is not required during the time a flight is operating in accordance with paragraph (d) of this section.

(d) *Day over-the-top operations below minimum en route altitudes: Domestic and supplemental air carriers and commercial operators.* A person may conduct day over-the-top operations in an airplane at flight altitudes lower than the minimum en route IFR altitudes if—

(1) The operation is conducted at least 1,000 feet above the top of lower broken or overcast cloud cover;

(2) The top of the lower cloud cover is generally uniform and level;

(3) Flight visibility is at least five miles; and

(4) The base of any higher broken or overcast cloud cover is generally uniform and level and is at least 1,000 feet above the minimum en route IFR altitude for that route segment.

**§ 121.659 Initial approach altitude: domestic and supplemental air carriers and commercial operators.**

(a) Except as provided in paragraph (b) of this section, when making an initial approach to a radio navigation facility under IFR, no person may descend an aircraft below the pertinent minimum altitude for initial approach (as specified in the instrument approach procedure for that facility) until his arrival over that facility has been definitely established.

(b) When making an initial approach on a flight being conducted under § 121.657(d), no pilot may commence an instrument approach until his arrival over the radio facility has definitely been established. In making an instrument approach under these circumstances no person may descend an aircraft lower than 1,000 feet above the top of the lower cloud or the minimum altitude determined by the Administrator for that part of the IFR approach, whichever is lower.

**§ 121.661 Initial approach altitude: flag air carriers.**

When making an initial approach to a radio navigation facility under IFR, no person may descend below the pertinent minimum altitude for initial approach (as specified in the instrument approach procedure for that facility) until his arrival over that facility has been definitely established.

**§ 121.663 Responsibility for dispatch release: domestic and flag air carriers.**

Each domestic and flag air carrier shall prepare a dispatch release for each flight between specified points, based on information furnished by an authorized aircraft dispatcher. The pilot in command and an authorized aircraft dispatcher shall sign the release only if they both believe that the flight can be made with safety. The aircraft dispatcher may delegate authority to sign a release for a particular flight, but he may not delegate his authority to dispatch.

**§ 121.665 Load manifest.**

Each certificate holder is responsible for the preparation and accuracy of a load manifest form before each takeoff. The form must be prepared and signed for each flight by employees of the certificate holder who have the duty of supervising the loading of aircraft and preparing the load manifest forms or by other qualified persons authorized by the certificate holder.

**§ 121.667 Flight plan: VFR and IFR: supplemental air carriers and commercial operators.**

(a) No person may take off an aircraft unless the pilot in command has filed a flight plan, containing the appropriate information required by Part 91 [New], with the nearest FAA communication station or appropriate military station or, when operating outside the United States, with other appropriate authority. However, if communications facilities are not readily available, the pilot in command shall file the flight plan as soon as practicable after the aircraft is airborne. A flight plan must continue in effect for all parts of the flight.

(b) When flights are operated into military airports, the arrival or completion notice required by § 91.83 may be filed with the appropriate airport control tower or aeronautical communication facility used for that airport.

## Subpart V—Records and Reports

**§ 121.681 Applicability.**

This subpart prescribes requirements for the preparation and maintenance of records and reports for all certificate holders.

**§ 121.683 Crewmember and dispatcher record.**

(a) Each certificate holder shall—

(1) Maintain current records of each crewmember, and each aircraft dispatcher (domestic and flag air carriers only), that shows whether or not he complies with this chapter (e.g., proficiency and route checks, airplane and route qualifications, training, any required physical examinations, and flight time records); and

(2) Record each action taken concerning the release from employment or physical or professional disqualification of any flight crewmember or aircraft dispatcher (domestic and flag air carriers only) and keep the record for at least six months thereafter.

(b) Supplemental air carriers and commercial operators: Each supplemental air carrier and commercial operator shall maintain the records required by paragraph (a) of this section at its principal operations base, or at another location used by it and approved by the Administrator.

**§ 121.685 Aircraft record: flag and domestic air carriers.**

Each flag and domestic air carrier shall maintain a current list of each aircraft that it operates in scheduled air transportation and shall send a copy of the record and each change to the FAA Air Carrier District Office charged with the overall inspection of its operations. Airplanes of another air carrier operated under an interchange agreement may be incorporated by reference.

**§ 121.687 Dispatch release: flag and domestic air carriers.**

(a) The dispatch release may be in any form but must contain at least the following information concerning each flight:

(1) Identification number of the aircraft.

(2) Trip number.

(3) Departure airport, intermediate stops, destination airports, and alternate airports.

(4) A statement of the type of operation (e.g., IFR, VFR).

(5) Minimum fuel supply.

(b) The dispatch release must contain, or have attached to it, weather reports, available weather forecasts, or a combination thereof, for the destination airport, intermediate stops, and alternate airports, that are the latest available at the time the release is signed by the pilot in command and dispatcher. It may include any additional available weather reports or forecasts that the pilot in command or the aircraft dispatcher considers necessary or desirable.

**§ 121.689 Flight release form: supplemental air carriers and commercial operators.**

(a) Except as provided in paragraph (c) of this section, the flight release may be in any form but must contain at least the following information concerning each flight:

(1) Company or organization name.

(2) Make, model, and registration number of the aircraft being used.

(3) Flight or trip number, and date of flight.

(4) Name of each flight crewmember, flight attendant, and pilot designated as pilot in command.

(5) Departure airport, destination airports, alternate airports, and route.

(6) Minimum fuel supply (in gallons or pounds).

(7) A statement of the type of operation (e.g. IFR, VFR).

(b) The aircraft flight release must contain, or have attached to it, weather reports, available weather forecasts, or a combination thereof, for the destination airport, and alternate airports, that are the latest available at the time the release is signed. It may include any additional available weather reports or forecasts that the pilot in command considers necessary or desirable.

(c) Each flag or domestic air carrier operating under the rules of this part applicable to supplemental air carriers and commercial operators shall comply with the dispatch or flight release forms required for scheduled operations under this subpart.

**§ 121.691 Load manifest: domestic and flag air carriers.**

The load manifest must contain the following information concerning the loading of an aircraft at takeoff time:

(a) The weight of the aircraft, fuel and oil, cargo (including mail and baggage), and passengers.

(b) The maximum allowable weight for that flight.

(c) The total weight computed under approved procedures.

(d) Evidence that the aircraft is loaded according to an approved schedule that insures that the center of gravity is within approved limits.

**§ 121.693 Load manifest: supplemental air carriers and commercial operators.**

The load manifest must contain the following information concerning the airplane at takeoff time:

(a) The weight of the aircraft, fuel and oil, cargo and baggage, passengers, and crewmembers.

(b) The maximum allowable weight for that flight that must not exceed the least of the following weights:

(1) Maximum allowable takeoff weight for the runway intended to be used (including corrections for altitude and gradient, and wind and temperature conditions existing at the takeoff time).

(2) Maximum takeoff weight considering anticipated fuel and oil consumption that allows compliance with applicable en route performance limitations.

(3) Maximum takeoff weight considering anticipated fuel and oil consumption that allows compliance with the maximum authorized design landing weight limitations on arrival at the destination airport.

(4) Maximum takeoff weight considering anticipated fuel and oil consumption that allows compliance with landing distance limitations on arrival at the destination and alternate airports.

(c) The total weight computed under approved procedures.

(d) Evidence that the aircraft is loaded according to an approved schedule that insures that the center of gravity is within approved limits.

(e) Names of passengers.

**§ 121.695 Disposition of load manifest, dispatch release, and flight plans: domestic and flag air carriers.**

(a) The pilot in command of an aircraft shall carry in the airplane to its destination—

(1) A copy of the completed load manifest (or information from it, except information concerning cargo and passenger distribution);

(2) A copy of the dispatch release; and

(3) A copy of the flight plan.

(b) The air carrier shall keep copies of the records required in this section for at least three months.

**§ 121.697 Disposition of load manifest, flight release, and flight plans: supplemental air carriers and commercial operators.**

(a) The pilot in command of an aircraft shall carry in the airplane to its destination the original or a signed copy of the—

(1) Load manifest;

(2) Flight release;

(3) Airworthiness release;

(4) Pilot route certification; and

(5) Flight plan.

(b) If a flight originates at the principal operations base of the air carrier or commercial operator, it shall retain at that base a signed copy of each document listed in paragraph (a) of this section.

(c) If a flight originates at a place other than the principal operations base, the pilot in command (or other person authorized by the carrier or operator) shall, before or immediately after departure of the flight, mail signed copies of the documents listed in paragraph (a) of this section to the principal operations base.

(d) The supplemental air carrier or commercial operator shall keep at its operations base either the original or a copy of the records required in this section for at least six months.

**§ 121.699 Maintenance records.**

(a) Each certificate holder shall keep, at its principal maintenance base, current records of total time in service, time since last overhaul, and time since last inspection, for each major component of each airframe, aircraft engine, propeller, and, where practicable, appliance.

(b) A certificate holder may discontinue total time in service records if it shows that the service life of component parts is safely controlled by inspection, overhaul, or parts retirement procedures. The Administrator may require the keeping of total time in service records for a part when he finds that other procedures will not safely limit the service life of that part.

(c) An aircraft component, aircraft engine, propeller, or appliance for which complete records required by this section are not available may be placed in service if—

(1) It is of a type for which total time inservice records are not required by paragraph (b) of this section;

(2) Parts that the Administrator or manufacturer limits to a specific total time in service are retired and replaced by new parts; or

(3) It has been properly overhauled or rebuilt and the overhaul or rebuilding is recorded in the maintenance records.

**§ 121.701 Maintenance log: aircraft.**

(a) Each person who takes action in the case of a reported or observed failure or malfunction of an airframe, engine, propeller, or appliance that is critical to the safety of flight shall make, or have made, a record of that action in the airplane's maintenance log.

(b) Each certificate holder shall have an approved procedure for keeping adequate copies of the record required in paragraph (a) of this section in the airplane in a place readily accessible to each flight crewmember and shall put that procedure in the certificate holder's manual.

**§ 121.703 Mechanical reliability reports.**

(a) Each certificate holder shall report the occurrence or detection of each failure, malfunction, or defect concerning—

(1) Fires during flight and whether the related fire-warning system functioned properly;

(2) Fires during flight not protected by a related fire-warning system;

(3) False fire warning during flight;

(4) An engine exhaust system that causes damage during flight to the engine, adjacent structure, equipment, or components;

(5) An aircraft component that causes accumulation or circulation of smoke, vapor, or toxic or noxious fumes in the crew compartment or passenger cabin during flight;

(6) Engine shutdown during flight because of flameout;

(7) Engine shutdown during flight when external damage to the engine or airplane structure occurs;

(8) Engine shutdown during flight due to foreign object ingestion or icing;

(9) Engine shutdown during flight of more than one engine;

(10) A propeller feathering system or ability of the system to control overspeed during flight;

(11) A fuel or fuel-dumping system that affects fuel flow or causes hazardous leakage during flight;

(12) A landing gear extension or retraction or opening or closing of landing gear doors during flight;

(13) Brake system components that result in loss of brake actuating force when the airplane is in motion on the ground;

(14) Aircraft structure that requires major repair;

(15) Cracks, permanent deformation, or corrosion of aircraft structures, if more than the maximum acceptable to the manufacturer or the FAA; and

(16) Aircraft components or systems that result in taking emergency actions during flight (except action to shutdown an engine).

(b) For the purpose of this section "during flight" means the period from the moment the aircraft leaves the surface of the earth on takeoff until it touches down on landing.

(c) In addition to the reports required by paragraph (a) of this section, each certificate holder shall report any other failure, malfunction, or defect in an aircraft that occurs or is detected at any time if, in its opinion, that failure, malfunction, or defect has endangered or may endanger the safe operation of an aircraft used by it.

(d) Each certificate holder shall send each report required by this section, in writing, covering each 24-hour period beginning at 0900 hours local time of each day and ending at 0900 hours local time on the next day, to the FAA maintenance inspector assigned to its operations. The report must be delivered to him by 0900 hours local time on the following day. However, a report that is due on Saturday or Sunday may be delivered on the following Monday and one that is due on a holiday may be delivered on the next workday.

(e) The certificate holder shall transmit the reports required by this section in a manner and on a form that is convenient to its system of communication and procedure, and shall include in the first daily report as much of the following as is available:

(1) Type and identification number of the aircraft.

(2) The name of the operator.

(3) The date, flight number, and stage during which the incident occurred (e.g., preflight, takeoff, climb, cruise, descent, landing, and inspection).

(4) The emergency procedure effected (e.g., unscheduled landing and emergency descent).

(5) The nature of the failure, malfunction, or defect.

(6) Identification of the part and system involved, including available information pertaining to type designation of the major component and time since overhaul.

(7) Apparent cause of the failure, malfunction, or defect (e.g., wear, crack, design deficiency, or personnel error).

(8) Whether the part was repaired, replaced, sent to the manufacturer, or other action taken.

(9) Whether the aircraft was grounded.

(10) Other pertinent information necessary for more complete identification, determination of seriousness, or corrective action.

(f) Failures, malfunctions, or defects reported under the accident reporting provisions of Part 320 of the regulations of the Civil Aeronautics Board need not be reported under this section.

(g) No person may withhold a report required by this section even though all information required in this section is not available.

(h) When certificate holder gets additional information, including information from the manufacturer or other agency, concerning a report required by this section, it shall expeditiously submit it as a supplement to the first report and reference the date and place of submission of the first report.

### § 121.705 Mechanical interruption summary report.

Each certificate holder shall regularly and promptly send a summary report on the following occurrences to the Administrator:

(a) Each interruption to a scheduled flight, unscheduled change of aircraft en route, or unscheduled stop or diversion from a route, caused by known or suspected mechanical difficulties or malfunctions that are not required to be reported under § 121.703.

(b) The number of engines removed prematurely because of malfunction, failure or defect, listed by make and model and the aircraft type in which it was installed.

(c) The number of propeller featherings in flight, listed by type of propeller and engine and aircraft on which it was installed. Propeller featherings for training, demonstration, or flight check purposes need not be reported.

### § 121.707 Alteration and repair reports.

(a) Each certificate holder shall, promptly upon its completion, prepare a report of each major alteration or major repair of an airframe, aircraft engine, propeller, or appliance of an aircraft operated by it.

(b) The certificate holder shall submit a copy of each report of a major alteration to, and shall keep a copy of each report of a major repair available for inspection by, the representative of the Administrator who is assigned to it.

### § 121.709 Airworthiness release or aircraft log entry.

(a) No certificate holder may operate an aircraft after maintenance, preventive maintenance or alterations are performed on the aircraft unless the certificate holder, or the person with whom the certificate holder arranges for the performance of the maintenance, preventive maintenance, or alterations, prepares or causes to be prepared—

(1) An airworthiness release; or

(2) An appropriate entry in the aircraft log.

(b) The airworthiness release or log entry required by paragraph (a) of this section must—

(1) Be prepared in accordance with the procedures set forth in the certificate holder's manual;

(2) Include a certification that—

(i) The work was performed in accordance with the requirements of the certificate holder's manual;

(ii) All items required to be inspected were inspected by an authorized person who determined that the work was satisfactorily completed;

(iii) No known condition exists that would make the airplane unairworthy; and

(iv) So far as the work performed is concerned, the aircraft is in condition for safe operation; and

(3) Be signed by an authorized certificated mechanic or repairman except that a certificated repairman may sign the release or entry only for the work for which he is employed and certificated.

(c) When an airworthiness release form is prepared the certificate holder must give a copy to the pilot in command and must keep a record thereof for at least two months.

### § 121.711 Communication records: domestic and flag air carriers.

Each domestic and flag air carrier shall record each en route radio contact between the air carrier and its pilots and shall keep that record for at least 30 days.

### § 121.713 Retention of contracts and amendments: commercial operator.

Each commercial operator shall keep a copy of each written contract under which it provides services as a commercial operator for a period of at least one year after the date of execution of the contract. In the case of an oral contract, it shall keep a memorandum stating its elements, and of any amendments to it, for a period of at least one year after the execution of that contract or change.

## Subpart W—Crewmember Certificate; International

### § 121.721 Applicability.

This subpart describes the certificates that are issued to United States citizens who are employed by air carriers or commercial operators as flight crewmembers or crewmembers on United States registered aircraft engaged in international air commerce. The purpose of the certificate is to facilitate the entry and clearance of those crew members into ICAO contracting states. They are issued under Annex 9, as amended, to the Convention on International Civil Aviation.

### § 121.723 Application and issue.

(a) An application for a crewmember certificate is made on Form FAA-2116 "Application for Crewmember Certificate", to the Air Carrier District Office in charge of the air carrier or commercial operator by whom the applicant is employed. The certificate is issued on Form FAA-2116.1 "Crewmember Certificate".

(b) The holder of a certificate issued under this subpart, or the air carrier or commercial operator by whom he is employed, shall surrender the certificate for cancellation at the nearest Air Carrier District Office at the end of the holder's assignment in international air commerce with that carrier or operator.

NOTE: The record keeping and reporting requirements contained herein have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

# Title 7—AGRICULTURE

## Chapter VII—Agricultural Stabilization and Conservation Service (Agricultural Adjustment), Department of Agriculture

SUBCHAPTER B—FARM MARKETING QUOTAS AND ACREAGE ALLOTMENTS

## PART 730—RICE

### Subpart—1965–66 Marketing Year

PROCLAMATIONS AND DETERMINATIONS WITH RESPECT TO MARKETING QUOTAS AND NATIONAL ACREAGE ALLOTMENT FOR 1965 CROP RICE, AND APPORTIONMENT OF 1965 NATIONAL ACREAGE ALLOTMENT OF RICE AMONG THE SEVERAL STATES

Sec.
730.1601 Basis and purpose.
730.1602 Marketing quotas on 1965 crop rice.
730.1603 National acreage allotment of rice for 1965.
730.1604 Apportionment of 1965 national acreage allotment of rice among the several States.

AUTHORITY: The provisions of this subpart issued under secs. 301, 352, 353, 354, 375, 52 Stat, 38, 60, 61, 66, as amended; 7 U.S.C. 1301, 1352, 1353, 1354, 1375.

**§ 730.1601 Basis and purpose.**

(a) (1) Section 730.1602 is issued under and in accordance with sections 301 and 354 of the Agricultural Adjustment Act of 1938, as amended, to proclaim the total supply and normal supply of rice for the marketing year beginning August 1, 1964, and to proclaim that marketing quotas will be applicable to the 1965 crop of rice. Section 730.1603 is issued under and in accordance with sections 352 and 353 of the Agricultural Adjustment Act of 1938, as amended, to proclaim the national acreage allotment of rice for the calendar year 1965. Section 353(c)(6) of the act, as amended by section 301 of Public Law 85–835, 72 Stat. 994, provides that the national acreage allotment of rice for 1965 shall be not less than the total acreage allotted in 1956.

(2) Section 730.1604 is issued under and in accordance with section 353 of the Agricultural Adjustment Act of 1938, as amended, to apportion among the several States the national acreage allotment of rice for 1965 as proclaimed in § 730.1603 hereof. Section 353 of the act provides that the national acreage allotment of rice for 1965, less a reserve of not to exceed one per centum for apportionment to farms receiving inadequate allotments, shall be apportioned among the States in the same proportion that they shared in the total acreage allotted in 1956.

(3) Section 353(b) of the act, as amended by Public Law 85–443, authorizes the Secretary of Agriculture under certain circumstances to divide any State into two administrative areas to be designated "producer administrative area" and "farm administrative area", and provides that if any State is so divided into administrative areas the term "State acreage allotment" for the purposes of section 353 of the Agricultural Adjustment Act of 1938, as amended, shall be deemed to mean that part of the State acreage allotment apportioned to each administrative area.

(4) Section 353(c)(1) of the act, as amended by Public Law 85–443, provides that if any State is divided into administrative areas, the allotment for each area shall be determined by apportioning the State acreage allotment among counties as provided in section 353(c)(1) of the Agricultural Adjustment Act of 1938, as amended, and totaling the allotments for the counties in each such area. The acreage allotments for the "farm administrative area" and "producer administrative area" in the State of Louisiana which are set out in § 730.1604 were determined by apportioning the State acreage allotment for Louisiana among the counties in the State in the same proportion which each such county shared in the total acreage allotted in the State in 1956, as provided in section 353(c)(1) of the Agricultural Adjustment Act of 1938, as amended, and totaling the allotments for the counties in each such area.

(b) The findings and determinations made in §§ 730.1602, 730.1603, and 730.1604 have been made on the basis of the latest available statistics of the Federal Government. The findings in § 730.1602 show that marketing quotas are required for the 1965 crop of rice. The determinations made in § 730.1603 indicate the amount of the 1965 national acreage allotment of rice.

(c) Prior to taking action herein, public notice (29 F.R. 13273) was given in accordance with the Administrative Procedure Act (5 U.S.C. 1003), that the Secretary was preparing to determine whether marketing quotas are required for the 1965 crop of rice, to determine and proclaim the national acreage allotment of rice for 1965, and to apportion among the States the 1965 national acreage allotment of rice. No data, views, and recommendations were submitted pursuant to such notice.

(d) The Agricultural Adjustment Act of 1938, as amended, requires that the proclamation with respect to marketing quotas for the 1965 crop of rice be issued not later than December 31, 1964; that the referendum to determine whether farmers are in favor of or opposed to such quotas be held within 30 days after the issuance of the proclamation; and that insofar as practicable operators of farms be notified of their farm rice acreage allotments prior to the holding of the referendum. Therefore, it is necessary to waive the 30-day effective date provision of section 4 of the Administrative Procedure Act and such provision is hereby waived. Accordingly, the regulations in §§ 730.1601 to 730.1604, inclusive, shall become effective upon filing with the Director, Office of the Federal Register.

**§ 730.1602 Marketing quotas on 1965 crop of rice.**

The total supply of rice in the United States for the marketing year beginning August 1, 1964, is determined to be 80,700 thousand hundredweight (rough basis). The normal supply of rice for such marketing year is determined to be 77,759 thousand hundredweight. Since the total supply of rice for the 1964–65 marketing year exceeds the normal supply for such marketing year, marketing quotas shall be in effect on the 1965 crop of rice.

**§ 730.1603 National acreage allotment of rice for 1965.**

The normal supply of rice for the marketing year commencing August 1, 1965, is determined to be 76,835 thousand hundredweight (rough basis). The carryover of rice on August 1, 1965, is determined to be 9,800 thousand hundredweight. Therefore, the production of rice needed in 1965 to make available a total supply of rice for the 1965–66 marketing year equal to the normal supply for such marketing year is 67,035 thousand hundredweight. The national average yield of rice for the five calendar years, 1960 through 1964 is determined to be 3,686 pounds per planted acre. The national acreage allotment of rice for 1965 computed on the basis of the production of rice needed in 1965 and the national average yield per planted acre of rice for the five calendar years, 1960 through 1964, is 1,818,638 acres. Since this amount is more than the total acreage allotted in 1956, which is the minimum for 1965 provided by law, the national acreage allotment of rice for the calendar year 1965 shall be 1,818,638 acres.

**§ 730.1604 Apportionment of 1965 national acreage allotment of rice among the several States.**

The national acreage allotment proclaimed in § 730.1603, less a reserve of 672 acres, is hereby apportioned among the several rice-producing States as follows:

| State: | Acres |
|---|---|
| Arizona | 252 |
| Arkansas | 439,019 |
| California | 329,822 |
| Florida | 1,053 |
| Illinois | 22 |
| Louisiana: | |
| Farm administrative area 503,984 | |
| Producer administrative area 18,651 | |
| State total | 522,635 |
| Mississippi | 51,354 |
| Missouri | 5,245 |
| North Carolina | 42 |
| Oklahoma | 164 |
| South Carolina | 3,132 |
| Tennessee | 569 |
| Texas | 464,657 |
| Total apportioned to States | 1,817,966 |
| Unapportioned National Reserve | 672 |
| U.S. total | 1,818,638 |

*Effective date.* Date of filing with the Director, Office of the Federal Register.

Signed at Washington, D.C., on December 24, 1964.

ORVILLE L. FREEMAN,
*Secretary.*

[F.R. Doc. 64–13619; Filed, Dec. 28, 1964; 10:48 a.m.]

[Amdt. 2]

## PART 730—RICE

### Subpart—Rice Marketing Quota Regulations for 1964 and Subsequent Crop Years

On page 15537 of the FEDERAL REGISTER of November 19, 1964, was published a notice of proposed rule making to issue amendments to the rice marketing quota regulations for 1964 and subsequent crop years. Interested persons were given 30 days from the date of publication of the notice in the FEDERAL REGISTER in which to submit written data, views, or recommendations with respect to the proposed amendments.

No data, views, or recommendations were received and the proposed amendments are adopted as set forth in the notice with the following changes:

1. A paragraph of basis and purpose is added immediately preceding the text of the amendments.

2. An effective date paragraph is added immediately following the text of the amendments.

3. An authority clause is added immediately following the effective date paragraph.

Signed at Washington, D.C., on December 28, 1964.

E. A. JAENKE,
*Acting Administrator, Agricultural Stabilization and Conservation Service.*

*Basis and purpose.* The amendments herein are issued under and in accordance with the rice marketing quota provisions of the Agricultural Adjustment Act of 1938, as amended.

The purpose of these amendments is to change the final dates for the disposal of excess rice acreage in the State of Texas, effective for 1965 and subsequent crop years, and to change various cross references to other regulations to show the current designation.

**§ 730.1552 [Amended]**

1. The second sentence of § 730.1552 is amended by changing the title of the Part 719 reference to read: "Reconstitution of Farms, Allotments, and Bases."

**§ 730.1555 [Amended]**

2. Section 730.1555 is amended by changing the final dates for the disposal of excess rice acreage for Texas to read:

TEXAS

The counties of Austin, Bastrop, Brazoria, Calhoun, Colorado, Fort Bend, Galveston, Harris, Jackson, Lavaca, Matagorda, Travis, Victoria, Waller, Washington and Wharton, July 1.

The counties of Chambers, Hardin, Jasper, Jefferson, Liberty, Newton, Orange, Polk and Walker, July 15.

Bowie County, September 1.

**§ 730.1581 [Amended]**

3. The last sentence in paragraph (h) of § 730.1581 is amended by changing the title of the Part 719 reference to read: "Reconstitution of Farms, Allotments, and Bases."

**§ 730.1595 [Amended]**

4. Paragraph (b) of § 730.1595 is amended by changing the word "Performance" to the word "Compliance".

*Effective date:* 30 days after publication in the FEDERAL REGISTER.

(Secs. 374, 375, 52 Stat. 65 as amended, 66, as amended; 7 U.S.C. 1374, 1375)

[F.R. Doc. 64–13490; Filed, Dec. 30, 1964; 8:49 a.m.]

## Chapter VIII—Agricultural Stabilization and Conservation Service (Sugar), Department of Agriculture

SUBCHAPTER B—SUGAR REQUIREMENTS AND QUOTAS

## PART 812—SUGAR REQUIREMENTS AND QUOTAS: HAWAII AND PUERTO RICO

### Establishment of Quotas for Local Consumption in 1965

On page 17122 of the FEDERAL REGISTER of December 15, 1964, there was published a notice of proposed rule making to issue a regulation determining sugar requirements for 1965 and establishing quotas for Hawaii and Puerto Rico for the calendar year 1965. Interested persons were given until December 18, 1964, to submit written data, views or arguments for consideration in connection with the proposed regulation.

No views or comments were received relative to the proposed regulation.

The proposed regulation is hereby adopted without change.

Issued at Washington, D.C., this 28th day of December 1964.

CHARLES S. MURPHY,
*Acting Secretary.*

*Basis and purpose.* The purpose of Sugar Regulation 812 is to determine pursuant to sections 201 and 203 of the Sugar Act of 1948, as amended (hereinafter referred to as the "Act"), the amount of sugar needed to meet the requirements of consumers in Hawaii and in Puerto Rico and to establish quotas for local consumption in such areas. To the extent required by section 201 of the Act, this regulation establishes sugar requirements based on official estimates of the Department of Agriculture and on statistics published by other agencies of the government.

Since the Act provides that the Secretary of Agriculture determine during December 1964 sugar requirements for local consumption in Hawaii and in Puerto Rico and establish local consumption quotas, it is found to be impracticable and not in the public interest to comply with the 30-day effective date requirements of the Administrative Procedure Act, and these regulations shall be effective January 1, 1965.

Sec.
812.1 Sugar requirements and quota—Hawaii.
812.2 Sugar requirements and quota—Puerto Rico.
812.3 Restrictions on marketing.

AUTHORITY: The provisions of this Part 812 issued under sec. 403, 61 Stat. 932; 7 U.S.C. 1153. Interprets or applies secs. 201, 203, 209, 210, 412; 61 Stat. 923, as amended, 925, 928; 7 U.S.C. 1111, 1112, 1119.

**§ 812.1 Sugar requirements and quota—Hawaii.**

It is hereby determined, pursuant to section 203 of the Act, that the amount of sugar needed to meet the requirements of consumers in Hawaii for the calendar year 1965 is 50,000 short tons, raw value, and a quota of 50,000 short tons, raw value, is hereby established for Hawaii for local consumption for the calendar year 1965.

**§ 812.2 Sugar requirements and quota—Puerto Rico.**

It is hereby determined, pursuant to section 203 of the Act, that the amount of sugar needed to meet the requirements of consumers in Puerto Rico for the calendar year 1965 is 130,000 short tons, raw value, and a quota of 130,000 short tons, raw value, is hereby established for Puerto Rico for local consumption for the calendar year 1965.

**§ 812.3 Restrictions on marketing.**

Pursuant to section 209 of the Act, for the calendar year 1965 all persons are hereby prohibited from marketing, pursuant to Part 816 of this chapter (23 F. R. 1943 and 27 F. R. 1450), in Hawaii or in Puerto Rico, for consumption therein, any sugar or liquid sugar after the quota for the area for the calendar year 1965 has been filled. Pursuant to section 211(c) of the Act, the quota for each area may be filled only with sugar produced from sugarcane grown in the respective area.

*Statement of bases and considerations.* Pursuant to section 203 of the Act, the provisions of section 201 of the Act deemed applicable to the determination of the amounts of sugar needed to meet

the requirements of consumers in Hawaii and in Puerto Rico relate to (1) the quantities of sugar distributed for local consumption in Hawaii and in Puerto Rico during the twelve-month period ended October 31, 1964, (2) deficiencies or surpluses in inventories of sugar, and (3) changes in consumption because of changes in population and demand conditions.

The quantities of sugar distributed for consumption in Hawaii and in Puerto Rico, including that which was lost in refining after charge to the local quotas, during such twelve-month period are estimated to have been approximately 41,000 short tons of sugar, raw value, and 118,000 short tons of sugar, raw value, respectively.

The provisional estimate by the Bureau of the Census of the total population for Hawaii as of July 1, 1964, is 701,000 and for Puerto Rico is 2,577,000. This represents a normal increase in population for Hawaii and Puerto Rico over 1963. No official estimate for either of these areas for 1964 is available.

In Hawaii industrial use accounts for a substantial portion of the total consumption of sugar and this demand is a significant factor in the total sugar requirements. During the period 1958 through 1963 sugar consumption in this area has varied from 120.0 to 138.0 pounds, raw value, per person. These wide year-to-year variations suggest the possibility that requirements could be higher in 1965 than in the twelve months ended October 31, 1964, when sugar marketings approximated 41,000 short tons, raw value.

In Puerto Rico during the twelve months ended October 31, 1964, marketings of sugar for local consumption totaled approximately 120,000 short tons, raw value. Refiners' inventories of sugar as of September 30, 1964, were approximately 15,000 tons higher than those held on September 30, 1963. After making allowance for possible consumption increases in 1965 resulting from population increases, and the larger inventory of sugar held by refiners, the total sugar needed to meet requirements for local consumption in Puerto Rico in 1965 may be approximately 130,000 short tons, raw value.

Circumstances prevailing in the utilization of quota for local consumption in Hawaii and Puerto Rico are such that no special problems arise nor are the objectives of the Act jeopardized if the 1965 local quota is not completely filled. It is therefore, desirable to establish the 1965 requirements and quotas sufficiently high initially so that later adjustments may be avoided.

In accordance with the above, the requirements for local consumption in Hawaii and Puerto Rico for 1965 have been determined to be 50,000 and 130,000 short tons, raw value, respectively.

[F.R. Doc. 64-13512; Filed, Dec. 30, 1964; 8:50 a.m.]

## Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders; Fruits, Vegetables, Tree Nuts), Department of Agriculture

[959.305]

## PART 959—ONIONS GROWN IN SOUTH TEXAS

### Limitation of Shipments

Notice of rule making with respect to a proposed limitation of shipments regulation to be made effective under Marketing Agreement No. 143 and Order No. 959 (7 CFR Part 959), both as amended, regulating the handling of onions grown in designated counties in South Texas, was published in the FEDERAL REGISTER, November 10, 1964 (29 F.R. 15129). This program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.).

This notice afforded interested persons an opportunity to file data, views, or arguments pertaining thereto not later than thirty days after publication. None was filed.

After consideration of all relevant matters, including the proposal set forth in the aforesaid notice which was recommended by the South Texas Onion Committee, established pursuant to the said amended marketing agreement and order, it is hereby found that the limitation of shipments regulation, as hereinafter set forth, will tend to effectuate the declared policy of the Act.

**§ 959.305 Limitation of shipments.**

During the period beginning March 1, 1965, through June 15, 1965, no handler may (1) package or load onions on Sundays, or (2) handle any lot of onions grown in the production area, except red onions, unless such onions meet the grade requirements of paragraph (a) of this section, one of the applicable size requirements of paragraph (b) of this section, the container requirements of paragraph (c) of this section, and the inspection requirements of paragraph (f) of this section, or unless such onions are handled in accordance with the provisions of paragraphs (d) or (e) of this section.

(a) *Minimum grade.* Not to exceed 20 percent defects of U.S. No. 1 grade. In percentage grade lots, tolerances for serious damage shall not exceed 10 percent including not more than 2 percent decay. Double the lot tolerance shall be permitted in individual packages in percentage grade lots. Application of tolerances in U.S. Grade Standards shall apply to in-grade lots.

(b) *Size requirements.* (1) "Small"—1 to 2¼ inches in diameter, and limited to whites only;

(2) "Repacker"—1¾ to 3 inches in diameter, with 60 percent or more 2 inches in diameter or larger;

(3) 2 to 3½ inches in diameter; or

(4) "Jumbo"—3 inches or larger in diameter.

(c) *Container requirements.* (1) 25 pound bags, with not to exceed in any lot an average net weight of 27½ pounds per bag, and with outside dimensions not larger than 29 inches by 31 inches; or

(2) 50 pound bags, with not to exceed in any lot an average net weight of 55 pounds per bag, and with outside dimensions not larger than 33 inches by 38½ inches.

(3) These container requirements shall not be applicable to onions sold to Federal agencies.

(d) *Minimum quantity exemption.* Any handler may handle, only as individual shipments and other than for resale, not more than 100 pounds of onions per day, in the aggregate, without regard to the requirements of this section or to the inspection and assessment requirements of this part.

(e) *Special purpose shipments and culls.* Onions failing to meet the grade, size, or container requirements of paragraphs (a), (b), or (c), and not exempted under paragraph (d), of this section, may be handled only pursuant to § 959.126 (7 CFR § 959.126). Culls may be handled pursuant to § 959.126(a)(1). Shipments for relief or charity, or for experimental purposes, may be handled pursuant to § 959.126(b). Any such onions may be handled without regard to inspection and assessment requirements.

(f) *Inspection.* (1) No handler may handle onions regulated hereunder (except pursuant to paragraphs (d) or (e) of this section) unless an appropriate inspection certificate has been issued with respect thereto and the certificate is valid at the time of shipment.

(2) No handler may transport or cause the transportation of any shipment of onions by motor vehicle for which an inspection certificate is required unless each such shipment is accompanied by a copy of the inspection certificate applicable thereto or by documentary evidence on forms furnished by the Committee identifying truck lots to which a valid inspection certificate is applicable and a copy of such inspection certificate or Committee document, upon request, is surrendered to authorities designated by the Committee.

(3) For purpose of operation under this part each inspection certificate or Committee form required as evidence of inspection is hereby determined to be valid for a period not to exceed 72 hours following completion of inspection as shown on the certificate.

(g) *Definitions.* The term "U.S. No. 1" shall have the same meaning as set forth in the United States Standards for Bermuda-Granex-Grano Type Onions (§§ 51.3195–51.3209 of this title), or in the United States Standards for Grades of Onions (§§ 51.2830–51.2850 of this title), whichever is applicable to the particular variety. All other terms used in this section shall have the same meaning as when used in Marketing Agreement No. 143 and this part (Order No. 959), both as amended.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601 et seq.)

Dated December 28, 1964, to become effective March 1, 1965.

PAUL A. NICHOLSON,
*Deputy Director,*
*Fruit and Vegetable Division.*

[F.R. Doc. 64-13471; Filed, Dec. 30, 1964; 8:46 a.m.]

## Chapter X—Agricultural Marketing Service (Marketing Agreements and Orders; Milk), Department of Agriculture

[Milk Order No. 1062]

## PART 1062—MILK IN ST. LOUIS, MISSOURI, MARKETING AREA

### Order Suspending Certain Provisions

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and of the order regulating the handling of milk in the St. Louis, Missouri, marketing area (7 CFR Part 1062), it is hereby found and determined that:

(a) The following provisions of the order do not tend to effectuate the declared policy of the Act for the months of December 1964 and January 1965:

(1) In the opening paragraph of § 1062.10(b), the numeral "(1),"; and

(2) Subparagraph (1) of § 1062.10(b) relating to shipping requirements for pooling of country plants.

(b) Notice of proposed rule making, public procedure thereon, and 30 days notice of the effective date hereof are impractical, unnecessary, and contrary to the public interest in that:

(1) This suspension order does not require of persons affected substantial or extensive preparation prior to the effective date;

(2) This suspension order is necessary to reflect current marketing conditions and to maintain orderly marketing conditions in the marketing area;

(3) This suspension order will enable cooperative associations to maintain pool plant status for certain country plants for the months of December 1964 and January 1965 and facilitate the orderly disposition of the market's reserve supply of milk.

Therefore, good cause exists for making this order effective upon publication in the FEDERAL REGISTER.

*It is therefore ordered,* That the aforesaid provisions of the order are hereby suspended for the months of December 1964 and January 1965.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

*Effective date.* Upon publication in the FEDERAL REGISTER.

Signed at Washington, D.C., on December 24, 1964.

GEORGE L. MEHREN,
*Assistant Secretary.*

[F.R. Doc. 64-13472; Filed, Dec. 30, 1964; 8:47 a.m.]

[Milk Order No. 126]

## PART 1126—MILK IN NORTH TEXAS MARKETING AREA

### Order Amending Order

**§ 1126.0 Findings and determinations.**

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of the said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the North Texas marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

(b) *Additional findings.* (1) It is necessary in the public interest to make this order amending the order effective not later than January 1, 1965. Any delay beyond that date would tend to disrupt the orderly marketing of milk in the marketing area.

(2) The provisions of the said order are known to handlers. The recommended decision of the Associated Administrator was issued November 27, 1964, and the decision of the Assistant Secretary containing all amendment provisions of this order was issued December 21, 1964. The changes effected by this order will not require extensive preparation or substantial alteration in method of operation for handlers. In view of the foregoing, it is hereby found and determined that good cause exists for making this order amending the order effective January 1, 1965, and that it would be contrary to the public interest to delay the effective date of this amendment for 30 days after its publication in the FEDERAL REGISTER. (Sec. 4(c), Administrative Procedure Act, 5 U.S.C. 1001–1011.)

(c) *Determinations.* It is hereby determined that:

(1) The refusal or failure of handlers (excluding cooperative associations specified in section 8c(9) of the Act) of more than 50 percent of the milk, which is marketed within the marketing area, to sign a proposed marketing agreement, tends to prevent the effectuation of the declared policy of the Act;

(2) The issuance of this order, amending the order, is the only practical means pursuant to the declared policy of the Act of advancing the interests of producers as defined in the order as hereby amended; and

(3) The issuance of the order amending the order is approved or favored by at least two-thirds of the producers who during the determined representative period were engaged in the production of milk for sale in the marketing area.

*Order relative to handling.* It is therefore ordered, that on and after the effective date hereof, the handling of milk in the North Texas marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended, and as hereby further amended, as follows:

1. In § 1126.41, a new paragraph (b)(8) is added to read as follows:

**§ 1126.41 Classes of utilization.**

* * * * *

(b) * * *

(8) Dumped because buttermilk is not produced from skim milk to which buttermilk culture has been added, if the handler gives prior notification to and opportunity for verification by the market administrator in such manner as the market administrator may require.

2. In § 1126.91, paragraph (a) is revised to read as follows:

**§ 1126.91 Butterfat and location differentials to producers.**

(a) In making payments to producers pursuant to § 1126.90 (a) or (c), the uniform prices shall be increased or decreased by each one-tenth of one percent which the butterfat content of his milk is above or below 3.5 percent, respectively, at the rate determined by multiplying the total pounds of butterfat in the producer milk allocated to Class I and Class II milk during the month pursuant to § 1126.46 by the respective butterfat differential in each class, dividing the sum of such values by the total pounds of such butterfat, and rounding the resultant figure to the nearest one-tenth of a cent.

* * * * *

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601, 674)

*Effective date.* January 1, 1965.

Signed at Washington, D.C., on December 28, 1964.

GEORGE L. MEHREN,
*Assistant Secretary.*

[F.R. Doc. 64-13473; Filed, Dec. 30, 1964; 8:47 a.m.]

# Title 12—BANKS AND BANKING

## Chapter V—Federal Home Loan Bank Board

### SUBCHAPTER D—FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

[No. FSLIC-1,952]

### PART 561—DEFINITIONS

### Definition of Specified Assets

DECEMBER 28, 1964.

Resolved that, notice and public procedure having been duly afforded (29 F.R. 15222) and all relevant material presented or available having been considered by it, the Federal Home Loan Bank Board, upon the basis of such consideration and of determination by it of the advisability of amendment of § 561.17 of the rules and regulations for Insurance of Accounts (12 CFR 561.17) in order to eliminate the effect of short-term transactions distorting the computation of specified assets, and for the purpose of effecting such amendment, hereby amends said § 561.17 as follows, effective December 31, 1964.

Paragraph (b) of § 561.17 of the rules and regulations for Insurance of Accounts is hereby amended to read as follows:

**§ 561.17 Specified assets.**

• • • • •

(b) In computing specified assets at the close of any semiannual period, any asset which is sold or disposed of in one semiannual period and then repurchased or reacquired in the next semiannual period, or purchased or acquired in one semiannual period and then sold or disposed of in the next semiannual period, shall, unless otherwise authorized by the Corporation, be computed as if it had not been sold or disposed of, or purchased or acquired, during such initial semiannual period.

Resolved further that, since semiannual reports prepared as of December 31, 1964, would be distorted by short-term transactions of the type dealt with, the Board hereby finds that postponement of the effective date under the provisions of § 508.14 of the general regulations of the Federal Home Loan Bank Board and section 4(c) of the Administrative Procedure Act is impracticable and contrary to the public interest and provides that the amendment shall become effective as hereinbefore set forth.

(Secs. 402, 403, 48 Stat. 1256, 1257, as amended; 12 U.S.C. 1725, 1726. Reorg. Plan No. 3 of 1947, 12 F.R. 4981, 3 CFR, 1947 Supp.)

By the Federal Home Loan Bank Board.

[SEAL] JOSEPH F. SCHRAM,
*Assistant Secretary.*

[No. FSLIC-1,951]

### PART 563—OPERATIONS

### Participating Loans

DECEMBER 28, 1964.

Whereas, by Resolution No. FSLIC-1,910, dated November 5, 1964, and duly published in the FEDERAL REGISTER on November 11, 1964 (29 F.R. 15223), this Board resolved that pursuant to Part 508 of the general regulations of the Federal Home Loan Bank Board (12 CFR Part 508), and § 567.1 of the rules and regulations for Insurance of Accounts (12 CFR 567.1), it was proposed that § 563.9-1 of the rules and regulations for Insurance of Accounts (12 CFR 563.9-1) be amended by an amendment the substance of which was set out in said publication, and

Whereas, all relevant material presented or available having been considered by it;

*It is resolved*, That this Board hereby determines to adopt the amendment, as published, without change.

It is further resolved that, inasmuch as the foregoing amendment relieves restriction, the Board hereby finds that postponement of the effective date under the provisions of § 508.14 of the general regulations of the Federal Home Loan Bank Board and section 4(c) of the Administrative Procedure Act is not required and the Board hereby provides that the said amendment shall become effective on December 31, 1964.

(Secs. 402, 403, 48 Stat. 1256, 1257, as amended; 12 U.S.C. 1725, 1726. Reorg. Plan No. 3 of 1947, 12 F.R. 4981, 3 CFR, 1947 Supp.)

By the Federal Home Loan Bank Board.

[SEAL] JOSEPH F. SCHRAM,
*Assistant Secretary.*

**§ 563.9-1 Participation loans.**

• • • • •

Amend paragraphs (c) and (d) of § 563.9-1 of the rules and regulations for Insurance of Accounts to read as follows:

(c) *Percentage of assets.* No insured institution shall participate in the making of a loan pursuant to the approval granted by this section or purchase a participation in a loan pursuant to such approval if the amount of such participation interest plus the amount of such institution's outstanding investments in participation interests in loans made pursuant to the approval granted by this section aggregate a total amount exceeding 40 percent of such institution's assets. In the case of an insured institution which, at the close of its most recent semiannual period, had scheduled items, other than assets acquired in a merger instituted for supervisory reasons, not in excess of 4 percent of its specified assets, the said 40 percent shall be exclusive of participation interests in loans on property located more than 50 miles but not more than 100 miles from the insured institution's principal office and outside the territory aforesaid. The provisions of this paragraph do not apply to any loan that is an insured loan or a guaranteed loan.

(d) *Limitations.* No insured institution that originated the loan shall sell a participation in any loan at any time when the percentage of such institution's scheduled items, other than assets acquired in a merger instituted for supervisory reasons, exceeds 4 percent of its specified assets, as reported in its most recent semiannual report.

• • • • •

(Sec. 402, 403, 48 Stat. 1256, 1257, as amended; 12 U.S.C. 1725, 1726. Reorg. Plan No. 3 of 1947, 12 F.R. 4981, 3 CFR, 1947 Supp.)

# Title 15—COMMERCE AND FOREIGN TRADE

## Chapter V—Weather Bureau, Department of Commerce

### PART 503—SCHEDULE OF CHARGES FOR SERVICES

Part 503 of Chapter V of Subtitle B of Title 15 of the Code of Federal Regulations is revised to read as follows:

**§ 503.1 Charges for furnishing copies of weather records.**

(a) Duplicating machine copies:

| | |
|---|---|
| (1) Ozalid, Bruning, and similar processes: | |
| (i) Synoptic maps and charts: | |
| (a) Up to 360 sq. inches (per copy) | $0.30 |
| (b) 361 to 510 sq. inches (per copy) | .31 |
| (c) 511 to 800 sq. inches (per copy) | .32 |
| (d) 801 to 1000 sq. inches (per copy) | .33 |
| (e) 1001 to 1220 sq. inches (per copy) | .35 |
| (f) Above 1220 sq. inches $0.37 for first 1220 sq. inches and $0.03 for each additional 144 sq. inches. | |
| (ii) Other than synoptic maps and charts: | |
| 8 x 10½ (per print) | $0.10 |
| Over 8 x 10½ (per sq. ft.) | .07 |
| (2) Photocopy prints (photostat, etc.): | |
| 8½ x 11 or smaller | $0.35 |
| 9 x 12 to 12 x 17 | .50 |
| 14 x 17 to 18 x 24 | .85 |
| (3) Thermofax copies or direct contact prints: | |
| 8½ x 11 | $0.11 |
| Larger than 8½ x 11 (per sq. ft.) | .16 |
| (4) Transcopy prints: | |
| 8½ x 10 | .40 |
| 10 x 12 | .40 |
| (5) Xerox copies (maximum size 9 x 4) | .12 |

(b) Photography:

| | |
|---|---|
| (1) Prints, black and white: | |
| (i) Contact: | |
| 8 x 10 | .35 |
| 11 x 14 | .50 |
| 14 x 17 | .70 |
| 16 x 20 | 1.00 |
| 20 x 24 | 1.25 |
| 30 x 40 | 2.25 |
| (ii) Enlargements by conventional processes: | |
| 5 x 7 | .45 |
| 8 x 10 | .60 |
| 11 x 14 | 1.00 |
| 20 x 24 | 1.50 |
| (iii) Enlargements from available microfilm using microfilm-printing equipment, e.g. 3M Reader Printer, Xerox 1824 Printer: | |
| Up to 18 x 24 | .35 |
| (2) Microfilm: | |
| (i) Negative film (one or two pages to exposure on panchromatic contrast film) 35 mm | 0.05 |
| Per frame or exposure 16 mm | 0.04 |
| (ii) Film copy (excluding radar film printed to register) Silver halide process, diazo process, or Kalvar process, unsprocketed, from negative of uniform density 35 mm | 6.00 |
| Per reel 16 mm | 5.50 |

(Reels are approximately 100 ft. in length and the price includes spool and box.)

SPECIAL PRICE NOTE: A single 100 foot reel of 35 mm diazo microfilm, unsprocketed, containing a month of data of the Daily Series, Synoptic Weather Maps, Part II, Northern Hemisphere Data Tabulations, will be furnished at $4.00 per reel on a curent continuing subscription basis. When furnished on an irregular and/or non-current basis, the regular price per reel will apply.

(iii) Film copy, radar film, sprocketed, printed to register.

Positive only.

| | |
|---|---|
| Per reel, approximately 100 feet 35 mm | 9.00 |
| Per reel (see note on length below) 16 mm | 7.00 |

NOTE: If copies from original photography on 16 mm camera, the length is approximately 100 feet. If reduced from original photography on 35 mm camera, the length is approximately 50 feet.

| | |
|---|---|
| (3) Microfiche, ozalid, negative only, 4" x 6" or 5" x 8" | 0.25 |

SPECIAL PRICE NOTE: A set of 5" x 8" microfiche cards, one for each day of the month, containing a month of data in the Daily Series, Synoptic Weather Maps, Part II, Northern Hemisphere Data Tabulations, will be furnished for $5.00 a month, on a current continuing subscription basis. When furnished on an irregular and/or non-current basis, the regular price per microfiche will apply.

(c) Time spent by field station employees in performing the following services will be charged at the rate of $4.40 per hour if services are performed during the normal working hours, or at the rate of $5.73 per hour if performed on overtime.

(1) Hand transcription of official meteorological records.

(2) Searching map or record files to assemble material.

(3) Unbinding and reassembling bound volumes of maps or records preparatory to making ozalid, photostat, or other reproductions.

NOTE: A minimum charge of $2.00 will be made for a single order on any of the items in this Exhibit except that this minimum charge shall not apply to single orders at a field station for preliminary Local Climatological Data prepared on government equipment.

(59 Stat. 1067, sec. 501, 65 Stat. 290, 5 U.S.C. 606, 140)

*Effective date:* January 1, 1965.

R. C. GRUBB,
*Acting Chief of Weather Bureau.*

# Title 18—CONSERVATION OF POWER AND WATER RESOURCES

## Chapter I—Federal Power Commission

### PART 260—STATEMENTS AND REPORTS (SCHEDULES)

[Docket No. R-262; Order No. 291]

### Monthly Statement of Natural Gas Pipeline Companies

REVISING MONTHLY STATEMENT FORM No. 11 (18 CFR 260.3)

DECEMBER 23, 1964.

1. By notice of proposed rulemaking issued May 19, 1964, and published in the FEDERAL REGISTER of May 23, 1964 (29 F.R. 6807), the Commission proposed to revise the reporting requirements of certain of the larger natural gas pipeline companies by revising FPC Form No. 11, submission of which is now required monthly by § 260.3 of the Commission's regulations, and by requiring the early reporting of some of the Form No. 11 information in a new Form No. 11A. Upon further consideration, the Commission has decided to withdraw its proposal for the new Form. For the reasons given herein we are promulgating the revision of FPC Form No. 11.

2. Existing Form No. 11 is required of all Class A and B natural gas pipeline companies and is a monthly report, due 30 days after the end of the reported month, covering certain revenue, expense, and gas volume data. We believe that reports by more than half of the companies now reporting may be discontinued and reporting may be confined to those 31 Class A and B companies selling, storing, and transporting about 90 percent of the natural gas subject to Commission rate regulation. At the same time, to facilitate individual regulation and to guide Commission policy formulation, the Commission plans to obtain in revised Form 11 certain additional data which cannot be determined from the present report, such as current wellhead and city gate prices for interstate pipeline gas and accrued revenues and expenditures of pipelines under producer and pipeline rate increases not yet approved by the Commission. The total information to be derived from revised Form 11 should enable the Commission to appraise more accurately for its regulatory needs such facts as the current level of natural gas activity, the current consumption of and prices charged for gas sold by pipelines, seasonal variations in use of capacity by customer category, the effect of storage upon the monthly peak demand, and the extent of fluctuations in receipts of gas by pipelines from the various sources. In view of the greater detail required by the revised Form 11, the period for reporting is being changed from 30 days to 40 days.

3. Comments were received from 19 of the pipeline companies affected, in addition to the Independent Natural Gas Association of America, and from the California Public Utilities Commission, one consulting firm, one brokerage company, and one private individual. There was some criticism of the additional administrative burden entailed; on the other hand, there were useful comments and suggestions which have been adapted or incorporated in the forms and regulations. Thus, peak day delivery figures in Table 4 are being limited to the winter months and such other months in which they are measured by the company. Definitions have been supplied for such terms as "imports", and "off-peak", and Table 5 identifies the monthly reporters and other interstate pipelines.

The Commission finds: In view of the foregoing and upon consideration of all relevant matters presented, it is necessary and appropriate in carrying out the provisions of the Natural Gas Act that FPC Report Form No. 11 be revised and promulgated in form as hereinafter ordered.

The Commission, acting pursuant to the Natural Gas Act, as amended, particularly Sections 10 and 16 thereof (52 Stat. 826, 830; 15 U.S.C. 717i, 717o), orders:

FPC Form No. 11 is revised as set out in Attachment A hereto.[1]

Section 260.3, Subchapter G of Chapter I, Title 18 of the Code of Federal Regulations is amended to read as follows:

**§ 260.3 Form No. 11, Natural gas pipeline company monthly statement.**

(a) The form of the monthly statement for natural gas companies designated therein, entitled FPC Form No. 11 is prescribed for the month beginning December, 1964, and thereafter.

(b) Each natural gas company, as defined in the Natural Gas Act, whose combined gas sales for resale and gas transported or stored for a fee exceeded 50 million Mcf at 14.73 psia (60° F) in the previous calendar year shall prepare and file with the Commission for the month beginning December, 1964, and for each month thereafter, two copies of Monthly Statement, FPC Form No. 11. Such copies shall be filed within 40 days after the end of the reported month and shall be signed by the Chief Accounting Officer of the reporting company, but is not required to be under oath.

The title of this proceeding shall read as set forth in the caption above.

Companies presently filing existing Form 11 which are not required to file the new Form 11, herein promulgated, shall continue to report on the form heretofore in use through the reporting month of December 1964.

[1] Filed as part of the original document.

This amendment shall become effective upon issuance of this order.

The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

[SEAL] JOSEPH H. GUTRIDE, *Secretary.*

[F.R. Doc. 64-13452; Filed, Dec. 30, 1964; 8:45 a.m.]

# Title 19—CUSTOMS DUTIES

## APPENDIX A—TABLE OF AMENDMENTS TO THE TARIFF SCHEDULES OF THE UNITED STATES

The following entries are added to Appendix A of Title 19, tabulated in the order of line item numbers and headnote designations affected:

SCHEDULE 1—ANIMAL AND VEGETABLE PRODUCTS

PART 11—COFFEE, TEA, MATÉ, AND SPICES

| Item | Articles | Rates of duty 1 | Rates of duty 2 | Amendatory instrument |
|---|---|---|---|---|
| | Subpart A—Coffee and Coffee Substitutes, Tea, Maté | | | As amended by Pub. Law 88-337, 78 Stat. 232. |
| | *Subpart A headnotes:* 1. The rates of duty specified in items 160.10, 160.20, 160.21, and 160.22 shall not apply to any product imported into Puerto Rico upon which a duty is imposed under the authority of section 319 of this Act. | | | |
| | Coffee extracts, essences, and concentrates (including soluble or instant coffee): | | | |
| 160.20 | Soluble or instant coffee (containing no admixture of sugar, cereal, or other additive) | Free | Free | As amended Pub. Law 88-337, 78 Stat. 232. |
| 160.21 | Other | 3 cents per lb. | 3 cents per lb. | |
| 160.22 | If products of Cuba | 2.4 cents per lb.(s). | | |

SCHEDULE 3—TEXTILE FIBERS AND TEXTILE PRODUCTS

PART 1—TEXTILE FIBERS AND WASTES; YARNS AND THREADS

| Item | Articles | | | Amendatory instrument |
|---|---|---|---|---|
| | Subpart C—Wool and Related Animal Hair | | | |
| | *Subpart C headnotes:* 4. For the purposes of item 306.00— (a) a tolerance of not more than 10 percent of wools other than Karakul not finer than 44s may be allowed in each bale or package of wools imported as not finer than 40s, and a tolerance of not more than 10 percent of wools not finer than 48s may be allowed in each bale or package of wools imported as not finer than 46s. | | | As amended by Pub. Law 88-331, 78 Stat. 226. |
| 306.00 | Wools provided for in item 306.10, 306.11, 306.12, or 306.13, all other wools of whatever blood or origin not finer than 46s (except carbonized wools), and hair of the camel provided for in item 306.40, 306.41, 306.42, or 306.43, entered by a dealer, manufacturer, or processor for use only in the manufacture of camel hair belting, felt or knit boots, floor coverings, heavy fulled lumbermen's socks, press cloth, or papermakers' felts; and Karakul wools, and other wools of whatever blood or origin not finer than 40s, entered by a dealer, manufacturer, or processor for use only in the manufacture of pressed felt for polishing plate and mirror glass. | Free, under bond in accordance with headnote 4 of this subpart. | Free, under bond in accordance with headnote 4 of this subpart. | As amended by Pub. Law 88-331, 78 Stat. 226. |

PART 5—SAMPLES; ARTICLES ADMITTED FREE OF DUTY UNDER BOND

| | | | | |
|---|---|---|---|---|
| | Subpart C—Articles Admitted Temporarily Free of Duty Under Bond | | | |
| | *Subpart C headnotes:* 1. The articles described in the provisions of this subpart, when not imported for sale or for sale on approval, may be admitted into the United States without the payment of duty, under bond for their exportation within 1 year from the date of importation, which period, in the discretion of the Secretary of the Treasury, may be extended, upon application, for one or more further periods which, when added to the initial 1 year, shall not exceed a total of 3 years, except that articles imported under item 864.75 shall be admitted under bond for their exportation within 6 months from the date of importation and such 6-months period shall not be extended. For purposes of this headnote, an aircraft engine or propeller, or any part or accessory of either, imported under item 864.05, which is removed physically from the United States as part of an aircraft departing from the United States in international traffic shall be treated as exported. | | | As amended by Pub. Law 88-324, 78 Stat. 231. |

SCHEDULE 8—SPECIAL CLASSIFICATION PROVISIONS

PART 1—ARTICLES EXPORTED AND RETURNED

| Item | Articles | Rates of duty 1 | Rates of duty 2 | Amendatory instrument |
|---|---|---|---|---|
| | Subpart A—Articles Not Advanced or Improved Abroad | | | |
| | *Subpart A headnotes:* 2. For the purposes of item 804.00— (a) when because of the destruction of customs records or for other cause it is impracticable to establish whether drawback was allowed, or the amount allowed, on a returned article, there shall be assessed thereon an amount of duty equal to the estimated drawback and internal-revenue tax which would be allowable or refundable if the imported merchandise used in the manufacture or production of the returned article were dutiable or taxable at the rate applicable to such merchandise on the date of entry, but in no case more than the duty and tax that would apply if the article were wholly of foreign origin; (b) tobacco products and cigarette papers and tubes classifiable under such item may be released from customs custody, without payment of that part of the duty attributable to the internal-revenue tax, for return to internal-revenue bond as provided by section 5704(c) of the Internal Revenue Code of 1954; and (c) in order to facilitate the ascertainment and collection of the duty provided for, the Secretary of the Treasury is authorized to ascertain and specify the amounts of duty equal to drawback or internal-revenue tax which shall be applied to articles or classes or kinds of articles, and to exempt from the assessment of duty articles or classes or kinds of articles with respect to which the collection of such duty involves expense and inconvenience to the Government which is disproportionate to the probable amount of such duty. | | | As amended by Pub. Law 88-342, 78 Stat. 234. |

PART 4—IMPORTATIONS OF RELIGIOUS, EDUCATIONAL, SCIENTIFIC, AND OTHER INSTITUTIONS

| | | | | |
|---|---|---|---|---|
| | *Part 4 headnotes:* 1. Except as provided in items 850.50 and 852.20, the articles covered by this part must be imported exclusively for the use of the institutions involved, and not for distribution, sale, or other commercial use. | | | As amended by Pub. Law 88-482, 78 Stat. 594. |
| | Articles imported for use in any scientific public collection for exhibition for scientific or educational purposes: | | | |
| 852.20 | Wild animals (including birds and fish) imported for use, or for sale for use, in any scientific public collection for exhibition for scientific or educational purposes. | Free | Free | As amended by Pub. Law 88-482, 78 Stat. 594. |

APPENDIX TO THE TARIFF SCHEDULES

PART 1—TEMPORARY LEGISLATION

| Item | Article | Rates of duty 1 | Rates of duty 2 | Effective period | Amendatory instrument |
|---|---|---|---|---|---|
| | Subpart B—Temporary Provisions Amending the Tariff Schedules | | | | |
| 907.15 | Aluminum oxide (alumina) (provided for in item 417.12, part 2C, schedule 4) when imported for use in producing aluminum. | Free | Free | On or before July 15, 1966. | As amended by Pub. Law 88-362, 78 Stat. 298. |
| 909.20 | Natural graphite, crude and refined, provided for in item 517.31, part 1E, schedule 5, if valued $50 per ton or less. | Free | Free | On or before June 30, 1966. | As amended by Pub. Law 88-330, 78 Stat. 225. |
| 909.30 | Bauxite, calcined (provided for in item 521.17, part 1J, schedule 5). | Free | Free | On or before July 15, 1966. | As amended by Pub. Law 88-362, 78 Stat. 298. |
| 911.05 | Bauxite ore (provided for in item 601.06, part 1, schedule 6). | Free | Free | On or before July 15, 1966. | As amended by Pub. Law 88-362, 78 Stat. 298. |
| 911.07 | Manganese ore, including ferruginous manganese ore, and manganiferous iron ore, all the foregoing containing over 10 percent by weight of manganese (provided for in item 601.27, part 1, schedule 6). | Free | 1 cent per lb. on manganese content. | On or before June 30, 1967. | As added by Pub. Law 88-338, 78 Stat. 232. |

| Item | Article | Rates of duty 1-a | Rates of duty 1-b | Rates of duty 2 | Effective period | Amendatory instrument |
|---|---|---|---|---|---|---|
| | Metal waste and scrap (provided for in part 2, schedule 6), except lead, zinc, and tungsten waste and scrap; unwrought metal (except copper, lead, zinc, and tungsten) in the form of pigs, ingots, or billets (a) which are defective or damaged, or have been produced from melted down metal waste and scrap for convenience in handling and transportation without sweetening, alloying, fluxing, or deliberate purifying, and (b) which cannot be commercially used without remanufacture; relaying or rerolling rails; and articles of metal (except articles of lead, of zinc, or of tungsten, and not including metal-bearing materials provided for in schedule 4 or in part 1 of schedule 6 and not including unwrought metal provided for in part 2 of schedule 6) to be used in remanufacture by melting: | | | | | |
| 911.10 | Copper waste and scrap | 1.7 cents per lb. on 99.6% of copper content. | 2 cents per lb. on 99.6% of copper content. | 4 cents per lb. on 99.6% of copper content. | On or before June 30, 1965. | As amended by Pub. Law 88-324, 78 Stat. 222. |
| 911.11 | Articles of copper | 1.275 cents per lb. | 1.5 cents per lb. | 3 cents per lb. | | |
| 911.12 | Other | Free | Free | Free | | |

| | | Rates of duty | | Effective period | |
|---|---|---|---|---|---|
| | | 1 | 2 | | |
| 911.70 | Copying lathes used for making rough or finished shoe lasts from models of shoe lasts and, in addition, capable of producing more than one size shoe last from a single size model of a shoe last (provided for in item 674.42, part 4F, schedule 6). | Free | Free | On or before June 30, 1966. | As amended by Pub. Law 88-336, 78 Stat. 231. |
| 915.20 | The personal and household effects (with such limitation on the importation of alcoholic beverages and tobacco products as the Secretary of the Treasury may prescribe) of any person in the service of the United States who returns to the United States upon the termination of assignment to extended duty (as defined in regulations issued in connection with this provision) at a post or station outside the customs territory of the United States, or of returning members of his family who have resided with him at such post or station, or of any person evacuated to the United States under Government orders or instructions (see part 2B of schedule 8). | Free (see headnote 2 of this subpart). | Free (see headnote 2 of this subpart). | On or before June 30, 1966. | As amended by Pub. Law 88-323, 78 Stat. 222. |

PART 3—ADDITIONAL IMPORT RESTRICTIONS PROCLAIMED PURSUANT TO SECTION 22 OF THE AGRICULTURAL ADJUSTMENT ACT, AS AMENDED

| Item | Article | Rates of duty | | Amendatory instrument |
|---|---|---|---|---|
| | | 1 | 2 | |
| | *Part 3 headnotes:*<br>2. *Exclusions.*—The import restrictions provided for in this part do not apply with respect to—<br>(d) certified or registered seed wheat for use for seeding and crop-improvement purposes, in bags tagged and sealed by an officially recognized seed-certifying agency of the country of production, if—<br>(i) the individual shipment amounts to 100 bushels (of 60 pounds each for wheat) or less, or<br>(ii) the individual shipment amounts to more than 100 bushels and the written approval of the Secretary of Agriculture or his designated representative is presented at the time of entry, or bond is furnished in a form prescribed by the Commissioner of Customs in an amount equal to the value of the merchandise as set forth in the entry, plus the estimated duty as determined at the time of entry, conditioned upon the production of such written approval within six months from the date of entry; | | | As amended by Proclamation 3597, 29 F.R. 9421; 3 CFR. |
| | | Quota quantity (in pounds) | | |
| | Whenever, in any 12-month period beginning July 1 in any year (January 1 in any year for item 950.06), the respective aggregate quantity specified below for one of the numbered classes of articles has been entered, no article in such class may be entered during the remainder of such period: | | | |
| 960.1 | Dried milk, dried cream, and dried whey provided for in part 4 of schedule 1:<br>Described in items 115.45 and 118.05 | 496,000 | | As amended by Proclamation 3597, 29 FR 9421; 3 CFR. |

# Title 21—FOOD AND DRUGS

## Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

### SUBCHAPTER B—FOOD AND FOOD PRODUCTS

### PART 51—CANNED VEGETABLES

BLACK-EYE PEAS, POTATOES; CONFIRMATION OF EFFECTIVE DATE OF ORDER LISTING EDTA SALTS AS OPTIONAL INGREDIENTS

Pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (secs. 401, 701, 52 Stat. 1046, 1055, as amended 70 Stat. 919, 72 Stat. 948; 21 U.S.C. 341, 371) and in accordance with the authority delegated to the Commissioner of Food and Drugs by the Secretary of Health, Education, and Welfare (21 CFR 2.90; 29 F.R. 471), notice is given that no objections were filed to the order published in the FEDERAL REGISTER November 5, 1964 (29 F.R. 14984), that amended the identity standard for canned vegetables other than those specifically regulated to permit the optional use of disodium EDTA in canned black-eye peas and calcium disodium EDTA in canned potatoes. The amendments promulgated by that order will become effective January 4, 1965.

Dated: December 24, 1964.

JOHN L. HARVEY,
*Deputy Commissioner of Food and Drugs.*

[F.R. Doc. 64-13485; Filed, Dec. 30, 1964; 8:48 a.m.]

### PART 121—FOOD ADDITIVES

#### Subpart F—Food Additives Resulting From Contact With Containers or Equipment and Food Additives Otherwise Affecting Food

RUBBER ARTICLES INTENDED FOR REPEATED USE

The Commissioner of Food and Drugs, having evaluated the data submitted in a petition (FAP 5B1506) filed by The B. F. Goodrich Company, Akron, Ohio, and other relevant material, has concluded that the food additive regulations should be amended to provide for the use of *N*-alkyl($C_{14}$-$C_{18}$)-1,3-propanediamine-*N*,*N*',*N*'-triacetic acid as an antioxidant in rubber articles intended for repeated use in contact with food. Therefore, pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409(c)(1), 72 Stat. 1786; 21 U.S.C. 348(c)(1)), and under the authority delegated to the Commissioner by the Secretary of Health, Education, and Welfare (21 CFR 2.90; 29 F.R. 471), § 121.2562(c)(4)(iii) is amended by inserting alphabetically in the list of substances a new item, as follows:

§ 121.2562 **Rubber articles intended for repeated use.**

(iii) • • •

*N*-Alkyl($C_{14}$-$C_{18}$)-1,3-propanediamine-*N*,*N*',*N*'-triacetic acid.

Any person who will be adversely affected by the foregoing order may at any time within 30 days from the date of its publication in the FEDERAL REGISTER file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 5440, 330 Independence Avenue SW., Washington, D.C., 20201, written objections thereto, preferably in quintuplicate. Objections shall show wherein the person filing will be adversely affected by the order and specify with particularity the provisions of the order deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought. Objections may be accompanied by a memorandum or brief in support thereof.

*Effective date.* This order shall be effective on the date of its publication in the FEDERAL REGISTER.

(Sec. 409(c)(1), 72 Stat. 1786; 21 U.S.C. 348(c)(1))

Dated: December 24, 1964.

JOHN L. HARVEY,
*Deputy Commissioner of Food and Drugs.*

## Chapter II—Bureau of Narcotics, Department of the Treasury

[T.D. 75]

### PART 305—OPIATES

#### Piritramid Classified as an Opiate

Notice is hereby given pursuant to the provisions of section 5(b) of the Narcotics Manufacturing Act of 1960, 74 Stat. 60, 21 U.S.C. 503(b), Supp. V and 21 CFR 307.61(b) that the United States has received notification under date of September 17, 1964, from the Secretary-General of the United Nations that the World Health Organization has found a certain substance, not heretofore determined to be an opiate, to fall under the regime laid down in the 1931 Convention for the drugs specified in Article 1, paragraph 2, Group I of that Convention.

The substance and its salts to which the World Health Organization decision relates and which has been found by that Organization to be convertible into a drug capable of producing addiction is:

(Piritramid) (R. 3365) 1-(3-cyano-3,3-diphenylpropyl)-4-(1-piperidino) piperidine-4-carboxylic acid amide.

Accordingly, § 305.2(b) is amended by adding a new drug to the chronological list of findings. As amended, § 305.2(b) reads as follows:

§ 305.2 **Chronological list of findings.**

• • • • •

(b) The following is a chronological list of drugs or other substances found by the World Health Organization as being capable of producing addiction or of conversion into a drug or other substance capable of producing addiction and designated as opiates by the Commissioner of Narcotics pursuant to the provisions of § 307.61(b) of this chapter. Drugs and other substances listed include any salts thereof.

JUNE 20, 1962

(Methadone - intermediate) 4 - cyano - 2 - dimethylamino-4,4 diphenylbutane.
(Pethidine - intermediate - A) 4 - cyano - 1 - methyl-4-phenylpiperidine.
(Moramide-intermediate) 2-methyl-3-morpholino - 1,1 - diphenylpropanecarboxylic acid.

APRIL 2, 1963

(Pethidine-intermediate-C) 1-methyl-4-phenylpiperidine-4-carboxylic acid.

APRIL 7, 1964

(Norpipanone) 4,4-diphenyl-6-piperidino-3-hexanone.
(Fentanyl) 1-phenethyl-4-N-propionylanilinopiperidine.

DECEMBER 31, 1964

(Piritramid) (R. 3365) 1-(3-cyano-3, 3-diphenylpropyl)-4-(1-piperidino) piperidine-4-carboxylic acid amide.

Because this amendment of § 305.2(b) merely adds to the chronological list of findings a new drug designated by the World Health Organization as being convertible into a drug capable of producing addiction and therefore recognized and published as an opiate by the Commissioner of Narcotics under the provisions of section 5(b) of the Narcotics Manufacturing Act of 1960, 74 Stat. 60, 21 U.S.C. 503(b), Supp. V and 21 CFR 307.61(b), it is hereby found that it is unnecessary to issue this Treasury Decision with notice and public procedure thereon under section 4(a) of the Administrative Procedure Act, approved June 11, 1946, or subject to the effective date limitation of section 4(c) of that Act.

*Effective date.* This Treasury Decision shall become effective upon publication in the FEDERAL REGISTER.

(Sec. 5(b) Pub. Law 86-429 (74 Stat. 60); sec. 17, Pub. Law 86-429; 74 Stat. 67)

[SEAL] HENRY L. GIORDANO,
*Commissioner of Narcotics.*

Approved: December 22, 1964.

JAMES A. REED,
*Assistant Secretary of the Treasury.*

# Title 26—INTERNAL REVENUE

## Chapter I—Internal Revenue Service, Department of the Treasury

### SUBCHAPTER A—INCOME TAX

[T.D. 6789]

### PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

#### Carryback and Carryover of, and Overall Limitation on, Foreign Tax Credit

On June 16, 1964, notice of proposed rule making was published in the FEDERAL REGISTER (29 F.R. 7679) regarding the amendment of Income Tax Regulations (26 CFR Part 1) to conform such regulations to section 42(a) of the Technical Amendments Act of 1958 (72 Stat. 1639) and to sections 1, 2, 3 (a) and (b), and 6(b)(2) of the Act of September 14, 1960 (Public Law 86-780, 74 Stat. 1010, 1011, 1013, 1016), and to make clarifying changes. After consideration of all such relevant matter as was presented by interested persons regarding the rules proposed, the following amendments are hereby adopted effective as provided:

PARAGRAPH 1. Section 1.904-1, as set forth in the notice of proposed rule making, is revised to read.

PAR. 2. Section 1.904-3, as set forth in the notice of proposed rule making, is revised.

(Sec. 7805 of the Internal Revenue Code of 1954, 68A Stat. 917; 26 U.S.C. 7805)

[SEAL] BERTRAND M. HARDING,
*Acting Commissioner of Internal Revenue.*

Approved: December 28, 1964.

STANLEY S. SURREY,
*Assistant Secretary of the Treasury.*

In order to conform the Income Tax Regulations (26 CFR Part 1) to section 42(a) of the Technical Amendments Act of 1958 (72 Stat. 1639) and to the first section, section 2, section 3 (a) and (b), and section 6(b)(2) of the Act of September 14, 1960 (Public Law 86-780, 74 Stat. 1010, 1011, 1013, 1016), and to make clarifying changes, such regulations are hereby amended as follows, effective as provided:

PARAGRAPH 1. Section 1.901 is amended by revising section 901(a), by revising so much of section 901(b) as precedes paragraph (1) thereof, and by adding a historical note at the end of § 1.901. These revised and added provisions read as follows:

§ 1.901 **Statutory provisions; taxes of foreign countries and of possessions of United States.**

Sec. 901. *Taxes of foreign countries and of possessions of United States*—(a) *Allowance of credit.* If the taxpayer chooses to have the benefits of this subpart, the tax imposed by this chapter shall, subject to the applicable limitation of section 904, be credited with the amounts provided in the applicable paragraph of subsection (b) plus, in the case of a corporation, the taxes deemed to have been paid under section 902. Such choice for any taxable year may be made or changed at any time before the expiration of the period prescribed for making a claim for credit or refund of the tax imposed by this chapter for such taxable year. The credit shall not be allowed against the tax imposed by section 531 (relating to the tax on accumulated earnings), against the additional tax imposed for the taxable year under section 1333 (relating to war loss recoveries), or against the personal holding company tax imposed by section 541.

(b) *Amount allowed.* Subject to the applicable limitation of section 904, the following amounts shall be allowed as the credit under subsection (a):

• • • • • •

[Sec. 901 as amended by sec. 3 (a) and (b), Act of Sept. 14, 1960 (Pub. Law 86-780, 74 Stat. 1013)]

PAR. 2. Section 1.901-1 is amended by revising paragraph (d) to read as follows:

§ 1.901-1 **Allowance of credit for taxes.**

• • • • • •

(d) *Period during which election can be made or changed.* The taxpayer may, for a particular taxable year, claim the benefits of section 901 (or change his choice if previously made) at any time before the expiration of the period prescribed by section 6511(a) (or section 6511(c) if the period is extended by agreement) for making a claim for credit or refund of the tax imposed by chapter 1 for such taxable year. Such period for such taxable year is determined without regard to the special period prescribed by section 6511(d)(3).

• • • • • •

PAR. 3. Section 1.902 is amended by adding a new subsection (e) at the end of section 902 and by adding a historical note at the end of § 1.902. The added provisions read as follows:

§ 1.902 **Statutory provisions; credit for corporate stockholder in foreign corporation.**

Sec. 902. *Credit for corporate stockholder in foreign corporation.* • • •

(e) *Cross reference.* For reduction of credit with respect to dividends paid out of accumulated profits for years for which cer-

tain information is not furnished, see section 6038.

[Sec. 902 as amended by sec. 6(b)(2), Act of Sept. 14, 1960 (Pub. Law 86-780, 74 Stat. 1016)]

PAR. 4. Section 1.902-1 is amended by revising paragraphs (a)(1), (b), and (c). These amended provisions read as follows:

**§ 1.902-1 Taxes of foreign corporation.**

(a) *Domestic corporation owning stock of a foreign corporation.* (1) In the case of a domestic corporation which owns at least 10 percent of the voting stock of a foreign corporation from which it receives dividends in any taxable year, the credit for foreign taxes includes the income, war profits, and excess profits taxes deemed to have been paid by such domestic corporation under section 902. The amount of taxes so deemed to have been paid by the domestic corporation is determined by taking the same proportion of any income, war profits, and excess profits taxes paid, or deemed to have been paid, or accrued (determined with regard to the reductions, if any, under section 6038(b)) to any foreign country or to any possession of the United States by such foreign corporation, on or with respect to the accumulated profits of such foreign corporation from which such dividends were paid, which the amount of any such dividends received bears to the amount of such accumulated profits. If dividends are received from more than one such foreign corporation, the taxes deemed to have been paid by the domestic corporation are computed separately for the dividends received from each such foreign corporation. If the credit for foreign taxes includes taxes deemed to have been paid under section 902, the taxpayer must furnish the same information with respect to such taxes as it is required to furnish with respect to the taxes actually paid or accrued by it. Taxes paid or accrued by such a foreign corporation are deemed to have been paid by the domestic corporation for purposes of credit only. For other information required to be furnished by the domestic corporation with respect to certain foreign corporations and the reduction of credit if such information is not furnished, see section 6038 and the regulations thereunder. For other limitations on the amount of credit, see § 1.904-1.

* * * * *

(b) *Foreign corporation owning stock of another foreign corporation.* If any foreign corporation (hereafter in this paragraph referred to as the former corporation) coming within the scope of paragraph (a) of this section owns 50 percent or more of the voting stock of another foreign corporation (hereafter in this paragraph referred to as the latter corporation) from which it receives dividends in any taxable year, the former corporation shall be deemed under section 902(b) to have paid that proportion of any income, war profits, and excess profits taxes paid or accrued (determined with regard to the reductions, if any, under section 6038(b)) to any foreign country or to any possession of the United States by the latter corporation, on or with respect to the accumulated profits of such latter corporation from which such dividends were paid, which the amount of such dividends bears to the amount of such accumulated profits. Such tax so deemed to have been paid shall then be taken into consideration in determining the amount of income, war profits, and excess profits taxes paid or deemed to have been paid by the former corporation to any possession or foreign country on or with respect to its own accumulated profits from which the dividends were paid by such corporation to the domestic corporation.

(c) *Source of income of foreign subsidiaries and country to which tax is deemed to have been paid.* For the purpose of section 904(a)(1) (relating to the per-country limitation), dividends of a foreign corporation (at least 10 percent of whose voting stock is owned by a domestic corporation) shall be deemed to have been derived from sources within the foreign country or possession of the United States in which such foreign corporation is incorporated, to the extent that under section 862(a)(2) such dividends are treated as income from sources without the United States. In addition, for purposes of section 904(a)(1) all income, war profits, and excess profits taxes paid, or deemed to have been paid under section 902, by such foreign corporation to any foreign country or possession of the United States shall be deemed to have been paid to the country or possession under whose laws such foreign corporation is incorporated.

* * * * *

PAR. 5. Section 1.904 is amended by revising section 904 and by adding a historical note. The amended section reads as follows:

**§ 1.904 Statutory provisions; limitation on credit.**

Sec. 904. *Limitation on credit*—(a) *Alternative limitations*—(1) *Per-country limitation.* In the case of any taxpayer who does not elect the limitation provided by paragraph (2), the amount of the credit in respect of the tax paid or accrued to any foreign country or possession of the United States shall not exceed the same proportion of the tax against which such credit is taken which the taxpayer's taxable income from sources within such country or possession (but not in excess of the taxpayer's entire taxable income) bears to his entire taxable income for the same taxable year.

(2) *Overall limitation.* In the case of any taxpayer who elects the limitation provided by this paragraph, the total amount of the credit in respect of taxes paid or accrued to all foreign countries and possessions of the United States shall not exceed the same proportion of the tax against which such credit is taken which the taxpayer's taxable income from sources without the United States (but not in excess of the taxpayer's entire taxable income) bears to his entire taxable income for the same taxable year.

(b) *Election of overall limitation*—(1) *In general.* A taxpayer may elect the limitation provided by subsection (a)(2) for any taxable year beginning after December 31, 1960. An election under this paragraph for any taxable year shall remain in effect for all subsequent taxable years, except that it may be revoked with the consent of the Secretary or his delegate with respect to any taxable year.

(2) *Election after revocation.* If a taxpayer has made an election under paragraph (1) and such election has been revoked, such taxpayer shall not be eligible to make a new election under paragraph (1) for any taxable year, unless the Secretary or his delegate consents to such new election.

(3) *Form and time of election and revocation.* An election under paragraph (1), and any revocation of such an election, may be made only in such manner as the Secretary or his delegate may by regulations prescribe. Such an election or revocation with respect to any taxable year may be made or changed at any time before the expiration of the period prescribed for making a claim for credit or refund of the tax imposed by this chapter for such taxable year.

(c) *Taxable income for purpose of computing limitation.* For purposes of computing the applicable limitation under subsection (a), the taxable income in the case of an individual, estate, or trust shall be computed without any deduction for personal exemptions under section 151 or 642(b).

(d) *Carryback and carryover of excess tax paid.* Any amount by which any such tax paid or accrued to any foreign country or possession of the United States for any taxable year beginning after December 31, 1957, for which the taxpayer chooses to have the benefits of this subpart exceeds the applicable limitation under subsection (a) shall be deemed tax paid or accrued to such foreign country or possesison of the United States in the second preceding taxable year in the first preceding taxable year, and in the first, second, third, fourth, or fifth succeeding taxable years, in that order and to the extent not deemed tax paid or accrued in a prior taxable year, in the amount by which the applicable limitation under subsection (a) for such preceding or succeeding taxable year exceeds the sum of the tax paid or accrued to such foreign country or possession for such preceding or succeeding taxable year and the amount of the tax for any taxable year earlier than the current taxable year which shall be deemed to have been paid or accrued in such preceding or subsequent taxable year (whether or not the taxpayer chooses to have the benefits of this subpart with respect to such earlier taxable year). Such amount deemed paid or accrued in any year may be availed of only as a tax credit and not as a deduction and only if taxpayer for such year chooses to have the benefits of this subpart as to taxes paid or accrued for that year to foreign countries or possessions. For purposes of this subsection, the terms "second preceding taxable year" and "first preceding taxable year" do not include any taxable year beginning before January 1, 1958.

(e) *Carrybacks and carryovers where overall limitation is elected*—(1) *Foreign taxes to be aggregated for purposes of subsection (d).* With respect to each taxable year of the taxpayer to which the limitation provided by subsection (a)(2) applies, the taxes referred to in the first sentence of subsection (d) shall, for purposes of applying such first sentence, be aggregated on an overall basis (rather than taken into account on a per-country basis).

(2) *Foreign taxes may not be carried from per-country year to overall year or from overall year to per-country year.* No amount paid or accrued for any taxable year to which the limitation provided by subsection (a)(1) applies shall (except for purposes of determining the number of taxable years which have elapsed) be deemed paid or accrued under subsection (d) in any taxable year to which the limitation provided by subsection (a)(2) applies. No amount paid or accrued for any taxable year to which the limitation provided by subsection (a)(2) applies shall (except for purposes of determining the number of taxable years which have elapsed) be deemed paid or accrued under subsection (d) in any taxable year to which the limitation provided by subsection (a)(1) applies.

(f) *Cross-reference.* For special rule relating to the application of the credit provided by section 901 in the case of affiliated groups which include Western Hemisphere trade corporations for years in which the limitation provided by subsection (a)(2) applies, see section 1503(d).

[Sec. 904 as amended by sec. 42(a), Technical Amendments Act 1958 (72 Stat. 1639); sec. 1, Act of Sept. 14, 1960 (Pub. Law 86-780, 74 Stat. 1010)]

PAR. 6. Section 1.904-1 is amended to read as follows:

**§ 1.904-1 Limitation on credit for foreign taxes.**

(a) *Per-country limitation*—(1) *General.* In the case of any taxpayer who does not elect the overall limitation under section 904(a)(2), the amount allowable as a credit for income or profits taxes paid or accrued to a foreign country or a possession of the United States is subject to the per-country limitation prescribed in section 904(a)(1). Such limitation provides that the credit for such taxes paid or accrued (including those deemed to have been paid or accrued other than by reason of section 904(d)) to each foreign country or possession of the United States shall not exceed that proportion of the tax against which credit is taken which the taxpayer's taxable income from sources within such country or possession (but not in excess of taxpayer's entire taxable income) bears to his entire taxable income for the same taxable year.

(2) *Illustration of principles.* The operation of the per-country limitation under section 904(a)(1) on the credit for foreign taxes paid or accrued may be illustrated by the following examples:

*Example (1).* The credit for foreign taxes allowable for 1954 in the case of X, an unmarried citizen of the United States who in 1954 received the income shown below and had three exemptions under section 151, is $14,904, computed as follows:

| | |
|---|---|
| Taxable income (computed without deductions for personal exemptions) from sources within the United States | $50,000 |
| Taxable income (computed without deductions for personal exemptions) from sources within Great Britain | 25,000 |
| Total taxable income | 75,000 |
| United States income tax (based on taxable income computed with the deductions for personal exemptions) | 44,712 |
| British income and profits taxes | 18,000 |
| Per-country limitation $\left(\frac{25,000}{75,000}\right.$ of $\left.\$44,712\right)$ | 14,904 |
| Credit for British income and profits taxes (total British income and profits taxes, reduced in accordance with the per-country limitation) | 14,904 |

*Example (2).* Assume the same facts as in example (1), except that the sources of X's income and taxes paid are as shown below. The credit for foreign taxes allowable to X is $13,442.40, computed as follows:

| | |
|---|---|
| Taxable income (computed without deductions for personal exemptions) from sources within the United States | $50,000 |
| Taxable income (computed without deductions for personal exemptions) from sources within Great Britain | $15,000 |
| Taxable income (computed without deductions for personal exemptions) from sources within Canada | 10,000 |
| Total taxable income | 75,000 |
| United States income tax (based on taxable income computed with the deductions for personal exemptions) | 44,712 |
| British income and profits taxes | 10,800 |
| Per-country limitation on British income and profits taxes $\left(\frac{15,000}{75,000}\right.$ of $\left.\$44,712\right)$ | 8,942.40 |
| Credit for British income and profits taxes as limited by per-country limitation | 8,942.40 |
| Canadian income and profits taxes | 4,500.00 |
| Per-country limitation on Canadian income and profits taxes $\left(\frac{10,000}{75,000}\right.$ of $\left.\$44,712\right)$ | 5,961.60 |
| Credit for Canadian income and profits taxes (total Canadian income and profits taxes, since such amount does not exceed the per-country limitation) | 4,500.00 |
| Total amount of credit allowable (sum of credits—$8,942.40 plus $4,500) | 13,442.40 |

*Example (3).* A domestic corporation realized taxable income in 1954 in the amount of $100,000, consisting of $50,000 from United States sources and dividends of $50,000 from a Brazilian corporation, more than 10 percent of whose voting stock it owned. The Brazilian corporation paid income and profits taxes to Brazil on its income and in addition paid a dividend tax for the account of its shareholders on income distributed to them, the latter tax being withheld and paid at the source. The domestic corporation's credit for foreign taxes is $23,250, computed as follows:

| | |
|---|---|
| Taxable income from sources within the United States | $50,000 |
| Taxable income from sources within Brazil | 50,000 |
| Total taxable income | 100,000 |
| United States income tax | 46,500 |
| Dividend tax paid at source to Brazil | 19,000 |
| Income and profits taxes deemed under section 902 to have been paid to Brazil, computed as follows: | |
| Dividends received from Brazilian corporation during 1954 | $50,000 |
| Income of Brazilian corporation during 1954 | 200,000 |
| Income and profits taxes paid to Brazil on $200,000 | 30,000 |
| Accumulated profits ($200,000 minus $30,000) | 170,000 |
| Brazilian taxes applicable to accumulated profits distributed: $\frac{50,000}{170,000}$ of $\frac{170,000}{200,000}$ of $30,000 | 7,500 |
| Total income and profits taxes paid and deemed to have been paid to Brazil | 26,500 |
| Per-country limitation $\left(\frac{50,000}{100,000}\right.$ of $\left.\$46,500\right)$ | 23,250 |
| Credit for Brazilian income and profits taxes as limited by per-country limitation | 23,250 |

(b) *Overall limitation*—(1) *General.* In the case of any taxpayer who elects the overall limitation provided by section 904(a)(2), the total credit for taxes paid or accrued (including those deemed to have been paid or accrued other than by reason of section 904(d)) shall not exceed that proportion of the tax against which such credit is taken which, the taxpayer's taxable income from sources without the United States (but not in excess of taxpayer's entire taxable income) bears to his entire taxable income for the same taxable year.

(2) *Illustration of principles.* The operation of the overall limitation under section 904(a)(2) may be illustrated by the following example:

*Example.* Corporation X, a domestic corporation, for its taxable year beginning January 1, 1961, elects the overall limitation provided by section 904(a)(2). For taxable year 1961 corporation X has taxable income of $275,000 of which $200,000 is from sources without the United States. The United States income tax is $137,500. During the taxable year corporation X pays or accrues to foreign countries $105,000 in income and profits taxes, consisting of $45,000 paid or accrued to foreign country Y and $60,000 to foreign country Z. The credit for such foreign taxes is limited to $100,000, i.e., $\frac{200,000}{275,000} \times \$137,500$. The limitation would be the same whether or not some portion of the $200,000 of the taxable income from sources without the United States is from sources on the high seas or in a foreign country (other than Y and Z) which imposed no taxes allowable as a credit.

(c) *Special computation of taxable income.* For purposes of computing the limitations under paragraphs (a) and (b) of this section, the taxable income in the case of an individual, estate, or trust shall be computed without any deduction for personal exemptions under section 151 or 642(b).

(d) *Election of overall limitation*—(1) *General.* The initial election under section 904(b) of the overall limitation provided by section 904(a)(2) may be made by the taxpayer for any taxable year beginning after December 31, 1960, without securing the consent of the Commissioner. The taxpayer may, for the first taxable year for which the election is to be made, make such election at any time before the expiration of the period referred to in paragraph (d) of § 1.901-1 for choosing the benefits of section 901 for such taxable year. Having made the initial election, the taxpayer may, within the time prescribed for making such election for such taxable year, revoke such election without the consent of the Commissioner. If such revocation is timely and properly made, the taxpayer may make his initial election of the overall limitation for a later taxable year without the consent of the Commissioner. If, however, the taxpayer makes the initial election for a taxable year and the period prescribed for making such election for such taxable year expires, the taxpayer must continue the election of the overall limitation for all subsequent taxable years (whether or not foreign taxes were paid or accrued for any such year and notwithstanding that a deduction for foreign taxes under section 164 was claimed for any such year) until revoked with the consent of the Commis-

sioner. See section 904(b)(1). If the election for any taxable year is revoked with the consent of the Commissioner, the taxpayer may not make a new election for such taxable year or for any subsequent taxable year without the consent of the Commissioner. If the election of the overall limitation is revoked for a taxable year, the per-country limitation shall apply to such taxable year and to all taxable years thereafter unless a new election of the overall limitation is made, either with or without the consent of the Commissioner in accordance with this section.

(2) *Method of making the initial election.* The initial election of the overall limitation under section 904(b) shall be made on Form 1116 in the case of an individual or on Form 1118 in the case of a corporation. The form shall be attached to the appropriate income tax return for the taxable year to which such election applies. Such election may be made, however, only for a taxable year for which the taxpayer chooses to claim a credit under section 901. If the taxpayer revokes the initial election without the consent of the Commissioner, he must file amended Form 1116 or 1118 and amended income tax returns or claims for refund, where applicable, for the taxable years to which the revocation applies. For rules relating to the filing of such forms, see paragraph (a) of § 1.905–2.

(3) *Method of revoking an election and making a new election.* A request to revoke an election of the overall limitation under section 904(b) when such revocation requires the consent of the Commissioner, or to make a new election when such election requires the consent of the Commissioner, shall be in writing and shall be addressed to the Commissioner of Internal Revenue, Washington, D.C., 20224. The request shall include the name and address of the taxpayer and shall be signed by the taxpayer or his duly authorized representative. It must specify the taxable year for which the revocation or new election is to be effective and shall be mailed within 75 days after the close of the first taxable year for which it is desired to make the change. It must be accompanied by a statement specifying the nature of the taxpayer's business, the countries in which the business is carried on, or expected to be carried on, within the taxable year of the requested change, and grounds considered as justifying the requested revocation or new election. The Commissioner may require such other information as may be necessary in order to determine whether the proposed change will be permitted. Generally, a request for consent to revoke an election or make a new election will be granted if the basic nature of the taxpayer's business changes or if there are changes in conditions in a foreign country which substantially affect the taxpayer's business. For example, a taxpayer who enters substantial operations in a new foreign country or who loses existing investment due to nationalization, expropriation, or war would be granted consent to revoke an election or make a new election.

(e) *Joint return*—(1) *General.* In the case of a husband and wife making a joint return, the applicable limitation prescribed by section 904(a) on the credit for taxes paid or accrued to foreign countries and possessions of the United States shall be applied with respect to the aggregate taxable income from sources within each such country or possession, or from sources without the United States, as the case may be, and the aggregate taxable income from all sources, of the spouses.

(2) *Electing the overall limitation.* If a husband and wife make a joint return for the current taxable year, but made a separate return for the preceding taxable year and the overall limitation applied for such preceding taxable year to one spouse or to both spouses (whether or not then married), then, unless revoked with the consent of the Commissioner, the overall limitation shall apply for the current taxable year and for subsequent taxable years of both spouses, whether or not they remain married, whether or not joint returns are filed for such subsequent taxable years, and whether or not one of such spouses could have elected the overall limitation for the current taxable year only with the consent of the Commissioner if he had filed a separate return for such year.

PAR. 7. There are added immediately after § 1.904–1 the following two new sections:

**§ 1.904–2 Carryback and carryover of unused foreign tax.**

(a) *Credit for foreign tax carryback or carryover.* A taxpayer who chooses to claim a credit under section 901 for a taxable year is allowed a credit under that section not only for taxes otherwise allowable as a credit but also for taxes deemed paid or accrued in that year as a result of a carryback or carryover of an unused foreign tax under section 904(d). However, the taxes so deemed paid or accrued shall not be allowed as a deduction under section 164(a). The following paragraphs of this section provide rules for the computation of carryovers and carrybacks under section 904(d).

(b) *Years to which carried*—(1) *General.* If the taxpayer chooses the benefits of section 901 for a taxable year beginning after December 31, 1957, any unused foreign tax (as defined in subparagraph (2) of this paragraph) for such year shall, under section 904(d), be carried to the second preceding taxable year, the first preceding taxable year, and the first, second, third, fourth, and fifth succeeding taxable years, in that order and to the extent not absorbed as taxes deemed paid or accrued, under paragraph (c) of this section, in a prior taxable year. The entire unused foreign tax for any taxable year shall first be carried to the earliest of the taxable years to which, under the preceding sentence, such unused foreign tax may be carried. Any portion of such unused foreign tax not deemed paid or accrued under paragraph (c) of this section in such earliest taxable year shall then be carried to the next earliest taxable year to which such unused foreign tax may be carried, and any portion not absorbed in that year shall then be carried to the next earliest year, and so on.

(2) *Definitions.* (i) When used with reference to a taxable year for which the per-country limitation provided in section 904(a)(1) applies, the term "unused foreign tax" means, with respect to a particular foreign country or possession of the United States, the excess of (*a*) the income, war profits, and excess profits taxes paid or accrued (or deemed paid or accrued other than by reason of section 904(d)) in such year to such foreign country or possession, over (*b*) the applicable per-country limitation under section 904(a)(1) for such year.

(ii) When used with reference to a taxable year for which the overall limitation provided in section 904(a)(2) applies, the term "unused foreign tax" means the excess of (*a*) the income, war profits, and excess profits taxes paid or accrued (or deemed paid or accrued other than by reason of section 904(d)) in such year to all foreign countries and possessions of the United States, over (*b*) the overall limitation under section 904(a)(2) for such year.

(3) *Taxable years beginning before January 1, 1958.* For purposes of this paragraph, the terms "second preceding taxable year" and "first preceding taxable year" do not include any taxable year beginning before January 1, 1958.

(c) *Tax deemed paid or accrued*—(1) *Unused foreign tax for per-country limitation year.* (i) The amount of an unused foreign tax with respect to a particular foreign country or possession of the United States, for a taxable year for which the per-country limitation under section 904(a)(1) applies, which shall be deemed paid or accrued in any taxable year to which such unused foreign tax may be carried under paragraph (b) of this section shall, except as provided in subdivision (iii) of this subparagraph, be equal to the smaller of—

(*a*) The portion of such unused foreign tax which, under paragraph (b) of this section, is carried to such taxable year, or

(*b*) Any excess limitation for such taxable year with respect to such unused foreign tax (as determined under subdivision (ii) of this subparagraph).

(ii) The excess limitation for any taxable year (hereinafter called the "excess limitation year") with respect to an unused foreign tax in respect of a particular foreign country or possession of the United States for another taxable year (hereinafter called the "year of origin") shall be the amount, if any, by which the limitation for the excess limitation year with respect to that foreign country or possession (computed under section 904(a)(1)) exceeds the sum of—

(*a*) The income, war profits, and excess profits taxes actually paid or accrued to such foreign country or possession in the excess limitation year,

(*b*) The income, war profits, and excess profits taxes deemed paid or accrued in such year to such foreign country or possession other than by reason of section 904(d), and

(*c*) The portion of the unused foreign tax, with respect to such foreign country or possession for any taxable year earlier than the year of origin, which is absorbed as taxes deemed paid or accrued in the excess limitation year under subdivision (i) of this subparagraph.

(iii) An unused foreign tax for a taxable year for which the per-country limitation provided in section 904(a)(1) applies shall not be deemed paid or accrued in a taxable year for which the overall limitation provided in section 904(a)(2) applies, notwithstanding that under paragraph (b) of this section such overall limitation year is counted as one of the years to which such unused foreign tax may be carried.

(iv) Any portion of an unused foreign tax with respect to a particular foreign country or possession of the United States which is deemed paid or accrued under section 904(d) in the year to which it is carried shall be deemed paid or accrued to the same foreign country or possession to which such foreign tax was paid or accrued (or deemed paid or accrued other than by reason of section 904(d)) for the year in which it originated.

(v) For determination of excess limitation for a year for which the taxpayer does not choose to claim a credit under section 901, see paragraph (d) of this section.

(2) *Unused foreign tax for overall limitation year.* (i) The amount of an unused foreign tax with respect to all foreign countries and possessions of the United States, for a taxable year for which the overall limitation provided in section 904(a)(2) applies, which shall be deemed paid or accrued in any taxable year to which such unused foreign tax may be carried under paragraph (b) of this section shall, except as provided in subdivision (iii) of this subparagraph, be equal to the smaller of—

(*a*) The portion of such unused foreign tax which, under paragraph (b) of this section is carried to such taxable year, or

(*b*) Any excess limitation for such taxable year with respect to such unused foreign tax (as determined under subdivision (ii) of this subparagraph).

(ii) The excess limitation for any taxable year (hereinafter called the "excess limitation year") with respect to an unused foreign tax in respect of all foreign countries and possessions of the United States for another taxable year (hereinafter called the "year of origin") shall be the amount, if any, by which the limitation for the excess limitation year with respect to all foreign countries and possessions of the United States (computed under section 904(a)(2)) exceeds the sum of—

(*a*) The income, war profits, and excess profits taxes actually paid or accrued to all foreign countries and possessions in the excess limitation year,

(*b*) The income, war profits, and excess profits taxes deemed paid or accrued in such year to all foreign countries and possessions other than by reason of section 904(d), and

(*c*) The portion of the unused foreign tax, with respect to all foreign countries and possessions for any taxable year earlier than the year of origin, which is absorbed as taxes deemed paid or accrued in the excess limitation year under subdivision (i) of this subparagraph.

(iii) An unused foreign tax for a taxable year for which the overall limitation provided in section 904(a)(2) applies shall not be deemed paid or accrued in a taxable year for which the per-country limitation provided in section 904(a)(1) applies, notwithstanding that under paragraph (b) of this section such per-country limitation year is counted as one of the years to which such unused foreign tax may be carried.

(iv) For determination of excess limitation for a year for which the taxpayer does not choose to claim a credit under section 901, see paragraph (d) of this section.

(d) *Determination of excess limitation for certain years.* An excess limitation for a taxable year may exist, and may absorb all or some portion of an unused foreign tax, even though the taxpayer does not choose to claim a credit under section 901 for such year. In such case, the amount of the excess limitation, if any, for such year (hereinafter called the "deduction year") shall be determined in the same manner as through the taxpayer had chosen to claim a credit under section 901 for that year. For purposes of the preceding sentence—

(1) If the taxpayer has not chosen the benefits of section 901 for any taxable year before the deduction year, the per-country limitation under section 904(a)(1) shall be considered to be applicable for such year, and

(2) If the taxpayer has chosen the benefits of section 901 for any taxable year before the deduction year, the limitation (per-country or overall) applicable for the last taxable year (preceding such deduction year for) which a credit was claimed under section 901 shall be considered to be applicable for such deduction year.

(e) *Periods of less than 12 months.* A fractional part of a year which is a taxable year under sections 441(b) and 7701(a)(23) is a preceding or a succeeding taxable year for the purpose of determining under section 904(d) the years to which the unused foreign tax may be carried, and any unused foreign tax or excess limitation for such fractional part of a year is the unused foreign tax or excess limitation for a taxable year.

(f) *Statement with tax return.* Every taxpayer claiming the benefit of a carryback or carryover of the unused foreign tax to any taxable year for which he chooses to claim a credit under section 901 shall file with his return (or with his claim for refund, if appropriate) for that year as an attachment to his Form 1116 or 1118, as the case may be, a statement setting forth the unused foreign tax deemed paid or accrued under this section and all material and pertinent facts relative thereto, including a detailed schedule showing the computation of the unused foreign tax so carried back or over.

(g) *Illustration of carrybacks and carryovers.* The application of this section may be illustrated by the following examples:

*Example (1).* (i) A, a calendar year taxpayer using the cash receipts and disbursements method of accounting, chooses to claim a credit under section 901 for each of the taxable years set forth below. Based upon the taxes actually paid to country X, and the section 904(a)(1) limitation applicable in respect of country X, in each of the taxable years, the unused foreign tax deemed paid under section 904(d) in each of the appropriate taxable years is as follows:

| | Taxable years | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|
| | 1958 | 1959 | 1960 | 1961 | 1962 | 1963 | 1964 | 1965 | 1966 |
| Per-country limitation | $175 | $150 | $100 | $100 | $100 | $300 | $400 | $200 | $600 |
| Taxes actually paid to country X in taxable year | 75 | 60 | 830 | 170 | 150 | 100 | 200 | 140 | 400 |
| Unused foreign tax to be carried back or over from year of origin | | | 730 | 70 | 50 | | | | |
| Excess limitation with respect to unused foreign tax for— | | | | | | | | | |
| 1960 | (100) | (90) | | | | (200) | (200) | (60) | |
| 1961 | | | | | | | | | (200) |
| 1962 | | | | | | | | | (130) |
| Unused foreign tax absorbed as taxes deemed paid under the carryback and carryover provisions as carried from— | | | | | | | | | |
| 1960 | 100 | 90 | | | | 200 | 200 | 60 | |
| 1961 | | | | | | | | | 70 |
| 1962 | | | | | | | | | 50 |

(ii) The excess limitation for 1958, 1959, 1963, 1964, and 1965, respectively, which is available to absorb the unused foreign tax for 1960 is the amount by which the per-country limitation for each of those years exceeds the taxes actually paid to country X in each such year. The unused foreign tax for 1961 and 1962 are not taken into account, since neither of those years is a year earlier than 1960, the year of origin in respect of which the excess limitation is being determined. Thus, for example, the excess limitation for 1963 is $200, unreduced by the unused foreign tax for 1961 and 1962. There is no excess limitation for 1966 with respect to the unused foreign tax for 1960, since the unused foreign tax may be carried forward only 5 taxable years. The unused foreign tax ($730) for 1960 is thus absorbed as taxes deemed paid to the extent of the excess limitation for each of the taxable years 1958, 1959, 1963, 1964, and 1965, respectively, and in that order, leaving unused foreign tax in the amount of $80 which cannot be absorbed because it cannot be carried beyond 1965.

(iii) The amount of unused foreign tax for 1961 which is deemed paid in 1966 is $70, the smaller of (*a*) that portion of the unused foreign tax carried to 1966 ($70), or (*b*) the excess limitation for 1966 with respect to such unused foreign tax ($200). The unused foreign tax for 1962 ($50) is not taken into account for such purposes, since that year is not a year earlier than 1961, the

year of origin in respect of which the excess limitation for 1966 is being determined.

(iv) The excess limitation for 1966 with respect to the unused foreign tax for 1962 is $130, the amount by which the limitation applicable under section 904(a)(1) for 1966 ($600) exceeds the sum of the taxes actually paid ($400) to country X in that year and the unused foreign tax ($70) for 1961 which is absorbed in 1966 as taxes deemed paid and which is carried from a taxable year earlier than 1962, the year of origin in respect of which the excess limitation is being determined. The unabsorbed part ($80) of the unused foreign tax for 1960, a year earlier than 1962, is not taken into account in computing the excess limitation for 1966, since the unused foreign tax for 1960 may not be carried beyond 1965. The unused foreign tax ($50) for 1962 is thus absorbed in full in 1966 as taxes deemed paid, since the unused foreign tax does not exceed the excess limitation ($130) for that year.

*Example* (2). Assume the same facts as those in example (1) except that the taxpayer does not choose to have the benefits of section 901 for 1961. In that case there is not unused foreign tax for that year to carry back or over to be absorbed in other taxable years as taxes deemed paid. Moreover, the excess limitation for 1966 which is available to absorb the unused foreign tax for 1962 is $200, instead of $130, that is, the amount by which the limitation applicable under section 904(a)(1) for 1966 ($600) exceeds the taxes actually paid ($400) to country X in that year. The amount of the unused foreign tax absorbed in each taxable year as taxes deemed paid is the same as in example (1) except for 1966. In that year only the unused foreign tax ($50) for 1962 is absorbed as taxes deemed paid.

*Example* (3). Assume the same facts as those in example (1) except that the taxpayer does not choose the benefits of section 901 for 1959. Since the excess limitation for a taxable year for which the taxpayer does not claim a credit under section 901 is determined in the same manner as though the taxpayer had chosen such credit, the excess limitation for 1959 is determined to be $90 just as in example (1). Moreover, even though such excess limitation absorbs a carryback of $90 from the unused tax for 1960, none of such $90 so deemed paid in 1959 is allowed as a deduction under section 164 or as a credit under section 901 for 1959 or for any other taxable year.

*Example* (4). (i) B, a calendar year taxpayer using the cash receipts and disbursements methods of accounting, chooses the benefits of section 901 for each of the taxable years 1957, 1958, and 1959. Based upon the taxes actually paid to country Y and the per-country limitation applicable with respect to country Y, in each of the taxable years, the unused foreign tax deemed paid under section 904(d) for taxable year 1959 is as follows:

| | Taxable years | | |
|---|---|---|---|
| | 1957 | 1958 | 1959 |
| Per-country limitation on credit for taxes paid to Y | $300 | $200 | $250 |
| Taxes actually paid to Y in taxable year | 200 | 300 | 150 |
| Unused foreign tax to be carried back or over from year of origin | | 100 | |
| Excess limitation applicable to unused credit | | | (100) |
| Unused foreign tax absorbed as taxes deemed paid | | | 100 |

(ii) Since a taxable year beginning before January 1, 1958, cannot constitute a preceding taxable year in which the unused foreign tax for 1958 may be absorbed as taxes deemed paid, the entire unused foreign tax ($100) is absorbed as taxes deemed paid in 1959.

*Example* (5). (i) C, a calendar year taxpayer using an accrual method of accounting, accrues foreign taxes for the first time in 1961. C chooses the benefits of section 901 for each of the taxable years set forth below and for 1962 elects the overall limitation provided by section 904(a)(2) which, with the Commissioner's consent, is revoked for 1966. Based upon the taxes actually accrued with respect to foreign countries X and Y for each of the taxable years, the unused foreign tax deemed accrued under section 904(d) in the appropriate taxable years is as follows:

| | Per country | Overall | Overall | Overall | Overall | Per country |
|---|---|---|---|---|---|---|
| Taxable years | 1961 | 1962 | 1963 | 1964 | 1965 | 1966 |
| Limitation: | | | | | | |
| Country X | $175 | | | | | $290 |
| Country Y | 125 | | | | | 95 |
| Overall | | $250 | $800 | $300 | $400 | |
| Taxes actually accrued: | | | | | | |
| Country X | 325 | | | | | 200 |
| Country Y | 85 | | | | | 100 |
| Aggregate | | 350 | 380 | 425 | 450 | |
| Unused foreign tax to be carried back or over from year of origin: | | | | | | |
| Country X | 150 | | | | | |
| Country Y | | | | | | 5 |
| Aggregate | | 100 | | 125 | 50 | |
| Excess limitation: | | | | | | |
| Country X | | | | | | 90 |
| Country Y | 40 | | | | | |
| Overall | | | 420 | | | |
| Unused foreign tax absorbed as taxes deemed accrued under section 904(d) and carried from— | | | | | | |
| 1961 (Country X) | | | | | | (90) |
| 1962 (Overall) | | | (100) | | | |
| 1964 (Overall) | | | (125) | | | |
| 1965 (Overall) | | | (50) | | | |

(ii) Since the per-country limitation is applicable for 1961 and 1966 only, any unused foreign tax with respect to such years may not be deemed accrued in 1962, 1963, 1964, or 1965, years for which the overall limitation applies. However, the excess limitation for 1966 with respect to country X ($90) is available to absorb a part of the unused foreign tax for 1961 with respect to country X. The difference with respect to country X between the unused foreign tax for 1961 ($150) and the amount absorbed as taxes deemed accrued ($90) in 1966, or $60, may not be carried beyond 1966 since the unused foreign tax may be carried forward only 5 taxable years. There is no excess limitation with respect to country Y for 1961 in respect of the unused foreign tax of country Y for 1966, since the unused foreign tax may be carried back only 2 taxable years.

(iii) Since the overall limitation is applicable for 1962, 1963, 1964, and 1965, any unused foreign tax with respect to such years may not be absorbed as taxes deemed accrued in 1961 or 1966, years for which the per-country limitation applies. However, the excess limitation for 1963 ($420) computed on the basis of the overall limitation is available to absorb the unused foreign tax for 1962 ($100), the unused foreign tax for 1964 ($125), and the unused foreign tax for 1965 ($50), leaving an excess limitation above such absorption of $145 ($420−$275).

### § 1.904–3 Carryback and carryover of unused foreign tax by husband and wife.

(a) *In General.* This section provides rules, in addition to those prescribed in § 1.904–2, for the carryback and carryover of the unused foreign tax paid or accrued to a foreign country or possession by a husband and wife making a joint return for one or more of the taxable years involved in the computation of the carryback or carryover.

(b) *Joint unused foreign tax and joint excess limitation.* In the case of a husband and wife the joint unused foreign tax or the joint excess limitation for a taxable year for which a joint return is made shall be computed on the basis of the combined income, deductions, taxes, and credit of both spouses as if the combined income, deductions, taxes, and credit were those of one individual.

(c) *Continuous use of joint return.* If a husband and wife make a joint return for the current taxable year, and also make joint returns for each of the other taxable years involved in the computation of the carryback or carryover of the unused foreign tax to the current taxable year, the joint carryback or the joint carryover to the current taxable year shall be computed on the basis of the joint unused foreign tax and the joint excess limitations.

(d) *From separate to joint return.* If a husband and wife make a joint return for the current taxable year, but make separate returns for all of the other taxable years involved in the computation of the carryback or carryover of the unused foreign tax to the current taxable year, the separate carrybacks or separate carryovers shall be a joint carryback or a joint carryover to the current taxable year. If for such current year the per-country limitation applies, then only the unused foreign tax for a taxable year of a spouse for which the per-country limitation applied to such spouse may constitute a carryover or carryback to the current taxable year. If for such current taxable year the overall limitation applies, then only the unused foreign tax for a taxable year of a spouse for which the overall limitation applied to such spouse may constitute a carryover or carryback to the current taxable year.

(e) *Amounts carried from or through a joint return year to or through a separate return year.* It is necessary to allocate to each spouse his share of an unused foreign tax or excess limitation for any taxable year for which the spouses filed a joint return if—

(1) The husband and wife file separate returns for the current taxable year and an unused foreign tax is carried thereto from a taxable year for which they filed a joint return;

(2) The husband and wife file separate returns for the current taxable year and an unused foreign tax is carried to such taxable year from a year for which they filed separate returns but is first carried through a year for which they filed a joint return; or

(3) The husband and wife file a joint return for the current taxable year and an unused foreign tax is carried from a taxable year for which they filed joint returns but is first carried through a year for which they filed separate returns.

In such cases, the separate carryback or carryover of each spouse to the current taxable year shall be computed in the manner described in § 1.904–2 but with the modifications set forth in paragraph (f) of this section.

(f) *Allocation of unused foreign tax and excess limitation*—(1) *Limitation*—(i) *Per-country limitation.* The per-country limitation of a particular spouse with respect to a foreign country or United States possession for a taxable year for which a joint return is made shall be the portion of the limitation on the joint return which bears the same ratio to such limitation as such spouse's taxable income (with gross income and deductions taken into account to the same extent as taken into account on the joint return) from sources within such country or possession (but not in excess of the joint taxable income from sources within such country or possession) bears to the joint taxable income from such sources.

(ii) *Overall limitation.* The overall limitation of a particular spouse for a taxable year for which a joint return is made shall be the portion of the limitation on the joint return which bears the same ratio to such limitation as such spouse's taxable income (with gross income and deductions taken into account to the same extent as taken into account on the joint return) from sources without the United States (but not in excess of the joint taxable income from such sources) bears to the joint taxable income from such sources.

(2) *Unused foreign tax*—(i) *Per-country limitation.* The unused foreign tax of a particular spouse with respect to a foreign country or United States possession for a taxable year for which a joint return is made shall be the excess of his tax paid or accrued to such country or possession over his limitation determined under subparagraph (1)(i) of this paragraph.

(ii) *Overall limitation.* The unused foreign tax of a particular spouse for a taxable year to which the overall limitation applies and for which a joint return is made shall be the excess of his tax paid or accrued to foreign countries and United States possessions over his limitation determined under subparagraph (1)(ii) of this paragraph.

(3) *Excess limitation*—(i) *Per-country limitation taxpayer.* A spouse's excess limitation with respect to a foreign country or possession for a taxable year for which a joint return is made shall be the excess of his limitation determined under subparagraph (1)(i) of this paragraph over his taxes paid or accrued to such country or possession for such taxable year.

(ii) *Overall limitation.* A spouse's excess limitation for a taxable year to which the overall limitation applies and for which a joint return is made shall be the excess of his limitation determined under subparagraph (1)(ii) of this paragraph over his taxes paid or accrued to foreign countries and United States possessions for such taxable year.

(4) *Excess limitation to be applied.* The excess limitation of the particular spouse for any taxable year which is applied against the unused foreign tax of that spouse for another taxable year in order to determine the amount of the unused foreign tax which shall be carried back or over to a third taxable year shall be, in a case in which the excess limitation is determined on a joint return, the sum of the following amounts:

(i) Such spouse's excess limitation determined under subparagraph (3) of this paragraph reduced as provided in subparagraph (5)(i) of this paragraph, and

(ii) The excess limitation of the other spouse determined under subparagraph (3) of this paragraph for that taxable year reduced as provided in subparagraph (5)(i) and (ii) of this paragraph.

(5) *Reduction of excess limitation.* (i) The part of the excess limitation which is attributable to each spouse for the taxable year, as determined under subparagraph (3) of this paragraph, shall be reduced by absorbing as taxes deemed paid or accrued under section 904(d) in that year the unabsorbed separate unused foreign tax of such spouse, and the unabsorbed unused foreign tax determined under subparagraph (2) of this paragraph of such spouse, for taxable years which begin before the beginning of the year of origin of the unused foreign tax of the particular spouse against which the excess limitation so determined is being applied.

(ii) In addition, the part of the excess limitation which is attributable to the other spouse for the taxable year, as determined under subparagraph (3) of this paragraph, shall be reduced by absorbing as taxes deemed paid or accrued under section 904(d) in that year the unabsorbed unused foreign tax, if any, of such other spouse for the taxable year which begins on the same date as the beginning of the year of origin of the unused foreign tax of the particular spouse against which the excess limitation so determined is being applied.

(6) *Spouses using different limitations.* If an unused foreign tax is carried through a taxable year for which spouses made a joint return and the credit under section 901 for such taxable year is not claimed, and in the prior taxable year separate returns are made in which the per-country limitation applies to one spouse and the overall limitation applies to the other spouse, the amount treated as absorbed in the taxable year for which a joint return is made—

(i) With respect to the spouse for which the per-country limitation applies shall be determined on the basis of the excess limitation which would be allocated to such spouse under subparagraph (3)(i) of this paragraph had the per-country limitation applied for such year to both spouses;

(ii) With respect to the other spouse for which the overall limitation applies shall be determined on the basis of the excess limitation which would be allocated to such spouse under subparagraph (3)(ii) of this paragraph had the overall limitation applied for such year to both spouses.

This subparagraph shall be applied without regard to subparagraph (4)(ii) of this paragraph.

(g) *Illustrations.* This section may be illustrated by the following examples:

*Example* (1). (a) H and W, calendar year taxpayers, file joint returns for 1961 and 1963, and separate returns for 1962, 1964, and 1965; and for each of those taxable years they choose to claim a credit under section 901. For the taxable years involved, they had unused foreign tax, excess limitations, and carrybacks and carryovers of unused foreign tax as set forth below. The overall limitation applies to both spouses for all taxable years involved in this example. Neither H nor W had an unused foreign tax or excess limitation for any year before 1961 or after 1965. For purposes of this example, any reference to an excess limitation means such a limitation as determined under paragraph (c)(2)(ii) of § 1.904–2 but without regard to any taxes deemed paid or accrued under section 904(d):

| Taxable year | 1961 | 1962 | 1963 | 1964 | 1965 |
|---|---|---|---|---|---|
| Return | Joint | Separate | Joint | Separate | Separate |
| H's unused foreign tax to be carried over or back, or excess limitation (enclosed in parentheses) | $500 | $250 | ($650) | $400 | ($500) |
| W's unused foreign tax to be carried over or back, or excess limitation (enclosed in parentheses) | 300 | (200) | (300) | 150 | (100) |
| Total | 800 | | (950) | | |
| Carryovers absorbed: | | | | | |
| W's, from 1961 | | [1] 200W | 100W | | |
| H's, from 1961 | | | [2] 500H | | |
| H's, from 1962 | | | 150H | | |
| | | | 100W | | |
| W's, from 1964 | | | | | 50W |
| H's, from 1964 | | | | | 400H |
| Carrybacks absorbed: | | | | | |
| W's, from 1964 | | 0 | 100W | | |
| H's, from 1964 | | | 0 | | |

[1] W—absorbed by W's excess limitation.
[2] H—absorbed by H's excess limitation.

(b) Two hundred dollars of the $300 constituting W's part of the joint unused foreign tax for 1961 is absorbed by her separate excess limitation of $200 for 1962, and the remaining $100 of such part is absorbed by her part ($800) of the joint excess limitation for 1963. The excess limitation of $300 for 1963 is not required first to be reduced by any amount, since neither H nor W has any unused foreign tax for taxable years beginning before 1961.

(c) H's part ($500) of the joint unused foreign tax for 1961 is absorbed by his part ($650) of the joint excess limitation for 1963. The excess limitation of $650 for 1963 is not required first to be reduced by any amount, since neither H nor W has any unused foreign tax for taxable years beginning before 1961.

(d) H's unused foreign tax of $250 for 1962 is first absorbed (to the extent of $150) by H's part of the joint excess limitation for 1963, which must first be reduced from $650 to $150 by the absorption as taxes deemed paid or accrued in 1963 of H's unused foreign tax of $500 for 1961, which is a taxable year beginning before 1962. The remaining part ($100) of H's unused foreign tax for 1962 is then absorbed by W's part of the joint excess limitation for 1963, which must first be reduced from $300 to $200 by the absorption as taxes deemed paid or accrued in 1963 of the unabsorbed part ($100) of W's unused foreign tax for 1961, which is a taxable year beginning before 1962.

(e) W's unused foreign tax of $150 for 1964 is first absorbed (to the extent of $100) by W's part of the joint excess limitation for 1963, which must first be reduced from $300 to $100 by the absorption as taxes deemed paid or accrued in 1963 of the unabsorbed part ($100) of W's unused foreign tax for 1961 and the unabsorbed part ($100) of H's unused foreign tax for 1962, which are taxable years beginning before 1964. No part of W's unused foreign tax for 1964 is absorbed by H's part of the joint excess limitation for 1963, since H's part of that excess must first be reduced from $650 to $0 by the absorption as taxes deemed paid or accrued in 1963 of H's unused foreign tax of $500 for 1961 and of the unabsorbed part ($150) of H's unused foreign tax for 1962, which are taxable years beginning before 1964. The unabsorbed part ($50) of W's unused foreign tax for 1964 is then absorbed by W's excess limitation of $100 for 1965. No part of W's unused foreign tax for 1964 is absorbed by W's excess limitation for 1962, since that excess limitation must first be reduced from $200 to $0 by W's unused foreign tax for 1961, which is a taxable year begining before 1964.

(f) No part of H's unused foreign tax of $400 for 1964 is absorbed by H's part of the joint excess limitation for 1963, since H's part of that excess must first be reduced from $650 to $0 by the absorption as taxes deemed paid or accrued in 1963 of H's unused foreign tax of $500 for 1961 and of a part ($150) of H's unused foreign tax for 1962, which are taxable years beginning before 1964. Moreover, no part of H's unused foreign tax of $400 for 1964 is absorbed by W's part of the joint excess limitation for 1963, since W's part of that excess must first be reduced from $300 to $0 by the absorption as taxes deemed paid or accrued in 1963 of the unabsorbed part ($100) of W's unused foreign tax for 1961 and of the unabsorbed part ($100) of H's unused foreign tax for 1962, which are taxable years beginning before 1964, and also by the absorption of a part ($100) of W's unused foreign tax of $150 for 1964, which is a taxable year beginning on the same date as the beginning of H's taxable year 1964. The unabsorbed part ($400) of H's unused foreign tax for 1964 is then absorbed by H's excess limitation of $500 for 1965.

*Example* (2). (a) Assume the same facts as those in example (1) except that for 1964 W's unused foreign tax is $20, instead of $150. The carrybacks and carryovers absorbed are the same as in example (1) except as indicated in paragraphs (b) and (c) of this example.

(b) No part of W's unused foreign tax of $20 for 1964 is absorbed by W's excess limitation for 1962, since that excess must first be reduced from $200 to $0 by W's unused foreign tax for 1961, which is a taxable year beginning before 1964. W's unused foreign tax of $20 for 1964 is absorbed by W's part of the joint excess limitation for 1963, which must first be reduced from $300 to $100 by the absorption as taxes deemed paid or accrued in 1963 of the unabsorbed part ($100) of W's unused foreign tax for 1961 and the unabsorbed part ($100) of H's unused foreign tax for 1962, which are taxable years beginning before 1964.

(c) For the reason given in paragraph (f) of example (1), no part of H's unused foreign tax of $400 for 1964 is absorbed by H's part of the joint excess limitation for 1963. H's unused foreign tax of $400 for 1964 is first absorbed (to the extent of $80) by W's part of the joint excess limitation for 1963, which must first be reduced from $300 to $80 by the absorption as taxes deemed paid or accrued in 1963 of the unabsorbed part ($100) of W's unused foreign tax for 1961 and of the unabsorbed part ($100) of H's unused foreign tax for 1962, which are taxable years beginning before 1964, and also by the absorption of W's unused foreign tax of $20 for 1964, which is a taxable year beginning on the same date as the beginning of H's taxable year 1964. The unabsorbed part ($320) of H's unused foreign tax for 1964 is then absorbed by H's excess limitation of $500 for 1965.

*Example* (3). The facts are the same as in example (1) except that the per-country limitation applies to both spouses for all taxable years involved in the example and that excess limitations and the unused foreign taxes relate to a single foreign country. The carryovers and carrybacks are the same as in example (1).

PAR. 8. Section 1.905–2 is amended by revising subparagraph (2) of paragraph (a) to read as follows:

**§ 1.905–2 Conditions of allowance of credit.**

(a) *Forms and information.* • • •

(2) The form must be carefully filled in with all the information called for and with the calculations of credits indicated. Except where it is established to the satisfaction of the district director that it is impossible for the taxpayer to furnish such evidence, the form must have attached to it (i) the receipt for each such tax payment if credit is sought for taxes already paid, or (ii) the return on which each such accrued tax was based if credit is sought for taxes accrued. This receipt or return so attached must be either the original, a duplicate original, a duly certified or authenticated copy, or a sworn copy. In case only a sworn copy of a receipt or return is attached, there must be kept readily available for comparison on request the original, a duplicate original, or a duly certified or authenticated copy. If the receipt or the return is in a foreign language, a certified translation thereof must be furnished by the taxpayer. Any additional information necessary for the determination under part I (section 861 and following), subchapter N, chapter 1 of the Code, of the amount of income derived from sources without the United States and from each foreign country shall, upon the request of the district director, be furnished by the taxpayer.

# Title 43—PUBLIC LANDS: INTERIOR

## Chapter II—Bureau of Land Management, Department of the Interior

[Circular No. 2178]

SUBCHAPTER B—LAND TENURE MANAGEMENT (2000)

### PART 2230—SPECIAL USES

### Subpart 2235—Leases

### PART 2320—INTERIOR DEPARTMENT

### Subpart 2321—Bureau of Land Management

SUBCHAPTER C—MINERALS MANAGEMENT (3000)

### PART 3130—COAL LEASES, PERMITS AND LICENSES

### Subpart 3131—General Provisions

### PART 3210—ACQUIRED LANDS LEASING ACT

### Subpart 3212—Lease Requirements

### PART 3220—LEASING UNDER THE REORGANIZATION ACT AND OTHER ACTS

### Subpart 3220—Leasing Under the Reorganization Act and Other Acts; General

### PART 3630—AREAS SUBJECT TO SPECIAL MINING LAWS

### Subpart 3635—Papago Indian Reservation

SUBCHAPTER D—RANGE MANAGEMENT (4000)

### PART 4130—GRAZING ADMINISTRATION (ALASKA)

### Subpart 4131—Grazing Leases

The purpose of this amendment is to correct those editorial omissions or errors that occurred in the conversion to the new format of the regulations of the Bureau of Land Management, published in the FEDERAL REGISTER on March 31, 1964, which cannot be corrected except through the rule making process.

These rules relate to agency procedure and are not required by law to be published as proposed rule making. This Department, nevertheless, customarily gives such notice and public procedure thereon. However, that practice is deemed unnecessary in this instance because the changes involved are editorial in nature. Accordingly, these rules shall become effective upon the date of publication in the FEDERAL REGISTER.

1. Section 2235.1–1(m) and (n) revised to read as follows:

**§ 2235.1–1 Airport and aviation fields—Act of May 24, 1928.**

• • • • •

(m) *Beacon lights.* Government department and agencies operating aircraft may be granted permission to establish beacon lights and other navigation facilities, except terminal airports, on tracts of unreserved and unappropriated public lands of the United States of appropriate size, on application therefor, under the rules and regulations prescribed in § 2235.1–1. However, no rental will be charged. Lands for beacon lights and other navigation facilities may be withdrawn in accordance with the provisions of Part 2310 and § 2321.6 of this chapter.

• • • • •

(n) *Segregation of lands.* The filing in the proper land office of an application for a lease of lands under the act of May 24, 1928 (45 Stat. 728; 49 U.S.C. 211), as amended, shall segregate the lands described in the application from all appropriation.

2. A New §§ 2321.6, 2321.6–1, 2321.6–2 are added to Subpart 2321, to read as follows:

**§ 2321.6 Terminal airports, beacon lights and other navigation facilities.**

**§ 2321.6–1 General.**

(a) *Authority.* (1) The act of May 24, 1928 (45 Stat. 728; 49 U.S.C. 211), as amended, authorizes the Secretary of the Interior to withdraw lands for beacon lights and other air-navigation facilities, under such rules as he may prescribe.

(2) Under the authority given to the President by the act of June 25, 1910 (36 Stat. 847; 43 U.S.C. 141, 16 U.S.C. 471) to withdraw lands for public purposes, withdrawals may be made for beacon lights, emergency or intermediate landing fields, and terminal airports.

**§ 2321.6–2 Procedures.**

(a) Withdrawals under the act of May 24, 1928 (45 Stat. 728; 49 U.S.C. 211) may be made on motion of the Bureau of Land Management, or upon application of the Federal Aviation Agency or any other Federal agency, or the lessee of a terminal airport or the applicant for such a lease.

(b) To the extent applicable, the procedures in Part 2310 of this chapter shall apply.

(c) In addition to the requirements of Part 2310 of this chapter, all applications for withdrawal shall contain a statement by the authorized officer of the Federal Aviation Agency as to the need and feasibility of the facility for which the withdrawal is requested.

3. Paragraphs (b), (c), and (d) are added to § 3131.1 to read as follows:

**§ 3131.1 Acreage limitation.**

• • • • •

(b) A person, association, or corporation may file with the Manager of the appropriate land office an application or applications for coal leases or permits for acreage in addition to the 10,240 acres, which application or applications shall be in multiples of 40 acres, not exceeding a total of 5,120 additional acres in any one State, and shall contain a statement that the granting of a lease or permit for such additional lands is necessary to carry on business economically and is in the public interest.

(c) Upon the filing of an application for additional lands as specified in paragraph (b) of this section, the coal deposits in the lands covered thereby shall be temporarily set aside and withdrawn from all forms of disposal under the Act.

(d) All applications filed for additional lands as specified in paragraph (b) of this section shall be posted in the appropriate land office, and the authorized officer shall conduct public hearings thereon. Upon conclusion thereof, he may, in his discretion or whenever sufficient public interest is manifested, reevaluate the lessee's or permittee's need for all or any part of the additional acreage. Thereafter and to the extent necessary for the applicant to carry on business economically, the authorized officer may issue coal leases or permits to the applicant for additional acreage of not more than 5,120 acres (within the aggregate limitation of 2,560 acres in a single lease or permit), subject to such terms and conditions as may be prescribed by the Secretary of the Interior. Such terms and conditions may require the payment either of a cash bonus per acre or fraction thereof or a rental and royalty rate different from that required by the original leases or permits or both.

4. The second paragraph of § 3212.3 (a) is deleted in its entirety so that § 3212.3(a) shall read as follows:

**§ 3212.3 Leases of future or fractional interests.**

(a) *General.* Subject to the provisions of section 3 of the Act, non-competitive leases for future or fractional interests in lands believed, but not known to contain mineral deposits may be issued whenever the public interest will be best served thereby. There is no required form for applications or offers for non-competitive leases of any mineral subject to the Act, except oil and gas. However, such applications and requests to have leases offered competitively for lands known to contain mineral deposits should, to the extent possible, conform to and include the information required by §§ 3211.2, 3211.3, 3212.1 and this section. The terms and conditions of leases covering future or fractional interests in mineral deposits other than oil and gas, of competitive leases for future or fractional interests in oil and gas deposits within the known geological structure of a producing oil or gas field, and of compensatory royalty agreements under § 3120.3–1 covering future or fractional interests, will be established on an individual case basis.

• • • • •

5. The caption of Part 3220 is amended to read as follows: Part 3220—*Leasing under the Reorganization Act and Other Acts.*

6. The caption of Subpart 3220 is amended to read as follows: Subpart 3220—*Leasing under the Reorganization Act and Other Acts; General.*

7. A new § 3635.0–1, is added to Subpart 3635, to read as follows:

**§ 3635.0–1 Purpose.**

The regulations in this part apply to entries made prior to May 27, 1955. By virtue of the act of May 27, 1955 (69 Stat. 67; 25 U.S.C. 463) mineral entries may no longer be made within the Papago Indian Reservation.

8. Section 4131.2–4(c) is amended to read as follows:

**§ 4132.2–4 Annual rental.**

• • • • •

(c) *Payment.* The first rental payment required and the return of the proposed lease duly executed by the prospective lessee shall be made within 30 days of receipt of the lease form by the prospective lessee; if the rental is not paid or the lease is not returned within the prescribed time, the offer shall be null and void and of no effect, and all rights of the prospective lessee thereunder or under the application upon which it is based shall be considered as terminated. Subsequent rental payments for succeeding lease periods are payable in advance. In the event such payment is not received in the proper office by the last day of the current lease period or within the time prescribed in the billing notice whichever is the later, the case shall be considered canceled and all rights terminated thereunder as of the end of such current lease period; except the lease shall not terminate if the lessee submits payment to the proper office within a grace period of sixty days following the last day of the current lease period together with a showing satisfactory to the authorized office that the delay in rental payment was for unavoidable reasons and that termination of the lease would cause undue hardship to the lessee.

STEWART L. UDALL,
*Secretary of the Interior.*

# Title 45—PUBLIC WELFARE

## Chapter II—Bureau of Family Services, Welfare Administration, Department of Health, Education, and Welfare

### REVISION OF CHAPTER

Chapter II is revised to reflect administrative and legislative changes and for technical reasons. The administrative changes include creation of the Welfare Administration, establishment of the position of Commissioner of Welfare, and the renaming of the Bureau of Family Services. Part 201 is amended to reflect amendments to the Social Security Act providing for medical assistance for the aged under title I, the single category of assistance for the aged, blind, or disabled under title XVI, and authority to provide 75 percent Federal financial participation in the administrative costs of certain social services and training under each of the public assistance titles.

The programs described in Part 201 are subject to such applicable rules, regulations, or orders as may be issued with the approval of the President to effectuate the provisions of section 601 of the Civil Rights Act of 1964 (P.L. 88-352).

Parts 211 and 212 are amended to prohibit discrimination on the basis of race, color, or national origin. In addition, Part 212 is amended to specify the maximum period for which assistance under section 1113 of the Social Security Act may be furnished to U.S. citizens and their dependents returned from foreign countries.

1. The chapter heading for Chapter II of Title 45 is changed to read as set forth above.

2. Chapter II is revised to read as follows:

## PART 201—ASSISTANCE TO STATES

Sec.

201.1 General definitions.

Subpart A—Approval of State Plans for Public Assistance and Certification of Grants

201.2 General.
201.3 Approval of State plans and amendments.
201.4 Grants.
201.5 Withholding certification; reduction of Federal financial participation in the costs of social services and training.

Subpart B—Review and Audits

201.6 Continuing review of State and local administration.
201.7 Personnel merit system review.
201.8 Public assistance fiscal audits.

AUTHORITY: The provisions of this Part 201 issued under sec. 1102, 49 Stat. 647, as amended; 42 U.S.C. 1302. Interprets or applies titles I, IV, X, XI, XIV, and XVI of the Social Security Act, as amended, 42 U.S.C. 301-306, 601-609, 1201-1206, 1301-1315, 1351-1355, 1381-1385.

### § 201.1 General definitions.

When used in this part:

(a) "Act" means the Social Security Act, as amended, and titles referred to are the titles of that Act;

(b) The term "Department" means the Department of Health, Education, and Welfare;

(c) The term "Commissioner" means the Commissioner of Welfare;

(d) The term "Welfare Administration" means the Welfare Administration in the Department;

(e) The term "Bureau" means the Bureau of Family Services of the Welfare Administration;

(f) The term "State" includes the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, and Guam;

(g) The term "State agency" means the State public assistance agency administering, or supervising the administration of, the public assistance plan under title I, IV, X, XIV, or XVI;

(h) The term "regional office" and "central office" refer to regional offices of the Department and the central office of the Bureau, respectively.

## Subpart A—Approval of State Plans for Public Assistance and Certification of Grants

### § 201.2 General.

The State plan is a comprehensive statement prepared by the State agency describing all pertinent aspects of its operations necessary for the Welfare Administration to reach a determination as to conformity with the specific requirements stipulated in the pertinent titles of the Act. The State plan sets forth the basic State laws enabling and limiting the administration of public assistance; a description of the agency's organization and functions; its methods of administration, including the rules and regulations governing personnel administration; policies and interpretations with regard to eligibility for and extent of assistance; a description of its plan for social services and for training of public assistance personnel; fiscal operations; and reporting and research activities. Pertinent Federal policies are set forth in the Handbook of Public Assistance Administration, which also contains detailed instructions and suggestions for the content and submittal of the documents comprising the State public assistance plan. Copies of the Handbook are furnished to each State agency.

### § 201.3 Approval of State plans and amendments.

The State plan consists of written documents furnished by the State to cover each of its programs under the Act: old-age assistance and medical assistance for the aged (title I); aid and services to needy families with children (title IV); aid to the blind (title X); aid to the permanently and totally disabled (title XIV); or aid to the aged, blind, or disabled and medical assistance for the aged (title XVI). The State may submit the common material on more than one program as an integrated plan. However, it must identify the provisions pertinent to each title since a separate plan must be approved under each public assistance title. A plan submitted under title XVI encompasses, under a single plan, the groups otherwise included in the three separate plans under titles I, X, and XIV. After approval of the original plan by the Commissioner, all relevant changes, such as new statutes, rules, regulations, interpretations, and court decisions, are required to be submitted currently so that the Commissioner may determine whether the plan continues to meet Federal requirements and policies.

(a) *Submittal.* State public assistance plans and revisions of the plans are submitted to the central office through the regional offices. The States are encouraged to obtain consultation of the regional staff when a plan is in process of preparation or revision.

(b) *Review.* The family service representatives in the regional offices are responsible for review of State plans and amendments. They also initiate discussion with the State agency on clarification of significant aspects of the plan which come to their attention in the course of this review. State plan material on which the regional staff has questions concerning the application of Federal policy is referred with recommendations as required to the central office for decision. Comments and suggestions, including those of consultants in specified areas of public assistance administration, may be prepared by the central office for use by the regional representatives in negotiations with the State agency.

(c) *Approval.* The Bureau has been delegated authority to take action on amendments to State plans on the basis of policy statements or precedents previously approved by the Commissioner; the Commissioner has final authority for approval of new or substantially rewritten plans, or amendments to plans that are not within established policy. The Commissioner also has final authority for determining that proposed plan material is not approvable, or that a previously approved plan no longer meets the requirements for approval. The Bureau formally notifies the State agency of the action taken on State plans or revisions, or the need for clarifying information.

(d) *Basis for approval.* Determinations as to whether State plans (including plan amendments and administrative practice under the plans) originally meet, or continue to meet, the requirements for approval are based on relevant Federal statutes and regulations and the requirements and policies set forth in the Handbook of Public Assistance Administration and other official issuances to the States.

### § 201.4 Grants.

To States with approved plans, grants are made each quarter for assistance and administration. The determination as to the amount of a grant to be made to a State is based upon three documents submitted by the State agency containing information required under the Act and such other pertinent facts as may be found necessary.

(a) *Form and manner of submittal—(1) Time and place.* The estimates for public assistance grants for each quarterly period are forwarded to the regional office 45 days prior to the period of the estimate, together with a certification of State funds available and a justification statement in support of the estimates. The statement of quarterly expenditures and any necessary supporting schedules are forwarded to the Department of Health, Education, and Welfare, Bureau of Family Services, Attention: State Grants Branch, Washington, D.C., 20201, not later than 30 days after the end of the quarter.

(2) *Description of forms.* (i) "Report of Estimated Expenditures and Funds to be Available" represents the State agency's estimate of the total amount of expenditures for assistance and for administration to be made during the quarter for each of the public assistance programs under the Act. The forms also contain the State agency's estimates of the number of recipients to receive aid during each month of the quarter and of the amount of money payments to recipients and of the amount of payments to vendors for medical or remedial care in behalf of recipients. From these estimates the State and Federal shares of the total expenditures are computed and reported on the form. The State's computed share of the total estimated expenditures is the amount of State and local funds necessary for the quarter. The Federal share is the basis for the funds to be advanced for the quarter.

(ii) In addition, the State agency must certify as to the amount of State funds (exclusive of any balance of advances received from the Federal Government) actually on hand and available for expenditure; this certification must be signed by the executive officer of the State agency submitting the estimate material, or a person officially designated by him, or by a fiscal officer of the State if required by State law or regulation. ("Certificate of Availability of State funds for Assistance and for Administration during Quarter" is available for submitting the information but is not required to be used.) If the amount of State funds, or State and local funds if localities participate in the program, shown as available for expenditures, is not sufficient to cover the State's proportionate share of the amount estimated to be expended, the certification should contain a statement showing the source from which the amount of the deficiency is expected to be derived and the time when this amount is expected to be made available.

(iii) The third document submitted by the State agency is the quarterly statement of expenditures for each of the public assistance programs under the Act. This is an accounting statement of the disposition of the Federal funds granted for past periods and provides the basis for making the adjustments necessary when the State's estimate for any prior quarter was greater or less than the amount the State actually expended in that quarter. The statement of expenditure also shows the share of the Federal Government in any recovery of assistance from recipients and also in expenditures not properly subject to Federal financial participation which are acknowledged by the State agency or have been revealed in the course of the fiscal audit.

(b) *Review.* The State's estimates are analyzed by the regional office staff and are forwarded with recommendations as required to the central office. The central office reviews the State's estimate, other relevant information, and any adjustments to be made for prior periods, and computes the grant.

(c) *Estimate of amount due and certification.* After consideration and approval of the grant request for the quarter by the Commissioner, the amount to be paid to the State is certified (by delegation to certifying officer in the Bureau) to the Secretary of the Treasury for payment for each month of the quarter.

### § 201.5 Withholding certification; reduction of Federal financial participation in the costs of social services and training.

(a) *When withheld.* Certification of grants to a State is withheld if the Commissioner, after reasonable notice and opportunity for hearing to the State agency administering or supervising the administration of an approved plan, finds:

(1) That the plan has been so changed that it no longer complies with the provisions of section 2, 402, 1002, 1402, or 1602 of the Act; or

(2) That in the administration of the plan there is failure to comply substantially with any such provision.

(b) *When Federal financial participation is reduced.* Federal financial participation in the costs of social services and training approved at the rate of 75 per centum is reduced to 50 per centum if the Commissioner, after reasonable notice and opportunity for hearing to the State agency, finds:

(1) That the plan provision for prescribed services has been so changed that it no longer complies with the Federal requirements with respect to such prescribed services; or

(2) That in the administration of the plan there is a failure to comply substantially with such plan provision.

(c) *Informal discussions.* Hearings with respect to matters under paragraph (a) or (b) of this section are generally not called, however, until after reasonable effort has been made by regional and central office representatives to resolve the questions involved by conference and discussion with State officials. Formal notification of the date and place of hearing does not foreclose further negotiations with State officials.

(d) *Conduct of hearings.* Applicable requirements of the Administrative Procedure Act are observed in conducting the hearings referred to in paragraphs (a) and (b) of this section.

(e) *Notification of noncertification.* If the Commissioner makes a finding of noncompliance with respect to a matter under pargaraph (a) of this section, the State agency is notified that further payments will not be made to the State (or, in the case of a plan approved under title XVI, in his discretion, that payments will be limited to categories under or parts of the plan not affected by such failure), until the Commissioner is satisfied that there will no longer be any such failure to comply. Until he is so satisfied, no further payments will be made to the State (or will be limited to categories under or parts of the title XVI plan not affected by such failure).

(f) *Notification of reduction in Federal financial participation.* If the Commissioner makes a finding of noncompliance with respect to a matter under paragraph (b) of this section, the State agency is notified that further payments will be made to the State at the rate of 50 per centum of the costs of services and training, until the Commissioner is satisfied that there will no longer be any failure to comply.

## Subpart B—Review and Audits

### § 201.6 Continuing review of State and local administration.

(a) In order to provide a basis for determining that State agencies are adhering to Federal requirements and to the substantive legal and administrative provisions of their approved plans, the Bureau conducts a continuing review of State and local public assistance administration.

(b) The administrative review includes analysis of procedures and policies of State and local agencies and review of decisions in case records of individual recipients. Each State agency is required to carry out a continuing quality control program primarily covering determination of eligibility in statistically selected samples of individual cases. The Bureau conducts a continuing observation of these State systems. Selected case records and agency operations are also reviewed for evaluating adherence to the other Federal requirements set forth in the pertinent titles of the Act. If the Federal or State review reveals cases in which there appear to have been an improper claim for Federal funds, the State agency is given an opportunity to provide information to substantiate the payment, or to make an adjustment on its expenditure report. If serious problems are revealed in respect to compliance with any Federal requirement, action to adjust Federal funds in all cases affected is required of the State agency, and the State agency is also required to correct its practice so that there will be no recurrence of the problem in the future.

### § 201.7 Personnel merit system review.

A personnel merit system review is carrier out by the Division of State Merit Systems of the Office of Field Administration of the Department. The purpose of the review is to evaluate the effectiveness of the State merit system relating to the public assistance programs and to determine whether there is compliance with Federal requirements in the administration of the merit system plan. See Part 70 of this title.

### § 201.8 Public assistance fiscal audits.

(a) Annually, or at other times as necessary, the State agency's claims for Federal funds and supporting records are audited by the Division of Grant-in-Aid Audits of the Office of Field Administration of the Department to determine that the agency has properly reported its ac-

countability for grants of Federal funds for public assistance; the amounts granted as assistance payments were actually disbursed to or on behalf of individuals who had been determined by the agency to be entitled to public assistance under the appropriate title of the Act; administrative expenditures claimed for Federal financial participation are proper under the Act and State plan, including State laws and regulations; amounts expended and used as the basis for claiming Federal funds under title I, IV, X, XIV, or XVI were not derived from other Federal sources or were not used as a basis for other Federal matching; and the share of the Federal Government in any recovery was accurately and promptly adjusted.

(b) If the audit results in no exceptions, the State agency is advised by letter of this result. The general course for the disposition of proposed exceptions resulting from audits involves the submittal of details of these exceptions to the State agency which then has an opportunity to concur in the proposed exceptions or to assemble and submit additional facts for purposes of clearance. Provision is made for the State agency to appeal proposed audit exceptions in which it has not concurred and which have not been deleted on the basis of clearance material. After consideration of a State agency's appeal by the Commissioner, the Bureau advises the State agency of any expenditures in which the Federal Government may not participate and requests it to include the amount as adjustments in a subsequent statement of expenditures. Expenditures in which it is found the Federal Government may not participate and which are not properly adjusted through the State's claim will be deducted from subsequent grants made to the State agency.

## PART 202—MEDICAL ASSISTANCE FOR THE AGED TO STATE RESIDENTS

Sec.

202.1 Condition of plan approval; prohibition against exclusion of residents.
202.2 Furnishing of assistance to eligible residents absent from the State.

AUTHORITY: The provisions of this Part 202 issued under sec. 601, 74 Stat. 987, sec. 141, 76 Stat. 197, sec. 1102, 49 Stat. 647; 42 U.S.C. 302, 1382, 1302. Interprets or applies sec. 601, 74 Stat. 987, sec. 141, 76 Stat. 197, 42 U.S.C. 302, 1382.

### § 202.1 Condition of plan approval; prohibition against exclusion of residents.

A State plan for medical assistance for the aged, or for old-age assistance and medical assistance for the aged, or a State plan for aid to the aged, blind, or disabled and medical assistance for the aged, to be approved under section 2 or 1602, as the case may be, of the Social Security Act, as amended (42 U.S.C. 302, 1382), may not impose, as a condition of eligibility for medical assistance for the aged, any residence requirement which excludes any individual who resides in the State.

### § 202.2 Furnishing assistance to eligible residents absent from the State.

A State plan referred to in section 202.1 must provide for the furnishing of medical assistance for the aged to eligible individuals who are residents of the State but are absent therefrom to the same extent that such assistance is furnished under the plan to meet the cost of medical care and services rendered to eligible individuals in such State, at least to the extent that medical care and services are needed in any other State (as defined in section 1101(a)(1) of the Social Security Act, as amended, 42 U.S.C. 1301(a)(1)), under any of the following circumstances: (a) Where an emergency arises from accident or sudden illness; (b) where the health of the individual would be endangered if the care and services are postponed until he returns to the State in which he resides; or (c) where his health would be endangered if he undertook travel to return to such State.

## PART 211—CARE AND TREATMENT OF MENTALLY ILL NATIONALS OF THE UNITED STATES, RETURNED FROM FOREIGN COUNTRIES

Sec.

211.1 General definitions.
211.2 General.
211.3 Certificates.
211.4 Notification to legal guardian, spouse, next of kin, or interested persons.
211.5 Action under State law; appointment of guardian.
211.6 Reception; temporary care, treatment, and assistance.
211.7 Transfer and release of eligible person.
211.8 Continuing hospitalization.
211.9 Examination and reexamination.
211.10 Termination of hospitalization.
211.11 Request for release from hospitalization.
211.12 Federal payments.
211.13 Financial responsibility of the eligible person; collections, compromise, or waiver of payment.
211.14 Disclosure of information.
211.15 Nondiscrimination.

AUTHORITY: The provisions of this Part 211 issued under sections 1–11, 74 Stat. 308–310; 24 U.S.C. 321–329.

### § 211.1 General definitions.

When used in this part:

(a) "Act" means Public Law 86–571, approved July 5, 1960, 74 Stat. 308, entitled "An Act to provide for the hospitalization, at Saint Elizabeths Hospital in the District of Columbia or elsewhere, of certain nationals of the United States adjudged insane or otherwise found mentally ill in foreign countries, and for other purposes";

(b) The term "Secretary" means the Secretary of Health, Education, and Welfare;

(c) The term "Department" means the Department of Health, Education, and Welfare;

(d) The term "Director" means the Director of the Bureau of Family Services of the Welfare Administration, Department of Health, Education, and Welfare;

(e) The term "eligible person" means an individual with respect to whom the certificates referred to in section 211.3 are furnished to the Director in connection with the reception of an individual arriving from a foreign country;

(f) The term "Public Health Service" means the Public Health Service in the Department of Health, Education, and Welfare;

(g) The term "agency" means an appropriate State or local public or nonprofit agency with which the Director has entered into arrangements for the provision of care, treatment, and assistance pursuant to the Act;

(h) The term "State" means a State or Territory of the United States, the Commonwealth of Puerto Rico, or the District of Columbia;

(i) The term "residence" means residence as determined under the applicable law or regulations of a State or political subdivision for the purpose of determining the eligibility of an individual for hospitalization in a public mental hospital;

(j) The term "legal guardian" means a guardian, appointed by a court, whose powers, duties, and responsibilities include the powers, duties, and responsibilities of guardianship of the person.

### § 211.2 General.

The Director shall make suitable arrangements with agencies to the end that any eligible person will be received, upon request of the Secretary of State, at the port of entry or debarkation upon arrival in the United States from a foreign country and be provided, to the extent necessary, with temporary care, treatment, and assistance, pending transfer and release or hospitalization pursuant to the Act. The Director shall also make suitable arrangements with appropriate divisions of the Public Health Service, Bureau of Medical Services, with Saint Elizabeths Hospital in the District of Columbia, with Federal hospitals outside of the Department, or with other public or private hospitals to provide the eligible person with care and treatment in a hospital. The Director shall maintain a roster setting forth the name and address of each eligible person currently receiving care and treatment, or assistance, pursuant to the Act.

### § 211.3 Certificates.

The following certificates are necessary to establish that an individual is an eligible person:

(a) *Certificates as to nationality.* A certificate issued by an authorized official of the Department of State, stating that the individual is a national of the United States.

(b) *Certificate as to mental condition.* Either (1) a certificate obtained or transmitted by an authorized official of the Department of State that the individual has been legally adjudged insane in a named foreign country; or (2) a certificate of an appropriate authority or person stating that at the time of such certification the individual was in a named foreign country and was in need of care and treatment in a mental hospital. A statement shall, if possible, be incorporated into or attached to the certificate furnished under this paragraph setting forth all available medical and other pertinent information concerning the individual.

(c) *Appropriate authority or person.* For the purpose of paragraph (b)(2) of this section a medical officer of the Public Health Service or of another agency of the United States, or a medical practitioner legally authorized to provide care or treatment of mentally ill persons in the foreign country, is an "appropriate authority or person," and shall be so identified in his execution of the certificate. If such a medical officer or practitioner is unavailable, an authorized official of the Department of State may serve as an "appropriate authority or person," and shall, in the execution of the certificate, identify himself as serving as such person due to the unavailability of a suitable medical officer or practitioner.

### § 211.4 Notification to legal guardian, spouse, next of kin, or interested persons.

(a) Whenever an eligible person arrives in the United States from a foreign country, or when such person is transferred from one State to another, the Director shall, upon such arrival or transfer (or in advance thereof, if possible), provide for notification of his legal guardian, or in the absence of such a guardian, of his spouse or next of kin, or in the absence of any of these, of one or more interested persons, if known.

(b) Whenever an eligible person is admitted to a hospital pursuant to the Act, the Director shall provide for immediate notification of his legal guardian, spouse, or next of kin, if known.

### § 211.5 Action under State law; appointment of guardian.

Whenever an eligible person is incapable of giving his consent to care and treatment in a hospital, either because of his mental condition or because he is a minor, the agency will take appropriate action under State law, including, if necessary, procuring the appointment of a legal guardian, to ensure the proper planning for and provision of such care and treatment.

### § 211.6 Reception; temporary care, treatment, and assistance.

(a) *Reception.* The agency will meet the eligible person at the port of entry or debarkation, will arrange for appropriate medical examination, and will plan with him, in cooperation with his legal guardian, or, in the absence of such a guardian, with other interested persons, if any, for needed temporary care and treatment.

(b) *Temporary care, treatment, and assistance.* The agency will provide for temporary care, treatment, and assistance, as reasonably required for the health and welfare of the eligible person. Such care, treatment, and assistance may be provided in the form of hospitalization and other medical and remedial care (including services of necessary attendants), food and lodging, money payments, transportation, or other goods and services. The agency will utilize the Public Health Service General Hospital nearest to the port of entry or debarkation or any other suitable public or private hospital, in providing hospitalization and medical care, including diagnostic service as needed, pending other appropriate arrangements for serving the eligible person.

### § 211.7 Transfer and release of eligible person.

(a) *Transfer and release to relative.* If at the time of arrival from a foreign country or any time during temporary or continuing care and treatment the Director finds that the best interests of the eligible person will be served thereby, and a relative, having been fully informed of his condition, agrees in writing to assume responsibility for his care and treatment, the Director shall transfer and release him to such relative. In determining whether his best interest will be served by such transfer and release, due weight shall be given to the relationship of the individuals involved, the financial ability of the relative to provide for such person, and the accessibility to necessary medical facilities.

(b) *Transfer and release to appropriate State authorities, or agency of the United States.* If appropriate arrangements cannot be accomplished under paragraph (a) of this section, and if no other agency of the United States is responsible for the care and treatment of the eligible person, the Director shall endeavor to arrange with the appropriate State mental health authorities of the eligible person's State of residence or legal domicile, if any, for the assumption of responsibility for the care and treatment of the eligible person by such authorities and shall, upon the making of such arrangements in writing, transfer and release him to such authorities. If any other agency of the United States is responsible for the care and treatment of the eligible person, the Director shall make arrangements for his transfer and release to that agency.

### § 211.8 Continuing hospitalization.

(a) *Authorization and arrangements.* In the event that appropriate arrangements for an eligible person in need of continuing care and treatment in a hospital cannot be accomplished under § 211.7, or until such arrangements can be made, care and treatment shall be provided by the Director in Saint Elizabeths Hospital in the District of Columbia, in an appropriate Public Health Service Hospital, or in such other suitable public or private hospital as the Director determines is in the best interests of such person.

(b) *Transfer to other hospital.* At any time during continuing hospitalization, when the Director deems it to be in the interest of the eligible person or of the hospital affected, the Director shall authorize the transfer of such person from one hospital to another and, where necessary to that end, the Director shall authorize the initiation of judicial proceedings for the purpose of obtaining a commitment of such person to the Secretary.

(c) *Place of hospitalization.* In determining the placement or transfer of an eligible person for purposes of hospitalization, due weight shall be given to such factors as the location of the eligible person's legal guardian or family, the character of his illness and the probable duration thereof, and the facilities of the hospital to provide care and treatment for the particular health needs of such person.

### § 211.9 Examination and reexamination.

Following admission of an eligible person to a hospital for temporary or continuing care and treatment, he shall be examined by qualified members of the medical staff as soon as practicable, but not later than the fifth day after his admission. Each such person shall be reexamined at least once within each six month period beginning with the month following the month in which he was first examined.

### § 211.10 Termination of hospitalization.

(a) *Discharge or conditional release.* If, following an examination, the head of the hospital finds that the eligible person hospitalized for mental illness (whether or not pursuant to a judicial commitment) is not in need of such hospitalization, he shall be discharged. In the case where hospitalization was pursuant to a judicial commitment, the head of the hospital may, in accordance with laws governing hospitalization for mental illness as may be in force and generally applicable in the State in which the hospital is located, conditionally release him if he finds that this is in his best interests.

(b) *Notification to committing court.* In the case of any person hospitalized under section 211.8 who has been judicially committed to the custody of the Secretary, the Secretary will notify the committing court in writing of the discharge or conditional release of such person under this section or of his transfer and release under § 211.7.

### § 211.11 Request for release from hospitalization.

If an eligible person who is hospitalized pursuant to the Act, or his legal guardian, spouse, or adult next of kin, requests his release, such request shall be granted by the Director if his best interests will be served thereby, or by the head of the hospital if he is found not to be in need of hospitalization by reason of mental illness. The right of the Director, or the head of the hospital, to refuse such request and to detain him for care and treatment shall be determined in accordance with laws governing the detention, for care and treatment, of persons alleged to be mentally ill as may be in force and applicable generally in the State in which such hospital is located, but in no event shall the patient be detained more than forty-eight hours (excluding any period of time falling on a Sunday or a legal holiday observed by the courts of the State in which such hospital is located) after the receipt of such request unless within such time (a) judicial proceedings for such hospitalization are commenced or (b) a judicial extension of

such time is obtained, for a period of not more than five days, for the commencement of such proceedings.

**§ 211.12 Federal payments.**

The arrangements made by the Director with an agency or hospital for carrying out the purposes of the Act shall provide for payments to such agency or hospital, either in advance or by way of reimbursement, of the costs of reception, temporary care, treatment, and assistance, continuing care and treatment, and transportation, pursuant to the Act, and payments for other expenditures necessarily and reasonably related to providing the same. Such arrangements shall include the methods and procedures for determining the amounts of the advances or reimbursements, and for remittance and adjustment thereof.

**§ 211.13 Financial responsibility of the eligible person; collections, compromise, or waiver of payment.**

(a) *For temporary care and treatment.* If an eligible person receiving temporary care, treatment, and assistance, pursuant to the Act, has financial resources available to pay all or part of the costs of such care, the Director shall require him to pay for such costs, either in advance or by way of reimbursement, unless in his judgment it would be inequitable or impracticable to require such payment.

(b) *For continuing care and treatment.* Any eligible person receiving continuing care and treatment in a hospital, or his estate, shall be liable to pay or contribute toward the payment of the costs or charges therefor, to the same extent as such person would, if a resident of the District of Columbia, be liable to pay, under the laws of the District of Columbia, for his care and maintenance in a hospital for the mentally ill in that jurisdiction.

(c) *Collections, compromise, or waiver of payment.* The Director may, in his discretion, where in his judgment substantial justice will be best served thereby or the probable recovery will not warrant the expense of collection, compromise, or waive the whole or any portion of, any claim for continuing care and treatment, and assistance, and in the process of arriving at such decision, the Director may make or cause to be made such investigations as may be necessary to determine the ability of the patient to pay or contribute toward the cost of his continuing care and treatment in a hospital.

**§ 211.14 Disclosure of information.**

(a) No disclosure of any information with respect to an individual obtained at any time by any person, organization, or institution in the course of discharging the duties of the Secretary under the Act shall be made except insofar:

(1) As the individual or his legal guardian, if any (or, if he is a minor, his parent or legal guardian), shall consent;

(2) As disclosure may be necessary to carry out any functions of the Secretary under the Act;

(3) As disclosure may be directed by the order of a court of competent jurisdiction;

(4) As disclosure may be necessary to carry out any functions of any agency of the United States which are related to the return of the individual from a foreign country, or his entry into the United States; or

(5) As expressly authorized by the Commissioner of Welfare.

(b) An agreement made with an agency or hospital for care, treatment, and assistance pursuant to the Act shall provide that no disclosure will be made of any information received by such agency or hospital in the course of discharging the duties under such agreement except as is provided therein, or is otherwise specifically authorized by the Commissioner of Welfare.

(c) Nothing in this section shall preclude disclosure, upon proper inquiry, of information as to the presence of an eligible person in a hospital, or as to his general condition and progress.

**§ 211.15 Nondiscrimination.**

(a) No eligible person shall, on the ground of race, color, or national origin, be excluded from participation, be denied any benefits, or otherwise be subjected to discrimination of any nature or form in the provision of any benefits, under the Act.

(b) The prohibition in paragraph (a) of this section precludes discrimination either in the selection of individuals to receive the benefits, in the scope of benefits, or in the manner of providing them. It extends to all facilities and services provided by the Director or an agency to an individual, and to the arrangements and the procedures under this part relating thereto, in connection with reception, temporary care, treatment, and assistance, and continuing hospitalization under the Act.

---

## PART 212—ASSISTANCE FOR UNITED STATES CITIZENS RETURNED FROM FOREIGN COUNTRIES

Sec.

212.1 General definitions.
212.2 General.
212.3 Eligible person.
212.4 Reception; initial determination, provision of temporary assistance.
212.5 Periodic review and redetermination; termination of temporary assistance.
212.6 Duty to report.
212.7 Repayment to the United States.
212.8 Federal payments.
212.9 Disclosure of information.
212.10 Nondiscrimination.

AUTHORITY: The provisions of this Part 212 issued under section 302, 75 Stat. 142, section 1102, 49 Stat. 647, as amended; 42 U.S.C. 1313, 1302. Interprets or applies section 302, 75 Stat. 142, 42 U.S.C. 1313.

**§ 212.1 General definitions.**

When used in this part:

(a) "Act" means section 1113 of the Social Security Act, as amended;

(b) The term "Secretary" means the Secretary of Health, Education, and Welfare;

(c) The term "Department" means the Department of Health, Education, and Welfare;

(d) The term "Bureau" means the Bureau of Family Services of the Welfare Administration, Department of Health, Education, and Welfare;

(e) The term "Director" means the Director of the Bureau of Family Services;

(f) The term "eligible person" means an individual with respect to whom the conditions in § 212.3 are met;

(g) The term "State" includes the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, and Guam;

(h) The term "United States" when used in a geographical sense means the States;

(i) The term "agency" means State or local public agency or organization or national or local private agency or organization with which the Director has entered into agreement for the provision of temporary assistance pursuant to the Act;

(j) The term "temporary assistance" means money payments, medical care, temporary billeting, transportation, and other goods and services necessary for the health, or welfare of individuals, including guidance, counseling, and other welfare services.

**§ 212.2 General.**

The Director shall develop plans and make arrangements for provision of temporary assistance within the United States to any eligible person, after consultation with appropriate offices of the Department of State, the Department of Justice, and the Department of Defense. Temporary assistance shall be provided, to the extent feasible, in accordance with such plans, as modified from time to time by the Director. The Director shall enter into agreements with agencies whose services and facilities are to be utilized for the purpose of providing temporary assistance pursuant to the Act, specifying the conditions governing the provision of such assistance and the manner of payment of the cost of providing therefor.

**§ 212.3 Eligible person.**

In order to establish that an individual is an eligible person, it must be found that:

(a) He is a citizen of the United States or a dependent of a citizen of the United States;

(b) A written statement has been transmitted to the Bureau by an authorized official of the Department of State containing information which identifies him as having returned, or been brought, from a foreign country to the United States because of the destitution of the citizen of the United States, or the illness of such citizen or any of his dependents, or because of war, threat of war, invasion, or similar crisis. Such statement shall, if possible, incorporate or have attached thereto, all available pertinent information concerning the individual. In case of war, threat of war, invasion, or similar crisis, a determination by the Department of State that such a condition is the general cause for the return of citizens of the United States and their dependents from a particular foreign country, and evidence that an individual has returned, or been brought, from such country to the United States shall be considered sufficient identification of the reason for his return to, or entry into, the United States; and

(c) He is without resources immediately accessible to meet his needs.

**§ 212.4 Reception; initial determination, provision of temporary assistance.**

(a) The Bureau, or the agency upon notification by the Bureau, will meet individuals, identified as provided in § 212.3(b), at the port of entry or debarkation.

(b) The Bureau or agency will make findings, setting forth the pertinent facts and conclusions, and an initial determination, according to standards established by the Bureau, as to whether an individual is an eligible person.

(c) The Bureau or agency will provide temporary assistance within the United States to an eligible person, according to standards of need established by the Bureau, upon arrival at the port of entry or debarkation, during transportation to his intermediate and ultimate destinations, and after arrival at such destinations.

(d) Temporary assistance may be furnished only for twelve months from the month of arrival of the eligible person in the United States unless he is handicapped in attaining self-support or self-care for such reasons as age, disability, or lack of vocational preparation. In such cases temporary assistance may be extended upon prior authorization by the Bureau for six additional months.

**§ 212.5 Periodic review and redetermination; termination of temporary assistance.**

(a) The Bureau or agency will review the situation of each recipient of temporary assistance at frequent intervals to consider whether or not circumstances have changed that would require a different plan for him.

(b) Upon a finding by the Bureau or agency that a recipient of temporary assistance has sufficient resources available to meet his needs, temporary assistance shall be terminated.

**§ 212.6 Duty to report.**

The eligible person who receives temporary assistance, or the person who is caring for or otherwise acting on behalf of such eligible person, shall report promptly to the Bureau or agency any event or circumstance which would cause such assistance to be changed in amount or terminated.

**§ 212.7 Repayment to the United States.**

(a) An individual who has received temporary assistance shall be required to repay, in accordance with his ability, any or all of the cost of such assistance to the United States, except insofar as it is determined that:

(1) The cost is not readily allocable to such individual;

(2) The probable recovery would be uneconomical or otherwise impractical;

(3) He does not have, and is not expected within a reasonable time to have, income and financial resources sufficient for more than ordinary needs; or

(4) Recovery would be against equity and good conscience.

(b) In determining an individual's resources, any claim which he has against any individual, trust or estate, partnership, corporation, or government shall be considered, and assignment to the United States of such claims shall be taken in appropriate cases.

(c) A determination that an individual is not required to repay the cost of temporary assistance shall be final and binding, unless such determination was procured by fraud or misrepresentation of the individual or some other person, or the individual voluntarily offers to repay.

(d) A determination that an individual is required to repay any or all of the cost of temporary assistance may be reconsidered at any time prior to repayment of the required amount. A further determination shall be made with respect to his liability to repay the balance of such amount on the basis of new evidence as to whether (1) he has, or is expected within a reasonable time to have, income and financial resources sufficient for more than ordinary needs, or (2) recovery would be against equity and good conscience.

**§ 212.8 Federal payments.**

The agreement made by the Director with an agency for carrying out the purposes of the Act shall provide for payment to such agency, either in advance or by way of reimbursement, of the cost of temporary assistance provided pursuant to the Act, and payment of the cost of other expenditures necessarily and reasonably related to providing the same. Such agreement shall include the method for determining such costs, as well as the methods and procedures for determining the amounts of advances or reimbursement and for remittance and adjustment thereof.

**§ 212.9 Disclosure of information.**

(a) No disclosures of any information with respect to an individual obtained at any time by any person, organization, or institution in the course of discharging the duties of the Secretary under the Act shall be made except insofar:

(1) As the individual or his legal guardian, if any (or, if he is a minor, his parent or legal guardian), shall consent;

(2) As disclosure may be necessary to carry out any functions of the Secretary under the Act;

(3) As disclosure may be necessary to carry out any functions of any agency of the United States which are related to the return of the individual from a foreign country, or his entry into the United States; or

(4) As expressly authorized by the Commissioner of Welfare.

(b) An agreement made with an agency for the provision of temporary assistance pursuant to the Act shall provide that no disclosure will be made of any information received by such agency in the course of discharging the duties under such agreement except as is provided therein, or is otherwise specifically authorized by the Commissioner of Welfare.

**§ 212.10 Nondiscrimination.**

(a) No eligible person shall, on the ground of race, color, or national origin, be excluded from participation, be denied any benefits, or otherwise be subjected to discrimination of any nature or form in the provision of any benefits, under the Act.

(b) The prohibition in paragraph (a) of this section precludes discrimination either in the selection of individuals to receive the benefits, in the scope of benefits, or in the manner of providing them. It extends to all facilities and services provided by the Bureau or an agency to an individual, and to the arrangements and the procedures under this part relating thereto, in connection with reception and temporary assistance under the Act.

*Effective date.* This revision of Chapter II shall become effective on the date of its publication in the FEDERAL REGISTER.

Dated: August 25, 1964.

[SEAL] ELLEN WINSTON,
*Commissioner of Welfare.*

Approved: December 28, 1964.

ANTHONY J. CELEBREZZE,
*Secretary.*

[F.R. Doc. 64-13515; Filed, Dec. 30, 1964; 8:51 a.m.]

# Title 47—TELECOMMUNICATION

## Chapter I—Federal Communications Commission

[FCC 64-1205]

### SUBCHAPTER A—GENERAL

### PART 1—PRACTICE AND PROCEDURE

### Abolition of FCC Form 317

At a session of the Federal Communications Commission held at its offices in Washington, D.C., on the 23d day of December 1964;

Section 1.543 of the Commission's rules concerns "Special Service Authorizations" (SSA's), which were formerly granted in the standard broadcast service for operations for which regular authorizations could not be granted under the rules. The rule provides that application for such authorization shall be on FCC Form 317, "Application for Standard Broadcast Station Special Service Authorization or Extension Thereof." However, it also provides that no new SSA's will be issued after February 3, 1958, and there are now only two such operations, both of which are the subject of hearings concerning their continuance (WNYC, New York City, Docket No. 11227, and WOI, Ames, Iowa, Docket No. 11290). These operations are by Commission order permitted to

continue (without the necessity for filing for an extension) until decision in the proceedings.

The amendment to § 3.25, the Clear Channel rule, adopted in 1961, provides for regular licensing of these two operations if in the hearings it is concluded that they are in the public interest. (See § 3.25(a), notes 1 and 2.) Subsequent Commission orders have provided for consideration of applications for regular license in the hearings. In filing for different facilities for its SSA operation, WNYC used FCC Form 301. In view of these facts, there is no further need for FCC Form 317, and therefore it should be abolished and § 1.543 amended to delete reference to it. Since these changes are procedural, the notice and effective date provisions of the Administrative Procedure Act do not apply.

In view of the foregoing: *It is ordered*, That effective January 11, 1965, FCC Form 317 is abolished; and § 1.543 is amended by deleting paragraph (b) thereof. Authority for this action is contained in section 4(i) of the Communications Act of 1934, as amended.

NOTE: Rules changes herein will be covered by T.S. I(63)–5.

(Sec. 4, 48 Stat. 1066, as amended, 47 U.S.C. 154)

Released: December 28, 1964.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] BEN F. WAPLE,
*Secretary.*

## SUBCHAPTER D—SAFETY AND SPECIAL RADIO SERVICES

[Docket 15613—FCC 64–1187]

## PART 81—STATIONS ON LAND IN THE MARITIME SERVICES

## PART 83—STATIONS ON SHIPBOARD IN THE MARITIME SERVICES

### Miscellaneous Amendments

In the matter of amendment of Parts 81 and 83 of the Commission's rules to make the frequency pair 2442 kc/s (coast)—2009 kc/s (ship) available for ship-shore use in the Astoria, Oregon area on a day only basis.

At a session of the Federal Communications Commission held at its offices in Washington, D.C., on the 23d day of December 1964;

The Commission having under consideration the above-captioned matter;

It appearing, that in accordance with the requirements of section 4 (a) and (b) of the Administrative Procedure Act, notice of proposed rule making in this matter which made provision for the submission of written comments by interested parties, was published in the FEDERAL REGISTER on September 10, 1964 (29 F.R. 12784) and the period for filing comments has now expired; and

It further appearing, that comments supporting the proposed rule amendments were received from Pacific Northwest Bell Telephone Company. No objections to the amendments proposed were received.

It further appearing, that the public interest, convenience, and necessity will be served by the amendments herein ordered, the authority for which is contained in section 303 (c), (d), (f), and (r) of the Communications Act of 1934, as amended;

*It is ordered*, That effective February 8, 1965, Parts 81 and 83 of the Commission's rules are amended as set forth below, and that this proceeding is hereby terminated.

(Sec. 4, 48 Stat. 1066, as amended; 47 U.S.C. 154. Interprets or applies sec. 303, 48 Stat. 1082, as amended; 47 U.S.C. 303)

Released: December 28, 1964.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] BEN F. WAPLE,
*Secretary.*

A. Part 81 is amended as follows:

1. In § 81.306(b), the table is amended to add a new entry for Astoria, Oreg., preceding the entry for Astoria-Portland, Oreg., to read as follows:

**§ 81.306 Frequencies available below 27.5 Mc/s.**

• • • • • •

(b) • • •

| Coast stations located in the vicinity of— | Coast station transmitting carrier frequency [1] | | Associated coast station receiving carrier frequency | |
|---|---|---|---|---|
| | Frequency (kc/s) | Specific limitations imposed upon availability for use [2] | Frequency (kc/s) | Specific conditions relating to use of these frequencies by ship stations for transmission as shown in § 83.354 (a)(1) of this chapter [1] |
| • • • | • • • | • • • | • • • | • • • |
| Astoria, Oreg. | 2442 | Day only, on condition that no harmful interference will be caused to any service or station which in the discretion of the Commission may have priority on the frequency or frequencies used for the service to which interference is caused. | 2009 | Day only, on condition that no harmful interference will be caused to any service or station which in the discretion of the Commission may have priority on the frequency or frequencies used for the service to which interference is caused. |
| • • • | • • • | • • • | • • • | • • • |

B. Part 83 is amended as follows:

1. In § 83.354(a)(1), the table is amended to add a new entry for Astoria, Oreg., preceding the entry for Astoria-Portland, Oreg., to read as follows:

**§ 83.354 Frequencies below 5000 kc/s for public correspondence.**

(a) • • •
(1) • • •

| For communication with coast stations located in the vicinity of— | Mobile station transmitting carrier frequency [1] | | Associated coast station carrier frequency | |
|---|---|---|---|---|
| | Frequency (kc/s) | Specific limitations imposed upon availability for use [2] | Frequency (kc/s) | Specific conditions relating to use of these frequencies by coast stations for transmission as shown in § 81.306(b) of this chapter.[1] |

[Docket No. 15302; FCC 64–1188]

## PART 87—AVIATION SERVICES

### Authorization of Non-Type Accepted Transmitters at International Gateway Stations

1. The Commission has before it for consideration a Petition for Reconsideration filed by Aeronautical Radio, Inc. (ARINC) concerning an amendment to Part 87 of the Commission's rules released July 31, 1964 (FCC 64–735) which, among other things, extended the date for the requirement for type accepted equipment from January 1, 1965, to January 1, 1970, for HF transmitting equipment, in excess of 1,000 watts power, in use in the aeronautical mobile and aeronautical fixed services at international gateway stations. Petitioner objects to the amendment applying only to transmitters in excess of 1,000 watts and requests that the present § 87.77(b) be amended by the addition of a sentence to read as follows: "Types of transmitters of less than 1,000 watts power, now in use for emergency and standby service at such aeronautical enroute and aeronautical fixed stations, may continue to be used for such purposes until January 1, 1970."

This request is based on three main reasons which are set forth in the succeeding paragraphs.

2. Petitioner asserts that HF transmitters having a power rating of less than 1,000 watts are used at U.S. international gateway stations for emergency standby service. These transmitters are seldom called into service and they do not cause interference to others. Should interference occur, ARINC states that immediate corrective actions will be taken.

3. The second allegation by petitioner is that present type accepted equipment, less than 1,000 watts, is not suitable for replacement of existing transmitters. By way of example, ARINC cites the example of the Collins 16F equipment which is presently utilized in various ARINC stations. This transmitter is capable of operating on any of ten frequencies in the aeronautical mobile or aeronautical fixed services. It also provides, according to ARINC, another essential feature of being able to quickly shift frequencies in a matter of a very few seconds. ARINC further asserts that type accepted equipment which comes closest to meeting these requirements has a capability of only four frequencies.

4. The final reason is based on the uncertain needs for future HF communications. Petitioner asserts that (a) efforts are continuing to extend the VHF communications coverage on international routes, (b) industry is on the threshold of practical application of communication satellites, offering separate and expanded continuous VHF two-way communications between the desired ground control locations and aircraft on the major world air routes, (c) there is evidence that operational requirements of the supersonic transport (SST) may require data communications to handle the bulk information exchange with SST aircraft within the allowable time frame and (d) any of these new requirements that may entail HF might be provided by the use of single sideband (SSB).

5. The primary reason for extending the type acceptance date for HF transmitting equipment in excess of 1,000 watts power at international gateway stations was to relieve licensees from a situation that existed through no fault of their own—namely, the lack of suitable type accepted equipment in excess of 1,000 watts power. The Report and Order in this proceeding pointed out that ARINC had not clearly demonstrated that suitable type accepted transmitters under 1,000 watts power were not available. The subject petition, however, does present certain matters which were not before the Commission at the time the present amendment was considered. The infrequent use of emergency standby equipment, however, was considered during the original rule making. The establishment of a separate criterion or category for so-called back-up equipment is not administratively feasible nor does it appear justified. If this equipment is going to be a part of aviation safety communications, it should be subject to the same regulations, where possible, as equipment used on a regular basis.

6. With respect to new matters, the Commission's records substantiate the contention of ARINC that type accepted equipment is unavailable having the power rating and certain other features of the Collins 16F series. These are ten channel transmitters using the "autotune" system, having rated minimum output powers of 250 watts on $A_3$ or $A_3$ emission, 400 watts on $A_1$ emission, and operating in the range 1.5 to approximately 18 Mc/s. The manufacturer specifies the frequency shift time by the operator as less than 8 seconds. On the basis of ARINC's stated need, it is concluded that no suitable type accepted equipment is available with respect to replacing the Collins 16F equipment. The reasoning used in exempting certain transmitters from type acceptance in excess of 1,000 watts would apply to this case as well, but would be limited to Collins 16F equipment.

7. The allegation that the future needs for HF communications are uncertain is supported by the information submitted. The extension of VHF on international routes, communication satellites, supersonic transport and single sideband are all very important factors which make it difficult to forecast with a degree of certainty the role that HF communications will play in the aviation communications structure. It is possible that any one or a combination of these factors could cause a complete revamping and replacement of present HF international gateway facilities even though the equipment may be type accepted. This possibility coming to fruition soon after a change to type accepted equipment could cause a very serious economic impact on licensees affected.

8. The five-year extension requested should provide sufficient time for the future of HF communications at international gateway stations to crystallize so that when type accepted equipment is installed, it would be of a type that would meet operational requirements that may develop. This uncertainty, with respect to HF, is such that relief should be given from the present January 1, 1965 date for type acceptance in the case of transmitters of less than 1,000 watts power, now in use on an emergency or standby basis at international gateway stations. An appropriate amendment to the rules is set forth below.

9. In view of the foregoing: *It is ordered*, This 23d day of December 1964, That the Petition for Reconsideration of ARINC is granted. Accordingly: *It is ordered*, Pursuant to the authority contained in section 303 (e), (f), and (r) of the Communications Act of 1934, as amended, that effective December 31, 1964, Part 87 of the Commission's rules is amended as set forth below. *It is further ordered*, That this proceeding is hereby terminated.

(Sec. 4, 48 Stat. 1066, as amended; 47 U.S.C. 154. Interprets or applies sec. 303, 48 Stat. 1082, as amended; 47 U.S.C. 303)

Released: December 28, 1964.

FEDERAL COMMUNICATIONS COMMISSION,[1]
[SEAL] BEN F. WAPLE,
*Secretary.*

[1] Commissioner Cox dissenting.

Section 87.77 (b) and (d) are amended to read as follows:

**§ 87.77 Acceptability of transmitters for licensing.**

• • • • • •

(b) Except as provided in paragraph (d) of this section, each transmitter used in the Aviation Services must be of a type which has been type accepted by the Commission for use in these services.

• • • • • •

(d) The following exceptions to the provisions of paragraph (b) of this section are provided on the express condition that the operation of stations using transmitting equipment not type accepted by the Commission shall not result in harmful interference due to the failure of such equipment to comply with the current technical standards of Subpart A of this part.

(1) Type accepted equipment is not required at developmental stations.

(2) Type accepted equipment is not required at Civil Air Patrol stations.

(3) Equipment which has not been type accepted may be used at flight test stations for limited periods where justified on the basis of good cause shown.

(4) Equipment which is to be used exclusively under emergency and distress conditions for survival purposes and which is carried aboard aircraft in such a manner as to only be available under these conditions need not be type accepted by the Commission if it is a type which was in use prior to January 1, 1965.

(5) Until January 1, 1970, the following classes of equipment in use by a licensee prior to July 1, 1959, may continue to be used by the same licensee, his successors or assigns: (i) HF transmitting equipment in excess of 1,000 watts power in aeronautical mobile and aeronautical fixed services at international gateway stations and stations in Alaska; and (ii) HF transmitters in use on an emergency or standby basis in the aeronautical mobile and aeronautical fixed services at international gateway stations.

# Title 50—WILDLIFE AND FISHERIES

## Chapter I—Bureau of Sport Fisheries and Wildlife, Fish and Wildlife Service, Department of the Interior

## PART 33—SPORT FISHING

### Deer Flat National Wildlife Refuge, Idaho

The following special regulation is issued and is effective on date of publication in the FEDERAL REGISTER.

**§ 33.5 Special regulations; sport fishing; for individual wildlife refuge areas.**

IDAHO

DEER FLAT NATIONAL WILDLIFE REFUGE

Sport fishing on the Deer Flat National Wildlife Refuge, Idaho, is permitted only

on the area designated by signs as open to fishing. This open area, comprising 9,500 acres, is delineated on maps available at the refuge headquarters and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, 1002 Northeast Holladay Street, Portland, Oregon, 97208. Sport fishing shall be in accordance with all applicable State regulations, subject to the following special conditions:

(1) The sport fishing season on the Lake Lowell Unit of the refuge shall be as follows: Upper one-third of Lake Lowell open from April 1 through September 30, 1965. Lower two-thirds of the Lake open to fishing year round, except closed during migratory waterfowl hunting season. The Snake River portion is open to year-round fishing.

(2) Boats with motors may be used for fishing as follows: Motorboats to be operated on Lake Lowell during daylight hours only. Boats with motors may be used on lower two-thirds of Lake Lowell from April 1 through September 30, 1965. Boats without motors may be used on lower two-thirds of lake throughout fishing season. Boats without motors permitted on upper one-third of lake from January 1 through September 30, 1965. In New York Canal, bank fishing only permitted.

The provisions of this special regulation supplement the regulations which govern fishing on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 33, and are effective to January 1, 1966.

HENRY BAETKEY,
*Acting Regional Director, Bureau of Sport Fisheries and Wildlife.*

DECEMBER 22, 1964.

[F.R. Doc. 64-13467; Filed, Dec. 30, 1964; 8:46 a.m.]

## PART 33—SPORT FISHING

### Stillwater National Wildlife Refuge, Nevada

The following special regulation is issued and is effective on date of publication in the FEDERAL REGISTER.

**§ 33.5 Special regulations; sport fishing; for individual wildlife refuge areas.**

NEVADA

STILLWATER NATIONAL WILDLIFE REFUGE

Sport fishing on the Stillwater National Wildlife Refuge, Nevada, is permitted only on the area designated by signs as open to fishing. This open area, comprising 4,000 acres, is delineated on maps available at the refuge headquarters, Stillwater National Wildlife Refuge, Fallon, Nevada, and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, 1002 Northeast Holladay Street, Portland, Oregon, 97208. Sport fishing shall be in accordance with all applicable State regulations, subject to the following special conditions:

(1) January 1 to December 31, 1965, except closed during migratory waterfowl hunting season.

(2) Boats with motors up to 10 HP may be used for fishing.

The provisions of this special regulation supplement the regulations which govern fishing on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 33, and are effective to January 1, 1966.

HENRY BAETKEY,
*Acting Regional Director, Bureau of Sport Fisheries and Wildlife.*

DECEMBER 22, 1964.

# Proposed Rule Making

## DEPARTMENT OF AGRICULTURE

### Agricultural Marketing Service

[ 7 CFR Parts 911, 915 ]

[Docket Nos. AO-267-A2, AO-254-A3]

### HANDLING OF LIMES AND AVOCADOS

### Decision and Referendum Order With Respect to Proposed Further Amendments of the Marketing Agreements and Orders

Pursuant to the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held at Modello, Florida, on October 22, 1964, after notice thereof published in the FEDERAL REGISTER (29 F.R. 14121), on proposed further amendments of the respective marketing agreements and orders (7 CFR Parts 911 and 915) regulating the handling of Florida limes and avocados, to be made effective pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674).

On the basis of the evidence adduced at the hearing, and the record thereof, the recommended decision in this proceeding was filed on December 1, 1964, with the Hearing Clerk, United States Department of Agriculture. The notice of the filing of such recommended decision, affording opportunity to file written exceptions thereto, was published in the FEDERAL REGISTER (F.R. Doc. 64-12421; 29 F.R. 16258) on December 4, 1964. No exception was filed.

The material issues, findings and conclusions, rulings, and the general findings of the recommended decision set forth in the FEDERAL REGISTER (F.R. Doc. 64-12421; 29 F.R. 16258) are hereby approved and adopted as the material issues, findings and conclusions, rulings, and the general findings of this decision as if set forth in full herein.

*Further amendments of the marketing agreements and orders.* Annexed hereto and made a part hereof are documents entitled, respectively, "Marketing Agreement, as Amended, Regulating the Handling of Limes Grown in Florida," "Order Amending the Order, as Amended, Regulating the Handling of Limes Grown in Florida," "Marketing Agreement, as Amended, Regulating the Handling of Avocados Grown in South Florida," and "Order Amending the Order, as Amended, Regulating the Handling of Avocados Grown in South Florida" which have been decided upon as the appropriate and detailed means of effecting the foregoing conclusions. These documents shall not become effective unless and until the requirements of § 900.14 of the aforesaid rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

*Referendum order.* Pursuant to the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), it is hereby directed that referenda be conducted:

(1) Among the producers who, during the period April 1, 1963, through March 31, 1964 (which period is hereby determined to be a representative period for the purpose of such referendum), were engaged, within the production area (as defined in 7 CFR Part 911), in the production of limes for market to ascertain whether such producers favor the issuance of the said annexed order amending the order, as amended, regulating the handling of such limes; and

(2) Among the producers who, during the period April 1, 1963, through March 31, 1964 (which period is hereby determined to be a representative period for the purpose of such referendum), were engaged, within the production area (as defined in 7 CFR Part 915), in the production of avocados for market to ascertain whether such producers favor the issuance of the said annexed order amending the order, as amended, regulating the handling of such avocados.

Minard F. Miller, Fruit and Vegetable Division, Agricultural Marketing Service, United States Department of Agriculture, Post Office Box 9, Lakeland, Fla., 33802, is hereby designated referendum agent to conduct said referenda.

The procedure applicable to each referendum shall be the procedure (28 F.R. 6409) for the conduct of referenda regarding marketing orders for fruits, vegetables, and tree nuts.

*It is hereby ordered,* That all of this decision and referendum order, except the annexed marketing agreements, as amended, be published in the FEDERAL REGISTER. The respective regulatory provisions of the said marketing agreements are identical with those contained in the said orders as further amended by the annexed orders which will be published with this decision.

Dated: December 28, 1964.

GEORGE L. MEHREN,
*Assistant Secretary.*

*Order [1] Amending the Order, as Amended, Regulating the Handling of Limes Grown in Florida*

**§ 911.0 Findings and determinations.**

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations made in connection with the issuance of the order and of the previously issued amendment thereto; and all of said previous findings and determinations are hereby ratified and affirmed except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and the applicable rules of practice and procedure effective thereunder (7 CFR Part 900), a public hearing was held at Modello, Florida, on October 22, 1964, upon proposed amendments to the amended marketing agreement and Order No. 911, as amended (7 CFR Part 911), regulating the handling of limes grown in Florida. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order, as amended and as hereby amended, and all the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The said order, as amended and as hereby amended, regulates the handling of limes grown in the designated production area in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, the marketing agreement upon which hearings have been held;

(3) The said order, as amended and as hereby amended, is limited in application to the smallest regional production area that is practicable, consistently with carrying out the declared policy of the act, and the issuance of several orders applicable to subdivisions of such production area would not effectively carry out the declared policy of the act;

(4) There are no differences in the production and marketing of limes grown in the production area covered by the said order, as amended and as hereby amended, that make necessary different terms and provisions applicable to different parts of such area;

(5) All handling of limes grown in the production area is in the current of interstate or foreign commerce or directly burdens, obstructs, or affects such commerce.

*It is, therefore, ordered,* That, on and after the effective date hereof, all handling of limes grown in the production area shall be in conformity to, and in compliance with, the terms and conditions of the said order, as amended and as hereby amended, as follows:

In § 911.20, the second and fourth sentences are revised to read as follows: "Five of the members and their respective alternates shall be growers who shall not be handlers of limes produced by others or employees of such handlers. * * * The five members of the committee who shall be growers who shall not be handlers of limes produced by others or employees of such handlers are referred to as 'grower' members of the committee; and the four members who shall be handlers or employees of handlers are referred to as 'handler' members of the committee."

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and orders have been met.

*Order*[1] *Amending the Order, as Amended, Regulating the Handling of Avocados Grown in South Florida*

**§ 915.0 Findings and determinations.**

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations made in connection with the issuance of the order and of the previously issued amendments thereto; and all of said previous findings and determinations here hereby ratified and affirmed except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and the applicable rules of practice and procedure effective thereunder (7 CFR Part 900), a public hearing was held at Modello, Florida, on October 22, 1964, upon proposed amendments to the amended marketing agreement and Order No. 915, as amended (7 CFR Part 915), regulating the handling of avocados grown in South Florida. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order, as amended and as hereby amended, and all the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The said order, as amended and as hereby amended, regulates the handling of avocados grown in the designated production area in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, the marketing agreement upon which hearings have been held;

(3) The said order, as amended and as hereby amended, is limited in application to the smallest regional production area that is practicable, consistently with carrying out the declared policy of the act, and the issuance of several orders applicable to subdivisions of such production area would not effectively carry out the declared policy of the act;

(4) The said order, as amended and as hereby amended, prescribes, so far as practicable, such different terms applicable to different parts of the production area as are necessary to give due recognition to the differences in production and marketing of the avocados covered thereby;

(5) All handling of avocados grown in the production area is in the current of interstate or foreign commerce or directly burdens, obstructs, or affects such commerce.

*It is, therefore, ordered*, That, on and after the effective date hereof, all handling of avocados grown in the production area shall be in conformity to, and in compliance with, the terms and conditions of the said order, as amended, and as hereby amended as follows:

In § 915.20, the second and fourth sentences are revised to read as follows: "Five of the members and their respective alternates shall be growers who shall not be handlers of avocados produced by others or employees of such handlers. • • • The five members of the committee who shall be growers who shall not be handlers of avocados produced by others or employees of such handlers are referred to as 'grower' members of the committee; and the four members who shall be handlers or employees of handlers are referred to as 'handler' members of the committee."

[F.R. Doc. 64–13475; Filed, Dec. 30, 1964; 8:47 a.m.]

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and orders have been met.

## [ 7 CFR Part 980 ]

## ONION IMPORTS

### Notice of Proposed Rule Making

Notice is hereby given of a proposed amendment to § 980.103 *Onion Import Regulation* (29 F.R. 12672), applicable to the importation of onions into the United States. This regulation is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.).

Under Section 8e–1 of the act, whenever two or more marketing orders for a commodity are in effect, the importation of such commodity shall be prohibited unless it complies with the grade, size, quality, and maturity provisions of the order which, as determined by the Secretary of Agriculture, regulates the commodity produced in the area with which the imported commodity is in most direct competition.

Onion import regulation § 980.103 (29 F.R. 12672), effective since September 14, 1964, complies with the grade, size, and quality requirements for onions marketed under Marketing Order No. 958 regulating shipments of Idaho-Eastern Oregon onions. Grade, size, and quality regulations have also been proposed to become effective March 1, 1965, through June 15, 1965, under Marketing Order No. 959, as amended, regulating shipments of South Texas onions.

It is hereby determined that during the current onion marketing season, from March 1 through June 15, 1965, onions imported into the United States will be in most direct competition with onions produced in the South Texas production area and that import regulations during such period shall be based on regulations in effect for South Texas onions under Marketing Order No. 959, as amended (7 CFR Part 959).

Consideration will be given to any data, views, or arguments pertaining to the proposed amendment which are filed in quadruplicate with the Hearing Clerk, United States Department of Agriculture, Room 112, Administration Building, Washington, D.C., 20250, not later than 20 days after publication of this notice in the FEDERAL REGISTER. All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

The proposed amendment is as follows:

In § 980.103 *Onion import regulation* (29 F.R. 12672), delete the introductory paragraph and paragraphs (a) and (h) and substitute in lieu thereof a new introductory paragraph and new paragraphs (a) and (h) as set forth below. Paragraph (b) is republished for information.

**§ 980.103 Onion import regulation.**

Except as otherwise provided, during the period beginning March 1, 1965, and continuing through June 15, 1965, no person may import dry onions, except red onions, unless such onions are inspected and meet the requirements of this section.

(a) *Minimum grade and size requirements*—(1) *Grade.* Not to exceed 20 percent defects of U.S. No. 1 grade. In percentage grade lots, tolerances for serious damage shall not exceed 10 percent including not more than 2 percent decay. Double the lot tolerance shall be permitted in individual packages in percentage grade lots. Application of tolerances in U.S. Grade Standards shall apply to in-grade lots.

(2) *Size.* White onions—1 inch minimum diameter; all other (except red) varieties—1¾ inches minimum diameter.

(b) *Condition.* Due consideration shall be given to the time required for transportation and entry of onions into the United States. Onions with transit time from country of origin to entry into the United States of ten or more days may be entered if they meet an average tolerance for decay of not more than 5 percent, provided they also meet the requirements of this section.

• • • • •

(h) *Definitions.* For the purpose of this section, "Onions" means all varieties of Allium cepa marketed dry, except dehydrated, canned and frozen onions, onion sets, green onions, and pickling onions. Onions commonly referred to as "braided," that is, with tops, may be imported if they meet the grade and size requirements except for top length. The term "U.S. No. 1" shall have the same meaning as set forth in the United States Standards for Bermuda-Granex-Grano Type Onions (§§ 51.3195–51.3209 of this title), or in the United States Standards for Grades of Onions (§§ 51.2830–51.2850 of this title), whichever is applicable to the particular variety. Tolerances for size shall be those in the United States Standards. Onions meeting the requirements of Canada No. 1 grade shall be deemed to comply with the requirements of U.S. No. 1 grade. "Importation" means release from custody of the United States Bureau of Customs.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601 et seq.)

Dated: December 28, 1964.

PAUL A. NICHOLSON,
*Deputy Director,*
*Fruit and Vegetable Division.*

## [ 9 CFR Part 201 ]

## REGULATIONS UNDER THE PACKERS AND STOCKYARDS ACT

### Bonding

Notice is hereby given that, pursuant to the authority contained in an act of Congress approved July 12, 1943 (7 U.S.C. 204), and in section 407(a) of the Packers and Stockyards Act (7 U.S.C. 228(a)), the Agricultural Marketing Service proposes to amend § 201.31 (9 CFR 201.31) of the regulations under the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 181 et seq.), concerning the condition clauses of market agency and dealer bonds.

*Statement of considerations.* On October 31, 1964, a notice of proposed rule making was published in the FEDERAL REGISTER (29 F.R. 14855) concerning amendments to §§ 201.27 through 201.34 (9 CFR 201.27–201.34) of the regulations under the Packers and Stockyards Act, 1921, as amended. Such regulations relate to general bonding provisions and market agency and dealer bonds. Numerous written comments and recommendations have been received in response to the notice of proposed rule making. Some of the recommendations presently under consideration would not involve substantial changes or modifications in the amendments proposed in the October 31, 1964, notice of proposed rule making. If adopted, such recommendations will be incorporated in the final amendments to the bonding regulations without further notice. Other recommendations, however, involve substantial changes in the proposed amendments and warrant publication in the FEDERAL REGISTER if the Agricultural Marketing Service proposes that they be adopted. One of such changes involves § 201.31.

Present § 201.31 of the regulations covers the condition clauses in market agency and dealer bonds. The proposed amendment to § 201.31 published in the FEDERAL REGISTER on October 31, 1964, clarifies such condition clauses. The recommendations and comments received concerning such amendment indicate that the separate condition clauses covering the livestock buying operations of market agencies and dealers should be consolidated into one clause since many persons are engaged in buying livestock in both capacities and are so registered under the Act. It has also been recommended that the various bond clauses be numbered in order that surety companies may, by reference to the applicable number, incorporate a condition clause into a market agency or dealer bond.

It is now proposed that § 201.31 of the regulations under the Packers and Stockyards Act be amended to read as follows:

**§ 201.31 Conditions in market agency and dealer bonds.**

Each market agency and dealer bond shall contain conditions applicable to the activity or activities in which the person or persons named as principal or clearees in the bond propose to engage, which conditions shall be as follows or in terms to provide equivalent protection:

(a) *Condition Clause No. 1. When the principal sells livestock for the accounts of others:*

If the said principal shall pay when due to the person or persons entitled thereto the gross amount, less lawful charges, for which all livestock is sold for the accounts of others by said principal.

(b) *Condition Clause No. 2. When the principal buys livestock for his own account or for the accounts of others:*

If the said principal shall pay when due to the person or persons entitled thereto the purchase price of all livestock purchased by said principal for his own account or for the accounts of others, and if the said principal shall safely keep and properly disburse all funds, if any, which come into his hands for the purpose of paying for livestock purchased for the accounts of others.

(c) *Condition Clause No. 3. When the principal clears other registrants buying livestock and thus is responsible for the obligations of such other registrants:*

If the said principal, acting as a clearing agency responsible for the financial obligations of other registrants engaged in buying livestock, viz.: (insert here the names of such other registrants as they appear in the application for registration), or if such other registrants, shall (1) pay when due to the person or persons entitled thereto the purchase price of all livestock purchased by such other registrants; and (2) safely keep and properly disburse all funds coming into the hands of such principal or such other registrants for the purpose of paying for livestock purchased for the accounts of others.

(d) *When the principal clears other registrants selling livestock and thus is responsible for the obligations of such other registrants.* The condition clauses of those selling agencies named prior to September 1, 1957, as clearees in the bonds filed and maintained by market agencies registered to provide clearing services shall remain the same as the condition clauses now in effect in such bonds.

Any person who wishes to submit written data, views, or arguments concerning this proposed amendment may do so by filing them in duplicate with the Hearing Clerk, United States Department of Agriculture, Washington, D.C., on or before February 1, 1965. The time for filing written data, views, or arguments concerning the other proposed amendments to §§ 201.27 through 201.34 published in the FEDERAL REGISTER on October 31, 1964, is hereby extended to and including February 1, 1965.

All written submissions made pursuant to this notice will be made available for public inspection at such times and places and in a manner convenient to the public business (7 CFR 1.27(b)).

Done at Washington, D.C., this 28th day of December 1964.

CLARENCE H. GIRARD,
*Deputy Administrator.*

[F.R. Doc. 64–13474; Filed, Dec. 30, 1964; 8:47 a.m.]

# FEDERAL COMMUNICATIONS COMMISSION

## [ 47 CFR Part 73 ]

[Docket No. 15771; FCC 64–1203]

## FM BROADCAST STATIONS; CHICAGO AND SKOKIE, ILL.

### Proposed Table of Assignments

*Notice of proposed rule making and order to show cause.* 1. Notice of proposed rule making is hereby given in the above-entitled matter.

2. This is a further step in our efforts to resolve the complex and long-standing FM allocation problems in the Chicago area. In a Memorandum Opinion and Order adopted today, we have assigned Channel 294 to Waukegan, Ill.—for use there or at Des Plaines, Ill., under the "25-mile rule"—as one step toward settling these matters. In reaching this decision, we denied requests that Channel 294 be used at Skokie, Ill. (a community of approximately 60,000 population immediately north of Chicago), to provide a substitute assignment for Station WRSV, Skokie, which now operates on Channel 252A and which, so operating, causes a fairly substantial amount of interference to, and receives interference from, two Chicago stations two channels removed (WHFC on Channel 250 and WFMT on Channel 254). Station WRSV is only about 10 miles distant from one of these stations and 13 miles distant from the other—considerably less than the standard separations between stations two channels removed now provided by our rules (40 miles).

3. The mutual interference which the WRSV assignment involves with the other two stations has been the subject of numerous complaints by listeners to WRSV and WFMT. It appears appropriate to take whatever steps may be feasible to eliminate this unsatisfactory situation.

4. We have recently issued a decision, and a subsequent decision on reconsideration, revoking the license of Station WCLM, Chicago, which operates on Channel 270. This action, which was taken because of operation of that station in a manner violative of the Commission's rules and contrary to the public interest, unless reversed on appeal, makes Channel 270 available for use in the Chicago area.[2]

5. Channel 270 at Chicago is now short-spaced. In view of the large number of other Chicago stations (14), continued use of the channel for Chicago itself does not appear warranted. Nevertheless, we believe that under the circumstances here present, its continued assignment in the Chicago area is appropriate, particularly to resolve the exist-

[2] Carol Music, Inc., licensee of WCLM, has appealed our decision to the United States Court of Appeals for the District of Columbia. Any reassignment of this channel is, of course, subject to the outcome of that appeal.

ing unsatisfactory interference situation between WRSV, Skokie, and the two Chicago stations two channels removed from it. Assignment at Skokie would involve substandard separations to two stations—24 miles to a station on Channel 272A at Waukegan (compared to standard spacing of 40 miles) and 71 miles to a station on Channel 271 at Milwaukee. If a Skokie station is limited to 20 kw E.R.P. and antenna height of 130 feet a.a.t. (the antenna height of WRSV) in the direction of Waukegan and Milwaukee, it would cause no more interference to Waukegan than does WCLM now operating on Channel 270, and less to Milwaukee. The interference situation involving WRSV would be removed and thus over-all assignment conditions would be substantially improved. Therefore we propose to assign Channel 270 to Skokie, to be used with facilities limited as above.

6. Comments are therefore invited on the following amendment to § 73.202 of the rules (Table of FM Assignments), with the understanding that a station assigned to Skokie on Channel 270 will be limited in facilities as set forth in the preceding paragraph:

| City | Channel No. | |
|---|---|---|
| | Present | Proposed |
| Chicago, Ill. | 226, 230, 234, 238, 242, 246, 250, 254, 258, 262, 266, 270, 278, 282, 298. | 226, 230, 234, 238, 242, 246, 250, 254, 258, 262, 266, 278, 282, 298. |
| Skokie, Ill. | 252A | 270 |

7. Authority for the adoption of these rule amendments is contained in sections 4(i), 303, and 307(b) of the Communications Act of 1934, as amended.

8. Pursuant to applicable procedures set out in § 1.415 of the Commission's rules, interested persons may file comments on or before February 2, 1965, and reply comments on or before February 12, 1965. All submissions by parties to this proceeding or persons acting in behalf of such parties must be made in written comments, reply comments or other appropriate pleadings.

9. In accordance with the provisions of § 1.419 of the rules, an original and 14 copies of all comments, replies, pleadings, briefs, and other documents shall be furnished the Commission. Attention is directed to other provisions of paragraph (c) of § 1.419 which require that any person desiring to file identical documents in more than one docketed rule making proceeding shall furnish the Commission two additional copies of any such document for each additional docket unless the proceedings have been consolidated.

10. Pursuant to section 316 of the Communications Act of 1934, as amended, Radio Skokie Valley, Inc., is Ordered to Show Cause why its license for Station WRSV should not be modified to specify operation on Channel 270 with 20 kw power and 130 feet antenna height, in lieu of Channel 252A. A reply to this Order shall be submitted by February 2, 1965.

Adopted: December 23, 1964.

Released: December 28, 1964.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] BEN F. WAPLE,
*Secretary.*

## [ 47 CFR Part 73 ]

[Docket No. 15772; FCC 64-1204]

## TELEVISION BROADCAST STATIONS; CASPER, WYOMING

### Proposed Table of Assignments

In the matter of amendment of § 73.606(b), table of assignments, television broadcast stations (Casper, Wyo.), Docket No. 15772, (RM-656).

1. Notice is hereby given of proposed rule making in the above matter.

2. The Commission has before it a petition filed on September 16, 1964, by the Natrona County High School District and School District Number Two (Natrona) of Casper, Wyo., requesting the institution of a rule making proceeding looking toward the reservation of Channel 6 at Casper, Wyo., for noncommercial educational purposes.

3. At the present time, the Table of Assignments includes Channels 2+ and 6+ for use in Casper. KTWO-TV is operating on Channel 2. An application was filed on September 15, 1964, by Duhamel Broadcasting Enterprises requesting operation on Channel 6; however, this application was dismissed on November 17, 1964, at the request of the applicant.

4. In support of its petition, Natrona (a group composed of all the public elementary and secondary schools in Casper) stated that television has been used for instructional purposes for five years in Casper classrooms. The programs have originated on KTWO-TV (the commercial station in Casper) and additional programs from KRMA-TV (the noncommercial educational station in Denver, Colo.) have been brought into Casper on the local cable system. The programs carried over KTWO-TV are used not only in petitioner's schools but also in other school systems within the KTWO-TV service area. These schools have formed the "Greater Wyoming Instructional Television Council" and now contribute to help defray the expense of the programs carried over KTWO-TV. Petitioner asserts that the ultimate ownership and operation of its own television station is essential if the instructional television program is to grow and is to be developed to meet the needs of the Wyoming schools. It is contended that such a system must originate programs designed to meet the needs of the Wyoming schools and must have its own station to give its program the fullness and flexibility that are impossible when the only time available is that which a commercial station is willing to offer.

5. In view of the foregoing, comments and reply comments are invited on the following proposal:

| City | Channel No. | |
|---|---|---|
| | Present | Proposed |
| Casper, Wyo. | 2+, 6+ | 2+, *6+ |

6. Authority for the adoption of the amendments proposed herein is contained in sections 4(i), 303, and 307(b) of the Communications Act of 1934, as amended.

7. Pursuant to applicable procedures set out in § 1.415 of the Commission's rules and regulations, interested parties may file comments on or before February 1, 1965 and reply comments on or before February 15, 1965. All submissions by parties to this proceeding or by persons acting on behalf of such parties must be made in written comments, reply comments or other appropriate pleadings.

8. In accordance with the provisions of § 1.419 of the rules, an original and 14 copies of all written comments, replies, pleadings, briefs, or other documents shall be furnished the Commission.

Adopted: December 23, 1964.

Released: December 28, 1964.

## PROXY RULES

### Extension of Time for Comments on Proposed Amendments

The Securities and Exchange Commission has extended to January 15, 1965, the due date for the submission of views and comments upon the proposal for revision of its proxy rules (Regulation 14) under the Securities Exchange Act of 1934 (17 CFR 240.14a-1 to 240.14a-11). The extension was necessitated by the delay encountered in printing and distributing copies of the proposal to the Commission's mailing lists and in its publication in the FEDERAL REGISTER.

The proposal was announced on December 7, 1964 in Securities Exchange Act Release No. 7481, and published in the FEDERAL REGISTER of December 24, 1964 (29 F.R. 18386).

[SEAL] ORVAL L. DUBOIS,
*Secretary.*

### COLORADO

#### Notice of Proposed Withdrawal and Reservation of Lands

DECEMBER 24, 1964.

The Department of the Army has filed an application, Serial Number Colorado 0124534 for the withdrawal from all forms of appropriation under the public land laws including the mining and mineral leasing laws as provided by Executive Order 10355 of May 26, 1952, certain public lands in the sections and townships described below.

The Department of the Army desires the lands for the expansion of Fort Carson Military Reservation.

For a period of thirty days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the Land Office Manager of the Bureau of Land Management, Department of the Interior, Colorado Land Office, Insurance Exchange Building, 910 15th Street, Denver, Colo., 80202.

If circumstances warrant it, a public hearing will be held at a convenient time and place, which will be announced.

The determination of the Secretary on the application will be published in the FEDERAL REGISTER. A separate notice will be sent to each interested party of record.

The lands affected are:

SIXTH PRINCIPAL MERIDIAN, COLORADO

T. 17 S., R. 67 W.,
In Section 35.
T. 18 S., R. 66 W.,
In Sections 9, 14, 20.
T. 18 S., R. 67 W.,

### COLORADO

#### Notice of Proposed Withdrawal and Reservation of Lands

DECEMBER 24, 1964.

The Bureau of Sport Fisheries and Wildlife, Fish and Wildlife Service, Department of the Interior, has filed an application, Serial Number Colorado 0124543, for the withdrawal from public entry, subject to existing valid claims, under Executive Order 10355, May 26, 1952, the public lands described below.

The applicant desires the land for reclamation purposes in connection with the Alamosa National Wildlife Refuge.

For a period of thirty days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the Land Office Manager of the Bureau of Land Management, Department of the Interior, Colorado Land Office, Insurance Exchange Building, 910 15th Street, Denver, Colorado, 80202.

If circumstances warrant it, a public hearing will be held at a convenient time and place, which will be announced.

The determination of the Secretary on the application will be published in the FEDERAL REGISTER. A separate notice will be sent to each interested party of record.

The lands affected are:

NEW MEXICO PRINCIPAL MERIDIAN, COLORADO

T. 36 N., R. 11 E.
Sec. 2: Lot 4, SW¼NW¼.

Lands proposed to be withdrawn in the above designated area aggregate approximately 86.29 acres.

## DEPARTMENT OF AGRICULTURE

### Agricultural Stabilization and Conservation Service

### RICE

#### Notice of Marketing Quota Referendum for the 1965 Crop

Marketing quotas for the crop of rice to be produced in 1965 have been duly proclaimed pursuant to provisions of the Agricultural Adjustment Act of 1938, as amended. Said act requires a referendum to be conducted within 30 days after the date of the issuance of said proclamation, of farmers who were engaged in the production of rice in 1964 to determine whether such farmers are in favor of or opposed to such quotas. Prior to establishing the date for the referendum on the 1965 crop rice, public notice (29 F.R. 13273) was given in accordance with the Administrative Procedure Act (5 U.S.C. 1003). No data, views, or recommendations pertaining thereto were submitted pursuant to such notice. It is hereby determined that the rice marketing quota referendum under said act for the 1965 crop of rice shall be held on January 26, 1965, which is within thirty days from the date of issuance of the proclamation of marketing quotas.

The date of the referendum is within thirty days after the date of the issuance of the proclamation of marketing quotas on the 1965 crop of rice, as required by law. Accordingly, it is necessary to waive the thirty-day effective date provision of the section 4 of the Administrative Procedure Act, and this document shall become effective upon its publication in the FEDERAL REGISTER.

Effective date: Upon publication in the FEDERAL REGISTER.

Signed at Washington, D.C., on December 24, 1964.

E. A. JAENKE,
*Acting Administrator, Agricultural Stabilization and Conservation Service.*

# FEDERAL POWER COMMISSION

[Docket No. G-9666]

## COLORADO INTERSTATE GAS CO.

### Notice of Application To Amend

DECEMBER 22, 1964.

Take notice that on November 13, 1964, Colorado Interstate Gas Company (Applicant), Colorado Springs National Bank Building, Colorado Springs, Colo., filed in Docket No. G-9666 an application to amend the order of the Commission issued March 15, 1956, which order authorized Applicant to construct a meter station for sale and delivery of natural gas on an emergency basis to Northern Gas Company (Northern) under Applicant's Rate Schedule E-1.

In the subject application, Applicant requests authorization to continue said sale and delivery of natural gas to Northern on a permanent basis, under Applicant's Rate Schedules G-1 and IS-2, instead of under its Rate Schedule E-1.

The application states that the total estimated annual requirments of Northern are 300,000 Mcf.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before January 18, 1965.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no protest or petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that the proposed amendment is required by the public convenience and necessity. If a protest or petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

JOSEPH H. GUTRIDE,
*Secretary.*

[F.R. Doc. 64-13453; Filed, Dec. 30, 1964; 8:45 a.m.]

[Project No. 1971]

## IDAHO POWER CO.

### Order Granting Secretary of Interior's Petition for Leave To Intervene and Setting Oral Argument

DECEMBER 23, 1964.

On November 12, 1964, we granted a timely petition of the Secretary of the Interior for rehearing of our order of September 15, 1964, amending Article 39 of the license, for the limited purpose of giving further consideration to the questions presented by the application. Our order made clear that we were not deciding, but were reserving for further consideration, the question whether the Secretary should be recognized as an intervenor. On November 30, 1964, the Secretary applied for oral argument.

After further consideration, we have concluded that the status of the Secretary in this proceeding is not an appropriate subject for oral argument, and that in the exercise of our discretion we should grant leave to the Secretary to intervene out of time. We are persuaded by the representations in the application for rehearing that responsible officials of the Department of the Interior had construed an exchange of correspondence between the Department and the Commission as granting an extension of time in which to petition to intervene.

In addition, we believe that this proceeding involves important issues in which the Secretary has an interest. Accordingly, we find that the Secretary of the Interior "in extraordinary circumstances for good cause shown" should be permitted to intervene out of time, and that such intervention should be limited, as indicated below.

In our opinion, oral argument before the Commission might simplify the issues and might assist us in arriving at a sound solution. Such oral argument is being limited to the issues presented by the Secretary of the Interior's comments and petition to intervene and his application for rehearing.

The Commission orders:

(A) The Secretary of the Interior is hereby permitted to intervene in this proceeding subject to the Commission's rules and regulations: *Provided, however,* That the participation of the Secretary of the Interior is limited to those matters (not disposed of by this order) affecting asserted rights and interests specifically set forth in his petition to intervene and his application for rehearing, and is further limited to the record presently before the Commission in this proceeding: *And provided, further,* That this order shall not be construed as recognition by

the Commission that the Secretary of the Interior has been, or will be, aggrieved by any order or orders heretofore

The estimated cost of Applicant's proposed construction is $58,900, which will

the penstock headworks; (4) a 104-foot-long concrete and steel penstock head-

persons who are directors or officers of Fund, its investment adviser or principal

caustic soda, in tank carloads, from specified points in Michigan, New Jersey, New

the Commission that the Secretary of the Interior has been, or will be, aggrieved by any order or orders heretofore or hereafter entered by the Commission in this proceeding.

(B) Oral argument in this proceeding shall be held before the Commission in a hearing room at the Commission's offices, 441 G Street NW., Washington, D.C., 20426, on January 18, 1965, at 10 a.m., e.s.t. The Secretary of the Interior, Licensee and the Commission staff shall advise the Secretary of the Commission in writing on or before January 6, 1965, how much time, if any, they desire for oral argument.

By the Commission.

[SEAL] JOSEPH H. GUTRIDE, *Secretary.*

[F.R. Doc. 64-13454; Filed, Dec. 30, 1964; 8:45 a.m.]

[Docket No. CP64-265]

## MISSISSIPPI RIVER TRANSMISSION CORP.[1]

### Notice of Application

DECEMBER 22, 1964.

Take notice that on April 30, 1964, as supplemented on November 2, 1964, Mississippi River Transmission Corporation[1] (Applicant), 9900 Clayton Road, St. Louis, Mo., filed in Docket No. CP64-265 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of natural gas facilities and the transportation of natural gas, all as more fully set forth in the application on file with the Commission and open to public inspection.

Specifically, Applicant proposes to install a tap connection on an existing 12¾-inch O.D. line in Jefferson County, Missouri and construct and operate 1.31 miles of 6⅝-inch O.D. line from that connection to the portland cement manufacturing plant which Mississippi River Fuel Corporation is constructing near Festus, Jefferson County, Missouri, for the purpose of enabling Applicant to deliver natural gas to said plant, to be used for firing a rotary cement-burning kiln, driers, and other equipment incidental to the operation of said plant.

Estimated annual and peak day deliveries to the cement plant are stated to be:

| | First year | Second year | Third year |
|---|---|---|---|
| Annual (Mcf) | 1,064,000 | 1,840,000 | 1,840,000 |
| Peak day (Mcf) | 10,000 | 10,000 | 10,000 |

[1] The original application was filed by Mississippi River Fuel Corporation. However, in Docket No. CP63-12, by Commission order issued August 7, 1964, Mississippi River Transmission Corporation was authorized to acquire, among other things, the pipeline facilities of Mississippi River Fuel Corporation. Consequently, Mississippi River Transmission Corporation will be substituted as Applicant in the instant docket.

The estimated cost of Applicant's proposed construction is $58,900, which will be financed with cash on hand.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before January 22, 1965.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no protest or petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a protest or petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

JOSEPH H. GUTRIDE, *Secretary.*

[F.R. Doc. 64-13455; Filed, Dec. 30, 1964; 8:45 a.m.]

[Project No. 2491]

## NORTHERN STATES POWER CO.

### Notice of Application for License

DECEMBER 22, 1964.

Public notice is hereby given that application has been filed under the Federal Power Act (16 U.S.C. 791a-825r) by Northern States Power Co. (correspondence to: Stuart V. Willson, president, Northern States Power Co., 100 North Barstow Street, Eau Claire, Wis.) for a license for constructed Project No. 2491, known as the Jim Falls Hydro Project, located on the Chippewa River, in the village of Jim Falls, Towns of Anson, Arthur, Cleveland, Eagle Point, and Estella, in Chippewa County, Wis.

The project consists of: (1) A 2,589-foot-long dam across the Chippewa River—composed of (a) a 440-foot-long earth embankment which extends from the westerly river bank to (b) a 214.6-foot-long concrete flashboard section (having eight 23.5-foot-wide openings, 3.8 feet deep) which extends to (c) a 358-foot-long concrete tainter gate section (containing 16 gates in 16-foot wide x 13.9-foot deep openings) which extends to (d) a 1,179-foot-long concrete corewall earthen embankment which connects (e) the headrace canal headworks—a 397.5-foot-long concrete structure containing 42 stop-log openings 8 feet wide and 9 feet deep; (2) a 1,800-foot long x 150-foot wide submerged excavated intake canal which leads from the river to the headrace canal headworks; (3) a 4,268-foot long x 75-90-foot wide headrace canal which extends to the penstock headworks; (4) a 104-foot-long concrete and steel penstock headwork structure which contains four penstock openings, two 60-foot wingwalls, and a 40-foot spillway section; (5) three 14-foot-diameter steel penstocks which extend 200 feet to the turbines in the powerhouse; (6) a concrete, brick, and steel powerhouse structure (106 feet x 57 feet in plan) housing three identical generating units—each rated at 4,800 kw and direct connected to Francis-type turbines rated at 4,800 hp at a 50-foot head; and (7) all appurtenant electrical, mechanical, and transmission facilities.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure of the Commission (18 CFR 1.8 or 1.10). The last day upon which protests or petitions may be filed is February 8, 1965. The application is on file with the Commission for public inspection.

# SECURITIES AND EXCHANGE COMMISSION

[File No. 1-3421]

## CONTINENTAL VENDING MACHINE CORP.

### Order Suspending Trading

DECEMBER 24, 1964.

The common stock, 10 cents par value, of Continental Vending Machine Corp., being listed and registered on the American Stock Exchange and having unlisted trading privileges on the Philadelphia-Baltimore-Washington Stock Exchange, and the 6 percent convertible subordinated debentures due September 1, 1976, being listed and registered on the American Stock Exchange, pursuant to provisions of the Securities Exchange Act of 1934; and

It appearing to the Securities and Exchange Commission that the summary suspension of trading in such securities on such Exchanges and otherwise than on a national securities exchange is required in the public interest and for the protection of investors;

*It is ordered,* Pursuant to sections 15(c)(5) and 19(a)(4) of the Securities Exchange Act of 1934, that trading in such securities on the American Stock Exchange, the Philadelphia-Baltimore-Washington Stock Exchange and otherwise than on a national securities exchange be summarily suspended, this order to be effective for the period December 28, 1964 through January 6, 1965, both dates inclusive.

By the Commission.

## THE ISRAEL FUND, INC.

### Notice of Filing of Application Pursuant for an Order of Exemption

DECEMBER 24, 1964.

Notice is hereby given that The Israel Fund, Inc. ("Fund"), 4200 Hayward Avenue, Baltimore, Md., 21215, a Maryland corporation registered under the Investment Company Act of 1940 ("Act") as a closed-end non-diversified investment company, has filed an application pursuant to sections 6(c) and 17(b) of the Act. Fund requests (i) an order, effective until the first annual meeting of stockholders, exempting it, its proposed investment adviser and its directors from the provisions of sections 15(a) and 16(a) of the Act to the extent that these sections require approval by shareholders of investment advisory agreements and election of directors by shareholders and (ii) an order exempting affiliated persons of Fund from the provisions of section 17(a) of the Act to the extent that these provisions would otherwise prevent affiliated persons of the Fund from acquiring shares of the Fund in exchange for State of Israel bonds. All interested persons are referred to the application, as amended, on file with the Commission for a full statement of the representations therein which are summarized below.

Fund was organized in 1963 and intends to issue up to 500,000 shares of its common stock when its registration statement under the Securities Act of 1933 becomes effective. Fund presently has no shareholders. Prior to the effective date of the registration statement, Fund proposes to enter into an investment advisory agreement with Multiple Securities Management Company. Since Fund will not have any outstanding voting securities until after the effective date of its registration statement, it will not be possible to secure prior approval of the advisory contract by a vote of a majority of outstanding securities as required by section 15(a) of the Act.

Similarly, the present directors of Fund have not been elected by the holders of the outstanding voting securities, as required by section 16(a) of the Act, and an election will not be possible prior to the proposed issuance of common stock of Fund.

At the first annual meeting of shareholders Fund proposes to secure appropriate shareholder action with respect to the investment advisory contract and the election of directors. Fund intends to hold its first annual meeting of shareholders sometime during 1965. The prospectus to be used by Fund in connection with the sale of Fund's common stock will contain full and appropriate information concerning the directors and the investment advisory contract.

Fund also requests an order of the Commission under section 17(b) of the Act permitting affiliated persons of Fund to purchase its shares for State of Israel bonds. These shares of Fund would be sold at the public offering price described in the prospectus, except that affiliated persons who are directors or officers of Fund, its investment adviser or principal underwriter, or bona fide full-time employees or sales representatives of any of these persons, may be permitted to purchase shares without sales load.

Notice is further given that any interested person may, not later than January 8, 1965, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request and the issues of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C., 20549. A copy of such request shall be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon applicant at the address stated above. Proof of such service (by affidavit or in case of an attorney-at-law by certificate) shall be filed contemporaneously with the request. At any time after said date, as provided by Rule 0-5 of the rules and regulations promulgated under the Act, an order disposing of the application herein may be issued by the Commission upon the basis of the information stated in said application, unless an order for hearing shall be issued upon request or upon the Commission's own motion.

For the Commission (pursuant to delegated authority).

[SEAL] ORVAL L. DUBOIS, *Secretary.*

# INTERSTATE COMMERCE COMMISSION

## FOURTH SECTION APPLICATIONS FOR RELIEF

DECEMBER 28, 1964.

Protests to the granting of an application must be prepared in accordance with Rule 1.40 of the general rules of practice (49 CFR 1.40) and filed within 15 days from the date of publication of this notice in the FEDERAL REGISTER.

LONG-AND-SHORT HAUL

FSA 39485: *Substituted service—B&O for Contract Carriers, Inc.*—Filed by Contract Carriers, Inc. (No. 2), for and on behalf of itself and The Baltimore and Ohio Railroad Company. Rates on shipping containers, viz.: empty drums or containers, returned, loaded in box cars, from Cincinnati, Ohio, to St. Louis, Mo., on traffic originating at or destined to points beyond such points.

Grounds for relief: motor-truck competition.

FSA 39486: *Liquid caustic soda to La Grange, Ga., and Coosa Pines, Ala.*—Filed by Traffic Executive Association-Eastern Railroads, agent (No. 2756), for interested rail carriers. Rates on liquid caustic soda, in tank carloads, from specified points in Michigan, New Jersey, New York, Ohio, and West Virginia, to La Grange, Ga., and Coosa Pines, Ala.

Grounds for relief: market competition.

Tariffs: Supplements 152 and 75 to Traffic Executive Association - Eastern Railroads, agent, tariffs I.C.C. C-102 and C-334, respectively.

FSA 39487: *Soybeans from points in Oklahoma.* Filed by Southwestern Freight Bureau, agent (No. B-8662), for interested rail carriers. Rates on soybeans, in bulk, in carloads, from specified points in Oklahoma to Van Buren, Ark., and Sherman, Tex.

Grounds for relief: carrier competition.

Tariffs: Supplements 27 and 61 to Southwestern Freight Bureau, agent, tariffs I.C.C. 4474 and 4496, respectively.

FSA 39488: *Salt to points in southern territory.* Filed by Southwestern Freight Bureau, agent (No. B-8663), for interested rail carriers. Rates on salt, as described in the application, in carloads, from Carlsbad and Loving, N. Mex., to points in southern territory.

Grounds for relief: Market competition.

Tariff: Supplement 42 to Southwestern Freight Bureau, agent, tariff I.C.C. 4562.

FSA 39489: *Asphalt to Ivanhoe, Minn.* Filed by Trans-Continental Freight Bureau, agent (No. 424), for interested rail carriers. Rates on asphalt (asphaltum), natural, byproduct of petroleum (other than paint, stain, or varnish), in tank carloads, subject to minimum shipment of 10 tank carloads per day, from Billings, East Billings, Great Falls and Laurel, Mont., to Ivanhoe, Minn.

Grounds for relief: Carrier competition.

Tariff: Supplement 36 to Trans-Continental Freight Bureau, agent, tariff I.C.C. 1701.

By the Commission.

[SEAL] HAROLD D. MCCOY, *Secretary.*

[Disaster Order No. 8]

## MONTANA

### Transportation of Hay at Reduced Rates

In the Matter of Relief under section 22 of the Interstate Commerce Act.

It appearing, that because of recent heavy snowfall in the State of Montana, the Secretary of Agriculture, by letter dated December 24, 1964, has requested the Commission to enter an order under section 22 of the Interstate Commerce Act authorizing railroads subject to the Commission's jurisdiction to transport hay to the State of Montana at reduced rates:

*It is ordered,* That carriers by railroad participating in the transportation of hay to the disaster areas in Montana, which is all of the counties of Carter, Custer, Dawson, Fallon, Powder River, Prairie, Rosebud, and Wibaux, be, and they are hereby, authorized under sec-

tion 22 of the Interstate Commerce Act to establish and maintain, until May 31, 1965, reduced rates for such transportation, the rates to be published and filed in the manner prescribed in section 6 of the Interstate Commerce Act except that they may be made effective one day after publication and filing instead of thirty.

*It is further ordered,* That the class of persons entitled to such reduced rates is hereby defined as persons designated as being in distress and in need of relief by the United States Department of Agriculture or by such State agents or agencies as may in turn be designated by the United States Department of Agriculture to assist in relieving the distress caused by the freeze.

*It is further ordered,* That, during the period in which any reduced rates authorized by this order are effective the carriers may, notwithstanding the provisions of Section 4 of the Interstate Commerce Act, maintain higher rates to directly intermediate points and maintain through rates in excess of the aggregate of intermediate rates over the same routes if one or more of the factors of such aggregate of intermediate rates is a reduced rate established under the authority of this order.

*It is further ordered,* That any tariffs or tariff provisions published under the authority of this order shall explicitly so state, making reference to this order by number and date.

*And it is further ordered,* That notice to the affected railroads and the general public shall be given by depositing a copy of this order in the Office of the Secretary of the Commission and by filing a copy with the Director, Office of the Federal Register; and that copies be mailed to the Chairman of the Traffic Executive Association—Eastern Railroads, New York, N.Y., the Chairman of the Southern Freight Association, Atlanta, Ga., the Chairman of the Executive Committee, Western Railroad Traffic Association, Chicago, Ill., the Traffic Vice-President of the Association of American Railroads, Washington, D.C., and to the President of the American Short Line Railroad Association, Washington, D.C.

Dated at Washington, D.C., this 24th day of December A.D. 1964.

By the Commission, Vice Chairman Webb.

[SEAL] HAROLD D. McCOY, *Secretary.*

[F.R. Doc. 64-13478; Filed, Dec. 30, 1964; 8:47 a.m.]

[Notice 1102]

## MOTOR CARRIER TRANSFER PROCEEDINGS

DECEMBER 28, 1964.

Synopses of orders entered pursuant to section 212(b) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 179), appear below:

As provided in the Commission's special rules of practice any interested person may file a petition seeking reconsideration of the following numbered proceedings within 20 days from the date of publication of this notice. Pursuant to section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC-FC 67459. By order of December 23, 1964, The Transfer Board approved the transfer to Raeford Trucking Company, a corporation, Sanford, N.C., of Certificates Nos. MC 60508, MC 60508 Sub 7, and MC 60508 Sub 8, issued January 23, 1951, September 1, 1960, and August 26, 1958, to Clyde H. Sizemore, doing business as Sizemore Trucking Company, Clinton, N.C., authorizing the transportation, over irregular routes, of lumber and logs, from points in Caswell County, N.C., to points in Virginia; lumber, brick, lime, cement, and roofing materials, from Danville, Va., to points in North Carolina within 100 miles of Danville; machinery, from points in Virginia to points in Caswell County, N.C.; lumber and millwork, from points in Caswell and Person Counties, N.C., to points in West Virginia on and east of U.S. Highway 219, and on and south of West Virginia Highway 28; from points in Person County, N.C., to points in Virginia; from Danville, Halifax, and South Boston, Va., and points in Person and Caswell Counties, N.C., to Baltimore and Frederick, Md., points in the District of Columbia, and those in Maryland within 15 miles of Washington, D.C., and Baltimore and Frederick, Md., respectively; from points in Pittsylvania, Henry, Halifax, and Roanoke Counties, Va., to Yanceyville, N.C.; fertilizer, from Richmond and Danville, Va., to points in Caswell, Rockingham, Orange, Person, and Alamance Counties, N.C.; lumber from Apex, N.C., and points within 100 miles of Apex, to Washington, D.C., and specified points and/or areas in Maryland, Pennsylvania and Virginia; fertilizer and fertilizer materials, from Norfolk, Va., and points in Virginia within 25 miles of Norfolk to points in North Carolina on and east of U.S. Highway 29; lumber, except plywood and veneer, from points in Sampson, Duplin, and New Hanover Counties, N.C., points in Onslow County, N.C., within 100 miles of Apex, N.C., and points in Pender County, N.C., on and west of U.S. Highway 117 and within 100 miles of Apex, N.C., to points in New York, New Jersey, Connecticut, Delaware, points in Pennsylvania in a specified area; from Clinton, N.C., and points in North Carolina within 25 miles of Norfolk to points in Florida; and from points in Pennsylvania (except Philadelphia), and points in New York (except points in the New York, N.Y., commercial zone, as defined by the Commission), to points in North Carolina. J. Linwood Keith, Post Office Box 45, Sanford, N.C., representative for applicants.

[S.O. 947, Taylor's Car Distribution Order 25, Amdt. 1]

## SHORTAGE OF FREIGHT CARS

### Order to All Railroads

Upon further consideration of Taylor's Car Distribution Order No. 25 and good cause appearing therefor:

*It is ordered,* That:

Taylor's Car Distribution Order No. 25 be, and it is hereby, amended by substituting the following paragraph (c) for paragraph (c) thereof:

(c) Expiration date: This order shall expire at 11:59 p.m., January 31, 1965, unless otherwise modified, changed, suspended, or annulled.

*It is further ordered,* That this amendment shall become effective at 11:59 p.m., December 31, 1964, and that this order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and per diem agreement under the terms of that agreement, and by filing it with the Director, Office of the Federal Register.

Issued at Washington, D.C., December 24, 1964.

INTERSTATE COMMERCE COMMISSION,
[SEAL] CHARLES W. TAYLOR, *Agent.*

## SOUTHERN PACIFIC CO.

### Rerouting of Traffic

In the opinion of Charles W. Taylor, agent, the Southern Pacific Co., due to washouts and slides is unable to transport traffic routed over its line between Eugene, Oreg., and Dunsmuir, Calif.

*It is ordered,* That:

(a) Rerouting traffic: The Southern Pacific Co. being unable to transport traffic in accordance with shippers' routing because of washouts and slides on its line between Eugene, Oreg. and Dunsmuir, Calif., is hereby authorized to divert and reroute such traffic over any available route to expedite the movement regardless of the routing shown on the waybill. The billing covering all such cars rerouted shall carry a reference to this order as authority for the rerouting.

(b) Inasmuch as the diversion or rerouting of traffic by said Agent is deemed to be due to carrier's disability, the rates applicable to traffic diverted or rerouted by said agent shall be the rates which were applicable at the time of shipment on the shipments as originally routed.

(c) In executing the directions of the Commission and of such Agent provided for in this order, the common carriers involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the divisions of the rates of transportation applicable to said traffic; divisions shall be, during the time this order remains in force, those voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, said divisions shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(d) Effective date: This order shall become effective at 2:00 p.m., December 23, 1964.

(e) Expiration date: This order shall expire at 11:59 p.m., January 15, 1965, unless otherwise modified, changed suspended, or annulled.

*It is further ordered,* That this order shall be served upon the Association of American Railroads, Car Service Division, as Agent of all railroads subscribing to the car service and per diem agreement under the terms of that agreement and by filing it with the Director, Office of the Federal Register.

Issued at Washington, D.C., December 23, 1964.

## WESTERN PACIFIC RAILROAD CO.

### Rerouting of Traffic

In the opinion of Charles W. Taylor, agent, the Western Pacific Railroad Co., due to slides and washouts is unable to transport traffic routed over its lines between Oroville and Keddie, Calif.

*It is ordered,* That:

(a) Rerouting traffic: The Western Pacific Railroad Co. and its connections, being unable to transport traffic in accordance with shippers' routing because of slides and washouts on its line between Oroville and Keddie, Calif., is hereby authorized to divert or reroute such traffic over any available route to expedite the movement, regardless of the routing shown on the waybill. The billing covering all such cars rerouted shall carry a reference to this order as authority for the rerouting.

(b) Concurrence of receiving roads to be obtained: The railroad desiring to divert or reroute traffic under this order shall confer with the proper transportation officer of the railroad or railroads to which such traffic is to be diverted or rerouted, and shall receive the concurrence of such other railroads before the rerouting or diversion is ordered.

(c) Inasmuch as the diversion or rerouting of traffic by said Agent is deemed to be due to carrier's disability, the rates applicable to traffic diverted or rerouted by said Agent shall be the rates which were applicable at the time of shipment on the shipments as originally routed.

(d) In executing the directions of the Commission and of such Agent provided for in this order, the common carrier involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the divisions of the rates of transportation applicable to such traffic; divisions shall be, during the time this order remains in force, those voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, said divisions shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(e) Effective date: This order shall become effective at 9:00 a.m., December 24, 1964.

(f) Expiration date: This order shall expire at 11:59 p.m., January 15, 1965, unless otherwise modified, changed, suspended, or annulled.

*It is further ordered,* That this order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and per diem agreement under the terms of that agreement and by filing it with the Director, Division of the Federal Register.

Issued at Washington, D.C., December 24, 1964.

## SPOKANE, PORTLAND AND SEATTLE RAILWAY SYSTEM

### Rerouting of Traffic

In the opinion of Charles W. Taylor, agent, the Spokane, Portland and Seattle Railway System, due to floods and washouts is unable to transport traffic routed over its lines.

*It is ordered,* That:

(a) Rerouting traffic: The Spokane, Portland and Seattle Railway System and its connections, being unable to transport traffic in accordance with shippers' routing because of floods and washouts on its lines, is hereby authorized to divert or reroute such traffic over any available route to expedite the movement, regardless of the routing shown on the waybill. The billing covering all such cars rerouted shall carry a reference to this order as authority for the rerouting.

(b) Concurrence of receiving roads to be obtained: The railroad desiring to divert or reroute traffic under this order shall confer with the proper transportation officer of the railroad or railroads to which such traffic is to be diverted or rerouted, and shall receive the concurrence of such other railroads before the rerouting or diversion is ordered.

(c) Inasmuch as the diversion or rerouting of traffic by said Agent is deemed to be due to carrier's disability, the rates applicable to traffic diverted or rerouted by said Agent shall be the rates which were applicable at the time of shipment on the shipments as originally routed.

(d) In executing the directions of the Commission and of such Agent provided for in this order, the common carrier involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the divisions of the rates of transportation applicable to such traffic; divisions shall be, during the time this order remains in force, those voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, said divisions shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(e) Effective date: This order shall become effective at 1:00 p.m., December 24, 1964.

(f) Expiration date: This order shall expire at 11:59 p.m., January 15, 1965, unless otherwise modified, changed, suspended, or annulled.

*It is further ordered,* That this order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and per diem agreement under the terms of that agreement and by filing it with the Director, Division of the Federal Register.

Issued at Washington, D.C., December 24, 1964.

## Chapter I—Atomic Energy Commission

## PART 4—NONDISCRIMINATION IN FEDERALLY ASSISTED COMMISSION PROGRAMS OF THE ATOMIC ENERGY COMMISSION

### Effectuation of Title VI of the Civil Rights Act of 1964

The Atomic Energy Commission hereby amends its regulations by adding the following new Part 4, "Nondiscrimination in Federally Assisted Commission Programs".

Pursuant to the Civil Rights Act of 1964 and the Administrative Procedure Act of 1946, the following new Part 4 of Title 10, Chapter I, Code of Federal Regulations, is published as a document subject to codification to be effective on the thirtieth day following its publication in the FEDERAL REGISTER.

GENERAL PROVISIONS

Sec.
4.1 Purpose.
4.2 Application of this part.
4.3 Definitions.
4.4 Communications and reports.

DISCRIMINATION PROHIBITED

4.11 General prohibition.
4.12 Specific discriminatory actions prohibited.
4.13 Employment practices.
4.14 Medical emergencies.

ASSURANCES REQUIRED

4.21 General requirements.
4.22 Continuing State programs.
4.23 Elementary and secondary schools.
4.24 Assurances from institutions.
4.25 Illustrative applications.

COMPLIANCE INFORMATION

4.31 Cooperation and assistance.
4.32 Compliance reports.
4.33 Access to sources of information.
4.34 Information to beneficiaries and participants.

CONDUCT OF INVESTIGATIONS

4.41 Periodic compliance reviews.
4.42 Complaints.
4.43 Investigations.
4.44 Resolution of matters.
4.45 Intimidatory or retaliatory acts prohibited.

MEANS OF EFFECTING COMPLIANCE

4.46 Means available.
4.47 Noncompliance with § 4.21.
4.48 Termination of or refusal to grant or to continue Federal financial assistance.
4.49 Other means authorized by law.

OPPORTUNITY FOR HEARING

4.51 Notice of opportunity for hearing.

HEARINGS AND FINDINGS

4.61 Presiding officer.
4.62 Right to counsel.
4.63 Procedures, evidence, and record.
4.64 Consolidated or joint hearings.

DECISIONS AND NOTICES

4.71 Initial decision or certification.
4.72 Exceptions and final decision.
4.73 Rulings required.
4.74 Content of orders.

JUDICAL REVIEW

Sec.
4.81 Judicial review.

EFFECT ON OTHER REGULATIONS; FORMS AND INSTRUCTIONS

4.91 Effect on other regulations.
4.92 Forms and instructions.
4.93 Supervision and coordination.

AUTHORITY: The provisions of this Part 4 issued under sec. 602, 78 Stat. 252. Interpret or apply Atomic Energy Act of 1954 as amended, 68 Stat. 919; 424, S.C. 2011.

GENERAL PROVISIONS

### § 4.1 Purpose.

The purpose of this part is to effectuate the provisions of Title VI of the Civil Rights Act of 1964 (hereafter referred to as the "Act") to the end that no person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity receiving Federal financial assistance from AEC.

### § 4.2 Application of this part.

(a) This part applies to any program for which Federal financial assistance is authorized under a law administered by AEC. The programs to which this part applies are listed in Appendix A of this part; Appendix A may be revised from time to time by notice published in the FEDERAL REGISTER. This part applies to money paid, property transferred, or other Federal financial assistance extended under any such program after the effective date of this part pursuant to an application approved prior to such effective date, and to any such assistance extended at any time pursuant to a grant, loan, or contract by AEC, the terms of which require compliance with this part, or pursuant to an AEC-authorized grant, loan, or contract by a contractor or subcontractor of AEC, the terms of which require compliance with this part.

(b) This part does not apply to (1) any Federal financial assistance by way of insurance or guaranty contracts, (2) money paid, property transferred, or other assistance extended under any such program before the effective date of this part, except as provided in paragraph (a) of this section, (3) any assistance to any individual who is the ultimate beneficiary under any such program, or (4) any employment practice, under any such program, of any employer, employment agency, or labor organization, except as provided in § 4.13.

### § 4.3 Definitions.

(a) "Applicant" means one who submits an application, request, or plan required to be approved by AEC, or by a primary recipient, as a condition to eligibility for Federal financial assistance; "application" means such an application, request, or plan.

(b) "Commission" means the Commission of five members or a quorum thereof sitting as a body; "AEC" means the Atomic Energy Commission and its duly authorized representatives.

(c) "Facility" includes all or any portion of structures, equipment, or other real or personal property or interests therein, and the provision of facilities includes the construction, expansion, renovation, remodeling, alteration or acquisition of facilities.

(d) "Federal financial assistance" includes (1) grants and loans of Federal funds, (2) the grant or donation of Federal property and interests in property, (3) the detail of Federal personnel or of other personnel at Federal expense, (4) the sale and lease of, and the permission to use (on other than a casual or transient basis), Federal property or any interest in such property without consideration or at a nominal consideration, or at a consideration which is reduced for the purpose of assisting the recipient, or in recognition of the public interest to be served by such sale or lease to the recipient, and (5) any Federal agreement, arrangement, or other contract which has as one of its purposes the provision of assistance.

(e) "Hearing examiner" means an individual appointed pursuant to section 11 of the Administrative Procedure Act to conduct proceedings subject to this part.

(f) "Primary recipient" means any recipient which is authorized or required to extend Federal financial assistance to another recipient for the purpose of carrying out a program.

(g) "Program" includes any program, project, or activity designated in Appendix A of this part for the provision of services, financial aid, or other benefits to individuals (including education or training) whether provided through employees of the recipient or provided by others through contracts or other arrangements with the recipient, and including work opportunities and cash or loan or other assistance to individuals, or for the provision of facilities for furnishing services, financial aid or other benefits to individuals. The services, financial aid, or other benefits provided under a program receiving Federal financial assistance shall be deemed to include any services, financial aid, or other benefits provided with the aid of Federal financial assistance or with the aid of any non-Federal funds, property, or other resources required to be expended or made available for the program to meet matching requirements or other conditions which must be met in order to receive the Federal financial assistance, and to include any services, financial aid, or other benefits provided in or through a facility provided with the aid of Federal financial assistance or such non-Federal resources.

(h) "Recipient" means any State, political subdivision of any State, or instrumentality of any State or political subdivision, any public or private agency, institution, or organization, or other entity, or any individual, in any State, to whom Federal financial assistance is extended, directly or through another recipient, for any program, including any successor, assignee, or transferee thereof, but such term does not include any ultimate beneficiary under any such program.

(i) "Responsible AEC official" means:

(1) The General Manager or any officer to whom he has delegated authority to act; or

(2) The Director of Regulation or any officer to whom he has delegated authority to act;

within their respective areas of responsibility assigned by the Commission.

(j) "United States" means the States of the United States, the District of Columbia, Puerto Rico, the Virgin Islands, American Samoa, Guam, Wake Island, the Canal Zone, and the territories and possessions of the United States, and the term "State" means any one of the foregoing.

**§ 4.4 Communications and reports.**

Except where otherwise indicated, all communications and reports relating to this part shall be addressed to the United States Atomic Energy Commission, Washington, D.C., 20545. Communications and reports may be delivered in person to the Commission's offices at 1717 H Street NW., Washington, D.C., or its offices at Germantown, Md.

DISCRIMINATION PROHIBITED

**§ 4.11 General prohibition.**

No person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program to which this part applies.

**§ 4.12 Specific discriminatory actions prohibited.**

(a) A recipient under any program to which this part applies may not, directly or through contractual or other arrangements, on the ground of race, color, or national origin:

(1) Deny an individual any service, financial aid, or other benefit provided under the program;

(2) Provide any service, financial aid, or other benefit to an individual which is different, or is provided in a different manner, from that provided to others under the program;

(3) Subject an individual to segregation or separate treatment in any matter related to his receipt of any service, financial aid, or other benefit under the program;

(4) Restrict an individual in any way in the enjoyment of any advantage or privilege enjoyed by others receiving any service, financial aid, or other benefit under the program;

(5) Treat an individual differently from others in determining whether he satisfies any admission, enrollment, quota, eligibility, membership or other requirement or condition which individuals must meet in order to be provided any service, financial aid, or other benefit provided under the program;

(6) Deny an individual an opportunity to participate in the program through the provision of services or otherwise or afford him an opportunity to do so which is different from that afforded others under the program (including the opportunity to participate in the program as an employee but only to the extent set forth in § 4.13).

(b) A recipient in determining the types of services, financial aid, or other benefits, or facilities which will be provided under any such program, or the class of individuals to whom, or the situations in which, such services, financial aid, other benefits, or facilities will be provided under any such program, or the class of individuals to be afforded an opportunity to participate in any such program, may not, directly or through contractual or other arrangements, utilize criteria or methods of administration which have the effect of subjecting individuals to discrimination because of their race, color, or national origin, or have the effect of defeating or substantially impairing accomplishment of the objectives of the program as respects individuals of a particular race, color, or national origin.

(c) As used in this section the services, financial aid, or other benefits provided under a program receiving Federal financial assistance shall be deemed to include any services, financial aid, or other benefit provided in or through a facility provided with the aid of Federal financial assistance.

(d) The enumeration of specific forms of prohibited discrimination in this section and § 4.13 does not limit the generality of the prohibition in § 4.11.

**§ 4.13 Employment practices.**

Where a primary objective of the Federal financial assistance to a program to which this part applies is to provide employment, a recipient may not, directly or through contractual or other arrangements, subject an individual to discrimination on the ground of race, color, or national origin in its employment practices under such program (including recruitment or recruitment advertising, employment, lay-off or termination, up-grading, demotion, or transfer, rates of pay or other forms of compensation, and use of facilities), including programs where a primary objective of the Federal financial assistance is (a) to assist such individuals through employment to meet expenses incident to the commencement or continuation of their education or training, or (b) to provide work experience which contributes to the education or training of such individuals. (Examples of such programs are nuclear training equipment grants, grants and loans of materials for training, and fellowship programs.) The requirements applicable to construction employment under any such program shall be those specified in and pursuant to Executive Order 11114.

**§ 4.14 Medical emergencies.**

A recipient shall not be deemed to have failed to comply with § 4.11 if immediate provision of a service or other benefit to an individual is necessary to prevent his death or serious impairment of his health, and such service or other benefit cannot be provided except by or through a medical institution which refuses or fails to comply with § 4.11.

ASSURANCES REQUIRED

**§ 4.21 General requirements.**

(a) Every grant, loan or contract under a program to which this part applies, except a program to which § 4.22 applies, shall, as a condition to its approval by AEC, or by the appropriate AEC contractor or subcontractor, and the extension of any Federal financial assistance pursuant thereto, contain or be accompanied by an assurance that the program will be conducted in compliance with all requirements imposed by or pursuant to this part. In the case of a grant, loan or contract involving Federal financial assistance to provide real property or structures thereon, the assurance shall obligate the recipient, or, in the case of a subsequent transfer, the transferee, for the period during which the real property or structures are used for a purpose for which the Federal financial assistance is extended, or for another purpose involving the provision of similar services or benefits. In the case of personal property the assurance shall obligate the recipient for the period during which he retains ownership or possession of the property. In all other cases the assurance shall obligate the recipient for the period during which Federal financial assistance is extended pursuant to the grant, loan or contract. The Commission will specify the form of the foregoing assurances for each program and the extent to which like assurances will be required of subgrantees, contractors and subcontractors, successors in interest, and other participants in the program. Any such assurance shall include provisions which give the United States a right to seek its judicial enforcement.

(b) The assurance required in the case of a transfer of real property, except where covered by paragraph (c) of this section, shall be inserted in the instrument effecting the transfer of any such land, together with any improvements located thereon, and shall consist of (1) a condition coupled with a right to be reserved to AEC to revert title to the property in the event of breach of such nondiscrimination condition during the period during which the real property is used for a purpose for which the Federal financial assistance is extended or for another purpose involving the provision of similar services or benefits, and (2) a covenant running with the land for the same period. In the event a transferee of real property proposes to mortgage or otherwise encumber the real property as security for financing construction of new, or improvement of existing, facilities on such property for the purposes for which the property was transferred, the Commission may agree, upon request of the transferee and if necessary to accomplish such financing, and upon such conditions as he deems appropriate, to forbear the exercise of such right to revert title for so long as the lien of such mortgage or other encumbrance remains effective.

(c) Transfers of surplus property are subject to regulations issued by the Administrator of General Services (41 CFR 101–6.2).

**§ 4.22 Continuing State programs.**

Every grant, loan or contract to or with a State or a State agency to carry out a program involving continuing Federal financial assistance to which this part applies, shall, as a condition to its approval and the extension of any Federal financial assistance pursuant to the grant, loan or contract,

(a) Contain or be accompanied by a statement that the program is (or, in the case of a new program, will be) conducted in compliance with all requirements imposed by or pursuant to this part, or a statement of the extent to which it is not, at the time the statement is made, so conducted, and

(b) Provide or be accompanied by provision for such methods of administration for the program as are found by the responsible AEC official to give reasonable assurance that the recipient and all other recipients of Federal financial assistance under such program will comply with all requirements imposed by or pursuant to this part, including methods of administration which give reasonable assurance that any noncompliance indicated in the statement provided for in paragraph (a) of this section will be corrected.

**§ 4.23 Elementary and secondary schools.**

The requirements of §§ 4.21 and 4.22 with respect to any elementary or secondary school or school system shall be deemed to be satisfied if such school or school system,

(a) Is subject to a final order of a court of the United States for the desegregation of such school or school system, and provides an assurance that it will comply with such order, including any future modification of such order, or

(b) Submits a plan for the desegregation of such school or school system which the Commissioner of Education determines is adequate to accomplish the purposes of the Act and this part, and provides reasonable assurance that it will carry out such plan. In any case of continuing Federal financial assistance the Commissioner may reserve the right to redetermine, after such period as may be specified by him, the adequacy of the plan to accomplish the purpose of the Act and this part. In any case in which a final order of a court of the United States for the desegregation of such school or school system is entered after submission of such plan, such plan shall be revised to conform to such final order, including any future modification of such order.

**§ 4.24 Assurances from institutions.**

(a) In the case of a grant, loan or contract involving Federal financial assistance to an institution of higher education, the assurance required by § 4.21 shall extend to admission practices and to all other practices relating to the treatment of students.

(b) The assurance required with respect to an institution of higher education, hospital, or any other institution, insofar as the assurance relates to the institution's practices with respect to admission or other treatment of individuals as students, patients, or clients of the institution or to the opportunity to participate in the provision of services or other benefits to such individuals, shall be applicable to the entire institution unless the institution establishes, to the satisfaction of the responsible AEC official, that the institution's practices in designated parts or programs of the institution will in no way affect its practices in the program of the institution for which Federal financial assistance is sought, or the beneficiaries of or participants in such program. If in any such case the assistance sought is for the construction of a facility or part of a facility, the assurance shall in any event extend to the entire facility and to facilities operated in connection therewith.

**§ 4.25 Illustrative applications.**

The following examples will illustrate the application of the foregoing provisions to some of the major AEC programs designated in Appendix A. (In all cases the discrimination prohibited is discrimination on the ground of race, color, or national origin prohibited by Title VI of the Act and this part, as a condition of the receipt of Federal financial assistance.)

(a) In a grant, loan or contract for education or training by a university in a graduate school, discrimination in the admission and treatment of students in the graduate school is prohibited, and the prohibition extends to the entire university unless it satisfies the responsible AEC official that practices with respect to other parts or programs of the university will not interfere, directly or indirectly, with fulfillment of the assurance required with respect to the graduate school.

(b) In an education or training grant to a hospital or other nonacademic institution, discrimination is prohibited in the selection of individuals to be educated or trained and in their treatment by the grantee during their education or training. In an equipment grant pertaining to research or demonstration by such an institution, discrimination is prohibited with respect to any educational activity and any provision of medical or other services and any financial aid to individuals incident to the program.

(c) In a program to assist in the construction or equipping of facilities for the performance of research, assurances will be required that the benefits derived and to be derived therefrom will be provided without discrimination, to the same extent that discrimination would be prohibited as a condition of Federal operating grants for the support of such benefits. Thus, as a condition of grants for the construction or equipping of academic, research, or other facilities at institutions of higher education, assurances will be required that there will be no discrimination in the admission or treatment of students. In the case of equipment grants to hospitals, the assurance will apply to patients, to interns, residents, student nurses, and other trainees, and to the privilege of physicians, dentists, and other professionally qualified persons to practice in the hospital, and will apply to the entire facility for which, or for a part of which, the grant is made, and to facilities operated in connection therewith.

COMPLIANCE INFORMATION

**§ 4.31 Cooperation and assistance.**

The responsible AEC official shall to the fullest extent practicable seek the cooperation of recipients in obtaining compliance with this part and shall provide assistance and guidance to recipients to help them comply voluntarily with this part.

**§ 4.32 Compliance reports.**

Each recipient shall keep such records and submit to the responsible AEC official timely, complete and accurate compliance reports at such times, and in such form and containing such information, as the responsible AEC official may determine to be necessary to enable him to ascertain whether the recipient has complied or is complying with this part. In the case of any program under which a primary recipient extends Federal financial assistance to any other recipient, such other recipient shall also submit such compliance reports to the primary recipient as may be necessary to enable the primary recipient to carry out its obligations under this part.

**§ 4.33 Access to sources of information.**

Each recipient shall permit access by the responsible AEC official during normal business hours to such of its books, records, accounts, and other sources of information, and its facilities as may be pertinent to ascertain compliance with this part. Where any information required of a recipient is in the exclusive possession of any other agency, institution or person and that agency, institution or person shall fail or refuse to furnish this information, the recipient shall so certify in its report and shall set forth what efforts it has made to obtain the information.

**§ 4.34 Information to beneficiaries and participants.**

Each recipient shall make available to participants, beneficiaries, and other interested persons such information regarding the provisions of this part and its applicability to the program under which the recipient receives Federal financial assistance, and make such information available to them in such manner, as the responsible AEC official finds necessary to apprise such persons of the protections against discrimination assured them by the Act and this part.

CONDUCT OF INVESTIGATIONS

**§ 4.41 Periodic compliance reviews.**

The responsible AEC official shall from time to time review the practices of recipients to determine whether they are complying with this part.

**§ 4.42 Complaints.**

Any person who believes himself or any specific class of individuals to be subjected to discrimination prohibited by this part may by himself or by a

representative file with the responsible AEC official a written complaint. A complaint must be filed not later than ninety (90) days from the date of the alleged discrimination, unless the time for filing is extended by the responsible AEC official. A complaint shall be signed by the complainant or his representative.

**§ 4.43 Investigations.**

The responsible AEC official will make a prompt investigation whenever a compliance review, report, complaint, or any other information indicates a possible failure to comply with this part. The investigation should include, where appropriate, a review of the pertinent practices and policies of the recipient, the circumstances under which the possible noncompliance with this part occurred, and other factors relevant to a determination as to whether the recipient has failed to comply with this part.

**§ 4.44 Resolution of matters.**

(a) If an investigation pursuant to § 4.43 indicates a failure to comply with this part, the responsible AEC official will so inform the recipient and the matter will be resolved by voluntary means whenever possible. If it has been determined that the matter cannot be resolved by voluntary means, action will be taken as provided for in §§ 4.46–4.49.

(b) If an investigation does not warrant action pursuant to paragraph (a) of this section, the responsible AEC official will so inform the recipient and the complainant, if any, in writing.

**§ 4.45 Intimidatory or retaliatory acts prohibited.**

No recipient or other person shall intimidate, threaten, coerce, or discriminate against any individual for the purpose of interfering with any right or privilege secured by section 601 of the Act or this part, or because he has made a complaint, testified, assisted, or participated in any manner in an investigation, proceeding, or hearing under this part. The identity of complainants shall be kept confidential, except to the extent necessary to carry out the purposes of this part including the conduct of any investigation, hearing, or judicial proceeding arising thereunder.

MEANS OF EFFECTING COMPLIANCE

**§ 4.46 Means available.**

If there appears to be a failure or threatened failure to comply with any of the provisions of this part, and if the noncompliance or threatened noncompliance cannot be corrected by informal means, compliance with this part may be effected by the suspension or termination of or refusal to grant or to continue Federal financial assistance or by any other means authorized by law. Such other means may include, but are not limited to, (a) a reference to the Department of Justice with a recommendation that appropriate proceedings be brought to enforce any rights of the United States under any law of the United States (including other titles of the Act), or any assurance or other contractual undertaking, and (b) any applicable proceeding under State or local law.

**§ 4.47 Noncompliance with § 4.21.**

If an applicant fails or refuses to furnish an assurance required under § 4.21 or otherwise fails or refuses to comply with a requirement imposed by or pursuant to that section, Federal financial assistance may be refused in accordance with the procedures of § 4.48. The AEC shall not be required to provide assistance in such a case during the pendency of the administrative proceedings under § 4.48, except that the AEC shall continue assistance during the pendency of such proceedings where such assistance is due and payable pursuant to a grant, loan, or contract therefor approved prior to the effective date of this part.

**§ 4.48 Termination of or refusal to grant or to continue Federal financial assistance.**

No order suspending, terminating, or refusing to grant or continue Federal financial assistance shall become effective until (a) the responsible AEC official has advised the applicant or recipient of his failure to comply and has determined that compliance cannot be secured by voluntary means, (b) there has been an express finding on the record, after opportunity for hearing, of a failure by the applicant or recipient to comply with the requirement imposed by or pursuant to this part, (c) the action has been approved by the Commission pursuant to § 4.72, and (d) the expiration of thirty (30) days after the Commission has filed with the committee of the House and the committee of the Senate having legislative jurisdiction over the program involved, a full written report of the circumstances and the grounds for such action. Any action to suspend or terminate or to refuse to grant or to continue Federal financial assistance shall be limited to the particular political entity, or part thereof, or other applicant or recipient as to whom such finding has been made and shall be limited in its effect to the particular program, or part thereof, in which such noncompliance has been so found.

**§ 4.49 Other means authorized by law.**

No action to effect compliance by any other means authorized by law shall be taken until (a) the responsible AEC official has determined that compliance cannot be secured by voluntary means, (b) the action has been approved by the Commission, (c) the recipient or other person has been notified of its failure to comply and of the action to be taken to effect compliance, and (d) the expiration of at least ten (10) days from the mailing of such notice to the recipient or other person. During this period of at least ten (10) days, additional efforts shall be made to persuade the recipient or other person to comply with this part and to take such corrective action as may be appropriate.

OPPORTUNITY FOR HEARING

**§ 4.51 Notice of opportunity for hearing.**

(a) Whenever an opportunity for hearing is required by § 4.48, the responsible AEC official shall serve on the applicant or recipient, by registered or certified mail, return receipt requested, a notice of opportunity for hearing which will:

(1) Inform the applicant or recipient of his right within twenty (20) days of the date of the notice of opportunity for hearing, or such other period as may be specified in the notice, to request a hearing;

(2) Set forth the alleged item or items of noncompliance with this part;

(3) Specify the issues;

(4) State that compliance with this part may be effected by an order providing for the termination of or refusal to grant or to continue assistance, as appropriate, under the program involved; and

(5) Provide that the applicant or recipient may file a written answer to the notice of opportunity for hearing under oath or affirmation within twenty (20) days of its date, or such other period as may be specified in the notice.

(b) The applicant or recipient may respond to a notice of opportunity for hearing by filing a written answer under oath or affirmation. The answer shall specifically admit or deny each allegation, or, where the applicant or recipient does not have knowledge or information sufficient to form a belief, the answer may so state and the statements shall have the effect of a denial. Allegations of fact not denied shall be deemed to be admitted. The answer shall separately state and identify matters alleged as affirmative defenses and may also set forth the matters of fact and law on which the applicant or recipient relies. The answer may request a hearing.

(c) If the answer requests a hearing, the Commission will issue a notice of hearing specifying:

(1) The time, place, and nature thereof;

(2) The legal authority and jurisdiction under which the hearing is to be held; and

(3) The matters of fact and law asserted or to be considered. The time and place of hearing will be fixed with due regard for the convenience and necessity of the parties or their representatives and for the public interest. An answer to a notice of hearing is not required.

(d) An applicant or recipient may waive a hearing and submit written information or argument for the record, without waiving the requirement for findings of fact and conclusions of law or the right to seek Commission review in accordance with the provisions of §§ 4.71–4.74.

(e) An answer or stipulation may consent to the entry of an order in substantially the form set forth in the notice of opportunity for hearing; such order may be entered by the responsible Commission official. The consent of the applicant or recipient to the entry of an order shall constitute a waiver by him of a right to (1) a hearing under section 602 of the Act and § 4.48, (2) findings of fact and conclusions of law, and (3) seek Commission review.

(f) The failure of the applicant or recipient to request a hearing and file an answer within the period prescribed, or, having requested a hearing, his failure to appear therefor, shall constitute a waiver by him of a right to (1) a hearing under section 602 of the Act and § 4.48, (2) conclusions of law, and (3) seek Commission review. In the event of such waiver, the responsible Commission official may find the facts on the basis of the record available and enter an order in substantially the form set forth in the notice of opportunity for hearing.

(g) An order entered in accordance with paragraph (e) or (f) of this section shall constitute the final decision of the Commission, unless the Commission, on its own motion, within forty-five (45) days after entry of the order, issues its own decision, which shall then constitute the final decision of the Commission.

(h) A copy of an order entered by the responsible AEC official shall be mailed to the applicant or recipient and to the complainant, if any.

(i) Nothing in this section shall be deemed to place the burden of proof on the applicant or recipient.

HEARINGS AND FINDINGS

**§ 4.61 Presiding officer.**

One or more members of the Commission or one or more hearing examiners appointed pursuant to section 11 of the Administrative Procedure Act shall (a) preside at a hearing, and (b) make findings of fact and conclusions of law if an applicant or recipient waives a hearing and submits written information or argument for the record in accordance with § 4.51(d).

**§ 4.62 Right to counsel.**

In all proceedings under §§ 4.51–4.81, the applicant or recipient and the responsible AEC official shall have the right to be represented by counsel. A notice of appearance shall be filed by counsel prior to participation in any such proceedings.

**§ 4.63 Procedures, evidence, and record.**

(a) The hearing, decision, and any administrative review thereof shall be conducted in conformity with sections 5–8 of the Administrative Procedure Act, and in accordance with such procedures as are proper (and not inconsistent with §§ 4.61–4.64) relating to the conduct of the hearing, giving of notices subsequent to those provided for in § 4.51, taking of testimony, exhibits, arguments and briefs, requests for findings, and other related matters. Both the responsible AEC official and the applicant or recipient shall be entitled to introduce all relevant evidence on the issues as stated in the notice of hearing or as determined by the presiding officer at the outset of or during the hearing.

(b) Technical rules of evidence shall not apply to hearings conducted pursuant to this part, but rules or principles designed to assure production of the most credible evidence available and to subject testimony to test by cross-examination shall be applied where reasonably necessary by the presiding officer. The presiding officer may exclude irrelevant, immaterial, or unduly repetitious evidence. All documents and other evidence offered or taken for the record shall be open to examination by the parties and opportunity shall be given to refute facts and arguments advanced on either side of the issues. A transcript shall be made of the oral evidence except to the extent the substance thereof is stipulated for the record.

(c) Each decision made after a hearing has been held shall be based on the hearing record, and written findings of fact and conclusions of law shall be made.

(d) If an applicant or recipient waives a hearing and submits written information or argument for the record in accordance with § 4.51(d), written findings of fact and conclusions of law shall be made.

**§ 4.64 Consolidated or joint hearings.**

In cases in which the same or related facts are asserted to constitute noncompliance with this part with respect to two or more programs to which this part applies or noncompliance with this part and the regulations of one or more other Federal departments or agencies issued under Title VI of the Act, the Commission may, by agreement with such other departments or agencies, where applicable, provide for the conduct of consolidated or joint hearings, and for the application to such hearings of rules of procedure not inconsistent with this part. Final decisions in such cases, insofar as programs subject to this part are concerned, shall be made in accordance with § 4.72.

DECISIONS AND NOTICES

**§ 4.71 Initial decision or certification.**

The officer designated

(a) To preside at a hearing, or,

(b) To make findings of fact and conclusions of law if an applicant or recipient waives a hearing and submits written information or argument for the record in accordance with § 4.51(d),

shall render an initial decision on the record, or, if the Commission so directs, shall certify the entire record to the Commission for decision, together with a recommended decision on the record. A copy of such initial decision, or of such certification and recommended decision, shall be mailed to the applicant or recipient.

**§ 4.72 Exceptions and final decision.**

(a) The applicant or recipient, within thirty (30) days of the mailing of an initial decision or a recommended decision, may file with the Commission his exceptions to such decision, with his reasons therefor.

(b) In the absence of exceptions to an initial decision, the Commission may, on its own motion within forty-five (45) days after the mailing of such initial decision, serve on the applicant or recipient a notice that the Commission will review the decision.

(c) Upon the filing of exceptions to an initial decision or of a notice of review, the Commission shall review such initial decision and issue its own decision on the record with its reasons therefor.

(d) In the absence of either exceptions to an initial decision or of a notice of review, such initial decision shall constitute the final decision of the Commission.

(e) Upon the filing of exceptions to a recommended decision, the Commission shall review such recommended decision and issue its own decision on the record with its reasons therefor.

(f) In the absence of exceptions to a recommended decision, the Commission shall review such recommended decision and issue its own decision on the record with its reasons therefor.

**§ 4.73 Rules requried.**

Each decision of a presiding officer or the Commission shall set forth the rulings on each finding, conclusion, or exception presented, and shall identify the requirement or requirements imposed by or pursuant to this part with which it is found that the applicant or recipient has failed to comply.

**§ 4.74 Content of orders.**

The final decision may provide for suspension or termination of, or refusal to grant or continue Federal financial assistance, in whole or in part, under the program involved, and may contain such terms, conditions, and other provisions as are consistent with and will effectuate the purposes of the Act and this part, including provisions designed to assure that no Federal financial assistance will thereafter be extended under such program to the applicant or recipient determined by such decision to be in default in its performance of an assurance given by it pursuant to this part, or to have otherwise failed to comply with this part, unless and until it corrects its noncompliance and satisfies the AEC that it will fully comply with this part. A copy of the final decision shall be mailed to the applicant or recipient and the complainant, if any.

JUDICIAL REVIEW

**§ 4.81 Judicial review.**

Action taken pursuant to section 602 of the Act is subject to judicial review as provided in section 603 of the Act.

EFFECT ON OTHER REGULATIONS; FORMS AND INSTRUCTIONS

**§ 4.91 Effect on other regulations.**

All regulations, orders, or like directions heretofore issued by any officer of the AEC which impose requirements designed to prohibit any discrimination against individuals on the ground of race, color, or national origin under any program to which this part applies, and which authorize the suspension or termination of or refusal to grant or to continue Federal financial assistance to any applicant for or recipient of such assistance under such program for failure to comply with such requirements, are hereby superseded to the extent that such discrimination is prohibited by this part, except that nothing in this part shall be deemed to relieve any person of any obligation assumed or imposed under any such superseded regulation, order, instruction, or like direction prior to the effective date of this part. Nothing in this part, however, shall be deemed to supersede any of the following (including future amendments thereof): (a)

Executive Orders 10925 and 11114 and regulations issued thereunder, or (b) Executive Order 11063 and regulations issued thereunder and any other regulations or instructions insofar as such Order, regulations or instructions prohibit discrimination on the ground of race, color, or national origin in any program or situation to which this part is inapplicable, or prohibit discrimination on any other ground.

**§ 4.92 Forms and instructions.**

The responsible AEC official shall issue and promptly make available to interested persons forms and detailed instructions and procedures for effectuating this part as applied to programs to which this part applies and for which he is responsible.

**§ 4.93 Supervision and coordination.**

The Commission may from time to time assign to officials of other departments or agencies of the Government, with the consent of the department or agency involved, responsibilities in connection with the effectuation of the purposes of Title VI of the Act and this part, other than responsibility for final decision as provided in § 4.72, including the achievement of effective coordination and maximum uniformity within the AEC and within the Executive Branch of the Government in the application of Title VI and this part to similar programs and in similar situations.

Dated: December 10, 1964.

GLENN T. SEABORG,
*Chairman,*
*Atomic Energy Commission.*

Approved: December 28, 1964.

LYNDON B. JOHNSON.

APPENDIX A—PROGRAMS TO WHICH THIS PART APPLIES [1]

(a) *Equipment grants for basic and applied research.* Equipment grants, relating to basic and applied research in nuclear fields, to nonprofit institutions of higher education and to nonprofit organizations whose primary purpose is the conduct of scientific research.

(b) *Nuclear training equipment grants.* Nuclear training equipment grants to colleges, universities, hospitals and eleemosynary or charitable institutions to help equip and modernize their scientific laboratories with respect to nuclear instrumentation and related equipment, with the objective of improving the conduct of educational and training activities in nuclear fields.

(c) *Grants of materials for training.* Grants of slides, manuals and other materials to educational institutions for training and educational programs in nuclear fields.

(d) *Special fellowships.* Fellowships programs, providing for AEC payment of tuition and fees to educational institutions as well as stipends and dependency allowances to the individual fellows, to encourage highly qualified individuals to prepare for careers in atomic energy and to assist education institutions in developing nuclear science capabilities, as follows:

(1) AEC special fellowships in nuclear science and engineering.

(2) AEC special fellowships in health physics.

(3) AEC special fellowships in advanced health physics.

(4) AEC special fellowships in industrial medicine.

(e) *Graduate fellowships.* AEC laboratory graduate fellowships to provide graduate students the opportunity to conduct their M.S. and Ph. D. thesis research at AEC-owned facilities, and with respect to which AEC pays tuition and fees to the sponsoring institution as well as stipends and dependency allowances to the students.

(f) *Loan of nuclear and other materials for education and training.* Loans of AEC materials, without full-cost recovery, to supplement the grant program of paragraph (b) of this section, providing AEC-owned materials, such as natural and enriched uranium, plutonium and heavy water, to educational institutions, on a loan basis, without charge for use; and loans of films, slides, manuals and other materials to educational institutions, without full-cost recovery.

(g) *Loan of isotopes.* Loans of certain isotopes, without full-cost recovery, to assist institutions conducting research and development in atomic energy fields.

(h) *Other grants, loans or services.* Other grants or loans of AEC materials or of other items of Government property, or provision of Government services or facilities, including security-clearances, without full-cost recovery.

(i) *Acquisition of nuclear reactor for research and training.* Research reactor assistance, without full-cost recovery, designed to aid nonprofit educational institutions having graduate level science and engineering programs to acquire nuclear reactors for research and training purposes, and providing the following principal forms of aid:

(1) Loan of enriched uranium; and

(2) Funds for fuel element fabrication and reprocessing.

(j) *Faculty institute programs.* Faculty institute programs, without full-cost recovery, designed to enable educational institutions, including secondary schools, to prepare faculty for teaching the latest developments in nuclear science and technology.

(k) *Power reactor demonstration.* AEC's power reactor demonstration program to encourage the development and demonstration of power reactors for civilian purposes, providing for waiver of use charges with respect to AEC-owned materials, or research and development, design or other types of assistance, without full-cost recovery.

(l) *Conferences on regulatory programs.* Agreements for financial assistance to State officials, without full-cost recovery, for visits to AEC facilities and offices or to other locations to confer on regulatory programs and related matters.

(m) *Orientation and instruction.* Agreements for assistance to State and local officials, without full-cost recovery, to receive orientation and on-the-job instruction at AEC facilities and offices.

(n) *Courses in fundamentals of radiation.* Agreements for the conduct of courses for State and local employees, without full-cost recovery, in fundamentals of radiation and radiation protection.

(o) *Participation in meetings and conferences.* Agreements for participation, without full-cost recovery, in meetings, conferences, workshops, and symposia to assist scientific, professional or educational institutions or groups.

(p) *Faculty and student use of AEC facilities.* Agreements permitting university faculty and students, without full-cost recovery, to make use of AEC facilities not available on their own campuses.

(q) *AEC assistance provided through AEC cost-type contractors.* Agreements by AEC laboratories or other AEC cost-type contractors to provide assistance, at AEC expense and without full-cost recovery, in connection with AEC programs or activities, of the types designated in this section.

(r) *Payments in lieu of taxes.* Programs for assistance to States and localities in which AEC activities are carried on, and in which AEC has acquired property previously subject to State and local taxation, involving payments to State and local governments in lieu of property taxes.

(s) *Assistance to communities.* Agreements for assistance to States, counties and local entities under the Atomic Energy Community Act of 1955, as amended.

[F.R. Doc. 64-13516; Filed, Dec. 30, 1964; 8:51 a.m.]

[1] Programs may be added to Appendix A from time to time by notice published in the FEDERAL REGISTER. This part shall be deemed to apply to all grants, loans or contracts entered into under any such program on or after the effective date of the inclusion of the program in Appendix A.

# Title 14—AERONAUTICS AND SPACE

## Chapter I—Federal Aviation Agency

[Docket No. 6388]

## PART 15—NONDISCRIMINATION IN FEDERALLY ASSISTED PROGRAMS OF THE FEDERAL AVIATION AGENCY—EFFECTUATION OF TITLE VI OF THE CIVIL RIGHTS ACT OF 1964

The purpose of this amendment adding Part 15 to the Federal Aviation Regulations is to implement section 601 of the Civil Rights Act of 1964 (P.L. 88-352).

Section 601 of the Civil Rights Act of 1964 forbids discrimination on the ground of race, color, or national origin under any program or activity that receives Federal financial assistance. Section 602 of the Civil Rights Act of 1964 authorizes and directs each Federal department or agency that is empowered to assist any program or activity to issue regulations implementing section 601. Accordingly, the Federal Aviation Agency is adopting a new Part 15 to accomplish this legislative directive.

In consideration of the foregoing, Chapter I of Title 14 of the Code of Federal Regulations is amended by adding a new Part 15, as hereinafter set forth, effective 30 days after publication in the FEDERAL REGISTER.

Sec.
15.1 Purpose.
15.3 Applicability.
15.5 Discrimination prohibited.
15.7 Assurances required.
15.9 Compliance information.
15.11 Conduct of investigations.
15.13 Procedure for effecting compliance.
15.15 Hearings.
15.17 Decisions and notices.
15.19 Judicial review.
15.21 Effect on other regulations; forms and instructions.
15.23 Definitions.

AUTHORITY: The provisions of this Part 15 issued under sec. 602, Civil Rights Act of 1964 (42 U.S.C. 501), and the laws referred to in Appendix A.

**§ 15.1 Purpose.**

The purpose of this part is to effectuate the provisions of Title VI of the Civil Rights Act of 1964 (in this part referred to as the "Act") to the end that no person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity receiving Federal financial assistance from the Federal Aviation Agency.

**§ 15.3 Applicability.**

(a) This part applies to any program for which Federal financial assistance is authorized under a law administered by the FAA including the Federally-assisted programs and activities listed in Appendix A of this part. It applies to money paid, property transferred, or other Federal financial assistance extended under any such program after the effective date of this part pursuant to an application approved before that date.

(b) This part does not apply to:

(1) Any Federal financial assistance by way of insurance or guaranty contracts;

(2) Money paid, property transferred, or other assistance extended under any such program before the effective date of this part;

(3) Any assistance to any individual who is the ultimate beneficiary under any such program; or

(4) Any employment practice, under any such program, of any employer, employment agency, or labor organization.

(c) The fact that a program or activity is not listed in Appendix A does not mean, if Title VI of the Act is otherwise applicable, that the program is not covered. Other programs under statutes in force on the effective date of this part or enacted after that date may be added to this list by notice published in the FEDERAL REGISTER.

**§ 15.5 Discrimination prohibited.**

(a) *General.* No person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program to which this part applies.

(b) *Specific discriminatory actions prohibited.* (1) A recipient under any program to which this part applies may not, directly or through contractual or other arrangements, on ground of race, color, or national origin—

(i) Deny an individual any service, financial aid, or other benefit provided under the program;

(ii) Provide any service, financial aid, or other benefit to an individual that is different, or is provided in a different manner, from that provided to others under the program;

(iii) Subject an individual to segregation or separate treatment in any matter related to his receipt of any service, financial aid, or other benefit under the program;

(iv) Restrict an individual in any way in the enjoyment of any advantage or privilege enjoyed by others receiving any service, financial aid, or other benefit under the program;

(v) Treat an individual differently from others in determining whether he satisfies any admission, enrollment, quota, eligibility, membership or other requirement or condition that individuals must meet in order to be provided any service, financial aid, or other benefit provided under the program; or

(vi) Deny an individual an opportunity to participate in the program through the provision of services or otherwise or afford him an opportunity to do so that is different from that afforded others under the program.

(2) A recipient, in determining the types of services, financial aid, or other benefits, or facilities which will be provided under any such program, or the class of individuals to whom, or the situations in which, such services, financial aid, other benefits, or facilities will be provided under any such program, may not, directly or through contractual or other arrangements, utilize criteria or methods of administration which have the effect of subjecting individuals to discrimination because of their race, color, or national origin, or have the effect of defeating or substantially impairing accomplishment of the objectives of the program as respects individuals of a particular race, color, or national origin.

(3) As used in this section the services, financial aid, or other benefits provided under a program receiving Federal financial assistance are considered to include any service, financial aid, or other benefit provided in or through a facility provided with the aid of Federal financial assistance.

(4) The enumeration of specific forms of prohibited discrimination in this paragraph does not limit the generality of the prohibition in paragraph (a) of this section.

(c) *Examples.* The following examples illustrate the application of the non-discrimination provisions of Title VI of the Civil Rights Act and this part:

(1) The operator of an airport who is the recipient of Federal financial assistance must give assurance that an entrepreneur who rents space at the airport and there operates a restaurant will not in any manner discriminate between patrons for reasons of race, color, or national origin.

(2) The operator of an airport who is the recipient of Federal financial assistance is bound by the conditions and covenants in the conveyance that prohibit, among other things, discrimination for reason of color, race, or national origin in admission of the public to waiting rooms, sightseeing areas, sanitary facilities, and any other facilities under the control of the airport operator himself.

**§ 15.7 Assurances required.**

(a) *General.* (1) Every application for Federal financial assistance to carry out a program to which this part applies, and every application for Federal financial assistance to provide a facility, shall, as a condition to its approval and the extension of any Federal financial assistance pursuant to the application, contain or be accompanied by an assurance that the program will be conducted or the facility operated in compliance with all requirements imposed by or pursuant to this part. In the case of an application for Federal financial assistance to provide real property or structures thereon, the assurance shall obligate the recipient, or, in the case of a subsequent transfer, the transferee, for the period during which the real property or structures are used for a purpose for which the Federal financial assistance is extended or for another purpose involving the provision of similar services or benefits. Where a facility is comprised of real property for which application is made under a program and, in addition, other real property of the applicant, the assurance applies to the entire facility. In the case of personal property the assurance obligates

the recipient for the period during which he retains ownership or possession of the property. The Administrator specifies the form of the assurances for each program, and the extent to which like assurances will be required of subgrantees, contractors and subcontractors, transferees, successors in interest, and other participants in the program. Any such assurance shall include provisions which give the United States a right to seek its judicial enforcement.

(2) Transfers of surplus property are subject to regulations issued by the Administrator of General Services (41 CFR 101–6.2).

(b) *Pre-existing contracts—funds not disbursed.* In any case where a contract for Federal financial assistance, to carry out a program or activity to which this part applies, has been executed before the effective date of this part, and the funds have not been fully disbursed by the FAA, the Administrator requires an assurance similar to that provided in paragraph (a) of this section as a condition to the disbursement of further funds.

**§ 15.9 Compliance information.**

(a) *Cooperation and assistance.* To the fullest extent practicable the Administrator seeks the cooperation of recipients in obtaining compliance with this part and provides assistance and guidance to recipients to help them comply voluntarily with this part.

(b) *Compliance reports.* Each recipient shall keep such records and submit to the Administrator timely, complete, and accurate compliance reports at such times, and in such form and containing such information, as the Administrator may determine to be necessary to enable him to ascertain whether the recipient has complied or is complying with this part.

(c) *Access to sources of information.* Each recipient shall permit access by the Administrator during normal business hours to such of its books, records, accounts, and other sources of information, and its facilities as may be pertinent to ascertain compliance with this part. Where any information required of a recipient is in the exclusive possession of any other agency, institution, or person, and this agency, institution, or person fails or refuses to furnish this information, the recipient shall so certify in its report and shall set forth what efforts it has made to obtain the information.

(d) *Information to beneficiaries and participants.* Each recipient shall make available to participants, beneficiaries, and other interested persons such information regarding the provisions of this part and its applicability to the program under which the recipient receives Federal financial assistance, and make such information available to them in such manner, as the Administrator finds necessary to apprise such persons of the protections against discrimination assured them by the Act and this part.

**§ 15.11 Conduct of investigations.**

(a) *Periodic compliance reviews.* The Administrator shall from time to time review the practices of recipients to determine whether they are complying with this part.

(b) *Complaints.* Any person who believes himself or any specific class of individuals to be subjected to discrimination prohibited by this part may by himself or by a representative file with the Administrator a written complaint. A complaint must be filed not later than 90 days after the date of the alleged discrimination, unless the time for filing is extended by the Administrator.

(c) *Investigations.* The Administrator will make a prompt investigation whenever a compliance review, report, complaint, or any other information indicates a possible failure to comply with this part. The investigation should include, where appropriate, a review of the pertinent practices and policies of the recipient, the circumstances under which the possible noncompliance with this part occurred, and other factors relevant to a determination as to whether the recipient has failed to comply with this part.

(d) *Resolution of matters.* (1) If an investigation pursuant to paragraph (c) of this section indicates a failure to comply with this part, the Administrator will so inform the recipient and the matter will be resolved by informal means whenever possible. If it has been determined that the matter cannot be resolved by informal means, action will be taken as provided for in § 15.13.

(2) If an investigation does not warrant action pursuant to subparagraph (1) of this paragraph, the Administrator will so inform the recipient and the complainant, if any, in writing.

(e) *Intimidatory or retaliatory acts prohibited.* No recipient or other person may intimidate, threaten, coerce, or discriminate against any individual for the purpose of interfering with any right or privilege secured by section 601 of the Act or by this part, or because he has made a complaint, testified, assisted, or participated in any manner in an investigation, proceeding, or hearing under this part. The identity of complainants shall be kept confidential except to the extent necessary to carry out the purposes of this part, including the conduct of any investigation, hearing, or judicial proceeding arising thereunder.

**§ 15.13 Procedure for effecting compliance.**

(a) *General.* If there appears to be a failure or threatened failure to comply with this part, and if the noncompliance or threatened noncompliance cannot be corrected by informal means, compliance with this part may be effected by the suspension or termination of or refusal to grant or to continue Federal financial assistance or by any other means authorized by law. Such other means may include:

(1) A reference to the Department of Justice with a recommendation that appropriate proceedings be brought to enforce any rights of the United States under any law of the United States (including other titles of the Act), or any assurance or other contractual undertaking; and

(2) Any applicable proceeding under State or local law.

(b) *Noncompliance with § 15.7.* If an applicant fails or refuses to furnish an assurance required under § 15.7 or otherwise fails or refuses to comply with a requirement imposed by or pursuant to that section, Federal financial assistance may be refused in accordance with the procedures of paragraph (c) of this section. The FAA is not required to provide assistance in such a case during the pendency of the administrative proceedings under such paragraph except that the FAA shall continue assistance during the pendency of such proceedings where such assistance is due and payable pursuant to an application therefor approved prior to the effective date of this part.

(c) *Termination of or refusal to grant or continue Federal financial assistance.* No order suspending, terminating, or refusing to grant or continue Federal financial assistance may become effective until:

(1) The Administrator has advised the applicant or recipient of his failure to comply and has determined that compliance cannot be secured by voluntary means;

(2) There has been an express finding on the record, after opportunity for hearing, of a failure by the applicant or recipient to comply with a requirement imposed by or pursuant to this part;

(3) The action has been approved by the Administrator pursuant to § 15.17 (e); and

(4) The expiration of 30 days after the Administrator has filed with the committee of the House and the committee of the Senate having legislative jurisdiction over the program involved a full written report of the circumstances and the grounds for such action.

Any action to suspend or terminate or to refuse to grant or continue Federal financial assistance is limited to the particular political entity, or part thereof, or other applicant or recipient as to whom such a finding has been made and is limited in its effect to the particular program, or part thereof, in which such noncompliance has been so found.

(d) *Other means authorized by law.* No action to effect compliance by any other means authorized by law may be taken until:

(1) The Administrator has determined that compliance cannot be secured by voluntary means;

(2) The action has been approved by the Administrator;

(3) The recipient or other person has been notified of his failure to comply and of the action to be taken to effect compliance; and

(4) The expiration of at least 10 days after the mailing of such notice to the recipient or other person.

During this period of at least 10 days, additional efforts shall be made to persuade the recipient or other person to comply with the part and to take such corrective action as may be appropriate.

**§ 15.15 Hearings.**

(a) *Opportunity for hearing.* Whenever an opportunity for a hearing is required by § 15.13(c), reasonable notice shall be given by registered or certified mail, return receipt requested, to the affected applicant or recipient. This notice shall advise the applicant or recipient of the action proposed to be taken, the specific provision under which the proposed action against it is to be taken, and the matters of fact or law asserted as the basis for this action, and either:

(1) Fix a date not less than 20 days after the date of such notice within which the applicant or recipient may request of the Administrator that the matter be scheduled for hearing; or

(2) Advise the applicant or recipient that the matter in question has been set down for hearing at a stated place and time.

The time and place so fixed shall be reasonable and shall be subject to change for cause. The complainant, if any, shall be advised of the time and place of the hearing. An applicant or recipient may waive a hearing and submit written information and argument for the record. The failure of an applicant or recipient to request a hearing under this paragraph or to appear at a hearing for which a date has been set is considered to be a waiver of the right to a hearing under section 602 of the Act and § 15.13(c) of this part and consent to the making of a decision on the basis of such information as is available.

(b) *Time and place of hearing.* Hearings shall be held at the offices of the FAA in Washington, D.C., at a time fixed by the Administrator unless he determines that the convenience of the applicant or recipient or of the FAA requires that another place be selected. Hearings shall be held before the Administrator or, at his discretion, before a hearing examiner designated in accordance with section 11 of the Administrative Procedure Act.

(c) *Right to counsel.* In all proceedings under this section, the applicant or recipient and the FAA have the right to be represented by counsel.

(d) *Procedures, evidence, and record.* (1) The hearing, decision, and any administrative review thereof shall be conducted in conformity with sections 5 through 8 of the Administrative Procedure Act, and in accordance with such rules of procedure as are proper (and not inconsistent with this section) relating to the conduct of the hearing, giving of notices subsequent to those provided for in paragraph (a) of this section, taking of testimony, exhibits, arguments and briefs, requests for findings, and other related matters. Both the FAA and the applicant or recipient may introduce all relevant evidence on the issues as stated in the notice for hearing or as determined by the officer conducting the hearing at the outset of or during the hearing.

(2) Technical rules of evidence do not apply to hearings conducted pursuant to this part, but rules or principles designed to assure production of the most credible evidence available and to subject testimony to test by cross-examination shall be applied where reasonably necessary by the officer conducting the hearing. The hearing officer may exclude irrelevant, immaterial, or unduly repetitious evidence. All documents and other evidence offered or taken for the record are open to examination by the parties and opportunity shall be given to refute facts and arguments advanced on either side of the issues. A transcript shall be made of the oral evidence except to the extent the substance thereof is stipulated for the record. All decisions shall be based upon the hearing record and written findings shall be made.

(e) *Consolidated or Joint Hearings.* In cases in which the same or related facts are asserted to constitute noncompliance with this part with respect to two or more programs to which this part applies, or noncompliance with this part and the regulations of one or more other Federal departments or agencies issued under Title VI of the Act, the Administrator may, by agreement with such other departments or agencies where applicable, provide for the conduct of consolidated or joint hearings, and for the application to such hearings of rules of procedures not inconsistent with this part. Final decisions in such cases, insofar as this part is concerned, shall be made in accordance with § 15.17.

**§ 15.17 Decisions and notices.**

(a) *Decision by person other than the Administrator.* If the hearing is held by a hearing examiner the hearing examiner shall either make an initial decision, if so authorized, or certify the entire record including his recommended findings and proposed decision to the Administrator for a final decision, and a copy of such initial decision or certification shall be mailed to the applicant or recipient. Where the initial decision is made by the hearing examiner the applicant or recipient may within 30 days after the mailing of such notice of initial decision file with the Administrator his exceptions to the initial decision, with his reasons therefor. In the absence of exceptions, the Administrator may on his own motion within 45 days after the initial decision serve on the applicant or recipient a notice that he will review the decision. Upon the filing of such exceptions or of such notice of review the Administrator shall review the initial decision and issue his own decision thereon including the reasons therefor. In the absence of either exceptions or a notice of review the initial decision constitutes the final decision of the Administrator.

(b) *Decisions on record or review by the Administrator.* Whenever a record is certified to the Administrator for decision or he reviews the decision of a hearing examiner pursuant to paragraph (a) of this section, or whenever the Administrator conducts the hearing, the applicant or recipient shall be given reasonable opportunity to file with him briefs or other written statements of its contentions, and a copy of the final decision of the Administrator shall be given in writing to the applicant or recipient and to the complainant, if any.

(c) *Decisions on record where a hearing is waived.* Whenever a hearing is waived pursuant to § 15.15(a) a decision shall be made by the Administrator on the record and a copy of such decision shall be given in writing to the applicant or recipient, and to the complainant, if any.

(d) *Rulings required.* Each decision of a hearing officer or the Administrator shall set forth his ruling on each finding, conclusion, or exception presented, and shall identify the requirement or requirements imposed by or pursuant to this part with which it is found that the applicant or recipient has failed to comply.

(e) *Approval by Administrator.* Any final decision of any official of the FAA (other than the Administrator) that provides for the suspension or termination of, or the refusal to grant or continue Federal financial assistance, or the imposition of any other sanction available under this part or the Act, shall promptly be transmitted to the Administrator, who may personally approve such decision, may vacate it, or remit or mitigate any sanction imposed.

(f) *Content of orders.* The final decision, may provide for suspension or termination of, or refusal to grant or continue Federal financial assistance, in whole or in part, under the program involved, and may contain such terms, conditions, and other provisions as are consistent with and will effectuate the purposes of the Act and this part, including provisions designed to assure that no Federal financial assistance will thereafter be extended under such program to the applicant or recipient determined by such decision to be in default in its performance of an assurance given by it pursuant to this part, or to have otherwise failed to comply with this part, unless and until it corrects its noncompliance and satisfies the Administrator that it will fully comply with this part.

**§ 15.19 Judicial review.**

Action taken pursuant to section 602 of the Act is subject to judicial review as provided in section 603 of the Act.

**§ 15.21 Effect on other regulations; forms and instructions.**

(a) *Effect on other regulations.* All regulations, orders, or like directions issued by any official of the FAA before the effective date of this part and which impose requirements designed to prohibit any discrimination against individuals on the ground of race, color, or national origin under any program to which this part applies, and which authorize the suspension or termination of or refusal to grant or to continue Federal financial assistance to any applicant for or recipient of such assistance under such program for failure to comply with such requirements, are hereby superseded to the extent that such discrimination is prohibited by this part, except that nothing in this part shall be deemed to relieve any person of any obligation assumed or imposed under any such superseded regulation, order, instruction, or like direction before the effective date of this part. Nothing in this part, however, supersedes any of the following (including future amendments thereof):

(1) Executive Orders 10925 and 11114 and regulations issued thereunder; or

(2) Any other regulations or instructions, insofar as such regulations or instructions prohibit discrimination on the ground of race, color, or national origin in any program or situation to which this part is inapplicable, or prohibit discrimination on any other ground.

(b) *Forms and instructions.* The FAA will issue and promptly make available to interested persons forms and detailed instructions and procedures necessary for effectuating this part as applied to programs to which this part applies.

(c) *Supervision and coordination.* The Administrator may from time to time assign to officials of other departments or agencies of the Government with the consent of such departments or agencies, responsibilities in connection with the effectuation of the purposes of title VI of the Act and this part (other than responsibility for final decision as provided in § 15.17), including the achievement of effective coordination and maximum uniformity within the Executive Branch of the Government in the application of title VI and this part to similar programs and in similar situations.

**§ 15.23 Definitions.**

As used in this part—

(a) "Federal financial assistance" includes:

(1) Grants and loans of Federal funds;

(2) The grant or donation of Federal property and interests in property;

(3) The detail of Federal personnel;

(4) The sale and lease of, and the permission to use (on other than a casual or transient basis), Federal property or any interest in such property without consideration or at a nominal consideration, or at a consideration which is reduced for the purpose of assisting the recipient, or in recognition of the public interest to be served by such sale or lease to the recipient; and

(5) Any Federal agreement, arrangement, or other contract which has as one of its purposes the provision of assistance.

(b) "Program" includes any program, project, or activity for the provision of services, financial aid, or other benefits to individuals (including education or training, health, welfare, rehabilitation, housing, or other services, whether provided through employees of the recipient of Federal financial assistance or provided by others through contracts or other arrangements with the recipient, and including work opportunities), or for the provision of facilities for furnishing services, financial aid or other benefits to individuals. The services, financial aid, or other benefits provided under a program receiving Federal financial assistance shall be deemed to include any services, financial aid, or other benefits provided with the aid of Federal financial assistance or with the aid of any non-Federal funds, property, or other resources required to be expended or made available for the program to meet matching requirements or other conditions which must be met in order to receive the Federal financial assistance, and to include any services, financial aid, or other benefits provided in or through a facility provided with the aid of Federal financial assistance or such non-Federal resources.

(c) "Facility" includes all or any part of structures, equipment, or other real or personal property or interests therein, and the provision of facilities includes the construction, expansion, renovation, remodeling, alteration or acquisition of facilities.

(d) "Recipient" means any State, territory, possession, the District of Columbia, or Puerto Rico, or any political subdivision thereof, or instrumentality thereof, any public or private agency, institution, or organization, or other entity, or any individual, in any State, territory, possession, the District of Columbia, or Puerto Rico, to whom Federal financial assistance is extended, directly or through another recipient, for any program, including any successor, assignee, or transferee thereof, but such term does not include any ultimate beneficiary under any such program.

(e) "Primary recipient" means any recipient that is authorized or required to extend Federal financial assistance to another recipient for the purpose of carrying out a program.

(f) "Applicant" means a person who submits an application, request, or plan required to be approved by the Administrator, or by a primary recipient, as a condition to eligibility for Federal financial assistance, and "application" means such an application, request, or plan.

Issued in Washington, D.C., on December 14, 1964.

N. E. HALABY,
*Administrator.*

Approved: December 28, 1964.

LYNDON B. JOHNSON.

APPENDIX A

PROGRAMS TO WHICH THIS PART APPLIES

1. Federal-aid Airport Program (Secs. 1–15 and 17–20 of the Federal Airport Act, 49 U.S.C. 1101–1114, 1116–1120).

2. Acquisition of U.S. Land for Public Airports:

a. Section 16 of the Federal Airport Act (49 U.S.C. 1115); and

b. Surplus Property Act (sec. 13(g) of the Surplus Property Act of 1944, 50 U.S.C. App. 1622(g), and sec. 3 of the Act of October 1, 1949, 50 U.S.C. App. 1622b).

## Chapter II—Civil Aeronautics Board

SUBCHAPTER D—SPECIAL REGULATIONS

## PART 379—NONDISCRIMINATION IN FEDERALLY ASSISTED PROGRAMS OF THE BOARD—EFFECTUATION OF TITLE VI OF THE CIVIL RIGHTS ACT OF 1964

Subchapter D, Chapter II, title 14 CFR is hereby amended by adding the following new Part 379:

Sec.
379.1 Purpose.
379.2 Application of this part.
379.3 Discrimination prohibited.
379.4 Assurances required.
379.5 Compliance information.
379.6 Conduct of investigations.
379.7 Procedure for effecting compliance.
379.8 Hearings.
379.9 Decisions and notices.
379.10 Judicial review.
379.11 Effect on other remedies; coordination.
379.12 Definitions.

AUTHORITY: The provisions of this Part 379 are issued under sec. 602, 78 Stat. 252; and sections 102, 204, 404, 406, and 1002 of the Federal Aviation Act of 1958; 72 Stat. 740, 743, 760, 763, and 788; 49 U.S.C. 1302, 1324, 1374, 1376, and 1482.

**§ 379.1 Purpose.**

The purpose of this part is to effectuate the provisions of title VI of the Civil Rights Act of 1964 (hereafter referred to as the "Act") to the end that no person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity receiving Federal financial assistance from the Civil Aeronautics Board.

**§ 379.2 Application of this part.**

This part applies to any program for which Federal financial assistance is authorized under a law administered by the Board, including the payment of compensation by the Board under section 406 of the Federal Aviation Act of 1958 (49 U.S.C. 1376). It applies to money paid or other Federal financial assistance extended under any such program after the effective date of the part pursuant to a Board order, whether issued prior to or subsequent to such effective date, establishing a rate of compensation under section 406, or pursuant to an application for any other such Federal payment or financial assistance, whether approved prior to or subsequent to such effective date. This part does not apply to (a) money paid or other assistance extended under any such program before the effective date of this regulation, or (b) any employment practice, under any such program, of any employer, employment agency, or labor organization.

**§ 379.3 Discrimination prohibited.**

(a) *General.* No person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program to which this part applies.

(b) *Specific discriminatory actions prohibited.* No air carrier shall subject any person to discrimination on the ground of race, color, or national origin in connection with any air transportation for which such carrier is receiving or has claimed compensation payable by the Board under section 406 of the Federal Aviation Act of 1958.

**§ 379.4 Assurances required.**

Every applicant for or recipient of Federal financial assistance to which this part applies shall, as a condition to approval of its application and/or the extension of any such Federal financial assistance, furnish with the application, or on request of the Board in the case of compensation received pursuant to an investigation instituted under section 406 of the Federal Aviation Act of 1958 by the Board or a person other than the recipient of such compensation, an assurance that the applicant or recipient will comply with all requirements imposed by or pursuant to this part. The Board's request for such assurance will normally be made at the time of or in any Board order instituting an investigation under section 406.

**§ 379.5 Compliance information.**

(a) *Compliance reports.* Each recipient shall keep such records and submit to the Board timely, complete and accurate compliance reports at such times, and in such form and containing such information, as the Board may determine to be necessary to enable it to ascertain whether the recipient has complied or is complying with this part.

(b) *Access to sources of information.* Each recipient shall permit access by designated Board personnel during normal business hours to such of its books, records, accounts, and other sources of information, and its facilities as may be pertinent to ascertain compliance with this part.

(c) *Information to passengers and shippers.* Each recipient shall make available to passengers, shippers, and other interested persons such information regarding the provisions of this part and its applicability to the program under which the recipient receives Federal financial assistance, and make such information available to them in such manner, as the Board finds necessary to apprise such persons of the protections against discrimination assured them by the Act and this part.

**§ 379.6 Conduct of investigations.**

(a) *Periodic compliance reviews.* The Board or its designee shall from time to time review the practices of recipients to determine whether they are complying with this part.

(b) *Complaints.* Any person who believes himself or any specific class of individuals to be subjected to discrimination prohibited by this part may by himself or by a representative file with the Board a written complaint. A complaint must be filed not later than 90 days from the date of the alleged discrimination, unless the time for filing is extended by the Board.

(c) *Investigations.* The Board or its designee will make a prompt investigation whenever a compliance review, report, complaint, or any other information indicates a possible failure to comply with this part. The investigation should include, where appropriate, a review of the pertinent practices and policies of the recipient, the circumstances under which the possible noncompliance with this part occurred, and other factors relevant to a determination as to whether the recipient has failed to comply with this part.

(d) *Resolution of matters.* (1) If an investigation pursuant to paragraph (c) of this section indicates a failure to comply with this part, the Board or its designee will so inform the recipient and the matter will be resolved by informal means whenever possible. If it has been determined that the matter cannot be resolved by informal means, action will be taken as provided for in § 379.7.

(2) If an investigation does not warrant action pursuant to subparagraph (1) of this paragraph, the Board or its designee will so inform the recipient and the complainant, if any, in writing.

(e) *Intimidatory or retaliatory acts prohibited.* No recipient or other person shall intimidate, threaten, coerce, or discriminate against any individual for the purpose of interfering with any right or privilege secured by section 601 of the Act or this part, or because he has made a complaint, testified, assisted, or participated in any manner in an investigation, proceeding, or hearing under this part. The identity of complainants shall be kept confidential except to the extent necessary to carry out the purposes of this part, including the conduct of any investigation, hearing, or judicial proceeding arising thereunder.

**§ 379.7 Procedure for effecting compliance.**

(a) *General.* If there appears to be a failure or threatened failure to comply with this part, and if the noncompliance or threatened noncompliance cannot be corrected by informal means, compliance with this part may be effected by the suspension or termination of or refusal to grant or to continue Federal financial assistance or by any other means authorized by law. Such other means may include, but are not limited to, (1) a reference to the Department of Justice with a recommendation that appropriate proceedings be brought to enforce any rights of the United States under any law of the United States (including other titles of the Act), or any assurance or other contractual undertaking, and (2) any applicable proceeding under State or local law.

(b) *Noncompliance with § 379.4.* If an applicant, or recipient, or other person who has received a Board request for an assurance required under § 379.4 fails or refuses to furnish such assurance or otherwise fails or refuses to comply with a requirement imposed by or pursuant to that section, Federal financial assistance may be refused in accordance with the procedures of paragraph (c) of this section. The Board shall not be required to provide assistance in such a case during the pendency of the administrative

proceedings under such subsection except that the Board shall continue assistance during the pendency of such proceedings where such assistance is due and payable pursuant to an application or Board order therefor approved prior to the effective date of this part.

(c) *Termination of or refusal to grant or to continue Federal financial assistance.* No order suspending, terminating or refusing to grant or continue Federal financial assistance shall become effective until (1) the Board has advised the applicant or recipient of his failure to comply and has determined that compliance cannot be secured by voluntary means, (2) there has been an express finding on the record, after opportunity for hearing, of a failure by the applicant or recipient to comply with a requirement imposed by or pursuant to this part, and (3) the expiration of 30 days after the Board has filed with the committee of the House and the committee of the Senate having legislative jurisdiction over the program involved a full written report of the circumstances and the grounds for such action.

(d) *Other means authorized by law.* No action to effect compliance by any other means authorized by law shall be taken until (1) the Board has determined that compliance cannot be secured by voluntary means, (2) the recipient or other person has been notified of its failure to comply and of the action to be taken to effect compliance, and (3) the expiration of at least 10 days from the mailing of such notice to the recipient or other person. During this period of at least 10 days, additional efforts shall be made to persuade the recipient or other person to comply with this part and to take such corrective action as may be appropriate.

**§ 379.8 Hearings.**

(a) *Opportunity for hearing.* Whenever an opportunity for a hearing is required by § 379.7(c), reasonable notice shall be given by registered or certified mail, return receipt requested, to the affected applicant or recipient. This notice shall advise the applicant or recipient of the action proposed to be taken, the specific provision under which the proposed action against it is to be taken, and the matters of fact or law asserted as the basis for this action, and either (1) fix a date not less than 20 days after the date of such notice within which the applicant or recipient may request of the Board that the matter be scheduled for hearing or (2) advise the applicant or recipient that the matter in question has been set down for hearing at a stated place and time. The time and place so fixed shall be reasonable and shall be subject to change for cause. The complainant, if any, shall be advised of the time and place of the hearing. An applicant or recipient may waive a hearing and submit written information and argument for the record. The failure of an applicant or recipient to request a hearing under this subsection or to appear at a hearing for which a date has been set shall be deemed to be a waiver of the right to a hearing under section 602 of the Act and § 379.7(c) and consent to the making of a decision on the basis of such information as is available.

(b) *Time and place of hearing.* Hearings shall be held at the offices of the Board in Washington, D.C., at a time fixed by the Board unless it determines that the convenience of the applicant or recipient or of the Board requires that another place be selected. Hearings shall be held before the Board or, at its discretion, before a hearing examiner designated in accordance with section 11 of the Administrative Procedure Act.

(c) *Right to counsel.* In all proceedings under this section, the applicant or recipient and the Board shall have the right to be represented by counsel.

(d) *Procedures, evidence, and record.* (1) The hearing, decision, and any administrative review thereof shall be conducted in conformity with sections 5–8 of the Administrative Procedure Act, and in accordance with such rules of procedure as are proper (and not inconsistent with this section) relating to the conduct of the hearing, giving of notices subsequent to those provided for in paragraph (a) of this section, taking of testimony, exhibits, arguments and briefs, requests for findings, and other related matters. Both the Board and the applicant or recipient shall be entitled to introduce all relevant evidence on the issues as stated in the notice for hearing or as determined by the officer conducting the hearing at the outset of or during the hearing.

(2) Technical rules of evidence shall not apply to hearings conducted pursuant to this part, but rules or principles designed to assure production of the most credible evidence available and to subject testimony to test by cross-examination shall be applied where reasonably necessary by the officer conducting the hearing. The hearing officer may exclude irrelevant, immaterial, or unduly repetitious evidence. All documents and other evidence offered or taken for the record shall be open to examination by the parties, and opportunity shall be given to refute facts and arguments advanced on either side of the issues. A transcript shall be made of the oral evidence except to the extent the substance thereof is stipulated for the record. All decisions shall be based upon the hearing record and written findings shall be made.

(e) *Consolidated or joint hearings.* In cases in which the same or related facts are asserted to constitute noncompliance with this part and the regulations of one or more other Federal departments or agencies issued under Title VI of the Act, the Board may, by agreement with such other departments or agencies where applicable, provide for the conduct of consolidated or joint hearings, and for the application to such hearings of rules of procedures not inconsistent with this part. Final decisions in such cases, insofar as this part is concerned, shall be made in accordance with § 379.9.

**§ 379.9 Decisions and notices.**

(a) *Decision by person other than the Board.* If the hearing is held by a hearing examiner, such hearing examiner shall either make an initial decision, if so authorized, or certify the entire record including his recommended findings and proposed decision to the Board for a final decision, and a copy of such initial decision or certification shall be mailed to the applicant or recipient. Where the initial decision is made by the hearing examiner, the applicant or recipient may within 30 days of the mailing of such notice of initial decision file with the Board his exceptions to the initial decision, with his reasons therefor. In the absence of exceptions, the Board may on its own motion within 45 days after the initial decision serve on the applicant or recipient a notice that it will review the decision. Upon the filing of such exceptions or of such notice of review the Board shall review the initial decision and issue its own decision thereon including the reasons therefor. In the absence of either exceptions or a notice of review, the initial decision shall constitute the final decision of the Board.

(b) *Decisions on record or review by the Board.* Whenever a record is certified to the Board for decision or it reviews the decision of a hearing examiner pursuant to paragraph (a) of this section or whenever the Board conducts the hearing, the applicant or recipient shall be given reasonable opportunity to file with the Board briefs or other written statements of its contentions, and a copy of the final decision of the Board shall be given in writing to the applicant or recipient and to the complainant, if any.

(c) *Decisions on record where a hearing is waived.* Whenever a hearing is waived pursuant to § 379.8(a), a decision shall be made by the Board on the record, and a copy of such decision shall be given in writing to the applicant or recipient, and to the complainant, if any.

(d) *Rulings required.* Each decision of a hearing officer or the Board shall set forth rulings on each finding, conclusion, or exception presented, and shall identify the requirement or requirements imposed by or pursuant to this part with which it is found that the applicant or recipient has failed to comply.

(e) *Content of orders.* The final decision may provide for suspension or termination of, or refusal to grant or continue Federal financial assistance, in whole or in part, under the program involved, and may contain such terms, conditions, and other provisions as are consistent with and will effectuate the purposes of the Act and this part, including provisions designed to assure that no Federal financial assistance will thereafter be extended under such program to the applicant or recipient determined by such decision to be in default in its performance of an assurance given by it pursuant to this part, or to have otherwise failed to comply with this part, unless and until it corrects its noncompliance and satisfies the Board that it will fully comply with this part.

**§ 379.10 Judicial review.**

Action taken pursuant to section 602 of the Act is subject to judicial review as provided in section 603 of the Act.

**§ 379.11 Effect on other remedies; coordination.**

(a) *Effect on other statutory remedies.* Notwithstanding the provisions of § 379.7, nothing contained in this part shall in any way abridge or alter other statutory remedies now existing for the elimination of discrimination by air carriers, but the provisions of this part are in addition to such remedies.

(b) *Effect on other regulations.* Nothing in this part shall be deemed to supersede any other regulations or instructions, insofar as such regulations or instructions prohibit discrimination on the ground of race, color, or national origin in any program or situation to which this part is inapplicable, or prohibit discrimination on any other ground.

(c) *Supervision and coordination.* The Board may from time to time assign to officials of the Board, or to officials of other departments or agencies of the Government with the consent of such departments or agencies, responsibilities in connection with the effectuation of the purposes of title VI of the Act and this part (other than responsibility for final decision as provided in § 379.9), including the achievement of effective coordination and maximum uniformity within the Board and with other departments and agencies of the Government in the application of title VI and this part to similar programs and in similar situations.

**§ 379.12 Definitions.**

As used in this part—

(a) The term "United States" means the States of the United States, the District of Columbia, Puerto Rico, the Virgin Islands, American Samoa, Guam, Wake Island, the Canal Zone, and the territories and possessions of the United States.

(b) The term "Federal financial assistance" includes grants of Federal funds under section 406 of the Federal Aviation Act of 1958.

(c) The term "recipient" means any air carrier to whom Federal financial assistance is extended or whose rate of compensation payable by the Board under section 406 of the Federal Aviation Act of 1958 is the subject of a formal Board investigation.

(d) The term "applicant" means one who submits an application required to be approved by the Board as a condition to eligibility for Federal financial assistance.

*Effective date.* This part shall become effective on the 30th day following the date of its publication in the FEDERAL REGISTER.

Dated: December 18, 1964.

By the Civil Aeronautics Board.

[SEAL] HAROLD R. SANDERSON, *Secretary.*

Approved: December 28, 1964.

LYNDON B. JOHNSON.

AUTHORITY: The provisions of this Part 300 issued under Public Law 88–352, the Civil Rights Act of 1964; 78 Stat. 241, July 2, 1964.

### § 300.1 Purpose.

The purpose of this part is to effectuate the provisions of Title VI of the Civil Rights Act of 1964 (hereafter referred to as the "Act") to the end that no person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity receiving Federal financial assistance from any component of the Department of Defense.

### § 300.2 Definitions.

(a) "Component" means the Office of the Secretary of Defense, a military department or a Defense agency.

(b) "Responsible Department official" means the Secretary of Defense or other official of the Department of Defense or component thereof who by law or by delegation has the principal responsibility within the Department or component for the administration of the law extending such assistance.

(c) The term "United States" means the States of the United States, the District of Columbia, Puerto Rico, the Virgin Islands, American Samoa, Guam, Wake Island, the Canal Zone, and the territories and possessions of the United States, and the term "State" means any one of the foregoing.

(d) The term "Federal financial assistance" includes (1) grants and loans of Federal funds, (2) the grant or donation of Federal property and interests in property, (3) the detail of Federal personnel, (4) the sale and lease of, and the permission to use (on other than a casual or transient basis), Federal property or any interest in such property without consideration or at a nominal consideration, or at a consideration which is reduced for the purpose of assisting the recipient, or in recognition of the public interest to be served by such sale or lease to the recipient, and (5) any Federal agreement, arrangement, or other contract which has as one of its purposes the provision of assistance.

(e) The term "program" includes any program, project, or activity for the provision of services, financial aid, or other benefits to individuals, or for the provision of facilities for furnishing services, financial aid or other benefits to individuals. The services, financial aid, or other benefits provided under a program receiving Federal financial assistance shall be deemed to include any services, financial aid, or other benefits provided with the aid of Federal financial assistance or with the aid of any non-Federal funds, property, or other resources required to be expended or made available for the program to meet matching requirements or other conditions which must be met in order to receive the Federal financial assistance, and to include any services, financial aid, or other benefits provided in or through a facility provided with the aid of Federal financial assistance or such non-Federal resources.

(f) The term "facility" includes all or any portion of structures, equipment, or other real or personal property or interests therein, and the provision of facilities includes the construction, expansion, renovation, remodeling, alteration or acquisition of facilities.

(g) The term "recipient" means any State, political subdivision of any State, or instrumentality of any State or political subdivision, any public or private agency, institution, or organization, or other entity, or any individual, in any State, to whom Federal financial assistance is extended, directly or through another recipient, for any program, including any successor, assign, or transferee thereof, but such term does not include any ultimate beneficiary under any such program.

(h) The term "primary recipient" means any recipient which is authorized or required to extend Federal financial assistance to another recipient for the purpose of carrying out a program.

(i) The term "applicant" means one who submits an application, request, or plan required to be approved by a responsible Department official, or by a primary recipient, as a condition to eligibility for Federal financial assistance, and the term "application" means such an application, request or plan.

### § 300.3 Application.

This part applies to any program for which Federal financial assistance is authorized under a law administered by any component of the Department of Defense, including the Federally-assisted programs and activities listed in Appendix A of this part. It applies to money paid, property transferred, or other Federal financial assistance extended under any such program after the effective date of this part pursuant to approval prior to such effective date. This part does not apply to (a) any Federal financial assistance by way of insurance or guaranty contracts, (b) money paid, property transferred, or other assistance, extended under any such program before the effective date of this part, (c) any assistance to any individual who is the ultimate beneficiary under any such program, or (d) any employment practice, under any such program, of any employer, employment agency, or labor organization. The fact that a program or activity is not listed in Appendix A shall not mean, if Title VI of the Act is otherwise applicable, that such program is not covered. Other programs under statutes now in force or hereinafter enacted may be added to this list by notice published in the FEDERAL REGISTER.

### § 300.4 Policy.

(a) *General.* No person in the United States shall, on the ground of race, color, or national origin be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program to which this Directive applies.

(b) *Specific discriminatory actions prohibited.* (1) A recipient under any program to which this part applies may not, directly or through contractual or other arrangements, on the ground of race, color, or national origin:

(i) Deny an individual any service, financial aid, or other benefit provided under the program;

(ii) Provide any service, financial aid, or other benefit to an individual which is different, or is provided in a different manner, from that provided to others under the program;

(iii) Subject an individual to segregation or separate treatment in any matter related to his receipt of any service, financial aid, or other benefit under the program;

(iv) Restrict an individual in any way in the enjoyment of any advantage or privilege enjoyed by others receiving any service, financial aid, or other benefit under the program;

(v) Treat an individual differently from others in determining whether he satisfies any admission, enrollment, quota, eligibility, membership or other requirement or condition which individuals must meet in order to be provided any service, financial aid, or other benefit provided under the program;

(vi) Deny an individual an opportunity to participate in the program through the provision of services or otherwise or afford him an opportunity to do so which is different from that afforded others under the program.

(2) A recipient, in determining the types of services, financial aid, or other benefits, or facilities which will be provided under any such program, or the class of individuals to whom, or the situations in which, such services, financial aid, other benefits, or facilities will be provided under any such program, or the class of individuals to be afforded an opportunity to participate in any such program, may not, directly or through contractual or other arrangements, utilize criteria or methods of administration

which have the effect of subjecting individuals to discrimination because of their race, color, or national origin, or have the effect of defeating or substantially impairing accomplishment of the objectives of the program as respect individuals of a particular race, color, or national origin.

(3) As used in this section the services, financial aid, or other benefits provided under a program receiving Federal financial assistance shall be deemed to include any service, financial aid, or other benefit provided in or through a facility provided with the aid of Federal financial assistance.

(4) The enumeration of specific forms of prohibited discrimination in this subparagraph does not limit the generality of the prohibition in paragraph (a) of this section.

**§ 300.5 Responsibilities.**

(a) The Assistant Secretary of Defense (Manpower) shall be responsible for insuring that the policies of this part are effectuated throughout the Department of Defense. He may review from time to time as he deems necessary the implementation of these policies by the components of the Department of Defense.

(b) The Secretary of each Military Department is responsible for implementing this part with respect to programs and activities receiving financial assistance from his Military Department; and the Assistant Secretary of Defense (Manpower) is responsible for similarly implementing this part with respect to all other components of the Department of Defense. Each may designate official(s) to fulfill this responsibility in accordance with § 300.2(b).

(c) The Assistant Secretary of Defense (Manpower) or, after consultation with the Assistant Secretary of Defense (Manpower), the Secretary of each Military Department or other responsible Department official designated by the Assistant Secretary of Defense (Manpower) may assign to officials of other departments or agencies of the Government, with the consent of such departments or agencies, responsibilities in connection with the effectuation of the purposes of Title VI of the Act and this part (other than responsibility for final decision as provided in § 300.11), including the achievement of effective coordination and maximum uniformity within the Department and within the Executive Branch of the Government in the application of Title VI and this part to similar programs and in similar situations.

**§ 300.6 Assurances required.**

(a) *General.* (1) Every application for Federal financial assistance to carry out a program to which this part applies, except a program to which paragraph (b) of this section applies, and every application for Federal financial assistance to provide a facility shall, as a condition to its approval and the extension of any Federal financial assistance pursuant to the application, contain or be accompanied by an assurance that the program will be conducted or the facility operated in compliance with all requirements imposed by or pursuant to this part. In the case of an application for Federal financial assistance to provide real property or structures thereon, the assurance shall obligate the recipient, or, in the case of a subsequent transfer, the transferee, for the period during which the real property or structures are used for a purpose for which the Federal financial assistance is extended or for another purpose involving the provision of similar services or benefits. In the case of personal property the assurance shall obligate the recipient for the period during which he retains ownership or possession of the property. In all other cases the assurance shall obligate the recipient for the period during which Federal financial assistance is extended pursuant to the application. In any case in which Federal financial assistance is extended without an application having been made, such extension shall be subject to the same assurances as if an application had been made. The responsible Department official shall specify the form of the foregoing assurances for each program, and the extent to which like assurances will be required of subguarantees, contractors and subcontractors, transferees, successors in interest, and other participants in the program. Any such assurance shall include provisions which give the United States a right to seek its judicial enforcement.

(2) The assurance required in the case of a transfer of surplus real property shall be inserted in the instrument effecting the transfer of any such surplus land, together with any improvements located thereon, and shall consist of (i) a condition coupled with a right to be reserved to the component of the Department of Defense concerned to revert title to the property in the event of breach of such nondiscrimination condition during the period during which the real property is used for a purpose for which the Federal financial assistance is extended or for another purpose involving the provision of similar services or benefits, and (ii) a covenant running with the land for the same period. In the event a transferee of surplus real property proposes to mortgage or otherwise encumber the real property as security for financing construction of new, or improvement of existing, facilities on such property for the purposes for which the property was transferred, the responsible Department official may agree, upon request of the transferee and if necessary to accomplish such financing, and upon such conditions as he deems appropriate, to forbear the exercise of such right to revert title for so long as the lien of such mortgage or other encumbrance remains effective.

(3) The assurance required in the case of a transfer of surplus personal property shall be inserted in a written agreement by and between the Department of Defense component concerned and the recipient.

(b) *Continuing State programs.* Every application by a State or a State agency to carry out a program involving continuing Federal financial assistance to which this part applies shall as a condition to its approval and the extension of any Federal financial assistance pursuant to the application (1) contain or be accompanied by a statement that the program is (or, in the case of a new program, will be) conducted in compliance with all requirements imposed by or pursuant to this part, or a statement of the extent to which it is not, at the time the statement is made, so conducted, and (2) provide or be accompanied by provision for such methods of administration for the program as are found by the responsible Department official to give reasonable assurance that the applicant and all recipients of Federal financial assistance under such program will comply with all requirements imposed by or pursuant to this Directive, including methods of administration which give reasonable assurance that any noncompliance indicated in the statement under subparagraph (1) of this paragraph will be corrected. In cases of continuing State programs in which applications are not made, the extension of Federal financial assistance shall be subject to the same conditions under this subsection as if applications had been made.

(c) *Assurances from institutions.* (1) In the case of Federal financial assistance to an institution of higher education, the assurance required by this section shall extend to admission practices and to all other practices relating to the treatment of students.

(2) The assurance required with respect to an institution of higher education, or any other institution, insofar as the assurance relates to the institution's practices with respect to admission or other treatment of individuals as students of the institution or to the opportunity to participate in the provision of services or other benefits to such individuals, shall be applicable to the entire institution unless the applicant establishes, to the satisfaction of the responsible Department official, that the institution's practices in designated parts or programs of the institution will in no way affect its practices in the program of the institution for which Federal financial assistance is sought, or the beneficiaries of or participants in such program. If in any such case the assistance sought is for the construction of a facility or part of a facility, the assurance shall in any event extend to the entire facility and to facilities operated in connection therewith.

**§ 300.7 Compliance information.**

(a) *Cooperation and assistance.* Each responsible Department official shall to the fullest extent practicable seek the cooperation of recipients in obtaining compliance with this part and shall provide assistance and guidance to recipients to help them comply voluntarily with this part.

(b) *Compliance reports.* Each recipient shall keep such records and submit to the responsible Department official timely, complete and accurate compliance reports at such times, and in such form and containing such information, as the responsible Department official may determine to be necessary to enable him to ascertain whether the recipient has complied or is complying with this part. In the case of any program under which a primary recipient extends Federal financial assistance to any other recipient, such other recipient shall also submit such compliance reports to the primary recipient as may be necessary to enable the primary recipient to carry out its obligations imposed pursuant to this part.

(c) *Access to sources of information.* Each recipient shall permit access by the responsible Department official during normal business hours to such of its books, records, accounts, and other sources of information, and its facilities as may be pertinent to ascertain compliance with this part. Where any information required of a recipient is in the exclusive possession of any other institution or person and this institution or person shall fail or refuse to furnish this information, the recipient shall so certify in its report and shall set forth what efforts it has made to obtain the information.

(d) *Information to beneficiaries and participants.* Each recipient shall make available to participants, beneficiaries, and other interested persons such information regarding the provisions of this part and its applicability to the program under which the recipient receives Federal financial assistance, and make such information available to them in such manner, as the responsible Department official finds necessary to apprise such persons of the protections against discrimination assured them by the Act and this part.

**§ 300.8 Conduct of investigations.**

(a) *Periodic compliance reviews.* The responsible Department official or his designee(s) shall from time to time review the practices of recipients to determine whether they are complying with this part.

(b) *Complaints.* Any person who believes himself or any specific class of individuals to be subjected to discrimination prohibited by this part may by himself or by a representative file with the responsible Department official a written complaint. A complaint must be filed not later than 90 days from the date of the alleged discrimination, unless the time for filing is extended by the responsible Department official.

(c) *Investigations.* The responsible Department official will make a prompt investigation whenever a compliance review, report, complaint, or any other information indicates a possible failure to comply with this part. The investigation should include, where appropriate, a review of the pertinent practices and policies of the recipient, the circumstances under which the possible noncompliance with this part occurred, and other factors relevant to a determination of whether the recipient has failed to comply with this part.

(d) *Resolution of matters.* (1) If an investigation pursuant to paragraph (c) of this section indicates a failure to comply with this part, the responsible Department official will so inform the recipient and the matter will be resolved by informal means whenever possible. If it has been determined that the matter cannot be resolved by informal means, action will be taken as provided in § 300.9.

(2) If an investigation does not warrant action pursuant to subparagraph (1) of this paragraph, the responsible Department official will so inform the recipient and the complainant, if any, in writing.

(e) *Intimidatory or retaliatory acts prohibited.* No recipient or other person shall intimidate, threaten, coerce, or discriminate against any individual for the purpose of interfering with any right or privilege secured by section 601 of the Act or this part, or because he has made a complaint, testified, assisted, or participated in any manner in an investigation, proceeding, or hearing under this part. The identity of complainants shall not be disclosed except when necessary to carry out the purposes of this part including the conduct of any investigation, hearing, or judicial proceeding arising thereunder.

**§ 300.9 Procedure for effecting compliance.**

(a) *General.* If there appears to be a failure or threatened failure to comply with this part, and if the noncompliance or threatened noncompliance cannot be corrected by informal means, compliance with this part may be effected by the suspension or termination of or refusal to grant or to continue Federal financial assistance or by any other means authorized by law as determined by the responsible Department official. Such other means may include, but are not limited to (1) a reference to the Department of Justice with a recommendation that appropriate proceedings be brought to enforce any rights of the United States under any law of the United States (including other titles of the Act), or any assurance or other contractual undertaking, and (2) any applicable proceedings under State or local law.

(b) *Noncompliance with § 300.6.* If an applicant fails or refuses to furnish an assurance required under § 300.6 or otherwise fails or refuses to comply with a requirement imposed by or pursuant to that section Federal financial assistance may be refused in accordance with the procedures of paragraph (c) of this section. The component of the Department of Defense concerned shall not be required to provide assistance in such a case during the pendency of the administrative proceedings under such paragraph except that the component shall continue assistance during the pendency of such proceedings where such assistance is due and payable pursuant to an application therefor approved prior to the effective date of this part.

(c) *Termination of or refusal to grant or to continue Federal financial assistance.* Except as provided in paragraph (b) of this section no order suspending, terminating or refusing to grant or continue Federal financial assistance shall become effective until (1) the responsible Department official has advised the applicant or recipient of his failure to comply and has determined that compliance cannot be secured by voluntary means, (2) there has been an express finding, after opportunity for a hearing (as provided in § 300.10), of a failure by the applicant or recipient to comply with a requirement imposed by or pursuant to this part, (3) the action has been approved by the Secretary of Defense pursuant to § 300.11, and (4) the expiration of 30 days after the Secretary of Defense has filed with the committee of the House and the committee of the Senate having legislative jurisdiction over the program involved, a full written report of the circumstances and the grounds for such action. Any action to suspend or terminate or to refuse to grant or to continue Federal financial assistance shall be limited to the particular political entity, or part thereof, or other applicant or recipient as to whom such a finding has been made and shall be limited in its effect to the particular program, or part thereof, in which such noncompliance has been so found.

(d) *Other means authorized by law.* No action to affect compliance by any other means authorized by law shall be taken until (1) the responsible Department official has determined that compliance cannot be secured by voluntary means, (2) the action has been approved by the Assistant Secretary of Defense (Manpower), (3) the recipient or other person has been notified of its failure to comply and of the action to be taken to effect compliance, and (4) the expiration of at least 10 days from the mailing of such notice to the recipient or other person. During this period of at least 10 days additional efforts shall be made to persuade the recipient or other person to comply with this part and to take such corrective action as may be appropriate.

**§ 300.10 Hearings.**

(a) *Opportunity for hearing.* Whenever an opportunity for a hearing is required by § 300.11, reasonable notice shall be given by registered or certified mail, return receipt requested, to the affected applicant or recipient. This notice shall advise the applicant or recipient of the action proposed to be taken, the specific provision under which the proposed action against it is to be taken, and the matters of fact or law asserted as the basis for this action, and either (1) fix a date not less than 20 days after the date of such notice within which the applicant or recipient may request of the responsible Department official that the matter be scheduled for hearing or (2) advise the applicant or recipient that the matter in question has been set down for hearing at a stated place and time. The time and place so fixed shall be reasonable and shall be subject to change for cause. The complainant, if any, shall be advised of the time and place of hearing. An applicant or recipient may waive a hearing and submit written information and argument. The failure of an applicant or recipient to request a hearing under this paragraph or to appear at a hearing for which a date has been set shall be deemed to be a waiver of the right to a hearing under section 602 of the Act and

§ 300.11(c) and consent to the making of a decision on the basis of such information as is available.

(b) *Time and place of hearing.* Hearings shall be held at the offices of the responsible component of the Department of Defense in Washington, D.C., at a time fixed by the responsible Department official unless he determines that the convenience of the applicant or recipient or of the component requires that another place be selected. Hearings shall be held before the responsible Department official or, at his discretion, before a hearing examiner designated by him.

(c) *Hearing examiner.* The examiner shall be a field grade officer or civilian employee above the grade of GS–12 (or the equivalent) who shall be a person admitted to practice law before a Federal court or the highest court of a State.

(d) *Right to counsel.* In all proceedings under this section, the applicant or recipient and the responsible component of the Department shall have the right to be represented by counsel.

(e) *Procedures.* (1) The recipient shall receive an open hearing at which he or his counsel may examine any witnesses present. Both the responsible Department official and the applicant or recipient shall be entitled to introduce all relevant evidence on the issues as stated in the notice for hearing or as determined by the officer conducting the hearing at the outset of or during the hearing.

(2) Technical rules of evidence shall not apply to hearings conducted pursuant to this part, but rules or principles designed to assure production of the most credible evidence available and to subject testimony to test by cross-examination shall be applied where reasonably necessary by the officer conducting the hearing. The hearing officer may exclude irrelevant, immaterial, or unduly repetitious evidence. All documents and other evidence offered or taken for record shall be open to examination by the parties and opportunity shall be given to refute facts and arguments advanced on either side of the issues. A transcript shall be made of the oral evidence except to the extent the substance thereof is stipulated for the record. All decisions shall be based upon the hearing record and written findings shall be made.

(f) *Consolidated or joint hearings.* In cases in which the same or related facts are asserted to constitute noncompliance with this part with respect to two or more programs to which this part applies, or noncompliance with this part and the regulations of one or more other Federal departments or agencies issued under Title VI of the Act, the Assistant Secretary of Defense (Manpower), the Secretary of a Military Department, or other responsible Department official designated by the Assistant Secretary of Defense (Manpower) after consultation with the Assistant Secretary of Defense (Manpower) may, by agreement with such other departments or agencies where applicable, provide for the conduct of consolidated or joint hearings, and for the application to such hearings of appropriate procedures not inconsistent with this part. Final decisions in such cases, insofar as this part is concerned, shall be made in accordance with § 300.11.

### § 300.11 Decisions and notices.

(a) *Decision by person other than the responsible department official.* If the hearing is held by a hearing examiner such hearing examiner shall either make an initial decision, if so authorized, or certify the entire record including his recommended findings and proposed decision to the responsible Department official for a final decision, and a copy of such initial decision or certification shall be mailed to the applicant or recipient. Where the initial decision is made by the hearing examiner the applicant or recipient may within 30 days of the mailing of such notice of initial decision file with the responsible Department official his exceptions to the initial decision, with his reasons therefor. In the absence of exceptions, the responsible Department official may on his own motion within 45 days after the initial decision serve on the applicant or recipient a notice that he will review the decision. Upon the filing of such exceptions or of such notice of review the responsible Department official shall review the initial decision and issue his own decision thereon including the reasons therefor. In the absence of either exceptions or a notice of review the initial decision shall constitute the final decision of the responsible Department official.

(b) *Decisions on record or review by the responsible department official.* Whenever a record is certified to the responsible Department official for decision or he reviews the decision of a hearing examiner pursuant to paragraph (a) of this section or whenever the responsible Department official conducts the hearing, the applicant or recipient shall be given reasonable opportunity to file with him briefs or other written statements of its contentions, and a copy of the final decision of the responsible Department official shall be given in writing to the applicant or recipient and to the complainant, if any.

(c) *Decisions on record where a hearing is waived.* Whenever a hearing is waived pursuant to § 300.10(a), a decision shall be made by the responsible Department official on the record and a copy of such decision shall be given in writing to the applicant or recipient, and to the complainant, if any.

(d) *Rulings required.* Each decision of a hearing officer or responsible Department official shall set forth his ruling on each finding, conclusion, or exception presented, and shall identify the requirement or requirements imposed by or pursuant to this part with which it is found that the applicant or recipient has failed to comply.

(e) *Approval by the Secretary of Defense.* Any final decision of a responsible Department official which provides for the suspension or termination of, or the refusal to grant or continue Federal financial assistance, or the imposition of any other sanction available under this part or the Act, shall promptly be transmitted to the Secretary of Defense, who may approve such decision, may vacate it, or remit or mitigate any sanction imposed.

(f) *Contents of orders.* The final decision may provide for suspension or termination of, or refusal to grant or continue Federal financial assistance, in whole or in part, under the program involved, and may contain such terms, conditions, and other provisions as are consistent with and will effectuate the purposes of the Act and this part, including provisions designed to assure that no Federal financial assistance will thereafter be extended under such program to the applicant or recipient determined by such decision to be in default in its performance of an assurance given by it pursuant to this part, or to have otherwise failed to comply with this part, unless and until it corrects its noncompliance and satisfies the responsible Department official that it will fully comply with this part.

### § 300.12 Judicial review.

Action taken pursuant to section 602 of the Act is subject to judicial review as provided in section 603 of the Act.

### § 300.13 Effect on other issuances.

All issuances heretofore issued by any officer of the Department of Defense or its components which impose requirements designed to prohibit any discrimination against individuals on the ground of race, color, or national origin under any program to which this part applies, and which authorize the suspension or termination of or refusal to grant or to continue Federal financial assistance to any applicant for or recipient of such assistance under such program for failure to comply with such requirements, are hereby superseded to the extent that such discrimination is prohibited by this part, except that nothing in this part shall be deemed to relieve any person of any obligation assumed or imposed under any such superseded regulation, order, instruction, or like direction prior to the effective date of this part. Nothing in this part, however, shall be deemed to supersede any of the following (including future amendments thereof): (a) Executive Orders 10925 and 11114 and issuances thereunder, (b) the "Standards for a Merit System of Personnel Administration," issued jointly by the Secretaries of Defense, of Health, Education, and Welfare, and of Labor, 28 F.R. 734, or (c) Executive Order 11063 and issuances thereunder, or any other issuances, insofar as such Order or issuances prohibit discrimination on the ground of race, color, or national origin in any program or situation to which this part is inapplicable, or prohibit discrimination on any other ground.

### § 300.14 Implementation.

The Secretary of each Military Department shall submit regulations implementing this part to the Assistant Secretary of Defense (Manpower).

### § 300.15 Effective date.

This part shall become effective on the 30th day following the date of its publication in the FEDERAL REGISTER.

ROBERT S. MCNAMARA,
*Secretary of Defense.*

Approved: December 28, 1964.
LYNDON B. JOHNSON.

APPENDIX A

PROGRAMS TO WHICH THIS DIRECTIVE APPLIES

1. The Army and Air National Guard (Title 32, United States Code).
2. Various programs involving loan or other disposition of surplus property (various general and specialized statutory provisions including: 40 United States Code 483, 484, 512; 49 United States Code 1101–1119; 10 United States Code 2541, 2542, 2543, 2572, 2662, 7308, 7541, 7542, 7545, 7546, 7547).
3. National Program for Promotion of Rifle Practice (10 United States Code 4307 and annual Department of Defense Appropriation Act).
4. National Defense Cadet Corps Program (10 United States Code 3540(b), 4651).
5. Office of Civil Defense assistance to programs of adult education in civil defense subjects (50 United States Code App. 2281 (e), (f)).
6. Office of Civil Defense radiological instruments grants (50 United States Code App. 2281(h)).
7. Office of Civil Defense program (with Public Health Service) for development of instructional materials on medical self-help (50 United States Code App. 2281 (e), (f)).
8. Office of Civil Defense university extension programs for civil defense instructor training (50 United States Code App. 2281 (e)).
9. Office of Civil Defense programs for survival supplies and equipment, survival training, emergency operating center construction, and personnel and administrative expenses (50 United States Code App. 2281(i), 2285).
10. Office of Civil Defense Shelter Provisioning Program (50 United States Code App. 2281(h)).
11. Office of Civil Defense assistance to students attending Office of Civil Defense schools (50 United States Code App. 2281(e)).
12. Office of Civil Defense loans of equipment or materials from OCD stockpiles for civil defense, including local disaster purposes (50 United States Code App. 2281).
13. Navy Science Cruiser Program (SecNav Instruction 5720.19A).
14. Civil Air Patrol (10 United States Code 9441).

# Title 33—NAVIGATION AND NAVIGABLE WATERS

## Chapter I—Coast Guard, Department of the Treasury

### SUBCHAPTER A—GENERAL

[CGFR 64-91]

## PART 24—NONDISCRIMINATION IN FEDERALLY-ASSISTED PROGRAMS OF THE UNITED STATES COAST GUARD—EFFECTUATION OF TITLE VI OF THE CIVIL RIGHTS ACT OF 1964

Chapter I, Subchapter A, 33 CFR is hereby amended by adding the following new Part 24:

Sec.

24.1 Purpose.
24.5 Application of this part.
24.10 Discrimination prohibited.
24.15 Assurances required.
24.20 Compliance information.
24.25 Conduct of investigations.
24.30 Procedure for effecting compliance.
24.35 Hearings.
24.40 Decisions and notices.
24.45 Judicial review.
24.50 Effect on other regulations; forms and instructions.
24.55 Definitions.
24.60 Programs to which this part applies.

### § 24.1 Purpose.

The purpose of this part is to effectuate the provisions of title VI of the Civil Rights Act of 1964 (hereafter referred to as the "Act") to the end that no person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity receiving Federal financial assistance from the Coast Guard.

### § 24.5 Application of this part.

This part applies to any program for which Federal financial assistance is authorized under a law administered by the Coast Guard, including the Federally-assisted programs and activities listed in § 24.60. It applies to money paid, property transferred, or other Federal financial assistance extended under any such program after the effective date of the regulation pursuant to an application approved prior to such effective date. This part does not apply to (a) any Federal financial assistance by way of insurance or guaranty contracts, (b) money paid, property transferred, or other assistance extended under any such program before the effective date of this part, (c) any assistance to any individual who is the ultimate beneficiary under any such program, or (d) any employment practice, under any such program, of any employer, employment agency, or labor organization. The fact that a program or activity is not listed in § 24.60 shall not mean, if Title VI of the Act is otherwise applicable, that such program is not covered. Other programs under statutes now in force or hereinafter enacted may be added to this section by notice published in the FEDERAL REGISTER.

### § 24.10 Discrimination prohibited.

(a) *General.* No person in the United States shall, on the ground of race, color, or national origin be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program to which this part applies.

(b) *Specific discriminatory actions prohibited.* (1) A recipient under any program to which this part applies may not, directly or through contractual or other arrangements, on ground of race, color, or national origin:

(i) Deny an individual any service, financial aid, or other benefit provided under the program;

(ii) Provide any service, financial aid, or other benefit to an individual which is different, or is provided in a different manner, from that provided to others under the program;

(iii) Subject an individual to segregation or separate treatment in any matter related to his receipt of any service, financial aid, or other benefit under the program;

(iv) Restrict an individual in any way in the enjoyment of any advantage or privilege enjoyed by others receiving any service, financial aid, or other benefit under the program;

(v) Treat an individual differently from others in determining whether he satisfies any admission, enrollment, quota, eligibility, membership or other requirement or condition which individuals must meet in order to be provided any service, financial aid, or other benefit provided under the program;

(vi) Deny any individual an opportunity to participate in the program through the provision of services or otherwise or afford him an opportunity to do so which is different from that afforded others under the program.

(2) A recipient, in determining the types of services, financial aid, or other benefits, or facilities which will be provided under any such program, or the class of individuals to whom, or the situations in which such services, financial aid, other benefits, or facilities will be provided under any such program, or the class of individuals to be afforded an opportunity to participate in any such program, may not, directly or through contractual or other arrangements, utilize criteria or methods of administration which have the effect of subjecting individuals to discrimination because of their race, color, or national origin, or have the effect of defeating or substantially impairing accomplishment of the objectives of the program as respect individuals of a particular race, color, or national origin.

(3) As used in this section the services, financial aid, or other benefits provided under a program receiving Federal financial assistance shall be deemed to include any service, financial aid, or other benefit provided in or through a facility provided with the aid of Federal financial assistance.

(4) The enumeration of specific forms of prohibited discrimination in this paragraph does not limit the generality of the prohibition in paragraph (a) of this section.

(5) A recipient may not take action that is calculated to bring about indirectly what this part forbids it to accomplish directly.

### § 24.15 Assurances required.

(a) *General.* (1) Every application for Federal financial assistance to carry out a program to which this part applies, and every application for Federal financial assistance to provide a facility shall, as a condition to its approval and the extension of any Federal financial assistance pursuant to the application, contain or be accompanied by an assurance that the program will be conducted or the facility operated in compliance with all requirements imposed by or pursuant to this part. In the case of an application for Federal financial assistance to provide real property or structures thereon, the assurance shall obligate the recipient, or, in the case of a subsequent transfer, the transferee, for the period during which the real property or structures are used for a purpose for which the Federal financial assistance is extended or for another purpose involving the provision of similar services or benefits. In the case of personal property the assurance shall obligate the recipient for the period during which he retains ownership or possession of the property. In all other cases the assurance shall obligate the recipient for the period during which Federal financial assistance is extended pursuant to the application. The Commandant shall specify the form of the foregoing assurances for each program, and the extent to which like assurances will be required of subgrantees, contractors and subcontractors, transferees, successors in interest, and other participants in the program. Any such assurance shall include provisions which give the United States a right to seek its judicial enforcement.

(2) The assurance required in the case of a transfer of an interest in real property by way of permit, license, easement, or lease shall be inserted in the instrument effecting the transfer and shall contain a condition coupled with a right reserved to the Coast Guard to revoke and cancel the transfer in the event of breach of such nondiscrimination condition during the period of the transfer.

(3) Transfers of surplus property are subject to regulations issued by the Administrator of General Services (41 CFR 101–6.2).

(b) *Pre-existing permit, license, easement or lease.* In any case where a permit, license, easement or lease of real property, with or without improvements, or a similar transfer of an interest in real property, representing Federal financial assistance, has been executed by the Coast Guard prior to the effective date of this part, and the instrument effecting the transfer contains a clause making it revocable at will or within a stated period at the option of the Coast Guard, the recipient, after receiving reasonable notice to do so, shall (1) submit a statement that the property is being utilized in compliance with all requirements imposed by or pursuant to this part, or a

statement of the extent to which it is not, at the time the statement is made, so utilized, and (2) provide such methods of administration for the utilization of the property as are found by the Commandant to give reasonable assurance that the recipient will comply with all requirements imposed by or pursuant to this part, or reasonable assurance that any noncompliance indicated in the statement under clause (1) will be corrected.

(c) *Assurances from institutions.* (1) In the case of any application for Federal financial assistance to an institution of higher education or to a nonprofit organization whose primary purpose is the conduct of scientific research (including assistance for construction, for research, for a special training project, for a student loan program, or for any other purpose), the assurance required by this section shall extend to admission practices and to all other practices relating to the treatment of students.

(2) The assurance required with respect to an institution of higher education or any other institution or organization, insofar as the assurance relates to the institution's practices with respect to admission or other treatment of individuals as students or clients of the institution or to the opportunity to participate in the provision of services or other benefits to such individuals, shall be applicable to the entire institution unless the applicant establishes, to the satisfaction of the Commandant, that the institution's practices in designated parts or programs of the institution will in no way affect its practices in the program of the institution for which Federal financial assistance is sought, or the beneficiaries of or participants in such program. If in any such case the assistance sought is for the construction of a facility, or part of a facility, the assurance shall in any event extend to the entire facility and to facilities operated in connection therewith.

**§ 24.20 Compliance information.**

(a) *Cooperation and assistance.* The Commandant shall to the fullest extent practicable seek the cooperation of recipients in obtaining compliance with this part and shall provide assistance and guidance to recipients to help them comply voluntarily with this part.

(b) *Compliance reports.* Each recipient shall keep such records and submit to the Commandant or his designee timely, complete and accurate compliance reports at such times, and in such form and containing such information, as the Commandant or his designee may determine to be necessary to enable him to ascertain whether the recipient has complied or is complying with this part. In the case of any program under which a primary recipient extends Federal financial assistance to any other recipient, such other recipient shall also submit such compliance reports to the primary recipient as may be necessary to enable the primary recipient to carry out its obligations under this part.

(c) *Access to sources of information.* Each recipient shall permit access by the Commandant or his designee during normal business hours to such of its books, records, accounts, and other sources of information, and its facilities as may be pertinent to ascertain compliance with this part. Where any information required of a recipient is in the exclusive possession of any other agency, institution or person and this agency, institution or person shall fail or refuse to furnish this information, the recipient shall so certify in its report and shall set forth what efforts it has made to obtain the information.

(d) *Information to beneficiaries and participants.* Each recipient shall make available to participants, beneficiaries, and other interested persons such information regarding the provisions of this part and its applicability to the program under which the recipient receives Federal financial assistance, and make such information available to them in such manner, as the Commandant finds necessary to apprise such persons of the protections against discrimination assured them by the Act and this part.

**§ 24.25 Conduct of investigations.**

(a) *Periodic compliance reviews.* The Commandant or his designee shall from time to time review the practices of recipients to determine whether they are complying with this part.

(b) *Complaints.* Any person who believes himself or any specific class of individuals to be subjected to discrimination prohibited by this part may by himself or by a representative file with the Commandant or his designee a written complaint. A complaint must be filed not later than 90 days from the date of the alleged discrimination, unless the time for filing is extended by the Commandant or his designee.

(c) *Investigations.* The Commandant or his designee will make a prompt investigation whenever a compliance review, report, complaint, or any other information indicates a possible failure to comply with this part. The investigation should include, where appropriate, a review of the pertinent practices and policies of the recipient, the circumstances under which the possible noncompliance with this part occurred, and other factors relevant to a determination as to whether the recipient has failed to comply with this part.

(d) *Resolution of matters.* (1) If an investigation pursuant to paragraph (c) of this section indicates a failure to comply with this part, the Commandant or his designee will so inform the recipient and the matter will be resolved by informal means whenever possible. If it has been determined that the matter cannot be resolved by informal means, action will be taken as provided for in § 24.30.

(2) If an investigation does not warrant action pursuant to subparagraph (1) of this paragraph the Commandant or his designee will so inform the recipient and the complainant, if any, in writing.

(e) *Intimidatory or retaliatory acts prohibited.* No recipient or other person shall intimidate, threaten, coerce, or discriminate against any individual for the purpose of interfering with any right or privilege secured by section 601 of the Act or this part, or because he has made a complaint, testified, assisted, or participated in any manner in an investigation, proceeding, or hearing under this part. The identity of complainants shall be kept confidential except to the extent necessary to carry out the purposes of this part, including the conduct of any investigation, hearing, or judicial proceeding arising thereunder.

**§ 24.30 Procedure for effecting compliance.**

(a) *General.* If there appears to be a failure or threatened failure to comply with this part, and if the noncompliance or threatened noncompliance cannot be corrected by informal means, compliance with this part may be effected by the suspension or termination of or refusal to grant or to continue Federal financial assistance or by any other means authorized by law. Such other means may include, but are not limited to, (1) a reference to the Department of Justice with a recommendation that appropriate proceedings be brought to enforce any rights of the United States under any law of the United States (including other titles of the Act), or any assurance or other contractual undertaking and (2) any applicable proceeding under State or local law.

(b) *Noncompliance with § 24.15.* If an applicant fails or refuses to furnish an assurance required under § 24.15 or otherwise fails or refuses to comply with a requirement imposed by or pursuant to that section Federal financial assistance may be refused in accordance with the procedures of paragraph (c) of this section. The Coast Guard shall not be required to provide assistance in such a case during the pendency of the administrative proceedings under such paragraph except that the Coast Guard shall continue assistance during the pendency of such proceedings where such assistance is due and payable pursuant to an application therefor approved prior to the effective date of this part.

(c) *Termination of or refusal to grant or to continue Federal financial assistance.* No order suspending, terminating or refusing to grant or continue Federal financial assistance shall become effective until (1) the Commandant has advised the applicant or recipient of his failure to comply and has determined that compliance cannot be secured by voluntary means, (2) there has been an express finding on the record, after opportunity for hearing, of a failure by the applicant or recipient to comply with a requirement imposed by or pursuant to this part, (3) the action has been approved by the Secretary pursuant to § 24.40(c), and (4) the expiration of 30 days after the Secretary has filed with the committee of the House and the committee of the Senate having legislative jurisdiction over the program involved, a full written report of the circumstances and the grounds for such action. Any action to suspend or terminate or to refuse to grant or to continue Federal financial assistance shall be limited to the particular political entity, or part thereof, or other applicant or recipient as to whom such a finding has been made and shall be limited in its effect to the particular program, or part thereof, in which such noncompliance has been so found.

(d) *Other means authorized by law.* No action to effect compliance by any other means authorized by law shall be taken until (1) the Commandant had determined that compliance cannot be secured by voluntary means, (2) the action has been approved by the Secretary, (3) the recipient or other person has been notified of its failure to comply and of the action to be taken to effect compliance, and (4) the expiration of at least 10 days from the mailing of such notice to the recipient or other person. During this period of at least 10 days additional efforts shall be made to persuade the recipient or other person to comply with the regulation and to take such corrective action as may be appropriate.

**§ 24.35 Hearings.**

(a) *Opportunity for hearing.* Whenever an opportunity for a hearing is required by § 24.30(c), reasonable notice shall be given by registered or certified mail, return receipt requested, to the affected applicant or recipient. This notice shall advise the applicant or recipient of the action proposed to be taken, the specific provision under which the proposed action against it is to be taken, and the matters of fact or law asserted as the basis for this action, and either (1) fix a date not less than 20 days after the date of such notice within which the applicant or recipient may request of the Commandant that the matter be scheduled for hearing or (2) advise the applicant or recipient that the matter in question has been set down for hearing at a stated place and time. The time and place so fixed shall be reasonable and shall be subject to change for cause. The complainant, if any, shall be advised of the time and place of the hearing. An applicant or recipient may waive a hearing and submit written information and argument for the record. The failure of an applicant or recipient to request a hearing under this paragraph or to appear at a hearing for which a date has been set shall be deemed to be a waiver of the right to a hearing under section 602 of the Act and § 24.30(c) and consent to the making of a decision on the basis of such information as is available.

(b) *Time and place of hearing.* Hearings shall be held at the offices of the Coast Guard in Washington, D.C., at a time fixed by the Commandant unless he determines that the convenience of the applicant or recipient or of the Coast Guard requires that another place be selected. Hearings shall be held before the Commandant or, at his discretion, before a hearing examiner designated in accordance with section 11 of the Administrative Procedure Act.

(c) *Right to counsel.* In all proceedings under this section, the applicant or recipient and the Coast Guard shall have the right to be represented by counsel.

(d) *Procedures, evidence, and record.* (1) The hearing, decision, and any administrative review thereof shall be conducted in conformity with sections 5–8 of the Administrative Procedure Act, and in accordance with such rules of procedure as are proper (and not inconsistent with this section) relating to the conduct of the hearing, giving of notices subsequent to those provided for in paragraph (a) of this section, taking of testimony, exhibits, arguments and briefs, requests for findings, and other related matters. Both the Coast Guard and the applicant or recipient shall be entitled to introduce all relevant evidence on the issues as stated in the notice for hearing or as determined by the officer conducting the hearing at the outset of or during the hearing.

(2) Technical rules of evidence shall not apply to hearings conducted pursuant to this part, but rules or principles designed to assure production of the most credible evidence available and to subject testimony to test by cross-examination shall be applied where reasonably necessary by the officer conducting the hearing. The hearing officer may exclude irrelevant, immaterial, or unduly repetitious evidence. All documents and other evidence offered or taken for the record shall be open to examination by the parties and opportunity shall be given to refute facts and arguments advanced on either side of the issues. A transcript shall be made of the oral evidence except to the extent the substance thereof is stipulated for the record. All decisions shall be based upon the hearing record and written findings shall be made.

(e) *Consolidated or joint hearings.* In cases in which the same or related facts are asserted to constitute noncompliance with this regulation with respect to two or more programs to which this part applies, or noncompliance with this part and the regulations of one or more other Federal departments or agencies issued under Title VI of the Act, the Secretary may, by agreement with such other departments or agencies where applicable, provide for the conduct of consolidated or joint hearings, and for the application to such hearings of rules of procedures not inconsistent with this part. Final decisions in such cases, insofar as this regulation is concerned, shall be made in accordance with § 24.40.

**§ 24.40 Decisions and notices.**

(a) *Decision by person other than the Commandant.* If the hearing is held by a hearing examiner such hearing examiner shall either make an initial decision, if so authorized, or certify the entire record including his recommended findings and proposed decision to the Commandant for a final decision, and a copy of such initial decision or certification shall be mailed to the applicant or recipient. Where the initial decision is made by the hearing examiner the applicant or recipient may within 30 days of the mailing of such notice of initial decision file with the Commandant his exceptions to the initial decision, with his reasons therefor. In the absence of exceptions, the Commandant may on his own motion within 45 days after the initial decision serve on the applicant or recipient a notice that he will review the decision. Upon the filing of such exceptions or of such notice of review the Commandant shall review the initial decision and issue his own decision thereon including the reasons therefor. In the absence of either exceptions or a notice of review the initial decision shall constitute the final decision of the Commandant.

(b) *Decisions on record or review by the Commandant.* Whenever a record is certified to the Commandant for decision or he reviews the decision of a hearing examiner pursuant to paragraph (a) of this section, or whenever the Commandant conducts the hearing, the applicant or recipient shall be given reasonable opportunity to file with him briefs or other written statements of its contentions, and a copy of the final decision of the Commandant shall be given in writing to the applicant or recipient and to the complainant, if any.

(c) *Decisions on record where a hearing is waived.* Whenever a hearing is waived pursuant to § 24.35(a) a decision shall be made by the Commandant on the record and a copy of such decision shall be given in writing to the applicant or recipient, and to the complainant, if any.

(d) *Rulings required.* Each decision of a hearing officer or the Commandant shall set forth his ruling on each finding, conclusion, or exception presented, and shall identify the requirement or requirements imposed by or pursuant to this part with which it is found that the applicant or recipient has failed to comply.

(e) *Approval by Secretary.* Any final decision of the Commandant which provides for the suspension or termination of, or the refusal to grant or continue Federal financial assistance, or the imposition of any other sanction available under this part or the Act, shall promptly be transmitted to the Secretary, who may approve such decision, may vacate it, or remit or mitigate any sanction imposed.

(f) *Content of orders.* The final decision may provide for suspension or termination of, or refusal to grant or continue Federal financial assistance, in whole or in part, under the program involved, and may contain such terms, conditions, and other provisions as are consistent with and will effectuate the purposes of the Act and this part, including provisions designed to assure that no Federal financial assistance will thereafter be extended under such program to the applicant or recipient determined by such decision to be in default in its performance of an assurance given by it pursuant to this part, or to have otherwise failed to comply with this part, unless and until it corrects its noncompliance and satisfies the Commandant that it will fully comply with this part.

**§ 24.45 Judicial review.**

Action taken pursuant to section 602 of the Act is subject to judicial review as provided in section 603 of the Act.

**§ 24.50 Effect on other regulations; forms and instructions.**

(a) *Effect on other regulations.* All regulations, orders, or like directions heretofore issued by any officer of the Coast Guard, or by the Secretary, which impose requirements designed to prohibit any discrimination against individuals on the ground of race, color,

or national origin under any program to which this part applies, and which authorizes the suspension or termination of or refusal to grant or to continue Federal financial assistance to any applicant for or recipient of such assistance under such program for failure to comply with such requirements, are hereby superseded to the extent that such discrimination is prohibited by this part, except that nothing in this part shall be deemed to relieve any person of any obligation assumed or imposed under any such superseded regulation, order, instruction, or like direction prior to the effective date of this part. Nothing in this part, however, shall be deemed to supersede any of the following (including future amendments thereof): (1) Executive Orders 10925 and 11114 and regulations issued thereunder, or (2) any other regulations or instructions insofar as such regulations, or instructions prohibit discrimination on the ground of race, color, or national origin in any program or situation to which this part is inapplicable, or prohibit discrimination on any other ground.

(b) *Forms and instructions.* The Commandant shall issue and promptly make available to interested persons forms and detailed instructions and procedures for effectuating this part as applied to programs to which this part applies and for which he is responsible.

(c) *Supervision and coordination.* The Secretary may from time to time assign to officials of other departments or agencies of the Government with the consent of such departments or agencies, responsibilities in connection with the effectuation of the purposes of title VI of the Act and this part (other than responsibility for final decision as provided in § 24.40), including the achievement of effective coordination and maximum uniformity within the Executive Branch of the Government in the application of title VI and this part to similar programs and in similar situations.

**§ 24.55 Definitions.**

As used in this part—

(a) The term "Secretary" means the Secretary of the department in which the Coast Guard is operating.

(b) The term "Commandant" means the Commandant of the Coast Guard.

(c) The term "United States" means the States of the United States, the District of Columbia, Puerto Rico, the Virgin Islands, American Samoa, Guam, Wake Island, the Canal Zone, and the territories and possessions of the United States, and the term "State" means any one of the foregoing.

(d) The term "Federal financial assistance" includes (1) grants and loans of Federal funds, (2) the grant or donation of Federal property and interests in property, (3) the detail of Federal personnel, (4) the sale and lease of, and the permission to use (on other than a casual or transient basis), Federal property or any interest in such property without consideration or at a nominal consideration, or at a consideration which is reduced for the purpose of assisting the recipient, or in recognition of the public interest to be served by such sale or lease to the recipient, and (5) any Federal agreement, arrangement, or other contract which has as one of its purposes the provision of assistance.

(e) The term "program" includes any program, project, or activity for the provision of services, financial aid, or other benefits to individuals (including education or training, health, welfare, rehabilitation, housing, or other services, whether provided through employees of the recipient of Federal financial assistance or provided by others through contracts or other arrangements with the recipient, and including cash or loan or other assistance to individuals), or for the provision of facilities for furnishing services, financial aid or other benefits to individuals. The services, financial aid, or other benefits provided under a program receiving Federal financial assistance shall be deemed to include any services, financial aid, or other benefits provided with the aid of Federal financial assistance or with the aid of any non-Federal funds, property, or other resources required to be expended or made available for the program to meet matching requirements or other conditions which must be met in order to receive the Federal financial assistance, and to include any services, financial aid, or other benefits provided in or through a facility provided with the aid of Federal financial assistance or such non-Federal resources.

(f) The term "facility" includes all or any portion of structures, equipment, or other real or personal property or interests therein, and the provision of facilities includes the construction, expansion, renovation, remodeling, alteration or acquisition of facilities.

(g) The term "recipient" means any State, political subdivision of any State, or instrumentality of any State or political subdivision, any public or private agency, institution, or organization, or other entity, or any individual, in any State, to whom Federal financial assistance is extended, directly or through another recipient, for any program, including any successor, assign, or transferee thereof, but such term does not include any ultimate beneficiary under any such program.

(h) The term "primary recipient" means any recipient which is authorized or required to extend Federal financial assistance to another recipient for the purpose of carrying out a program.

(i) The term "applicant" means one who submits an application, request, or plan required to be approved by the Commandant or by a primary recipient, as a condition to eligibility for Federal financial assistance, and the term "application" means such an application, request, or plan.

**§ 24.60 Programs to which this part applies.**

(a) Lease of real property and the grant of permits, licenses, easements and rights of way covering real property under control of the Coast Guard, 14 U.S.C. 93 (n) and (o).

(b) Utilization of Coast Guard personnel and facilities to assist any State, Territory, Possession, or political subdivision thereof, 14 U.S.C. 141(a).

(c) Detail of Coast Guard personnel for duty in connection with maritime instruction and training by the States, Territories, and Puerto Rico, 14 U.S.C. 148.

(d) Disposal of obsolete and other Coast Guard material to sea scout service of Boy Scouts of America, any incorporated unit of the Coast Guard Auxiliary, and public body or private organization not organized for profit, 14 U.S.C. 641(a).

(e) Grants for the support of basic scientific research to nonprofit institutions of higher education and nonprofit organizations whose primary purpose is conduct of scientific research, 42 U.S.C. 1891.

*Effective date.* This part shall become effective on the 30th day following the date of its publication in the FEDERAL REGISTER.

Dated: December 15, 1964.

G. D'ANDELOT BELIN,
*Acting Secretary of the Treasury.*

Approved: December 28, 1964.

LYNDON B. JOHNSON.

# Title 38—PENSIONS, BONUSES, AND VETERANS' RELIEF

## Chapter I—Veterans Administration

## PART 18—NONDISCRIMINATION IN FEDERALLY-ASSISTED PROGRAMS OF THE VETERANS ADMINISTRATION—EFFECTUATION OF TITLE VI OF THE CIVIL RIGHTS ACT OF 1964

Title 38 CFR is hereby amended by adding the following new Part 18:

Sec.
18.1 Purpose.
18.2 Application of this part.
18.3 Discrimination prohibited.
18.4 Assurances required.
18.5 Illustrative applications.
18.6 Compliance information.
18.7 Conduct of investigations.
18.8 Procedure for effecting compliance.
18.9 Hearings.
18.10 Decisions and notices.
18.11 Judicial review.
18.12 Effect on other regulations; forms and instructions.
18.13 Definitions.

AUTHORITY: The provisions of this Part 18 are issued under sec. 602, 78 Stat. 252, and the laws referred to in Appendix A.

**§ 18.1 Purpose.**

The purpose of this part is to effectuate the provisions of title VI of the Civil Rights Act of 1964 (hereafter referred to as the "Act") to the end that no person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity receiving Federal financial assistance from the Veterans Administration.

**§ 18.2 Application of this part.**

This part applies to any program for which Federal financial assistance is authorized under a law administered by the Veterans Administration, including the Federally assisted programs and activities listed in Appendix A of this part. It applies to money paid, property transferred, or other Federal financial assistance extended under any such program after the effective date of this part pursuant to an application approved prior to such effective date. This part does not apply to (a) any Federal financial assistance by way of insurance or guaranty contracts, (b) money paid, property transferred, or other assistance extended under any such program before the effective date of this part, (c) any assistance to any individual who is the ultimate beneficiary under any such program, or (d) any employment practice, under any such program, of any employer, employment agency, or labor organization, except to the extent described in § 18.3. The fact that a program or activity is not listed in Appendix A shall not mean, if Title VI of the Act is otherwise applicable, that such program is not covered. Other programs under statutes now in force or hereinafter enacted may be added to this list by notice published in the FEDERAL REGISTER.

**§ 18.3 Discrimination prohibited.**

(a) *General.* No person in the United States shall, on the ground of race, color, or national origin be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program to which this part applies.

(b) *Specific discriminatory actions prohibited.* (1) A recipient under any program to which this part applies may not, directly or through contractual or other arrangements, on ground of race, color, or national origin:

(i) Deny an individual any service, financial aid, or other benefit provided under the program;

(ii) Provide any service, financial aid, or other benefit to an individual which is different, or is provided in a different manner, from that provided to others under the program;

(iii) Subject an individual to segregation or separate treatment in any matter related to his receipt of any service, financial aid, or other benefit under the program;

(iv) Restrict an individual in any way in the enjoyment of any advantage or privilege enjoyed by others receiving any service, financial aid, or other benefit under the program;

(v) Treat an individual differently from others in determining whether he satisfies any admission, enrollment, quota, eligibility, membership or other requirement or condition which individuals must meet in order to be provided any service, financial aid, or other benefit provided under the program.

(2) A recipient, in determining the types of services, financial aid, or other benefits, or facilities which will be provided under any such program, or the class of individuals to whom, or the situations in which, such services, financial aid, other benefits, or facilities will be provided under any such program, or the class of individuals to be afforded an opportunity to participate in any such program, may not, directly or through contractual or other arrangements, utilize criteria or methods of administration which have the effect of subjecting individuals to discrimination because of their race, color, or national origin, or have the effect of defeating or substantially impairing accomplishment of the objectives of the program as respect individuals of a particular race, color, or national origin.

(3) As used in this section the services, financial aid, or other benefits provided under a program receiving Federal financial assistance shall be deemed to include any service, financial aid, or other benefit provided in or through a facility provided with the aid of Federal financial assistance.

(4) The enumeration of specific forms of prohibited discrimination in this paragraph does not limit the generality of the prohibition in paragraph (a) of this section.

(c) *Medical emergencies.* Notwithstanding the foregoing provisions of this section, a recipient of Federal financial assistance shall not be deemed to have failed to comply with paragraph (a) of this section if immediate provision of a service or other benefit to an individual is necessary to prevent his death or serious impairment of his health, and such service or other benefit cannot be provided except by or through a medical institution which refuses or fails to comply with paragraph (a) of this section.

**§ 18.4 Assurances required.**

(a) *General.* (1) Every application for Federal financial assistance to carry out a program to which this part applies, except a program to which paragraph (b) of this section applies, and every application for Federal financial assistance to provide a facility shall, as a condition to its approval and the extension of any Federal financial assistance pursuant to the application, contain or be accompanied by an assurance that the program will be conducted or the facility operated in compliance with all requirements imposed by or pursuant to this part. In the case of an application for Federal financial assistance to provide real property or structures thereon, the assurance shall obligate the recipient, or, in the case of a subsequent transfer, the transferee, for the period during which the real property or structures are used for a purpose for which the Federal financial assistance is extended or for another purpose involving the provision of similar services or benefits. In the case of personal property the assurance shall obligate the recipient for the period during which he retains ownership or possession of the property. In all other cases the assurance shall obligate the recipient for the period during which Federal financial assistance is extended pursuant to the application. The responsible agency official shall specify the form of the foregoing assurances for each program, and the extent to which like assurances will be required of subgrantees, contractors and subcontractors, transferees, successors in interest, and other participants in the program. Any such assurance shall include provisions which give the United States a right to seek its judicial enforcement.

(2) Transfers of surplus property are subject to regulations issued by the Administrator of General Services (41 CFR Subpart 101-6.2).

(b) *Continuing State programs.* Every application by a State or a State agency to carry out a program involving continuing Federal financial assistance to which this part applies (including the programs listed in Appendix A) shall as a condition to its approval and the extension of any Federal financial assistance pursuant to the application (1) contain or be accompanied by a statement that the program is (or, in the case of a new program, will be) conducted in compliance with all requirements imposed by or pursuant to this part, or a statement of the extent to which it is not, at the time the statement is made, so conducted, and (2) provide or be accompanied by provision for such methods of administration for the program as are found by the responsible agency official to give reasonable assurance that the applicant and all recipients of Federal financial assistance under such pro-

gram will comply with all requirements imposed by or pursuant to this part, including methods of administration which give reasonable assurance that any noncompliance indicated in the statement under subparagraph (1) of this paragraph will be corrected. In any case in which the recipient is claiming financial assistance under a continuing program pursuant to arrangements entered into prior to the effective date of this part, the assurances provided by this paragraph shall be included in the first application or claim for assistance on or after the effective date of this part.

**§ 18.5 Illustrative applications.**

The following examples will illustrate the application of the foregoing provisions to certain programs of the Veterans Administration. (In all cases the discrimination prohibited is discrimination on the ground of race, color, or national origin prohibited by title VI of the Act and this part, as a condition of the receipt of Federal financial assistance.)

(a) In grant programs which support the provision of health or welfare services for veterans in State homes, discrimination in the selection or eligibility of individuals to receive the services, and segregation or other discriminatory practices in the manner of providing them, are prohibited. This prohibition extends to all facilities and services provided by the State as grantee under the program or by a political subdivision of the State. It extends also to services purchased or otherwise obtained by the grantee (or political subdivision) from hospitals, nursing homes, schools, and similar institutions for beneficiaries of the program, and to the facilities in which such services are provided, subject, however, to the provisions of § 18.3(c).

(b) In grant programs to assist in the construction of facilities for the provision of health or welfare services assurances will be required that services will be provided without discrimination, to the same extent that discrimination would be prohibited as a condition of Federal operating grants for the support of such services. Thus, as a condition of grants for the construction of a State home for furnishing nursing home care, assurances will be required that there will be no discrimination in the admission or treatment of patients. In the case of such grants the assurance will apply to patients, to interns, residents, student nurses, and other trainees, and to the privilege of physicians, dentists, and other professionally qualified persons to practice in the nursing home, and will apply to the entire facility for which, or for a part of which, the grant is made, and to facilities operated in connection therewith.

(c) Upon transfers of real or personal surplus property for health or educational uses, discrimination is prohibited to the same extent as in the case of grants for the construction of facilities or the provision of equipment for like purposes.

(d) A recipient may not take action that is calculated to bring about indirectly what this part forbids it to accomplish directly. Thus a State, in selecting or approving projects or sites for the construction of a nursing home which will receive Federal financial assistance, may not base its selections or approvals on criteria which have the effect of defeating or of substantially impairing accomplishment of the objectives of the Federal assistance program as respects individuals of a particular race, color, or national origin.

**§ 18.6 Compliance information.**

(a) *Cooperation and assistance.* Each responsible agency official shall to the fullest extent practicable seek the cooperation of recipients in obtaining compliance with this part and shall provide assistance and guidance to recipients to help them comply voluntarily with this part.

(b) *Compliance reports.* Each recipient shall keep such records and submit to the responsible agency official or his designee timely, complete and accurate compliance reports at such times, and in such form and containing such information, as the responsible agency official or his designee may determine to be necessary to enable him to ascertain whether the recipient has complied or is complying with this part. In the case of any program under which a primary recipient extends Federal financial assistance to any other recipient, such other recipient shall also submit such compliance reports to the primary recipient as may be necessary to enable the primary recipient to carry out its obligations under this part.

(c) *Access to sources of information.* Each recipient shall permit access by the responsible agency official or his designee during normal business hours to such of its books, records, accounts, and other sources of information, and its facilities as may be pertinent to ascertain compliance with this part. Where any information required of a recipient is in the exclusive possession of any other agency, institution or person and this agency, institution or person shall fail or refuse to furnish this information, the recipient shall so certify in its report and shall set forth what efforts it has made to obtain the information.

(d) *Information to beneficiaries and participants.* Each recipient shall make available to participants, beneficiaries, and other interested persons such information regarding the provisions of this part and its applicability to the program under which the recipient receives Federal financial assistance, and make such information available to them in such manner, as the responsible agency official finds necessary to apprise such persons of the protections against discrimination assured them by the Act and this part.

**§ 18.7 Conduct of investigations.**

(a) *Periodic compliance reviews.* The responsible agency official or his designee shall from time to time review the practices of recipients to determine whether they are complying with this part.

(b) *Complaints.* Any person who believes himself or any specific class of individuals to be subjected to discrimination prohibited by this part may by himself or by a representative file with the responsible agency official or his designee a written complaint. A complaint must be filed not later than 90 days from the date of the alleged discrimination, unless the time for filing is extended by the responsible agency official or his designee.

(c) *Investigations.* The responsible agency official or his designee will initiate a prompt investigation whenever a compliance review, report, complaint, or any other information indicates a possible failure to comply with this part. The investigation should include, where appropriate, a review of the pertinent practices and policies of the recipient, the circumstances under which the possible noncompliance with this part occurred, and other factors relevant to a determination as to whether the recipient has failed to comply with this part.

(d) *Resolution of matters.* (1) If an investigation pursuant to paragraph (c) of this section indicates a failure to comply with this part, the responsible agency official or his designee will so inform the recipient and the matter will be resolved by informal means whenever possible. If it has been determined that the matter cannot be resolved by informal means, action will be taken as provided for in § 18.8.

(2) If an investigation does not warrant action pursuant to subparagraph (1) of this paragraph the responsible agency official or his designee will so inform the recipient and the complainant, if any, in writing.

(e) *Intimidatory or retaliatory acts prohibited.* No recipient or other person shall intimidate, threaten, coerce, or discriminate against any individual for the purpose of interfering with any right or privilege secured by section 601 of the Act or this part, or because he has made a complaint, testified, assisted, or participated in any manner in an investigation, proceeding, or hearing under this part. The identity of complainants shall be kept confidential except to the extent necessary to carry out the purposes of this part, including the conduct of any investigation, hearing, or judicial proceeding arising thereunder.

**§ 18.8 Procedure for effecting compliance.**

(a) *General.* If there appears to be a failure or threatened failure to comply with this part, and if the noncompliance or threatened noncompliance cannot be corrected by informal means, compliance with this part may be effected by the suspension or termination of or refusal to grant or to continue Federal financial assistance or by any other means authorized by law. Such other means may include, but are not limited to, (1) a reference to the Department of Justice with a recommendation that appropriate proceedings be brought to enforce any rights of the United States under any law of the United States (including other titles of the Act), or any assurance or other contractual undertaking, and (2) any applicable proceeding under State or local law.

(b) *Noncompliance with § 18.4.* If an applicant fails or refuses to furnish an assurance required under § 18.4 or otherwise fails or refuses to comply with a requirement imposed by or pursuant to that section Federal financial assistance may be refused in accordance with the procedures of paragraph (c) of this section. The Veterans Administration shall not be required to provide assistance in such a case during the pendency of the administrative proceedings under such paragraph except that the Veterans Administration shall continue assistance during the pendency of such proceedings where such assistance is due and payable pursuant to an application therefor approved prior to the effective date of this part.

(c) *Termination of or refusal to grant or to continue Federal financial assistance.* No order suspending, terminating or refusing to grant or continue Federal financial assistance shall become effective until (1) the responsible agency official has advised the applicant or recipient of his failure to comply and has determined that compliance cannot be secured by voluntary means, (2) there has been an express finding on the record, after opportunity for hearing, of a failure by the applicant or recipient to comply with a requirement imposed by or pursuant to this part, (3) the action has been approved by the Administrator pursuant to § 18.10(e), and (4) the expiration of 30 days after the Administrator has filed with the committee of the House and the committee of the Senate having legislative jurisdiction over the program involved, a full written report of the circumstances and the grounds for such action. Any action to suspend or terminate or to refuse to grant or to continue Federal financial assistance shall be limited to the particular political entity, or part thereof, or other applicant or recipient as to whom such a finding has been made and shall be limited in its effect to the particular program, or part thereof, in which such noncompliance has been so found.

(d) *Other means authorized by law.* No action to effect compliance by any other means authorized by law shall be taken until (1) the responsible agency official has determined that compliance cannot be secured by voluntary means, (2) the action has been approved by the Administrator, (3) the recipient or other person has been notified of its failure to comply and of the action to be taken to effect compliance, and (4) the expiration of at least 10 days from the mailing of such notice to the recipient or other person. During this period of at least 10 days additional efforts shall be made to persuade the recipient or other person to comply with this part and to take such corrective action as may be appropriate.

**§ 18.9 Hearings.**

(a) *Opportunity for hearing.* Whenever an opportunity for a hearing is required by § 18.8(c), reasonable notice shall be given by registered or certified mail, return receipt requested, to the affected applicant or recipient. This notice shall advise the applicant or recipient of the action proposed to be taken, the specific provision under which the proposed action against it is to be taken, and the matters of fact or law asserted as the basis for this action, and either (1) fix a date not less than 20 days after the date of such notice within which the applicant or recipient may request of the responsible agency official that the matter be scheduled for hearing or (2) advise the applicant or recipient that the matter in question has been set down for hearing at a stated place and time. The time and place so fixed shall be reasonable and shall be subject to change for cause. The complainant, if any, shall be advised of the time and place of the hearing. An applicant or recipient may waive a hearing and submit written information and argument for the record. The failure of an applicant or recipient to request a hearing under this paragraph or to appear at a hearing for which a date has been set shall be deemed to be a waiver of the right to a hearing under section 602 of the Act and § 18.8(c) of this part and consent to the making of a decision on the basis of such information as is available.

(b) *Time and place of hearing.* Hearings shall be held at the offices of the Veterans Administration in Washington, D.C., at a time fixed by the responsible agency official unless he determines that the convenience of the applicant or recipient or of the Veterans Administration requires that another place be selected. Hearings shall be held before the responsible agency official or, at his discretion, before a hearing examiner designated in accordance with section 11 of the Administrative Procedure Act.

(c) *Right to counsel.* In all proceedings under this section, the applicant or recipient and the Veterans Administration shall have the right to be represented by counsel.

(d) *Procedures, evidence, and record.* (1) The hearing, decision, and any administrative review thereof shall be conducted in conformity with sections 5–8 of the Administrative Procedure Act, and in accordance with such rules of procedure as are proper (and not inconsistent with this section) relating to the conduct of the hearing, giving of notices subsequent to those provided for in paragraph (a) of this section, taking of testimony, exhibits, arguments and briefs, requests for findings, and other related matters. Both the Veterans Administration and the applicant or recipient shall be entitled to introduce all relevant evidence on the issues as stated in the notice for hearing or as determined by the officer conducting the hearing at the outset of or during the hearing.

(2) Technical rules of evidence shall not apply to hearings conducted pursuant to this part, but rules or principles designed to assure production of the most credible evidence available and to subject testimony to test by cross-examination shall be applied where reasonably necessary by the officer conducting the hearing. The hearing officer may exclude irrelevant, immaterial, or unduly repetitious evidence. All documents and other evidence offered or taken for the record shall be open to examination by the parties and opportunity shall be given to refute facts and arguments advanced on either side of the issues. A transcript shall be made of the oral evidence except to the extent the substance thereof is stipulated for the record. All decisions shall be based upon the hearing record and written findings shall be made.

(e) *Consolidated or joint hearings.* In cases in which the same or related facts are asserted to constitute noncompliance with this part with respect to two or more programs to which this part applies, or noncompliance with this part and the regulations of one or more other Federal departments or agencies issued under Title VI of the Act, the Administrator may, by agreement with such other departments or agencies where applicable, provide for the conduct of consolidated or joint hearings, and for the application to such hearings of rules of procedures not inconsistent with this part. Final decisions in such cases, insofar as this part is concerned, shall be made in accordance with § 18.10.

**§ 18.10 Decisions and notices.**

(a) *Decision by person other than the responsible agency official.* If the hearing is held by a hearing examiner such hearing examiner shall either make an initial decision, if so authorized, or certify the entire record including his recommended findings and proposed decision to the responsible agency official for a final decision, and a copy of such initial decision or certification shall be mailed to the applicant or recipient. Where the initial decision is made by the hearing examiner the applicant or recipient may within 30 days of the mailing of such notice of initial decision file with the responsible agency official his exceptions to the initial decision, with his reasons therefor. In the absence of exceptions, the responsible agency official may on his own motion within 45 days after the initial decision serve on the applicant or recipient a notice that he will review the decision. Upon the filing of such exceptions or of such notice of review the responsible agency official shall review the initial decision and issue his own decision thereon including the reasons therefor. In the absence of either exceptions or a notice of review the initial decision shall constitute the final decision of the responsible agency official.

(b) *Decisions on record or review by the responsible agency official.* Whenever a record is certified to the responsible agency official for decision or he reviews the decision of a hearing examiner pursuant to paragraph (a) of this section, or whenever the responsible agency official conducts the hearing, the applicant or recipient shall be given reasonable opportunity to file with him briefs or other written statements of its contentions, and a copy of the final decision of the responsible agency official shall be given in writing to the applicant or recipient and to the complainant, if any.

(c) *Decisions on record where a hearing is waived.* Whenever a hearing is waived pursuant to § 18.9(a) a decision shall be made by the responsible agency official on the record and a copy of such decision shall be given in writing to the applicant or recipient, and to the complainant, if any.

(d) *Rulings required.* Each decision of a hearing officer or responsible agency official shall set forth his ruling on each finding, conclusion, or exception presented, and shall identify the requirement or requirements imposed by or pursuant to this part with which it is found that the applicant or recipient has failed to comply.

(e) *Approval by Administrator.* Any final decision of a responsible agency official (other than the Administrator) which provides for the suspension or termination of, or the refusal to grant or continue Federal financial assistance, or the imposition of any other sanction available under this part or the Act, shall promptly be transmitted to the Administrator, who may approve such decision, may vacate it, or remit or mitigate any sanction imposed.

(f) *Content of orders.* The final decision may provide for suspension or termination of, or refusal to grant or continue Federal financial assistance, in whole or in part, under the program involved, and may contain such terms, conditions, and other provisions as are consistent with and will effectuate the purposes of the Act and this part, including provisions designed to assure that no Federal financial assistance will thereafter be extended under such program to the applicant or recipient determined by such decision to be in default in its performance of an assurance given by it pursuant to this part, or to have otherwise failed to comply with this part, unless and until it corrects its noncompliance and satisfies the responsible agency official that it will fully comply with this part.

**§ 18.11 Judicial review.**

Action taken pursuant to section 602 of the Act is subject to judicial review as provided in section 603 of the Act.

**§ 18.12 Effect on other regulations; forms and instructions.**

(a) *Effect on other regulations.* All regulations, orders, or like directions heretofore issued by any officer of the Veterans Administration which impose requirements designed to prohibit any discrimination against individuals on the ground of race, color, or national origin under any program to which this part applies, and which authorize the suspension or termination of or refusal to grant or to continue Federal financial assistance to any applicant for or recipient of such assistance under such program for failure to comply with such requirements, are hereby superseded to the extent that such discrimination is prohibited by this part, except that nothing in this part shall be deemed to relieve any person of any obligation assumed or imposed under any such superseded regulation, order, instruction, or like direction prior to the effective date of this part. Nothing in this part, however, shall be deemed to supersede any of the following (including future amendments thereof): Executive Orders 10925 and 11114 and regulations issued thereunder, or (2) Executive Order 11063 and regulations issued thereunder, or any other regulations or instructions, insofar as such Order, regulations, or instructions prohibit discrimination on the ground of race, color, or national origin in any program or situation to which this part is inapplicable, or prohibit discrimination on any other ground.

(b) *Forms and instructions.* Each responsible agency official shall issue and promptly make available to interested persons forms and detailed instructions and procedures for effectuating this part as applied to programs to which this part applies and for which he is responsible.

(c) *Supervision and coordination.* The Administrator may from time to time assign to officials of other departments or agencies of the Government with the consent of such departments or agencies, responsibilities in connection with the effectuation of the purposes of title VI of the Act and this part (other than responsibility for final decision as provided in § 18.10), including the achievement of effective coordination and maximum uniformity within the Veterans Administration and within the Executive Branch of the Government in the application of title VI and this part to similar programs and in similar situations.

**§ 18.13 Definitions.**

As used in this part—

(a) The term "agency" means the Veterans Administration, and includes each of its operating agencies and other organization units.

(b) The term "Administrator" means the Administrator of Veterans Affairs.

(c) The term "responsible agency official" with respect to any program receiving Federal financial assistance means the Administrator or other official of the Veterans Administration who by law or by delegation has the principal responsibility within the Veterans Administration for the administration of the law extending such assistance.

(d) The term "United States" means the States of the United States, the District of Columbia, Puerto Rico, the Virgin Islands, American Samoa, Guam, Wake Island, the Canal Zone, and the territories and possessions of the United States, and the term "State" means any one of the foregoing.

(e) The term "Federal financial assistance" includes (1) grants of Federal funds, (2) the grant or donation of Federal property and interests in property, (3) the detail of Federal personnel, (4) the sale and lease of, and the permission to use (on other than a casual or transient basis), Federal property or any interest in such property without consideration or at a nominal consideration, or at a consideration which is reduced for the purpose of assisting the recipient, or in recognition of the public interest to be served by such sale or lease to the recipient, and (5) any Federal agreement, arrangement, or other contract which has as one of its purposes the provision of assistance.

(f) The term "program" includes any program, project, or activity for the provision of services, financial aid, or other benefits to individuals (including health, welfare, medical rehabilitation, or other services, whether provided through employees of the recipient of Federal financial assistance or provided by others through contracts or other arrangements with the recipient, and including work opportunities or other assistance to individuals), or for the provision of facilities for furnishing services, financial aid or other benefits to individuals. The services, financial aid, or other benefits provided under a program receiving Federal financial assistance shall be deemed to include any services, financial aid, or other benefits provided with the aid of Federal financial assistance or with the aid of any non-Federal funds, property, or other resources required to be expended or made available for the program to meet matching requirements or other conditions which must be met in order to receive the Federal financial assistance, and to include any services, financial aid, or other benefits provided in or through a facility provided with the aid of Federal financial assistance or such non-Federal resources.

(g) The term "facility" includes all or any portion of structures, equipment, or other real or personal property or interests therein, and the provision of facilities includes the construction, expansion, renovation, remodeling, alteration or acquisition of facilities.

(h) The term "recipient" means any State, political subdivision of any State, or instrumentality of any State or political subdivision, any public or private agency, institution, or organization, or other entity, or any individual, in any State, to whom Federal financial assistance is extended, directly or through another recipient, for any program, including any successor, assign, or transferee thereof, but such term does not include any ultimate beneficiary under any such program.

(i) The term "primary recipient" means any recipient which is authorized or required to extend Federal financial assistance to another recipient for the purpose of carrying out a program.

(j) The term "applicant" means one who submits an application, request, or plan required to be approved by a responsible agency official, or by a primary recipient, as a condition to eligibility for Federal financial assistance, and the term "application" means such an application, request, or plan.

*Effective date.* This part shall become effective on the 30th day following the date of its publication in the FEDERAL REGISTER.

Dated: December 11, 1964.

[SEAL] W. J. DRIVER,
*Deputy Administrator.*

For: J. S. GLEASON, JR.,
*Administrator of Veterans Affairs.*

Approved: December 28, 1964.

LYNDON B. JOHNSON.

APPENDIX A

PROGRAMS TO WHICH THIS PART APPLIES

1. Payments to State Homes (sec. 641, title 38, United States Code).

2. State Home facilities for furnishing nursing home care (secs. 5031–5037, title 38, United States Code).

3. Space and office facilities for representatives of recognized national organizations (sec. 3402(a)(2), title 38, United States Code).
